Gramm-Latta II, with its cruel cutoff of the minimum benefit, was rammed through the House on orders from the President. It would be a simple matter for him now to direct the Republican-controlled Senate to undo this damage before Congress adjourns.

As recently as Monday of last week he seemed to be telling the American people he would not allow any social security recipient to be stripped of his or her benefits.

He said:

I stated during the campaign, and I repeat now, I will not stand by and see those of you who are dependent on social security deprived of your benefits.

And he continued:

I personally will see that no part of the plan will be at the expense of you who are now dependent on your monthly social security checks.

The President is not a mean man. Surely he would not want to leave 3 million people condemned and left to await the possibility of a reprieve when he had it in his power to correct this injustice instantly.

Surely he would not wash his hands

of this responsibility.

Madam Speaker, I urge the President to get on the telephone today and call on Senator BAKER to bring the minimum benefit bill (H.R. 4331) to the floor for passage before leaving for the recess. He can do it. He should do it if he is going to keep faith with the American people.

SAVING SOCIAL SECURITY

(Mr. JEFFRIES asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. JEFFRIES. Madam Speaker, there continues to be a great deal of controversy regarding the financing of social security. The administration has been accused of being callous to the feelings and the situation of the elderly because of its attempts to salvage the system. Why do I say salvage? Because the cold, hard reality is that the old age and survivors insurance trust fund will be bankrupt by late 1982 unless something drastic is done, and now. The majority leadership of the House has refused to find a lasting remedy to this situation, but instead has continually relied upon quick fixes to soothe the populace.

The administration, after careful study, has proposed some reasoned solutions to the social security crisis. Two points of the President's plan will be of great comfort to the elderly. First, this plan will protect the solvency of the system that currently faces bankruptcy. Second, the vast majority of those currently receiving benefits will continue to receive them, including cost-of-living allowances.

While I may not agree with all of the President's social security proposals, I believe he deserves credit for courageously addressing the problem. And I believe his proposals are proof of his continuing concern for our retirees.

□ 1230

A SMALL BUSINESSMAN WHO DESERVES RECOGNITION

(Mrs. ROUKEMA asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. ROUKEMA. Madam Speaker, I am proud to report that a resident of my district, Mr. William Yuan, was recently honored as the New Jersey Small Business Person of the Year.

Mr. Yuan represents innovation and initiative at its best. He started his business 12 years after emigrating from Taiwan and working a series of odd jobs that helped him graduate from the College of Emporia in Kansas. He earned a bachelor of science degree in civil engineering.

After learning the business as a salesman in the plastics industry, Mr. Yuan successfully broke in through a combination of hard work and innovation. Part of an SBA loan he received went toward the development of a new process for cooling plastic molds, for example.

Although there have been setbacks caused, in part, by two major creditors who went out of business and by skyrocketing energy costs, Mr. Yuan has succeeded in raising sales figures from \$360,000 to more than \$8 million in 11 years. Today, the company's products are used in the manufacturing process of the pharmaceutical, toy, and houseware industries.

On behalf of the people of New Jersey and the Congress, I congratulate Mr. Yuan on this well-deserved

FIRE PATCO STRIKERS

(Mr. RUDD asked and was given permission to address the House for 1 minute and to revise and extend his

Mr. RUDD. Madam Speaker, the unconscionable strike carried out by members of the Professional Air Traffic Controllers Organization should be dealt with by swift and suitable punishment. Every one of the union members who participated should be fired, and prosecuted with the full extent of the law.

In 1978, Congress passed the Civil Service Reform Act and included my amendment stating in clear and unequivocal language that strikes of this kind are illegal and punishable by dismissal and fines. This amendment removed any doubt about the intent of Congress with regard to strikes by Federal employees.

If this strike is allowed to go unpunished, it will only encourage other Government workers to engage in such destructive arrogance against the people.

I support our President and know he will proceed immediately with the dismissals and prosecutions. I urge firmness in enforcement of the law. To do so will truly serve our Nation.

THE NATIONAL AGENDA

(Mr. MICHEL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MICHEL. Madam Speaker, as we prepare to return to our districts, I would remind my colleagues that the great victory won for the American people on the economy during the first 7 months of this session will mean nothing unless we bring the same effort to questions of national security, foreign affairs, and a host of other questions. We have a national agenda to consider and each part depends on the other parts.

So let us not be content to simply remind our constituents what we have accomplished. Let us also remind them-and ourselves-what we have yet to do.

We have been through some tough battles during the past few months, the pressure has been unprecedented, the stakes have been high, tempers have sometimes flared, friendships have been strained.

I know that during the next few weeks, while we breathe the fresh air of our districts, we will rid ourselves of any political or personal animosities that may have flourished in this artificial hothouse atmosphere in Washing-

I know I speak for all those on my side of the aisle when I say, Madam Speaker, we look forward to working with you when we return because, when all is said and done, love of

nation is the bond that holds us all to- a cost to the taxpayers of more than gether.

NEW ECONOMIC POLICIES LONG TERM IN NATURE, DEMAND PATIENCE

(Mr. BETHUNE asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. BETHUNE. Madam Speaker, today we finish up the tax package, the fourth part of President Reagan's economic recovery program. Throughout the debate it was characterized from time to time as being a risky proposition. I often wondered about that because it seemed to me it would be risky to stick with the tired, worn out policies that got us into this condition.

This is a well-thought-out plan, and it merely goes back to the fundamentals on which the country's economy was built in the first place.

Many people are beginning to ask, "All right, when are the results going to take place?" I would make the point that this is not a short-term policy; it is a long-term policy. Besides that, none of the laws or policies that we have passed here in the last few weeks and months will start until October 1 when the next fiscal year begins.

So, Madam Speaker, I hope the American people will be patient. We are embarked on a new long-term policy. The question is now whether we have the national resolve to stick with this policy long enough to give it a chance.

IS THIS TRIP NECESSARY?

(Mr. WEBER of Ohio asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WEBER of Ohio. Madam Speaker, as Members of the Congress, we have an obligation to the taxpayers and to our constituency to reduce Federal spending in every way that we

I recognize that congressional travel overseas is often necessary, but it should be done with great restraint and concern for the present efforts of Congress to reduce waste and excessive Government spending.

For example, the public is demanding to know whether the recent congressional trip to the International Air Show in Paris needed to be done on the lavish scale reported by the press.

No one questions that this event is an opportunity to promote international good will and we want to continue to have American participation with other countries in this biennial event. However, the public wants to know if it is necessary to send 23 Representatives and Senators, along with 70 staff members and other persons at

\$288,000 in air travel alone to have a Paris vacation trip.

As leaders, we should set an example of reduced Federal spending-we owe an accounting to the public of the way we spend their money-it behooves us to be more cautious in the future and explain why whenever taxpayers ask, "Is this trip necessary?"

GOAL FOR THE 1980'S: A PERMA-NENT MANNED OPERATIONS CENTER IN SPACE

(Mr. GRISHAM asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GRISHAM. Madam Speaker, in 1961, President John Kennedy made a dramatic commitment on behalf of our Nation-to land a man on the Moon by the end of that decade. Through the strength of American industry and technology, that dream was fulfilled.

Today, after a period of dormancy, America is approaching a new era in space exploration and development. With the successful flight of the Space Shuttle Columbia earlier this year, our Nation took a quantum leap forward in its capability to open the space environment for research, development, and commercial purposes.

The space environment possesses resources and potential comparable in impact to those facing the early explorers of our own continent. Today, as in that earlier time, those nations able to capitalize on the untapped environment will lead the world into a new age of industrial, economic, and scientific development.

America will be the Nation to herald this new age only if we are willing to commit ourselves to clearly articulated goals and priorities. Once set forth, we must work toward these goals with a shared spirit of national purpose.

Therefore, Madam Speaker, I am today introducing a resolution to express the sense of the Congress that the United States embark on a program to establish a permanent manned presence in space by the end of this decade in the form of a manned operations center in low Earth orbit. This facility will be necessary to support the future commercial, scientific, technological, and humanitarian uses of the space environment. We have the ability to achieve this goal. If we display the desire as well, the rewards will be great.

INTRODUCTION OF RESOLUTION DECLARING AIR TRAFFIC CON-TROLLERS STRIKE ILLEGAL

(Mr. RITTER asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. RITTER. Madam Speaker, Mr. Poli of the Professional Air Traffic Controllers Organization (PATCO), prior to the first agreement with the DOT, stated before the Senate Commerce Committee:

In no way is PATCO planning to go on strike in 1981.

And I quote again:

I make no excuses for people involved in illegal actions.

I quote again:

It is illegal to strike, and I have never encouraged people to strike.

It is ironic that Mr. Poli agreed to the terms of the original agreement and then recommended rejection of its terms by the union members.

Madam Speaker, I am introducing a resolution today stating the sense of Congress that this strike is illegal, and that it violates an employment contract and a sworn oath not to strike, that it poses enormous public safety concerns, that it disrupts our national transportation system, and that it results in significant loss to the American economy. The resolution states that it is the sense of Congress that the strike immediately cease, and that negotiations proceed in order to reach a mutually agreeable solution.

IRA SAVINGS IS FEATURE OF HOMEMAKER RETIREMENT BILL

(Mr. TRIBLE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. TRIBLE. Madam Speaker, this year with the support of 122 of my colleagues, I reintroduced the Trible homemaker retirement bill (H.R. 3631). This legislation would permit America's 30 to 50 million homemakers to establish individual retirement accounts identical to those now afforded other self-employed workers.

I am pleased to report that the Tax Incentive Act of 1981 incorporates the objectives of the homemaker retirement bill. It significantly expands eligibility for independent retirement accounts. An employee can establish two IRA's, one for the employee and one for the nonemployee spouse, whether or not an active participant in an employer-sponsored retirement plan. It also increases the yearly amount those participating would be allowed to contribute and claim as adjustments to income.

The IRA is an idea whose time has come. Pressure on the financially troubled social security system will be eased by encouraging people to save for their retirement years.

By expanding the availability of IRA's the total level of savings in the country will increase. More savings in America means increased investment, more employment and greater productivity—the keys to "real" economic growth.

It is time Congress stopped ignoring America's homemakers. Let us enact the tax bill today to enhance their opportunities to save for retirement.

SUPPORT FOR ADMINISTRATION EFFORTS TO SETTLE PATCO STRIKE

(Mr. COUGHLIN asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. COUGHLIN. Madam Speaker, I rise to express the outrage of this Member and the entire Congress over the current air traffic controllers strike. Airlines, air travelers, and the U.S. Government are being held hostage by this illegal action which is tantamount to desertion in the line of duty. The strikers are flaunting the law, their own oaths, and the American public.

The prohibition on governmental union strikes stems from the mission of the Government to provide public services and a lack of the competition which is found in the private sector. Those who hold the public trust are expected to promote the safety and well-being of the public, not hamper it. That traffic is moving at all is due to the excellent work of the Federal Aviation Administration and the Department of Transportation and the 29 percent of the 15,000-member Professional Air Traffic Controllers Organization who reported for work despite

A Federal judge has found the striking air traffic controllers union in contempt of court for violating a back-towork ruling and ordered the union to pay a \$250,000 fine if not back on the job by 8 p.m. today. President Ronald Reagan has announced that striking controllers will be fired if not at work by 11 a.m. Wednesday. In addition, officials have announced that they will seek further civil and criminal penalties.

the strike.

Let me say that I supported efforts of the administration to avert a strike and applaud their refusal to negotiate with controllers while the unlawful walkout continues. However, once bargaining resumes, the outrageous demands of PATCO must be addressed. Insisting on a \$10,000 raise, shorter hours, and earlier retirement, in a day when virtually every agency, department, and program are suffering reductions, flies in the face of reality.

As the ranking minority member of the Transportation Appropriations Subcommittee, I note that Congress will have ultimate approval of any settlement by coming up with the dough to fund agreed upon benefits. We have worked too long and hard on the budget and tax aspects of the Reagan economic recovery plan to have the entire package fall apart due to an exhorbitant and unwarranted settle-

ment. The administration can expect our full support—we can give them nothing more and they can count on nothing less.

HOUSE ACTION PROTECTS MINI-MUM BENEFITS FOR 3 MIL-LION RETIREES

(Mr. SHAW asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SHAW. Madam Speaker, this body voted last Friday to protect social security's minimum benefit for the 3 million retired Americans who receive that benefit each month.

With that vote, we removed from the budget reconciliation changes to the minimum benefit as it exists today.

With that vote, we demonstrated our regret for including consideration of social security as a subordinate part of the massive budget package.

With that vote, we expressed our belief that social security is a special, uniquely American system deserving of distinguished treatment by the House of Congress.

It is my hope that the sheer numbers of the bill's approval, 404 to 20, will carry a message to the Senate, which will now vote on the same bill.

The message is this: In our eagerness to cut Government spending, we must not select as victims the beneficiaries of the social security system.

It is wrong to ask individuals long retired and now 70, 80, and 90 years of age to try to find other resources to live on when their long-standing social security benefits are suddenly reduced.

We must not again try to tamper with any aspect of social security without exhaustive and complete debate, and public hearings at all levels.

NEW FACILITY YIELDS SIGNIFI-CANT ENERGY SAVINGS FOR NEW JERSEY CORPORATION

(Mrs. FENWICK asked and was given permission to address the House for 1 minute.)

Mrs. FENWICK. Madam Speaker, I would like to bring to the attention of the House and, even more importantly perhaps, to the attention of companies, if there are any companies within the reach of the Congressional Record, something that I saw yesterday in my district that is very interesting.

I went to the opening of the second phase of a facility that is being installed in one of the companies there, Lockheed Electronics. They have a monitoring system that has allowed them in the last year to cut their energy costs 17 percent, and since 1972, by 44.6 percent. This is conserva-

tion on a grand scale. They have a way of monitoring. They have machinery that does this, and they are giving it gratis to the Muhlenburg Hospital which is in the area.

They are going to save \$119,000 on energy in burning solid wastes.

In the second phase they are going to burn liquid waste and in the final phase they will be doing all their airconditioning in addition to heating.

This is really an innovative and courageous approach and it is something that I wish the other companies would follow. Everybody complains about EPA and taxes and regulations. This company does something.

I would like to give the address of the Lockheed Electronics. It is Lockheed Electronics Co., 1501 U.S. Highway 22, Plainfield, N.J. 07061.

ARMS CONTROL IMPLICATIONS OF ADMINISTRATION'S TAX CUT BILL

(Mr. LEACH of Iowa asked and was given permission to address the House for 1 minute and to revise and extend his remarks)

Mr. LEACH of Iowa. Madam Speaker, as we in the Congress and the administration reappraise the implications of the landmark legislation we are about to pass in final form today, it should be clear that the flip side of an economic policy built upon steep tax cuts is a defense policy postulated on forthright arms control efforts.

The massive loss of revenue to the Treasury which will result from the provisions of this tax bill-including the new concessions to the oil industry-leaves the administration little choice but to make good on its pledged intentions to embark on serious arms control negotiations.

Taxes which have been cut across the board as well as indexed for inflation cannot support inflated military spending programs.

If we have learned that we cannot solve our social problems by simply throwing Federal dollars at them, we must also recognize that simply throwing money at the Defense Department does not necessarily enhance our national security. Just as there is a private sector dimension to social problem-solving, so there is an arms control dimension to national security.

Madam Speaker, this tax bill sets the parameters of Federal spending for the next decade. These parameters are challenges for all of us to live within, and no sector of Federal spending, including defense, can be considered sacrosanct.

DEMOCRATS PARTY FOR BALANCED BUDGET

VOLKMER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. VOLKMER. Madam Speaker, I wish to commend to the Members of the House the recent reprint that was furnished to all of our offices on yesterday by the gentlewoman from Colorado. This is a reprint from the Denver Post of an article written by a former Member of this body from the minority side, former Congressman Jim Johnson. I believe every one of you when reading it will realize that we are at the time now where the Democratic Party is the party that believes in a balanced budget, that believes very strongly in reducing deficits, while the Republican Party is the party of big deficits.

I would like to point out to everyone that there is a great amount of expectation among my people since I have been out to my district off and on since last Wednesday, about the amount of tax cut that they will get from the bill that we will pass this afternoon. Many of the people have great expectations. People earning \$25,000 and getting a weekly paycheck are believing they are going to get \$20 or \$50 more a week. People who are getting a monthly paycheck and receive \$15,000 in salary are believing that they are going to get \$15, \$25, or \$30 a month more.

Believe me, my colleagues, I think every one of you will remember this day when you are being told that your people are going to have great expectations and what is a huge tax cut for the oil industry and when the wage earner looks at the tax cut he is going to get about \$1 or \$2. This huge tax cut is not for the wage earner, but for the special interests and the wealthy.

COMMODORE JOHN BARRY DAY

Mr. MOAKLEY. Madam Speaker, I ask unanimous consent to take from the Speaker's table the Senate joint resolution (S.J. Res. 87) to authorize and request the President to designate September 13, 1981, as "Commodore John Barry Day", and ask for its immediate consideration.

The Clerk read the title of the Senate joint resolution.

The SPEAKER pro tempore. there objection to the request of the gentleman from Massachusetts?

Mr. WALKER. Madam Speaker, reserving the right to object, and I will not object, I do so to give the gentleman from Massachusetts (Mr. Moak-LEY) an opportunity to explain the resolution.

Mr. MOAKLEY. Madam Speaker, will the gentleman yield?

Mr. WALKER. I yield to the gentle-

man from Massachusetts.

Mr. MOAKLEY. Madam Speaker, I am acting in place of the gentleman from New York (Mr. Garcia) and am advised that the resolution has been subject to the procedures customarily used to judge these kinds of measures.

Madam Speaker, the joint resolution would designate September 13 as "Commodore John Barry Day." The commodore, born on that date in 1745, in County Wexford, Ireland, is widely recognized as the father of the American Navy.

Senate Joint Resolution 87 was passed by the other body on Friday and House action today will enable the President to issue the appropriate designation of September 13, 1981. This would be a suitable tribute to one of the earliest and greatest American patriots of Irish descent.

Madam Speaker, John Barry is honored as a patriot by the many Hibernian divisions which bear his name; and the resolution was proposed by the Washington, D.C., division which also lays a wreath at his statue each year.

I note, Madam Speaker, that this action follows similar legislation in which the Commonwealth of Massachusetts has provided (chapter 191 of the acts of 1931):

The Governor shall annually issue a proclamation setting apart September teenth as Commodore John Barry Day and recommending that it be observed by the people with appropriate exercises in the public schools and otherwise, as he may see fit, to the end that the memory of the service rendered by him during the struggle for American Independence may be perpetuat-

Madam Speaker, I would also like to place in the RECORD Commission No. 1 of the U.S. Navy, issued by President Washington on February 22, 1797:

JOHN BARRY'S COMMISSION THE PRESIDENT OF THE UNITED STATES OF AMERICA

To John Barry: I George Washington. President of the United States reposing special Trust and Confidence in your Patriotism Valour Fidelity and Abilities have nominated and by and with the Advice and Consent of the Senate, appointed you Captain in the Navy of the United States, and Com-mander of the Frigate called *United States*; to take Rank from The Fourth day of June one thousand seven hundred and ninety four. You are therefore carefully and diligently to discharge the duty of Captain and Commander by doing and performing all manner of things thereunto belonging. And I strictly charge and require all Officers, Marines, and Seamen under your command to be obedient to your Orders as Captain and Commander: And you are to observe and follow such orders and directions, from time to time as you shall receive from the President of the United States or any superior Officer set over you according to the rules and discipline of War, and the usuage of the Sea. This commission to continue in force during the pleasure of the President of the United States.

Given under my hand at Philadelphia, the Twenty second day of February, in the Year of our Lord one thousand seven hundred and ninety seven, and of the Sovereignty and Independence of the United States the Twentyfirst.

GEORGE WASHINGTON.

Madam Speaker, it is unfortunate that Commodore Barry's contributions to this Nation are not better noted but he is a source of great pride to all Irish Americans and I hope this resolution will encourage wider awareness of his valiant contributions to the independence of this Nation.

 Mr. BIAGGI. Madam Speaker, as chairman of the Ad Hoc Congressional Committee on Irish Affairs, I rise to lend my full support to Senate Joint Resolution 87 authorizing and requesting the President to designate September 13, 1981, as Commodore John Barry Day. As an Irish American President Reagan should have little problem paying this long overdue tribute to this inspirational Irish Ameri-

can patriot and leader.

The text of the resolution provides the reasons why the House should join with the Senate in passing this measure. The resolution salutes the man who is considered the hero of the American Revolution-the holder of the first commission in the U.S. Navy-was the first commander of the ship, Lexington, the first ship bought and equipped for the revolution. The resolution pays tribute to the man who also captured the first enemy warship in actual battle.

John Barry has been rightly called the "Father of the American Navy" and he was first honored by Congress in 1906 with a statue which was placed in Lafayette Park and remains there

today.

For the Irish American communitypride in the accomplishments of Commodore John Barry run especially deep and strong. Today we are providing an appropriate tribute to a great Irishman and great American. As a longtime supporter of this resolution, I am pleased to support its passage and ask the President to take prompt action on signing it into law.

At this point in the RECORD I would like to insert an article written by Robert J. Bateman, national historian of the Ancient Order of Hibernians about Commodore John Barry. might add at this point that the Ancient Order of Hibernians-and their national president, John Connolly and vice president Joe Roche are avid supporters of this legislation and have played a most significant role in its development. The AOH, as the Nation's oldest and largest Irish American organization, does take great pride in the actions being taken by the Congress today to salute a great Irish American-John Barry.

THE STORY OF JOHN BARRY, FATHER OF AMERICAN NAVY

(By Robert J. Bateman)

In 1745 a humble and respectable couple named Barry, in County Wexford, Ireland, rejoiced in the birth of a son who was chris-tened John. The father was a farmer, tilling a few acres held precariously by lease. There was at that time a strict English law

prohibiting Catholic ownership of property. The mother was an attractive young Irishwoman whose maiden name had been Kelly.
The exact number of children born to the

Barrys in not known. There were John, Patrick, Thomas, Jane, Margaret, Eleanor and, maybe, others.

Tradition has it that John Barry was born at Ballysampson a tiny hamlet in Tacumshin Parish in the extreme southern part of County Wexford. If so, the family moved shortly afterwards into Rosslare lying south and east of Wexford Harbor. In Rosslare, young Barry spent his childhood days and in Rosslare Churchyard repose the remains of those members of his family who ended their lives in Ireland.

At an early age, John Barry expressed a strong desire to follow the sea and his father encouraged his ambition for he knew Ireland offered no opportunities for his son. To stay at home meant privation and starvation on a tiny lease-hold at an exorbitant

Somehow, through the efforts of his father and his uncle Nicholas Barry, at Wexford, young John Barry shipped at about the age of ten as a cabin boy on an Irish merchantman. The date of his coming to America has not been definitely ascertained. But it must have been about the year 1762. He arrived at Philadelphia as second mate of an Irish vessel, when only seventeen.

Romance entered John Barry's life in the summer of 1767, as the tall pledged his troth to a young Irishwoman. Her name was Mary Clary, age twenty-two. They were wed sometime in October.

Captain of his own ship, the Black Prince, he voyaged to London in 1774 and was astounded to hear high officials and members of parliament talk of sending a punitive expedition to teach the colonies a lesson.

Risking his life, he stayed in London and collected speeches and newspaper clippings of officials in parliament and public office advocating punishment for the colonies. Having experienced the horrors of English Ireland, Barry delivered a trunk filled with incriminating English documents to the Continental Congress meeting in Philadelphia. Many historians believe this first Naval Intelligence report swayed the vote of the delegates for complete independence.

Barry distinguished John throughout the Revolution and French War as a fighter and seaman and his English

foes knew him as "Saucy Jack."

Another little known fact about John Barry is that he served as Aide-de-Camp to General Washington during the bitter days of Valley Forge. He with his brave sailors fought with the General against the English at Trenton and Princeton.

Much has been said and written about Commodore John Barry but I would like to relate the feelings of three men who spoke

of John Barry.

Representative James A. Hamill, of New Jersey stated . . . "First in our American pantheon stands the majestic figure of George Washington, and close beside him John Barry, on whose strong arm Washington was wont to lean with confidence in his hours of bitter anguish and trial; one the idolized Father of our Country and the other the venerated Father of our Navy

strongly impressed was Admiral George W. Melville by John Barry's contribution to the Republic that he solemnly de-"He was God-given to us.

And, President George Washington, in his letter of appointment stated the following to and about John Barry:

The President of the United States of America

To: John Barry:

President of the United States, reposing special trust and confidence in your patriotism, valor, fidelity and abilities, have nominated and by and with the advice and consent of the Senate, appoint you Captain in the Navy of the United States, and Com-mander of the Frigate called the United States; to take rank from the fourth day of June one thousand seven hundred and

With issuance of this appointment, Presi-Washington gave to his friend and comrade, John Barry, an immortal place in our Country's history; that of being the Father of the American Navy.

Mr. WALKER. Madam Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The Clerk read the Senate joint resolution, as follows:

S.J. RES. 87

Whereas Commodore John Barry, hero of the American Revolution and holder of the first Commission in the United States Navy was born on September 13, 1745, in County Wexford, Ireland:

Whereas Commodore Barry was commissioned to command the brig Lexington, the first ship bought and equipped for the Revolution, and became a national hero with the first capture of an enemy warship in actual battle;

Whereas following the Revolution, when the sovereignty of this new Nation was threatened by pirates, Commodore Barry was placed in command of the first ships authorized under the new Constitution and was named senior captain of the United States Navy in 1974;

Whereas Commodore Barry is considered as the father of the United States Navy; and

Whereas Commodore Barry was honored by the United States Congress in 1906, when a statue was commissioned and later placed in Lafayette Park, Washington, District of Columbia, and honored again some fifty years later when the Congress authorized a statue to be presented in his name to the people of County Wexford, Ireland: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President is authorized and requested to designate September 13, 1981, as "Commodore John Barry Day", as a tribute to the father of the United States Navy, and to call upon Federal, State, and local government agencies and the people of the United States to observe such day with appropriate ceremonies and activities.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. MOAKLEY. Madam Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and to include extraneous matter on the subject of the Senate joint resolution just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

CONFERENCE REPORT ON S. 694, DEPARTMENT OF SUPPLEMENTAL DEFENSE AUTHORIZA-TION ACT, 1981

Mr. PRICE. Madam Speaker, I call up the conference report on the Senate bill (S. 694) to authorize supplemental appropriations for fiscal year 1981 for the Armed Forces for procurement of aircraft, missiles. naval vessels, tracked combat vehicles, and for research, development, test, and evaluation, to increase the authorized personnel end strengths for military and civilian personnel of the Department of Defense for such fiscal year, to authorize supplemental appropriations for such fiscal year for construction at certain military installations, and for other purposes.

The Clerk read the title of the

Senate bill.

The SPEAKER pro tempore. Pursuant to the rule, the conference report is considered as having been read.

(For conference report and statement, see proceedings of the House of

July 27, 1981.)

The SPEAKER pro tempore. The gentleman from Illinois (Mr. PRICE) will be recognized for 30 minutes, and the gentleman from Alabama (Mr. DICKINSON) will be recognized for 30 minutes.

The Chair recognizes the gentleman from Illinois (Mr. PRICE).

Mr. PRICE. Madam Speaker, I yield myself such time as I may require.

Madam Speaker, S. 694 is a supplemental authorization for fiscal year 1981, the appropriation for which has already been considered.

The bill would authorize \$2,736,362,000 for the Department of Defense for weapons procurement, research, development, test, and evaluation (R.D.T. & E.), and military construction. The bill is \$305,554,000 below the request of the President.

The bill includes \$2,188,994,000 for procurement, and \$480,928,000 for R.D.T. & E., plus \$66,440,000 for mili-

tary construction.

The conference report has been printed in the RECORD and has been available to the Members. Therefore, it is not necessary for me to go into a

detailed explanation.

The authorizations provided in this bill are consistent with the programs planned for fiscal year 1982 and, therefore, these fiscal 1981 funds authorized are necessary as part of a continuing program to improve nation-

I should point out that in a number of programs in titles I and II of the bill, prior authorization was available from the basic fiscal 1981 authorization and, therefore, new authorization was not provided, even though the programs were approved by the conference. This is clearly stated in the statement of managers accompanying the conference report.

An important general provision in the bill clarifies the law regarding accrued leave to allow those men who endured prolonged Indian Ocean deployment at the time American hostages were being held in Iran to be able to use accrued leave that they lost because of that deployment. That deployment is the longest sustained at-sea deployment in the history of the U.S. Navy

Mr. DICKINSON. Madam Speaker, I yield myself such time as I may con-

sume.

Madam Speaker, I rise in support of the fiscal year 1981 Defense Supplemental Authorization Act conference report. The total administration request was \$3,041,916,000. This bill will \$2,735,862,000. Of authorize the largest amount sum \$2,188,994,000, will be dedicated to the procurement of weapons essential to the rebuilding of our forces initiated by the administration.

There is a provision in this bill that would allow military personnel who are deployed-such as in the Indian Ocean-to accumulate up to 90 days of leave. Leave in excess of 60 days is normally lost at the end of the fiscal year. This bill would allow those members who have endured long deployments to use this excess leave this summer and fall and not lose it. Consequently, passage of this bill now will maximize the morale benefits associated with the provision.

I support the conference report and urge its approval.

Madam Speaker, I reserve the balance of my time.

Mr. PRICE. Madam Speaker, I have no further requests for time.

Mr. DICKINSON. Madam Speaker, I have no further requests for time.

Mr. PRICE. Madam Speaker, I move the previous question on the conference report.

The previous question was ordered. The conference report was agreed to.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. PRICE. Madam Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the conference report on the Senate bill, S. 694, just agreed to.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

SUBMISSION OF EXPLANATORY STATEMENT OF HOUSE AND SENATE CONFEREES ON OMNI-BUS RECONCILIATION ACT OF

Mr. DINGELL. Madam Speaker, in accordance with section 1199A of the conference report on H.R. 3982, the Omnibus Reconciliation Act of 1981. I submit for the RECORD the following explanatory statement of the House and Senate conferees, and ask unanimous consent that it be inserted in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

EXPLANATORY STATEMENT OF THE HOUSE AND SENATE CONFEREES WITH RESPECT TO SUB-TITLES E. F. AND G OF TITLE XI OF THE OM-NIBUS RECONCILIATION BILL (H.R. 3982) SUBMITTED BY HOUSE COMMITTEE ON ENERGY AND COMMERCE AND SENATE COM-MITTEE ON COMMERCE, SCIENCE, AND TRANS-PORTATION IN ACCORDANCE WITH SECTION 1199A of H.R. 3982

SUBTITLE E-CONRAIL

Section 1131 House Bill

The House bill states that this bill may be cited as the "Rail Service Improvement Act of 1981.

Senate Amendment

The Senate Amendment states that the bill may be cited as the "Northeast Rail Service Act of 1981."

Conference Substitute

The conference substitute adopts the Senate provision.

Section 1132-Findings

House Bill

The House bill finds that current arrangements for rail freight and commuter service in the Northeast and Midwest are inadequate to meet the transportation needs of the public and national security, and that the processes set in motion by previous rail legislation have not made the rail system in the region profitable. The protection of interstate and foreign commerce requires federal intervention to preserve rail service in the private sector, including statutory changes to improve Conrail's ability to become profitable. To return Conrail operations to the private sector requires that labor protection conditions different than those established by Title V of the Regional Rail Reorganization Act be imposed to meet the emergency needs of the situation. Shippers, states, and consumers must be included in any solution to the rail service problems in the Northeast and Midwest. The commuter service must be transferred to other operators dedicated to such service. and the functions of the United States Railway Association should be transferred.

Senate Amendment

The Senate Amendment finds that (1) the 3R Act has failed to create a self-sustaining railroad in the Northeast; (2) current arrangements for the mix of freight and commuter services in the region are inadequate; (3) there is little likelihood that Conrail can become self-sufficient in the foreseeable future; (4) the employee protection provisions have been far more expensive than an-

ticipated and now pose an obstacle to establishment of improved rail service and continued employment in the Northeast; (5) integration of Conrail's service into the Na tion's private rail system can be successful only if adequate and equitable protection is provided for affected railroad employees and if acquiring railroads are not required to assume Conrail's commuter operations;
(6) the operation of commuter services by states or related entities is an integral government function of the states which should be assisted, but not superseded, by the Federal Government.

Conference Substitute

The conference substitute adopts a majority of the House bill's findings.

Section 1133-Purpose

House Bill

It is the purpose of the Congress in this Act to provide for the removal by a date certain of the federal subsidy for Conrail, and the transfer of Conrail's commuter service to other operators. Also it is the purpose to provide for labor protection in the difficult circumstances of Conrail's financial situa-tion. Conrail's freight operations must be performed by the private sector, and the functions of the United States Railway Association should be transferred.

Senate Amendment

This section sets forth the purposes of the legislation: to provide for the reduction by Conrail of its operating costs; to transfer Conrail passenger service responsibilities without consideration to one or more entities; to provide adequate and equitable labor protection for employees deprived of employment by the legislation; and to transfer Conrail's freight service and properties to other carriers for reasonable compensation.

Conference Substitute

The conference substitute's purpose is declared to be (1) the removal by a date certain of the Federal Government's obligation to subsidize the freight operations of Conrail; (2) the transfer of Conrail commuter service responsibilities; and (3) an orderly return of Conrail freight service to the private sector.

Section 1134-Goals House Bill

The House bill contains no goals.

Senate Amendment

The Senate Amendment sets forth several goals.

Conference Substitute

The conference substitute adopts as its goal to provide Conrail the opportunity to become profitable through the achievement of the following objectives, among others:

(1) Conrail enters into collective bargaining agreements with its agreement employ-ees which would reduce Conrail's costs in an amount equal to \$200 million a year beginning April 1, 1981;
(2) Proportional agreements from non-

agreement personnel.

Section 1135-Definitions House Bill

The House bill defines nine terms which are used in this Act. All are technical additions which are necessary to the Act, with the exception of the definition of "profita-ble carrier". "Profitable carrier" is the term used in determining whether the Secretary is required to sell the common stock of the Corporation, or whether he may sell the assets of the Corporation. The definition re-quires that Conrail be able to generate sufficient revenues to cover its expenses, and includes reasonable maintenance of equipment and facilities.

In meeting its expenses the Corporation will obviously be required, like any other private business enterprise, to borrow funds in the private markets. If Conrail is unable to borrow such funds, assuming that its debt to the federal government is forgiven. it would be unable to meet the definition of profitability.

Senate Amendment

The Senate amendment defines the important terms used in the legislation.

Conference Substitute

The conference substitute defines the important terms used in the legislation.

Section 1136-End of Conrail obligation House Bill

Conrail's obligation to operate commuter service ends 540 days after the effective date of the section.

Senate Amendment

Conrail's obligation to operate commuter service ends 1 year after date of enactment.

Conference Substitute

The Conference substitute adopts the compromise date of January 1, 1983

Section 1137-Establishment of Amtrak commuter

House bill

The House bill amends the Rail Passenger Service Act by inserting a new title, Title V, Amtrak Commuter Services, which sets up the Amtrak Commuter Services Corpora-

Amtrak Commuter is established within 240 days after enactment. Amtrak Commuter is a wholly-owned subsidiary of Amtrak.

Amtrak Commuter is solely an operator of commuter service under contract to commuter agencies and has no common carrier obligations.

Amtrak Commuter is exempt from the Interstate Commerce Act, but is subject to other Federal laws affecting the railroad industry, such as the Federal Railroad Safety Act, the Railway Labor Act, the Railroad Retirement Act, and the Railway Unemployment Insurance Act. Amtrak Commuter is also not subject to any state or local laws regarding fares or service and is exempt from certain taxes. Finally, certain prohibitions of the Clayton Act do not apply to transactions between Amtrak Commuter and Amtrak.

The Amtrak Board is required to incorporate Amtrak Commuter. The House bill details the directors and

officers of Amtrak Commuter.

The Board of Directors consists of six members: the President of Amtrak Com-muter (chosen by the other five members of the Board), the two commuter agency members on the Amtrak Board, two additional members selected by the Amtrak Board, and one member from a commuter agency for which Amtrak Commuter operates commut-

er services Certain provisions of the Rail Passenger Service Act are applied to Amtrak Commuter. References to the Corporation and its board in these provisions should be read in this context as referring to Amtrak Commuter and its Board. For example, the president of Amtrak Commuter is to be named and appointed the Board of Amtrak Com-

muter.

The House bill describes generally the powers of Amtrak Commuter, including the power to issue common stock to Amtrak.

The standards under which Amtrak Commuter operates commuter service for a commuter agency are detailed.

Amtrak Commuter is required or allowed to operate commuter service if certain conditions are met. Amtrak Commuter is required to operate commuter service Conrail was obligated to operate if a commuter agency offers a commuter service operating payment designed to cover the difference between revenue attributable to the operation of service and the avoidable cost of the service or an operating payment pursuant to a lease or agreement with a commuter agency under which financial support was being provided on January 2, 1974 for the continuation of commuter service

Amtrak Commuter may operate any other commuter service if a commuter agency offers a commuter service operating payment designed to cover the difference between revenue attributable to the service and avoidable cost.

No changes in the substantive cost standard is intended by use of the term "commut-er service operating payment" in this Act, instead of "rail service continuation pay-ment," as used in the 3R and 4R Acts. The two terms are meant to have the same substantive content.

Any agreement pursuant to subsection (b) is to be made in accordance with regulations issued by the Rail Service Planning office (RSPO) of the ICC. RSPO regulations currently govern operating agreements between Conrail and the commuter agencies.

The conditions under which Amtrak Commuter is allowed to operate additional commuter service are indicated.

Amtrak Commuter is allowed to discontinue service on 60 days notice if a commuter agency does not offer a commuter service operating payment in accordance with subsection (b) or if a commuter service operating payment is not paid when due.

The compensation for use of the Northeast Corridor is to be based on the methodology determined by the ICC or agreed by the parties.

If no commuter service operating payment is offered by a commuter agency pursuant to a lease or agreement, such lease or agreement shall not apply to Amtrak Commuter. In such event, Amtrak and Conrail are to retain appropriate trackage rights for passenger and freight operations over any rail properties owned or leased by such commuter agency. Compensation for such trackage rights is to be fair and equitable. In particucompensation for freight operations should take into account industry-wide avercompensation for freight trackage rights and any additional costs imposed on the commuter agency as a result of freight operations over passenger lines.

Amtrak Commuter has no obligation to operate commuter service if a commuter agency contracts for the provision of such service by another operator (including by the agency itself).

The Board of Amtrak Commuter is given the authority to allocate a proportionate share of the excess of the working capital revolving fund transferred to Amtrak Commuter to the account of an individual commuter agency, which, after operating service through Amtrak Commuter, elects to operate the service itself. Such allocation can only be made if the Board determines that the amount in the fund is in excess of the amount needed for the purposes of this title. The Board may then allocate only the excess amount. The allocation is to be based on ridership.

This section provides Amtrak Commuter a role in coordination of operations over the

Northeast Corridor.

Subsection (a) requires the Amtrak Commuter Board to develop and recommend to Amtrak equitable policies regarding Northeast Corridor access, dispatching, public information, maintenance of equipment and facilities, major capital, facility investments, and harmonization of equipment acquistions, fares, tariffs, and schedules.

Subsection (b) allows the Amtrak Commuter Board to recommend to the President and Board of Amtrak such actions as are necessary to resolve differences of opinion regarding Northeast Corridor operations.

The Corporation and its subsidiary is required to transfer to Amtrak Commuter or other operating entities the rail properties, rights, or interests necessary for commuter service. Inventory transferred shall be paid for at book value. Fixed facilities, rolling stock and other equipment shall be trans ferred without consideration. Conrail shall retain appropriate trackage rights over any rail properties transferred under this subsection. Compensation for those trackage rights should be fair and equitable, and should take into account industry-wide average compensation for freight trackage rights and any additional costs imposed on the owner of the facility as a freight operations over passenger lines.

The transfer of any lease, agreement, or contract by Conrail pursuant to this title is not a breach, default, or violation of any agreement.

Senate Amendment

The Senate amendment establishes Amtrak Commuter, a subsidiary of Amtrak, to provide commuter services on a contractual basis for those authorities that do not assume direct control of their operations.

The Amtrak Commuter Board of Directors will consist of seven members. Three will be representatives of Amtrak and three will be representatives of the commuter authorities. The seventh member is the President. The first President will be appointed by the Secretary. Thereafter, the President will be chosen by the Board of Directors of Amtrak Commuter. The President will serve a three-year term and no individual may serve no more than two terms. The other Board members will serve two-year terms.

Amtrak Commuter is authorized to own, manage or contract for the operation of commuter services; and to acquire or contract for the facilities and equipment necessary for operation.

This section also authorizes Amtrak Commuter to issue common stock to Amtrak.

A commuter authority shall notify the Secretary and Conrail not later than 90 days after enactment if it intends to assume direct control of its commuter operations or if it intends to contract with Amtrak commuter.

This section requires Amtrak Commuter to recommend to Amtrak policies regarding harmonious and equitable access and use of the Northeast Corridor for commuter and intercity services; including policies for fares, schedules, facilities and equipment.

The Amtrak Commuter Board may recom-

The Amtrak Commuter Board may recommend to the Amtrak Board ways to resolve any differences of opinion regarding oper-

A commuter authority or a state, local or regional transportation authority is authorized to initiate negotiations with Conrail for the transfer of commuter services operated by Conrail. The transfer agreement shall specify at least the service responsibilities to

be transferred, the rail properties to be conveyed, and a transfer date not later than one year after enactment of this Act. Such transfer agreements shall be entered into not later than 180 days after the date of enactment.

If Conrail and Amtrak Commuter have not signed a transfer agreement within 180 days of enactment, the Secretary of Transportation is to determine within 30 days the terms and conditions of the transfer and the rail properties to be transferred.

If a commuter authority later wants Amtrak Commuter to transfer commuter service to the authority, Amtrak Commuter is required to do so upon terms and conditions agreed upon by Amtrak Commuter and the commuter authority.

If Amtrak Commuter and the commuter authority do not sign an agreement for the transfer, either party may appeal to the Secretary for a determination of the properties to be transferred and the terms and conditions of the transfer. Commuter service outside the Northeast Corridor not transferred directly to a State, local, or regional transportation authority would cease to be operated one year after the effective date of the act.

It is provided that a commuter authority assuming rail commuter service responsibilities shall be subject to the Federal Employers Liability Act, the Railroad Retirement Act, the Railroad Unemployment Insurance Act, and the Federal railroad safety laws.

These transfers are exempt from compliance with the provisions of subtitle IV of title 49 United States Code (formerly the Interstate Commerce Act).

The exemption is applicable to subsequent transfers and determinations of the Secretary under certain sections as long as the transfers are effected within 4 years of enactment.

Conference Substitute

The Conference substitute combines the House and Senate provisions on the establishment and duties of Amtrak Commuter.

It is the intent of the conferees that Amtrak Commuter's efforts be directed in the first instance to operating service in the Region as defined in the 3R Act.

The Senate recedes to the House provision on the composition of Amtrak Commuter's Board of Directors. There are minor clarifications.

The House and Senate provisions for the transfer of commuter services and related properties are combined.

The Senate recedes to the House provision on the coordination of the Northeast Corridor.

The House recedes to the Senate provision calling for the Secretary of Transportation to decide the terms and conditions of the transfer of services and properties which cannot be decided by the parties.

The House recedes to the Senate provision or regulatory approval.

Section 1138—Prohibition of cross subsidization

House Bill

The House bill amended section 601 of the Rail Passenger Service Act by prohibiting cross subsidization between intercity services of Amtrak and commuter services of Amtrak Commuter. This is a reflection of the intent that Amtrak and Amtrak Commuter be financially separate and independent entities.

Senate Amendment

The Senate amendment required that cost standards avoid cross-subsidization between commuter and intercity services.

Conference Substitute

The substitute adopted the House provision.

Section 1139—Authorization of appropriations

House Bill

The House bill authorizes \$50 million in fiscal year 1982 for use by Conrail's commuter subsidiary as a working capital fund. The fund is available only to meet periodic operating expenses of the subsidiary until the expenses have been reimbursed by the appropriate commuter agencies. When Conrail and its subsidiary are relieved of their commuter service obligation, the fund (and liabilities to it) is transferred to Amtrak Commuter for the same purpose.

The House bill also amends section 601 of the Rail Passenger Service Act by authorizing \$20 million in fiscal year 1982 to Amtrak for allocation to any commuter authority providing commuter service, operated by a railroad that entered reorganization after 1974, as of July 1, 1979.

Senate Amendment

The Senate amendment authorized \$50 million to be appropriated to the Secretary to facilitate the transfer of commuter services from Conrail.

Conference Substitute

The substitute generally follows Senate amendment for the \$50 million authorization. The substitute provides the Secretary of Transportation the authority to distribute the funds between Amtrak Commuter and the commuter authorities that operate commuter service, which are commuter authorities contracting with Conrail for the provision of commuter service. The Secretary is to consider any particular adverse financial impact upon any commuter authority contracting with Amtrak Commuter that would result from the termination of any lease or agreement between such authority, such as MTA, and Conrail. The Secretary should ensure an equitable allocation.

It is the intent of the conferees to provide flexibility to the commuter authorities in the use of this money. Potential uses of this money include transition and planning expenses for commuter authorities, and start up costs of Amtrak Commuter and commuter authorities that elect to directly provide their own service. The conferees also emphasize the importance of ensuring prompt availability of these funds as early in fiscal year 1982 as possible. This is important in light of the fact that Amtrak Commuter will likely have no source of funds until at least April 1982 when the commuter authorities must notify Amtrak Commuter if they intend to contract with it.

The substitute basically follows the House bill for the \$20 million authorization. The purpose of this provision is to provide funds in addition to those locally available for commuter rail purposes to commuter authorities that have been subsidizing commuter rail operations of rail lines that have been in reorganization. The Secretary shall approve the expenditure of the funds by the authority, after consultation with the State in which the commuter authority is located.

Section 1140—Additional financing of Conrail

House Bill

The House bill amends Title II of the 3R Act by requiring that any further investment by the Federal Government in Conrall securities be in accordance within this section.

Purchase dates and amounts for the purchase of additional securities and for the purchase of accounts receivable of the Corporation are established. The dates and amounts are as follows:

October 1, 1981, \$125 million; April 1, 1982, \$125 million; October 1, 1982, \$100 million; April 1, 1983, \$75 million; October 1, 1983, \$50 million.

The Association is required to purchase accounts receivable of the Corporation attributable to disputes with Amtrak or the commuter authorities over right of way related costs for commuter services on the Northeast Corridor, and accounts receivable attributable to any delays in payment by the commuter authorities to Conrail. Since these items are carried on Conrail's books as amounts owed the Corporation, and the reported bill determines that any decision on such costs is prospective only, the failure to purchase such items would require Conrail to show a substantial loss when such items had to be written off.

If Conrail does not request, or the Association does not approve a request, either in whole or in part, the funds shall be avail-

able until expended.

On each purchase date the Association is required to make a determination whether Conrail will be a profitable carrier under the definition of the Act. For the purpose of making this determination the Association must assume that the debt and preferred stock held by the federal government is limited to a contingent interest which arises only under the circumstances described in this Act. The contingent interest would allow Conrail to borrow money in the private markets with debt and securities prior in interest to the contingent interest retained by the Federal Government.

The Association shall purchase stock and accounts receivable only if the following

conditions are met:

(1) Management, or non-agreement, employees must forego wage increases and benefits in an amount proportionately equivalent to the amount foregone by agreement employees, and the number of management employees must be reduced proportionately to any reduction in agreement employees.

(2) Materials and service must continue to be available to the Corporation under

normal business practices.

(3) Conrail must submit to the Association on each purchase date a report on Conrail's efforts to maximize revenues under this Act, the Staggers Act, and the Interstate Commerce Act. Conrail shippers must not unduly interfere with Conrail's attempts to maximize revenues. Nothing in this subparagraph is intended to remove a shipper's right to challenge an individual action of Conrail under the normal provisions of the Staggers Act and the Interstate Commerce Act.

(4) Conrail must submit to the Association a financial plan which indicates how Conrail will become profitable within the time frame and funding limitations of this Act. If Conrail submits such a plan, the Association shall make funds available. It is not intended that Conrail produce a new plan. They should rely on existing plans and studies,

such as its April 1, 1981 plan, in developing this plan.

(5) Conrail must enter into a collective bargaining agreement with its employees which provides the Corporation with \$200 million annually, beginning April 1, 1981, adjusted annually for inflation. The agreement may allow any portion of the \$200 million not provided in the first year to be made up in the second year.

Benefits to the Corporation are calculated against the cost to the Corporation of the National agreement reached by the railroad

industry and its employees.

The benefits may not include any cost reductions which result from the firemen manning or crew consist agreement which are in effect, the termination of employees under other parts of the Act, a collective bargaining agreement signed prior to January 1, 1981, any other provision of law or agreement or the assignment of work or single collective bargaining agreement sections of the reported bill. The collective bargaining agreement must include a provision for the appointment of a fact-finding panel for the purpose of recommending changes in operating practices and procedures.

(6) Conrail must identify its subsidiaries which operate at a loss, and within twelve months of the effective date sell any subsidiary unless the Association finds that the benefits of maintaining ownership of the Corporation outweigh the financial losses.

The Association may modify any of the conditions if it determines that such a modification is necessary for the Corporation to become profitable. To the maximum extent possible the Association shall modify the conditions so that additional burdens are shared equally by all the parties. The Association may require the Corporation to demonstrate productivity increases if it determines that such increases are the only method available for the Corporation to become profitable.

The Corporation is allowed to submit an amended request if the Association denies a request for funds.

The Corporation is required to enter into an agreement with employees for the establishment of an experimental worker participation and self-management program.

Conrail is exempted from the payment of state and local taxes until the common stock of the Corporation is sold by the Secretary or the assets of the Corporation are sold. The tax exemption is limited to the time the federal government retains control of Conrail

Conrail is required to report to the Association on each purchase date payments for any consultants used by the Corporation.

The Association is required to make no more funds available to Conrail in the event of a work stoppage by employees of the Corporation which directly results from the conditions required by this section.

The Association is required to return debentures to the Corporation in an amount equal to the value of any property conveyed by the Corporation to its commuter subsidiary.

Conrail is allowed to collect any accounts receivable which are due them. Although the commuter services are transferred first to Conrail subsidiary and then to an Amtrak subsidiary or the local authorities, Conrail will still be owed money by the commuter authorities. This provision allows Conrail to collect despite the purchase of the accounts receivable by the Association.

Authorizations not to exceed \$150 million for fiscal year 1982, and \$225 million for

fiscal year 1983 are provided. Any funds previously appropriated under section 216(g) of the 3R Act shall be available under new section 217 of the 3R Act, and must be provided to the Corporation only under section 217. Such funds will be available for fiscal year 1981. Any funds authorized are to remain available until expended.

Senate Amendment

The Senate bill authorizes \$150 million in operating subsidies.

Conference Substitute

The conference substitute provides that the Association shall purchase shares of stock and accounts receivable of Conrail in amounts not to exceed \$262 million. The Association is expected to purchase the accounts receivable as soon as possible; this is important in order for Conrail to reach profitability.

Conrail is exempted from any state tax except for any tax imposed by any political subdivision of a state until Conrail is transferred by the Secretary of Transportation.

\$262 million is authorized for purposes of purchasing securities and accounts receivable, to remain available until expended. Also, any amounts appropriated under Section 216(g) of the 3R Act are authorized to remain available until expended.

Section 1141—Organization and structure of Conrail

House Bill

This section of the House bill:

(a) makes technical changes to the section designating the Board of Directors of the Corporation;

(b) requires the Secretary of Transportation to act within ninety days on any application by the Corporation to substitute manual block signaling for automatic block signaling, if such application is filed within two years of the effective date.

Senate Amendment

The Senate amendment amends section 301 of the Regional Rail Reorganization Act to permit Conrail within two years of enactment to apply to the Secretary for permission to substitute manual block signal systems for automatic systems on lines which carry less than 20 million gross tons of freight annually. The Secretary has 90 days to act on the application.

Conference Substitute

The Conference substitute adopted the Senate amendment.

Section 1142—Transfer of freight service responsibilities

House Bill

The House bill amends the 3R Act by adding a new Title IV—Transfer of Freight Service. Title IV of the 3R Act requires the Secretary of Transportation, after July 1, 1982, and before December 31, 1983, to sell the common stock of the Corporation held by the federal government, if the Association notifies the Secretary that Conrail will be profitable. The Secretary of Transportation is given broad authority to sell the common stock of the Corporation. The bill only provides general direction to the Secretary to ensure continued rail service, promote competitive bidding for the stock, and maximize the return to the federal government. If the Association notifies the Secretary, the sale is mandatory, not optional.

The Secretary may cancel existing shares of the common stock as a means of determining the size of the offering to be made. When all the common stock held by the United States is sold or cancelled, as it must be, the Board of Directors of the Corporation shall be elected by the new common stockholders. At that point the Corporation is no longer controlled by federal law.

To protect against a paralysis of Conrall in the event one or several railroads purchase stock, railroad purchasers are required to vote their share proportionately with all other shareholders. The effect is to nullify the voting power of any railroad purchaser, and allow the Corporation to function as an effective rail carrier in the region.

tion as an effective rail carrier in the region. The employee contributions will have been the key in making Conrail profitable if that goal is reached. As a result of their enormous contribution to the health of Conrail, the Secretary is required to first offer the stock to the employees in the amount of any wages, or wage increases, foregone by the employees. If the Secretary, or anyone acting as the Secretary's agent in selling the stock, first offers it at a price, and then lowers the price to attract additional purchasers, the Secretary must first, in each case where the price is reduced, offer it to the employees.

The House bill is intended to permit the transfer of Conrail assets on a piecemeal basis only if a sale of stock has not been required under the bill. The Secretary may not sell Conrail under this section if a finding of profitability has been made.

The provision gives the Secretary broad authority to arrange and consummate sales. The entire plan for transfer must be submitted to the Congress within 180 days after December 31, 1983. It shall be approved unless one House adopts a resolution disapproving the plan within 90 legislative days after the plan is submitted.

The House bill provides that on each purchase date the Association is required to make a determination whether Conrail will be a profitable carrier under the definition of the Act. For the purpose of making this determination the Association must assume that the debt and preferred stock held by the federal government is limited to a contingent interest which arises only under the circumstances described in section 402 of this Act. The contingent interest would allow Conrail to borrow money in the private markets with debt and securities prior in interest to the contingent interest retained by the Federal Government.

The determination of profitability by the Association is intended to be a realistic one. The Corporation must be able to continue providing rail service without federal funds. If the likelihood is that the Corporation would become insolvent or go into bankruptcy without federal funds, the Association would not be able to make a finding of profitability. The definition of "profitable assumes normal maintenance of plant and equipment, but it is management which should make decisions about the level of maintenance and investment needed. If the Corporation's plans are reasonable, the Association shall not decide different levels are more appropriate.

The Association is to purchase stock and accounts receivable only if certain conditions are met.

Senate Amendment

The Senate amendment directs the Secretary to utilize this authority to initiate conferences and negotiations with respect to rail restructuring to promote the development of agreements between Conrail and financially responsible persons for the transfer of Conrail's freight properties and service responsibilities. The object of this proc

ess would be the integration of Conrail lines into those carriers capable of providing high quality service.

As part of the negotiation process, the Secretary is required to consult with affected employees, appropriate state and local officials, shippers and other interested persons. This provision, added during Committee consideration of the bill, is designed to insure that all interested parties have direct input during the negotiation process before the Secretary enters into a freight transfer agreement or agreements.

Negotiation under the auspices of the Secretary is a practicable method for reconciling the public interest in continued rail service in the Northeast with the need of private sector businesses to discuss confidential data and explore alternate system configurations. Conrail, shippers and other interested persons will play an important role in the negotiations. Conrail management will provide technical support to the Secretary and apply its business expertise to the design and evaluation of proposed transfer agreements. Final agreements will be signed by Conrail as owner of the properties and obligated person under service contracts. Purchase price will be paid to Conrail

The transfer agreements shall specify the rail properties and the service responsibilities to be transferred and such other terms as appropriate.

The problem of switching and terminal services in the Northeast Corridor is addressed where traffic densities and interference among inter-city passenger, commuter, and freight operations make operations particularly difficult. If potential acquiring railroads are unwilling to undertake adequate freight terminal operations, the Secretary shall provide for the formation of neutral terminal companies in the area to provide the necessary services. If such terminal companies are needed, the Secretary shall make every effort to have them in place by the date of implementation of the transfer agreements. A 1-year period is provided to allow for unanticipated problems.

The Senate amendment expresses Congressional intent that to the extent practicable, the Secretary shall make every effort to transfer Conrail as a single entity.

No sale of property is to occur before June 1, 1982. After that date, the Secretary may propose the sale of Conrail as an entity. If Conrail is determined to be unprofitable, the Secretary can propose to transfer individual Conrail lines to separate purchasers after December 1, 1982. If, however, it is determined that Conrail is profitable, the Secretary may not propose the transfer of individual Conrail lines to separate purchasers until after August 1, 1983.

The Conrail Advisory Board shall periodically report to Congress on whether or not Conrail is meeting the goals set forth in the bill. A Conrail Advisory Board is to determine whether or not Conrail has reached a point of profitability by December 1, 1982. Profitability is defined as the generation of net income in accordance with accepted ICC accounting principles. Further excluded from the definition of profitability are labor protection responsibilities to the extent not reimbursed by the Federal Government and payments made by Conrail with respect to its responsibility on Series A preferred stock held by the Federal Government, and Amtrak costs attributable to passenger op-

Conrail may be sold as an entire entity anytime after June 1, 1982. However, if the

Advisory Board makes the determination that Conrail is unprofitable, the system could be sold in parcels to individual purchasers anytime after December 1, 1982.

The Conrail Advisory Board shall be composed of the Secretaries of the Treasury and Transportation, the Comptroller General of the United States, the Chairman of the United States Railway Association, and the Chief Executive Officer of Conrail.

Net income is defined as determined by the Interstate Commerce Commission's uniform system of accounts for rail carriers. Transfer of the Conrail system as an entity is defined as the sale of Conrail stock or the sale of substantially all Conrail property as a single transaction.

The Senate amendment sets forth procedures for public participation and notifica-

A public comment period of at least 60 days is provided with regard to the transfer agreements and the Secretary's proposed determination of approval. The Attorney General shall comment on any antitrust implications of the transfer agreement.

Comment by the ICC on the effect of the proposed transfer agreement on the adequacy of transportation is provided. Further, the Commission is to comment on any adverse effects the agreement would have on other rail carriers or competition among rail carriers.

The Secretary is permitted after consideration of public comment, to grant final approval to a transfer agreement as modified. In the event the acquiring railroad and the Secretary do not agree on appropriate modifications, negotiations could be reopened and new proposals developed. Once final approval has been granted by the Secretary, that determination would not be subject to judicial review. This is consistent, with the approach of section 209 of the Regional Rail Reorganization Act of 1973 (3R Act), under which Conrail was created. Challenges to the implementation of transfer agreements could result in extensive delays threatening the continuation of rail service in the region. The threat of piecemeal litigation of agreements could also deter purchasers from participating in the transfer process.

The Secretary is directed to transmit the transfer agreements to the Congress, together with his determination of approval. The transfer agreements would be deemed approved at the end of 120 calendar days, unless both Houses pass a resolution stating that they do not approve the transfer agreements.

The ICC and the Attorney General are required to report to Congress on the package of transfer agreements negotiated by the Secretary. The time period for these comments is 30 days from receipt of the agreement from the Secretary.

The Senate amendment authorized performance under a transfer agreement and exempts the operation of the agreement from any other approval process. The issuance of securities to the United States or Conrail for the financing of a transaction would be exempt from the securities laws, since it would appear that the Government and Conrail will have adequate means to determine the worth of those securities. The Senate amendment provides that the acquiring railroad shall be deemed a rail carrier on the transfer date and shall assume service responsibilities under subtitles IV of title 49 of the Code. It also authorizes the discontinuance of rail service by Conrail over lines conveyed and all other rail properties on the transfer date.

The Senate amendment includes provisions regarding the extent of service to be assumed by acquiring carriers, a final transfer date, and the consolidation of the various transfer agreements. It directs the Secretary to insure that the freight transfer agreements provide for the continuation of the optimum level of self-sustaining rall service, consistent with the needs of the communities now served by Conrail and the long-term viability of acquiring rallroads, and the preservation and enhancement of transportation competition.

Further, it provides that all the freight transfer agreements shall include the same transfer date. The transfer date shall be a date not later than 36 months after the effective date of the Act. It also requires the Secretary to consolidate all the freight transfer agreements for purposes of public comment and Congressional review.

Conference Substitute

The Conference substitute provides that the Secretary is to engage the services of an investment banking firm to arrange for the sale of the common stock of the Corporation

A sale of the common stock would insure that all the major assets, including equipment repair facilities, would be transferred

and continue in operation.

Following the sale, a new Board of Directors is to be elected and railroad purchasers are required to vote their shares proportionately with all other shareholders. The Secretary is required to first offer to sell the stock to the employees. The stock option would be in an amount equal to wages foregone by employees.

The Conference substitute provides that if Conrail is determined not to be a profitable carrier by the USRA Board, or if the plan for the purchase of the common stock is not approved by the Secretary, or if Conrail requires additional funding, the Secretary is to initiate discussions for the transfer of the Corporation's rail freight properties. The Secretary is to insure that no less than 75 percent of the total rail service operated by the Corporation on the date of transfer shall be maintained if Conrail is transferred in pieces.

The USRA Board, which makes the profitability finding and which reviews the Secretary's determination that Conrail cannot be sold as an entity, is composed of the Comptroller General, the ICC Chairman, the Secretary of Transportation, the Conrail Chairman and the present USRA Chair-

There are two profitability tests. The first profitability test is on June 1, 1983 and is a prospective test. If it is determined on that date that Conrail will not be profitable, it may be sold in pieces. If Conrail is determined to be profitable on June 1, 1983, the Secretary is to continue to try to sell Conrail as an entity until October 31, 1983, when there is a second profitability test. The October test is a historical test for the five-month period from June 1, 1983 to October 31, 1983. If Conrail is determined to be not profitable on October 31, 1983, it may be sold in pieces. If Conrail is determined to be profitable on October 31, 1983, it is to be sold as an entity until June 1, 1984, unless Conrail requires additional funding in excess of the funds presently authorized.

After June 1, 1984, if the Secretary of DOT notifies the USRA Board that he cannot sell Conrail as an entity, the Secretary may transfer Conrail in pieces. If the USRA Board does not concur with the Sec-

retary, the procedure is repeated every 90

days.

Within 90 days after a determination by the Secretary of DOT, concurred in by the USRA Board, Conrail employees have the option of submitting an offer to purchase. The Secretary shall approve the employees' offer unless the Secretary determines that the employees are not financially responsible.

The Conference substitute defines profitable carrier as a carrier that generates sufficient revenues to meet its expenses, including reasonable maintenance of necessary equipment and facilities and which will be able to borrow capital in the private market sufficient to meet all its capital needs, excluding consideration of the debt held by the Federal Government.

The Conference substitute adopts the Senate amendment on public comment and congressional notification except that the period of congressional review is 60 days and the time period for ICC and Attorney General comments is 10 days.

The Conference substitute adopts the Senate amendment regarding performance under agreements; exempts transfer proposals from judicial or ICC review and says that unless the Corporation is found to be not profitable, it may not be sold in pieces until June 1, 1984.

The Conference substitute requires the Secretary to consolidate all freight transfer agreements for purposes of approval and review. In addition, all freight transfer agreements are to include a common transfer date.

Section 1143—Protection for Conrail employers

House Bill

Section 301 amends the 3R Act by adding a new Title VII. Section 701 establishes a program for protecting Conrail employees previously protected under Title V of the 3R Act, while limiting the cost to the federal government, Conrail Title V labor protection is repealed and the protection provided is less than the normal protection in the railroad industry. It is less only because of the dire financial circumstances of the Corporation.

If the employees and the Secretary of Labor are unable to agree on the elements of protection for the employees within ninety days, the Secretary of Labor shall prescribe the benefits. The program established should not contain elements which cause funds to be expended beyond those authorized under section 713.

The benefits under this section are intended to replace the benefits provided under Title V of the 3R Act. This is the exclusive protection for employees, and any employee protection contained in collective bargaining agreements is replaced by this protection. Title V was originally intended to provide for a limited amount of federal funding of employee protection for Conrail employees. It was anticipated that the liability would not be unreasonable. Despite revisions to Title V the liability has proved

A prerequisite to a legislative solution that will permit continued operation of essential rail services in the region is the replacement of Title V with this program of labor protection. Conrail's liability and the liability of the federal government is strictly limited to the funds authorized in this section.

Section 702 permits Conrail to accelerate the implementation of the crew consist and fireman manning agreements so that all

excess firemen and all second and third brakemen can be eliminated before the end of calendar year 1982. The firemen on the crews of trains operated in commuter service must be included by the Corporation in the termination program.

Section 703 allows employees who are deprived of employment on Conrail to have a right of first hire on other rail carriers. The Committee intends that all such employees must be qualified for the positions before they have rights under this provision.

Section 704 requires the Railroad Retirement Board and each rail carrier to maintain a list of positions and eligible employees. This provision is similar to one included in the Rock Island legislation and implemented by the Railroad Retirement Board.

Section 705 provides that any employee

Section 705 provides that any employee who accepts any benefits under section 701 or a termination allowance under section 702 shall be deemed to waive any employee protection benefits otherwise available, and shall waive the right to bring a cause of action for loss of any other benefits. The Committee intends the benefits available under this section be the sole benefits available to employees, and the acceptance of such benefits by the employees waives any rights they might have to other benefits.

Section 706 is a provision from the existing 3R Act which allows the Corporation to assign work.

Section 707 is a provision from the 3R Act which requires the Corporation to continue to use employees who have traditionally performed work for the Corporation.

Section 708 is a provision from the 3R Act which requires the various crafts and classes to enter into single collective bargaining agreements for each craft and class. A new section is added requiring that such agreements be reached within 45 days of the effective date of this title.

Section 709(a) and (b) are provisions retained from the 3R Act.

Section 710 limits the liability of the federal government and Conrail. The liability of the federal government under this section is limited to the amount of funds appropriated, and Conrail incurs no liability under section 701 or 702.

Section 711 preempts any State law, rule, or regulation requiring Conrail, Amtrak, or their commuter subsidiaries to hire specified numbers of persons for particular tasks. The Committee specifically intends to preempt any State full crew laws which require crews to contain certain numbers or certain positions, and any State laws which phase out such requirements. Given the dire circumstances of these rail transportation corporations, such a preemption is necessary.

Section 712 authorizes to be appropriated not to exceed \$165 million for fiscal year 1982 and not to exceed \$150 million for fiscal year 1982. Of the amounts authorized for fiscal year 1983. Of the amounts authorized for fiscal year 1982, \$115 million is available for termination allowances under section 702. The Committee emphasizes the importance of the termination program to the financial health of the Corporation, and the importance of these funds. Without funds to implement this program, financial improvement will be difficult to accomplish, Funds appropriated under the Staggers Act provision allowing for early retirement shall also be available for use under this section.

Senate Amendment

The Senate bill provides protection for Conrail employees who lose their jobs as a result of transactions authorized by the bill, while title IV defines the rights of employees hired by acquiring railroads. Together, the two titles replace the extremely costly protection scheme set forth in title V of the Regional Rail Reorganization Act of 1973.

Section 413-1—Work force reduction program

This section contains a "Special Termination Allowance" allowing Conrail to "blank" the positions (eliminate the job with the man) vacated under the program. Separations would be limited to the numbers of excess firemen and second and third brakemen (including passenger firemen) presently employed by Conrail (but not necessarily the individuals occupying those positions if more senior personnel wish to be separated. About 4600 positions are at issue, and their elimination would make the properties more saleable. This was addressed in the Conrail settlement after the DOT bill was introduced.

The program would operate at the discretion of Conrail but mandatorily as to affected employees (after voluntary separations were taken). The section provides for payments at the rate of \$200 per month of active service with Conrail or a predecessor, with a cap of \$25,000 (i.e., 4 years, 2 months service).

Section 413-2—Separation allowance

This section provides for separation allowances for employees of Conrail who do not receive offers of employment from acquiring railroads. The amount of an allowance would be determined by the number of years the particular employee had been employed by Conrail and its predecessor railroads as of the date of separation. For example, an employee who had served on the New York Central, the Penn Central, and then Conrail would be credited with the individual's service under all three corporate entities.

The maximum allowance would be \$30,000. The schedule for computation is graduated to provide greater protection for individuals who have invested significant periods in service to Conrail and its predecessors. The schedule also recognizes the greater difficulty and hardship associated with retraining and relocation of employees who are older and have deeper roots in their communities.

Subsection (d) preserves the eligibility of employees deprived of employment to railroad unemployment insurance. Under a peculiarity of the Railroad Unemployment Insurance Act, for purposes of establishing eligibility for future coverage a separation allowance is treated as income only on the day it is paid. However, an employee is disallowed from receiving unemployment benefits for a period determined by dividing the allowance by the employee's straight-time wage for a two-week period. (For instance, an employee whose allowance is \$30,000 and whose straight-time wage per 2-week pay period is \$1,000 would be disallowed unemployment compensation for 30 pay periods, or over 1 year.) In some cases, this can result in an employee receiving no unemployment benefits or very limited benefits. even if he remains unemployed through no fault of his own for an extended period. This is because the employee is "earning" no new entitlement to benefits during the period the employee is disallowed from receiving benefits. The bill would disallow eligibility for benefits immediately after payment of the allowance but would treat the allowance as if it had been paid as regular wages for purposes of establishing future eligibility. This protection may be required

by some employees affected by service transfers because of the concentration of persons who will be seeking new employment at the same time in specific areas. The provision also eliminates an anomalous situation whereby an employee's entitlement to unemployment insurance following the disqualification period may depend upon the date on which he was separated.

Section 413-3-Preferential hiring

For Conrail employees who fail to receive offers from acquiring railroads, this section provides the same rights to be hired by other railroads on a priority basis that was afforded to dismissed Rock Island and Milwaukee Railroad employees. This priority is strengthened by deletion of the phrase "unless found to be less qualified than other applicants," and substitution of language that qualifies the hiring preference on the more objective basis of experience in the class and craft of employment.

Section 413-4—Central register of railroad employment

This section creates a central register of railroad employment, building on the system of job placement created for Rock Island and Milwaukee employees by the Railroad Retirement Board. The Board would actively promote the placement of Conrail employees and other displaced railroad employees. All railroads would be required to provide notice of vacancies that they are unable to fill from their existing roster, and the Board would act as an agent for former railroad employees entitled to statutory preference by filing applications for employment. Under section 413-9 discussed below, the Board would have authority to issue any regulations necessary to assure that hiring preferences are effectuated.

The purposes sought to be achieved by these provisions could be accomplished more effectively if the railroads unite with rail labor organizations to establish voluntary mechanisms to place unemployed railroad workers. While the poor placement results of the Rock Island and Milwaukee experiences may have been due in part to the reluctance of railroad employees to move from their communities, there also appears to be a problem of insufficient effort within the industry to preserve the industry's most important asset—trained and experienced personnel.

The central register and related requirements and administrative mechanisms would be maintained for a period of 5 years after the transfer date.

Section 413-5-Moving expenses

This section provides for moving expense benefits for former Conrail employees who are forced to move to obtain employment with another railroad. Under section 414-4(b)(3), discussed below, this benefit would extend to a Conrail employee offered a position with an acquiring railroad that requires a change of residence.

The types of costs for which payment is authorized would be similar to those allowed under other protective conditions. The maximum benefit for any individual would be \$5,000, reduced by any retraining benefit paid under section 413-6.

Section 413-6—New career training assistance

This section authorizes the payment of new career training expenses for former Conrail employees who are not offered employment with an acquiring railroad. The maximum benefit would be \$5,000 reduced by the amount of any moving expense benefit paid to the individual.

Section 413-7-Medical insurance

This section provides for the continuation of group medical insurance coverage for former Conrail employees who are not offered employment by an acquiring railroad. The maximum period of coverage is 6 months from date of separation. In the event an employee comes under the coverage of another comprehensive group policy as a result of re-employment prior to the expiration of 6 months, coverage lapses immediately.

Section 413-9—Authority of the Board and the Secretary

This section prescribes the powers of the Railroad Retirement Board in administering the provisions of section 413-3 (Preferential Hiring), 413-4 (Central Register of Railroad Employment), 413-5 (Moving Expenses), 413-6 (New Career Training Assistance), and 413-7 (Medical Insurance). The Secretary is required to transfer to the Board funds appropriated for employee protection. The Board would allocate funds needed for separation allowances to Conrail and Amtrak (as successor to Conrail as an employer of commuter service employees), and the remaining funds would be available for the Boardadministered provisions of this title, such as moving expenses, medical insurance, and retraining. In addition, the Secretary is authorized to assist the Board in developing programs under this title. The broad authority given the Board under this Section, is intended to avoid the implementation problems, particularly in regard to priority hiring, that arose under the Milwaukee and Rock Island legislation.

Section 413-11—Authorization for appropriations

This section authorizes the appropriation of not more than \$400 million for employee protection under this title.

Conference Substitute

The Conference substitute combines the labor protection provisions of both Houses. The conferees agreed to the House provision directing the Secretary of Labor and representatives of labor to negotiate the elements of protection for employees. However, the Conference substitute sets a \$20,000 cap on the protection for each employee.

For the workforce reduction program, the conferees agreed that payments to employees should be paid at the rate of \$350 per month of active service with Conrail or a predecessor. The purpose of this program is to eliminate 4,600 employee positions; 3,300 brakemen and 1,300 firemen. In addition, all the firemen in commuter service are to be included in this program. This will result in the elimination of firemen positions in commuter service.

Section 1144—Repeals House Bill

Section 302 repeals Title V of the 3-R Act, but provides that any benefits accrued as of the effective date of the Act shall be paid. It also repeals section 11 of the Milwaukee Railroad Restructuring Act and section 107 of the Rock Island Transition and Employee Assistance Act.

Senate Amendment

This section defines the relationship of this legislation to other provisions of law.

Subsection (a) repeals all provisions of Title V of the Regional Rail Reorganization Act of 1973, except those necessary to the continued functions of Conrall prior to service transfer. Title V is the source of labor protection provisions that have proved to be excessively costly to the taxpayer, as described in the April reports of Conrail, USRA, and the Department, as well as the Conrail March 15 report on labor. Retention of Title V, particularly the provisions concerning monthly displacement allowances, constitutes a bar to service transfer, since acquiring railroads would not be willing to assume these obligations. The bill terminates the entitlement program as of October 1, 1981. However, employees who performed service through September of 1981. or held themselves available for service, would be paid any benefits due on October 1, 1981, if timely claimed under present law.

Subsection (b)(1) is a clause of limitation that makes clear that the employee protection provisions of the bill are the exclusive protection for employees affected by service transfers under the bill. The waiver provision of paragraph (2) is a technical provision intended to bar an employee from accepting the protections of the bill while challenging its exclusivity in the courts.

Subsection (c) repeals provisions of the Milwaukee Railroad Restructuring Act and Rock Island Transition and Employee Assistance Act relating to the maintenance by the Railroad Retirement Board of lists of dismissed employees, since those lists would be incorporated into the central register established by section 413-4 of the bill.

Subsection (d) repeals sections 216(b)(3) of the 3-R Act and 509(b)(1) of the 4-R Act which provide for special funding to implement Conrail's workforce reduction program. This funding would not be necessary in view of the funding authorized by section 413-11 for labor protection payments.

Conference Substitute

Combines the provisions of both Houses and is effective the first day after the first month of the date of enactment.

Section 1145—Transfer of passenger service

House Bill

The House bill amends the Rail Passenger Service Act by adding new sections 506 and 507.

Section 506 provided a procedure for transferring current agreement employees of Conrail's commuter subsidiary performing commuter functions to Amtrak Commuter.

Subsection (a) required representatives of the employees to begin negotiating an implementing agreement with representatives of Conrail, its commuter subsidiary, and Amtrak Commuter within 420 days of the effective date. These negotiations are to identify the employees to be transferred, giving preference to employees with comservice experience, determine the procedure by which employees accept transfer to Amtrak Commuter and are accepted by Amtrak Commuter, determine a procedure for seniority within Amtrak Commuter which shall, to the extent possible, preserve the employees' prior passenger seniority rights, ensure that the proper number of employees are transferred to Amtrak Commuter, ensure that all employees are transferred not later than the 540th day after date of enactment (when Amtrak Commuter assumes operations) and determine the extent to which employees of Amtrak Commuter retain freight seniority with Conrail.

Subsection (b) provided that if no agreement is reached by the end of 30 dys after negotiations begin, a neutral referee is to be

selected. The referee is to expeditiously resolve all matters in dispute, and his decision is binding. This procedure is to ensure that an implementing agreement is in place, and employees transferred, by the time Amtrak Commuter is to commence operations.

Subsection (c) provided that any employee of Conrall or its commuter subsidy not offered employment with Amtrak Commuter under this section shall be eligible for employee protection under Section 701 of the 3R Act (the successor to Title V) to the same extent as if the employee had remained with Conrall.

Section 507 provided a procedure for negotiation of a new collective bargaining agreement

Subsection (a) required representatives of the employees to be transferred and Amtrak Commuter to enter into a new collective bargaining agreement prior to the date Amtrak Commuter begins operation. The pre-existing Conrall agreement would not apply to Amtrak Commuter.

Subsection (b) required the establishment of a fact finding panel, chaired by a neutral expert in industrial relations, to recommend changes in operating practices and procedures which result in greater productivity to the maximum extent practicable.

Senate Amendment

The Senate Amendment provided for an implementing agreement to transfer Conrail employees to commuter authorities or Amtrak. The implementing agreement worked in a manner similar to that provided in the House bill.

The Senate Amendment also provided for a procedure for negotiating a new collective bargaining agreement for those employees transferred from Conrail, either to Amtrak or a commuter authority. The Amendment provided for a consolidated Amtrak commuter and intercity workforce, with the negotiations conducted by Amtrak and the commuter authority members of the Amtrak Commuter Board of Directors having the power to veto commuter service components of a collective bargaining agreement.

The Senate Amendment provided a procedure for resolving disputes related to negotiation of the initial collective bargaining agreement and also provided for a council of three union representatives to conduct negotiations with a commuter authority.

Conference Substitute

The conferees adopted an employee transfer provision. The substitute provides for an implementing agreement, a fact finding panel to recommend changes in operating practices and procedures, and a procedure for negotiation of an initial collective bargaining agreement for Amtrak Commuter and commuter authorities that elect to operate their own service.

The implementing agreement provided for in a new section 508 of the Rail Passenger Service Act is designed to provide for an orderly transfer of employees from Conrail to Amtrak Commuter or the commuter authorities. The conferees note their intent to provide for maximum flexibility to the employees and employers involved by providing generally for retention of seniority rights and the right to "bump" back into Conrail at least once every six months. However, the bumping process is not to result in any disruption of service or the filling of a position which would otherwise not be filled under the terms of any crew consist, fireman manning or other similar agreements. This last provision is designed as protection

for Conrail, and is not intended to restrict the ability of Amtrak Commuter or the commuter authorities to manage their work forces, subject to applicable collective bargaining agreements.

The fact finding panel established pursuant to a new section 509 of the Rail Passenger Act is designed to recommend changes in operating practices and procedures which would result in greater productivity to the maximum extent practicable. The fact finding panel should look at a variety of changes which may improve productivity, such as flexibility in employee assignments and ensuring an appropriate number of employees for particular tasks.

The procedure for negotiation of an initial collective bargaining agreement for Amtrak Commuter or commuter authorities provided for in a new section 510 of the Rail Passenger Service Act is designed to provide for an orderly and expeditious procedure for the negotiation of new collective bargaining agreements. The existing Conrail agreements would not apply to Amtrak Commuter or to commuter authorities that chose to operate their own service.

Section 1146—Labor transfer House Bill

The House bill adds new sections 405 and 406 to the 3R Act.

This section requires the rail carrier or other entity purchasing rail properties and the representatives of the employees to be transferred to commence implementing agreement negotiations within 30 days after the date any transfer agreement is entered into.

The negotiations are to determine the number of employees to be transferred, the specific employees offered employment, the procedure by which employees accept employment and are accepted into employment, the procedure for determining seniority (which shall, to the extent possible, preserve prior freight seniority rights), and insure that all involved employees are transferred no later than 120 days after the date the transfer agreement is entered into.

If no agreement is reached within 30 days of commencement of negotiation, a neutral referee is to be selected, who is to commence hearings and decide all matters in dispute with respect to the implementing agreement negotiations. The referee's decision is to be rendered within 30 days after the date of commencement of hearings.

It requires the Commission to determine the labor conditions to apply to employees affected by any transfer under this title as if such transfer were made under the Interstate Commerce Act.

Senate Amendment

The Senate bill requires acquiring railroads and representatives of Conrail and acquiring railroad employees, to make every reasonable effort to achieve a pretransfer agreement. The agreement would determine how new positions on an acquiring railroad would be filled, how Conrail employees would be selected for transfer, and how seniority rights would be determined. The agreement would also deal with compensation, rules, working conditions and fringe benefits applicable to transferred employees, as well as protection of any transferred or acquiring railroad employee adversely affected by service transfer.

The bill permits, and the Department would encourage, a uniform agreement covering multiple acquiring railroads (similar in scope to the agreement covering former Milas the "Miami Accords")

Section 414-4—Selection of employees

This section is the first of the provisions that would take effect only in the absence of an agreement by the parties. The section would accomplish two major objectives. First, it would provide a method for determining the number of new positions on the acquiring railroad that would be filled from the ranks of former Conrail employees ("transferred employees") and the number of positions that could be filled from the acquiring railroad's previous rosters. In general, Conrail employees would be given first bid on new positions. However, if acquisition of a line from Conrail occasions the abolishment of a position due to coordination or consolidation of service, the acquiring railroad employee affected by the transaction would have first bid on any new position the acceptance of which would not require a change in residence.

Second, in selecting Conrail employees for new positions the acquiring railroad would be required to respect class and craft distinctions common in the industry and to favor persons senior in service over those with less time in service.

Third, the section would provide a method for selecting Conrail employees on a geographic basis. If an insufficient number of Conrail employees are available on the transferred line segment, other employees available to accept positions without change of residence would receive offers. If additional personnel were required, offers would be made at increasingly distant Conrail reporting points.

Section 414-5-Collective-bargaining agreements

This section governs basic matters of compensation, work rules, and fringe benefits in the event agreement is not reached under section 414-3. The approach of this section is to assure transferred employees the same pay and basic quality of working conditions afforded other employees of the acquiring railroad, while avoiding the imposition of unrealistic constraints rooted in the past.

Conrail has failed at least in part because of the legislated imposition of rules and local agreements that derived from the six bankrupt railroads that preceded Conrail in the service area. Those constraints resulted in a balkanization of Conrail labor relations and the perpetuation of artificial barriers to efficient use of personnel. Prospective acquiring railroads will not be willing to accept similar constraints; nor can consumers of rail service afford to support such inefficiencies.

Therefore, section 414-5 would make clear that an acquiring railroad will not be bound by any contract, schedule, or agreement in effect on Conrail. If labor and the management of an acquiring railroad wished to bargain for similar (or even identical) provisions, they would be free to do so; but no inference could be derived from the bill that an acquiring carrier would be bound by prior agreements.

Section 414-6-Seniority rights

This section assures that a transferred employee's prior service would be respected in determining the employee's relative seniority on the acquiring railroad. The section recognizes that a precise definition of the relative seniority of transferred employees will necessarily await implementing agreements.

waukee and Rock Island operations, known Section 414-7-Labor protection obligations of acquiring railroads

> This section requires the Secretary to impose protection for transferred employees and the employees of a Class I or II acquiring railroad who may be adversely affected by a service transfer, in the event no agreement is reached under section 414-3. The protection referenced in this section is principally income protection, since most other issues relating to employee rights and responsibilities are treated in section 414-4, 414-5, and 414-6. The protection imposed would be similar to that adopted by the parties to midwest rail restructing in the "March 4 Agreement," sometimes known as the "Miami Accords."

> Those acquiring railroads would be required to provide a guarantee of 80 percent of former straight time wages for up to three years, depending on the employee's length of service.

> Amtrak Commuter and the commuter authorities shall not be responsible for the protection under this section.

Section 414-8-Arbitration of disputes

This section requires that any minor dis-pute or claim arising under this title shall be subject to binding arbitration under normal Railway Labor Act processes. Resolution of disputes under agreements referenced in this title are already within the purview of the Railway Labor Act and no special provision is required in the bill. This section would make clear that, even if a labor transfer agreement is not reached under section 414-3, the parties would be free to interpret and apply the provisions of this title by agreement; and any subsequent minor dispute or claim would be resolved in accordance with the guidance provided by such agreement.

Section 414-9-Definition

This section restricts the applicability of subpart 4 by defining "acquiring railroad," in the freight context, to mean a Class I or Class II acquiring a railroad or a neutral terminal company established under subpart 2. Thus, short line railroads would not be covered by subpart 2. Thus, short line railroads would not be covered by subpart 4; and, under the definition of "deprived of employment" in section 411-3, Conrail employees who failed to receive a firm offer of employment from a Class I, Class II, or neutral terminal railroad would be entitled to receive the benefits of subpart 3.

Conference Substitute

The Conference substitute requires acquiring railroads under a transfer agreement to enter into implementing agreements with employees to determine the number of employees who will transfer to the acquiring railroads and to determine other issues. If no agreement is reached, the issues are submitted to binding arbitration.

If the employees and the acquiring railroads are unable to agree on a collective bargaining agreement, the collective bar-gaining agreement of the acquiring carrier shall prevail. If the acquiring party is not a railroad, and the parties cannot agree, the collective bargaining agreement of Conrail shall apply.

Employees transferred to acquiring carriers or other parties which become carriers shall be protected under the normal labor protection provisions of the Interstate Commerce Act, which are embodied in New York Dock Railway—Control—Brooklyn Eastern District Terminal, 360 ICC 60 (1979).

Section 1147-Organization of USRA House Bill

The Board of Directors of USRA is reconstituted to consist of the Chairman, who shall be selected by any outgoing Chairman and the other members, the Secretary of Transportation, and the Comptroller General of the United States.

Senate Amendment

No comparable provision.

Conference Substitute

The Board of Directors of USRA is reconstituted to consist of the present Chairman of USRA, who shall remain as Chairman of the Board until the expiration of his existing term, or his resignation, the Secretary of Transportation, the Comptroller General of the United States, the Chairman of the Commission, and the Chairman of the Board of Directors of the Corporation. The present Chairman's term will expire on Dec. 31, 1983, and the next Chairman's term shall be three years. The present Chairman may be reappointed.

Section 1148-Function of USRA House Bill

The House bill provides that the Association is to monitor the financial performance of the Corporation, determine whether the conditions and requirements of this Act are met, purchase additional stock or accounts receivable of the Corporation, and appoint and fix the compensation of employees.

The Association shall submit to the appropriate Committees of the Congress within 30 days of each additional purchase of stock a report outlining the progress of the Corporation in meeting the goals and requirements of this Act.

Not later than 30 days after the Association makes its last purchase of stock of Conrail, it shall cease to exist.

Senate Amendment

This section amends section 201 of the 3-Act to effect the transfer of certain USRA non-litigation functions to the Secretary not later than January 1, 1982. The Association would transfer to the Secretary, or as otherwise designated by the Secretary, property and budget resources which are primarily related to and support the conduct of the non-litigation functions. This transfer of authority in no way limits USRA's authority to conduct the valuation litigation under sections 303(c) and 306 of the 3-R Act, including related administrative functions, nor is it to interfere with the functions assigned to USRA under section 415-7 of this legislation.

USRA has developed specific systems. data bases, models and the required inhouse expertise to utilize these tools monitor Congress on specific inquiries. Many of these same systems have also been used by the Association in performing the functions being transferred to the Secretary. Where property is needed to support both the Association's functions and the functions transferred to the Secretary, this section provides that the Secretary and the Board of Directors of the Association shall reach agreement on the joint use of such property. With regard to the computer systems and models now operated by USRA, however, the Committee notes that USRA staff is trained in use of these tools in an effective manner. Under the circumstances, it appears desirable to retain these computer programs and intellectual property USRA subject to joint use by both USRA

and the Secretary as contemplated by the

Any litigation associated with the functions, powers and duties assumed by the Secretary under this subsection would be the responsibility of the Attorney General.

Upon assuming the new functions, the

Secretary is directed to assume the financial obligations of USRA issued under sections 210, 211, and 216 of the 3-R Act and to adopt appropriate USRA regulations governing non-litigation matters until the Secretary has had the opportunity to re-pro-mulgate such regulations in appropriate form. Paragraph (5) makes provision for the continuation of non-litigation contracts and loans following the transfer.

Conference Substitute

The Senate recedes except that USRA retains its litigation functions.

Section 1149-Access to information

House Bill

The House bill requires Conrail to make available to USRA such information as USRA determines is needed to carry out its functions. It also requires USRA to request from other affected parties information which will enable USRA to determine if the conditions of this Act are met.

Senate Provision

No comparable provision.

Conference Substitute

Senate recedes.

Section 1150-United States Railway Association reports

House Bill

No similar provisions.

Senate Amendment

This section established the responsibilities of the USRA under this act. USRA would monitor, evaluate and report periodically to Congress on the Secretary's performance with respect to the entire transfer process as it affects, among other matters, labor, rail services, and the security of Federal funds. The periodic reports would also evaluate Conrail's performance. The USRA is also required to issue a final report to Congress evaluating the Secretary's transfer agreements.

Conference Substitute

House recedes.

Section 1151-USRA authorization

House Bill

There are authorized to be appropriated to the Association for administrative expenses not to exceed \$1 million for the fiscal year ending September 30, 1982, \$1.1 million for the fiscal year ending September 30, 1983, and \$1.2 million for the fiscal year ending September 30, 1984.

Senate Amendment

In view of the substantially increased responsibilities that the Secretary would assume under the 3-R Act, this section de-letes the existing \$12.5 million limit on authorizations and substitutes \$15 million. The USRA's authorization is extended through fiscal 1982. Due to the decreased functions of the USRA, the authorization is limited to \$15 million.

Conference Substitute

The conference substitute provides an authorization of \$13,000,000 for fiscal year 1982 and \$4,000,000 for fiscal year 1983.

Section 1152-Judicial review

House Bill

The House bill consolidates all civil actions arising out of the provisions of or the

amendments made by this Act to the Special Court.

Subsection (b) provides for appeals to the Supreme court.

Subsection (c) provides the standard for review of administrative action under the provisions of or amendments made by this

Subsection (d) provides for the assignment of additional judges to the Special Court, if necessary.

Senate Amendment

The Senate bill is identical to the first three subsections of the House bill. The Senate bill does not include a provision for the assignment of additional judges to the Special Court, if necessary,

Conference Substitute

Senate recedes.

Section 1153-Transfer taxes and fees; recordation

House Bill

The House bill exempts the transfers or conveyance of rail property made under this Act and the recording of all deeds, bills of sale, and other instruments incident to such transfers, from the payment of any taxes, imposts, or other levies imposed by the United States or any State or political subdivision thereof. The exemption would apply to the transfer of any interest in rail property including real, personal and mixed. The transferors and transferees of rail prop erty would be entitled to record deeds, bills of sale, easements and other such instruments, and to record the release or removal of any pre-existing liens or encumbrances with respect to transfers of property, upon payment of any appropriate and generally applicable charges to compensate for the cost of the service performed. This provision is not intended to affect the Federal income tax liability of Conrail or acquiring rail-

This section also provides that transfer of designated rail property under section 205 of the Act is to have the same effect for purposes of rights and priorities with respect to the property as recordation on the transfer date of deeds, or other appropriate instruments, in offices appointed under State law for such recordation. Acquiring railroads and other entities would, however, be required to proffer such deeds or other instruments for recordation within thirtysix months after the transfer date as condition of preserving such rights and priorities beyond the expiration of that period. Conrail would be required to cooperate with the acquiring railroad in preparing the necessary recordation documents.

Senate Amendment

The Senate bill is identical.

Conference Substitute

The substitute is identical to the House and Senate bills.

Section 1154-Satisfaction of claims

House Bill

Section 1154 requires Conrail to satisfy all valid claims against the Corporation including loss and damage claims, or make provision for their satisfaction, before making any distribution of assets to the United States.

Senate Amendment

This section requires Conrail to satisfy all valid claims against the Corporation, or make provision for their satisfaction, before making any distribution of assets to the United States. The effect of this provision is to relinquish any priority of payment to which Conrail debentures and series A preferred stock may be entitled on liquidation or otherwise.

Conference Substitute

The conference substitute is the same as the House bill and the Senate amendment.

Section 1155-Expedited supplemental transactions

House Bill

This section requires the Secretary, within 10 days after the effective date of this Act, to initiate discussions and negotia-tions for the transfer of Conrail's rail properties and freight services in Connecticut and Rhode Island to another railroad in the

Within 60 days after the effective date, the Secretary is required to petition the Special Court for an order transferring Conrail's rail properties and freight service in Connecticut and Rhode Island to another railroad in the region. That railroad must have completed negotiations and submitted to the Secretary a proposal to assume Conrail's freight service in those states on a selfsustaining basis for at least 5 years or developed a proposal to assume freight service in those states under an agreement with Conrail or which has, prior to May 1, 1981, submitted a proposal to the Secretary for such a transfer.

The Secretary shall, as part of the transfer, promote the transfer of additional nonmainline Conrail properties in adjoining states that connect with properties to be transferred.

The Special Court is to determine a fair and equitable price for the transferred rail properties and shall, unless the parties otherwise agree, establish fair and equitable divisions. The Special Court may establish a method to ensure that such divisions are promptly paid.

If Conrail continues to operate freight service over those portions of the Northeast Corridor in Connecticut and Rhode Island after the transfer date, Conrail is responsi-ble for paying Amtrak the compensation, as may be agreed by Conrail and Amtrak, for those operations.

Any employee deprived of employment as a result of the transfer process is eligible for labor protection benefits under the new section 701 of the 3R Act.

Senate Amendment

The Senate bill gives the Secretary discretion to transfer the lines in Connecticut and Rhode Island.

Conference Substitute

The conference substitute adopts special procedures for the transfer of lines in Connecticut, Rhode Island and Massachusetts. Under this section, the Secretary is required within 10 days, to initiate discussions and negotiations for the transfer of some or all lines in Connecticut and Rhode Island under a plan which provides for continued rail service on those lines for a period of four years

Within 120 days of enactment, the Secretary is required to petition the special court for an order to transfer all of Conrail's rail properties and service obligations to one or more railroads which have submitted proposals to assume operations and service obligations in such states for at least four years. For the purposes of this provision, the transfer proposal may include Conrail as long as the carrier agrees to maintain service for the requisite period.

The special court is to determine a fair and equitable price for the property, and it must establish divisions of joint rates if the parties cannot agree. In addition, the special court is required to establish a method to insure that divisions are promptly paid.

The acquiring carrier or carriers must assume all charges payable by Conrail to Amtrak except in instances where Conrail operates freight service over portions of the Northeast Corridor after the date of the transfer.

Any employee eligible for Title V protection prior to the date of enactment deprived of employment as a result of the transfer shall be eligible for benefits under section 701 unless such employee refuses an offer of employment with the acquiring railroad or railroads.

Subsection (g) provides procedures for the transfer of specified lines in Massachusetts similar to those discussed above for Connecticut and Rhode Island lines. The conferees agree that the Secretary can sell some or all of the lines in Connecticut and Rhode Island to one or more purchasers, so long as 100 percent service is maintained on all of the lines.

$Section\ 1156-Abandon ments$

House Bill

The House bill adds a new section 309 to the 3R Act. Any application for abandon-ment filed by the Corporation with the Interstate Commerce Commission before November 1, 1981, shall be granted within 30 days by the Commission unless an offer of financial assistance is made. If such an offer of financial assistance is made, the provisions of the Interstate Commerce Act applying to such offers shall apply (49 U.S.C. 10905 (d)-(f)). The Corporation may file a notice of insufficient revenues with the ICC for any line prior to November 1, 1981. At any time prior to October 1, 1983, the Corporation may abandon such a line with 30 days notice to the ICC unless an offer of financial assistance is made. The Corporation solely shall determine what is contained in the notice of insufficient revenues. The Committee expects the Corporation to give particular consideration to lines where state or local governments have expressed an interest. The Corporation is given broad authority by this section, which is necessary because of the financial circumstances of the Corporation, but the authority must be exercised with the utmost regard for the transportation needs of states and local communities.

The employee protection provisions of the Interstate Commerce Act do not apply to employees affected under this section. The employees would be covered under the funds available under section 701.

Senate Amendment

The Senate amendment provides that all transfer agreements entered into this subsection or section 412-11 of the subtitle shall provide for the disposition of proceeds of liquidation in the event that property transferred or leased is abandoned within five years after the transfer date.

Subsection (b) provides that no purchaser can submit an application for abandonment on any line transfer until one year after the date of any transfer or sale.

Conference Substitute

The Conference substitute adopts the House bill with several changes. The Corporation may file, before December 1, 1981, with the Commission any lines which it will abandon. The Commission shall grant the application within 90 days unless an offer of

subsidy is made. The Corporation, at any time before November 1, 1983, may file a Notice of Insufficient Revenues for any line. 90 days after the notice is filed, the Corporation may file an abandonment application. Such application must be granted within 90 days unless a subsidy offer is made.

After a line is abandoned the Commission shall appraise the net liquidation value of such line. If Conrail receives a bona fide offer within 120 days, it must sell the line for 75% of net liquidation value. In addition, Conrail may not dismantle bridges or other structures for an additional 120 days.

The labor protection provision of the Interstate Commerce Act shall not apply to any abandonment granted under this section. The Interstate Commerce Commission may not reject any abandonment application filed under the procedure of this Act.

Section 1157—Amendment to the Railway Labor Act

House Bill

The House bill amends the Railway Labor Act to provide a special procedure for disputes involving publicly funded and operated rail commuter services, including those involving Amtrak Commuter.

This provision allows either party to the dispute, or the Governor of any state through which the service operates, to request the President to establish an emergency board. Upon such request, the President must establish an emergency board.

If the President has established an emergency board, either under this new provision or under his existing discretionary authority, no change in conditions may be made by either party for 120 days, unless by agreement.

The emergency board must report on the dispute within 30 days of its creation. Within 60 days of the emergency board's creation, the National Mediation Board shall conduct a public hearing on the dispute at which each party is to explain why it has not accepted the recommendations of the emergency board for settlement of the dispute.

If within 120 days of the creation of the emergency board, there is no settlement, either party, or the affected Governors, may request establishment of a second emergency board, which the President must then establish

then establish.

Within 30 days after creation of the second emergency board, the parties to the dispute shall submit final settlement offers to the board. Within 30 days after submission of such offers, the board shall report to the President with its selection of the most reasonable offer. No change in conditions may be made by the parties for 60 days after the board's report, unless by agreement.

If the board selects the carrier's final offer and the employees then engage in work stoppage arising out of the dispute, then such employees shall not be eligible for railroad unemployment benefits for the duration of the dispute. Conversely, if the board selects the employees' final offer which the carrier does not accept, and the employees engage in a work stoppage arising out of the dispute, the carrier is not entitled to any benefits from a mutual aid pact for the duration of the dispute.

Senate Amendment

The Senate Amendment did not amend the Railway Labor Act but had a free standing provision of a similar nature that applied only in the negotiation for a new collective bargaining agreement. Conference Substitute

The conference substitute adopts the House provision.

Section 1158—Concerted economic action House Bill

The House bill provides that cross strikes between freight and commuter service are prohibited. Any such action is a violation of the Railway Labor Act.

Senate Amendment

The Senate amendment provides that cross strikes between freight and commuter service are prohibited.

Conference Substitute

The Senate recedes to the House.

Section 1159—Construction and effect of certain provisions

House Bill

The House bill provides that any cost reductions resulting from this Act may not be used to limit the amount of any rate, rate increase or surcharge maintained or proposed by Conrail. The Committee expects the Commission to prescribe a simple formula to allow implementation of this section without undue burden on shippers, Conrail, or other railroads. Conrail management would retain discretion to adjust rates downward on the basis of any reductions or competitive efficiencies that would be achieved as a result of this Act.

Subsection (b) provides that the transfer of any lease agreement or contract by Conrail pursuant to the provisions of or amendments made by this Act is not a breach, default, or violation of an agreement.

Senate Amendment

No comparable provision.

Conference Substitute

The Conference substitute adopts the House provision with a change that limits the House language to labor savings which result from this Act. The Commission may not consider such savings in any rate proceeding.

Section 1160-Labor authorization

House Bill

The House bill provides an authorization of \$25,000,000 to pay for title V labor protection payments that accrue prior to the repeal of title V.

Senate Amendment

Basically, the same as the House bill.

Conference Substitute

The conference substitute is the same as the House bill.

Section 1161—Light density rail service House Bill

No comparable provision.

Senate Amendment

The Senate bill provides that the Secretary shall, to the extent possible, encourage purchasers of property to assume operating responsibilities over all associated branchlines which are financially viable.

Subsection (b) provides that the Secretary may negotiate for and execute the transfer of any lines designated by Conrail as not necessary to achieve profitability as defined in section 412-12 of this subtitle. Conrail shall make such a determination on any line within thirty days of such request by the Secretary of Transportation.

Subsection (c) provides that not withstanding the provisions of section 412-12 from the date of enactment the Secretary may negotiate and execute a transfer of the following classification of lines:

(1) Any Conrail lines subject to abandon-

(2) Rail properties located in the States of

Rhode Island and Connecticut.
(3) Branch lines identified by Conrail as not necessary for the achievement of profitability pursuant to subsection (b) of this section.

Subsection (d) provides that all lines are subject to a transfer agreement under section 412-15 of this Chapter for subsection (c) of this section can be transferred to states or shippers or any combination free of the Rail Common Carrier Status under the requirements of Subtitle IV of Title 49 United States Code.

Subsection (e) provides that compensation for the transfer of these properties may be for a nominal consideration if justified by the public benefit. Further, this subsection frees a noncarrier entity purchaser from regulatory authority under Subtitle IV of title 49, United States Code.

Conference Substitute

The conference substitute generally follows the Senate provision. The reference to abandonments in subsection (a) is clarified to indicate that the provision applies to abandonments other than those subject to section 308. A provision is also incorporated to permit a credit against the purchase price for reasonable expenses incurred in negotia-tions for purchase of rail properties which are subsequently purchased in accordance with the provisions of this subtitle. An equitable division of joint rates for through routes is required.

Section 1162-Rehabilitation and improvement financing

House Bill

The House bill limits funding for fiscal years 1981 and 1982 at a \$6.5 million level. Senate Amendment

The Senate bill does not limit the funding for this program. Instead it provides that the rail lines of carriers in bankruptcy, such as the Milwaukee Road and Rock Island Railroads, be given the highest priority for rail rehabilitation and improvement financing. It also allows purchasers of Conrail lines to be eligible for funding.

Conference Substitute

The House recedes on its provision which limits funding for this program. The conferees adopt the Senate Amendment with the addition of a provision providing the same high priority for the St. Louis Rail Gateway Project

The Conferees recognize that restructuring the rail freight network in the St. Louis Rail Gateway is a high priority, necessary to increase terminal capacity and to meet

the growing traffic demand.

Since terminal congestion is one of the major deterrents to profitability for rail-roads, it is the intent of the conferees that the Federal Railroad Administration reserve \$50 million of preference share funding in fiscal year 1982 of the available authorization, for the restructuring project in the St. Louis Rail Gateway.

Section 1163-Northeast Corridor cost dispute

House Bill

The House Bill provided a means to resolve outstanding cost disputes on the Northeast Corridor.

Subsection (a)(1) would require the Interstate Commerce Commision (ICC) to deter-

mine an appropriate costing methodology for allocation of Northeast Corridor costs resulting from commuter operations within 120 days of the effective date, unless the involved parties otherwise agree on a methodology by that date. The Commission is to consider all relevant factors, including existing statutory standards. The Commission already has the jurisdiction to decide this dispute, but no party has previously invoked its jurisdiction.

Subsection (a)(2) would require the ICC to determine a fair and equitable costing methodology for compensation to Amtrak by Conrail for freight operations over the Northeast Corridor within 120 days of the effective date of this Act, unless the parties otherwise agree by that date. In making its determination, the ICC is to consider the industry-wide average compensation for freight trackage rights and any additional costs associated with high-speed service provided over the Northeast Corridor.

Subsection (b) would provide that any determination by the ICC would be effective only for the future (or if the parties reach an agreement, only since the date agreed by the parties). Any such determination by the ICC (or agreement by the parties) shall not apply retroactively (or before the date agreed by the parties). The effect of this is to settle the past disputes with no money changing hands, and to resolve the disputes for the future.

Subsection (c) clarifies that this section would not preclude the involved parties from agreeing on different cost allocation

methodologies in the future. Subsection (d) makes the ICC determinations pursuant to subsection (a) final and non-reviewable.

Senate Amendment

The Senate Amendment provided for separate procedures to resolve the commuter and freight cost disputes on the Northeast The procedures were similar to Corridor. those in the House Bill. However, the procedure for resolving the commuter cost dispute was not limited to the Northeast Corri-

Conference Substitute

The substitute adopts the House provision.

Section 1164-Delaware & Hudson Railroad House Bill

The House bill has two provisions affecting the D&H by requiring it to pay its debt to the federal government and by requiring that its trackage rights not be transferred.

Senate Amendment

The Senate bill allowed the Secretary to expand the present trackage rights of the D&H.

Conference Substitute

This conference substitute provides an expedited review and decision process for the application to acquire the D&H Railroad. The expedited procedures are necessary given the present cash position of the carrier. A prospective purchaser, on the other hand, cannot make investments in the D&H when it has no assurance it will be able to acquire and control the property. This amendment will insure that the transaction can occur within 180 days

A similar provision is included in the conference substitute for the Boston & Maine

It would also permit the same treatment of existing D&H debt as will be accorded the Conrail debt in the pending bill only if there is an agreement to purchase.

The Secretary would be empowered to recapitalize the debt structure and make the new securities junior to the securities issued by a prospective purchaser.

Such an amendment would insure that sufficient working capital would be available under the new ownership.

Section 1165—Intercity passenger service employees House Bill

The House bill has no provision.

Senate Amendment

The Senate amendment requires Amtrak to establish new positions not fewer in number than the equivalent number of fulltime Conrail positions devoted to N.E. Corridor intercity passenger operations. Any employee transferred to Amtrak is separated from employment with Conrail.

Conference Substitute

The conference substitute requires that Conrail's intercity passenger employees will be transferred by January 1, 1983. Amtrak, Amtrak Commuter and the Corporation will negotiate for the right of freight and passenger employees to move from any of these services to another once every six months. The work force of each of these services will not be increased by the ability of an employee to move from one service to another. An employee with less seniority will be furloughed when an employee with more seniority moves back into that particular work

Section 1166-Trackage rights

House Bill

No comparable provision.

Senate Amendment

The Senate bill allows trackage rights in Philadelphia to be expanded.

Conference Substitute

The Conference substitute modifies substantially the Senate provision. The Conferees expect the Corporation to negotiate with the Philadelphia Belt Line Railroad for trackage rights. The Interstate Commerce Commission shall report to Congress within eight months on the progress of such negotiations.

Although the conferees are concerned that Conrail not lose its own traffic to other carriers to its competitive disadvantage, the Conferees fully expect Conrail to agree to trackage rights for reasonable compensation for traffic that would otherwise not move through the Philadelphia Port. For example, certain traffic which is located on the D&H and does not presently move through Philadelphia would do so if trackage rights were granted to the Philadelphia Belt Line.

Section 1167-Technical amendments

House Bill

No provision.

Senate Amendment

The Senate bill effects certain technical amendments. Subsection (a) amends section 303 of the 3-R Act to eliminate Conrail securities as a payment medium in the valuation proceedings before the Special Court. This amendment is necessitated by section 416-6 which provides that the Secretary shall receive, and may vote, such securities. Any remaining obligation of the United States under the 3-R Act will be satisfied in cash, as has been the case with the initial settlements in the valuation proceedings.

Subsection (b) provides that securities conveyed to the Secretary under section 416-6 shall be deemed to be without value,

unless the Special Court determines otherwise. The intent of this subsection is to ensure that no transferor under the Regional Rail Reorganization Act of 1973 receives more than the constitutional minimum value of the properties conveyed.

The bill also requires the Clerk of the Special Court to convey to the Secretary within ten days after the effective date of the legislation, the common stock and series B preferred stock of Conrail which are on deposit with the clerk. These securities were originally intended to serve as partial compensation for the properties conveyed under the 3-R Act to Conrail. However, as a result of Conrail's poor financial performance those securities are without value. The rights of the transferor railroads with respect to compensation for the assets which they conveyed to Conrail are adequately secured by certificates of value. Any claim against the United States resulting from the conveyance of Conrail securities to the Secretary under this section would be litigated in the Special Court in accordance with section 601 of the bill.

Subsection (b) authorizes the Secretary to exercise voting rights with respect to the securities obtained under subsection (a) or by other means, such as settling the claims of transferors arising from the transfer of rail properties to Conrail in 1976.

Conference Substitute

House recedes.

Section 1168—Applicability of other laws
House Bill

No comparable provisions.

Senate Amendment

The Senate amendment exempts actions taken under the authority of the bill from the application of several laws which were not designed with the subject matter of the bill in mind, or the literal application of which would necessitate extensive delays in the transfer process. For instance, exception from the Administrative Procedure Act ensures prompt action, as well as confidentiality of initial discussions over terms of sale, and avoids legal pitfalls associated with alleged procedural defects.

An exception to section 102(2)(C) of the National Environmental Policy Act of 1969 (NEPA) is also necessary. It is the objective of the bill to provide for the continuation of rail service in the northeast and the prevention of significant diversion of traffic to the highways which may have a direct adverse impact on the human environment in the region. On the other hand, formal compliance with requirements for impact statements and judicial review could lengthen the transfer process and could result in serious deterioration of traffic levels as funding is exhausted and service levels deteriorate. Thus, in this case it appears that observance of the NEPA procedures would promote a result inconsistent with its purposes. Exemptions from the National Historic Preservation Act of 1966 and Section 4(f) of the Department of Transportation Act of 1966 are included for the same reasons-to avoid lengthy delays in the transfer process.

Conference Substitute

The conference substitute adopts the Senate Amendment but deletes exemption from the Freedom of Information Act.

Section 1169—Effective date House Bill

The House bill provides the effective date of this Act is October 1, 1981.

Senate Amendment

The Senate bill provides that the effective date of this Act is the date of enactment.

Conference Substitute

House recedes.

Alaska Railroad revolving fund House Bill

The House bill provides that no funding shall be authorized for the Alaska Railroad Revolving Fund for fiscal years 1982, 1983, and 1984.

Senate Amendment

No similar provision.

Conference Substitute

The House recedes.

Insurance coverage

House Bill

This section affirms Congress' intent that any railroad in reorganization or a successor corporation which has acknowledged certain insurance payments as obligations of the railroad or which was under order of its reorganization court to continue these insurance programs shall be deemed to have conclusively acknowledged that the cost of such continued coverage constitute valid preconveyance administrative obligations of such railroad in reorganization.

Senate Amendment

No similar provision.

Conference Substitute

House recedes.

Loan guarantees House Bill

The House bill amends Section 511 of the 4R Act by adding a new subsection (o). This new subsection requires the Secretary to guarantee obligations of Conrail's commuter subsidiary and commuter service prior to initial reimbursement by the commuter agencies and to cover any subsequent cash flow problems arising from delayed reimbursements from commuter agencies. The aggregate unpaid principal amount of obligations guaranteed under this subsection cannot exceed \$50 million.

The Committee notes it has not adopted the Administration proposal to provide low interest loans for potential purchasers of Conrail frieght lines. However, these loan funds are vitally important to other parts of the country. For example, the Committee recognizes that restructuring the rail freight network in the St. Louis Rail Gateway is a high priority, necessary to increase terminal capacity and to meet the growing traffic demand.

The St. Louis Gateway is the nation's second largest, with some 60 rail yards and with more than two million rail cars passing through each year. The number of rail cars passing through is expected to double by the year 2000. The Committee supports the restructuring project aimed at reducing chronic rail freight traffic bottlenecks and improving the capacity of this national rail freight hub to handle the steadily growing volume. Federal funding assistance for this project is crucial, and the Committee directs the Federal Railroad Administration to give high priority consideration in order to assure that the project can proceed.

Senate Amendment

No comparable provision.

Conference Substitute

The conference substitute does not modify section 511 of the 4R Act.

SUBTITLE F-AMTRAK

Section 1170-Short title

House Bill

The House bill provided that this Act may be cited as the "Amtrak Improvement Act of 1981".

Senate Amendment

The Senate amendment provided that this legislation may be cited as the "Amtrak Improvement Act of 1981".

Conference Substitute

The Conference substitute provides that this subtitle may be cited as the "Amtrak Improvement Act of 1981".

Section 1171-Findings

House Bill

The House bill added new findings to the Rail Passenger Service Act to reflect the establishment of Amtrak Commuter.

Senate Amendment

The Senate amendment abbreviated the findings under section 101 of the Rail Passenger Service Act to highlight the basis for this legislation, which envisioned a significant reduction in Federal funding for Amtrak. Under subsection (a), Congress finds the need for a cost-efficient and energy-efficient intercity rail passenger service, which can help to alleviate the overcrowding of airways and highways and can add to the alternatives for convenient transportation, to the extent that funds are available to do so. References made under current law to the essentiality of a national rail passenger system as a significant asset in time of national emergency or energy shortage and to the need for Federal financial assistance for such purposes were delet-

Congress further finds under subsection (b) the need for cooperation among all interested parties, including Amtrak, the operating railroads, labor, and the state and local authorities so as to secure a rail passenger system justifying continued funding. Certain other findings under current law relating to inadequately defined goals, problems with state-subsidized service, and difficulties with the operating railroads were deleted.

Conference Substitute

The Conference substitute essentially combines the provisions from both the House bill and the Senate amendment.

Section 1172—Additional goals for Amtrak House Bill

The House bill established the following additional goals for the Corporation:

(1) Improvement in the number of passenger miles generated systemwide per dollar of federal investment;

(2) reduction in the cost of long-distance service:

(3) elimination of the deficit in the food and beverage operation;

(4) improvements in productivity and effi-

(5) improvement in the "on-time" performance of all trains operated by the Corporation;

(6) development of service on rail corridors:

(7) increases in the nationwide average speed of trains operated by the Corporation;

(8) improvement of the ratio of revenues to operating expenses; and

(9) certain other goals for Amtrak to reflect the establishment of Amtrak Commuter.

Senate Amendment

The Senate amendment expanded the goals set forth in section 102 of the Rail Passenger Service Act to reflect the need for Amtrak to take such actions as are necessary to improve performance and decrease Federal spending. Specifically, Amtrak would be encouraged to maintain a fare policy on each route which would minimize Federal subsidy; to reduce management costs and increase labor productivity; to reduce losses on food service and increase revenues on mail service; and to ensure that trains arrive within 15 minutes of their scheduled times and that they adhere to a systemwide average speed of at least 55 miles per hour. With respect to Amtrak's attainment of a certain revenue-to-cost ratio, this legislation would make the ratio under current law more stringent and include it as mandate under section 15 of this Act rather than as a goal under this section.

This section also emphasized the need for State, regional and local governments and the private sector to share in the costs of rail passenger service, including the operation of stations. The goal was to reduce Federal expenditures for Amtrak.

Conference Substitute

The Conference substitute adopts the following goals from both the House bill and the Senate amendment:

- (1) exercise of Amtrak's best business judgment in minimizing Federal subsidies;
- (2) encouragement of non-Federal funding of rail passenger service;
- (3) improvement in the number of passenger miles generated by Amtrak's system per dollar of Federal funding;
- (4) elimination of the deficit in Amtrak's food and beverage operation;
- (5) improvements in Amtrak's productivity and efficiency;
- (6) improvement in Amtrak's on-time performance;
- (7) development of rail passenger corridors;
- (8) increase in the nationwide average speed of Amtrak trains;
- (9) improved coordination of intercity and commuter rail services on the Northeast Corridor; and
- (10) maximization of Amtrak's resources and increase in revenues and decrease in Federal subsidies.

Section 1173—Definitions House Bill

The House bill added several definitions to the Rail Passenger Service Act relating to the establishment of the Amtrak Commuter Services Corporation.

Senate Amendment

The Senate amendment amended the definition of basic system in section 103 of the Rail Passenger Service Act to include those changes made in the system pursuant to this legislation. The amendment added two definitions which are important to the labor protection provisions under section 14 of this bill: the term "deprived of employment" was defined as a condition which results when service is discontinued and an Amtrak employee is unable to obtain reemployment; and the term "year of completed service" was defined as a 12-month period during which compensation is credited.

Conference Substitute

The Senate recedes to the House with clarifying amendments.

Section 1174—Changes in Board of Directors

House Bill

The House bill amended 45 U.S.C. 543(a) by removing the authority for the existing board and providing for the appointment of the new board. This section provided that the new board shall have eleven members.

This section also provided that the Secretary of Transportation and the President of the Corporation shall serve as ex officio members of the board.

Under this section, the President would appoint a total of seven members of the board with the advice and consent of the Senate; one to be selected from a list submitted by each of the following groups:

(a) the American Federation of Labor and Congress of Industrial Organizations or its successor:

- (b) the National Governors' Association;
- (c) the business community;
- (d) the National Association of Railroad Passengers or its successor;
- (e) organizations representing users of commuter services operated by the Corporation:
- (f) organizations representing the elderly; and

(g) the Association of American Railroads. This section also provided that two individuals representing commuter agencies shall be members of the board. Prior to the initiation of service by Amtrak Commuter, the two commuter representatives on the board shall be chosen by commuter agencies whose service is operated by either the Consolidated Rail Corporation or Conrail Commuter Corporation. Once the Amtrak Comhas begun providing service, two members of the board shall be chosen by those commuter agencies for which Amtrak Commuter provides service or those commuter agencies which operate service over properties owned by the Corporation or Amtrak Commuter.

This section provided that presidential appointments to the board shall serve terms of four years and that not more than four of the presidential appointees shall be from the same political party. Representatives of the commuter agencies who serve on the board shall serve terms of two years.

This section provided that six members of the board constitute a quorum and that no one other than a member of the board serving pursuant to the authority of this act shall be permitted to vote at meetings of the

This section also provided that the terms of office of the current members of the board shall terminate upon enactment of this act and that such members shall continue to serve for not more than 90 days during which time the President shall appoint new members to the board. If, for whatever reasons, a vacancy occurs on the board as a result of the failure of the President to make his appointments to the board within the time provided, the President of Amtrak shall fill such vacancy with whomever he chooses, provided that any individual appointed by the President of Amtrak shall serve only as long as it takes for the President to make his appointments.

Under this section, the President of the Corporation shall serve as the chairman of the board.

Senate Amendment

The Senate provision amended section 303(a)(4) of the Rail Passenger Service Act to mandate that the President, in appointing eight members to the Amtrak Board of

Directors, would choose out of the eight at least one member to be a States' representative, in view of the increased importance of the state and local role in the provision of rail passenger service anticipated by the legislation, and one to serve as a commuter representative.

Conference Substitute

This section represents a compromise of the two provisions by establishing that the Amtrak Board of Directors shall consist of nine members as follows:

(1) the Secretary of Transportation, ex officio, who may be represented by any one of three statutorily designated individuals:

(2) the President of Amtrak, who is to serve as Chairman of the Board;

(3) five members appointed by the President—one from a list representing rail labor; one of the governors of the states interested in rail transportation or his representative; one from the business community, who has an interest in rail transportation; and two members selected from lists submitted by the commuter authorities, depending upon the entities operating the commuter service; and

(4) two representatives of the preferred stockholder, which under the Conference substitute is the Federal Government.

The Presidential appointees shall serve four-year terms, and not more than two of such members chosen from rail labor, the governors, and the business community, can be from the same political party. The commuter representative shall serve for two years.

This provision also includes certain other requirements relating to member selection. Specifically, the terms of the present Board are to expire October 1, 1981, the effective date of this legislation. However, the current members are to continue serving until the Presidential appointees are selected. If such appointments do not occur within 90 days, the President of Amtrak may fill any vacancy with whomever he chooses until appointments are made.

Section 1175—Financing of the Corporation
House Bill

The House bill contained no similar provision.

Senate Amendment

The Senate amendment made significant changes in the financial structure of Amtrak. It amended section 304 of the Rail Passenger Service Act to provide for the issuance of preferred stock by Amtrak to the Federal Government in order to better protect the Government's interest and investment in Amtrak in the event of liquidation. Specifically, new subsection (c) would require such issuance to the Secretary of Transportation as a prerequisite to obtaining further Federal funds. Certain preferred stock would have to be issued by February 1, 1982, and be equal to past capital grants made to Amtrak through fiscal 1981.

With respect to future operating and capital grants, Amtrak would be mandated to issue such stock within 30 days of the close of each fiscal quarter. There would be no restrictions on the amount of stock held by the Federal Government nor on its redemption rights.

As under current law, the preferred stock would have liquidation preference over common stock. This section would further provide under new subsection (d) that while Amtrak would still be able to issue various non-voting certificates of indebtedness, no such obligation could have a liquidation

preference higher than the Federal Government's outstanding preferred stock nor could it be secured by a lien on Amtrak property without the permission of the Secretary of Transportation.

Under subsection (e), Amtrak stockholders would continue to have inspection rights without respect to the amount of stock held. Also, preferred stock would not be subject to any issuance fees or taxes unless Congress otherwise specifies.

Conference Substitute

The House recedes to the Senate provision.

Section 1176—Charges for Customs and Immigration Service

House Bill

The House bill amended 45 U.S.C. 545 to exempt the Corporation from the payment of fees to the federal customs and immigrations services for "on-board" inspection of rail passengers crossing international boundaries.

Senate Amendment

The Senate amendment contained no similar provision.

Conference Substitute

The Senate recedes to the House provision.

Section 1177—Food and beverage service House Bill

The House bill amended 45 U.S.C. 545 and 45 U.S.C. 565(e) to direct the Corporation to eliminate the deficit in its food and beverage services by September 30, 1982. Beginning October 1, 1982 this section provided that the Corporation shall not operate "onboard" food and beverage service unless revenues cover costs. Amtrak would be allowed to contract out for food and beverage services in order to reduce the associated costs.

Senate Amendment

The Senate amendment listed as a goal the reduction of losses associated with food and beverage service.

Conference Substitute

In addition to the general Senate goal, the Conference substitute adopts the House provision with an amendment providing for computation of losses on an annual rather than a quarterly basis. With respect to the provision allowing contracting out for food and beverage services, it is the intent of the conferees that Amtrak report to Congress as to other areas of its operation where savings could be realized through contracting out.

Section 1178-Applicability

House Bill

The House bill amended 45 U.S.C. 546 by exempting the Corporation from the payment of state and local taxes to the same extent as the Government of the United States is exempt from the payment of taxes. This provision is estimated to save Amtrak \$14.5 million in fiscal year 1982.

Senate Amendment

The Senate amendment exempted Amtrak from future payment of certain state and local sales and property taxes, which it has been paying. Specifically, Amtrak would not be required to pay any further taxes based on the acquisition and improvement of personal property, such as equipment, or on the improvement of real property, made in connection with the provision of rail passenger service. It is expected that this exemption would provide a reduction of \$6.5 million in Amtrak's costs during fiscal year 1982.

This section also exempted Amtrak from state and local full crew laws, which require that a specified minimum crew be employed on passenger trains operated in various states. Such an exemption would allow Amtrak to reduce surplus personnel which now cost Amtrak approximately one-half of a million dollars annually.

Conference Substitute

The House recedes to the Senate with respect to the state and local tax exemption. The Senate recedes to the House with respect to the state and local full crew law exemption.

Section 1179-Sanctions

House Bill

The House bill amended section 404 of the Rail Passenger Service Act to provide that any change in the basic system made by Amtrak shall not be reviewable in any court.

Senate Amendment

The Senate amendment amended section 307 of the Rail Passenger Service Act to enable Amtrak to make changes in its service subject only to court review upon petition of the United States Attorney General. In the past, Amtrak has been hampered in its efforts to discontinue routes by a multitude of court actions for injunctive relief.

Conference Substitute

The House recedes to the Senate provision.

Section 1180—Elimination of unnecessary reports

House Bill

The House bill amended section 308 of the Rail Passenger Service Act to relieve Amtrak of its obligations to provide Congress with monthly reports on revenues and expenses attributable to each operating railroad over which Amtrak service is provided. It also would eliminate the requirement that the Interstate Commerce Commission report annually to Congress on Amtrak. Neither of these reporting requirements is necessary.

Senate Amendment

The Senate amendment was identical to the House provision.

Conference Substitute

The Conference substitute adopts the House provision.

Section 1181—Facility and service agreements

House Bill

The House bill contained no similar provision.

Senate Amendment

The Senate amendment repealed section 401(c) of the Rail Passenger Service Act which provides that, except for auto-ferry service, no railroad or any other person may provide intercity rail passenger service over a route over which Amtrak is operating, unless given consent by Amtrak. This amendment should be considered together with section 17 of the legislation, which encourages private entities to undertake rail passenger service.

Under section 402(g) of the Rail Passenger Service Act, Amtrak was required by January 1, 1981, to enter into an industrywide contract with other rail carriers for the operation of special and charter trains. This section would eliminate such requirement, which has not been met. Separate contracts with individual railroads still could be entered into with respect to such special service.

Conference Substitute

The Senate recedes to the House with an amendment to section 402(a) of the Rail Passenger Service Act specifying that any contracts negotiated between Amtrak and the railroads under that section shall include a penalty for untimely performance.

It is also the intent of the conferees that a rall carrier which commences intercity passenger or auto-ferry service after the date of enactment of the Amtrak Improvement Act of 1981 is authorized to establish, discontinue or change such routes and service as well as passenger fares and freight rates as it deems necessary.

It is the further intent of the conferees that if any rail carrier operating such passenger or auto ferry service, discontinues such service no other rail carrier shall be required to continue to provide such service.

Section 1182—State-supported services

House Bill

The House bill amended 45 U.S.C. 563(b) to eliminate the deadline for a state to submit an application for the initiation of 403(b) service.

Under this section, a state would pay 60 percent of the short-term avoidable loss of 403(b) service in the first year of operation and 80 percent of the short-term avoidable loss in each year of operation thereafter.

This section eliminated the technical assistance panels and provides instead that the Corporation shall conduct a preliminary evaluation of the market potential of service a state proposes to operate under subsection 403(b). This section further provides that proposed service shall not be eligible for operation under subsection 403(b) unless it is reasonably expected that revenues from such service will cover 30 percent of the costs, with the state's contribution not included.

Under this section, the Corporation could agree to provide 403(b) service on a route that is not expected to achieve this minimum level of performance if the state agrees in advance to pay the annual loss. If the Corporation and a state enter into such an agreement and the service actually does achieve the minimum level of performance, this section provides that the Corporation shall reimburse the state for the difference between the annual loss of such service and the appropriate percentage of short-term avoidable loss the state would have otherwise paid.

This section provides that the Corporation may agree to provide service under subsection 403(b) if:

 (a) such service is projected to achieve the minimum level of performance specified above; and

(b) sufficient resources are available to the Corporation.

Under this section, an agreement to provide 403(b) service could be renewed for one or more additional terms of not more than two years, provided that an agreement shall not be renewed for a train that fails to meet the minimum level of performance unless the state agrees to pay the annual loss.

This section further provided that the Corporation shall consult with a state at least 90 days before a fare increase affecting 403(b) service is scheduled to take effect. If any state objects to the fare increase within 30 days from the date of such service will cover 30 percent of the costs, with the state's contribution not included.

Under this section, the Corporation could agree to provide 403(b) service on a route that is not expected to achieve this mini-

mum level of performance if the state agrees in advance to pay the annual loss. If the Corporation and a state enter into such an agreement and the service actually does achieve the minimum level of performance, this section provided that the Corporation shall reimburse the state for the difference between the annual loss of such service and the appropriate percentage of short-term avoidable loss the state would have otherwise paid.

This section provided that the Corporation may agree to provide service under sub-

section 403(b) if:

(a) such service is projected to achieve the minimum level of performance specified above; and

(b) sufficient resources are available to

the Corporation.

Under this section, an agreement to provide 403(b) service could be renewed for one or more additional terms of not more than two years, provided that an agreement shall not be renewed for a train that fails to meet the minimum level of performance unless the state agrees to pay the annual loss.

This section further provided that the Corporation shall consult with a state at least 90 days before a fare increase affecting 403(b) service is scheduled to take effect. If any state objects to the fare increase within 30 days from the date of notification, this section provided for a delay in the implementation of the fare increase for an additional 30 days to give the state an opportunity to recommend ways to reduce costs in order to reduce or to eliminate the need for the fare increase. At the end of the extended period, the Corporation shall make the decision as to whether the fare increase should take effect in whole or in part, taking into consideration the state's recommendation.

Under this section, the states would be given an opportunity to consult with the Corporation in the development of a definition of short-term avoidable loss and associ-

ated capital costs.

This section also provided that the Corporation shall expend at least one but not more than 5 percent of the revenues generated by 403(b) service in the advertisement locally of such service.

This section further stated that the provision for state payments contained in this section shall apply to existing 403(b) service at the time agreements for such service are renewed.

Senate Amendment

The Senate amendment amended section 403 of the Rail Passenger Service Act.

Section 403 of the Rail Passenger Service Act provides that Amtrak shall operate additional service if a State, local, or regional government agrees to share in the associated costs. Specifically, such non-Federal entity must agree to cover 20 percent of the solely related costs (interpreted to mean avoidable losses) in the first year of operation, 35 percent in the second year, and 50 percent each year thereafter. The state or locality also must agree to cover 50 percent of the capital costs.

This section made no changes with respect to existing contracts entered into pursuant to this cost-sharing arrangement prior to the date of enactment of this legislation. However, this legislation would add a new section 403a to cover future such agree-

ments.

Section 403a is different from the current program in several respects. First, a private party would be able to fund rail passenger service in addition to the states and local-

ities. Also, such cost-sharing agreements could be entered into for retention of existing service as well as for new service in order to ensure the opportunity for continuing service which Amtrak might otherwise have to discontinue. In addition, Amtrak would not have to enter into these agreements and could require that the non-federal funding source cover more than the percentages of operating loss heretofore mentioned. Finally, this section would eliminate the period for filling applications with Amtrak, the technical assistance panels now convened to review applications, and the requirement that Amtrak notify a state of a fare increase on one of its subsidized routes. It is expected that these changes in the

It is expected that these changes in the current program would encourage expanded non-federal funding of rail passenger service. At the same time, this section would ensure that Amtrak share in the costs of operating such service only to the extent that

its funding level allows.

This section also amended section 403 relating to commuter rail service which Amtrak is required to operate. Effective October 1, 1981, provisions under subsection (d) mandating that Amtrak operate certain commuter rail service at reduced fares would be repealed since the current law does not require operation after such date.

With respect to any future commuter services operated by Amtrak, new section 403a(c) provided that Amtrak only would operate such service if it is reimbursed for 100 percent of the associated avoidable losses and such other amounts as the Amtrak Board of Directors determines would contribute to the costs of providing intercity rail passenger service. This amendment would help to minimize Amtrak's losses, given the funding level provided in this legislation.

Conference Substitute

The Conference substitute adopts certain Senate provisions, and amendments reflecting the House provisions. A non-Federal entity could offer to fund rail passenger service. Amtrak would have the discretion to decide whether or not to operate such service. Such entity would have to agree to pay 45% of the short-term avoidable losses in the first year of operation and 65% in the second year and thereafter, and also 50% of the associated capital costs. Amtrak's Board of Directors would establish the basis for determining short-term avoidable loss and capital costs. The Board must consult with the states and provide them with such basis for determination.

The provision as adopted by the conferees ensures that those 403(b) agreements entered into prior to October 1, 1981, the effective date of the legislation, shall not be subject to the increased percentage shares included in the Conference substitute for fiscal years 1982 and 1983. Renewals of such agreements are to be funded at 35% and 50% of the solely related costs as provided in the current law for the second and third

years of operation.

The conferees believe that states participating in the 403(b) program should have greater impact on fare decisions than they do under the current law. As a result, the Conference substitute requires Amtrak to notify a state at least 90 days in advance of the date that a proposed fare increase which is applicable to 403(b) service and which represents an increase of more than 5 percent over a 6-month period is scheduled to take effect. The substitute also requires Amtrak to provide such officials with an explanation of the circumstances warranting the proposed fare increase.

Within 30 days of such consultation, the affected state may submit proposals to Amtrak for reducing costs and increasing revenues of 403(b) service. After the 30-day period and after having considered those proposals submitted by the state, Amtrak shall decide whether to implement the proposed fare increase in whole or in part. conferees expect that a state would object to a fare increase only if it had a proposal that could reasonably be expected to reduce the costs of operating service and therefore reduce or eliminate the need for a fare increase. The conferees would also expect that a state notifying Amtrak of its objection to a fare increase would begin discussion with Amtrak immediately regarding its proposal for reducing costs.

The conferees also intend that Amtrak thoroughly analyze and evaluate a state's proposal and that, only after such consideration, shall Amtrak make a decision as to whether the proposed fare increase should be implemented in whole or in part.

An important exception to the above provisions must be noted. In those cases where either Amtrak's authorization or appropriation for the fiscal year is not enacted at least 90 days prior to the beginning of such fiscal year. Amtrak may increase fares during the 30 days following enactment of such appropriation or recession. However, the conferees intend that in such instances Amtrak must notify the affected state of the fare increase as soon as possible. This exception addresses the conferees' concern that Amtrak not operate service for an additional 90 days in those instances where Amtrak's funding is not finalized 90 days prior to the beginning of the fiscal year.

This section also provides that at least 2% but not more than 5% of all revenues generated on a particular route funded under this section is to be dedicated to local advertising

of such service.

The Senate recedes to the House provision with respect to commuter service, which is dealt with in section 1183 of the conference substitute.

The conferees intend that this provision represent a gradual transition towards a greater non-federal share in the funding of rail passenger service under section 403(b) of the Rail Passenger Service Act as amended.

Section 1183—Operation within available resources

House Bill

The House bill amended 45 U.S.C. 564(c)(3) to give the Corporation the authority to amend the route and service criteria by submitting such an amendment to the Congress. If within 120 days, neither the House nor the Senate has disapproved it, it shall become part of the route and service criteria.

This section also amended 45 U.S.C. 564(c)(4). The Corporation is directed to conduct an annual review of each route in the basic system to determine whether such route meets the criteria for short-distance or long-distance trains, whichever is applicable. The Corporation is directed to terminate any route which does not meet the criteria.

Based on an evaluation to be performed at the beginning of each fiscal year, this section directed the Corporation to take necessary actions to reduce its costs in order to operate within the level of funds authorized.

Such actions shall be designed to improve the operational efficiency and cost-effectiveness of service and to preserve the maximum of service feasible.

If, however, the Corporation determines these improvements will not yield the required level of savings, the Corporation would be directed to reduce or discontinue routes in order of their performance under the criteria.

This section also directed the Corporation to give notice to states and localities affected by a route discontinuance.

For purposes of achieving savings necessary to operate within the level of authorized funds, this section amended 45 U.S.C. 564(c)(5) to exempt the Corporation from the route and service criteria. This section repealed 45 U.S.C. 564(e), the authority for the operation of the "regional balance" trains. Under this section, changes in the basic system which are made by the Corporation shall not be reviewable in any court.

Finally, this section amended 45 U.S.C. 563(d) to provide that the Corporation shall continue operating funding service in the same manner it currently operates and funds service under the authority of 45 U.S.C. 563(d) as long as that service meets the ridership criteria for short-distance trains.

Senate Amendment

The Senate amendment amended section 404 of the Rail Passenger Service Act which set forth certain criteria to be followed by Amtrak in determining whether or not to discontinue service. Under existing subsection (d), Amtrak could not discontinue a long-distance train if it meets the criteria of 150 passenger miles per train mile and a 7e avoidable loss per passenger mile. Similarly, a short-distance train cannot be eliminated if it meets a criteria of 80 passenger miles per train mile and a 9¢ avoidable loss per passenger mile. Furthermore, Amtrak is mandated under existing subsection (c) to conduct an annual review of all long-distance trains and is required under subsections (e) through (g) to operate certain regional balance trains and short-haul demonstration trains. Finally, subsection (b) requires that Amtrak make certain other discontinuances subject to its corporate route and service criteria.

This section would eliminate those requirements in order to facilitate the adjustments in Amtrak's system necessitated by this legislation. Amtrak would be able to discontinue any service, without regard to any statutory criteria or to its corporate route and service criteria, as it deemed appropriate in order to comply with the funding levels of this legislation.

The Senate amendment also added an important new section 407 to Title IV of the Rail Passenger Service Act. Subsection 407 (a) would require Amtrak to operate within the limits of available resources, including Federal grants, state and local assistance, and revenues. Furthermore, beginning in fiscal 1982, Amtrak's revenues, including non-Federal funding, would have to cover at least 50 percent of its total operating costs, excluding capital costs. Also, under subsection (c) of Amtrak would be required to reduce its management costs by 10 percent before October, 1983.

Amtrak would be authorized under subsection (b) to discontinue routes, trains and services, or reduce frequency of service, as necessary to comply with the funding levels of this legislation. Amtrak would be required to provide notice upon date of enactment of its intention to discontinue service as appropriate to give states and other parties an opportunity to agree to share in the costs of such operations.

Conference Substitute

The Conference substitute is intended to ensure that Amtrak provides cost-effective and efficient service and to ensure that Amtrak has the ability to improve its overall performance.

In this regard, this section requires that, commencing in fiscal 1982, Amtrak recover 50% of its costs, excluding capital costs, from its revenues, including non-Federal contributions. In addition, Amtrak is required to reduce costs associated with its management.

The Conference substitute further provides that Amtrak shall conduct an annual review of the trains which it operates in its basic system and shall discontinue, modify or adjust service which does not meet the performance criteria. The criteria are an objective measure of a train's performance and should, therefore, guide Amtrak in making decisions regarding service reduction or adjustments.

For short-distance trains, the statutory criteria provide that the avoidable loss per passenger mile, as calculated by Amtrak and projected for the next fiscal year, not exceed nine cents, and that the passenger miles per train mile not be less than 80. Adjusted to reflected constant 1979 dollars, as both the Conference substitute and the present law require, the criteria in fiscal year 1982 limit the avoidable loss per passenger mile of short-distance trains to 12.9 cents.

The criteria provide that the avoidable loss per passenger mile of long-distance trains, as calculated by Amtrak and projected for the next fiscal year, shall not exceed seven cents, and that the passenger miles per train mile not be less than 150. Adjusted for constant 1979 dollars, this criteria stipulates that the avoidable loss per passenger mile of long-distance trains shall not exceed 10.1 cents during fiscal year 1982.

For purposes of modifying or adjusting routes which do not meet the criteria as determined by the annual review, this section exempts Amtrak from the provision in current law requiring that all reductions or additions of service be made in accordance with the route and service criteria. The conferees believe that adherence to the procedure for eliminating service under the route and service criteria, including requirements for local hearings, could delay Amtrak's ability to make important service modifications or adjustments.

It is the intent of the conferees that Amtrak should make every effort to adjust or modify service so that routes will meet the criteria. The conferees also intend to ensure that Amtrak pursue all available alternatives with respect to all the routes in the system, including the Cardinal, the Inter-American, and the Pioneer, in order that the maximum level of service be maintained.

In addition, at the beginning of each fiscal year, the Conference substitute requires Amtrak to assess its financial needs for operating all of the service provided at the time. If Amtrak projects that it cannot operate its system within its available resources, then Amtrak is directed under this provision to take such actions as may be necessary to reduce costs and improve performance. Such actions may include the following: changing the frequency of service; increasing fares; reducing the cost of sleeper car and dining car services on certain routes; increasing the passenger capacity of cars

used on certain routes; restructuring, adjusting, or discontinuing service over routes, considering short-term avoidable loss and the number of passengers served by such routes.

In order to accomplish the reductions or discontinuances of service which Amtrak determines are necessary in order to operate with the funds available, the conference substitute exempts Amtrak from the requirements of the route and service criteria.

The conference substitute also creates a procedure by which Amtrak may amend the route and service criteria. The conferees believe that Amtrak's management needs flexibility to make adjustments in its system in order to create efficient and cost-effective service.

With respect to discontinuances, this section provides that Amtrak shall give advance notification to states and localities of the discontinuance of service over any route.

In addition, this section provides for the continued operation of rail passenger service which is presently operated under the authority of section 403(d) of the Rail Passenger Service Act, as long as it meets the criteria in section 404(d)(2)(B) of the Act. Those trains which Amtrak operates under this section are among the better performers in the system and provide essential service which the conferees believe Amtrak should continue under the present funding and operating arrangements.

Finally, the conferees would encourage Amtrak to place importance on maintaining its long distance routes. Such routes are an integral part of the nation's transportation network and remain an important alternative which serves the transportation and energy needs of the country.

Section 1184—Extension of compensation for pass riders

House Bill

The House bill amended 45 U.S.C. 565 to provide that Amtrak continue to be reimbursed by other railroads for their employees who ride on Amtrak at a reduced rate. The reimbursement would be equal to at least 25 percent of the revenue that Amtrak would otherwise have received.

Senate Amendment

The Senate provision was identical to the House provision.

Conference Substitute

The Conference substitute adopts the House provision.

Section 1185—Authorization of appropriations House Bill

The House bill amended 45 U.S.C. 601(b) to authorize \$625 million for operating expenses for fiscal year 1982, of which \$24 million is for capital and operating expenses associated with provision of 403(b) service.

This section also stated that not more than 50 percent of the amount by which the Corporation subsidized the provision of food and beverage services in fiscal year 1981 shall be used to subsidize such service in fiscal year 1982. This section also reduced certain prior year authorizations for capital expenses and labor protection.

For fiscal year 1982, this section authorized \$842 million, of which:

(a) \$170 million is for capital expenses;

(b) \$26 million is for capital and operating expenses associated with provision of service under 403(b).

Senate Amendment

The Senate amendment authorized appropriations not to exceed \$735 million for each of the fiscal years 1982 and 1983 and not to exceed \$640,000,000 for fiscal year 1984. No specific amounts were set aside for operating, capital, non-federally subsidized service, or labor protection. Accordingly, section 601 was amended to remove the specific fiscal 1982 figures for capital, State-subsidized service, and labor protection.

Conference Substitute

The Conference substitute represents a compromise between the two bills by authorizing \$735 million for operating and capital expenses for fiscal year 1982, of which \$24 million is for capital and operating expenses associated with provision of 403(b) service. The Conference substitute also authorizes \$788 million for operating and capital expenses for fiscal year 1983, of which \$26 million is for capital and operating expenses associated with provision of 403(b) service.

The substitute also contains the House provision which states that not more than 50 percent of the amount by which the Corporation subsidized the provision of food and beverage services in fiscal year 1981 shall be used to subsidize such service in fiscal year 1982.

Section 1186-Loan guarantees

House Bill

The House bill amended 45 U.S.C. 602(d) to increase the level of loan authority available to the Corporation and to eliminate the requirement that the Corporation pay the Department of Transportation a fee for serving as the guarantor of its loan with the Federal Financing Bank.

This section also amended 45 U.S.C. 602 to provide for the Corporation to defer making interest payments on its debt to the Federal government for the period of this authorization. In addition, this section stated that deferral of interest payments by the Corporation shall not constitute default under any note or obligation of the Corporation, and that notes of the Corporation shall continue to be refinanced by the Secretary and the Federal Financing Bank as they mature in order to pay for previously ordered equipment.

Senate Amendment

The Senate amendment contained no similar provision.

Conference Substitute

The Senate recedes to the House provision with respect to the guarantee fee and the level of loan authority. The new loan authority will cover the final payment on the purchase by Amtrak of the Northeast Corridor.

The Conference substitute also adopts a provision similar to the House bill with respect to interest deferral. This provision allows Amtrak to defer its interest payments during fiscal years 1982 and 1983, amounting to \$82 million and \$100 million, respectively. However, such interest would remain as an obligation to the Federal Financing Bank, and it is intended that interest would accrue on this outstanding obligation.

This interest deferral is not to constitute a default with respect to any note or obligation, and the Secretary of Transportation is to continue to guarantee loans to Amtrak for fulfillment of existing obligations. The conferees understand that three of Amtrak's notes having a total value of \$750 million will mature in fiscal years 1982 and

1983 and direct the Secretary of Transportation and the Federal Financing Bank to refinance these notes in the usual manner.

This legislation would also require that the Department of Transportation, in consultation with Amtrak, the Treasury Department, and the General Accounting Office, submit to Congress by Feburary 1, 1982, legislative recommendations for relieving Amtrak of its debt obligation. The conferees believe that this continuing issue of Amtrak's loan repayment should finally be resolved by relieving Amtrak of its obligation to repay the principal and interest associated with its debt to the Federal Financing Bank.

The conferees emphasize that this interest deferral is not intended to set a precedent for future actions with respect to a debt owed the Federal Government. The conferees were concerned that Amtrak have sufficient funds to operate its system and thus approved this extraordinary measure of deferral.

Section 1187—Rail Corridor development and other studies

House Bill

The House bill required the Corporation to report to Congress by January 15, 1982 with recommendations and a plan for development of rail corridors.

Senate Amendment

The Senate amendment required Amtrak and representatives of labor and other railroads to submit to Congress within 6 months of the date of enactment of this legislation a joint report regarding efforts and recommendations to achieve efficiencies in both the Amtrak management and labor areas.

The Senate amendment also required Amtrak to report to Congress within 3 months of the date of enactment of this legislation on any actual or potential problems, with appropriate legislative recommendations, regarding the direct employment of operating employees for whose services Amtrak now contracts with the operating railroads.

Conference Substitute

The Conference substitute adopts the House provision, with some amendments, and the Senate amendments without modifications.

The conferees believe the cost-effectiveness and energy efficiency of rail passenger service is largely dependent on Amtrak's sublity to increase ridership. If Amtrak's systemwide average ridership were increased, the passenger miles generated per dollar of public investment as well as the energy efficiency of Amtrak's service would also increase. Estimates are that increased ridership could result in a tripling of the number of passenger miles per gallon of fuel that Amtrak provides.

The conferees believe, therefore, that Amtrak should develop services which have the greatest potential for increasing ridership. Rail corridors, providing frequent and fast train service over short to medium distances, from city center to city center, hold great potential for increasing Amtrak's ridership.

The Passenger Railroad Rebuilding Act of 1980 directed the Federal Railroad Administration and Amtrak to evaluate the market potential for rail corridor service between 25 different city pairs around the country and to perform detailed design and engineering studies to identify the improvements needed to implement rail corridor service.

The resulting report demonstrates that corridors could help rail passenger service achieve a number of different goals: cost-effectiveness; increased ridership; and energy efficiency. According to the study, six of the corridors could be developed and operated for a public expenditure of 15 cents or less per passenger mile: Los Angeles-San Diego, 9.06/passenger mile; Philadelphia-Atlantic City, \$.12/passenger mile; New York-Buffalo, \$.12/passenger mile; Chicago-Detroit, \$.13/passenger mile; Los Angeles-Las Vegas, \$.14/passenger mile and Chicago-Cincinnati, \$.15/passenger mile.

High ridership was also projected for a number of the corridors. By 1985, the Philadelphia-Atlantic City corridor is projected to carry four million passengers annually, and its passenger mile per train mile rating would be 304—higher than all but two trains Amtrak presently operates. The study also projected Los Angeles-San Diego to have a passenger mile per train rating of 180 and

New York-Buffalo, one of 123.

While a number of the corridors were projected to result in substantial energy savings, the Philadelphia-Atlantic City corridor is the only one that was projected to be more fuel efficient than bus service. According to the study, development of the Philadelphia-Atlantic City corridor would result in an energy efficiency rating of 229 passenger miles per gallon of gasoline or diesel fuel. Bus service would yield only 135 passenger miles per gallon of fuel. Other corridors that ranked high in energy efficiency were Chicago-Cincinnati, 117 passenger miles per gallon of fuel, and New York-Buffalo, 100 passenger miles per gallon of fuel.

The conferees note that the potential demand for rail service in certain corridors is high. The Chicago-Detroit corridor has one of the highest "on-line" populations. The State of Michigan has demonstrated strong support for rail service and the conferees believe that Amtrak should work with the state in the development of corri-

dor service on this route.

In addition, development of certain corridors has been shown to significantly increase the share of all intercity passengers who would travel by rail. Accordingly to information from the Department of Transportation, development of the New York-Buffalo corridor would increase rail services' share of the total intercity passenger market from 5.8 percent (projected for 1985 without corridor service) to 9.3 percent (projected for 1985 with corridor service)-a 3.5 percent increase. Furthermore, the conferees note that in some cases states have begun to work directly with Amtrak in building a dedicated rail ridership market and in developing rail corridor service. The State of Illinois is funding the creation of a station stop at Normal, Illinois which will make rail service on the Chicago-St. Louis corridor accessible to a total student population of more than 170,000.

In addition, the State of Illinois has funded an engineering study for the development of corridor service. The conferees believe Amtrak should work with the state in conducting this study and in evaluating the potential for rail corridor service along

this route.

The development of rail corridor service has the potential of improving Amtrak's overall efficiency. Therefore, the conferees believe that in fiscal year 1982 Amtrak should begin design and engineering studies on those corridors which will improve the cost-effectiveness, energy-efficiency and ridership of the service Amtrak provides.

The conferees believe Amtrak should develop design and engineering plans on at least the following corridors: Los Angeles-Las Vegas; Chicago-Detroit; Chicago-St. Louis; New York-Buffalo; the Texas Triangle; and Chicago-Cincinnati; and Philadelphia-Atlantic City.

In addition, the conferees believe Amtrak should undertake development of a prelimi-nary engineering study of the Los Angeles-San Diego Corridor to determine the feasibility of instituting higher frequency of service within the Corridor. In doing so, Amtrak shall work with the Orange County Transportation Commission in the development of the transportation study within the Los Angeles-San Diego corridor which is in progress on the date of enactment of the Act. Specifically, Amtrak should participate and cooperate by portion of the study or Draft Environmental Impact Statement dealing with increased frequency of service on the Corridor. Upon completion, the Draft Environmental Impact Statement should be transmitted to the Secretary of Transportation for certification.

The conferees believe that Amtrak should work with state and local governments and private interests in the development of rail corridor service. The conferees note with interest that there is strong private sector interest in two of the corridors, Philadelphia-Atlantic City and Las Vegas-Los Angeles. The conferees feel strongly that Amtrak should make every effort to enter into cooperative agreements with private interests, state and local governments or both for the development of these corridors. With particular respect to the Las Vegas-Los Angeles Corridor, the conferees also urge the Department of Transportation to work with Amtrak and the state and local officials in the study and development of high-speed rail passenger service in that area.

The conference substitute directs Amtrak to report to Congress not later than June 1, 1982 with its recommendations for the development of rail corridors. Amtrak is to include in its report an identification of the corridors it would develop, a timetable for their development, and a financial plan outlining how such development would be financed.

The conferees intend to examine Amtrak's report. It is expected that whatever efforts are made towards corridor development should complement and strengthen Amtrak's system.

Section 1188—Technical and conforming amendments

House Bill

The House bill made certain technical and conforming amendments.

Subsection (a) merely conformed the Corporation's mission to include the new functions provided in this Act related to commuter service.

Subsection (b) conformed the powers of

Subsection (b) conformed the powers of the Corporation to the new functions provided in this Act.

Subsection (c) merely indicated that preference is to be given to commuter trains as well as intercity passenger trains.

well as intercity passenger trains.
Subsection (d) made inapplicable to
Amtrak Commuter certain protective arrangements.

Subsection (e) repealed Section 702 of the Railroad Revitalization and Regulatory Reform Act of 1976. This section established the Operations Review Panel (ORP) to resolve disputes over operations on the Northeast Corridor. The ORP is no longer necessary because of the provisions for Northeast Corridor coordination included as

part of the new Title V of the Rail Passenger Service Act.

Senate Amendment

The Senate amendment made certain other technical and conforming amendments to the Rail Passenger Service Act.

Conference Substitute

The Conference substitute adopts certain technical and conforming amendments.

Section 1189-Effective date

House Bill

The House bill established October 1, 1981 as the effective date.

Senate Amendment

The Senate amendment provided that the provisions of the legislation were to take effect on the date of enactment, except as otherwise provided in the legislation.

Conference Substitute

The effective date of the Act shall be October 1, 1981 except as otherwise provided under this Act.

Employee protection House Bill

The House bill limited Amtrak's obligation to make certain labor protection payments to \$10 million in fiscal year 1982.

Senate Amendment

The Senate amendment made significant changes in the employee protection provisions contained in section 405 of the Rail Passenger Service Act in anticipation of the service discontinuances which would result from the legislation.

Specifically, new subsection (f) would require the Amtrak Board of Directors to elect for its employees one of two labor protection programs. This election would be made, within 60 days of the date of enactment of this Act, between the contractual agreements currently in effect and the labor protection provisions included in this section. Pursuant to new subsections (g) and (h)(1), if this latter program is chosen, Amtrak would be required to give appropriate notice, and the current labor protection contracts would no longer be in effect. This program would provide the exclusive protection.

This new labor protection program as outlined in subsection (h)(2) through (4) would provide that an Amtrak employee deprived of employment would receive from Amtrak a separation allowance based on the years of completed service with Amtrak and with a predecessor rail carrier. Employees with service between 6 and 15 years would be entitled to receive \$1,000 per year for each year of completed service over 5 years. Employees with service between 16 and 25 years would be entitled to receive \$10,000 plus \$2,000 for each year of completed service over 15 years. Employees with service of over 25 years would be entitled to receive \$10,000 plus \$2,000 for each year of completed half of such separation allowance no later than 30 days after the employee is separated from employment, with the remainder to be paid within 90 days. These payments would be considered taxable earnings for the purposes of the Railroad Unemployment Insurance Act.

The benefits provided under this section would also include moving expenses if the employee is required to make a change in residence within 3 years of the discontinuance in order to retain employment with Amtrak or to obtain employment with another rail carrier. The maximum moving expenses benefit would be \$5,000 and would

include the costs of moving the employee's family and the costs associated with the sale of a house or with an unexpired lease.

The employee also would be entitled to receive reasonable expenses for new career training if begun within 2 years of a service discontinuance. The maximum benefit for retraining would be \$5,000. Finally, the employee would be entitled to a continuation of medical insurance coverage for a period not to exceed 6 months from the date of separation unless covered in a new position by substantially equivalent group medical coverage. Any dispute over these benefits would be resolved through arbitration procedures agreed to by labor and Amtrak management.

A right of first hire with other rail carriers would be provided for any vacancy in a class or craft in which an employee was employed by Amtrak or a predecessor railroad, unless such vacancy is covered by a mandatory or permissive affirmative action plan. All the rights afforded by this labor protection provision are mandated to be coequal with those afforded by the Milwaukee Railroad Restructuring Act and the Rock Island Transition and Employee Assistance Act.

In addition to the labor protective provisions outlined above, section 14 of the bill makes two changes in existing law. First, it would repeal existing section 405(e) which prohibits Amtrak from contracting out for services if it would result in an employee lay-off. It is expected that the elimination of this provision would allow Amtrak to contract out for food services, on which it loses at least \$50 million a year.

Conference Substitute

Neither provision was adopted in the Conference substitute. With respect to the Senate provision allowing contracting out for any service, the Senate recedes to the House to the extent that contracting out is limited to the area of food and beverage service, as provided in Section 1177 of the Conference substitute.

Basic rail passenger system House Bill

The House bill contained no provision.

Senate Amendment

The Senate amendment repealed Title II of the Rail Passenger Service Act as outdated and no longer necessary. Title II of the Act sets forth the process which led to the designation of the original Amtrak system and the restructuring implemented in the Amtrak Reorganization Act of 1979.

Conference Substitute

The Senate recedes to the House on this provision.

Private sector rail service

House Bill

The House bill contained no similar provision.

Senate Amendment

The Senate amendment added a new section 812 to the Rail Passenger Service Act encouraging any party to undertake rail passenger service, in view of the anticipated reduction by Amtrak of its system pursuant to this legislation.

Conference Substitute

The Senate recedes to the House on this provision.

Amendments to the Regional Rail Reorganization Act of 1973

House Bill

The House bill contained no similar provisions.

Senate Amendment

The Senate amendment amended Section 504(f) of the Regional Rail Reorganization Act to provide that labor negotiations between Amtrak and former Conrail employees are to commence 90 days after the date of enactment of this legislation. In this regard, this section would eliminate the provision that if no agreement is reached within a certain time period, these employees retain the work rules which they had at Conrail. This amendment was intended to encourage a renegotiation with these employees to assist Amtrak in assuming total control over the train and engine crews in the Northeast Corridor and to assist Amtrak in reducing some of its labor costs.

Also, this section amended the 3-R Act to permit Amtrak to transfer employees in the Northeast Corridor outside of their seniority districts. Currently, other railroads operating in the Northeast have this option.

Conference Substitute

The Senate recedes to the House on these provisions.

Marketing and Promotion

House Bill

The House bill provided that Amtrak should spend at least one percent of the revenues from 403(b) service on the advertisement of such service locally.

Senate Amendment

The Senate amendment amended section 403(b)(8) of the Rail Passenger Service Act to require Amtrak to dedicate at least 4% of the revenues generated on a route subsidized under that section to local advertising and promotion of such service. The current law provides that Amtrak dedicate no more than 5% for such purpose.

Conference Substitute

The Conference substitute in Section 1182 directs Amtrak to dedicate at least 2 percent, but not more than 5 percent, of the revenues generated on a route subsidized under section 403(b) to local advertising and promotion of such service.

Transfer of Northeast Corridor intercity passenger services to Amtrak

House Bill

The House bill contained no similar provision.

Senate Amendment

The Senate amendment authorized Amtrak to initiate negotiations with Conrail for the transfer of intercity passenger service operated by Conrail. The section provided that the transfer agreement shall specify at least the service responsibilities to be transferred, the rail properties to be conveyed, and a transfer date not later than one year after enactment of this Act. Further, it requires that such transfer agreements be entered into not later than 180 days after the date of enactment.

If Conrail and Amtrak have not signed a transfer agreement within 180 days of enactment, the section directs the Secretary of Transportation to determine within 30 days the terms and conditions of the transfer and the rail properties to be transferred.

the rail properties to be transferred.

If Conrail and Amtrak do not sign an agreement for the transfer, either party could appeal to the Secretary for a determination of the properties to be transferred

and the terms and conditions of the transfer.

This section provided that Amtrak shall be deemed with respect to its service functions a rail carrier subject to Federal laws governing the rights of employees in the railroad industry, including the Federal Employers Liability Act, the Railroad Retirement Act, the Railroad Unemployment Insurance Act, and the Federal railroad safety laws.

Conference Substitute

The Senate recedes to the House on this provision.

Transfer of Northeast Corridor intercity passenger employees to Amtrak

House Bill

The House bill contains no similar provision.

Senate Amendment

The Senate amendment addressed the transfer of Conrail Northeast corridor passenger employees to Amtrak. It required Conrail and Amtrak to estimate the number of positions (by full-time equivalent positions) devoted to services for which Conrail provides personnel for the operation of Amtrak intercity passenger trains on the Northeast corridor. Conrail was directed to transfer to Amtrak a sufficient number of employees to fill the new Amtrak positions.

This section relieved Conrail of its contractual obligation to provide operating personnel for Amtrak Northeast corridor trains, since the requisite personnel will be permanently transferred to Amtrak under this section.

Conference Substitute

The Senate recedes to the House on this provision.

Definitions relating to Northeast Corridor provisions

House Bill

The House bill contained no similar provision.

Senate Amendment

The Senate amendment defined the terms "Amtrak" and "Conrail" for the purposes of the transfer provisions included in the Senate bill.

Conference Substitute

The Senate recedes to the House on these provisions.

Penalty for untimely performance

House Bill

The House bill contained no similar provisions.

Senate Amendment

The Senate amendment provided that when a passenger train arrives more than 15 minutes late at a station due to interference by a freight train, the responsible railroad must pay a fine to Amtrak. The fine to be determined by the Commission.

Conference Substitute

The Senate recedes with an amendment included in section 1181 of the conference substitute stating that contracts between Amtrak and the operating railroads shall include a penalty provision for untimely performance.

SUBTITLE G-MISCELLANEOUS Section 1191-Authorization of appropriations House Bill

The House bill authorized \$40,000,000 for the Local Rail Services Assistance Program in fiscal year 1982, \$44,000,000 in fiscal year 1983 and \$49,000,000 in fiscal year 1984.

Senate Amendment

The Senate bill limited the authorization for the Local Rail Services Administration to \$40,000,000 in fiscal year 1982, \$44,000,000 in fiscal year 1983 and \$48,000,000 in fiscal year 1984.

Conference Substitute

The Conference substitute adopts the Senate provision.

Section 1192-Rail freight assistance

House Bill

Sec. 6521 of the House bill authorizes funding of \$40 million to be made available in fiscal year 1982, \$44 million in fiscal year 1983, and \$49 million in fiscal year 1984.

Sec. 6522 of the House bill changes program in a number of respects. Federal share is changed from 80 percent to 70 percent. Applications must be filed during first 6 months of the fiscal year. To the extent applications are not timely filed, Secretary may distribute funds according to new criteria specified in statute (likelihood of future abandonments, ratio of benefits to costs, etc.). On the first day of fiscal year, State shall be entitled to \$100,000 for planning purposes. DOT is required to approve or disapprove application within 45 days of filing. State retains contingent interest for Federal share if line is sold after receiving Federal assistance.

Senate Amendment

Section 422 of the Senate bill authorizes rail service assistance funding as follows: \$40 million for fiscal year 1982; \$44 million for fiscal year 1983; and \$48 million for fiscal year 1984.

Conference Substitute

House recedes on funding and elimination of 1 percent guaranteed funding to all participating states.

Section 1193—Northeast Corridor improvement project

House Bill

The House Bill provided that not more than \$200,000,000 would be authorized for the Northeast Corridor Improvement Project in fiscal year 1982 and not more than \$185 million in fiscal year 1983. In addition, the House Bill stated certain provisions of the existing law which the Secretary has cited as reasons for reducing the scope of the project.

Senate Amendment

The Senate amendment authorized \$215 million for fiscal year 1982 and \$185 million for fiscal year 1983.

Conference Substitute

Senate recedes to House authorization. The Conference Substitute also contains a provision requiring the Secretary to complete the Corridor Improvement Project in accordance with the goals and to the extent funds are authorized under the Railroad Revitalization and Regulatory Reform Act of 1976 as amended.

The Conferees note that the Northeast Corridor is an important part of the national transportation system. It is the Conferees intent that all funds authorized under the Railroad Revitalization and Regulatory Reform Act of 1976 as amended be used to complete project improvements.

Section 1194—Authorization of appropriations House Bill

The House bill authorized \$34,000,000 for fiscal year 1982, \$37,000,000 for fiscal year 1983, and \$38,650,000 for fiscal year 1984 for railroad research and development. The House bill also authorized \$10,000,000 for the Minority Business Resource Center for each of the fiscal years 1982, 1983, and 1984.

Senate Amendment

The Senate amendment authorized \$40,000,000 for fiscal year 1982, \$44,000,000 for fiscal year 1983 and \$48,000,000 for fiscal year 1984 for railroad research and development.

The Senate amendment also authorized \$5,000,000 for fiscal year 1982, \$5,500,000 for fiscal year 1983, and \$6,000,000 for fiscal year 1984 for the Minority Business Resource Center.

Conference Substitute

The House recedes to the Senate with an authorization of \$40,000,000 for Railroad Research and Development for fiscal year 1982. The Conference substitute contains no authorization for fiscal years 1983 and 1984. The conferees intend that the Federal Railroad Administration shall maintain and continue to operate the Transportation Test Center at Pueblo, Colo. The Senate recedes to the House on funding for the Minority Business Resource Center.

Section 1195—Railroad safety House Bill

The House bill authorized \$27,650,000 for fiscal year 1982 to carry out the provisions of the Federal Railroad Safety Act of 1970.

Senate Amendment

The Senate amendment contained no limitation on the existing authorization.

Conference Substitute

The Senate recedes to the House on this provision.

Conferees are encouraged by the high priority the Secretary and the Administrator the Federal Railroad Administration have attached to the need to improve safety. Recent technological improvements provide opportunities for progress in these areas particularly in the detection of cracks and defects in railroad wheels. The Conferees recommend that up to \$2 million of the Department's authorization for rail programs be used for the purpose of implementing new technology to improve rail safety in this regard. The Conferees further recommend that this program be a joint one with the railroad industry. The Secretary shall report to the Commerce Committees of both Houses by February 19, 1982 on the progress of the testing and demonstration program.

Section 1196—Interstate Commerce Commission

House Bill

The House bill contained no provision. Senate Amendment

The Senate amendment authorized \$77,900,000 for fiscal year 1982, \$80,400,000 for fiscal year 1983, and \$80,400,000 for fiscal year 1984.

Conference Substitute

The Senate recedes to the House with an authorization of \$79,000,000 for fiscal year 1982. The House recedes to the Senate with an authorization of \$80,400,000 for each of the fiscal year 1983 and 1984.

Section 1197—Transportation research and special programs

House Bill

The House bill contained no provision. Senate Amendment

The Senate amendment authorized \$30,047,000 for fiscal year 1982, \$32,300,000 for fiscal year 1983, and \$32,300,000 for fiscal year 1984 for Research and Special Programs Administration.

Conference Substitute

The House recedes to the Senate on the authorizations for fiscal years 1982 and 1983. The Senate recedes to the House with an authorization of \$33,300,000 for fiscal year 1984.

Section 1199A—Statement of managers House Bill

No provision.

No provision.

Senate Amendment

No provision.

Conference Substitute

The conferees included this provision in the final bill because the extraordinary time pressures of the budget process prevented the conferees from preparing a statement of managers in time to be printed in the Conference Report.

APPOINTMENT OF CONFERES ON S. 304, NATIONAL TOURISM POLICY ACT

Mr. DINGELL. Madam Speaker, I ask unanimous consent to take from the Speaker's table the Senate bill (S. 304) to establish a national tourism policy and an independent Government agency to carry out the national tourism policy, with House amendments thereto, insist on the House amendments, and agree to the conference asked by the Senate.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan? The Chair hears none and, without objection, appoints the following conferees: Messrs. DINGELL, FLORIO, and BROYHILL.

There was no objection.

ECONOMIC RECOVERY TAX ACT OF 1981

Mr. ROSTENKOWSKI. Madam Speaker, I move to suspend the rules and agree to the conference report on the bill (H.R. 4242) to amend the Internal Revenue Code of 1954 to encourage economic growth through reductions in individual income tax rates, the expensing of depreciable property, incentives for small businesses, and incentives for savings, and for other purposes.

The Clerk read the title of the conference report.

The SPEAKER pro tempore. Is a second demanded?

Mr. SHANNON. Madam Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

(For conference report and statement, see proceedings of the House of August 1, 1981.)

The SPEAKER pro tempore. The gentleman from Illinois (Mr. Rostenkowski) will be recognized for 20 minutes, and the gentleman from Massachusetts (Mr. Shannon) will be recognized for 20 minutes.

Mr. ROSTENKOWSKI. Madam Speaker, I ask unanimous consent that time for this debate be extended from 40 minutes to 1 hour, to be equally divided by those controlling the time.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The SPEAKER pro tempore. The Chair now recognizes the gentleman from Illinois (Mr. ROSTENKOWSKI).

Mr. ROSTENKOWSKI. Madam Speaker, I yield myself such time as I may consume.

Madam Speaker, the conference agreement on H.R. 4242 that is before the House represents the biggest tax cut in our history. Between now and 1986, taxes will be reduced by about \$750 billion. It incorporates the major provisions of the tax program recommended by the President—across-the-board cuts in individual income tax rates spread out over 3 years and indexing beginning in 1985, and accelerated capital cost recovery as a major incentive for capital formation.

In addition to those provisions, the bill before the House contains many additional changes in our tax laws that have been supported by Members of the House. These include relief from the marriage penalty, expansion of IRA and Keogh plans, tax relief for small business, tax credits for research and development and the rehabilitation of older and historic buildings, the all-savers certificates, dividend reinvestment plans for public utilities, a major liberalization of gift and estate taxes, and revisions to the windfall profit tax.

I think it only fair to warn my colleagues that these massive tax cuts will put continuing pressure on the outlay side of the budget. If the economy does not respond with the vigorous economic growth anticipated by the President and his advisers, we will be faced with sizable budget deficits even with additional spending reductions.

Before summarizing the conference agreement, let me express my personal sense of appreciation for the spirit of diligence and deliberate speed shown by my fellow conferees from the House and the conferees from the other body. We began the conference at 4:30 Friday afternoon and completed our work at 8:30 on Saturday morning, having resolved a number of major and controversial differences between the two bills. I also want to express my thanks to the staff who

not only assisted the conference committee in its deliberations, but prepared the final draft of the legislation and the conference report in time to file those documents in both bodies on Saturday night.

Let me now highlight some of the major provisions of the bill before the House and indicate the agreements reached on the major points of differ-

ence between the two bills.

The provisions regarding individual tax reductions were essentially similar in the two bills. The final agreement incorporates the House provision relating to the tax treatment of Americans working abroad and retains the 1-year holding period for capital gains.

The only substantial area of disagreement between the capital cost recovery provisions in the two bills was with respect to the method of depreciation to be used for buildings. The agreement was to allow depreciation over 15 years using a 175-percent declining balance method.

Minor differences in the provisions regarding the tax treatment of small businesses, research and development spending, stock options, and rehabilitation tax credits for older and histor-

ic buildings were resolved.

The stock option provision in the bill as agreed to by the conferees makes it clear that a stock option program may permit an employee to receive property at the time of the exercise of the option. This will permit the employee to have additional or alternative rights under a stock option program, but it will not permit so-called tandem stock options. My understanding of this provision is that it will permit additional cash or other property-including stock of the granting corporation-to be transferred to the employee at the time the option is exercised or surrendered, in the case of the lapse of the option. Of course, additional cash or other property transferred upon the exercise or surrender of an option will be subject to inclusion in income under the provisions of code section

In the area of savings incentives, the conference resolved minor differences regarding IRA, Keogh, and all-savers provisions, and includes a modified form of a new employee stock ownership plan developed in the other body. In addition it provides a new net interest exclusion beginning in 1985.

The conference agreement made no major changes in the gift and estate tax provisions that were a part of the

House bill.

The conferees agreed to the tighter rules developed by the other body that will prevent the use of commodity straddles to avoid payment of taxes.

The changes agreed to with respect to modifications of the windfall profit tax establish a \$2,500 royalty owner tax credit for 1981, a 2-barrels-per-day exemption for 1982-84, and 3 barrels per day thereafter. The tax rate on newly discovered oil will be reduced from 30 percent to 15 percent between 1982 and 1986. Beginning in 1983, stripper oil produced by independent producers would be exempt. Percentage depletion rules were not changed.

The conference agreement, in addition, contains a number of minor additional provisions, but does not include most of the provisions added as floor amendments in the other body.

LEGISLATIVE PROCESS

We have reached the end of a very long and arduous path in the shaping of this landmark legislation. The President has succeeded in passing the program he wanted—and then some. We congratulate him.

There are many elements in this legislation which bear the imprint and innovation of Members on our side of the aisle. It is no secret that many of the provisions of H.R. 4242 which help people are there only because we chose to confront the administration's plan, to improve upon it rather than

walk away from the process.

But make no mistake about it. This is the President's bill. It outlines a bold—and risky—economic strategy. Only time will tell whether the risks involved—risks inherent in large out-year individual cuts and indexing—were worth taking. I have my doubts about that, but I can honestly say that

I hope this plan succeeds.

But the purpose of my remarks here is not to rekindle or rehash the recently ended debate on this legislation. Nor is it my purpose to advocate the conference results which lay before us—given the legislation which confronted us as conferees, it is the best effort we could produce, in my opinion. Rather, what I wish to say concerns itself with the process which produced this largest tax cut in the history of this country.

As one who has served in Congress through a succession of administrations, I find it genuinely alarming to see a pattern developing on major pieces of legislation in which the work product of the committee system can be cynically discarded in favor of substitute legislation written in some downtown hideaway. Believe it or not, there is real value in the long hours of public hearings, the public debate, and the pressure from interests of all shapes and sizes which is put upon us. I believe that in the end, that process helps Members of both parties fashion responsible-and responsive-laws. However, what we have witnessed in recent weeks has been whipped up at the last minute by downtown draftsmen neither beholden to, nor the product of electoral politics.

This process leaves us exhausted, and disheartened. It takes away the incentive Members must have to labor long and hard in these Halls. It leaves the institution weaker, for it denies to

Republicans and Democrats alike the opportunity to write, and take responsibility for our work product. There is a danger in that, because if this institution is about anything, it is about accountability and responsibility.

The modest contributions of the Republican members of the Ways and Means Committee to the bill we fashioned are titanic by comparison to the imprint they collectively had on the administration's substitute. They are especially to be consoled. The irony of having a President of one's own party routinely and systematically ignore his own representatives on the committee in the development of legislation is, I am sure, not lost on our colleagues across the aisle. They should be the first to acknowledge that their help was needed in this historic effort. I know of their value to our committee, and for that reason I wish they had been asked to contribute more

We need to go back to the process—particularly in the development of tax legislation, for it is particularly vulnerable to the type of political competition which we have just witnessed. We need to get back to the process we have known in the past, where differences on tax bills have largely been bipartisan differences over tax policy. We will return to that process because we must—because it is better for the system, for this institution, and, most of all, better for those whom we represent.

Finally, Madam Speaker, during Senate consideration of the tax reduction legislation, there was some speculation that the Senate might pass its version of the tax bill as an amendment to House Joint Resolution 266. the debt ceiling resolution which was deemed passed by the House as part of our action on the first concurrent resolution on the fiscal year 1982 budget. While most would concur that debt ceiling resolutions are the type of legislation which constitutionally must begin in the House, it is clear that the magnitude of the amendment contemplated by the Senate goes far beyond the constitutional prerogatives which allow the Senate to "propose or concur with amendments" to revenue bills.

Although much has been said about the constitutional prerogatives of the House to originate revenue legislation and about the various precedents as to how this provision has been interpreted by individual Congresses, it is not necessary for us at this time to review in detail the precedents on this matter. Suffice it to say that the broad, nongermane amendment to the debt bill that was contemplated by the Senate would have gone far beyond what was intended by the Framers of the Constitution. As it left the House, the joint resolution contained less than five lines providing for a tempo-

rary increase in the public debt limit. The Senate amendment deleted the entire House language, leaving nothing more than a House joint resolution number, and inserted 284 pages of general tax amendments.

Regardless of what may exist in the way of one obscure precedent or another, it is clear to me that such a massive amendment goes far beyond the Senate's power as outlined under section 7 of article I. I believe, Madam Speaker, that in this instance the Senate has recognized this and properly waited until the House bill arrived in the Senate.

I make this point today not so much to look back on the events of recent weeks but to make it clear that in the future the House should, and as long as I am chairman, I hope will, strictly guard its prerogatives with respect to revenue bills. This prerogative involves not only insuring that revenue bills are initiated in the House but making it clear that Senate amendments to those bills are properly amendments and not new initiatives attached to House bills solely for the purpose of avoiding the constitutional rights of this body.

Madam Speaker, I include a detailed summary of the conference agreement in the Record following my remarks:

BRIEF EXPLANATION OF THE CONFERENCE AGREEMENT ON H.R. 4242, ECONOMIC RE-COVERY TAX ACT OF 1981

TITLE I: INDIVIDUAL TAX REDUCTIONS

1. Rate cuts

The conference agreement contains across-the-board rate cuts for 1982 through 1984 with withholding changes to take place on October 1, 1981; July 1, 1982; and July 1, 1983. The top marginal tax rate is reduced from 70 percent to 50 percent effective January 1, 1982.

2. Capital gains rate

The conference agreement includes a maximum 20-percent rate on capital gains for sales or exchanges after June 9, 1981. However, no change is made in the 12-month holding period for capital gains.

3. Marriage penalty deduction

The conference agreement includes a phased-in deduction of 5 percent in 1982 and 10 percent in 1983 (and thereafter) of the lower earning spouse's income up to \$30,000. Thus, when fully phased in, the maximum marriage penalty deduction will be \$3,000.

4. Indexing

The conference agreement includes a provision to index income tax brackets, the zero bracket amount and the personal exemption beginning in 1985.

5. Income earned abroad

The Conference agreement provides a \$75,000 exclusion for foreign earned income beginning January I, 1982. This amount will increase by \$5,000 per year over the next four years to \$95,000. In addition, certain excess housing expenses could be excluded.

6. Above-the-line charitable deduction

The conference agreement permits taxpayers who do not itemize a deduction of a specified percentage of allowable charitable contributions up to a fixed dollar amount of contributions. In 1982 and 1983, the percentage is 25 percent up to \$100 of contributions; in 1984, 25 percent up to \$300 (\$75 maximum deduction); in 1985, 50 percent without a cap; and in 1986, 100 percent without a cap. The provision expires December 31, 1986.

7. Sale of principal residence

The Conference agreement (1) extends the replacement period from 18 months to 2 years with respect to the rollover of gain on the sale of a residence, and (2) increases the one-time exclusion of gain on the sale of a principal residence by individuals age 55 or over from \$100,000 to \$125,000.

8. Child care credit

The conference agreement converts the present child care credit to a sliding-scale credit which phases down from 30 percent to 20 percent based on income. The maximum amount of eligible employment-related expenses is increased to \$2,400 in the case of one dependent and to \$4,800 in the case of two or more dependents. Expenses for out-of-home, noninstitutional care of a dependent are made eligible for the credit.

9. Adoption expenses

The conference agreement permits individuals who itemize deductions to deduct up to \$1,500 of adoption expenses for hard-to-place children (as defined in the Social Security Act adoption assistance program).

10. Imputed interest rates on installment

The conference agreement provides that the maximum rate of imputed interest on sales of land will be 7 percent, if (1) the sale takes place between members of the same family and (2) the sales price does not exceed \$500,000.

11. State legislators

The conference agreement provides state legislators an election to treat their legislative districts as their tax homes. An electing legislator is deemed to have expended for business purposes an amount equal to the individual legislator's legislative days times the greater of the Federal or state per diem (but not more than 110 percent of the Federal). This amount is deductible except for legislators living within 50 miles of the state capitol building, without regard to whether the taxpayer is away from home. The election is available for taxable years beginning on or after January 1, 1976.

12. Campaign funds

The conference agreement permits the taxable income (for example, interest on account balances) of a political campaign organization to be subject to the graduated corporate tax rates. Currently, this income is subject to the highest corporate tax rate (46 percent).

TITLE II: BUSINESS TAX REDUCTION 1. Capital cost recovery

The conference agreement permits the costs of eligible property to be recovered over recovery periods of 3, 5, 10 and 15 years. In general, autos, trucks and R&D equipment is placed in the 3-year class; most machinery and equipment is placed in the 5-year class; and long-lived public utility property in the 10- and 15-year classes. Real property will be depreciated over 15 years using either the straight-line method or 175 percent declining balance method. Lowincome housing can elect 200 percent declining balance.

2. Small business expensing

The conference agreement permits business to expense the cost of investments up

to \$5,000 in 1982 and 1983, \$7,500 in 1984 and 1985 and \$10,000 after 1985.

3. Investment tax credit

The conference agreement provides a 6-percent investment tax credit for the 3-year class and a 10-percent investment credit for property in the other classes.

4. Used property limitation

The conference agreement increases the present used property limitation from \$100,000 to \$125,000 in 1983 and to \$150,000 in 1985.

5. At-risk limitation

The conference agreement applies the present at-risk rules to the investment tax credit with certain exceptions for amounts borrowed from certain financial institutions and loans for certain energy property.

6. Carryover periods

The conference agreement extends the carryover periods for net operating losses and for the investment tax credit from 7 years to 15 years.

7. Rehabilitation tax credit

The conference agreement provides a 15-percent credit for the costs of rehabilitating a commercial building at least 30 years old, 20-percent for a commercial building at least 40 years old, and 25-percent for a certified historic structure. The present requirement of straight-line depreciation for replacement structures at the site of a demolished historic structure is repealed. The credit is also extended to rehabilitated buildings leased to tax-exempt organizations or governmental units.

8. Research and Experimentation

The conference agreement provides for a 25-percent tax credit for incremental research expenditures. The conference agreement also provides more favorable charitable deduction treatment of scientific apparatus donated to universities. Finally, the conference agreement provides for a two-year suspension of the foreign source allocation rules for R&D and provides for a Treasury study.

9. Small business rate cuts

The conference agreement reduces the tax rates on the two lowest corporate tax brackets (a) from 17 percent on the first \$25,000 of corporate taxable income to 16 percent in 1982 and to 15 percent in 1983, and (b) from 20 percent on the \$25,000-\$50,000 bracket to 19 percent in 1982 and to 18 percent in 1983.

10. Other small business provisions

The conference agreement (1) increases the accumulated earnings credit from \$150,000 to \$250,000; (2) increases the maximum number of subchapter S shareholders from 15 to 25 and permits certain trusts to be shareholders; and (4) liberalizes and simplifies LIFO inventory and small business accounting.

11. Financial institutions

The conference agreement (1) provides favorable tax treatment for reorganizations involving financially troubled thrift institutions and for mutual savings banks that convert to stock associations, and (2) permits for 1982 the bad debt deduction of commerical banks to be computed on the basis of 1.0 percent of outstanding loans (instead of 0.6 percent under present law).

12. Stock options

The conference agreement provides for incentive stock options with respect to which there will be no tax consequences when the

option is granted or exercised and the employee will be taxed at capital gains rates when the stock is sold. For options granted after 1980, options granted in any calendar year must be limited to \$100,000 (with a 3-year carryover of any unused portion). For options granted after January 1, 1976, and exercised after 1980, limitations of \$50,000 per year and \$200,000 in the aggregate apply.

13. Targeted jobs tax credit

The conference agreement repeals the WIN credit and provides that the targeted jobs credit is available for targeted employees who begin work before January 1, 1983. Targeted employees are expanded to include AFDC recipients, WIN registrants, involuntarily terminated CETA employees, and economically disadvantaged Vietnam veterans regardless of age. However, cooperative education students would be limited to those who are economically disadvantaged, effective for wages paid after December 31, 1981

Certificates generally must be received or requested before an individual begins work. However, for an individual, other than a cooperative education student who begins work for the employer during the 90-day period beginning with the date 45 days before date of enactment or a cooperative education student who begins work before the end of this period, the certification must be requested or received before the last day of this 90-day period. In the case of an individual who began work prior to 45 days before date of enactment, except for a cooperative education student, certification must have been requested or received by July 23, 1981.

14. Low-income housing

The conference agreement permanently exempts low-income housing from the requirement that construction period interest and taxes must be capitalized (Code section 189).

15. Rehabilitation expenses of low-income housing

The conference agreement increases, under certain conditions, the amount of rehabilitation expenses that can be amortized over 5 years from \$20,000 to \$40,000 per unit.

16. Charitable contributions by corporations

The conference agreement provides for an increase in the limitation on a corporation's charitable contribution deduction from 5 to 10 percent of taxable income, effective for taxable years beginning after December 31, 1981.

17. Gifts and awards

The conference agreement increases the ceiling on the deductibility of employee awards for length of service, productivity or safety achievement from \$100 to \$400.

18. Motor carrier operating rights

The conference agreement allows an ordinary deduction over 60 months for the adjusted basis of motor carrier operating authorities held on July 1, 1980, with technical clarifications to the special rules for allocations of authorities where acquisitions are involved.

TITLE III: SAVINGS INCENTIVES 1. "All Savers" certificates

The conference agreement provides an exclusion for up to \$1,000 (\$2,000 for a joint return) of interest on "all savers" certificates. These certificates must have an investment yield no greater than 70 percent of the Treasury bill rate, and institutions issu-

ing these certificates must invest 75 percent of the proceeds in residential financing or agricultural loans.

2. Interest exclusion

The conference agreement terminates the \$200/\$400 interest and dividends exclusion after 1981 and reinstates the \$100 per individual dividend exclusion for 1982 and subsequent years. However, beginning in 1985, a new net interest exclusion will be provided equal to 15 percent of interest received in excess of interest deducted (other than business or home mortgage interest). The 15-percent net interest exclusion is computed on up to \$3,000 of net interest (\$6,000 for joint returns) per year.

3. Individual retirement accounts

The conference agreement increases the limit on IRA contributions to the lesser of 100 percent of compensation or \$2,000. In addition, active participants with other pension coverage will be eligible to establish IRAs for the first time. The contribution limit on spousal IRAs is increased to \$2,250 and a divorced spouse will be allowed to contribute to an IRA under certain conditions.

4. Keogh plans

The conference agreement increases the contribution limit on Keogh plans from \$7,500 to \$15,000. No change is made to the 15-percent of earnings limit of present law.

5. Dividend reinvestment plans

The conference agreement permits taxpayers to exclude \$750 (\$1,500 for joint returns) of dividends received from a public utility if the dividends are reinvested in the stock in the utility. The exclusion will apply for dividends distributed in 1982-1985.

6. ESOP's

The conference agreement replaces the present investment-based tax credit with a new payroll-based tax credit. The credit is limited for 1983 and 1984 to one-half of one percent of compensation paid to employees and to three-quarters of one percent of such compensation for 1985, 1986 and 1987. The credit will expire after 1987. In addition, the rule of present law requiring that an employee be entitled to vote stock in his ESOP is deleted with respect to profit-sharing plans but is applicable to all other defined contribution plans.

TITLE IV: ESTATE AND GIFT TAX REDUCTIONS

The conference agreement: (1) increases the unified credit over 6 years to a \$600,000 exemption equivalent; (2) reduces the highest estate tax rates from 70 percent to 50 percent by 1985; (3) provides for an unlimited marital deduction; (4) increases the annual gift tax exclusion from \$3,000 to \$10,000 per donee, plus provides an unlimited gift tax exclusion for certain gifts for medical expenses and school tuition; (5) increases the limit on current use valuation from \$500,000 to \$750,000 over 3 years and expands such valuation to include timber; and (6) expands the deferral provisions of present law for estates comprised largely of small businesses.

TITLE V: TAX STRADDLES

The conference agreement adopts the Senate provision on commodity-related transactions. Accordingly, commodity futures contracts will be taxed under the "mark-to-market" system at year end, with a 3-year carryback provision and a 1981 transition rule allowing installment payments. For straddles outside the mark-to-market rule, losses are allowed to the extent they exceed unrealized gains on offsetting positions. In addition, interest and carrying

costs on commodity straddle transactions must be capitalized, T-bills are treated as capital assets, and taxable dispositions of capital assets are treated as capital gains and losses. Hedging transactions are excepted from mark-to-market, the loss limitation and the cash and carry rules. Finally, dealers will generally be required to identify investment securities on the day following acquisition in 1981 and on the day of acquisition thereafter; seven business days are allowed for floor specialists on the stock for which they are registered.

TITLE VI: ENERGY PROVISIONS

1. Royalty owners

The conference agreement provides royalty owners with a \$2,500 credit against the windfall profit tax in 1981. For 1982 and subsequent years, royalty owners would be allowed to exclude specific amounts of production: 2 barrels per day in 1982-1984 and 4 barrels per day in 1985 and thereafter.

2. Independent producer stripper oil

The conference agreement exempts independent producer stripper oil from the windfall profit tax beginning in 1983.

3. Newly discovered oil

The conference agreement phases down the windfall profit tax rate on newly discovered oil from 30 percent to 15 percent by 1986.

4. Child care agencies

The conference agreement exempts child care agencies from the windfall profit tax.

5. Production credit for tight sands

The conference agreement provides that the present production credit for tight sands will not be available unless the taxpayer elects the credit on the appropriate tax return.

TITLE VII: ADMINISTRATIVE PROVISIONS

Interests and penalties

The conference agreement includes administrative changes which increase the interest rate on tax deficiencies and overpayments and provide new or increased penalties for filing false W-4s, failing to file information returns, making overstated deposit claims, claiming valuation overstatements, and negligent reporting.

Disclosure provisions

The conference agreement includes a prohibition on the public release of certain information used by I.R.S. to select returns for audit.

Tax Court filing fee

The conference agreement increases the Tax Court filing fee from \$10 to \$60.

Corporate estimated taxes

The conference agreement increases the amount that large corporations must pay in estimated taxes from 60 percent of the current year's tax liability to 65 percent in 1982, 75 percent in 1983 and 80 percent in 1984 and subsequent years.

Individual estimated taxes

The conference agreement increases the threshhold for paying estimated taxes for individuals from \$100 in 1981 to \$200 in 1982 and up to \$500 in 1985 and thereafter.

Railroad retirement taxes

The conference agreement includes several provisions relating to railroad retirement system financing. The agreement increases Tier-II pension taxes on employers, adds a new Tier-II tax on employees and authorizes limited advance transfers to the railroad retirement system. The conferees also

adopted certain technical amendments with regard to the definition of railroad compensation but insisted that these technical amendments be made prospective only.

TITLE VIII: MISCELLANEOUS

1. Fringe benefit regulations

The conference agreement extends the recently-expired moratorium on the issuance of fringe benefit regulations to December 31, 1983.

2. Group legal services plans

The conference agreement extends the present exclusion for contributions to, and benefits provided under, a qualified group legal services plan through December 31, 1984.

3. Tax-exempt bonds

The conference agreement exempts interest on (1) industrial development bonds used to finance buses, subway cars and similar equipment leased to publicly owned mass transit systems and (2) volunteer fire department bonds.

4. Telephone excise tax

The conference agreement extends the 1percent telephone excise tax for two years through 1984. The tax will terminate on January 1, 1985.

5. Unemployment taxes for certain fishermen

The conference agreement includes a provision relating to the employment tax treatment of fishermen who share in the catch of vessels usually operating with 10 or fewer crewmen. Under the conference agreement, past employer social security taxes on such fishermen would not be refunded; however, for 1981, these fishermen would not be treated as employees and would be exempt from unemployment compensation taxes (FUTA).

6. Payout requirements of private foundations

The conference agreement provides that private foundations are required to distribute only their minimum investment return, rather than the greater of their minimum investment return or their adjusted net income, effective for taxable years beginning after December 31, 1981. The definition of operating foundation is similarly amended.

7. Foreign investment in U.S. real estate

The conference agreement includes numerous technical amendments to the Foreign Investment in U.S. Real Property Tax Act enacted in 1980.

8. Foreign investment companies

The conference agreement modifies the treatment of gain on the disposition of stock in a foreign investment company attributable to earnings and profits derived before the corporation became a foreign investment company.

□ 1300

The SPEAKER pro tempore. The gentleman has consumed 6 minutes of his time.

Mr. ROSTENKOWSKI. Madam Speaker, I yield 8 minutes to the gentleman from New York (Mr. CONABLE). Mr. CONABLE. Madam Speaker, I

Mr. CONABLE. Madam Speaker, I support the conference report accompanying H.R. 4242, The Economic Recovery Tax Act of 1981.

The principal components of the President's economic recovery tax plan were not in controversy because both Houses of the Congress passed virtually identical individual and business tax cut provisions.

For individuals, there is a 3-year, 25percent, across-the-board cut, followed by indexing in 1985. For businesses, there is major depreciation reform as embodied in the accelerated cost recovery system.

Beyond these two central provisions, there were a number of important differences which the conferees resolved.

The conference report deletes the House provision which reduced the holding period for long-term capital-gain treatment to 6 months. The holding period will stay at the current law level of 12 months. The conferees accepted the other body's date for lowering the capital gains rate to 20 percent. This means sales occurring after June 9 will be eligible for the new and lower maximum rate.

On the provision to allow all taxpayers to deduct their charitable deductions, there was a difference as to the phase-in schedule. The House bill provided a \$100 contribution cap in 1984, whereas the other body's version has no cap in 1984. The resolution in the conference report provides a \$300 con-

tribution cap in 1984.

The only major difference in the accelerated cost recovery system concerned the actual writeoff rate for real property in the 15-year recovery class. The House bill provided for the use of the 200-percent declining balance method, whereas the other body provided for the use of the 150-percent declining balance method. The resolution was to provide for the use of the 175-percent declining balance method for all real property except low-income housing. Low-income housing will be depreciated over 15 years using the 200-percent declining balance method.

The conference report contains in some form all but two of the House provisions concerning the crude oil windfall profit tax. The two deletions are the freezing of the depletion allowance at 22 percent and the credit for woodburning stoves. Three provisions are identical to the House bill. They are: The exemption of stripper oil extracted by independent producers, the reduction of the windfall tax on new oil from 30 to 15 percent, and a windfall profit tax exemption for residential child care agencies.

The royalty owner provision was modified. Royalty owners will receive a \$2,500 windfall profit tax credit in 1981. In 1982, 1983, and 1984 they will

receive a 2-barrel-per-day exemption from the tax. In 1985 and thereafter, the exemption will be 3 barrels per day.

The conference report contains a scaled-back version of the dividend reinvestment provision which was part of the House bill. For years 1982 through 1985 a person will be able to defer taxation on up to \$750—\$1,500 per joint return—of dividends reinvested in acquiring new stock of a public utility. The provision "sunsets" after December 31, 1985.

Estate and gift tax provisions generally are the same as in the House bill. One exception relates to a dollar limitation on the special use valuation of farm property. The House bill allowed an adjustment of up to \$1,000,000 in 1983 and thereafter. The conference report includes a \$750,000 special use valuation adjustment in 1983 and thereafter.

The conference report adopts the other body's provision related to commodity tax straddles. This version is tighter than the House bill, thus effecting much greater revenue savings; an estimated \$1.7 billion by 1986.

The tax credit for work-related dependent care was changed from a 20percent credit regardless of income to a sliding scale tax credit, beginning at 30 percent for families with incomes of \$10,000 or less and gradually phasing down to 20 percent for families with incomes of \$28,000 or more. The maximum amount of dependent care expenses on which the credit may be claimed was increased from \$2,000 annually for one dependent to \$2,400 and from \$4,000 annually for two or more dependents to \$4,800. Dependent care provided by an employer as a fringe benefit will not be considered to be taxable income to the employee. The credit which is currently allowed on in-home care of older, incapacitated dependents, will be permitted on outof-home care as well. The credit will be allowed on dependent care provided in centers with more than six dependents only if such centers comply with the State and local law.

These provisions relating to child and adult care constitute a major improvement in the current law.

The targeted jobs tax credit was extended to cover individuals hired before 1983 and expanded to include AFDC recipients, WIN registrants and employees laid off from CETA public service employment. Vietnam veterans will be included regardless of age, and cooperative education students will be included only if they come from lowincome families. The program is tightened by requiring that, after a transition period, certifications that individuals meet the criteria for the credit will have to be requested or received before the employee begins working. Certifications will be invalid if requested after the employee was hired or if based on false information provided by the employee. The FUTA wage limitation on first-year wages eligible for the credit is eliminated.

Madam Speaker, I believe the compromises reached by the conferees are fair and reasonable. All but the most technical possible details are within

the scope of the conference.

This legislation marks a historic new direction in tax policy. It not only gives American taxpayers their largest reduction of modern times, it puts our country on a new economic track. We should start moving uphill instead of down.

I therefore urge the adoption of this conference report and look forward to it being signed into law very soon.

I would like to say to the chairman that I understand the gentleman's concern about the committee not being able to work its will. However, I think it is clear that we have a divergence between the points of view of a committee put together as ours is without regard to the party structure in the House and what occurs here on the House floor.

If given the choice, I am going to choose the will of the House as a whole, rather than the will of a committee, however constituted. I think that is basic to our representative de-

mocracy.

I would like, if I may, Madam Speaker, to engage in a brief colloquy with the chairman on the issue of installment sales, because I think there is an issue of clarification that needs to be made there.

Madam Speaker, I have a question for the chairman regarding the effect of the individual tax cut and special 1981 capital gains tax rate on installment sales. Specifically, will installment payments received after June 9, attributable to sales before June 9, be eligible for the 20-percent maximum

capital gains rate?

Mr. ROSTENKOWSKI. I would answer that such installment payments would not be eligible for the 20-percent maximum capital gains rate. This is because the operative language in the bill provides that the 20-percent maximum capital gains rate applies to sales or exchanges occurring after June 9, 1981. Therefore an installment received after June 9, attributable to an installment sale before that time, would not qualify since the sale or exchange did not occur after June 9, 1981.

Mr. CONABLE. I thank the chairman for his answer and have one further question. How will installment payments attributable to sales or exchanges which occurred before June 10, 1981, be treated when they are received in 1982 and subsequent years?

Mr. ROSTENKOWSKI. Such installment payments received in 1982 and subsequent years will be treated

according to the tax rates that exist in the respective year in which the installment is received.

Mr. CONABLE. I thank the chairman for his clarification of this issue.

Madam Speaker, in closing let me say that I regret we are having some delay in the completion of this measure. The tactics being used serve no possible useful purpose, and that very little political benefit will accrue to those who are seeking the delay.

Mr. SHANNON. Madam Speaker, I

yield myself 5 minutes.

It is ironic—to say the least—as we get down to the end of this debate on tax policy, particularly after the events of last week, that all of the time should be controlled at this moment on the Democratic side.

□ 1315

There is a reason for that. There is a reason that this conference report has been brought under a suspension of the rules, and I would like to take a few moments to explain to my colleagues the procedure under which we are working at this time.

I made it clear after the conference completed its work that it was my intention to raise a point of order to the conference report. It was my hope that in the process of raising the point of order we would have an opportunity to open, once again, this whole question of oil which has been injected

into this tax issue.

As my colleagues know, the Senate passed oil provisions which would have cost taxpayers over \$6 billion during the period of the next 5 years. In the Hance-Conable substitute adopted by the House of Representatives last week, that ante was raised to \$16 billion. It was my hope and it was the hope of many on the Democratic side-it was the hope of many on the Republican side, I believe, who supported Hance-Conable, because heard Members from my own State on the Republican side state this-that there would be an opportunity to pare back these oil provisions.

When we began considering tax policy this year, it was nobody's intention that this bill should be used as a vehicle to repeal the windfall profits tax. When we began considering tax policy, it was nobody's intention that oil should be entered into the bidding process that was likely to take place during the course of this legislation.

Unfortunately, it did.

The Senate added oil provisions. We on the Democratic side of the Ways and Means Committee sought to get an agreement from the administration and from our Republican colleagues to remove oil from the bidding block, and we were not successful in that effort.

So as a result, we end up with what is supposed to be an economic recovery package with a repeal of a large portion of the windfall profit tax, with \$12 billion in breaks to oil producers over the next 5 years \$12 billion—that is as much as individual taxpayers, all of the individual taxpayers in the country earning under \$30,000, are going to get out of this package next year—we end up doing something that I think the majority of the Members of the House of Representatives did not want to see happen and, if we are to follow the regular procedure without anybody rocking the boat, we can tell our constituents that this was beyond our control.

Well, I would like to say to my colleagues that this is within our control, very much within our control. This conference report on the biggest tax bill in the history of the country has come to the House of Representatives under a suspension of rules, a very unusual procedure. If it does not pass with the necessary two-thirds vote on suspension, the conference report will be brought back to the floor of the House later this afternoon, and at that point it is my intention to raise that point of order and to try to seek to recede to the Senate's provisions on oil.

So what this vote on suspension comes down to is one thing, and one thing only. It is not a vote on Kemp-Roth; it is not a vote on 10-5-3; it is not a vote on the Nation's economic recovery package. It is a vote on oil. This is the one opportunity that the Members of the House of Representatives are going to have to try to alter these oil provisions.

Now, it is strange, it is unusual, it is unprecedented, I think, for a bill of this magnitude to come to the floor under these circumstances. But I say to my colleagues on both sides of the aisle that this tax package has been called by some who support it a riverboat gamble, a riverboat gamble that is going to make every Member of this body and every citizen in the United States pay a big price in the next few years if it does not work out.

There is no way we can justify what we have done in the oil area in this conference report. Our constituents are not going to understand that we had no options.

So I would ask my colleagues to vote "no" when we come to a final vote on the suspension of the rules. I would ask them to join with me on a subsequent vote when the conference report comes back to the floor later this afternoon in voting down the previous question, after the point of order is raised, so that we will have that chance to amend the conference report and to recede to the Senate on the question of oil.

Franklin Roosevelt said almost 45 years ago that the problem with this country is: You cannot win elections without the oil bloc, and you cannot govern with it.

I do not think that that is true. I think that we can devise together a sound economic policy. I think we can devise a sound energy policy. I do not think public policy has to be subjected to the auctioning that we have seen in the last few weeks. I think our conferees did the best they could on the House side, to see that these unconscionable oil provisions were not put in, and now is our chance to undo those provisions.

Madam Speaker, I yield 4 minutes to the gentleman from Vermont (Mr. JEFFORDS).

Mr. JEFFORDS. Madam Speaker, I rise in support of the efforts of the gentleman from Massachusetts. I think we should look clearly at what we are doing here. Why the panic to rush this conference report through under suspension? Is it merely because we are all so anxious to get off on our August recess that we will allow the oil special interest provision to remain in this bill?

It was not there initially. It was not part of the President's original taxpackage. It was not part of the Democrats' original tax package. Why is it here? And why is the giveaway so large? I do not know. I cannot understand why the conferees did not immediately, in 30 seconds, as little time as it took for them to do away with those two things which would have been helpful to the Northeast, the tax credit for home heating oil and the wood stove tax credit—recede to the Senate's version of the oil tax break costing \$6.6 billion. I do not like that level either.

But there is certainly no reason in the world why the conferees on our side had to come up with \$11.8 billion of additional relief to the oil companies.

Incidentally, in discussions with some of the tax bill conferees, I have been advised that it took less than 30 seconds for the conference to dispose of both the wood stove tax credit and the home heating credit. These two provisions were not given the time of day.

There has been some mention of the fact that the wood stove credit was dropped from H.R. 4242 because I voted against the bill last week. I would respond by saying that I do not think those who drafted the successful version of the House legislation ever had any intention of keeping this provision in the bill. The wood stove tax credit was, transparently, part of the vote bidding war and horse trading that typified the evolution of H.R. 4242. It was a bone with a string attached, the same kind you see in television cartoons. This bone was dangled in front of Members from the Northeast and Midwest, then pulled back. little by little, until it disappeared into a hole in the wall.

I wrote a letter to the Republican leadership on July 27, well before the House vote on the tax cut, expressing strong support for the wood stove tax credit but also skepticism, in the light of past events, that it would be preserved in the conference. In essence, Madam Speaker, I was seeking some real assurance from the leadership that the inclusion of the stove credit in the Republican substitute was a genuine effort to improve energy tax policy and promote energy conservation. I received no response.

Moreover, although the wood stove tax credit effort has been known in certain circles as the Jeffords amendment, it clearly is of great importance to any number of other Republicans from the Northeast and Midwest, many of whom have worked diligently in support of it. And all of these Republicans voted for the Conable-Hance substitute last week. Were they, then, punished too?

Finally, I think the unhappy fate of the home heating tax credit in the conference betrays a broader insensitivity on the part of the conferees to the energy predicament of the Northeast and Midwest. If the wood stove tax credit was eliminated because of my vote, why was the home heating provision also rejected? Senator Dole apparently tried five or six times to get the House conferees to accept this provision, offered by Senators RUDMAN and Kennedy, but was unsuccessful. So what we have here is general refusal on the part of the House conferees to recognize the very legitimate concerns of Congressmen from the Northeast and Midwest in the energy area. Unfortunately, some Members of this body must still regard wood stoves as quaint relics from the past, artifacts that disappeared from the face of the Earth with the prairie schooner and the mule-drawn plow. I take this opportunity to enlighten them that the wood stove is very much alive and well, and could be even more helpful than it is presently in the battle for energy conservation if given some encouragement.

But let me ask the Members this: How many here would vote yes if we had a bill before us today which said: "Shall we borrow \$11.8 billion and add it to the national deficit and give it to the oil companies?" That is the net effect of this oil tax break. I wish you luck when you go home and try to explain yourself on that vote, because that is what we are being asked to do here today.

Mr. KEMP. Madam Speaker, will the gentleman yield?

Mr. JEFFORDS. I yield briefly to the gentleman from New York.

Mr. KEMP. Madam Speaker, can the gentleman tell us who he thinks pays that tax, except the users of home heating oil, particularly those in the

Northeast? They are the ones who are paying the cost of that tax burden.

Mr. JEFFORDS. Oh, I wish that that might be the case. But the gentleman knows and I know that the price of oil in this country is not set by a free market system. It is set by an oil cartel called OPEC. They are the ones who establish the per-barrel price. They are the ones who establish the unreasonable profit. And if we prevent it from flowing to the Federal Treasury, do you know who is going to pick it up? Either the producers or, as is happening in this country, the States are going to move in with their severance taxes and pick it up. And I do not blame them. Because that is the policy we are arguing about here. Who should get that unreasonable profit on a national natural resource.

Mr. KEMP. I have heard that argument from Ralph Nader, but I am surprised to hear it from the gentleman. But I will say this: When the Sun Belt uses natural gas and the Northeast has to use home heating oil, we find that the tax that is placed upon the production of domestic oil is passed directly along to the consumers. And you in the Northeast and me from Buffalo are ultimately putting burden on both the homeowner, as well as the businesses of the Northeast, by allowing that tax to be placed. It should not have been voted through, in the first place. I am sorry the gentleman is making his case against the bill on that provision.

Mr. JEFFORDS. Far be it from me to argue economic theory with the gentleman, but I most certainly disagree with the argument he is making. I have agreed with him on supply-side economics, but I disagree that it is not OPEC that is setting the world price of oil. To me supply-side economics does not mean supplying oil producers with unreasonable profits.

Clearly the price of oil has risen a great deal faster than the prices of other commodities. It is not supply and demand that is determining this—in fact in the last couple of years, Americans have been using less oil. We are now in a glut situation but prices continue to rise.

The question is not whether the price for the consumer would go down if the windfall profit tax is eased—prices will not fall from this factor. The question is to whom the excess—excess profits that decontrol has brought about will go. Should it be the oil companies which are already making record profits? Should it be to States in the form of severance taxes which, in effect, means that New Englanders are paying for schools in Texas? Or should it be the Federal Government which can help to ease the burden of high prices on consumers, help them change to other

sources, and help them conserve energy and therefore save money

No one of these three recipients should get all of the excess profits, but I believe we would be mistaken to believe that these obscene revenues will not continue if we abandon the concept of a windfall profit tax as this bill begins to do.

Mr. SHANNON. Madam Speaker.

will the gentleman yield?

Mr. JEFFORDS. I yield to the gen-

tleman from Massachusetts.

Mr. SHANNON. I would just like to say to our colleagues that there was enough room in this tax bill to give 12 billion dollars' worth of oil breaks to companies but there was not enough to keep the heating credit that the Senate passed, which would have cost \$500 million and would have helped the consumers of the Northeast. There was not enough for the wood stove credit. And I cannot believe that the oil companies were doing their lobbying over the period of the last few weeks to aid the consumers of the northeastern part of the United States.

Madam Speaker, I yield 2 minutes to the gentleman from Connecticut (Mr.

RATCHFORD.)

Mr. RATCHFORD. I thank the gen-

tleman for yielding.

Madam Speaker, this is not a better bill than we saw last week. It is one that is much worse. For those of us from the North and the Northeast concerned with energy, let us restate what has just been said. We went into conference with a heating oil credit. We come out of conference with nothing. We went into conference with a credit for wood burning stoves. We came out with nothing. The only winner in this conference, and they were boastfully saying, "Well, you cannot get everything," the only winner in this conference is the oil industry-\$12 billion over the next 5 years.

When we cannot take care of those living on low and fixed incomes, when we do not provide a credit for the middle-income oil consumer but we do provide this type of relief for the oil industry, whatever happened to public interest? When you add to that fact the special treatment for big estates, the special treatment for certain segments of the banking industry, we do not have a better bill. Special interest has a better bill. Public interest is worse off. We ought to reject this proposal which turns its back on energy relief in this country.

Mr. SHANNON. Madam Speaker, I yield 2 minutes to the gentleman from

Pennsylvania (Mr. EDGAR).

Mr. EDGAR. Madam Speaker, I think that there are three good reasons for voting no on this particular bill at this time.

First, we are bringing the bill up under suspension of the rules. That

does not give us the opportunity to call reasonable points of order against those provisions of the bill which in fact could not stand that particular process. And I think that anyone who is interested in a fair and equitable procedure and adequate debate on tax policy, if in fact you are interested in a large tax reduction, you ought to at least know what is in the bill, what some of the major provisions are. I think it is the wrong procedure for this time.

Second, I agree with my colleague that the legislation gives too much away to big oil. It is the wrong time and the wrong group to give tax relief to. We have worked long and hard to have a modified windfall profit tax put into place, and we are devastating that windfall profit tax with this particular action.

Third, in terms of economic policy, I think it is the wrong direction for our Nation to take

Mr. HOLLENBECK. Madam Speaker, will the gentleman yield?

Mr. EDGAR. I yield to the gentleman from New Jersey.

Mr. HOLLENBECK. I thank the gentleman for yielding.

Madam Speaker, I want to concur with the gentleman's remarks and his

concern over the procedure being followed today.

I rise to express my concerns over several provisions in the conference report. I believe clarification is needed of a potential ambiguity relating to the allocation of research and experimental expenditures under section 861 of the Internal Revenue Code. I understand that section 223 of the act provides that for a 2-year periodwhile Treasury studies the impact of its section 1.861-8 regulations on research and development in the United States, and on the availability of the foreign tax credit-all expenditures for research conducted in the United States shall be allocated and apportioned only to the U.S. source income. Although I could not obtain time under this unusual procedure to question the chairman, it is my understanding from conversations members of the committee that during this 2-year period existing law, regulations, and regulatory authority provided to the Secretary, as under 861-863 will continue to govern the allocation and apportionment of expenditures for research conducted outside the United States.

In addition, last week during floor consideration of the bill. I indicated my strong objections to provisions contained in both packages to give new tax reductions to the oil industry. These costly incentives to win the support of undecided legislators, in my view, is a dangerous departure from the original mission of Congress and administration to arrive at comprehensive and fair tax revisions. I did not believe and still do not believe that these tax reductions for the oil companies have any place as expensive afterthoughts in a multibillion-dollar tax package. I hope we have the opportunity for an up or down vote on the question.

It had been my hope that the conferees would act responsibly and adopt the less costly Senate provisions pertaining to the oil industry. Unfortunately, the conference committee opted to provide the oil companies with an \$11.8 billion break instead of \$6.6 billion in the Senate bill. The oil industry's influence on the world economy demands that these tax benefits be viewed with special care. If new cuts can be justified, let them stand the test of separate scrutiny by the Congress. Yet, despite this view, the Members of this body have continually been denied a separate vote on this

Furthermore, Madam Speaker, the panel dropped two tax breaks important to the Northeast and Midwest regions of the Nation. These provisions, the wood burning stove credit and a 1year home heating credit would directly aid consumers in meeting rising energy costs. I am extremely disappointed that the conferees agreed to give excessive tax breaks to big oil while denying the average consumer two opportunities for minor tax breaks. I trust this is not symbolic of the attitude toward the Northeast-Midwest region.

Madam Speaker, during the entire consideration of an economic recovery plan I have voiced my concerns over the problems faced by the Northeast and Midwest regions. I feel very strongly about these problems and it is for this reason I felt it is imperative to share my views with the other Members of this body.

Mr. CONABLE. Madam Speaker. will the gentleman yield?

Mr. EDGAR. I yield to the gentleman from New York.

Mr. CONABLE. Madam Speaker. I would like to say on this side that we believe it is a very bad procedure, too, and the idea of bringing it up on suspension was certainly not our idea. The most technical possible objection could be made only to this conference report. We labored long and hard to try to stay within scope and, therefore, it is obvious, to me, that the objection being raised to the conference report has to be in the nature of sour grapes gamesmanship.

Mr. EDGAR. The gentleman has made a point. I think the real point is whether or not we want real tax reduction.

Mr. SHANNON. Madam Speaker, I yield 1 minute to the gentleman from Minnesota (Mr. OBERSTAR).

Mr. OBERSTAR. Madam Speaker, the complaints from the other side of the aisle about debating this motion to suspend the rules being dilatory tactics are certainly without basis. In this body, where we can spend time voting to approve the Journal of yesterday's proceedings, and not spend 1 hour to debate the biggest tax bill in the history of this country, it would certainly be disgraceful not to give a little more than fleeting consideration to the tax bill

This may be the last time this body will be asked to vote both a reduction in the minimum social security benefits and an increase for the biggest oil companies and producers in this country at the same time. There may be another opportunity, when we vote on other social security benefits later this year, and I just wonder if my colleagues will be prepared at that time to vote another tax break for the oil companies so that we can cut social security benefits.

The conferees could have used a little imagination. After cutting the minimum benefit for social security, which would save \$7 billion, they could then have used the balance of \$4 billion to apply to the deficit and reduce the deficit that this big tax bill is going to create, but they did not have even a little bit of imagination. They had to give the whole \$12 billion to the oil interests.

Decontrol was supposed to be the incentive for new production. Well, the oil companies got decontrol, but why do they have to have a reduction in the windfall profits tax? I do not understand this big giveaway to the oil companies.

The conference report eliminates the tax credit for conversion to wood burning stoves, and it eliminates the 4percent home heating oil credit, which would give a scant \$200 maximum to consumers.

Those of you who support this tax bill are going to have a hard time explaining those actions to senior citizens next winter, when their minimum social security benefit has been cut, their fuel oil costs have gone up, and oil company profits reach new record highs.

I am sure the elderly will be overjoyed with this concession to the oil companies.

□ 1330

Mr. SHANNON. Madam Speaker, I yield 1 minute to the gentleman from Connecticut (Mr. Gejdenson).

Mr. GEJDENSON. Madam Speaker, I rise in support of the movement of the gentleman from Massachusetts (Mr. Shannon). I think that we have several jobs here. One of them is to establish some credibility with the people of this country. We have asked them in the budget cuts to date to take considerable losses in the services to the very poorest in our country.

At this point in the game, we have asked our senior citizens to lose their minimum social security benefits. How can we go back to our districts and tell people we cannot afford \$122 a month in minimum social security benefits, we cannot afford legal aid, but we can afford \$12 billion for oil companies?

I think it is the wrong action to take at this time and I hope we remove the additional dollars to the oil companies.

Mr. ROSTENKOWSKI. Madam Speaker, I yield 1 minute to the gentleman from Florida (Mr. GIBBONS).

Mr. GIBBONS. Madam Speaker, first of all, I want to commend the gentleman from Illinois for keeping our feet to the fire, for having a very good conference, and for keeping up with the schedule that had been agreed to by the leadership.

It was difficult and I am sorry that he is getting vilified by those who know so little about what is in this bill. Perhaps if they had a chance to read it and would spend the time, they will understand it a little better.

I would like to ask the gentleman a little something about railroad rolling stock. As the gentleman knows, this came up a number of times during conference and I want to clarify the record a little on it.

Madam Speaker, the conference de-cision on railroad rolling stock modifies existing law and includes a provision which limits the availability of investment credits and cost recovery, where rolling stock of a U.S. person other than a railroad is leased to foreign persons for periods which total more than 12 months in any 24-month period. If this provision is not properly interpreted, it may result in effectively reinstating the rule in existing law which this conference decision was intended to change. I would like to make it clear that this provision is intended to apply only to long-term leases and does not cover situations where such rolling stock is outside United States under temporary arrangements where it is subject to mileage or per diem rentals with United States and foreign users and is present outside the United States for relatively short continuous periods of time. I would like to have the agreement of my chairman on this legislative intent

Mr. ROSTENKOWSKI. I agree that this foreign leasing restriction is not intended to apply to these temporary arrangements.

Mr. GIBBONS. I thank the gentle-

Mr. ROSTENKOWSKI. Madam Speaker, I yield 2 minutes to the gentleman from Texas (Mr. PICKLE).

Mr. PICKLE. Madam Speaker, I thank the gentleman for giving me the right to ask these questions for colloquy purposes.

Would the gentleman from Illinois, the distinguished chairman of the Committee on Ways and Means, provide clarification on a provision in the conference report concerning railroad compensation? As I have read the conference agreement, it is provided in section 743(a) that for the specific cases where compensation is paid in 1 month but would have been payable in a prior or subsequent month but for the fact that the payment date fell on a weekend or holiday, in these cases the payment will be deemed to have been paid in the month earned. The effective date of this amendment is for taxable years beginning after 1981. It is the understanding of the gentleman that this is a purely prospective amendment which casts no inference whatsoever on the purposes or intent of prior law, and should in no way prejudice any right or claim by any party in any administrative or judicial proceeding involving the question of taxable compensation under previous legislation?

Mr. ROSTENKOWSKI. The gentleman from Texas should be advised that it is the understanding of the chairman of the conference committee that this was the specific decision of the conferees.

Mr. PICKLE. I thank the gentleman.

May I ask one question with respect to the dividend reinvestment plan.

Under section 321 of the act, qualified public utilities may offer tax-free dividend reinvestment plans to their shareholders. The shareholders of a qualified public utility would be permitted to exclude from gross income a certain portion of dividends received if they elect to reinvest the dividend in newly issued common stock of the qualified public utility. The bill generally defines qualified public utility as a company, at least 60 percent of whose total acquisitions of tangible section 1245 property during the previous 10 years consists of public utility recovery property which is 10-year property or 15-year public utility property. Under proposed section 168 of the Internal Revenue Code, public utility property is not recovery property unless the utility uses a normalization method of accounting. The normalization requirement is more comprehensive than under present law. In addition, some companies use the flowthrough method which is permitted under present law. Is it the understanding of the gentleman from Illinois that the dividend reinvestment plan definition of public utility recovery property is intended only to mean public utility property with a present class life of more than 18 years, without regard to normalization?

Mr. ROSTENKOWSKI. That is correct. That is my understanding of the provision.

Mr. PICKLE. I thank the chairman.

Mr. SHANNON. Madam Speaker, I yield 1 minute to the gentleman from Massachusetts (Mr. Frank).

Mr. FRANK. Madam Speaker, we have a test vote now. Can reality penetrate the confines of this Chamber? Reality has not been doing too well, but this is the chance. We have had Members compete with each other to say how much they deplore the special tax rates for the oil industry in this bill.

Let us remember the history. The gentleman from New York, who spoke earlier (Mr. Kemp), apparently sees tax relief for the oil industry as a consumer relief measure. Most of the others who have spoken have deplored the need to put them in there.

The gentleman from New York (Mr. CONABLE), said last week he did not like these special oil tax rates, but they got put in by this competitive

bidding process.

Well, the auction is over and if these oil tax breaks remain in the bill, they remain here for one reason, because a majority of the Members of this House want to keep them there. That is reality. There is nowhere to hide. We are offering Members a chance now to vote on whether or not they want to stick with the extra \$6 or \$7 billion of oil tax breaks that the conference put in that it did not have to put in. That is the sole issue and Members who vote to pass this bill and to ignore the effort of the gentleman from Massachusetts are simply voting to keep those extra oil tax breaks in the bill.

Mr. SHANNON. Madam Speaker, I yield 1 minute to the gentleman from

Ohio (Mr. ECKART).

Mr. ECKART. Madam Speaker, let me make the issue very clear for us today. Some of us have protested the giveaway to big oil to pass the tax bill. We cannot now go back to our districts after we leave this Chamber today and say we are opposed to what was done for oil if we vote "yes."

Very simply, this vote today is going to give us the opportunity that many of us said we did not have last week, that we were so troubled about just last week, but had to vote for as part

of a package.

We cannot hide. We cannot run. It is fish or cut bait. Today on this vote you are going to tell your constituents your position on tax giveways to oil companies.

The vote we are asking for this afternoon is going to cling to us like a can of STP, up or down, for or against big oil. A "no" vote makes your position against these giveaways clear.

There are three reasons not to vote with us today: One is Exxon, two is Texaco, and three is Mobil.

Mr. SHANNON. Madam Speaker, I yield 2 minutes to the gentleman from Minnesota (Mr. Sabo).

Mr. SABO. Madam Speaker, I rise in opposition to the motion to suspend the rules and pass the conference committee report for two fundamental reasons.

One, if we defeat this motion it gives us some option to deal with the question of tax breaks for the oil industry. I can think of no industry in the country that less deserves additional tax breaks than the already bloated-with-profits oil industry in this country.

If anything should make us all tremble it is the prospect of oil using their continually growing receipts to buy more and more and more companies, large and small, throughout this coun-

try.

The second reason I rise in opposition is that I fundamentally believe this is one of the worst mistakes this country is ever making in passing this particular bill.

I notice the interest market reacted yesterday already upward, upward, higher interest, for large business, small business, individual people trying to borrow money. We are going to borrow money, pass this tax cut, interest rates will continue to go on and on and on, up and up and up. It is a mistake.

It is breaks to the wealthiest in our society. If you are going to inherit money, you are going to do very well—

very, very well.

It is just a combination of one mistake after another. We have an administration that says they want to learn from the States. So they adopt indexing for the future. It is not simply indexing, it is way, way over indexed.

Mr. CONABLE. Madam Speaker,

will the gentleman yield?

Mr. SABO. I yield to the gentleman from New York.

Mr. CONABLE. I thank the gentleman for yielding.

A lot of reference has been made to big oil doing very well under this bill. I would like to point out that the only issue that affected big oil in the bill was a phasedown in the windfall profits tax on new oil, which was not in conference, and that the provisions which were included in conference had to do only with the exemptions of stripper wells, those that produce less than 10 barrels a day and the royalty owners exemption, which does not affect big oil at all.

Mr. SABO. I thank the gentleman. I think we are making a serious mistake.

Mr. ROSTENKOWSKI. Madam Speaker, I yield 2 minutes to the gentleman from Michigan (Mr. BROD-HEAD)

Mr. BRODHEAD. Madam Speaker, the report of the conference committee provides that beginning in 1985 there will be a 15-percent net interest exclusion—up to \$450 on a single return and \$900 on a joint return. For purposes of this provision, net interest is interest income in excess of interest

expenses other than interest paid on the mortgage of a principal residence or in connection with a trade or business.

In the development of the net income definition, auto loans were inadvertently not included in the types of loans which could create interest expenses which would not reduce the allowable interest exclusion. Clearly, any tax policy which would recognize the need to carve out interest paid on the mortgage of a principal residence would extend equal treatment to a loan which finances the purchase of another American necessity—the family car.

While it is not possible to amend the conference report to correct the tax bill's net interest provisions so as to grant auto loan payments, the same treatment accorded home mortgage payments, I would like to obtain assurances that prior to 1985 the committee will hold hearings on legislation to equalize the treatment of interest costs associated with home mortgages and auto loans.

Mr. ROSTENKOWSKI. Madam Speaker, I believe I can give the gentleman that assurance.

Mr. BRODHEAD. I thank the chairman.

The SPEAKER pro tempore. The gentleman from Illinois (Mr. Rosten-kowski) has 11½ minutes remaining.

Mr. ROSTENKOWSKI. Madam Speaker, I yield 1 minute to the gentleman from California (Mr. Matsui).

Mr. MATSUI. Madam Speaker, the conference agreement provides a special rule disallowing the State legislator election and deduction in the case of a State legislator whose district residence is within 50 miles of the State capitol building.

Is my understanding correct, Madam Speaker, that it is intended that the 50-mile determination be measured by the actual distance on surface routes between the legislator's district residence and the State capitol building?

Mr. ROSTENKOWSKI. The gentleman from California is correct. The 50-mile determination is to be made by measuring the actual distance a legislator would be required to travel by surface transportation between his district residence and the State capitol building.

Mr. MATSUI. I thank the chairman. Mr. ROSTENKOWSKI. Madam Speaker, I yield 1 minute to the gentleman from Tennessee (Mr. Duncan).

Mr. DUNCAN. Madam Speaker, I was one of the conferees along with the gentleman from Illinois (Mr. Rostenkowski), the gentleman from Florida (Mr. Gibbons), the gentleman from Texas (Mr. Pickle), the gentleman from New York (Mr. Rangel), the gentleman from California (Mr. Stark), the gentleman from New York (Mr. Conable), and the gentleman

from Texas (Mr. ARCHER). And from the other body, the gentleman from Kansas (Mr. Dole), the gentleman from Oregon (Mr. Packwood), the gentleman from Delaware (Mr. ROTH), the gentleman from Missouri (Mr. Danforth), the gentleman from Louisiana (Mr. Long), the gentleman from Virginia (Mr. Byrd), and the gentleman from Texas (Mr. Bentsen). And may I say that the decisions we reached in the conference did not come in with haste.

We were in conference about 16 straight hours. Every person whose name I have mentioned unanimously agreed with the conference. They all

signed the conference report.

Because this is a good bill, it is one I am sure the President will sign. The changes are intended to encourage business to modernize and our citizens to save

I will also say big oil was not an issue in the conference. It was for the strippers and the smaller producers of this country.

I urge adoption of the conference

report.

ROSTENKOWSKI. Madam Mr. Speaker, I yield such time as he may consume to the gentleman from Hawaii (Mr. Heftel).

Mr. HEFTEL. Madam Speaker, the provisions in the conference report on the accelerated cost recovery system include a special rule to protect the lease status of certain transactions. This rule provides safe harbor tests, and it also lists factors that are not to prevent an agreement from being treated as a lease. One of these factors is that the property may be sold at the end of the lease at a fixed or determinable price.

It is my understanding that this provision is intended to assure that rental adjustment clauses will not cause leases that meet the safe harbor tests to be treated as sales. Typically, when a lease has a rental adjustment clause, the property is sold at the end of the lease, and a rental adjustment is made upward or downward to reflect any difference between the expected residual value of the property and the actual sale price. Rental adjustment clauses are widely used in the equipment leasing industry. They should not cause leases that meet the safe harbor tests of the special leasing rule in the accelerated cost recovery system to be treated as sales. Is my understanding of this provision correct?

Mr. ROSTENKOWSKI. That is correct.

Mr. HEFTEL. Madam Speaker, I wish to express my regret that the conference report which is currently before this body does not include the provision which would facilitate the establishment of an employee stock ownership plan for the benefit of the employees of Continental Airlines. In my years of public and private endeavor, I have seldom seen a more impressive expression of commitment on the part of any employee group. The benefits in productivity and employee morale of employee stock ownership plans are well known and I heartily support such efforts.

This issue and the determination of the Continental employees will not die with the demise of the DeConcini amendment to the Senate bill. Hopefully the strong, bipartisan support which has been mobilized in both bodies of this Congress will carry the Continental employees to ultimate success.

ROSTENKOWSKI. Mr. Madam Speaker, I yield 1 minute to the gentleman from North Carolina (Mr. MARTIN)

Mr. MARTIN of North Carolina. Madam Speaker, I would like to clarify the intent of the language in section 128(d)(3)(G) of H.R. 4242, The Economic Recovery Tax Act of 1981. This section defines "qualified residential financing," for purpose of investing the proceeds of tax-exempt savings certificates, to include mortgagebacked securities issued or guaranteed by the Federal National Mortgage Association, the Government National Mortgage Association, and the Federal Home Loan Mortgage Corporation. Section 128(d)(3)(G) reads:

The purchase of securities issued or guaranteed by the Federal National Mortgage Association, the Government National Mortgage Association, or the Federal Home Loan Mortgage Corporation, or securities issued by any other person if such securities are secured by mortgages originated by a qualified institution, but only to the extent the amount of such purchases exceeds the amount of sales or such securities by an institution, and * * *

Madam Speaker, it is my understanding that all securities issued or guaranteed by these federally chartered or federally sponsored entities are eligible for purchase by qualified depository institutions with the proceeds of tax-exempt savings certificates whether or not these securities are by mortgages.

Mr. ROSTENKOWSKI. The understanding of the gentleman from North Carolina is correct.

Mr. MARTIN. It is correct? Mr. ROSTENKOWSKI. Yes: it is.

□ 1345

Mr. SHANNON, Madam Speaker, I yield 1 minute to my colleague from Massachusetts (Mr. MARKEY).

Mr. MARKEY. Madam Speaker, I thank the gentleman for yielding. The House has an opportunity today to speak for equity and fairness. We can do so by attacking the massive tax break for oil companies which is included in the conference report. When this package was being voted upon last week, many Members expressed their shock and outrage at this provision which would mean an enormous give-

away to oil producers. Now we have an opportunity to adjust this horrendous injustice and accept the language of the Senate on this provision, which is at least somewhat more palatable than the final conference report.

Madam Speaker, at a time when millions of less affluent Americans are being forced to tighten their belts. what right does the Congress have to bestow this blatant giveaway to an industry that already accounts for more than one-third of all U.S. manufacturing profits? When thousands of Government programs are being slashed. programs which represent the very livelihood of many disadvantaged citizens, we cannot stand idly by and allow the wealthy oilmen to reap such a windfall. If this Congress is to stand for anything positive, it must stand for the interests of all consumers, not merely the more affluent producers.

Madam Speaker, the windfall profits tax was born several years ago in an attempt to disburse somewhat more equitably the huge profits coming to oil producers as a result of rising fuel prices. Today, soaring costs are forcing consumers to spend even greater portions of their income on energy consumption, even while they are using less. Congress must not be so callous to again slap consumers in the face by granting this uneconomical present to oil producers. Madam Speaker, I urge all of my colleagues to take a stand for fairness and decency and reduce this profligate boon to a wealthy industry.

Mr. SHANNON. Madam Speaker, I yield 3 minutes to the gentleman from Maryland (Mr. MITCHELL).

Mr. MITCHELL of Maryland. Madam Speaker, my colleagues, over the past weekend I was beset upon by irate senior citizens in my district who were fearful, afraid of what is going to happen to their security in the future. I tried to assure them that their futures would be safe, and I also tried to assure them that this is a tough time for everyone, but that everyone must make a sacrifice.

I have a letter in my office from 83 women who call themselves "Professional Providers of Day Care." They are out of work because of the cuts we have imposed. I have responded to them, saying that I will try to help them find jobs in the private sector. but I am not at all sure that I can. I could not guarantee it.

But then, in order to try to keep things cool as everyone wants to do, I again told these 83 women that everyone has got to make a sacrifice. I have got more than 2,000 former CETA employees in my district out of work, desperate, not able to find a single job in the private sector. I talked with them and I explained to them that we are going to try to help them, but that we are caught in the reality of a perfidious Gramm-Latta bill, and everyone has got to make a sacrifice.

My question to you is, how in the name of God do I go back to those same people and tell them that they have got to make a sacrifice when we are giving \$12 billion away to the big oil companies? What the heck kind of sacrifice is that? There is no sacrifice for the oil companies. We are deliberconsistently. systematically trying to hurt the poor and the disadvantaged in this Congress, and we are deliberately and systematically and, I think wrongly, operating in terms of protecting the big interests, the interests of the giant corporations.

Twelve billion dollars, just a giveaway, and you try to help me to explain to some people in my district why we cannot find a half million dollars to continue some day care centers. Twelve billion dollars to the giant corporations, and you explain to me how I can justify to my senior citizens why certain feeding programs are going to

Ladies and gentleman of this body, I think this is a disgrace to the Nation. I think it is something that is going to further undermine the credibility of Government. I think it is wrong and cruel and unjust and venal. It is simply giving \$12 billion, giving away on the backs of the poor.

Mr. SHANNON. Madam Speaker, I yield 1 minute to the gentleman from

New York (Mr. Weiss).
Mr. Weiss. Madam Speaker, my colleagues, this year we cut programs for handicapped children and handicapped adults. We have cut feeding programs for young people, children and older citizens. Next year, the Reagan administration and Mr. Stockman, will be trying to cut more and more out of the social programs on which people desperately depend.

We are going to tell them, we are going to tell those people that there is no money, and yet here we are giving \$12 billion away to the people who already are making greater profits than anybody else in our society. What kind of a Congress are we? What kind of a House of Representatives is this? Whom do we represent? Do we represent people or do we represent big oil?

The vote on this suspension will determine that. I urge the Members to vote no on this motion to suspend the

rules.

ROSTENKOWSKI. Madam Speaker, I yield 1 minute to the gentleman from Indiana (Mr. Jacobs).

Mr. JACOBS. Madam Speaker, I thank the gentleman for yielding. I presume, it is not the intent of the conference that the liberalized depreciation sections of this conference report have any windfall effect on reimbursement to hospitals under the medicare program?

Mr. ROSTENKOWSKI. The gentleman is correct. The adoption by the Congress of a new capital cost recovery system could have a significant and unintended effect on medicare expenditures. It is anticipated that the Secretary of HHS will use his present authority to prevent such increased expenditures from occurring, and that he will continue his current practice and reimburse providers based upon useful lives representing the normal operating or service life of an asset. Further, nothing in the conference report is intended to encourage the Secretary to change present medicare regulation with respect to the method of depreciation.

Mr. JACOBS. I thank the gentle-

ROSTENKOWSKI. Madam Mr. Speaker, I yield 2 minutes to the genfrom Pennsylvania (Mr. tleman BAILEY).

Mr. BAILEY of Pennsylvania. Madam Speaker, I thank the gentle-

man very much.

Madam Speaker, during the debate on the respective House bills, one of the things that was discussed was more depreciation advantages and investment tax credit advantages. We were trying to write into the bill. under the leadership of Chairman ROSTENKOWSKI, some so-called distressed industries.

Out of conference comes a leasing provision that I would refer the House to on page 217 of the conference report. I would just like to make a couple of comments in regard to those provisions. They do not and will not be able to efficiently transfer the help that is needed to the respective industries who would even have an opportunity to take under those provisions. Under the definition of section 38. Tangible Personal Property, they only allow for the use of new investments to take advantage under these provisions, which is a retreat from the advantages of investment tax credit provisions in the House bill.

I would make the prediction that most of these industries will not be able to take advantage of them or use them.

Lastly, I would like to end with a sincere thank you to our chairman, Mr. ROSTENKOWSKI, who I think in light of the vote on the House floor has done a yeoman's job of preserving our position.

Mr. MOORE. Madam Speaker, will the gentleman yield?

Mr. BAILEY of Pennsylvania. I yield to the gentleman from Louisiana.

Mr. MOORE. Madam Speaker, the gentleman may be correct. I am not willing to concede that point, but at least the provision applies to all industries and not the gentleman's objectively chosen six

Mr. BAILEY of Pennsylvania. If I can take back my time, I sadly inform the gentleman that the provisions as defined will not only not help those folks that he wanted to help, as it should not have, but it will not help the people of the subject industries for which it was designed.

I thank the Speaker.

The SPEAKER pro tempore. The Chair would like to inform the gentleman from Massachusetts (Mr. Shan-NON) that he has 6 minutes remaining, and the gentleman from Illinois (Mr. ROSTENKOWSKI) has 41/2 minutes re-

Mr. SHANNON. Madam Speaker, I yield 1 minute to the gentleman from New York (Mr. SCHUMER).

Mr. SCHUMER. Madam Speaker, I thank the gentleman for yielding to

I think there can be no better commentary on these provisions, the oil provisions in our bill, than is given by Roget, the maker of the "Thesaurus, under the word "greed":

Greed: Desire; cupidity; avidity; avarice; covetousness; rapacity; greediness.

Madam Speaker, I yield back the balance of my time.

Mr. SHANNON. Madam Speaker. I yield 1 minute to the gentleman from Michigan (Mr. WOLPE).

Mr. WOLPE. Madam Speaker, I thank the gentleman for yielding. I would like to associate myself with the gentleman from Massachusetts, who has been leading this effort to focus attention on one of the greatest instances of abuse within this legislation; namely, the massive giveaway to the oil interests. All of us have constituents who have been saying to us. Mr. Congressman, we are prepared to accept sacrifice. We recognize the need for restraint, the need for everyone to share in the burdens of this program." How, then, can we ask these same constituents to accept that kind of sacrifice when we allow such a gross tax abuse to go unchallenged? Why are only the oil interests exempt from the national appeal for sacrifice and restraint? The oil tax breaks in this bill are only going to undermine the credibility of the entire economic recovery effort the administration is seeking to mobilize. While I intend to support the conference report, I believe it is critical that there first be a separate vote on the oil tax giveaway. I would therefore urge a "no" vote on the rules suspension.

ROSTENKOWSKI. Mr. Madam Speaker, I yield 1 minute to the gentleman from Minnesota (Mr. FRENZEL).

Mr. FRENZEL. Madam Speaker, the bill before the House now is the final version of the Reagan tax proposal. It is the largest tax cut in the history of any nation.

The President's original proposal has been greatly expanded to include a lot of people's favorite stimulus or equity features. Like all tax bills, this one has grown. Each of us can find things in the bill we don't like, or that we would like later or sooner, or more or less. I know I can.

Nevertheless, this expanded final version is true to the economic principles on which the first Reagan proposal was based. It is clearly intended to provide incentives for American people and American businesses to work, save, and invest for tomorrow's jobs and tomorrow's prosperity.

I have reviewed the conference report and found that where there were House and Senate differences, in general the conference managers have given us genuine compromises. I believe the House managers have given us a better bill today than the one passed here last week. They are due thanks for their effective and speedy work.

The individual tax cuts, which proved to be the final battleground in the House, have been described by newly frugal opponents as potential budget busters. The tax cut and especially the individual tax cut with indexing, do involve some risk. They limit Federal revenue, and will put real pressure on Congress to continue with spending reductions. If the budget is not balanced by 1984 we ought to blame the Congress, not the taxpayers.

For too long the American taxpayer has been saddled with the sole responsibility for fiscal responsibility. This bill signals the end of that era. It is a bill of rights for the taxpayers. It finally gives them the permanent protection against inflation and bracket creep they have been denied.

Through indexing the taxpayers are finally getting ample justice. If there is risk here, the major risk involved is the risk that Congress may not persevere in its budget-cutting efforts.

Finally, we are well aware that the sterile tax policies of the past several decades have led nowhere but downhill. The new tax policy we will pass today offers new hope. In my judgment, the Reagan economic program has set our economy on new course which is the right direction. It is no guarantee of prosperity, but it provides a great new opportunity for all of us.

Mr. SHANNON. Madam Speaker, I yield myself the remaining balance of my time.

Well, I started saying that this is an unusual procedure, and I will end by saying that this is an unusual procedure, but it all boils down to one thing; that is oil.

I am a little bit disturbed to hear some of my colleagues suggest that what we are trying to do here is obstruction. We are not trying to obstruct anything. You beat the pants off of us on Gramm-Latta. You beat the pants off of us on 10-5-3. We acknowledge that. You won that. That is going to become the law. There is no question about that.

What I think the American people should know and what I think we all should acknowledge here today is that a vote for this bill—the vote which will be coming up in just a few minutes—is not just a vote for the Nation's economic recovery. It is not just a vote to reduce individual tax rates.

This bill has more to do than with just savings, investment, productivity, and jobs, things that I would hope we would be able to come to a bipartisan consensus on.

The objectionable portion of this bill to most Members of this body is the oil provision, and a vote against this bill under this procedure will be a vote against those oil provisions. Now, I know that my colleagues, many of them on the Republican side, object strenuously to these provisions. I know that they lamented when they had no opportunity when Hance-Conable was considered last week to reject these provisions.

Now is your chance. Let me repeat the procedure. We will have a vote on the suspension of the rules to pass this bill. If it does not receive two-thirds, the conference report will come back and we will have an opportunity to vote against oil, to vote for what the people demanded, to vote to protect the consumers of this country.

Mr. DONNELLY. Madam Speaker, will the gentleman yield?

Mr. SHANNON. I yield to my col-

league from Massachusetts.

Mr. DONNELLY. Madam Speaker, I thank my colleague from Massachusetts for yielding. I join in urging the Members to vote against suspending the rules. I would like to associate myself with his remarks in regard to oil, and additional add-ons that this tax bill has, but there is an overriding question above and beyond add-ons. That is the dollar drain that is going to cause the loss to the Treasury of the United States by minimum conservative estimates of \$750 billion.

As a member of the House Budget Committee, I can only say that in the out years, as we proceed forward to balance the budget, it is going to be a literal impossibility to do that.

Mr. SHANNON. If I could reclaim my time, let me say that I know that the production of oil is as important to the economy in some Members' districts as the price of heating oil is to mine.

□ 1400

They are going to get a break under whatever provision when this bill is passed. But enough is enough. This conference report has gone too far.

Madam Speaker, let us be fair to the American people. Let us vote down the conference report and let us do something that is reasonable for the good of the Nation.

Mr. PURSELL. Madam Speaker, will the gentleman yield?

Mr. SHANNON. I yield to the gentleman from Michigan.

Mr. PURSELL. Madam Speaker, many of us are concerned about those oil provisions. We had 46 Republicans go to the conferees and ask that they accept the Senate provision rather than the large amount that was given by the House.

But I just want to ask the gentleman from Massachusetts (Mr. Shannon) this question: We went before the Rules Committee and asked for a separate rule, we brought it to the floor as a panel, and I would just ask the gentleman how he voted on that particular rule when it came to the floor.

Mr. SHANNON. Madam Speaker, I voted for the rule when it came to the floor. I supported, of course, the Democratic bill that had much less of an oil provision than did Hance-Conable. I know that the gentleman from Michigan (Mr. Pursell) was in the forefront trying to reduce the benefits for oil, and I look forward to the support of those 46 Republican Members about whom he spoke.

Mr. WILSON. Madam Speaker, will the gentleman yield?

Mr. SHANNON. I yield to the gentleman from Texas.

Mr. WILSON. Madam Speaker, the gentleman does acknowledge that there has been a great deal of talk about the conference report and its "outrageous" oil benefits, but is it not true that the conference report has \$5 billion less in benefit than the bill that the House passed by some 48 votes?

Mr. SHANNON. But the House has not yet acted—

Mr. WILSON. I remind the gentleman that that bill passed the House by a substantial vote.

Mr. SHANNON. But no conference report is fairer to the consumers than the Democratic bill.

Mr. WILSON. But the gentleman will acknowledge that our conferees exceeded our expectations?

The SPEAKER pro tempore. The time of the gentleman from Massachusetts (Mr. Shannon) has expired.

Mr. ROSTENKOWSKI. Madam Speaker, I yield 1 minute to the gentleman from Ohio (Mr. Brown).

Mr. BROWN of Ohio. Madam Speaker, in a perceptive line in the 1941 movie "Honky Tonk," Clark Gable, responding with his famous grin to grumbling merchants said, "What do they mean they can't pay any more taxes? Tell 'em to put up the price of beans!"

This quotation set up an interesting stream of economic analysis in this movie of unappreciated brilliance. Clark Gable, a two-bit gambler, gets kicked out of town for cheating. "I'm tired of this," says Gable. "We need the law on our side. We need a town of our own. Let's start a gang." The town is created and with it comes a large bu-

reaucracy to operate it. When the merchants grumble about financing the town's bureaucracy, the famous

quote just cited was given.

The analysis points up the interaction between taxes and prices. Gable knows that beaneaters will pay. They would grumble about the high cost of living all right, but they would probably blame the merchants for it. Actually, it is not the cost of living, the price of beans, that's going up it is the cost to the public sector that climbs.

Taxes and prices mix and mingle as the result of people trying to pass their cost increases along to the next fellow—the theory of diffusion. Up go taxes and up go the price of beans. Beans may not cost any more to grow, they just cost more to buy because each time you buy a pound of beans, you buy a little high living for Gable.

And so it is, the American citizens have been paying for a little high living for Uncle Sam and in the process cost-push, or more accurately taxpush, inflation has been in operation.

Admittedly, this is a simplifed explanation of a great truth. There is actually a pyramid of costs that enters into the final price of a product. But one of the most important—and one often neglected by economists—is the cost of Government, reflected in taxes.

Government, like land, labor, and capital, is a factor of production. Its costs are diffused into all the charges, wages, salaries, and fees of business and labor—added on to union contracts and commercial prices throughout the system. Economist Michael Evans estimates that a 1-percent increase in tax rates will result in a 0.4-percent increase in wage rates directly and a 0.7-percent increase after including the secondary effects of higher wage rates and unit labor costs on prices.

The tax collector is the invisible third party at every bargaining table, driving a wedge between labor and management, forcing firms to pay more while workers get to keep less. It now costs a firm about \$1.67 to give a typical worker a \$1 raise. The same effect drives a wedge between lender and borrower, reducing the incentive to save and raising the cost of investment.

Enter bracket creep. If a worker in a family of four, earning \$25,000, receives no more than a cost-of-living increase over the next 4 years, even at projected reduced rates of inflation, his pay will rise by 35-percent to nearly \$33,700 by 1984. However, under current law his tax burden will rise by 62 percent, from \$2,900 to about \$4,700, an \$1,800 increase. A 35-percent tax increase would have been just over \$1,000. The extra \$800, due to bracket creep, represents a drop in real take-home pay.

Since workers work for after-tax income, that worker is very likely to

go to the firm and demand compensation. But an \$800 raise will not do the job either because that would be taxed too, at the worker's top tax rate. The firm would have to offer more than \$1,000 to compensate a worker in the 32-percent tax bracket for his \$800 loss. If this were an auto worker, such a cost increase would add about \$200 to the price of an American-built car. When payroll and State and local taxes are considered, these figures are substantially worse.

The effect of taxes on labor demands is one of the most important problems a firm faces. Given the prevalence of multiyear contracts, a multiyear tax cut is imperative. Furthermore, the cut must come in the marginal tax rates in the worker's top tax bracket because that is where the cost-of-living increases will be taxed; that is where the issues of mandatory overtime, overtime pay, paid days off and fringe benefits versus straight pay increases will be decided.

If we cheat labor out of its share of the tax cut, if we allow marginal tax rates to continue to soar, we risk rising unit labor cost, strikes, declining productivity and loss of jobs to foreign producers. If we have a 3-year marginal rate reduction in place, one which reduces the spread on incremental pay between the amount paid by the firm and the amount received by the worker, we will influence in a most favorable way the major contracts up for negotiation next year which will set a pattern for much of the economy. We could produce simultaneously the biggest real pay increase and the smallest rise in real unit labor costs in years and begin winding down the inflationary expectations of both labor and management.

On the capital markets side, if we cheat savers out of their marginal rate reductions, we will keep the savings rate flat on the floor, thwart the investment expansion we hope achieve and drive up interest rates for business, homebuyers and Government. This would push the Federal Reserve into printing money and rekindling inflation. If we have a 3-year marginal rate reduction in place, the savings response will be early and decisive, providing ample funds for business investment and Government borwithout any inflationary rowing money creation by the Federal Reserve.

Beginning in 1985, this savings incentive inherent in the marginal rate cuts will be supplemented by an additional savings incentive patterned after legislation I had introduced earlier. By providing a 15-percent exclusion on all interest—up to \$3,000 for individuals, \$6,000 for couples—even more additional saving will be encouraged and the anti-inflationary effect of the tax cut will be strengthened.

Madam Speaker, the arguments I have made today show how a tax cut, if structured properly, can be anti-inflationary, rather than inflationary. This concern that a tax cut must necessarily be inflationary has been expressed by Members on both sides of the aisle. It is a credit to the Members of this body and of the other body that we are today considering a tax cut conference report that will combat, rather than fuel inflation.

We all know that a tax cut can lead to a larger Federal deficit—at least initially. But the important point to remember is that whether a deficit is inflationary depends on the manner in which the deficit is financed.

If it is financed through excessive monetary creation by the Federal Reserve then inflation results—because of the money creation, not because of the deficit per se. But if it is financed through private sector savings, then average prices will remain stable.

Actually there is a whole chain of events that tax cuts can set in motion to reduce inflation.

First, an increase in the aftertax rate of return on personal saving by a reduction in personal income tax rates raises the incentives of individuals to save. This increase in saving leads to lower interest rates, higher investment, and finances the resulting deficit.

Second, a reduction in the effective corporate income tax rate through more liberal depreciation allowances, improves capital spending by increasing the average rate of return.

Third, an increase in both personal and corporate saving leads to greater liquidity, thereby reducing loan demands and lowering upward pressure on interest rates, helping capital spending.

Fourth, a rise in the ratio of investment to GNP leads to higher productivity, which means that more goods and services can be produced per unit of input. As a result, unit costs do not rise as fast and inflation slows.

Fifth, a reduction in personal income tax rates leads to a rise in labor force participation and work effort, thereby increasing the supply of labor necessary to produce more goods and services.

Sixth, as a result of higher maximum capacity, the inflationary pressures of shortages and bottlenecks diminish, thereby reducing the rate of inflation.

Seventh, lower personal income tax rates lead to smaller wage demands, since wage bargaining is based at least in part on the level of aftertax income. This in turn reduces inflation.

Madam Speaker, the action we are about to take with the approval of this conference report will finally give the American people a chance to experience rising living standards and increased job opportunities in a less inflationary climate. I urge the adoption of the conference report.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield 1 minute to the gentleman

from Ohio (Mr. GRADISON).

Mr. GRADISON. Mr. Speaker, earlier in the debate there was a suggestion that the action we take here today may have some bearing upon our ability to pay adequate social security benefits. The comments that were made earlier may strike fear in the hearts of the aged, but they certainly do not represent the facts.

The social security fund is separate from the general fund of the Treasury. It is financed solely with social security taxes. Fortunately, Congress has had the good sense not to use general revenues for that purpose.

Therefore, I think it is urgent to make the point, and make it as clearly as possible, that the elderly are not affected either way by whatever decision we make here today. That is a separate fund. It is funded by social security taxes, and our next great order of business, after we complete action on this tax bill, is to take action in the months ahead to assure that those who are receiving social security benefits today can count on receiving them in the future.

Mr. Speaker, I repeat, nothing we do today affects the ultimate financial strength of the social security system.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield my remaining time to the gentleman from Texas (Mr. Pickle).

The SPEAKER. The gentleman from Texas (Mr. Pickle) is recognized for 1½ minutes.

Mr. PICKLE. Mr. Speaker, the assertion has been made over and over that this is relief for "big oil." No one has pointed out how it is relief to big oil.

That simply is not the case—\$5 billion of this money goes to royalty owners, for example, those people who own an interest in family property. Almost \$3 billion of this goes to independent strippers, not to big oil.

The only way big oil comes into the issue is through the fact that the rate is reduced from 30 percent to 15 percent on newly discovered oil, and newly discovered oil is nearly always generated by independent producers. So the assertion that this is just for

big oil is simply not the case.

There are other items in this tax bill that cost more than the one for newly discovered oil. For example the gentleman from Massachusetts and I together sponsored an amendment that calls for approximately \$4 billion just for research and development, and it is a very good provision.

Mr. Speaker, it is easy for the Members to single out big oil as the big winners in this bill, but that just is not

a truthful statement.

Mr. ARCHER. Mr. Speaker, will the gentleman yield?

Mr. PICKLE. I yield to the gentle-

Mr. ARCHER. Mr. Speaker, the gentleman from Texas (Mr. Pickle) is absolutely correct. The independent producers discover over 80 percent of all the new oil, by actual survey and record.

That part of the bill was not in conference anyhow. We could not have changed any of the provisions on newly discovered oil. This is the same rhetoric we have heard over the years. Back during the embargo years we heard the same type of rhetoric, and it is just not true.

Mr. CONABLE. Mr. Speaker, will

the gentleman yield?

Mr. PICKLE. I yield to the gentleman from New York.

Mr. CONABLE. Mr. Speaker, I thank the gentleman for yielding.

I would just like to say that I consider this whole operation to be nothing but mischievous. It cannot result in overturning the final decision of the House, and I hope the Members do not try to do that.

The SPEAKER. The time of the gentleman from Texas (Mr. Pickle)

has expired.

• Mr. KEMP. Mr. Speaker, it is hard to overestimate the importance of this tax bill, or its historic significance. For the first time in more than 17 years, Congress is voting to lower, not raise, the tax rates on every working, saving,

and enterprising American.

I think it is important to remember why we are doing this. Too many of us view this as a measure to deprive the Government of revenue. I do not. I proposed an across-the-board cut in income tax rates 5 years ago, and have worked to enact it, for very different reasons: First, to restore the link between effort and reward in our society; and second, to help the Government finally balance its books—not to throw them further awry—by reducing the need for Federal spending.

During the past decade, the aggregate tax burden on all Americans more than tripled, while the cost of everything else doubled. And yet we experienced ever-larger, not smaller, Federal deficits. I am convinced that this was due in large part to the impact of a contracting economy on the Federal

budget.

Rising tax rates diminished the tax base, so that, staggering as it was, the rise in revenues fell behind the rise in tax rates. At the same time, rising unemployment among our people triggered ever-greater demand for Federal spending programs.

High income tax rates simply create a demand for higher Federal spending. They are a destabilizing influence. Normally, people use their incomes on worthwhile projects, such as capital formation, charity, support of education, science, the arts, and so on. But when tax rates are raised, these func-

tions can no longer be supported to the same degree. Since our society cannot function without these services, there is a sudden demand for more Federal spending on charity, education, research, the arts, capital formation, and so on.

For this crucial reason, further taxrate reduction will be necessary if we are to succeed in relieving the pressure and the need for continued high levels of government spending. In particular, I believe that the maximum tax rate on income should be no higher than 25 percent. Experience shows that any higher tax rate not only deprives our society of the graces of civilization, but also tends to be counterproductive of revenue.

I am convinced, as was President Kennedy, that cutting income tax rates across the board will help to balance the budget. We have heard a lot of figures thrown around about the supposed revenue cost of this tax bill. Somebody figured out that the official revenue-loss estimates for the next umpteen years total \$750 billion. The history of tax cutting shows that such figures are empty of meaning.

By the same sort of calculation, which was actually performed by the Treasury, the Kennedy tax cuts should have cost the Treasury \$89 billion from 1962 to 1968. Yet revenue increased in absolute terms by more than \$54 billion. Several empirical studies have shown that by 1966, income tax revenues were higher than they would have been without the cuts in income tax rates of 1964 and 1965.

Low tax rates are also crucial, I believe, in helping to solve our problems of burdensome debt and high interest rates. As a nation, we are in hock up to our ears. Cutting tax rates will help everyone to pay off their debts out of higher incomes. At the same time, it will have a beneficial effect on interest rates and certain tax deductions.

As we all know, the cost of interest is tax deductible when you borrow, but the same interest is fully taxable when you lend. The higher the tax rates, the more aftertax incentive there is to borrow, and the less aftertax incentive there is to save. This unquestionably leads to higher interest rates. And the higher interest rates cause larger revenue losses due to the tax deduction. Cutting tax rates will help reduce pressure on the Treasury and on interest rates in this respect.

For all of these reasons, I would like to reaffirm my support for two goals which I believe must go hand in hand: Further tax-rate reduction, and balance of the Federal budget, without which there can be no lasting financial, monetary, or social order.

Finally, I would like to take this opportunity to thank the distinguished ranking member on the Ways and Means Committee, Mr. Conable, for his leadership and friendship during the long process of hammering out the tax bill. Without his able leadership, this victory for the American people would not have been possible.

• Mrs. SCHNEIDER. Mr. Speaker, I rise in support of the conference report to accompany the Tax Reduction Act of 1981, with reservations. My reservations relate to the oil provisions.

While the positive aspects of this bill far outweigh the negative portions, and are vitally necessary to get this country moving again, we can hardly ask the elderly poor of this country to give up their \$122 minimum social security benefit while giving the oil producers of this country, who are hardly hurting, nearly \$12 billion in relief.

Further, I am seriously disappointed at the action of the conferees in deleting a woodburning stove tax credit and a home heating oil credit. These token efforts were the very least we could do for those who feel the pain of energy prices the most—individual taxpayers.

Nevertheless, I plan to vote for adoption because of the positive aspects of the bill—individual tax relief, charitable deductions, capital depreciation, and incentives to business to recapitalize and get our country moving again. It is my sincere hope that this Congress will be able, in the foreseeable future, to correct those very obvious shortcomings still in an otherwise positive piece of legislation.

• Mr. PURSELL. Mr. Speaker, I want to indicate my support for the historic tax bill now before us. It is an essential ingredient of a long-range program offering real hope for reviving our economy, restoring incentive, creating jobs, and assuring that our people keep more of their own earn-

The bill provides permanent tax reductions for every individual taxpayer, putting an end to insidious tax increases through inflation, while extending a variety of business tax revisions particuarly beneficial to small business—the backbone of our economy.

At the same time, I, once again, would like to register my strong opposition to the oil provisions of this legislation. While this section does not, in my view, overshadow the bill's numerous positive contributions, it does merit deep concern about significant future revenue losses, which will not result in commensurate increases in energy production.

Needless to say, the oil related agreements reached in conference are preferable to the original Housepassed provisions. However, they still represent a significant flaw in an otherwise worthy bill, for a number of reasons, including the fact that—

First, Congress has given the oil industry deregulation as an incentive for exploration and production; Second, the impact of the windfall profits tax cannot yet be adequately measured and adjustments in the tax may be premature;

Third, the industry stands to benefit from the general business tax reductions in the bill; and

Fourth, we do not have adequate assurances that the new tax breaks for oil will end up in the hands of those who may need additional production incentives.

Since 1972, the aftertax profits of major oil companies has quintupled, and while the price of oil has increased 600 percent the general cost of living has risen 177 percent. In the last 2 years alone, the rising price of oil has increased revenue from stripper wells by 21/2 times. Too many so-called incentives for such operations could result in actual disincentives, by encouraging producers to hold production to less than the maximum level required to maintain eligibility for tax preferences affecting low volume

For these reasons, I have been working with other Members to alter the oil provisions in the tax bill at each stage of the legislative process. I continue to speak out against these provisions, while looking to the future with enthusiastic anticipation of the results of our efforts with respect to the overall thrust of this historic legislation. · Mr. WAMPLER. Mr. Speaker, I welcome this opportunity to speak on behalf of and vote for the administration-backed conference report on the Tax Incentive Act of 1981. The Senate adopted this conference report by an overwhelming margin yesterday.

This represents another step in the administration's attack on inflation, high-interest rates, and sluggish economy. It is one of two centerpieces of President Reagan's economic recovery program—the omnibus budget reconciliation bill is the other. The measure provides a 25-percent cutback in individual income tax rates phased in over 33 months. Businesses are allowed to depreciate investment costs at a faster rate and individuals are given much needed tax relief.

Farmers will be particularly pleased with changes that were made in estate and gift tax rules. The unified credit, which is an estate and gift tax exclusive, was expanded from \$175,000 to \$600,000. The top tax rate on cumulative estate and gift transfers was lowered from 70 to 50 percent. Special rules concerning current use valuation of farmland have been relaxed.

New provisions were adopted pertaining to tax treatment of straddle transactions in commodity futures markets. The rules require investors to make an accounting of all losses and gains resulting from straddle transactions at the end of each year and pay taxes on them. In an effort to offset the stricter rules, the maximum tax rate on all commodity futures profits was reduced from 70 to 32 percent. Hopefully, these new provisions will close the loopholes that are claimed to currently exist while at the same time not hindering the function of futures markets of stabilizing the prices of agricultural commodities. I believe the House position on commodity tax straddles was perhaps better than the Senate's but apparently the House conferees had to recede on these provisions.

In any case, the tax reductions and modifications will I believe, provide the proper incentives and lead to a more stable economy. The economy is suffering under current conditions and I believe something new must be tried to get this country and its economy moving again, improving employment, et cetera.

Last week the Congress approved a budget bill with cuts that will total more than \$130 billion in Federal spending for fiscal years 1981 through 1984. The administration has from the beginning felt that it was imperative that limitations in spending coupled with regulatory reform were necessary to control inflation. With less spending, the Federal Government is not competing for money in the private sector and, in turn, forcing higher interest rates. On the other hand, tax relief for businesses and individuals will hopefully generate the increased savings rate and capital investment that are needed to get American industry back on its feet. High employment-providing opportunities for jobs rather than social programs for many Americans-reduced inflation and a return to moderate interest rates will, am hopeful, be generated by the President's economic recovery pro-

The administration continues to support the Federal Reserve Board's position on a slow growth of the money supply. As long as money grows faster than output, prices and interest rates rise and inflation results.

Thus, the budget cuts, tax cuts which will lessen disincentives, regulatory reform and a slow and stable growth of money appear to be the proper tools to counteract our serious inflation and high interest rates.

It will take time before appreciable gains can be measured. But it is important to remember that it took a long time to put us in the economic straits we currently face. But let us start. Let us lay out a plan for recovery that is reasonable and possible of attainment. The American people endorse such a course and I urge my colleagues to vote for this measure as an integral part of the President's plan.

• Mr. EVANS of Delaware. Mr. Speaker, I rise in support of the conference report on the bipartisan tax cut pro-

posal which has been endorsed by President Reagan.

I am pleased that Members of Congress on both sides of the aisle finally appear to recognize that a stagnating economy with declining productivity and a deteriorating industrial base has a harmful impact on the welfare of every citizen in this country. President Kennedy was absolutely correct nearly 20 years ago in pointing out that "a rising tide lifts all boats." In this simple phrase he recognized that an expanding and innovative economy provides great benefits to everyone and, in particular, serves the interests of the disadvantaged in our society.

of the disadvantaged in our society.

However, there is no possibility of enjoying the benefits of a "rising tide" of economic activity unless our confiscatory taxes on all types of income are drastically reduced. The policies of the last several decades have created an impossible situation. We now have high unemployment and soaring prices both at the same time and for a long time. We desperately need to implement a policy which will allow the American economy to expand without the distressing rate of inflation which has plagued us for so many years.

President Reagan's program for economic recovery is designed to stimulate real growth without inflation by encouraging everyone to work harder and to keep more of the money they earn. By encouraging individual initiative, the new surge of economic activity which will result from the passage of this tax cut will benefit the entire Nation.

Mr. Speaker, I would like to take a moment to discuss the major differences between the President's plan and the proposal which was originally submitted by the House leadership. During the last few weeks, a great deal of public attention has been focused on the claim that the tax cuts for some individuals are larger in the early years of the Ways and Means Committee bill than under the President's bipartisan proposal. Unfortunately, these assertions come from comparing the whole 2-year, 15-percent Ways and Means bill with only a part of the President's bill. Because of its third year of a guaranteed reduction in the tax rates, President Reagan's bill gives taxpayers in the \$15,000 to \$50,000 middle-income range a bigger tax cut than has been claimed by many of President Rea-gan's opponents. These claims were patently false. While the House leadership's proposal did provide a few more dollars in tax relief over the short run-a mere \$22 for a family earning \$15,000-this temporary tax relief will be wiped out as the higher tax rates called for under their bill from 1984 onward siphoned off more and more of working people's wages.

This fact highlights a fundamental difference between the two proposals

which were under consideration. The President's plan represents a real tax cut while the plan of the House leadership would have allowed taxes to continue to increase. Given the fact that tax rate reductions of more than 22 percent are needed merely to offset the tax increases facing the American people over the next 3 years, the 2-year tax cut of 15 percent proposed by the House leadership was no tax cut at all. The full 25-percent tax cut proposed by President Reagan is essential to provide a real tax cut to working Americans.

Over the last 10 years, the House leadership has given the American people five so-called tax cuts. Yet over the same 10 years, taxes have increased by more than \$400 billion. I believe the American people are tired of the phony promises which have been made in the past. Under the committee bill, individuals in almost every tax bracket would have paid higher taxes in 1984 than in 1980. The bipartisan substitute, however, will allow individual taxpayers at virtually every income level to receive greater tax relief.

Mr. Speaker, I also believe that the length of the tax cut is vital to producing significant supply-side effects in our economy. One of the principal purposes of a guaranteed third-year tax reduction is to assure all individuals of the certainty that their returns from increased savings and investments will be taxed at a lower rate.

Individuals must be able to act with a great deal of certainty that tax rates will keep going down if they are to undertake the risky, long-term investments which are needed to create jobs and boost productivity. Businesses require the assurance of a stable and predictable economic environment in order to make sizable investments in new plants and equipment. Unfortunately, Government tax and spending plans have often represented the greatest destabilizing force on personal and business decisions. By promising a 3-year tax reduction, the Reagan tax cut will go a long way toward confirming a favorable economic climate.

If the effort to limit the tax reduction program to 1 or 2 years had been successful, it would have been a major victory in the big spenders' effort to avoid the fundamental change in the direction of national policy which is so essential to start the process of economic revitalization. Any tax cut which is shorter than 3 years would not be enough to provide the proper mix of incentives for additional work, saving, and investment which are so desperately needed to get the country moving again.

Other features of the tax proposal endorsed by President Reagan are included in this conference report. I have consistently supported a reduction in the marriage penalty, tax relief

for Americans working overseas, a deduction for taxpayers who make charitable contributions and do not itemize their returns, and an increase in the credit on the estate tax which will help small businesses and farmers. These provisions of the conference report represent sound and constructive improvements in our country's overall tax structure.

Mr. Speaker, many leading economists have concluded that the adoption of the Reagan administration's tax proposals will lead to rapid and sustained economic growth by increasing the incentives in the private sector. The reductions in marginal individual income tax rates will encourage personal savings, reduce the understandable resentment in all classes in American society toward our unfair tax rates, and lower the tax burden on small unincorporated businesses. The accelerated capital cost recovery schedule in the President's bill will promote higher levels of investment to replace our outmoded industrial base. provide thousands of additional jobs for our workers, and give a real boost to our sagging productivity perform-

I agree with others who have pointed out that the choice between the House was whether we would continue to use tax policy as an instrument of income redistribution or as an instrument of economic growth and opportunity. This tax cut is an absolutely essential part of the Reagan administration's effort to return greater decisionmaking powers to the American people. Public revulsion against the total tax burden, the size of the Federal Government, and continued inflationary deficits all came to a head in the 1980 election.

We have responsibility to respond to the overwhelming desire of the American people to lower the stifling tax burden and drastically reduce unnecessary and wasteful Government expenditures. By providing major tax reductions for both individuals and business, the Congress can demonstrate its intention to do its part in implementing the tax-related component of President Reagan's comprehensive program to revitalize the American economy.

I urge my colleagues to adopt the conference report on the bipartisan tax reduction proposal which has been endorsed by President Reagan.

• Mr. FOGLIETTA. Mr. Speaker, I wish to take this opportunity to express on the record my reasons for voting in favor of the Tax Incentive Act of 1981 on final passage.

I firmly believe that taxpayers, particularly those with incomes below \$50,000, need and deserve some meaningful relief. These low and moderate income households have suffered the most from inflation. They have also

been the hardest hit by recent increases in social security taxes, as well as "bracket creep," which disproportionately increases their Federal income tax burden when they receive wage increases to compensate for inflation. I also endorse tax relief for business, particularly small businesses which provide most of the new jobs in our economy, and are most directly affected by the present exorbitant interest rates.

When President Reagan initially proposed his tax relief program, I had serious misgivings about the size of the tax cuts, which most economists criticized as inflationary. However, I respected the President's determination to support a clean bill, which would be limited to the specific tax reductions he endorsed in his campaign

platform.

As discussion of the tax reduction legislation proceeded, the President moderated his proposal from a 30-percent to a 25-percent individual tax cut, and delayed the phase in for the reductions. The Democrats in the Ways and Means Committee responded by supporting the concept of an alternative which was modeled upon the President's plan, but provided greater tax relief for families with incomes under \$50,000, reduced the marriage penalty, and made the third year reduction contingent on the state of the

economy.

If the issue had been presented to the House in this form, we would have had a clear choice between a Democratic bill which would have concentrated tax relief upon the low and moderate income families most affected by tax inflation; and an administration proposal which justified a greater tax break for the wealthy on the basis of its "supply side" effect. Given this choice, I would have supported the Democratic proposal, but I could also respect the motivation of those who supported the President's tax package.

Unfortunately, we were not presented with such a choice. By the time the tax package reached the House floor both sides had engaged in a bidding war for votes which led to the inclusion of exorbitant and unjustified tax breaks for virtually every special interest with significant support in Congress. I was particularly appalled by the exemptions from the windfall profit tax and other tax breaks for the oil industry. While the administration proposal outdid the Democratic version in this regard, both gave away billions of dollars in tax revenue with no justification beyond winning the votes necessary for passage of their plan.

necessary for passage of their plan.

I voted in favor of a rule which would have given the Members of the House an opportunity to delete the tax breaks for the oil industry and other special interests from the tax legislation. Unfortunately, this rule was defeated. I also voted in favor of

the Obey-Udall substitute, which did not include the accommodations to special interests, such as the oil industry, and would have enacted a single tax reduction in 1982, leaving it to Congress to consider whether economic conditions warranted further tax reductions in future years. This alternative was also defeated. I voted against administration's tax proposal when it was offered as a substitute to the version reported out by the Ways and Means Committee. When this substitute was adopted. I also voted in favor of Representative Jeffords' motion to recommit. Once this motion was defeated, the only tax reduction legislation which had an opportunity of passing was the administration's proposal. Although the bill included the exemptions from the windfall profit tax and other accommodations to special interests which I still find distasteful, I felt that my previous actions had made my objections clear in this regard. I voted in favor of the proposal on final passage, only because to do otherwise would have required voting against any tax relief.

• Mr. REUSS. Mr. Speaker, there are many reasons to oppose the 1981 Tax Act, but none more important than that it completes a radical redistribution of income in this country away from moderate-income people to the top 10 percent. This sad process, started by the Reagan administration's budget and monetary policies, is now complete.

Despite much hokum about releasing people's incentives to work and reindustrializing America, redistributing income toward the top is what this bill is all about.

The individual income tax is restructured so as to give 35 percent of its benefits to the top 5 percent of income receivers, those currently making more than \$50,000 a year. Moderate-income taxpayers, when you count in scheduled increases in the payroll tax and inflationary bracket creep, benefit hardly at all. And a host of loopholes, added to existing ones, makes the Robin-Hood-in-reverse redistribution effect even more pronounced.

The corporate income tax comes close to being abolished.

Estate and gift taxes will likewise effectively be done away with. Under the guise of helping farmers and small businessmen, the taxes of the estates of the top tax bracket, the very wealthy, are being cut from 70 to 50 percent. A \$25 million estate will thus achieve a \$4 million tax saving. And the annual gift tax exemption is being increased from \$3,000 to \$10,000, far beyond anything needed to compensate for recent inflation.

The startling loss of Federal revenue—some \$750 billion over 5 years—will mean that today's tax cutters will shortly be wanting to take even fiercer bites out of essential programs, includ-

ing social security. It will mean that regressive taxes—State and local sales and property taxes, and possible Federal sales and value added taxes—will add to the burden of the middle class.

Some of the spinoff effects of the tax bill will cause further grief to average Americans. To collect enough votes, the administration entered into unseemly contracts with groups such as the sugar lobby and the peanut lobby. Higher prices to the consumer for peanut butter and sugar lie ahead.

I have previously discussed the possible income redistribution effects of the Reagan program in my speech, "Inequality, Here We Come"—Congressional Record for June 18, 1981, on page 13009. The effects on middleclass America of the budget cuts and tight money policies are there explored at length. Now we have the reality of a tax law, in a dosage considerably worse than anything we could have expected a month ago.

I am sad about today's vote—sad for the future of our country, and for the future of my party, the Democrats. For we have permitted ourselves to depart from the principles that have formed our party's proud traditions.

So many sweeteners have been piled on the tax bill that the confection is simply too rich. It is not the rich that the Democratic Party represents. We do not stand for reductions in the windfall profit tax, nor new loopholes for oil producers, nor solicitude for the heirs of massive estates. And we should not stand for the crass political bargaining that gave them birth.

The President was not wrong when he charged that the Democrats were out to produce a political victory. Let us admit that to ourselves. And had we won, our success would have been hollow. As I long ago suggested, we should have been content simply to have entertained an up-or-down vote on the original Kemp-Roth tax cut, presented our own clear alternative, and, whatever the result, at least have had the satisfaction that our own intellectual and political integrity remained intact.

Let us now profit from our experience. Rather than trying with increasing desperation to salvage minor victories at the cost of surrendering principle, let us concentrate on restating principle with increasing clarity and force.

For even if we may lose votes here and votes there while Reaganism remains in fashion, it will not remain in fashion forever. Once people see its results, in the end we will be the stronger for having stuck to our guns, and having made clear to an otherwise disillusioned public that at least one party remains that keeps faith with itself, its voters, and the Nation's ideals.

The SPEAKER pro tempore. All time has expired.

The question is, will the House suspend the rules and agree to the conference report on H.R. 4242?

Mr. WALKER, Mr. Speaker, I have a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. WALKER. Mr. Speaker, we have had a lot of discussion here. The vote we are about to take occurs on the question of the conference report on tax cuts and has nothing to do with the separate oil provision; is that correct?

The SPEAKER. The Chair will state that the gentleman has not stated a parliamentary inquiry.

The question is on the motion offered by the gentleman from Illinois (Mr. Rostenkowski) that the House suspend the rules and agree to the conference report on the bill, H.R. 4242

The question was taken.

Mr. SHANNON. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were-yeas 282, nays 95, not voting 57, as follows:

□ 1415

The Clerk announced the following

On this vote:

Mr. Young of Missouri and Mr. Biaggi for, with Mr. Richmond against.

Mr. Gephardt and Mr. Santini for, with Mr. Moffett against.

Mr. Huckaby and Mr. Gramm for, with Mr. Vento against.

Mr. Bereuter and Mr. Dornan of California for, with Mr. Waxman against.

Mr. Dannemeyer and Mr. Lungren for, with Mr. Reuss against

Mr. Solomon and Mr. Rhodes for, with Mr. Ford of Tennessee against.

Mr. Rousselot and Mr. Taylor for, with Mr. Ford of Michigan against.

Mr. Horton and Mr. Gregg for, with Mr. Garcia against.

Until further notice:

Mr. Leland with Mr. Pritchard.

Mr. Jones of North Carolina with Mr. Parris.

Mr. Simon with Mr. Mitchell of New York.

Mr. Pease with Mr. Green.

Mr. Atkinson with Mr. McCloskey. Mr. Phillip Burton with Mr. Roth.

Edwards of California with Mr. Vander Jagt.

Mr. Fascell with Mr. Philip M. Crane. Mr. Synar with Mr. Daniel B. Crane.

Mr. Jenkins with Mr. Derwinski. Mr. Aspin with Mr. Mattox.

Mr. Fithian with Mr. Lundine. Mr. Fowler with Mr. Frost. Mr. Weaver with Mr. Leath of Texas.

Mr. Anderson with Mr. Dougherty.

Mr. YATRON changed his vote from "yea" to "nay."

Mr. PEPPER and Mr. HOYER changed their vote from "nay" to "yea."

So (two-thirds having voted in favor thereof) the rules were suspended and the conference report was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

OF DIRECTING CLERK THE HOUSE OF REPRESENTATIVES MAKE CORRECTIONS ENROLLMENT OF H.R. 4242

Mr. ROSTENKOWSKI. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate concurrent resolution (S. Con. Res. 30) directing the Clerk of the House of Representatives to make corrections in the enrollment of H.R. 4242, and ask for its immediate consideration.

The Clerk read the title of the Senate concurrent resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The Clerk read the Senate concurrent resolution as follows:

S. CON. RES. 30

Resolved by the Senate (the House of Representatives concurring). That in the enrollment of the bill (H.R. 4242), to amend the Internal Revenue Code of 1954 to encourage economic growth through reductions in individual income tax rates, the expensing of depreciable property, incentives for small businesses, and incentives for savings, and for other purposes, the Clerk of the House of Representatives shall make the following

(1) In the table of contents, in the item relating to section 102, strike out ", decrease

in holding period"

(2) In the table of contents, in the item relating to section 601, strike out "\$22,500" and insert in lieu thereof "\$2,500"

(3) In the table of contents, after the item relating to section 823, insert the following: Subtitle D-Other Provisions

Sec. 831. Technical amendments relating to dispositions of investment in United States real property.

Sec. 832. Modification of foreign investment company provisions.

(4) In the section heading to section 102 of the bill, strike out ", decrease in holding

(5) In section 209(c)(1)(B) of the bill, strike out "subparagraph (B)" and insert in lieu thereof "subparagraph (B)(i)"

(6) In paragraph (2) of section 313(b) of the bill, strike out "Sections 219(c)(2)" and insert in lieu thereof "Sections 219(d)(2) (as amended by section 311(a) of this Act)

(7) In section 305(e)(3)(A) of the Internal Revenue Code of 1954, as added by section 321(a) of the bill, strike out "tangible per-sonal depreciable property" and insert in lieu thereof "tangible property described in section 1245(a)(3) (other than subparagraphs (C) and (D) thereof)".

In subparagraph (B) of section 2032A(e)(7) of the Internal Revenue Code of 1954, as added by section 421(f)(1) of the

bill-

(A) strike out "average net share rental" each place it appears and insert in lieu thereof "average annual net share rental"

(B) strike out "average gross cash rental" and insert in lieu thereof "average annual

gross cash rental" (9) In paragraph (5) of section 509(a), strike out "section 6601(b)" and insert in lieu thereof "section 6601".

(10) Amend the title so as to read: "An Act to amend the Internal Revenue Code of 1954 to encourage economic growth through reduction of the tax rates for individual taxpayers, acceleration of capital cost recovery of investment in plant, equipment, and real property, and incentives for savings, and for other purposes."

Mr. ROSTENKOWSKI. Mr. Speaker, Senate Concurrent Resolution 30 directs the Clerk of the House of Representatives to make 10 technical corrections in the enrollment of H.R. 4242, the Economic Recovery Tax Act of 1981, just passed by the House. Specifically, the resolution directs the Clerk of the House to make technical corrections in the table of contents, section headings, cross references, and in the title of the bill. I assure the House that the resolution merely corrects technical problems of omissions of a minor nature and does not in any way involve substantive changes to the legislation just passed.

I urge the House to approve Senate Concurrent Resolution 30.

The Senate concurrent resolution was concurred in. A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. ROSTENKOWSKI, Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the conference report to H.R. 4242, the Economic Recovery Act

The SPEAKER. Is there objection to the request of the gentleman from

Illinois?

There was no objection.

APPOINTMENT AS MEMBERS OF DELEGATION TO ATTEND CON-OF FERENCE INTERPARLIA-MENTARY UNION IN CUBA

The SPEAKER. Pursuant to the provisions of title 22, United States Code, section 276a-1, as amended by Public Law 95-45, the Chair appoints as members of the delegation to attend the Conference of the Interparliamentary Union to be held in Havana, Cuba, September 15, through 23, 1981, the following Members on the part of the House: Mr. DE LA GARZA of Texas, chairman; Mr. DERWINSKI of Illinois, vice chairman; Mr. BIAGGI of New York: Mr. Danielson of California; Mr. Bowen of Mississippi; Mr. Levitas of Georgia; Mr. Lantos of California; Mr. Won Pat of Guam; Mr. McClory of Illinois; Mr. Erlenborn of Illinois; Mr. Butler of Virginia; and Mr. ERDAHL of Minnesota.

AUTHORIZING SPEAKER TO ACCEPT RESIGNATIONS AND APPOINT COMMISSIONS. BOARDS, AND COMMITTEES AUTHORIZED BY LAW OR BY THE HOUSE, NOTWITHSTAND-ING ADJOURNMENT

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that, notwithstanding any adjournment of the House until Wednesday, September 9, 1981. The Speaker be authorized to accept resignations, and to appoint commissions, boards, and committees authorized by law or by the House.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

DISPENSING WITH CALENDAR WEDNESDAY BUSINESS ON WEDNESDAY, SEPTEMBER 1981

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that the business in order under the Calendar Wednesday rule shall be dispensed with on Wednesday, September 9, 1981.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

Mr. WALKER. Mr. Speaker, reserving the right to object, I reserve the right to object, and do not intend to object, but I do so to ask the distinguished majority leader whether or not the Members are going to have some idea of a calendar before we go home before our return.

The SPEAKER. The Chair thought that was the prerogative of the minor-

ity leader.

Mr. WALKER. I will be very happy to yield to the minority leader, Mr. Speaker.

The SPEAKER. The minority leader was standing and the Chair would

have recognized him.

Mr. WALKER. I simply reserved the right. The Chair had a point of business on the floor, and I think it is the prerogative of the gentleman from Pennsylvania to reserve the right to object.

Mr. WRIGHT. Mr. Speaker, will the gentleman yield?

Mr. WALKER. I yield to the distinguished majority leader.

Mr. WRIGHT. The answer is yes. We have an idea what the order of business will be. Primarily we will go back to the State-Justice appropriation, as I was prepared to respond to distinguished minority leader. Thereafter we will pursue appropriations bills until they are completed. That will be our priority business.

Mr. WALKER. Further reserving the right to object, we can expect then, votes on the first day back on. for instance, the State-Justice appro-

priation bill?

Mr. WRIGHT. If the gentleman will yield further, I would think Members would be well advised to be back on the day appointed, on the 9th of September, Wednesday, September 9.

Mr. WALKER. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. For the gentleman's information, there are four reported appropriation bills ready for the calendar including the one we are debating when we come back, and that will be the schedule for the remaining time.

Is there objection to the request of the gentleman from Texas?

There was no objection.

ADJOURNMENT OF SENATE FROM AUGUST 3, 1981, TO SEP-TEMBER 9, 1981 JOURNMENT OF FROM AUGUST 4, 1981, TO SEP-**TEMBER 9, 1981**

The SPEAKER laid before the House the privileged Senate concurrent resolution (S. Con. Res. 27), providing for adjournment of the Senate from August 3, 1981, until September 9, 1981, and adjournment of the House from August 4, 1981, until September 9, 1981.

The Clerk read the Senate concurrent resolution, as follows:

S. CON. RES. 27

Resolved by the Senate (the House of Representatives concurring), That when the Senate adjourns on Monday, August 3, 1981, it stand adjourned until 12:00 o'clock noon on Wednesday, September 9, 1981, and that when the House adjourns on Tuesday, August 4, 1981, it stand adjourned until 12:00 o'clock noon on Wednesday, September 9, 1981.

The Senate concurrent resolution was concurred in.

A motion to reconsider was laid on the table.

□ 1430

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. The Chair wishes to extend to all Members in the Chamber a happy, healthy, and successful work period and vacation at home.

RESOLUTION ON MIDDLE EAST PEACE

(Mr. FINDLEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter)

Mr. FINDLEY. Mr. Speaker, I am introducing today a resolution on Middle East peace. This resolution attempts to set forth what I believe to be the basic principles essential to a Mideast peace agreement. It is my hope that these principles will become elements of U.S. policy and that their acceptance by all parties in the Middle East will lead to a solution to the conflict there.

The resolution urges a preeminent U.S. role in achieving a comprehensive peace settlement because no significant progress toward peace in the Middle East has ever occurred without the United States taking the lead. The United States has served not only as negotiator and conciliator, but also as the formulator of ideas and objectives, and finally, as monitor and guarantor. Indeed, since the October 1973 war, the United States has played an increasingly larger role, financially and otherwise, in assuring adherence to the agreements it helps negotiate. Since 1976 the United States has provided 175 civilian observers as well as electronic surveillance equipment to monitor the Sinai II arrangements while this country is now about to commit 1,000 armed American troops to the Sinai to assure Israeli and Egyptian compliance with the terms of their treaty of peace. And, it is more than likely that the United States will guarantee a comprehensive peace settlement when one is achieved. Therefore, the United States is-as President Sadat aptly states a "full partner" in the peace process. Consequently, it is important that the United States should seek a peace settlement based on principles which are acceptable to this country as well as to Egypt and Israel.

Now is an opportune time for the United States to encourage the resumption of the peace process. The negotiations between Israel and Egypt on establishing a framework for full Palestinian autonomy in the West Bank and Gaza have been stalemated, awaiting, in part, the outcome of elections in the United States and Israel. Indeed, the May 1980 target deadline set for the conclusion of negotiations on Palestinian autonomy is long past. Now that the United States and the Israeli elections have been held, it is again time to return to the Palestinian issue. President Sadat is visiting Washington this week for talks with President Reagan while Prime Minister Begin arrives in September. Moreover, there is heightened awareness in the Middle East of the need for peace after the grave events of this spring and summer. And the United States has been reminded that it is in its own interests to achieve a just resolution of the Arab-Israeli conflict before further explosions occur.

The six principles in my Middle East peace resolution are meant to lay the basis for such a just and lasting peace in the region which will assure the rights, security, and integrity of all the parties to the agreement.

As the first principle, I have listed "acceptance of the territorial integrity of all states in the region-including Israel-and the right of each to live in peace within secure and recognized borders." This is the first principle because the underlying cause of conflict and four wars since 1948 has been the failure of the Arab nations to recognize Israel's right to exist. In contrast, it has been Egypt's recognition of Israel's right to exist which has produced the monumental advance on the road to peace these past 35 years. A peace agreement must, therefore, include not just a tacit acknowledgment of Israel's existence but a recognition of Is-

rael's right to exist.

Principle 2 gives concrete form to principle 1. Peace must include the end to all belligerence: war, wars of attrition, terrorism, and raids across borders. To make a resumption of hostilities more difficult and a peace agreement more than words on paper, it is critical for the parties to the agreement to engage in economic relations, trade, diplomatic, and cultural contacts. These exchanges will enlarge human understanding and make the possibility of renewed conflict more remote.

Principle 3 calls for Israel's withdrawal to borders approximating those of June 5, 1967. This principle ac-

knowledges that the exact contours of the pre-six day war borders may have to be redrawn slightly in order to take into account Israel's security needs. On the other hand, the security of Israel will always be at risk as long as it retains by force of arms territory which is in dispute and which the world does not recognize as legitimately its own. The territorial question should be settled in negotiations with the other important and contentious issues. Israel, in effect, will be asked to trade territory in the West Bank. Gaza, and the Golan Heights for the acceptance of its integrity and legitimacy by its neighbors and states beyond. This is a trade similar to that which it made in returning the Sinai to Egypt. Since exchanging land. which is a concrete asset, for something intangible such as "recognition" is a difficult step for Israel, there will need to be created a framework of security guarantees as outlined in section 2 to minimize the risks involved.

Principle 4 calls for Palestinian selfdetermination in the West Bank and Gaza in exchange for Palestinian recognition of and acceptance of Israel's right to exist within the borders negotiated. Self-determination is a principle long espoused by the United States. This country has supported the self-determination of peoples around the world. Of course, the exercise of self-determination by the Palestinians cannot be such that it destroys or undermines the existence and identity of Israel as a Jewish state. There are Palestinians who would interpret the exercise of self-determination to mean the creation of a secular state in all of Palestine. This is unacceptable. The exercise of Palestinian self-determination to form a Palestinian homeland must occur within a framework that will assure the security and wellbeing of Israel. If Palestinian rights are to be recognized in a peace agreement, the Palestinians must recognize the right of Israel to exist.

Permanent demilitarization of the West Bank and Gaza, principle 5, is essential to a peace agreement because of the geography of the region. The security of Israel within its pre-June 1967 borders would be jeopardized by a military buildup in the West Bank and Gaza. The proximity of equipment such as tanks, rockets, missiles, and aircraft would permit Israel no early warning of attack should a peace agreement break down and would, therefore, pose a severe threat to that small nation. Similarly, Palestinian self-determination in the West Bank and Gaza would not be possible with an Israeli military presence in those territories. This would lead to ongoing tension that would make peace impossible, and would violate the principle of self-determination.

The sixth principle would establish guaranteed, unhindered access for persons of all religious faiths to an undivided city of Jerusalem. This is the situation which, in fact, basically exists now in a Jerusalem under Israeli annexation. However, the ultimate status of Jerusalem which is a holy city for the Christian and Jewish faiths and for Islam should be decided in negotiations—not by unilateral act—or the city will remain the object of conflict

it has long been. Because of the risks involved for Israel in territorial withdrawal, it will be important to construct a framework of security guarantees, as noted in section 2, as part of a peace settlement. The United States will surely make a commitment to the security of Israel, as well as other parties to the agreement. It is important to recognize, as President Reagan has done, that Israel can be a strategic asset in the Middle East and has much to offer to promote western interests in that critical region. As Chai Feldman wrote in an excellent article recently appearing in Foreign Affairs, the United States and Israel have much more to gain, however, from the creation of an interdependence in their mutual defense than by fostering an Israeli dependence on the United States. Therefore, a desirable course of action would be the integration of Israel into the Western alliance system. And other friendly states in the region which adhere to the peace agreement should also be invited to join in a cooperative alliance system to assure common security interests.

In addition, the member states of the European Economic Community are listed as participants in the security framework guaranteeing a comprehensive Middle East peace agreement. These states made an offer of security guarantees in their 1980 Venice Declaration on the Middle East. It is important that they live up to this statement and work with the United States guaranteeing a comprehensive peace. This will strengthen the guarantee and lessen the possibility that the United States will have to assume unilaterally the responsibility of assuring interests which are those of the West as a whole.

The United Nations will also undoubtedly play a role in monitoring and observing a peace agreement just as it has for years in the Sinai, on the Golan Heights, and in Lebanon.

I believe that this combination of principles and security guarantees will lay the foundation for a just and lasting peace for all parties in the Middle East that will, in turn, enhance U.S. interests. Such a comprehensive agreement may not come about quickly. But it is, nevertheless, critical that the United States take the lead now in promoting a Middle East peace settlement.

MIDDLE EAST PEACE RESOLUTION

Whereas peace in the Middle East is essential to U.S. interests, the United States should play a pre-eminent role in promoting a comprehensive peace agreement in that area, Now, therefore, be it

Resolved by the House of Representatives

Resolved by the House of Representatives (the Senate concurring), That it is the sense of the Congress that the United States should seek agreement by all parties to a peace settlement in the Middle East based upon the following principles:

 Acceptance of the territorial integrity of all states in the region, including Israel, and the right of each to live in peace within secure and recognized borders;

(2) Termination of all claims or states of belligerency and development of full diplomatic and economic relations among all parties to the agreement:

ties to the agreement;
(3) Withdrawal by Israel to borders approximately those of June 5, 1967;

(4) The right of Palestinians to self-determination within the West Bank of the Jordan River and within Gaza, subject to Palestinian recognition of and respect for the sovereignty and integrity of Israel within the agreed borders;

(5) Permanent demilitarization of theWest Bank of the Jordan River and Gaza;(6) Guaranteed unhindered access to the

city of Jerusalem, which should remain undivided, to persons of all religious faiths. SEC. 2 It is the further sense of the Con-

SEC. 2 It is the further sense of the Congress that a settlement based on the principles stated above should be guaranteed by one or more of the following:

(1) The United States;(2) The United Nations;

(3) The member states of the European Economic Community; and

(4) The integration of Israel as well as other interested states of the Middle East into the Western alliance system.

PERMISSION FOR COMMITTEE ON THE DISTRICT OF COLUM-BIA TO HAVE UNTIL MID-NIGHT, FRIDAY, AUGUST 14, 1981, TO FILE REPORT ON H.R. 1807, AUTHORIZING DISTRICT OF COLUMBIA GENERAL OBLI-GATION BONDS

Mr. DELLUMS. Mr. Speaker, on behalf of the Committee on the District of Columbia, I ask unanimous consent to have until midnight, Friday, August 14, 1981, to file the committee report on H.R. 1807, a bill to authorize the District of Columbia to issue and sell general obligation bonds for the purpose of paying certain liabilities of the District of Columbia.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

SOCIAL SECURITY-COMING UP

(Mr. PICKLE asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous

Mr. PICKLE. Mr. Speaker, within the next few days the President's budget and tax programs likely will be signed into law. Since the start of the year my Subcommittee on Social Security has warned our colleagues of a further issue that is likely to surpass either of these in importance—restoring the financial soundness of social security.

The President has said that he is giving this top priority—but that has been top priority after the budget and tax matters. And the situation has been somewhat the same here in the Congress. A reluctance to address the social security problems is as natural as stepping around a bed of nails. But the fact is the issue is here and sooner or later must be faced head on.

I am inserting in the RECORD today a statement that I hope will give the Members an overview of this matter as they go home. The statement follows:

STATEMENT

MINIMUM BENEFIT

First, I will address the issue which has caused much concern in the past few weeks, the proposals to eliminate the minimum benefit. At the start of this year the Administration proposed to eliminate the mini-mum benefit both for those who might receive it in the future and for some three million current beneficiaries. This does not mean that these individuals would receive no social security benefit, but that their benefit would be in direct proportion to their wages under the system rather than raised to some "minimum" amount. There has been a minimum benefit in the system since 1935, when it was \$10 a month. In 1977 Congress froze the minimum benefit level at \$122 a month for new beneficiaries, although under transition guarantees it is still possible for an individual retiring today to receive a slightly higher amount.

The minimum benefit today serves much less of a purpose than it did in the past. The vast majority of individuals—certainly steady workers—have had an opportunity to be in the system for a time which would almost inevitably produce a benefit higher than minimum. Even a person who never worked at a level higher than the minimum wage would today receive a benefit higher than the minimum. The minimum still provides some measured amount of income to individuals with a minimal attachment to the workforce, but it has been stressed that there are now other programs available to assist such individuals.

The Subcommittee on Social Security voted, therefore, to phase out the minimum benefit beginning in 1983, in reality a speedup of what would eventually have occurred in practical terms under the 1977 freeze of the minimum benefit level.

The committee did not vote to take the minimum benefit away from those already retired because this was viewed as too harsh and in many cases cruel. As I stated in a letter to Members last week, there has been much misinformation about the minimum benefit. Arguments have been made that it is an unearned benefit which largely goes to individuals who either will be picked up by welfare or who have other resources available to them.

In fact, 76 percent of current minimum beneficiaries are workers—in other words, they have paid at least some taxes themselves for this benefit. It is true that they receive a greater amount than the benefit formula actually would provide, but they have paid some amount for this benefit.

In fact, we know very little about the outside resources of these individuals. A widely cited GAO report concerning the public pension and outside income of minimum beneficiaries really was a very small sample of newly entitled minimum beneficiaries and made no attempt to make any conclusions about the makeup of individuals already receiving the minimum. The GAO report recommends the prospective only elimination of this benefit, which is what the Committee had done in its own action.

We do know that approximately 360,000 minimum beneficiaries have public pensions, but many of these pensions are expected to be quite small.

We do know that 200,000 are students, mostly survivors of deceased workers.

We do know that 78 percent are over age 65; 50 percent are over age 70; 500,000 are over age 80; and 80,000 are over age 90.

And, perhaps most importantly, we also know that there are 500,000 minimum beneficiaries currently eligible for welfare who have refused to apply for welfare benefits. We also know that the Administration's own savings figures assume that no more than one-quarter of those who are now or would become eligible for welfare will apply for welfare benefits. If all those eligible did apply for welfare, the budget savings in the Administration provision would be cut by up to one-half.

The House on Thursday, July 30, passed a bill HR 4331 which restores current law regarding the minimum benefit. This bill is pending now in Senate Finance where it may be acted upon by the Senate after the August recess.

If this bill is passed as the House wrote it, it would correct the action taken in the Gramm-Latta substitute on Reconciliation, but it would not address the problem of what to do about this benefit in the future. To ensure responsible action, I intend to ask my Subcommittee to continue its own work on the minimum benefit and to address this issue through the normal committee process.

FINANCIAL ISSUES

The social security program faces two financial issues. First is a short term fiscal crisis that can be expected to plague the Congress throughout this decade unless action is taken to avert it. Second is a problem caused by the increasing numbers of elderly we can expect to come on the social security rolls in the next century—and the decreasing numbers of workers we can expect to be there to support them.

These two problems can be dealt with together or separately, although it would be difficult if not impossible to restore public confidence in social security if both are not dealt with soon.

PAST ACTIONS

The Congress has passed two major bills in the last few years directly aimed at improving the financial soundness of the social security program. First was the major financing bill passed in 1977, which raised payroll taxes and which also substantially reduced the future growth of benefits. The second was the Disability Amendments of 1980 which put into place tightened administrative procedures and other reforms. This legislation, and better administration stimulated in part by our Subcommittee, has cut the cost of the disability program in half (from 3 percent of payroll in 1977 to 1.5 percent of payroll today).

The disability program was in serious trouble when the 1977 amendments were passed. Today the number of disability awards per 1000 workers is at the lowest levels in the history of the program. It is projected to have supluses for the next 75 years, and it is strong enough that we were able last year to reallocate money from the disability fund to assist the large retirement trust fund.

SHORT-TERM PROJECTIONS

Predictions of operations of the social security trust funds made shortly after passage of the 1977 amendment indicated that all three trust funds combined (old age, disability, and Medicare hospital insurance) were already dropping from a 50 percent reserve in 1977 to a 40 percent reserve in 1978 and would continue downward to a low of 25 percent at the beginning of this year, 1981. The projections also indicated there would be an improvement after 1981, that 1981 would be the low point. But this did not anticipate our record inflation which has given us negative real wage growth three out of the last four years and double digit benefit increases over the last two years.

In fact, reserves declined from 40 percent in 1978 to 23 percent at the beginning of this year and now are projected to continue to decline not just for the next year or so but throughout the 1980's. This is an important change from projections made last year where the trust fund reserves were expected to improve after 1985 or 1986. More to the point, reserves in the big retirement fund were expected to hit a low point of 26% at the beginning of 1980 and 1981. In fact, reserves in that fund stood at only 18% at the beginning of this year.

The reserve level is significant for this reason: The reserves represent the percent of a year's benefit payments that are actually on hand in the trust funds. We must have a full month's worth of reserves on hand in the OASI and DI funds just to pay benefits for any one month. In the past it has been assumed that we needed 100 percent reserves (a full year's outgo) as a general cushion. Our experience since 1977 would indicate there is some validity to this approach.

The large retirement fund (OASI) is the one giving us difficulty at the moment. It has run into trouble because the reserves were too low to withstand the severe economic strains we have been under for the past several years and because the major portions of revenues from the 1977 tax increases were not scheduled to come into the funds until this year, 1985 and 1990. Even after the cuts made in reconciliation, the OASI fund, which currently pays out benefits totalling \$127 billion a year, will have its outgo exceed its income by \$80.9 billion from this year through 1986 and by an additional \$110.6 billion from 1987 through 1990 under the intermediate assumptions of the fund trustees.

ACTIONS NEEDED

The first situation mandating action arises next fall, 1982, when the OASI fund will not be able to pay full benefits if we do not act. That is simple fact and is not disputed by any party.

The situation is somewhat ameliorated if we allow the funds to use the resources of each other (interfund borrowing), since both the disability and health funds are expected to run surpluses for the next several years. But these two funds are much smaller (\$29.5 B outgo for the HI fund and \$18.0 B outgo for the DI fund this year), so they

can easily be depleted if relied on totally by

There is no question that something must be done to address the problem that confronts us next year. The question then arises how much is needed and when is it needed. Specifically, the issue in the short term boils down to this: can we make it with interfund borrowing, allowing the three funds to borrow from each other, or is further action needed as well?

Any response to this question lies primarily on the economic assumptions used for the rest of the decade and on what reserve levels we choose to shoot for. In analyzing this we can also now take into account the considerable benefit reductions which were included in the reconciliation bill which has just been sent to the President.

The following chart shows the additional funds (or cuts) needed by the end of each year to maintain reserve levels of 14 percent, 20 percent, and 30 percent in all three funds under the intermediate assumptions (the amounts are cumulative).

Additional Funds Needed by End of Year to Maintain Reserve Ratio at:

(In billions of dollars)

	Percent		
	14	20	30
1980	\$1.1 17.4 26.2 36.5 53.1 71.1 109.0 120.8	\$5.4 16.1 33.2 43.8 56.0 74.4 100.4 134.0 144.0	\$12.2 18.5 27.8 41.4 61.4 75.0 90.4 112.1 141.1 178.0 216.0

Reconciliation has now provided about \$30 billion of these needs through fiscal

We should keep in mind, however, that when we acted in 1977 we based our actions on intermediate assumptions. The current intermediate assumptions rely on strong growth in real GNP, inflation dropping to 4 percent by 1990, average annual interest rates of 6.1 percent by 1990, unemployment of 5.9 percent by 1990 and the existence of real wage growth in every year after this one.

Reserves are so low now that only slight failures to live up to these projections will spell further trouble—especially in the next few years when the Administration is already warning that it may take some time for their proposals to have any effect on improvements in the economy.

Obviously the cuts in reconciliation have improved the picture. Before reconciliation the trust funds hit 14 percent in 1984; now this would be delayed until 1985-1987 under the intermediate assumptions. And under the "worst case" assumptions (which still are more optimistic than our experience since 1977), all three funds fell below levels necessary to pay benefits sometime during 1983 before reconciliation; now this could be stretched into early 1984.

But the basic problems remain the same. Either we build up the reserves in the social security trust funds, or we leave it teetering on a razor's edge for years to come.

I think that we should build up the reserves and have proposed that we do so by transferring part of the revenue coming into the Medicare fund over to the old age fund,

replenishing Medicare and keeping it whole from general revenues. This does not affect the federal budget deficit since it does not change overall revenues or overall outlays. It does build up reserves in the trust funds so that the public can have some confidence that the program will withstand the next few years. The alternative ways to build up reserves are to raise payroll taxes or to cut benefits.

The Congress either through the House or the Senate may make additional cuts in social security in the coming years. But it is not likely that the Congress will make cuts in social security substantial enough to build up reserves, much less to guarantee that outgo will not exceed income in the future in the event of another economic downturn. And the only other option is to raise payroll taxes.

Thus it is my opinion that we must transfer \$10-15 billion each year from the HI fund and build up reserves. That is the only way I see that the system can be made solvent. Any other action begs the issue-it makes us try to hold the line and depend on hope and wishful thinking while the American public is left to worry about the fate of this program.

This still would, of course, leave the long term issues.

LONG-TERM PROBLEM

For the long term, the deficit in the old age and disability trust funds is now expected to be -1.82 percent of payroll, which means that we would need a tax increase of at least that amount now (employer and employee combined) to make the fund solvent for the next 75 years under the intermediate projections. (Waiting means the tax increases most likely would have to be larger.)

In the long term, the old age and disability funds cannot expect any help from the Medicare fund, which will be facing its own problems. The disability fund is expected to have permanent surpluses, but it is too small to carry the burdens of the retirement

To address this long term problem, I have proposed that we move the age for full retirement benefits to 68 by the year 2000, while still preserving an age 62 retirement at a lower level than now. This one action would save over 1.3 percent of payroll. The Administration has proposed to slow the growth of the benefit formula over the next six years and to impose severe restrictions on early retirement starting next year. These two actions would save 1.3 percent and 0.85 percent of payroll respectively over the long term. The Administration also proposed several other benefit reductions for the near term which, over the next seventy five years, would save a total of 2.86 percent of payroll, roughly one percent more than the actuarial long term deficit.

Some argue that we do not need to address the long term issues in social security retirement now. But they will not be any easier later. They will be harder because people will have shorter notice of necessary changes. Moreover, if we do not address the long term issues, I believe there is no way younger workers of today will ever regain any confidence that they will ever receive any benefit from this program. Confidence, is, in my view, one of the most severe problems that the social security system faces today-and one which makes the actions or inactions of the Congress in the next few months of paramount importance.

I hope that this summary is of some use to you over the recess and seek your coop-

eration in addressing this important issue when we return.

NATION NEEDS FOOLPROOF AIR DEFENSE SYSTEM

(Mr. SKELTON asked and was given permission to address the House for 1 minute and to revise and extend his include extraneous remarks and matter.)

Mr. SKELTON. Mr. Speaker, Saturthe Washington Post reported that the MX missile would be an airlaunched method rather than the controversial land-based mode. Without going into the merits or demerits of that proposal, should that be the case, I think that the decision should be made simultaneously that we have an adequate air defense system, an adequate radar, and a high technology set of interceptors.

History tells us what happens to bombers or airplanes that are on the ground, that are not adequately defended, because we can think back to 1941 when Gen. Douglas MacArthur's B-17 fleet was wiped out in the Philip-

Mr. Speaker, I insert at this point into the RECORD my letter to Secretary of Defense Weinberger on this subject:

HOUSE OF REPRESENTATIVES. Washington, D.C., August 3, 1981. Hon. CASPAR W. WEINBERGER,

The Secretary of Defense,

Washington, D.C.

SECRETARY: The Saturday, August 1, Washington Post carried a front page lead article to the effect that the President is prepared to recommend replacement of the disputed land-based MX missile system with the proposal for putting the missiles aboard airplanes for aerial launching.

Without delving into the merits of this new aerial launching system, of which I do not disapprove, let me point out that should such a system be adopted, our country will need an air defense system that is absolutely fool-proof. Otherwise, our planes would be sitting ducks. When I speak of an air defense system, I refer to defense against bombers, particularly the Soviet Backfire bomber and other sophisticated Soviet bombers that are in the development stage. We will need radar and warning systems that cannot be penetrated, and we will need interceptor airplanes available to successfully engage any enemy bombers flying into the continental United States.

Presently, our air defense system is totally inadequate against the Backfire bomber or other advanced bombers. This was borne out at a recent hearing on our air defense before the Armed Services Committee, of which I serve as a member. At that hearing, which I requested, the Air Force Chief of Staff, General Lew Allen, Jr., stated, "Because of the reductions in our North American air defense assets, critical deficiencies exist in our ability to detect, assess and defend against even a small-scale bomber attack." Let me point out that warning and radar surveillance units have been reduced since the 1960s to the present time to 110 from 408; interceptor airplanes have been cut to fewer than 300 from 2,600, and most of the existing planes are 1950s technology. We need an impenetrable up-to-date Distant Early Warning line system across northern Canada as well as Over the Horizon Backscatter Radars on the East, South and West coasts of our country. We will need sufficient amounts of fighter aircraft, such as the F-15, to engage the high technology of the Backfire bomber threat.

Should we not have an adequate air defense system, the airplanes used for aerial launching for the new MX missile would be vulnerable to attack by enemy bombers without prior warning. These MX missilecarrying airplanes, which will be on the ground most of the time, could be wiped out by an enemy bomber attack just like Mac-Arthur's B-17 force was wiped out in December of 1941 as they sat on the ground in the Philippines. That lesson from our military history should teach us the need to adequately defend valuable airplanes.

Should the final decision be made to have an aerial launched MX system, I hope that a simultaneous decision will be made to upgrade our air defense system to prevent enemy bomber attacks that could destroy it.

Sincerely,

IKE SKELTON. Member of Congress.

FAIR TREATMENT FOR U.S. OVERSEAS INVESTMENT

(Mr. SCHULZE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SCHULZE, Madam Speaker, I am today offering legislation to amend section 301 of the Trade Act of 1974, clarifying its coverage and assuring that it is used to protect U.S. investments as well as our exports of goods and services.

Section 301, which we amended in the Trade Agreements Act of 1979. allows private American businesses to raise with the U.S. Government allegations of foreign unfair trade practices. It empowers the President to negotiate resolutions of these problems and authorizes him to take retaliatory measures when negotiations fail.

My proposed amendment would achieve its purpose in two ways. First, it eliminates any ambiguity that might have existed as to the scope of section 301, by making clear that it protects U.S. investments as well as trade. Second, it confirms the President's authority to order investment-related remedies in the event U.S. investments are discriminated against or otherwise illegally or unreasonably burdened.

Madam Speaker, let no foreign gov-ernment mistake the meaning of this legislation. Many of us in the Congress are outraged at discrimination against U.S. investments in foreign countries around the world, and do not intend to sit idly by while these investments are eviscerated, or are forced to be sold at "fire sale" prices.

If I may be allowed 1 minute to paint a broad picture, let me mention three areas where U.S. investments are currently being unreasonably restrained. First, Canada has set itself upon a course that could be ruinous both for itself and U.S. energy companies. Under the national energy program, exploration grants will henceforth be given on the basis of the origin of ownership, with non-Canadian-owned energy companies being ineligible to receive incentive grants for exploration. In addition, certain foreign exploration rights will be partially expropriated by a requirement that 25 percent of such rights be retained by the Government of Canada.

In its lead editorial on August 3 1981, the New York Times described the national energy program as "openly hostile to foreign investment." The Times called for "quiet but urgent diplomacy." My bill would facilitate that diplomacy, by increasing the number of negotiating options

open to the President.

A second area of great concern is the European communities. The EC is currently proposing to adopt a number of company law initiatives which would impose onerous and extraordinary obligations on American corporations with subsidiaries in Europe. These include the requirement that worldwide operations of the parent be disclosed to community institutions, the obligation for the U.S. parent to negotiate over virtually any major corporate decision before it is taken with European trade union leaders, and the requirement that decisions affecting European subsidiaries to be those entities benefits, regardless of their impact on the corporate parent.

Madam Speaker, the attempt to exert extraterritorial jurisdiction over foreign business enterprises may in some circumstances be tolerable, as where those entities' actions create direct effects in the regulating nation. But the European initiatives are built on no such premise. Rather, they are motivated by an entirely unwarranted distrust of business generally, and of multinational American business in particular. The European communities propose to toss aside international unity. In return, they hope to achieve increased employment. Madam Speaker, it will not be so; American companies will not allow themselves to be subjected to these absurd and arrogant regulations. The resulting disinvestment will cause unemployment to increase, and the European economies to deteriorate.

Finally, there is the case of proliferating performance requirements in Third World countries. Under these various schemes, American investment is subjected to local content or local participation rules, or a host of other obligations designed to pick the pocket of foreign investors. These are classic schemes, saying to U.S. business, "we would be happy to have your invest-ment, but in addition to paying for your viable operation you must buy X, Y, and Z, none of which you want and none of which will be useful to you.' Not only are these schemes increasing for potential investors, but they are being used to extort money from businesses already in place.

Madam Speaker, my bill does not guarantee a remedy for these problems faced by U.S. investment overseas. Rather, it makes plain the authority of the President and of the trade representative to seek such remedies at the bargaining table. It allows private Americans to raise these problems with their Government, and clarifies the Government's ability to

do what needs to be done.

Thank you.

TRIBUTE TO DR. WILSON E. SCHMIDT

(Mr. LEWIS asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include matter.)

Mr. LEWIS. Madam Speaker, the recent and unexpected death of Dr. Wilson E. Schmidt, the widely respected economist who had been President Reagan's choice to represent the United States at the World Bank, is a terrible tragedy to his family and friends. It is also a very serious loss to our Nation and to the Bank.

The selection of Dr. Schmidt to be the next American Executive Director at the Bank, reflected great credit upon the administration. Dr. Schmidt would have served as an outstanding champion of U.S. interests and of freemarket principles at that institution.

Dr. Schmidt enjoyed a successful academic career at George Washington University and the Virginia Polytechnic Institute and at Johns Hopkins. His prior public service included being a Deputy Assistant Secretary for Research at Treasury in 1970-72 and serving as a consultant to the Agency for International Development. Dr. Schmidt's membership since 1973 in the Shadow Open Market Committee reflected his strong attachment to sound economic policies.

The following article by Dr. Schmidt on Multilateral Development Banks is illustrative of breadth of his intellectual creativity and of his strong interest in new approaches at those trou-

bled institutions.

I am certain that my congressional colleagues join me in unanimously expressing a deep sense of loss at Dr. Schmidt's tragic and untimely death.

The article follows:

RETHINKING THE MULTILATERAL DEVELOPMENT BANKS

(By Wilson E. Schmidt)

In recent years the multilateral development banks (MDBs) or international financial institutions (IFIs) have come under increasing scrutiny. The World Banks Group, the Inter-American Development Bank, the Asian Development Bank, and the African Development Bank are all development lending institutions owned by their member governments. The United States Government participates in all of them. We provide funds. (Currently, the Administration is asking for \$3.6 billion in budget authority for them.) In each we have an Executive Director and/or an Alternate, appointed by the President or the Secretary of the Treasury, who serves on the board as a fulltime, continuous representative.

The MDBs are a prime element in the transfer of funds to the less-developed world. In the last two years for which data are available these institutions provided more than a quarter of all the official flow of development resources, both loans and grants, to the less-developed world. While the United States is the single largest national source of government grants and loans for development, the MDBs disbursed twenty percent more funds than the United States Government. Given their enormous role and the fact that the United States Government contributes funds to them, it is little wonder that they have come under increasingly detailed examination in the Con-

The purpose of this paper is to review some of the issues raised in the Congress and to set forth some fundamental points not addressed.

In hearings before the Subcommittee on Foreign Operations and Related Programs of the House Committee on Appropriations, the Chairman, Mr. Clarence Long, made a number of suggestions to Mr. C. Fred Berg-sten, the Assistant Secretary of the Treasury for International Affairs, and to the American Executive Directors with respect to the management of the MDBs. They are as follows:

First, the overall growth rates of the various Banks ought to be curtailed until project delays are improved upon. Large undisbursed funds should be reduced until you are sure that the IFIs are not overstraining the absorptive capacities of the less developed countries.

Second, the Executive Directors need to be made aware of pertinent material available within the Banks in order to become more effectively involved in the management of the Bank.

Third, greater coordination should take place among the IFIs, that is between them as well as between the IFIs and the bilater-

Fourth, a more critical view of loan proposals are needed to be made by the Executive Directors who, in turn, should be made a part of the loan selection procedure at an early stage and not after the fact, and

Fifth, the U.S. Government review system of the IFI projects needs improvements and

possible expansion.

Sixth, there is a need for a central agency detached from operating responsibility to investigate suspected irregularities analogous to what we call our Inspector General. There shall be a project audit system which can detect these irregularities.

Seventh, greater participation by the Executive Directors is needed in the formulation and administration of the operating

budgets.

Eighth, additional effort should be made to direct Banks' assistance to the poor; to develop accurate statistical data to evaluate changes in the plight of the poor. Monitor-ing of these projects needs to be broader, more frequent, more imaginative and more penetrating. Banks' employees need better training and intensive efforts to promote projects benefiting the poor.

Ninth, more timely project evaluations should be made so that lessons learned could be available on a more timely basis.

Next, we have got to have re-evaluation of the salary and benefit schedules of the employees of the Banks to bring them more in line with each other and with, of course, the United States rise in salaries here for our own people.1

These suggestions were based on almost one thousand pages of testimony and a report of the Surveys and Investigations Staff of the Committee, which had considerable access to the Treasury files and the Banks' personnel.2 It is more amusing than relevant that these suggestions appear on two pages of the subcommittee hearings which are numbered pages 754-763. None of us is perfect.

As for the first suggestion, namely the concern about project delays and undisbursed funds, it is perfectly obvious that nothing goes as expected in the real world. It is hardly surprising that commitments exceed disbursements, since projects are implemented over at least a four- to seven-year period. The real problem with this suggestion is that the ratio of commitments to disbursements has little to do with absorptive capacity. The crucial test of a country's ability to absorb funds is the rate of return on the projects supported. Disbursements could equal commitments, but the projects could be useless; the rate of return could be zero, in which case the funds are wasted. It would have been more useful to focus on the returns on completed projects. Piecing some assertions together, it appears that the average expected rate of return on projects is eighteen percent3 and, of fiftyseven projects completed in 1977 by the World Bank, thirty-six actually achieved rates of return equal to or greater than the original estimate.4 While insufficient to determine whether the absorptive capacity of the less-developed countries has been overstrained, such data hardly provided the basis for a slowdown in commitments. Otto Passman, the former congressman from Louisiana, complained of the pipeline in the U.S. bilateral aid program; it is unfortunate that the level of analysis has not improved since his time.

The second, fourth, and seventh suggestions reflect concern that the Executive Directors do not have adequate control over the banks and that the staff really runs them. As the investigative report says, "Though the IFI charters provide that the Executive Directors are responsible for the general operations of the IFIs, they are more led by management than directing management. . .'

1"Foreign Assistance and Related Appropriations for 1980, Part 6, International Finance Institu-tions," hearings, Subcommittee on Foreign Operations and Related Programs, Committee on Appropriations, House of Representatives, Ninety-sixth Congress, Pirst Session, pp. 754-763. Hereafter cited

2"Foreign Assistance and Related Appropriations for 1980, Part 2, International Financial Institutions," hearings, Subcommittee on Foreign Operations and Related Programs, Committee on Appropriations, House of Representatives, Ninety-sixth Congress, First Session. Hereafter cited as Part 2.

This point was underscored in a colloquy between the ranking Republican, Mr. Young, and the Executive Director of the World Bank, Mr. Edward Fried:

Mr. Young. How do you get along with Mr. McNamara? (the President of the World

Mr. FRIED. I have access to Mr. McNa-

mara, a very professional man.

Mr. Young. Well, I am hoping you have access to him since he works for you.

The investigative report supported its assertion by noting that "No loan presented for approval has ever been formally disapproved by the Executive Directors of any of the IFIs. Except at the Inter-American Development Bank, loans have been formally negotiated with the borrowing entity before presentment for Board approval."7 Fried responded to the point by saying that:

"The function of the discussion of the board during the approval process itself is indeed to influence future policies by expressing concern over one or another aspect of the loan while approving it; the board does influence, and to a very marked degree, what happens to future projects, to the design, to the kinds of things that the bank will be prepared to finance in the future. It is a different system, but it has its own effectiveness."8

ACCESS TO BANK DOCUMENTS

In the hearings, the issue of Executive Director control turned chiefly on the access the Executive Directors had to bank documents. The investigative report claimed that "As a general policy, the Executive Directors see only key documents related to the discharge of their responsibilities. Many documents developed by the management staff are not distributed or available to the Executive Directors." Mr. Fried responded in the hearings the ". . . I can get any document. But by common agreement there are certain kinds of documents that are not distributed to the board, but not very many. One example would be various procurement evaluation material." He went on to say

that:
"In a sense these institutions are very unusual institutions. They have Executive Directors who represent countries which have interests as borrowing and lending countries, supplying countries. In the case of this there is a kind of conflict of interest situation. If you gave this material to one director representing one supplying country it would pit him against a director representing another supplying country. These documents could be obtained but by common agreement they are not." 10

The banks have a worldwide competitive bidding system (save for a fifteen percent preference given to suppliers in the borrowing country by two of the banks) which ensures the most efficient use of the banks' funds. Because national governments own them, it is easy to see how Executive Directors might vote against particular projects in hopes of reshaping them to utilize more their country's exports.

Other efforts to bend the banks to particular national wills have failed. For example, in 1977 the Congress required the U.S. Executive Director to oppose loans establishing or expanding the production for export of palm oil, sugar, or citrus crops if such loans would cause injury to American

producers. In fiscal year 1978 the U.S. Executive Director in the World Bank voted against two loans. As the investigative report notes:

'Neither, of course, resulted in disapproval of the loan proposals. Review of minutes of discussions surrounding the two negative votes shows not only a lack of sympathy for the U.S. position but a counter-productive reaction on the part of other Executive Directors to U.S. efforts to inject political and/or protectionist attitudes into the loan discussions '

On grounds of violations of human rights, the U.S. Executive Directors have opposed a number of loans and abstained on others. While apparently there has been some sympathy for the U.S. position, the investigative report states, "Such support has not been sufficiently widespread among the members to result in the disapproval of any loan nor is there evidence of any groundswell of opinion moving toward such a result."12 The investigative report puts the problem blunt-"Involved in the implementation of the United States human rights policy in the IFIs is the danger of politicization of the IFIs." It notes that:

in prior years, representatives of Arab member countries on the World Bank Board have attempted to block loans to Israel which the U.S. Executive Director quickly helped to defeat as constituting an effort to inject political considerations into IFI lending rather than adhering to economic grounds as required by the char-

Obviously this issue involves the very life of these institutions. As the investigative report states, "The vast majority of borrow-ing countries assisted by the IFIs are not democracies and, to varying degrees, have been accused of human rights violations."14 Vigorous pursuit of human rights would stop much lending. The Congress passed a law which required the American Executive Directors to propose amendment of the articles of agreement of the banks to establish human rights standards. As Mr. Bergsten testified, "We got a unanimous reaction that such an amendment if proposed would not be adopted.

The depth of this issue was brought out clearly by the comments of Mr. Young, the ranking Republican:

'The thing which really bothers me about Vietnam and I have made this argument so many times that it sounds repetitious to me, but our relationship with Vietnam is different than the relationship of Sweden or Japan or some of the others. We still have personal friends, sons, brothers, who are in Vietnam who may be alive today. We have information which indicates they were alive as much as 18 months ago, but Vietnam will not give us any help.

"Our President went to Mississippi and made the point that he was opposed to any American aid going to Vietnam and the crowd went wild and they jumped and screamed. He did not tell them he was qualifying it; that it was O.K. to go through the World Bank. If he had told these people that he was not going to stop American dollars from going indirectly through the World Bank to Vietnam, the reaction would have been much different.'

¹⁴ Part 6, pp. 740 f.

According to Mr. Young, the World Bank had approved one soft loan for Vietnam and

six were pending.

This is not to say that the U.S. effort is a total failure. We have a veto over the use of soft money provided by the United States to the Inter-American Development Bank, As a consequence, the bank management apparently has shifted proposed projects from the soft window to the hard window, thus denying the offending country subsidized funds.17 But this success depends upon a veto which we do not have elsewhere

The salary issue is a particularly interesting, but knotty one. The facts, for what they are worth, indicate that the professional salaries in the World Bank and the Inter-American Development Bank are substantially higher than the U.S. Civil Service. In 1974 the Comptroller General of the United States reported that they averaged \$35,000 and \$33,000 in the two institutions compared with \$20,000 in the Civil Service.18 This looks less inefficient when it is recognized that the average Civil Service salary in selected international departments was \$30,000. And the problem is thoroughly muddied by the investigative report praise for the quality of the professional staff of several of the institutions.19 For a number of years the United States government has pressed the MDBs on the salary issue. American personnel have received a reim-bursement for their American taxes so that their salaries would be in line with nationals from other countries that waive their taxes. But this reimbursement has been based on the tax calculated with the standard deduction rather than on actual deductions, resulting in considerable overpayment.²⁰ A proposal to remove this anomaly is backed by the Executive Branch.

On the corruption issue, the evidence is underwhelming and the basis for the complaint appears to be more speculation than fact. Testimony indicated that the problem was negligible in the World Bank, and there appeared to be adequate controls in the outer institutions.21 As for an Inspector General, the World Bank already has an Operations Evaluation Department which reports to the Board, not to the President of the World Bank.22 Nonetheless, Mr. Bergsten did support further efforts to strengthen the audit and review mechanism.23

The evidence of a significant coordination problem is likewise underwhelming. In project lending, the real coordinator is the price mechanism. Costs of inputs and prices of outputs are compared to derive returns. If there were evidence that the MDBs were using seriously different prices and costs in estimating the rate of return on projects, the charge would be sustained, for then they would be misallocating their combined resources. Unfortunately, no such evidence was offered in the investigative report or in

the hearings

Finally, there is the question of the poor. Mr. Long put the issue neatly when he said, "That is what bothers me, the idea that economic development is a device for taking money from poor people in rich countries and giving it to rich people in poor countries." Anybody who has seen the poor in

less developed countries and the awful misery they must endure can hardly disagree with this concern. Mr. Bergsten testi-

"The banks have, as a first step, shifted the sectoral composition of their lending activity in favor of those sectors which prima facie are likely to have greater impact on the poor. In recognition of the fact that an estimated 80 percent of the world's poor live in rural areas, this has resulted in greater lending to the agricultural and rural development sector

The Administration and the committee seemed to share consensus that increased emphasis on helping the poor within the less-developed countries was a good thing.25 But the record is peculiarly empty of evidence that direct assistance to the poor is superior to indirect assistance that invests in the projects with the highest rate of return. The United States is a superb monument to the trickle-down theory, the private enterprise system. And the record of specific measures taken to help the poor, such as the minimum wage, is abysmal. One would have expected some analysis of the issue. but the statistical base is lacking.26 However, the record makes it clear that there are costs to this shift in resource allocations. As the investigative report says, ". . . one must recognize that cost overruns and institutional failures would be expected to be more prevalent in development lending, particularly concessional loans and social projects directed to reach the poorest of the poor .27 The Administration recognized the problem when it wrote that loans for basic human needs "... are difficult to prepare and implement and require much greater staff time than traditional infrastructure

Neither the investigative report nor the hearings pursued two extremely interesting issues of policy. One is the question of dividend policy, which has enormous implications, and the other is the efficacy of soft loans. The two are closely interrelated.

DIVIDEND POLICY

The MDBs do not pay dividends to their member governments. The World Bank instead transfers \$100-\$110 million per annum to its soft loan window, the International Development Association. The investigative report noted that "There has been some pressure within the World Bank to cease the transfers of IBRD revenue to IDA and declare dividends instead as a means of creating greater cost consciousness and control over administrative expenses."2

While there may be merit in the argument about the effect on costs, it misses the main point. Only if there are dividends can the national governments hope to sell the MDBs. If their shares were sold in the private marketplace, certain obvious advantages would accrue. If the banks had to please their private stockholders instead of the national governments, attempts to politicize and protectionize these institutions would cease. We could be more confident that their resources were allocated optimally. The American taxpayer would be relieved of a burden that includes substantial contingent liabilities in the event of a default on the MDB loans. The Treasury might enjoy a capital gain.

Is it farfetched to propose the denationalization of the MDBs? I think not. World Bank bonds sell at yields very close to those of the Treasury, which suggests that the Bank can raise capital readily. It can be argued that this is only because the United States government in effect guarantees those bonds; one must wonder if this is really so. First, the World Bank has never had a default and has rescheduled only two loans. Second, the World Bank has no for-eign exchange rate risk, given the covenants and policies employed. Third, there are enormous gains from buying into the diversified portfolio of loans the World Bank has assembled.

This last point is, to my knowledge, a new and rather subtle point, which follows from recent discussion of the multinational corporation. It has long been recognized that an investor can reduce his risk for a given rate of return by purchasing a diversified portfolio of common stocks. To the degree that the returns on the individual stock are uncorrelated, the risk of the total portfolio is reduced to a level below the average of the stocks. Increasingly, it has been understood that the multinational corporation, by spreading its investments over a wide number of projects in a large number of countries, provides the same kind of benefits to the stockholders. Professor Dan Lessard has estimated that an American investor, by diversifying internationally, can reduce his risk by one third for a given rate of return.30 The World Bank has well over a thousand loans, in more than one hundred countries, in its portfolio of more than \$30 billion. Clearly, the notion of selling the World Bank deserves careful examination.

SUPERIOR EFFICIENCY OF HARD LOANS

The soft loans of the MDBs came in for mild criticism. Thus, Chairman Long re-marked about his visit to a fishpond in Co-

"It was kind of a flop because there were no fish in it. I got a little annoyed that they took me all that distance to look at a hole in the ground with some water in it, but they did tell me something about the economics of it which bothers me. First they told me it was going to be a very profitable project, would earn back the investment in a very short time. The next thing they told me was it was a soft loan, one for very low interest over a long period of time. I said, 'Why put a soft loan money into a project that is supposed to pay off as well as this?'

Each of the MDBs has a soft loan window. Approximately one third of their loans have been on soft terms in the last two years for which data are available.31 The Internation-Development Association, the window of the World Bank, loans money for fifty years with an annual service charge of three fourths of one percent. The terms of the other soft windows are comparable. Each of the soft windows receives gifts from the member governments.

Chairman Long's question poses an interesting issue for the less-developed countries.

³⁰ Donald R. Lessard, Appendix to Chapter 7, in David K. Eiteman and Arthur I. Stonehill, Multinational Business Finance (Reading: Addison-Weslay,

³¹ Development Cooperation (Paris: Organization for Economic Cooperation and Development, November 1978) Table C.3.

Since the MDBs do not declare dividends, their earnings really accrue to the less-developed countries in the form of resources that can be loaned to them in the future. To the extent that the MDBs charge less interest than the projects would bear, the pot for the less-developed world as a whole is reduced below what it otherwise would be. In effect, the country that gets a soft loan exploits the group as a whole. This seems fair, since there are few channels for the transmission of assistance from the richer of the poor to the least-developed countries and since the bulk of the soft loans go to the poorer of the poor countries.

But this policy contains a serious and costly flaw. If one wishes to raise the real income of a country, soft loans are always less efficient than either hard loans or grants. Furthermore, the choice of kind of assistance, loans or grants has nothing to do with the recipient's level of income. Rather, the choice depends upon the yields on projects. Two simple examples will make this clear.

Suppose that the rich part of the underdeveloped world wants to raise the real income of the poorest part by one dollar per annum for the next fifty years. Assume that the yield on capital in the poorest part is ten percent per annum. The rich less-developed countries can achieve their objective by any one of the following: (1) an annual grant of one dollar for each of the next fifty years, (2) a loan of ten dollars at zero interest to be repaid in fifty years, (a ten dollar investment at a ten percent yield will produce one dollar per annum), and (3) a loan of one hundred dollars at nine percent be repaid in fifty years (one hundred dollar investment at a ten percent rate of return with an interest cost of nine percent yields a net increase in income of one dollar per annum).

Each of the three alternatives brings the same benefits to the recipient, so the recipient should be indifferent toward them. Which would the benefactor prefer? The annual grant costs the richer poor country one dollar per annum. The zero interest loan of ten dollars costs the benefactor whatever it could have earned on investments at home-five percent, or fifty cents, per annum. But the loan of one hundred dollars at nine percent actually benefits the lender by four dollars per year if it could have been invested at home at five percent. In this situation, the hard loan is clearly preferable to the soft loan. The reason is that the interest rate is between the yields on capital; therefore, both the borrower and the lender benefit for each dollar loaned.

If we switch the yields around so that investments in the poorer part of the Third World yield only five percent while those in the richer part yield ten percent, annual grants cost less than soft loans. The hard loan with an interest rate between the two yields is not an option because the yield on capital in the benefactor nation is ten percent while the yield on capital in the recipient nation is only five percent. No loan can simultaneously benefit both parties. The interest rate would have to be below five percent to aid the poorer country, and such an interest rate would clearly cost the lender, who can invest at home at ten percent.

As for the choice between an annual grant and a soft loan in these circumstances, the comparison clearly favours the grant. The grant costs the benefactor one dollar per annum. A soft loan of twenty dollars at zero interest for fifty years, if invested at five percent, would produce an increment in the

recipient's income of one dollar per annum. But the cost of that loan to the lender who can invest at home at ten percent is two dollars per annum, or twice the cost of the annual grant. In the case of a higher interest rate-say four percent-the loan would have to be increased to one hundred dollars to yield an increment of one dollar per annum to the recipient who invests at return of five percent, and the cost to the lender would rise to six dollars per annumthe difference between the rate of interest on the loan of four percent and the yield on capital at home of ten percent, multiplied by the size of the loan. Paradoxical as it may seem, it is in fact cheaper to give the money away than to lend it when the yield on investment in the recipient country is below that in the benefactor nation.

These results do not depend upon the par-ticular number.³² When the yield on investments in the recipient country exceeds that in the benefactor, both are better off with a hard loan because it is possible to set an interest rate between the two yields, both parties gain. Only the size of the loan needs to be varied to achieve the target increase in the real income of the recipient. Since funds are being moved from lower to higher yields such that both parties gain. Only the size of the loan needs to be varied to achieve the target increase in the real income of the recipient. When funds are being moved from higher to lower the combined total output of the two countries declines. In such circumstances, it is best to delay the transfer of resources for as long as possible. A loan transfers a major amount of resources immediately, whereas an annual grant transfers small amounts slowly.

With a third of the MDBs loans taking the form of soft loans, the waste is enormous. If the MDBs never declare dividends, the less-developed countries as a whole are the losers. If they were to shift to paying dividends, then the advanced countries would be losers in any given transfer of funds to the less-developed world, because the dividends would be reduced. Either way, soft loans are losers. The World Bank should stop transferring its profits to the International Development Association. The MDBs and the national governments should review their soft loan policies.

In addressing the expressed congressional concerns with respect to the policies and operations of the MDBs, the prime target of examination quickly centers on the question of control. The "political status" of the MDBs and the question of whether their policies mirror the political designs of supportive governments will likely continue to be debated. Rather than dwell on peripheral issues such as the staff salaries of the Banks or the inescapable management problems when dealing with less developed countries, it is time for major innovative restructuring of the Banks' operational procedures.

As suggested here, there are two changes that the U.S. should examine and perhaps concurrently propose through her various Executive Directors. Implementation of a dividend policy, subsequently leading toward a true denationalization of the Banks, is an increasingly popular proposal both from the standpoint of alleviating to a small degree the U.S. taxpayers' burden of obligation and, most importantly, offering

an attractive investment in an operation whose portfolio is manifestly diversified. Secondly, no pertinent congressional discussion, to date, has adequately focused on the effectiveness of soft loans, in any sort of economic comparison between the donors' benefits from the use of hard loans and outright grants versus soft loans in Third World lending.

Logically speaking, the advanced members of the Banks should first decide whether they want dividends, for that determines whether the rates of return in the advanced countries are relevant to the choice between hard loans and annual grants. Then rates of return should be examined in the relevant benefactor and recipient nations to determine the choice of the form of aid. Finally, the amount of aid should be decided. Only in this way can the MDBs become a rational instrument of development assistance.

It would be fitting for the United States government to initiate this review, because it was the U.S. that caused the mistake. When it first offered to make funds available to what became the International Development Association, the management of the World Bank preferred to pass them on in the form of grants; 33 the United States government fought for loans. It is now time to rectify our mistake. It will not be a big hassle, since at least the International Development Association has authority to make grants, 34

Mr. KEMP. Madam Speaker, will the gentleman yield?

Mr. LEWIS. I yield to the gentleman from New York.

Mr. KEMP. I would like to join the gentleman in his very well deserved tribute to Wilson Schmidt. His passing is a real tragedy, not only for the family but for this country and indeed the world.

I appreciate the gentleman taking this time to bring this sad event to the attention of our colleagues. Wilson is truly a great American and I appreciate the gentleman's comments particularly in light of our thoughts and prayers for the family.

Mr. LEWIS. I thank my colleague for his contribution.

PUTTING SOCIAL SECURITY IN PERSPECTIVE

The SPEAKER. Under a previous order of the House, the gentleman from Michigan (Mr. FORD) is recognized for 5 minutes.

• Mr. FORD of Michigan. Mr. Speaker, I think it is time to put the social security issue into perspective. As a result of the Reagan administration's scare tactics, the public is confused and worried about the future of a program that has provided income security to Americans for nearly half a century.

³² Wilson E. Schmidt, "The Economics of Charity," Journal of Political Economy, (August 1964); and subsequent discussions in the same journal by Charles Frank in September/October 1970; and Yew-Kwang Ng in March/April 1973.

³⁵ David A. Baldwin, Economic Development and American Foreign Policy (Chicago: University of Chicago Press, 1966) p. 98; Edward S. Mason and Robert E. Asher, The World Bank Since Bretton Woods (Washington: Brookings Institution, 1973) p. 394.

³⁴ Part 2, p. 40.

During his campaign for the Presidency, Mr. Reagan promised that he would preserve the social security system as a "safety net." We now see that this was just so much more campaign rhetoric.

Already Mr. Reagan and his chief budget slasher, David Stockman, have succeeded in eliminating the \$122 minimum benefit. This will hurt nearly 3 million Americans at the bottom of

the economic ladder.

Now the administration is attempting to panic the Congress into making deep and permanent reductions in social security benefits to most Americans who have come to believe in the integrity of the system and to rely on

it for security.

The President has proposed cutting \$88 billion in early retirement, disability, and other benefits by 1986, attempting to frighten the American people into believing that the social security system will go broke unless he has his way

This is a blatant example of overkill. The measures proposed by the White House are far, far more than are needed to protect the social security

It is clear that the President is interested in protecting something other than social security. The tax bill that he stampeded Congress into accepting is guaranteed to produce huge budget deficits. Mr. Reagan wants to reduce social security benefits so he can keep his campaign promise to balance the budget by 1984.

There is no question that the gigantic tax cut for the rich will reduce revenues and will require budget cuts beyond anything so far proposed. Reducing social security benefits is just another way to achieve these cuts.

Some measures must be taken to insure social security's immediate future. But they need not be nearly as drastic as the White House proposes.

Social security supports three separate programs-each financed by a separate trust fund. They are financed by a payroll tax on earnings-currently 6.65 percent for employees and 6.65 percent for employers up to a maxi-

mum of \$29,775 a year.

First there is the old age and survivors insurance program that pays benefits to retired workers and their dependents and survivors. Next there is the disability insurance program that pays benefits to disabled workers and their dependents. Finally there is the health insurance program which is part A of the medicare program, and pays hospital bills. Part B of medicare, which pays for doctors' bills, is financed by monthly premiums paid by those enrolled in the program and from general tax revenues.

Because I have encountered considerable confusion regarding some other programs. I would like to set the

record straight.

The supplemental security income program, which provides a basic level of income for the aged, blind and disabled, is run by the Social Security Administration but is not part of the social security program. It is paid for by general revenue tax funds and not from any of the social security trust funds. A person does not have to work under social security to be eligible for SSI benefits. This used to be called the "old age assistance program" when it was run by the States until a few

Funds for the aid to the families with dependent children program (AFDC) also come from general tax funds and are in no way related to social security. It has surprised me to discover that many people think the programs are somehow related.

Neither is the civil service retirement system related to social security. This retirement system is funded by contributions from Federal employees who are not covered by social security and matching funds from the employing agencies.

The social security program does have some problems that must be solved. But solutions do not require the kind of severe remedies that the

President has proposed.

In the past few years we have had historically high rates of inflation accompanied by high unemployment. Moreover, wage rates have fallen behind price increases. As a result, social security has been paying out more and not collecting as much as had been anticipated.

It is expected that the economic picture will improve and that the social security outlook will brighten as well for the next 30 or 40 years until longrange problems begin to take hold.

It is apparent to me that this administration wants to mislead the public on the social security issue to achieve its own ends. All through the tax debate Mr. Reagan used the most optimistic economic assumptions to argue his case. In his social security proposals he uses the very worst economic assumptions. He can't have it both ways, depending on which he wants to advance.

I don't want to mislead the people into thinking that there are no problems with the social security program. The long-run problems are very serious. They result from the fact that the population is aging at a time when the birthrate is declining.

Social security is a pay-as-you-go program where active workers pay the benefits of retired workers. It is predicated on an ever-expanding work force and today that work force is not growing

What the Reagan administration wants to do is solve the problems of the next century in the next few years. None of us knows what is going to happen in the 21st century. As in

our private lives, most of the things we worry about so much never happen. None of us knows what the economic conditions will be like 30 or 40 years from now. Perhaps we will develop new energy sources that will expand our productive capacity beyond our wildest imagination.

We should not recklessly leap into solving predicted long-range problems when to do so will cause injury to mil-

lions of people right away.

The President wants to cut billions in benefits out of the program in the near future by discouraging early retirement (55 percent of full benefits rather than 80 percent allowed now at age 62), restricting eligibility for disability insurance, limiting benefits to survivors and by taking other steps beyond what is needed.

It is not necessary to hurt millions of Americans now when there is a good chance that such extreme measures will not be needed at all-especially if Mr. Reagan's assumptions for economic recovery should prove right.

In the meantime, using the social security system to achieve short-term economic ends such as a balanced budget is playing recklessly with the future of millions of Americans.

There are a lot of things we can do. We can amend the law to permit one fund to borrow from another; we can allow the troubled old age and survivor insurance fund to borrow from the healthy medicare fund.

We can consider financing a portion of social security from general tax revenue funds. There is an opportunity as well for creating standby loan authority from general funds.

Whatever changes we decide to make should be thought through very carefully and should take effect sometime in the future.

We cannot simply say to Americans who have spent all their working lives paying into a system that we are going to change the rules and they are going to have to make other arrangements. Do you say to a man or a woman 55 years old that they are going to have to start some kind of private fund for their retirement? How much time do they have to build that fund?

Many people made assumptions about retirement income based on social security. They took out private insurance annuities and set up separate savings accounts or made other investments. They figured out how much they would need based on how much they could expect from social security. It would be heartless and unrealistic now to tell them they will have to find a way to increase their savings in the working years they have left.

Working beyond 62 is fine for those people who want to and are able. But recent studies by the Social Security Administration show that only 15 to 20 percent of those who opt out before 65 do so voluntarily. Most who retire before age 65 do so because of failing health or because they can no longer handle the job pressure. In many cases the 62-year-old worker who has labored 40 years in the steel mills or the auto plants is worn out. If he works until he is 65 he may well be dead. Maybe that is what the administration is counting on.

There is something else to consider. Social security is a compact between the young and the old. It was designed for a changing society where it is no longer possible for younger people to assume the responsibility of caring for their aged relatives because of changes in working and living conditions. Mr. Reagan wants us to return to the old world even though it is no longer possible.

If we fail to meet the income and medical needs of the older citizens, we inevitably are going to shift this cost to the young who cannot afford it.

We would also create major problems in private pension funds that are tied to social security. Workers would demand higher employer contributions to make up the difference, putting added pressure on price developments.

We simply cannot afford to destroy the confidence of a program that is so much a part of our society because we are worried about what might happen 30 or 40 years from now—or because Mr. Reagan has gotten himself into an embarrassing revenue situation as the result of an ill-conceived tax bill.

WHAT IS OUR POLICY IN THE PERSIAN GULF?

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Wisconsin (Mr. Reuss) is recognized for 10 minutes.

• Mr. REUSS. Mr. Speaker, since the announcement of a "Carter doctrine" toward the Persian Gulf, committing the United States to a unilateral military defense against outside aggression in that region, a large-scale military buildup to implement that doctrine has been underway. But the costs of our increasing military commitment to the gulf region have never been weighed in a public forum against either the benefits which we hope to attain or the alternatives which might be available. There is a need, in a word, for an analysis of the economics of our Persian Gulf strategy.

The Carter doctrine is no small matter. In its name, a justification can one day be made to send American soldiers to the shores of the Persian Gulf, there to fight and die for the sake primarily of our supplies of oil. Short of that, the doctrine can be used to justify substantial amounts of new defense spending, be it for creation of a Rapid Deployment Force, negotia-

tion of base rights or access in the region, or any of a number of associated costs that may not at first meet the

To date, the Reagan administration has not spelled out its policy toward the gulf. Nevertheless, there is no indication of a retreat from the forward policy adopted under Carter. If anything, the emphasis on East-West conflict in the emerging foreign policy of the administration suggests that the President may seek to expand our military presence in the gulf beyond even the levels projected under his predecessor.

It is noteworthy, therefore, that our European and Japanese allies do not seem to attach the importance that we do to preparing for a military defense of the Persian Gulf, though they are in fact much more dependent than we are on access to its oil. Some charge that they see in this merely a means of shifting responsibilities onto the shoulders of a stronger ally. On the other hand, it may be the case that European and Japanese perceptions of Western interests, and the nature of threats to those interests, genuinely and forthrightly diverge from our own. In such a case, this attitude is something that should raise American concern, and possibly direct us to a scrupulous reexamination of our own premises.

And therefore, it seems only sensible to ask what the new administration's Persian Gulf policy is, on what premises it rests, and what are the costs and benefits relative to alternative strategies which may meet the same macroeconomic and global security goals.

I believe the administration should answer the question: What is our policy in the Persian Gulf? A number of hearings have been held in the last Congress on many of the issues related to our Persian Gulf commitments, but it is not clear as yet how the views of the Reagan administration compare with those enunciated by officials of the Carter administration.

It is essential to know what we construe to be our interests in the region, and how vital we consider them. What is the extent of our dependence on Persian Gulf oil, and what do we see as the impact of losing it? What would be the implications for the United States of a loss of oil on the part of our allies? Beyond preserving access to oil, what other interests are considered paramount: Preventing Soviet penetration in the area; retaining the friendship of moderate states; preserving a Mideast balance of power; assuring freedom of the seas; enjoying the credibility and prestige that may attach to a U.S. presence?

Second, it is important to know what commitments, legal or de facto, we have undertaken in defense of these interests. What economic and political actions have we taken, and are we prepared to take, to carry out our commitments? What are the budgetary costs of such commitments, and what expansion of these commitments may be contemplated? How do commitments undertaken by the previous administration compare with those endorsed by the current one? How do these commitments correspond to our interests?

Third, what are the threats to our interests that are assumed to exist? Is it the Soviet Union we are primarily concerned about, and its ability to interrupt the flow of oil to the West? Do we expect that Soviet penetration would take the form of outright military aggression, or might it occur as a subtle form of subversion? What probability do we assign to threats that may arise from indigenous disruptions, from inter-regional rivalries, or from a new Arab-Israeli war? If we concentrate our energies on the prospect of a 'worst case" Soviet invasion, will we be equipped to deal with the possibly more likely contingency of an internal disruption or inter-regional war?

Fourth, what do the European and gulf states consider to be the dangers in the region, and how does this compare with our own assessment? What do our European and Japanese allies think are appropriate actions to be taken to prevent these dangers, and what contributions are they prepared to make in a common defense policy toward the gulf?

Finally, all considered, how cost-effective is our defense policy compared to the interests and threats we see in the region and with the alternatives available to us and to our allies?

If our defense policy toward the Persian Gulf is in effect an energy policy-a policy concerned with our access to oil-it is this last question which is the bottomline that must be addressed. For, given the immense budgetary costs that may be associated with our commitments, and the risk they entail of outright military engagement, is it not possible that more direct energy policies might prove more logical: diversification of our oil supply, for example; accelerating our completion of a strategic petroleum reserve; shifting to the use of deep gas instead of oil in the production of electricity; or the undertaking of serious conservation measures to restrain our sometimes extravagant consumption

In the first instance, our Persian Gulf defense policies may seem to belong properly within the domain of our military experts. But there can be no doubt that, in the final analysis, they have to do equally as much with our Nation's precarious energy position, and with the very health of the economy. It is in everyone's interests that the most cost-effective policies be

followed in the pursuit of our national objectives.

A PERMANENT COMMITMENT TO THE EDUCATION OF THE HANDICAPPED

The SPEAKER. Under a previous order of the House, the gentleman from New Jersey (Mr. Smith) is recognized for 15 minutes.

Mr. SMITH of New Jersey. Mr. Speaker, today I am introducing legislation that will permanently authorize the Education of the Handicapped Act. Initially enacted in April 1970 as title VI of the Elementary and Secondary Education Amendments of 1069 (Public Law 91-230), the Education of the Handicapped Act both consolidated certain existing authorities and established new programs to serve the educational needs of handicapped children and adults. While this act has been amended several times since then, it remains the primary Federal legislation that is directed toward meeting the special educational needs of handicapped persons.

When the Congress amended this law in 1975 by enacting Public Law 94-142, a giant step was taken toward providing a "free, appropriate public education" for all handicapped persons between the ages of 3 and 21. Despite the progress that had been made on behalf of the handicapped, by virtue of various court decisions and State legislative initiatives, the 94th Congress found that more than half of the estimated 8 million handicapped children in the United States were not receiving an education that was free and appropriate to their needs.

Additionally, Mr. Speaker, many children were found to have undiagnosed handicaps. Approximately 1 million handicapped children were found to be receiving no education at all. Since the passage of Public Law 94-142 in 1975, great progress has been made but much more needs to be

Mr. Speaker, I am pleased that the Education of the Handicapped Act has been preserved as a categorical program with the passage of the Omnibus Budget Reconciliation Act of 1981. Part B of this Act, assistance to States for education of handicapped children, remains as a permanently authorized program.

I am very pleased that this vital program has received this long-term commitment from the Congress. However, there are several other important programs that also deserve the enthusiastic, permanent support of Congress. These are the additional programs, which come under the Education of the Handicapped Act, that I am proposing to permanently authorize with this legislation.

These programs include: Centers and services to meet special needs of

the handicapped, training personnel for the education of the handicapped, research in the education of the handicapped, instructional media for the handicapped, and special programs for children with specific learning disabilities. These additional project and contract grant programs play an important part in complementing the work that is carried out under the State grant program.

In order to understand the scope of these programs, we should realize that the term "handicapped children" as used under the Education of the Handicapped Act includes the mentally retarded, hard of hearing, speech impaired, visually handicapped, seriously emotionally disturbed, orthopedically or other health impaired, or children with specific learning disabilities requiring special education and related services.

Mr. Speaker, part C of this act, centers and services to meet special needs of the handicapped, has five basic sections. Section 621 provides funds for regional resource centers. These centers are given the reponsibility of developing a national support system to assist State and local educational agencies in the implementation of the individualized educational program requirements and the free appropriate public education requirements specified in Public Law 94-142. In addition, handicapped children are to be appraised, referred, and to receive other educational services as a result of this program's activities.

Centers for deaf and blind children are provided under section 622 of the act. The purpose of this program is to provide assistance to deaf and blind children by helping them reach their full communication potential so that they can reach self-fulfillment and participate in society. A strong effort is made to identify and work with deaf-blind children as early in life as possible. In order to get the best results, it is important to provide effective consultative services to parents, teachers and others who play a role in the education of these special children.

In order to reach the widely dispersed deaf-blind population, it is necessary for the centers to subcontract with approximately 250 to 300 State, local, and private organizations. There is also a need to alleviate the acute shortage of trained teachers and teacher-aides in this field.

Early childhood education for handicapped children is the focus of section 623. This program is designed to build the capacity of State and local educational agencies to provide comprehensive services for handicapped preschool children (birth through 8 years of age). The program supports demonstration and outreach projects in an attempt to accomplish this purpose.

A study to determine where graduates of these projects were placed indicated that about two-thirds of them were placed in regular school classes or regular school classes with ancillary special education services. An evaluation of the program, conducted by Battelle Columbus Laboratories, also showed that projects that had medium child-staff ratios, were home based, and that had developed and used their own curriculum materials appeared to have the greatest impact on handicapped children.

Severely handicapped children receive help under section 624 of the Education of the Handicapped Act. This program, like many others relating to handicapped education, has as its ultimate educational and training goal for severely handicapped children the provision of appropriate self-development experiences to these special members or our society. These experiences are designed with the objective of helping the severely handicapped reach their maximum potential of developing into self-sufficient individuals normalized. community/home/ neighborhood environments.

This program is a major vehicle for the implementation of Public Law 94-142. Therefore, I am hopeful that all regions of the country will eventually be reached with demonstration projects that are appropriate for their needs.

The final section of part C, section 625, deals with regional education programs. Under this program, grants and contracts are awarded for the development and operation of specially designed programs of vocational, technical, postsecondary, or adult education. The objective that is being sought by these actions is the enhancement of the skills of handicapped students. They are then better able to acquire career positions in the professional, skilled and unskilled labor markets.

The challenge of training personnel for the education of the handicapped is addressed in detail in part D of the act. Financial assistance for the training of special and regular classroom teachers, supervisors, administrators, researchers, teacher educators, speech correctionists, and other special service personnel such as specialists in physical education and recreation, music therapy and paraprofessionals is provided in this part of the act.

In an effort to encourage people to enter the field of special education, a great deal of cooperative action among various agencies is essential. These agencies try to promote a greater awareness of the availability of services for the handicapped. In addition to making handicapped individuals more aware of services that are available to them, this kind of public relations activity also helps to spur the interest of people who tend to be con-

cerned about these issues. The more interested they become, the more likely they are to make a career out of

this kind of work.

There is also good reason for the Government to support innovative research under the Education of the Handicapped Act. Such research plays an important role in providing the effectiveness and efficiency of the handicapped educational system. Part E of this act provides funding for this vital, forward-looking work. Grants and contracts are awarded for research, surveys, or model demonstrations relating to education of handicapped children. Additionally, grants are made for similar activities relating to physical education or recreation for these special children.

In recent years, research projects have also supported the following types of program activities: Programs for orthopedic and otherwise health impaired children, hearing impaired children, programs for the mentally retarded, programs for speech impaired, visually impaired, emotionally disturbed, learning disabled, and other programs classified as noncategorical.

During fiscal year 1979 the innovation and development program distributed over 50 products relating to the education of handicapped children and an equal number of publications in professional journals. Validated curriculum materials designed specifically for the speech and hearing impaired and mentally retarded were also made available.

The instructional media for the handicapped program, part F, also provides a valuable support service for State and local agencies. Under this program, a loan service has been established for captioned films for the deaf and related educational media for the handicapped. Educational materials are made available in the United States for nonprofit purposes to handicapped persons, parents of handicapped persons, and other persons directly involved in activities for the advancement of the handicapped.

In fiscal year 1978, captioned films distributed to deaf adults and to schools and classes for the deaf reached approximately 4 million deaf persons of all ages. Captioned television news reached an estimated 6 million persons daily per broadcast from over 140 stations. These materials are crucial when dealing with the unique learning problems of the handicapped.

While part G of the Education of the Handicapped Act—special programs for children with specific learning disabilities—has been incorporated into the Education of All Handicapped Children Act, Public Law 94-142, there is still a good case to be made for maintaining a separate authorization for this essential purpose. Future Congresses should continue to address this need and utilize this program to pro-

vide supplementary services to this deserving group of people.

Mr. Speaker, I feel that it is essential for us to recognize the progress we have made toward providing an equal and appropriate education for handicapped children. We should now make a commitment to maintain, at all levels of government—Federal, State, and local, the vital programs that have done so much to enhance the opportunities that are available to these special citizens.

I urge my colleagues who share in this concern to join me in supporting this vital legislation. By doing this, we can send a message to handicapped individuals, their families and millions of American citizens who favor such a commitment to this deserving group of people. Let us pledge today that we will not allow these children to be forgotten.

□ 1445

THE NATIONAL TOURISM POLICY ACT OF 1981

The SPEAKER pro tempore (Mr. COELHO). Under a previous order of the House, the gentlemen from Vermont (Mr. Jeffords) is recognized for 10 minutes.

Mr. JEFFORDS. Mr. Speaker, tourism is the largest employer in 18 States, including my State of Vermont, the second largest in 15 States and the third largest in six States, according to employment information recently released by the Labor Department and analyzed by the U.S. Travel Data Center.

It produces well over \$140 billion annually in revenues and generates nearly \$17 billion in taxes. The travel and tourism industry contributes to a reduction in unemployment by providing more than 6½ million Americans with jobs. This is a labor-intensive industry, which employs many individuals who fall in the "hard to employ" category.

Historically, tourism has been an important component of Vermont's economy. In 1977, the total domestic and Canadian travel-generated business receipts for the five principal aspects of the travel industry in Vermont was \$783,529,000. Of this total. \$307,030,000 was for meals and alcoholic beverages, \$192,244,000 for lodging, \$112,921,000 for recreation and entertainment, \$87,131,000 for gifts and incidentals, and \$84,203,000 for transportation.

The payroll in Vermont in 1977 attributable to domestic and Canadian travel is estimated at the \$127,302,000 level, with 35 percent going to meals and alcoholic beverages, 34 percent to lodging, 14 percent to recreation and entertainment, 10 percent to transportation, and 7 percent to gifts and incidentals. Domestic and Canadian travel-generated employment for 1977

was roughly 23,000 full and part-time jobs.

The four charts below summarize the primary economic impact of domestic and Canadian travel; the fiscal economic impact of travel; the sales tax rates; and the potential multiplier effect of travel-related payroll and employment for Vermont, based on 1977 figures:

PRIMARY ECONOMIC IMPACT-1977

[Dollars in thousands]

Expenditure category	Travel expenditures	Payroll ¹	Employ- ment ¹
Transportation Lodging	\$84,203 192,244 112,921 87,131 307,030	\$12,306 43,315 18,395 9,349 43,937	1,000 7,000 4,000 2,000 9,000
Total	783,529	127,302	23,000

¹ It is invalid to divide payroll by employment to determine average wages since employment includes both full- and part-time jobs.

Source: From "Executive Summary, Study of Economic Benefit of Vermont's Travel Industry, August, 1979" prepared for the State of Vermont Agency of Development and Community Affairs by Laventhol & Horwath.

Mr. Speaker, H.R. 1311 is the product of 6 years of study and 3 years of legislative consideration. It is the result of contributions by Members from both sides of the aisle, and is consistent, I am pleased to say, with the Reagan budget. Because the features of last year's bill which would have provided for a Federal regulatory role have been dropped, it has the support of the administration. Just a few more comments. There are several reasons for making the administrator of the USTTA an Under Secretary of Commerce: It is critical that we upgrade the visibility of tourism within the Commerce Department so that we can get the maximum use from a reduced level of funding; it is essential that the administrator be of high rank so that he will be able to enlist support for a coordinated effort from all the Federal agencies involved in one

like the only logical alternative.

Finally, Mr. Speaker, I cosponsored and supported last year's bill, H.R. 7321, and I have cosponsored H.R. 1311. I plan to continue supporting tourism and travel as a member of the Congressional Travel and Tourism Caucus, and want to commend the gentleman from Nevada (Mr. Santini), for his splendid leadership in this

way or another with tourism; and fi-

nally, unlike most of our international

competitors, we have not conferred on

our third leading industry a cabinet-

level post—an Under Secretary seems

Thank you, Mr. Speaker.

THE SO-CALLED TAX BILL

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. Gonzalez) is recognized for 30 minutes.

Mr. GONZALEZ. Mr. Speaker, with respect to today's action and, what is more important, in view of the environment—economic, financial, fiscal, monetary, national and internation—that surrounds the final action of the House this afternoon, I think it is necessary that we stress just exactly what is happening from a point of view that just has not been heard. It is not that it has not been expressed. It is just that it has not been reported. It has been submerged in the general deluge of the onrushing course of events that modern times brings.

But today, with the approval of the version of the so-called tax bill, we have the most extensive, massive incomes transfer, transfer of wealth, from the lowest, poorest economic rungs of the ladder in our country to the richest in the history of our country as a nation. Never has this extensive transfer of income occurred either way and particularly through a tax

policy that is linked with a budgetary course of action that further presses this crown of hardship on the least able of our country.

Now, let there be no mistake. There is no question that this tax bill has not really been reported in its entirety, with all of the implication involved. There is no question of that. I have sat patiently through all of the debates in the initial periods, subsequent periods, and today. I think what ought to be stressed, also, is that the conference worked over during the weekend and reported this afternoon does not show some of the provisions that, under my impression, were not reconcilable, that is, they are new angles to provisions that have not been evaluated. At no time were there hearings, and neither did they form part of the corpus of reconciliation between the House version and the Senate version.

Now, this has happened before, and naturally there have been complaints about it. It has happended in other bills where the conferees have come in with what we have known among us as sleeper clauses that do not get detected until after the bill has become law. I want to warn my colleagues that there are some unchartered, hidden and yet-to-be evaluated provisions in this conference report, fine nuances that will mean millions of dollars to special interests, as all of our tax bills have in the last 10 years.

But this great transfer of income is something that all we can do is pray and hope that the old saying about the United States, that the United States and drunks seem to be under the special divine care of God, is the only reason we are saved. As I see it, given the conjunction of events, though—and hoping I am dead wrong-it looks to me as if for the first time in our history we have embarked on a course that is calculated to create a stratified class system, a lumpen proletariat, if you please, because the rigorous confines of these enormous income transfers of moneys and wealth from the poorest element to the richest, with the hope that the trickle-down theory will work is why I

I am pessimistic. And, believe me, I say I hope I am wrong. I certainly do not want a President to fall on his face, no matter how much politically I may not be in his favor. But at the same time, I think it is an unpardonable error that many of my colleagues are committing who are saying, "Well, let us just hope for the best. There is nothing we can do, so we will go along and hope that it will work."

say we must pray.

We cannot cavalierly dismiss our reasoning processes. We have history to study. We have the history of tax bills, some of recent enactment. We know what has worked and what has not. We know that this tax bill, to a certain extent, is a fraud, as I charged

the last two so-called tax reduction and tax reform bills. Remember, they were titled, in 1978 and 3 years before, "the great tax reduction and tax reform bills." They were neither.

I think that today there would not be such an outcry to reduce taxes if those tax bills had in deed and in fact reduced our taxes, as I think the same thing will happen here. I hope not. But reason and the logical conclusions from the facts clearly indicate that, other than a wish and a prayer, there is nothing in these tax bills to anchor down the compliance with the intended purpose of the tax bills. The President tells us, Mr. Stockman tells us, the Secretary of the Treasury tells us, all of the Republicans tell us, that this tax bill is predicated on the so-called supply side of things, that this is just a refined phrase for the old trickledown theory, that the working class. the poorer economic class, cannot be smart enough to know how to invest their money; therefore, if the wealthy are all right, if we can heap upon them multiplied wealth, why, somehow that will trickle down to us less happier citizens.

This is the hope that this tax bill is predicated on because they—the Kemp-Roth people—talk about how the savings and these restorations of income by way of tax reductions will be invested in productive lines. Yet there is nothing in the bill that will insure that. If this is the way they really meant it, why not a provision similar to those that the Kennedy tax cut bill in 1962—and I was a Member of Congress then—did provide? Obviously because it would not have passed, it would not have paroval.

So we have here, as far as I am concerned, the hope, the will-o'-the-wisp hope, that these \$120 billion worth of tax transfers just to the wealthiest and the most affluent classes and corporations in our society somehow prayerfully will be reinvested in productive enterprises that will put people to work and Americans on the payroll and Americans consuming the goods that those productive efforts will somehow, hopefully, be engaged in.

The truth is, it never has happened. I doubt that it ever will. Wealth is power. And power, as Frederick Douglass says, yields nothing except upon demand. It never has and it never will. We are talking about the most powerful elements who in our history have not winked an eye to sacrifice the national interest for their own plutocratic, selfish, and egregious greed. Our history shows it.

So that in the absence of a correlation in the tax bill between the savings and the kickbacks and investment mandatorily dictated into productive lines, I predict it will not happen. Well, that is one side of the picture. But in the meanwhile, this Congress also approved Gramm-Latta and the so-called Budget Reconciliation Act. In light of the fact that we have deprived two and we are going into three generations of Americans of this priceless American dream of property ownership, a home, a decent, safe, hygenic home, for any American family that dreams of having one, this was the hope and the prayer.

Our President says none of the programs of the last 20 to 30 years have worked. This Congress sat supinely by, even with Members on its roster who had a big hand in the shaping of those programs and policies and let this big lie get afoot and abroad in the land.

What are the facts? The facts are that the programs worked. Democratic programs, if you please. Housing. It was Democratic programs that housed Americans over 40 years through wars, depressions, sequela to wars and recessions.

□ 1500

Forty years ago, over 65 percent of America was ill housed in substandard housing. After 40 years of Democratic control, fought every inch of the way by the Republicans, like social security, America was housed, despite wars, despite the depressions.

FHA, for example, which this administration had targeted for zeroing out at the beginning of this year. except for the fact that some of us challenged them and brought Mr. Stockman over to our Subcommittee on Housing, and made him back up. That is not reported in the press. At least not generally or generously as the defenders of the administration have. But it is a fact. And it is a fact that the programs work. It is a fact that the poverty programs reduce poverty. We reduced the level of poverty by hundreds of thousands of families. Those are facts.

What are the facts today? A housing crisis that has built up. The administration admits there is a crisis. What is their response when I asked Mr. Stockman, Secretary of HUD Pierce? They said, no matter what the crisis is, no matter what the need is, it must and shall wait until the President's ERP program, that is, the economic recovery plan, is in hand and working. Then we will see.

In the meanwhile, we are going to appoint a national study commission. Well, that is what Herbert Hoover did in 1932. But at least it is not a throwback to Calvin Coolidge which Dave Stockman and the President himself say they admire.

Why, the President has taken down the portrait of Harry Truman from the White House and substituted therefor Calvin Coolidge. And he said Calvin Coolidge is one of those he admires. Why, he cut taxes, too, in 1928.

Mr. Stockman says, that he admires Coolidge, too, and that there is no responsibility on the part of the Government to address itself to any of these problems. He said that nationwide on TV. At least Herbert Hoover recognized the responsibility, because he appointed commissions to study wherein that responsibility would be. Calvin Coolidge never did. He was a total believer in absolutely no responsibility on the part of Government.

Let it be subject in frozen difference as President Roosevelt once described it. This is what we are coming back to. It is awesome in its implications. All of the indications in our Banking Committee, we have this discrepancy, where the Secretary of the Treasury's assistant comes in and says there is no crisis among the savings institutions and if a few savings and loans go under, it is too bad. We should not do anything. Let them go.

But then here comes the newly appointed Reagan appointee, chairman of the Federal regulatory body, over the savings and loans, and he says:

Oh, wait a while. There is a crisis, at least 33 percent of these institutions are under the shadow and unless you all do something, something dire is going to happen and it will be your fault.

Now, I hope I point out by this that my criticism is bipartisan because I am trying to get the chairman of our committee to call back these individuals. They both cannot be right. We have a responsibility. We have a responsibility of national policymaking with respect to these financial institutions, because they have everything to do with what, with housing, and housing and construction has everything to do with the prosperity or lack of it of this country. It is inexorably tied in.

Will our Democratic leaders do it? I do not know.

On the tax bill, what happened? What were the alternatives? I have said all along, because I am and up to now have been a Democrat. That is the only time the Democrats are in trouble and lose is when they do and adopt the same things that the Republicans do, and one of the favorite Republican cries through the years has been, "Me, too," but not as much. This is exactly what the Democrats are doing and this is why they are losing.

I would not have voted for the versions of the tax bills presented to this House at this time, either the administration's or those proposed otherwise, because I believe, and I hope I am wrong, that time will show us how deleterious and counterproductive they are to the greatest interest of the greatest number and future economic well-being of this Nation.

In fact, not so the future, just the immediate future. There are many things that are descending upon us, some of which we can have an impact

on, some of which we cannot. At least up to now.

We have not devised means, strategy, or purpose, in controlling some of the international forces that impinge on us, such as the oil or energy situation, which again is one of the key factors, like our building and construction economy.

absolutely inexorably They are linked. One cannot go well without the other. And we cannot have prosperity and well being and economic recovery in this country if our construction industry is sunk in depression and unemployment, as it is, and our businessmen are going out of business, because at the same time that we are making this massive transfer of funds, we have a Government that says that it is wrong for labor to be asking for wage increases, but there is nothing wrong to have the giants, the giant corporate interests, the multibillion dollar sucking up over \$50 million of banking resources. That ought to be available to the people, that ought to be available to fire the engines of industry and the mechanisms of business, especially small business.

It is all right for them to suck up for what purpose, to gobble each other up in gigantic struggles, cannibalistic-like in eating up and gobbling the lesser fortunate giants. This is where the money is going. This is where the bank credit is going and our money managers and our administration say it is none of their concern. What is wrong with that? But at the same time that all of this money and bank credit is available to these giants, at low interest charges, a poor merchant on the street in any industry in America, who wants to have a line of credit to have his inventory, to stay in business, must pay loan shark interest rates to get that line of credit.

The bankruptcy rate has mushroomed just in this last quarter of this year. And if the fate of small business is here and this House today acted no different, if the administration is wholly indifferent to the fate of these small businessmen, the average family, and the average family is what got lost.

I never thought I would see the day where we in the Congress were talking about the average family with \$50,000 income. I just never thought I would hear that day and see that day and yet this is what we are talking about. Is it because we in the Congress average more than that? Have we forgotten where we come from? Have we lost touch with our overwhelming predominant majority of the American people?

I know in my district, 50,000, \$50,000 is Rockefeller like in my district. Maybe it is because I have pockets of poverty even now. But I want to say at least I am mindful of the fact that the

Government is not here and its purpose is not to sever any one category. whether it is business, or whether it is the bankers, or whether it is us-it is here to look out after the greatest interest of the greatest number, and I am afraid that with the approval of this tax bill, in conjoinder with the other budgetary and fiscal actions this Congress has taken, we have doomed the economic freedom of this average American.

Mr. CONYERS. Mr. Speaker, will the gentleman yield?

Mr. GONZALEZ. I yield to the gen-

tleman from Michigan.

Mr. CONYERS. I would like to commend the gentleman on his discourse and associate myself with his remarks and advise him that our colleague from Ohio (Mr. SEIBERLING) asked the CBO to determine how much more this tax bill costs as a result of the bidding war that the gentleman referred to in his remarks.

His answer to me by telephone was that it costs us \$142 billion additional.

Mr. GONZALEZ. I thank the gentleman for giving me that very valuable piece of information. I did not know the exact amount. I did know the taxpayers are funding it. This is what I was trying to get at. The ludicrous situation where a President and his supporters tell us that it is inflationary to have a minimum social security, \$122 for a handful. It is inflationary.

But it is not inflationary to provide \$5 billion for the international banking institutions so that they could make that recourse available to the giants like Chase Manhattan, First City National, that have sunk \$47 billion into less happier lands and countries and who cannot pay their loans back unless they get that IMF \$5 billion from the taxpayers of the United States.

I am just sick and tired of seeing the David Rockefellers blame inflation on the food stamp beneficiaries, social security beneficiaries, when they are the biggest tax boondogglers, tax dodgers, tax eaters, tax consumers which we have in this country.

Mr. VOLKMER. Mr. Speaker, will

the gentleman yield?

Mr. GONZALEZ. I yield to the gen-

tleman from Missouri.

Mr. VOLKMER. I would like to commend the gentleman also, and I would like to point out to the gentleman that in listening to the gentleman, I think there are going to be a lot of people who are making under \$50,000, especially those making under \$25,000, who, come October, when they get their first paycheck from this new tax cut, they are going to be very disappointed when that tax cut in that paycheck is only going to be 50 cents more a week or \$1 or \$2 a week.

I, too, have about 80 percent of the people in my district on an average who probably will get maybe \$2 a week at the most from the big tax cut. It is INNOVATIVE LEGISLATION IN FIthe largest in the history of this country, over \$700 billion. And while those people are getting \$1, \$2, \$3 a week, the oil companies, the oil producers, the special interest people, they will be getting a lot of money.

I commend the gentleman for his statement and I think in due time, the American public, the American middle-income, low-income people, are going to wise up and wake up to the new economic program and decide it really was not for them but it was for the wealthy people.

Mr. GONZALEZ. I thank the gentleman from Missouri and I conclude by saying with a great deal of foreboding that I hope it does not become necessary for this country to have to learn the hard way the experience of other lands that have followed these tactics.

As a matter of fact, I deplore the things that are happening now most of all because they are avoidable. However, as I see it, some means must be found to reverse, and soon, this process of stratification, crystallization of our classes.

Where we are going may produce a lumpen proletariat European-like; fortunately, we never reach the point of Asian-like.

PERSONAL EXPLANATION

Mr. VOLKMER. Mr. Speaker, on Thursday, July 30, due to a previous commitment in my district, I was unable to be present when the House passed H.R. 4121, Treasury and Postal appropriations for fiscal 1982, on a vote of 323 to 94. Had I been present, I would have voted "yea" on final passage and "yea" on rollcall No. 182, an amendment to prohibit the use of Federal funds to pay for Federal employee health benefits which would pay for abortion. Also, I would have voted "yea" on rollcall No. 183, an amendment to prohibit the use of funds for affirmative action programs; and on rollcall No. 184, an amendment to cut \$13.6 million from the Savings Bond Division of the U.S. Treasury, I would have voted "yea."

REPORT ON RESOLUTION AU-THORIZING BUST OR STATUE OF MARTIN LUTHER KING, JR., TO BE PLACED IN CAPITOL BUILDING

Mr. HAWKINS, from the Committee on House Administration, submitted a privileged report (Rept. No. 97-217) on the concurrent resolution (H. Con. Res. 153) authorizing a bust or statue of Martin Luther King, Jr., to be placed in the Capitol, which was referred to the House Calendar and order to be printed.

NANCING FEDERALLY BACKED WATER PROJECTS

(Mr. PASHAYAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PASHAYAN. Mr. Speaker. today I introduced a bill which is an innovative idea in financing federally backed water projects across the country: financing by private money from the tax-exempt bond market. This method should reduce the cost of water projects to the U.S. Government and result in the completion of water projects more expeditiously.

WELCOME TO THE NEW AMBASSADOR FROM ITALY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. Annunzio) is recognized for 5 minutes.

• Mr. ANNUNZIO. Mr. Speaker, his Excellency, Rinaldo Petrignani, the new Ambassador from Italy, presented his credentials to the President on July 10, and I welcome him and extend my best wishes to him for a most successful mission in the United

Italy is a strong ally of the United States, and is a vital and pivotal member of the North Atlantic Treaty Organization-the NATO Alliance-in opposition to Communist aggression. Our peoples have longstanding ties of affection, ethnicity, and culture, and I bring the attention of my colleagues to Ambassador Petrignani's remarks on July 10 addressed to our country's Italo-American community and to Italians residing in the United States.

An unofficial translation of the Ambassador's remarks follow:

After presenting my credentials to President Reagan, I want to begin my official service in the U.S.A. greeting heartily both American citizens of Italian descent and the many Italians who live in the U.S.A.

It is an honor for me (and I am very conscious of it) to represent Italy in this great country that I know and admire because of my previous appointments here for many years. It is a great personal satisfaction for me to come back and see again old friends and familiar faces. Most of all to visit again the U.S.A., this country so generous, full of human resources, energy, and faith in the future. A country which is in its ideals, affections, and politics so very close to Italy.

I always felt that the relationship between Italy and the U.S.A. is based on a long and deep friendship. Mutual ideals fostered the development of our two countries as modern states. Both the American Revolution and the Italian Risorgimemto were inspired by a similar thought; the independence of a nation as a means and guarantee for individual freedom.

A western vision has directed the unification of Italy as well as the present politics of Italy. In this the Italy of De Gasperi, Einaudi, Sforza, joins the Italy of Mazzini, Cavour, Garibaldi; and in this, Italy is still

19555

nowadays as in the past finding in the U.S.A.—the anchor of the political ideals of the entire western world—a source of inspiration and a vital referral point.

Yesterday, as today, American power and idealism—the power serving the idealism—are a source of encouragement and a guarantee for all free men wherever they may be in the world.

America's many citizens of Italian descent form a particularly strong tie between Italy and the U.S.A. with the traditions, the culture and the creativity that your fathers and you all have brought to this country. In contributing through your work to the formation and the progress of this great nation you have participated in a majestic historical realization. We, in Italy, are proud that through your participation our country could be indirectly present in the development of America. In performing your role you have not indeed forgotten that finding here a new generous and great home should not make you forget your origins nor your pride in being from a country which contributed immensely and uniquely to modern

Many things show your attachment to Italy. I would like now to recall with emotion and gratitude the latest and generous solidarity actions so many of you took in support and help of the victims of the earthquake which devastated a large part of southern Italy—these are very appreciated actions. With the passing of generations your relationship with Italy becomes more and more a part of the reality of the U.S.A., and Italy is glad that this part of America that you represent is trying to rediscover and know the old country.

Italy that you recall and love occupies now an important place in the western political structures. Friendship and close cooperation with the U.S.A., both bilaterally and within the Atlantic Alliance, are one of the cornerstones of Italian foreign policy. The broad agreement existing among the political forces reflects the opinion of the vast majority of our people. The continuity of the Italian foreign policy has been based for more than 30 years on this friendship and cooperation. Its attachment to the democratic system, its desire for civil progress, the continuity of its foreign policy make Italy stable in spite of the difficulties and the problems that it has to face.

At other times in the past Italy proved its extraordinary power of recovery. The vitality of its industry, the hard work of its working classes are the best guarantee that relying on Italy's friendship is a good investment.

In working—according to our personal responsibilities—for strengthening the friendship between Italy and the U.S.A., we have to remember that we are not only serving the interests of our two countries but we are also fostering and strengthening good and peaceful relationships among all people who believe in the values of democracy

Finally, I am happy to have the opportunity to wish you all prosperity and success; and I hope that the continuation and broadening of the dialogue with all Italian American communities will improve more and more the relationships between Italy and the U.S.A. and will contribute to stressing your constructive support to the peace and the progress of this great country, friend of Italy.

CHANGE AT THE FDIC

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Rhode Island (Mr. St Germain) is recognized for 10 minutes.

• Mr. ST GERMAIN. Mr. Speaker, Irvine H. Sprague, who held top staff positions in the House of Representatives for a number of years, is resigning as Chairman of the Federal Deposit Insurance Corporation [FDIC]. At the request of the White House, Irv will, however, serve out the remainder of his 6-year term on the FDIC Board which expires in 1985.

Irv has a long record of service to the House and to the Nation. He was executive director of the House Democratic Steering and Policy Committee under Speaker O'Neill and held other key House positions, was Special Assistant to President Lyndon Johnson, and deputy director of the California Department of Finance under Gov. Pat Brown.

As Chairman of the FDIC, Irv performed in the same outstanding fashion as he did in the House.

It has been a pleasure to work with Irv at the FDIC, and I know that the members of the Committee on Banking, Finance and Urban Affairs feel the same way. Irv is a good friend. He is knowledgeable and astute. He has been a good witness at our hearings, and he has always been very forthcoming and helpful to the committee.

I know that Irv's many friends in the House want to wish him well as he embarks on his new role at FDIC. President Reagan sent Irv a personal letter commending him for implementing "wide-ranging and innovative programs for efficiency and economy". I ask unanimous consent to include in the Record the text of the President's letter to Chairman Sprague and excerpts from an article in the FDIC news listing some of the achievements of Chairman Sprague at the FDIC.

THE WHITE HOUSE, Washington, July 29, 1981.

Hon. IRVINE H. SPRAGUE,

Member of the Board of Directors, Federal Deposit Insurance Corporation, Washington, D.C.

DEAR MR. SPRAGUE: As you step down as Chairman of the Board of Directors of the Federal Deposit Insurance Corporation, I want to take this opportunity to express my appreciation for your service to the Nation in that capacity.

Under your leadership, the Federal Deposit Insurance Corporation has implemented wide-ranging and innovative programs for efficiency and economy. During the years ahead, I am sure that you will be able to look back with pride on your accomplishments.

You have my best wishes for continued success during the remainder of your term as a Member of the Board of Directors.

Sincerely.

RONALD REAGAN.

EXCERPTS FROM AUGUST 1981 FDIC NEWS LISTING INITIATIVES UNDERTAKEN DURING CHAIRMAN SPRAGUE'S 30-MONTH TENURE

 A pay schedule that rewards division heads, and regional directors at a scale above those they supervise, but below the Board of Directors.

Purchase of a building adjoining the Washington headquarters to consolidate operations and save substantial rental costs.

3. A rotation policy among top officers of Division of Bank Supervision to provide for career development and to insure that no officer regulates the same bankers for too long a period.

4. A policy of negotiating settlements for long-standing lawsuits with a resultant

saving of millions in legal fees.

5. Instructions to deal fairly but firmly as we enter the era of unions in government, always keeping in mind how best to handle each situation in an equitable manner.

6. Persistent instructions to divisions to hire and to identify for promotion highly qualified minorities, women, and the handicapped to position them for eventual promotion to the top jobs in the Corporation.

7. A policy of greatly increased use of monetary awards to recognize and reward

outstanding service.

8. A creative and imaginative package to save the First Pennsylvania Bank, then 20th largest in the nation.

9. Creation of a thrift industry task force to monitor closely and analyze all possible approaches to the thrift problem.

10. A new program providing substantial Corporation assistance to those who relocate at Corporation request.

11. Creation of a Regulation Task Force to examine all FDIC regulations, eliminate those not necessary and simplify the others.

12. A program of banker seminars to explain to the industry how best to comply with the many consumer laws.

13. A liberalization of bank examiner borrowing capabilities, with particular reference to use of credit cards.

14. Substantial simplification of all application forms and a speeded-up processing procedure.

15. A reorganized Division of Bank Supervision to better equip it to handle the problems of the 80's.

16. A consumer outreach program, including publication of FDIC pamphlets in both Spanish and English.

17. Regularly scheduled Board meetings each Monday so everyone in the Corporation could plan a steady and even work flow.

 A start on realinement in the regions by ordering the Richmond Regional Office closed in 1982.

19. Approval of a plan to install an employee health and exercise room in the newly acquired Washington office building.

20. A program to encourage young artists and at the same time improve the 6th Floor decor by a continuing series of art exhibits.

THE UDALL-OBEY-REUSS BALANCED BUDGET TAX BILL

The SPEAKER pro tempore. Under a previous order of the House, the gen-

tleman from Arizona (Mr. UDALL) is recognized for 15 minutes.

 Mr. UDALL, Mr. Speaker, I submitted the Udall-Obey-Reuss substitute tax package to the House of Representatives last week, and because of the very hectic nature of that day, did not have time to insert all of my remarks into the RECORD. While my plan was defeated, there continues to be interest in the package that Mr. OBEY and Mr. Reuss and I put together. In light of the outcome on the tax-cut vote, I wanted to insert this edited version of my remarks today. Some 144 Members of the House voted for the Udall-Obey-Reuss plan. I want to take this opportunity to share this full record of my comments with my colleagues as well as with my constituents in southern Arizona.

Let me take you back 4 years, because I want to make two points:

First, in March of 1977, we had a new President in town. We all said give the new guy a chance, and he went on television to tell us he had a comprehensive energy program to deal with the country's priority problem. He sent the plan to the Congress and said, could we please vote yes or no, up or down, as soon as possible, surely in the next few months, and send it back to the White House by the August recess.

But there was no bill—not in August 1977, not even in August 1978. The bill that was finally approved in October 1978 was pretty badly mangled at that.

Now let us move to 1981. We have another new President in town, and most Americans have been saying let us give him a chance. By April, he comes before the Congress to tell us that our economy and our energy policy are both in a mess, and here's his huge and difficult and complicated program to clean it up. Could we please act quickly, and give the President and the country some answers, preferably before the August recess?

Well, we have heard about our Democratic leadership stalling or failing to move quickly. It is a bum rap. We have worked hard and we have dealt with budget cuts of historic size.

Now we have given a President a program based on dangerous, far-reaching, unprecedented economic assumptions—not in 18 months, as was our response to President Carter, but in 16 weeks.

I have watched with increasing dismay these last few weeks as the leadership on the Republican side rallied around the President almost unanimously without asking the kind of tough questions about his policy that were asked—no, demanded—of President Carter's. And some of my Democratic friends, many of them, played a new round of a tired old game called, "my tax cut is bigger than your tax cut." Any number can play, but this year the stakes were extraordinar-

ily high and our country's whole economic foundation is at stake.

Again, let me return to 1977, because there is another parallel there to what we face in 1981:

Back in 1977, when Jimmy Carter and his new team came to town, they told us that they had promised during the campaign to balance the Federal budget, and that this pledge would be kept. But they had just looked at the new numbers and they said, well, hold on. We simply cannot do it after all in 1977 or 1978 and actually, 1979 did not look promising. But they would guarantee that by 1980—a new election year—a balanced budget would be a reality. As it worked out, we had a \$60 billion deficit.

Now, here we are in 1981. The President and his team, with David Stockman in charge, tell us that they promised to balance the budget and it's a pledge that will be kept. But they just looked at the new figures and they cannot do it in 1981 or 1982 and 1983 does not look all that great. But you can be sure that it will be balanced by 1984—which happens to be a new election year. Now they have even backed away from that, saying 1984 does not look so hot either. Maybe 1985.

We cannot wait that long.

I sense a real and dangerous skepticism in America today. People really question whether the Congress is doing anything, or can do anything about the economic mess we are in, or whether we are going to be serious about helping turn this country around.

I believe that nothing would do more to return confidence to our people and our financial and investment institutions than a balanced budget now.

I am not alone in that belief. The noted Wall Street economist, Henry Kaufman, has declared, "To fight inflation head on, the need is for the Government to achieve a balanced budget in fiscal 1982. This would chop inflationary expectations and, of equal importance, would reduce the role of the Government as a powerful demander of credit, thereby freeing savings to finance the private sector."

Our substitute was the only bill in the House or Senate which could have achieved that goal of a balanced budget, and it would have done it without mirrors or rash assumptions. And it did not touch the national defense appropriations we have already approved.

Our bill did not try to outpromise the GOP. We were not competing to see who could give the most to the oil companies or to investors who straddle the commodities market. We did not seek to engage in a "bidding war."

What our bill sought to do was this: First, to bring interest rates down and to begin the process now. This year, the Reagan administration is budgeting \$106 billion for interest on the national debt-the third highest item in the budget. The 1982 budget, depending on whose figures you use, will have a deficit in the \$50 billion to \$60 billion range. We need to take Government out of the business of outbidding businesses and individuals in the financial markets. In this way, we can free the capital that our country so desperately needs for productive enterprises. Our measure sought to drastically reduce outlays for interest on the national debt. Mr. Kaufman agrees here as well. In Business Week of July 13, 1981, he said, "If the (Reagan) tax cut is in place by October 1, we face a new significant increase in interest rates."

Second, our proposal sought to raise \$6 billion through tax reforms including the elimination of the oil depletion allowance and of commodity tax straddles. The revenue loss would have amounted to \$13 billion in fiscal 1982, but the estimated budget surplus for the year would have been \$2 billion, and \$20 billion by fiscal 1983.

Third, the same tax reforms would have provided the money to give Americans an honest tax break, phased in during 1982. It would not have been a tax break financed with borrowed money, which was part of the administrative plan that the House approved. Under the plan that is becoming law, taxpayers making \$15,000 a year or less, or 41 percent of the total tax filers, will get 8.5 percent of the 1982 tax cut. But people making \$50,000 or more a year, or 5.6 percent of the population, will get 35.1 percent of the 1982 tax cut. Who are we helping?

Let me digress for a moment and relate to you an imaginary conversation between Dave Stockman and a taxpayer. It reinforces some points I have tried to make.

Dave Stockman walks out of the White House and bumps into a man on the street, who makes \$15,000 a year, is married and has two children. The man introduces himself and recognizes Stockman.

"How are things going?" asks the man.

"Not bad," replies Stockman, "I have good news for you."

"What?"

"A tax cut," Stockman answers.

"Terrific," says the man. "How much will a guy in my bracket get?"

"You'll get about \$150," says Stockman.

"Yeah?" answers the man. "Well, that'll get me through a \$40 pair of Jordache jeans for my teenage daughter, a \$15 pair of tennis shoes for my boy, maybe a \$30 night out for my wife and I. I can buy two tanks of gas for \$30 and have \$35 left over for the supermarket. Not terrific, but better than nothing. Frankly, Mr. Stockman,

the thing that really pleases me is that you guys apparently have balanced the budget after all these years and you've got money left over to cut

our taxes.'

"Well, I have to be honest," says Stockman. "We haven't balanced the budget. Instead, the deficit has gone up, from \$40 billion to around \$60 billion. And if our program works the way this Mr. Laffer out in California says, and if our best case assumptions carry, we are going to have another \$128 billion in deficits before 1984."

"Hey, really?" says the man. "Then where will we get the money for me and other Americans to have a tax

Stockman says, "We'll borrow it. When I was a Congressman, I used to call that 'printing money,' or 'monetizing the debt.'

"But isn't interest a big item in the Federal budget this year?" asks the taxpayer. "I heard it's something like

\$80 billion."

"Well, yes, that's right. And we'll have to have some more interest payments, even larger ones, next year, if we have that additional \$60 billion deficit I mentioned. In fact, we've already budgeted \$106 billion just to pay interest next year."

"Won't all of that cut down the money supply that we need for capital investment in homes and buildings and all the rest?" said the man.

"I suppose," says Stockman. "But Dr. Laffer and Jack Kemp say we've got to try this for 3 years first."

"I've got to leave, Mr. Stockman," says the taxpayer. "But it seems to me we'd be a lot better off if we passed up a tax cut this year and got inflation under control and interest rates lowered and moved quickly toward a balanced budget-and then talk about tax cuts.'

End of story.

Except that I want to add that a CBS-New York Times poll of February, supported by other polls in more recent weeks, showed that by a margin of 70 to 23 percent, people would rather have a balanced budget before a tax cut.

If we are going to go into debt and drive up the cost of interest on the national debt by having tax cuts, at least we ought to put that money, almost all of it we allocated, into getting productive assets built and installed and giving people jobs and creating longterm economic activity.

Instead, what we have adopted as public policy, on which all our hopes rest, is that not only is there a free lunch, but we will give you a bonus for

eating it.

It is a little like going to see a doctor. Dr. Reagan says we have diagnosed your condition and run all the tests. We find that you have a strange combination of symptoms. Some of our tests show that you suffer from se-

rious high-blood pressure, and other tests show that you suffer from serious low-blood pressure. What we are going to do is give you two kinds of medicine, a pill for low-blood pressure for the right side of your mouth, and a pill for high-blood pressure for the left side of your mouth. Swallow both of them fast, and you will be well by the next election.

It will not work. George Bush was right when he called it "voodoo economics.

In heated debate, there are often key facts in dispute. Let me give you one which is not disputed: for all the talk by Candidate Reagan about balanced budgets, and all the talk by President Reagan about balanced budgets, the administration holds no hope for a balanced budget until 1984-or maybe 1985.

According to the administration's own optimistic figures and accepting all their assumptions, we are promised at best-I emphasize, at best-we are promised another \$128 billion in new budget deficits over the next 3 years. The numbers are stunning.

Computer folks have an old saying, "garbage in, garbage out." What they mean is that if you give your programer bad information, the computer will give you bad results.

Let me touch on three of the major assumptions we are offered as a guarantee that this untested program is

somehow going to work:

A tax-cut multiplier of 5, as against previous history in our Nation and others, of 2 being the best result you can expect. But the assumption in the Reagan-Kemp-Stockman plan is 5-a multiplier of 5-which has never happened anywhere in the free world as far as I know. Even Rudy Penner of the American Enterprise Institute noted, "There is no reason to think that a Kemp-Roth cut has 2, 3, or 4 times the power of any other tax cut we have tried."

The White House assumption that interest rates will drop to 9 percent by the end of 1982. Check with your banker and ask him if he believes that.

Inflation will be running at 6.2 percent by Christmas, 1982, and will drop even lower after that.

There is an old story about a politician who visited a small town, gathered voters in the town square and let fly with a long speech that detailed his program. When he finished, he paused, then declared, "Ladies and gentlemen * * * them's my views * * * and if you don't like 'em * * * then I'll change 'em!"

If the standard economic assumptions do not give the right numbers, Dave Stockman simply changes the assumptions. But they are phony, they are wrong, and they will not prove out. You cannot even find people on Wall Street who believe that a magic economic elixir has been discovered. Who says? Some samples:

Irving Shapiro, chairman of the Du Pont Co., in the Wall Street Journal of March 9, 1981: "All we've got to rely on is an economic theory. No businessman can run his company on an untried business theory and neither can a government."

Sam Nakagama, chief economist for the investment firm of Kidder Peabody, in the Journal of Commerce, February 11, 1981: "When a Republican Treasury Secretary calls for tax cuts to be enacted before expenditure cuts and amid double digit inflation and a rearmament program, it is an invitation to financial disaster."

And, from the Republican ranks:

Senator BARRY GOLDWATER, quoted by the Associated Press in the Tucson Citizen, February 13, 1981: "I don't think it (Kemp-Roth) will work, although I know that's not a popular thing to say. I don't think reducing the average income tax by \$20 or \$200 is going to make a great deal of difference."

Senator Howard Baker, the Tennessee Republican and distinguished Senate majority leader, on "Face the Nation," August 2, 1981: "What we're doing is really a riverboat gamble. We're gambling that this new economics will work.'

A real basic point in all of this is that the Udall-Obey-Reuss plan would have attacked high interest rates and provided for a balanced budget-not with gimmicks or a "riverboat gamble," but with a sound and solid approach.

We had a chance to enact a plan with a real assurance of a balanced budget, and we voted for one with a real assurance of \$128 billion more in

Now we must go ahead with what we have, and I will do my part to help see that the Reagan plan works. But I doubt that it will. Year after year, the American people have demonstrated that they want a balanced budget, and yet, when the time came, we gave the taxpayers more deficit spending. I fear we have played a cruel trick on the Nation, and that we may pay dearly for it in the years ahead.

THE HELPFUL ROLE OF THE NA-TIONAL SMALL BUSINESS AS-SOCIATION ON THE 1981 TAX BILL

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. Rostenkow-SKI) is recognized for 15 minutes.

• Mr. ROSTENKOWSKI. Mr. Speaker, as we review the July 29 House vote on the tax bill, a number of points should be made for the record.

The major questions before this body were the size of the tax cut, its division among business and individual taxpayers, and its distribution among the many sizes and kinds of industry.

The National Small Business Association and the Small Business Legislative Council devoted its March testimony to these issues. In that testimony, NSB pointed out that:

First, several prominent economists had cautioned against combining a 5year, \$718 billion tax cut with a defense budget of \$1.5 trillion and a tight monetary policy, even though the administration envisions nondefense spending reductions for the same period beginning with a proposed \$49.1 billion in fiscal year 1982;

Second, less than 23 percent of the administration's original proposal was earmarked for business:

Third, there had been no official analysis of the division of tax savings among various business and industry sizes, despite the fact that past Treasury studies have shown that more than half of the tax savings from investment credit and depreciation are claimed by the largest 2,000 corporations, which invest heavily in machinery and equipment;

The 10-5-3 business proposal, which orginated in the last Congress, was limited to investment credit and depreciation. NSB provided the studies to illustrate the unfairness and inequity of this approach for our Nation's 15 million small businesses, which are less capital intensive. These businesses account for 80 percent of new jobs, nearly 60 percent of all existing employment, half of industrial innovation, 48 percent of the gross domestic

product, and approximately 43 percent of the gross national product.

The association argued that an adequate response to small business needs would result in increased potential for savings, investment, productivity, competitive efficiency, and financial opportunity, all vital factors of any plan to revitalize the economy.

To this end NSB recommended 16 proposals that would provide tax equity for the small business community, including three provisions to enough revenue to cover the losses associated with its small business provisions. The association pursued these suggestions in public testimony to the Senate Finance Committee and elsewhere.

NSB continued to urge fiscal prudence as the size of the bill increased, and recently expressed grave concern about indexing. This provision is scheduled to begin in 1985, but its budget impact has been estimated for only 1 year. The outyear costs could present small business with an unbearable financial burden by raising interest rates to unprecedented levels. This would be devastating to small and independent business. Bankruptcies for the first 4 months of 1981 are up by more than 25 percent from 1980.

NSB repeatedly urged a bill balanced between capital- and labor-intensive industries; it contends that this is essential to our economic health, since each 1 percent increase in unemployment can swell the budget deficit by \$25 to \$29 billion and swamp any economic recovery plan.

On April 9, I addressed the Chicago Association of Commerce and Industry with my own proposals for an adequately balanced tax package. I advocated savings and investment incentives geared toward smaller, less-capital-intensive businesses. That same day, NSB sponsored a breakfast during which it presented these views to House Members and staff involved with tax issues.

Response to these arguments came from House Ways and Means Committee majority members, who committed themselves to a balanced bill, and from Small Business Committee members, who introduced major small business legislation.

The association then furnished the economic evidence to support these provisions and organized a coalition of small business associations to gain their acceptance. The Ways and Means Committee subsequently incorporated 13 of NSB's 16 proposals-11 in full and 2 in part-in its reported bill, H.R. 4242. Adoption of these provisions would have allocated an estimated \$26.6 billion in direct tax benefits to small business between 1981 and 1986 from the corporate rate costs, expensing, used machinery credits, and accumulated earnings provi-

As a result of the committee's inclusion of these proposals, the Hance-Conable bill, H.R. 4260, also incorporated 13 of the proposals-6 in full and 7 in part-to insure \$6.1 billion in direct savings for small business. As a result of the July 29 House vote for the Republican measure, the 13 NSB proposals listed below will be enacted, in whole or in part, into law.

SCORECARD AS OF JULY 29, 1981—PROVISIONS RECOMMENDED BY THE NATIONAL SMALL BUSINESS ASSOCIATION IN TESTIMONY OF MAR. 30, 1981, ACCEPTED INTO MAJOR HOUSE AND SENATE TAX BILLS

	Senate Finance Committee, House Joint Resolution 266	Administration (Conable-Hance bill H.R. 4260)
Increase in used machinery investment credit, up to at least \$250,000. 15-year period for structures, more flexible period for equipment. No depreciation on progress payments for property taking more than 2 years to build	Yes. Yes. Yes (20 percent regular, 25 percent historic structures)	Partial (same). Do. Do. Yes. Yes (same). No. Partial.
Credit against social security tax increases Capital gain tax reduction to 20 percent Estate tax exclusion to \$600,000 Inventory reform LIFO/cash accounting Research and development credit Savings incentives targeted to construction and local business/IRA-LERA	Partial study and indexing, pooling, and 3 year LIFO spread	Yes. No. Yes. Yes. Yes. Yes. Yes. Yes. Yes. Yes

^{*} Total accepted in whole, 6.

* Total accepted in substantial part, 7.

In addition, NSB has contributed important technical information and analysis throughout the bill's development. On numerous occasions, when the Treasury Department was unable to provide material, NSB has done so and has provided essential explanamation to Members of Congress and their staffs.

In summary, NSB has been an active partner in the formulation, development and writing of the business segments of the 1981 tax bill. It has been

tions and interpretations of that infor- a superb, effective advocate of the American small business community, which plays a major role in providing the products, services, jobs, innova-tion, competition, and opportunities that make our country great. Beyond this, NSB has shown us what a responsible private trade association can contribute to the economy and the public interest for all our citizens.

LEGISLATION INTRODUCED TO LEGALIZE STRIKES BY FEDER-AL EMPLOYEES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Michigan (Mr. Conyers) is recognized for 60 minutes and to revise and extend his remarks.

Mr. CONYERS. Mr. Speaker, today I have introduced legislation to extend to the air traffic controllers and all Federal employees the right to engage in full collective bargaining, including the right to strike. I would like to describe this legislation and urge its expedited consideration before the Post Office and Civil Service Committee, to which it has already been referred.

It seems to me, Mr. Speaker and those Members of the House who are remaining, that we have an unusual situation pending as we move to recess; namely, that the President of the United States has threatened action that is without precedent in the history of collective bargaining in the United States of America. Hopefully, to be of some assistance in this impasse, I have offered this legislation which would allow Federal employees to have the right to engage in other concerted activities for the purpose of collective bagaining or other mutual aid for their protection to the same extent as is permitted under Federal law in the case of employees in the private sector; and that in addition nothing should be construed to interfere with or impede or diminish in any way the right to strike or to effect the limitations or qualifications on that right.

I am asking that we call an end to the fiction of pretending that Government employees somehow are different from all of the other kinds of work forces in America, are precluded from the right to engage in collective bargaining which may sometimes, under certain conditions, include the right to

This legislation that I have introduced not only pertains to the air traffic controllers, but it pertains to all Federal employees, all of the many of whom may have collective-bargaining representation. It also includes post office workers, and to that extent it repeals that part of the Hatch Act.

Now, further, I would say to my colleagues that this right to strike needs to be considered in the light of the reality that policemen are striking throughout the United States, many of them legally. Firemen are striking. Doctors have the right to strike. Hospitals close down. Nurses strike, teachers strike, but somehow Federal employees, merely because they work for the Government and are in our collec-

tive grip, do not have the right to strike because, contrary to all of the laws on collective bargaining, we write it into the Federal law that they will not have the right to strike.

How come? Well, because of the socalled doctrine of public service, which says that they have a duty and a responsibility as public servants that they ought not to be able to enjoy those rights of collective bargaining that pertain to everyone else.

I say that to penalize Government employees by claiming their public employment precludes them from effective bargaining is a fiction that ought to shame at least a majority of the Members of the House and the Senate to repeal this anachronistic and outworn legislation. You can be a good and noble public employee, dedicated to the public interest, but in the course of collective bargaining by majority vote in your union, may have to resort to the right to strike. I suggest that that right is no less important to a small union like the air traffic controllers as it is to a large union like the post office employees.

So, I argue today and will before the committee that has jurisdiction over this legislation that the time has come that we remove the prohibition on full, unfettered collective bargaining of Federal employees, and to make it easier for this administration with the impasse that they are currently faced with, I make the legislation effective retroactive to January 1, 1981.

THE FEDERAL COURTS CIVIL PRIORITIES ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Wisconsin (Mr. Kastenmeier) is recognized for 5 minutes.

• Mr. KASTENMEIER. Mr. Speaker, it is with great pleasure that I, accompanied by the respected ranking minority member of my subcommittee (Mr. Railsback), introduce the Federal Courts Civil Priorities Act. In brief, the bill repeals virtually all provisions expediting civil cases in the Federal, district, and circuit courts. The proposed legislation permits the courts to establish the order of hearing for certain civil actions.

Although not expressly stated, it is envisioned that if a court wants to set its own priorities by local rule, it will fall under the residual responsibility of the appropriate judicial council of the circuit. Pursuant to a law passed by the 96th Congress—to become effective on October 1, 1981—the judicial councils must make all necessary and appropriate orders for the effective and expeditious administration of justice within their circuits. This gives the circuit councils residual authority to expedite certain types of cases within their circuits. The proposed legislation also provides that where

good cause is shown a matter can be expedited by an individual judge or court.

The bill does not affect existing priorities in criminal cases, as codified in the Speedy Trial Act, in rule 50 of the Federal Rules of Criminal Procedure and in rule 9(b) of the Federal Rules of Appellate Procedure. Likewise, several provisions that involve collateral attacks-through the writ of habeas corpus-on federally imposed criminal sentences and contempt orders for refusal to testify are left untouched. In reality, these types of cases are quasicriminal in nature. Last, as in present practice, actions for temporary or permanent injunctive relief will continue to receive priority treatment.

The genesis for the proposed legislation is in a resolution of the American Bar Association dated February 1977. In a report of the ABA Special Committee on Coordination of Judicial Improvements—the committee that recommended the resolution—the rationale for the legislation is bluntly stated:

The average practicing lawyer with a civil case on appeal to a Circuit Court of Appeals would be astonished if he were told that his appeal will never be heard. The word has not yet spread far, but, for the average civil case, that is exactly the situation in some Circuits, and it will soon be true in others. The reason? A mass of cases required by statute to receive priority hearing is docketed ahead of his, and more are being added faster than the existing ones can be handled.

Staff of my Subcommittee on Courts, Civil Liberties, and the Administration of Justice, working with legislative counsel and the Administrative Office of the U.S. Courts, have located 50 civil statutes that accord some sort of priority treatment in the courts in which the respective matters are brought. These civil priorities range from the Federal Insecticide, Fungicide, and Rodenticide Act to the Outer Continental Shelf Lands Act; from the Federal Seed Act to the Federal Sugar Act: from the Central Idaho Wilderness Act to the Railroad Unemployment Insurance Act.

An examination of all the priorities leaves the reader with the indelible impression that the creation of a statutory priority by Congress is not done pursuant to a legislative finding that the matter is more important than other matters which become the subject of litigation. Rather, it is done on piecemeal basis by drafters of legislation who are trying to get the best treatment for their bill's subject matter. Often after years of hearings, much debate and weeks of markup, legislative subcommittees become convinced that a particular matter raises the most important issues facing this country. As a consequence, a statutory civil priority is created and a matter filed in Federal court presumably gets better calendar treatment than other

kinds of cases. In this manner, Seed Act cases get preferential treatment over most securities, banking, or civil rights cases, which historically have not been accorded priorities.

In addition, now that there are so many priorities, with no cross-referencing between them, it is impossible for conscientious courts to determine fairly and rationally how to assign calendar priorities. Some of the priorities are mutually contradictory, each mandating that matters falling within a certain category be heard before any other case.

The numerous civil priorities have caused grave problems in the larger circuits. Although Congress, through legislation drafted by my subcommittee, recently split the existing fifth circuit into two autonomous circuits, in terms of caseload, the two new circuits still will be among the largest in the country. In the large circuits-in particular the ninth circuit-the docket becomes so crowded with criminal and priority civil cases that for matters without priority status the possibility of never being heard becomes a stark reality. As an alternative, in order to move on nonpriority cases, the circuit must ignore the express mandate of Congress and ignore priority cases. In both circumstances, citizen confidence in the administration of justice is lessened, either because of inordinate delays in nonpriority cases or because of failure to respect the mandates of a civil priority.

The bill is not only drafted to address past problems but to reduce the proliferation of priorities in the future. By stating that, "Notwithstanding any law to the contrary, each court of the United States shall determine the order in which civil actions are heard and determined * * *," the legislation allows courts to ignore newly created priorities not placed directly in 28 U.S.C. 1657. Other committees which want to create priorities will have to amend title 28, and this presumably will stimulate joint and/or sequential referrals to the Committee on the Judiciary. Then, the Judiciary Committee can maintain a more centralized and rational control than has existed in the past.

The concept embodied in the proposed legislation has already garnered substantial support in the legal and judicial communities. In addition to being supported by the American Bar Association, it has attracted support from the Court Administration Committee of the Judicial Conference of the United States. During its July 1981 meeting, the committee unanimously approved the bill and recommended endorsement by the Judicial Conference. The full Conference will consider the bill, and hopefully will approve it at its September meeting.

In conclusion, I urgently recommend the bill to my colleagues. The proposed legislation follows:

H.R. 4396

A bill to permit courts of the United States to establish the order of hearing for certain civil matters, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Federal Courts Civil Priorities Act".

SEC. 2. (a) Chapter 111 of title 28, United States Code, is amended by adding at the end thereof the following new section:

"§ 1657. Priority of civil actions

"Notwithstanding any law to the contrary, each court of the United States shall determine the order in which civil actions are heard and determined, except that the court shall expedite the consideration of any action brought under chapter 153 or section 1826 of this title, any action for temporary or permanent injunctive relief, or any other action if good cause therefor is shown."

(b) The table of sections for chapter 111 of title 28, United States Code, is amended by adding at the end thereof the following new item:

"1657, Priority of civil actions.".

Sec. 3. (a) The following provisions of law are repealed:

(1) Section 309(a)(10) of the Federal Election Campaign Act of 1971 (2 U.S.C. 437g(a)(11)).

(2) Section 310(c) of the Federal Election Campaign Act of 1971 (2 U.S.C. 437h(c)).

(3) Section 552(a)(4)(D) of title 5, United States Code.

(4) Section 1 of the Act of February 11, 1903, commonly known as the Expediting Act (15 U.S.C. 28).

(5) Section 21(f)(3) of the Federal Trade Commission Improvements Act of 1980 (15 U.S.C. 57a-1(f)(3)).

(6) Section 12(e)(3) of the Coastal Zone Management Improvement Act of 1980 (16 U.S.C. 1463a(e)(3)).

(7) Section 3310(e) of the Internal Revenue Code of 1954.

(8) Section 6110(f)(5) of the Internal Revenue Code of 1954.

(9) Section 6363(d)(4) of the Internal Revenue Code of 1954.

(10) Section 2602 of title 28, United States Code.

(11) Section 10(i) of the National Labor Relations Act (29 U.S.C. 160(i)).

(12) Section 4003(e)(4) of the Employee Retirement Income Security Act of 1974 (29

U.S.C. 1303(e)(4)).
(13) Section 304(e) of the Social Security
Act (42 U.S.C. 504(e)).

(14) Section 814 of the Act of April 11, 1968 (42 U.S.C. 3614).

(15) Section 23(d) of the Outer Continental Shelf Lands Act (43 U.S.C. 1349(d)).

(b)(1) Section 6(a) of the Commodity Exchange Act (7 U.S.C. 8(a)) is amended by striking out "The proceedings in such cases in the court of appeals shall be made a preferred cause and shall be expedited in every way."

(2)(A) Section 6(c)(4) of the Federal Insecticide, Fungicide, and Rodenticide Act (7 U.S.C. 136d(c)(4)) is amended by striking

out the second sentence.

(B) Section 16(b) of the Federal Insecticide, Fungicide, and Rodenticide Act (7 U.S.C. 136n(b)) is amended by striking out the last sentence.

(3) Section 204(d) of the Packers and Stockyards Act, 1921 (7 U.S.C. 194(d)), is amended by striking out the second sentence.

(4) Section 366 of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1366) is amended in the fourth sentence by striking out "At the earliest convenient time, the court, in term time or vacation." and inserting in lieu thereof "The court".

(5)(A) Section 410 of the Federal Seed Act (7 U.S.C. 1600) is amended by striking out "The proceedings in such cases in the court of appeals shall be made a preferred cause and shall be expedited in every way.".

(B) Section 411 of the Federal Seed Act (7 U.S.C. 1601) is amended by striking out "The proceedings in such cases shall be made a preferred cause and shall be expedited in every way."

(6) Section 816(c)(4) of the Act of October 7, 1975, commonly known as the Department of Defense Appropriation Authorization Act of 1976 (10 U.S.C. 2304 note), is amended by striking out the last sentence.

(7) Section 5(d)(6)(A) of the Home Owners' Loan Act of 1933 (12 U.S.C. 1464(d)(6)(A)) is amended by striking out "Such proceedings shall be given precedence over other cases pending in such courts, and shall be in every way expedited."

(8)(A) Section 7A(f)(2) of the Clayton Act (15 U.S.C. 18a(f)(2)) is amended to read as follows: "(2) certifies to the United States district court for the judicial district within which the respondent resides or carries on business, or in which the action is brought, that it or he believes that the public interest requires relief pendente lite pursuant to this subsection, then upon the filing of such motion and certification, the chief judge of such district court shall immediately notify the chief judge of the United States court of appeals for the circuit in which such district court is located, who shall designate a United States district judge to whom such action shall be assigned for all purposes."

(B) Section 11(e) of the Clayton Act (15 U.S.C. 21(e)), is amended by striking out the first sentence.

(9) Section 5(e) of the Federal Trade Commission Act (15 U.S.C. 45(e)) is amended by striking out the first sentence.

(10)(A) Section 309(e) of the Small Business Investment Act of 1958 (15 U.S.C. 687a(e)) is amended by striking out the sixth sentence.

(B) Section 309(f) of the Small Business Investment Act of 1958 (15 U.S.C. 687a(f)) is amended by striking out the last sentence.

(C) Section 311(a) of the Small Business Investment Act of 1958 (15 U.S.C. 687c(a)) is amended by striking out the last sentence.

(11) Section 155(a) of the National Traffic and Motor Vehicle Safety Act of 1966 (15 U.S.C. 1415(a) is amended by striking out "(1)" and by striking out paragraph (2).

(12) Section 503(b)(3)(E) of the Motor Vehicle Information and Cost Savings Act (15 U.S.C. 2003(b)(3)(E)) is amended by striking out clause (ii) and redesignating clauses (iii) and (iv) and clauses (ii) and (iii), respectively

(13) Section 11 of the Act of September 28, 1976 (16 U.S.C. 1910), is amended by striking out the last sentence.

(14) Section 1108 of the Alaska National Interest Lands Conservation Act (16 U.S.C. 3168) is amended to read as follows:

"INJUNCTIVE RELIEF

"Sec. 1108. No court shall have jurisdiction to grant any injunctive relief lasting longer than ninety days against any action pursuant to this title except in conjunction with a final judgment entered in a case involving an action pursuant to this title.'

(15)(A) Section 10(b) of the Central Idaho Wilderness Act of 1980 is amended by strik-

ing out paragraph (3).

(B) Section 10(c) of the Central Idaho Wilderness Act of 1980 is amended to read as follows:

"(c) Any review of any decision of the United States District Court for the District of Idaho shall be made by the Ninth Circuit Court of Appeals of the United States.

(16)(A) Section 1964(b) of title 18, United States Code, is amended by striking out the

second sentence.

(B) Section 1966 of title 18, United States Code, is amended by striking out the last

(17)(A) Section 408(i)(5) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346a(i)(5)), is amended by striking out the last sentence.

(B) Section 409(g)(2) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 348(g)(2)), is amended by striking out the last sentence.

(18) Section 8(f) of the Foreign Agents Registration Act of 1938 (22 U.S.C. 618(f)) is amended by striking out the last sentence.

(19) Section 4 of the Act of December 22, 1974 (25 U.S.C. 640d-3), is amended by striking out "(a)" and by striking out subsection (b)

(20)(A) Section 9010(c) of the Internal Revenue Code of 1954 is amended by striking out the last sentence.

(B) Section 9011(b)(2) of the Internal Revenue Code of 1954 is amended by striking

out the last sentence.
(21)(A) Section 2284(b)(2) of title 28, United States Code, is amended by striking out the last sentence.

(B) Section 2349(b) of title 28, United States Code, is amended by striking out the last two sentences.

(22) Section 10 of the Act of March 23, 1932, commonly known as the Norris-La-Guardia Act (29 U.S.C. 110), is amended by striking out "with the greatest possible ex-pedition" and all that follows through the end of the sentence and inserting in lieu thereof "expeditiously".

(23) Section 11(a) of the Occupational Safety and Health Act of 1970 (29 U.S.C. 660(a)) is amended by striking out the last

sentence.

(24) Section 106(a)(1) of the Federal Coal Mine Health and Safety Act of 1969 (30 U.S.C. 816(a)(1)) is amended by striking out the last sentence.

(25) Section 1016 of the Impoundment Control Act of 1974 (31 U.S.C. 1406) is amended by striking out the second sen-

(26) Section 3628 of title 39, United States Code, is amended by striking out the fourth

(27) Section 1450(i)(4) of the Public Health Service Act (42 U.S.C. 300j-9(i)(4)) is

amended by striking out the last sentence.
(28)(A) Section 2004(e) of the Revised Statutes of the United States (42 U.S.C.

1971(e)) is amended-

(i) in the third paragraph, by striking out "An application for an order pursuant to this subsection shall be heard within ten days, and the execution of any order disposing of such application" and inserting in lieu thereof "The execution of an order disposing of an application pursuant to this subsection"; and

(ii) by striking out the first sentence of

the eighth paragraph.

(B) Section 2004(g) of the Revised Statutes of the United States (42 U.S.C. 1971(g)) is amended-

(i) in the first paragraph, by striking out to assign the case for hearing at the earliest practicable date," and by striking out ' and to cause the case to be in every way expedited"; and

(ii) by striking out the third paragraph. (29)(A) Section 10(c) of the Voting Rights Act of 1965 (42 U.S.C. 1973h(c)) is amended by striking out "to assign the case for hearing at the earliest practicable date," and by striking out ", and to cause the case to be in every way expedited"

(B) Section 301(a)(2) of the Voting Rights Act of 1965 (42 U.S.C. 1973bb(a)(2)) is amended by striking out ", and to cause the case to be in every way expedited'

(30)(A) Section 206(b) of the Civil Rights Act of 1964 (42 U.S.C. 2000a-5(b)) is amend-

(i) in the first paragraph, by striking out "to assign the case for hearing at the earliest practicable date," and by striking out ", and to cause the case to be in every way expedited"; and

(ii) by striking out the last paragraph (B) Section 706(f)(2) of the Civil Rights Act of 1964 (42 U.S.C. 2000e-5(f)(2)) is

amended by striking out the last sentence. (C) Section 706(f)(5) of the Civil Rights of 1964 (42 U.S.C. 2000e-5(f)(5)) is

amended to read as follows: "(5) The judge designated to hear such case may appoint a master pursuant to rule 53 of the Federal Rules of Civil Procedure.".

(D) Section 707(b) of the Civil Rights Act of 1964 (42 U.S.C. 2000e-6(b)) is amended-

(i) in the first paragraph, by striking out "to assign the case for hearing at the earliest practicable date," and by striking out ", and to cause the case to be in every way expedited": and

(ii) by striking out the last paragraph.

(31) Section 2 of the Act of February 25, 1885 (43 U.S.C. 1062), is amended by striking out "; and any suit brought under the provisions of this section shall have precedence for hearing and trial over other cases on the civil docket of the court, and shall be tried and determined at the earliest practicable day

(32) Section 203(d) of the Trans-Alaska Pipeline Authorization Act (43 U.S.C. 1652(d)) is amended by striking out the

fourth sentence.

(33) Section 5(f) of the Railroad Unemployment Insurance Act (45 U.S.C. 355(f)), is amended by striking out ", and shall be given precedence in the adjudication thereof over all other civil cases not otherwise entitled by law to precedence'

(34) Section 402(g) of the Communications Act of 1934 (47 U.S.C. 402(g)) is

amended-

(A) by striking out "At the earliest convenient time the" and inserting in lieu thereof "The"; and

(B) by striking out "10(e) of the Administrative Procedure Act" and inserting in lieu thereof "706 of title 5, United States Code"

(35) Section 12(a) of the Military Selective Service Act of 1967 (50 U.S.C. App. 462(a)) is amended by striking out the last sentence.

CONFERENCE REPORT ON THE OMNIBUS BUDGET RECONCILI-ATION ACT OF 1981

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Oklahoma (Mr. Jones) is recognized for 5 minutes.

• Mr. JONES of Oklahoma. Speaker, due to an error in the printing of the conference report to accompany H.R. 3982, the Omnibus Budget Reconciliation Act 1981. of SCHEUER's signature on the part of the Committee on Science and Technology for both the conference report and the statement of managers was omitted from pages 18453 and 18572 of the CONGRESSIONAL RECORD, Wednesday. July 29, 1981.

The original papers reflect that Mr. Scheuer signed the signature sheets for both the conference report and the statement of managers.

Also, the following statement managers was inadvertently omitted in the printing of the conference report:

The House bill contains no authorization for the National Science Foundation.

The Senate amendment contains an authorization for the National Science Foundation of \$1.0445 billion in fiscal year 1981 and of \$1.108 billion in fiscal year 1982.

The conferees agree to the House posi-

The statement of managers regarding the Office of Juvenile Justice and Delinquency Prevention should have appeared in the conference report as follows:

TITLE XV. DEPARTMENT OF JUSTICE AND RELATED PROGRAMS

JUVENILE JUSTICE AND DELINQUENCY PREVENTION ACT OF 1974

The House bill provides that the total amount of appropriations to carry out title I and title II of the Juvenile Justice and Delinquency Prevention Act of 1974 shall not exceed \$70,000,000 for each of the fiscal years 1982, 1983, and 1984.

To carry out the purposes of title II the Senate amendment authorizes the appropriation of \$77,000,000 in fiscal year 1982, \$77,500,000 in fiscal year 1983, and \$74,900,000 in fiscal year 1984.

The conferees agree to a substitute provision which authorizes appropriations as contained in the Senate amendment. It is the intention of the conferees that the Office of Juvenile Justice and Delinquency Prevention focus increased attention to problems of the serious juvenile offender, particularly with regard to restitution programs and Project New Pride. The conferees also recommend that continued attention be paid to training, education, technical assistance and practical research related to police, prosecutors, youth workers, volunteers and others working with juveniles and juvenile delinquency related problems.

RUNAWAY AND HOMELESS YOUTH ACT

The House bill repeals the Runaway and Homeless Youth Act (title III of the Juvenile Justice and Delinquency Prevention Act of 1974).

The Senate amendment contains no similar provision.

It is the intention of the conferees that Runaway and Homeless Youth Act (Title III of the Juvenile Justice and Delinquency Prevention Act of 1974) not be re-pealed. The conferees further strongly urge the President to transfer authority under Title III and administration of Title III programs to the ACTION Agency from the Department of Health and Human Services pursuant to the existing reorganization plan fering additional services such as improvisions of Section 331 of the Act.

HELP FOR THE AUTOMOBILE INDUSTRY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Michigan (Mr. TRAXLER) is recognized for 5 minutes.

Mr. TRAXLER. Mr. Speaker, today, have introduced, with the distinguished gentleman from Indiana (Mr. HILLIS), a bipartisan bill to amend title II of the Clean Air Act concern-

ing mobile sources.

The amendments seek to fine tune the act, while preserving its important features which are aimed at protecting the public health. The amendments. which I discussed with many people and entities, including representatives of the automobile industry, its suppliers, and its workers, represented by the United Automobile Workers, are complimentary to proposals introduced by fellow Members to portions of the act. I expect that they will be considered as part of a package of amendments to the entire act.

I also understand that these title II amendments are generally supported by those primarily interested in these provisions of the act, including representatives of the industry and its workers. These representatives had the opportunity to review the bill before its introduction and have indi-

cated their support for it.

I intend, at a later date, to explain in greater detail these provisions and the strong support for this bipartisan approach to the title II amendments. It is my sincere hope that the administration will support these changes in the law. They are designed to help the automobile industry and preserve jobs, while not diminishing the public health achievements of the act to date, or those benefits which could be expected in the future.

It is my hope that along with this title II bill the needed changes in the act can and will be achieved this year.

I urge strong support for H.R. 4400, together with the fine tuning of the act.

FINANCIAL INSTITUTIONS COMPETITION ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. LaFalce) is recognized for 30 minutes.

• Mr. LaFALCE. Mr. Speaker, we are witnessing today vigorous competition between depository institutions and money market mutual funds for the savings of consumers. Money market funds have been able to mount a strong challenge to traditional savings institutions in today's inflationary environment because of the high interest rates they are able to pay. Moreover, the money market funds have been ofmediate money transfer which have made them very similar to depository institutions

Depository institutions, understandably, are reacting strongly to the competitive pressure from money market funds. Some elements of the depository industry support various proposals to rein in the money market funds as a means of stemming the outflow of savings and protecting themselves. Their strategy is to try to restore the competitive balance by lowering the interest rate that money markets can pay on investments and by restricting their money transfer services. These proposals have been given a thorough airing at congressional hearings, and the prospects for their adoption remain, I am pleased to say, slim. So, we are still left with a situation of unequal competition between depository institutions and money market funds.

I am introducing today legislation that, I hope, will redirect the debate on how to handle the new competition in the financial industry. This legislation is identical with a measure already introduced in the Senate by Senator Chaffe and cosponsored by Chairman GARN of the Banking Committee, former Banking Committee Chairman PROXMIRE, and Senator Ha-YAKAWA. The cosponsorship list of the Senate bill is a clear indication of the strong support this approach has in the Senate.

The bill is intended to equalize competition, not by imposing restraints on money market funds but by allowing commercial banks, savings banks, savings and loan associations, and credit unions to establish their own money market mutual funds and to sell shares to their customers. Those institutions which prefer not to set up their own funds will be allowed to sell shares of money market funds of any other institution.

In dealing with the money market problem, the emphasis should be placed on leveling the field of competition on the upside rather than on the downside. The small saver is at last receiving a high rate of return on his or her savings through the money market funds. We cannot sacrifice the small saver as we seek to equalize competition between money markets and depository institutions. Moreover, I do not think the 5 million investors in money market funds would sit by idly if Congress were to consider seriously means of limiting their investment returns.

The problems created by today's unequal competition compel us to rethink the structure of the financial industry and give serious consideration to the bill I am introducing. It is clear that the legal restrictions in place over the past half century are an anachronism today. The legal barriers that have separated the securities and

banking industries have already been eroded by dramatic changes taking place in the financial world. We should at last acknowledge that many deposit-taking institutions have developed substantial expertise in the field. They currently provide for a variety of investment services for their trust and agency accounts. Money market fund management does not differ substantially from the services depository institutions already provide. Thus, there is no reason to shield the money market funds from competition with depository institutions or to shield depository institutions from competition with money markets. Let them compete vigorously with the consumer being the ultimate beneficiary.

The bill being introduced will bring about the needed changes by amending the Investment Company Act of 1940. Investment companies would be organized and operated by depository institutions in compliance with the Investment Company Act, and their shares registered under the Securities Act. The actual operation of the fund will be regulated by the Securities and Exchange Commission. To promote uniform training, experience, and sales practice standards, the bill provides for the Federal Financial Institutions Examination Council to develop appropriate regulations. It is expected that such sales-related standards will be adopted by the regulatory agencies, and the standards are to be implemented by the Federal agency with regulatory responsibility. primary Where there is no such Federal regulation, the SEC will have enforcement responsibility.

A copy of my bill follows:

H.R. 4397

A bill to authorize new powers for depository institutions

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Financial Institutions Competition Act"

SEC. 2. Section 22 of the Investment Company Act of 1940 (15 U.S.C. 80a-22) is amended by adding at the end thereof the

"(h)(1) Notwithstanding the paragraph numbered 'Seventh' of section 5136 of the Revised Statutes (12 U.S.C. 24), the twentieth paragraph of section 9 of the Federal Reserve Act (12 U.S.C. 335), sections 20, 21, and 32 of the Banking Act of 1933 (12 U.S.C. 377, 378, and 78), and the Bank Holding Company Act of 1956 (12 U.S.C. 1841 et seq.), a bank, a bank holding company or a subsidiary thereof, a savings and loan association, a savings bank, or a credit union-

"(A) may organize, sponsor, operate, control, or render investment advice to an investment company (including a company which would be an investment company except for the provisions of section 3(c)(1) of this title); or

"(B) may underwrite, distribute, sell, or issue securities of any investment company if the officers and employees of the banks, savings banks, savings and loan associations, or credit unions who sell or issue such securities meet such standards with respect to training, experience, and sales practices as the agencies referred to in paragraphs (2) and (3), in consultation with the Financial Institutions Examination Council, shall prescribe by regulation.

"(2) Compliance with the standards established under paragraph (1)(B) shall be enforced under-

"(A) section 8 of the Federal Deposit Insurance Act (12 U.S.C. 1818), in the case of— "(i) national banks, by the Comptroller of

the Currency:

"(ii) member banks of the Federal Reserve System (other than national banks), by the Board of Governors of the Federal Reserve System; and

"(iii) banks and savings banks insured by the Federal Deposit Insurance Corporation (other than members of the Federal Reserve System), by the Board of Directors of the Federal Deposit Insurance Corporation;

"(B) section 5(d) of the Home Owners' Loan Act of 1933 (12 U.S.C. 1464(d)), section 407 of the National Housing Act (12 U.S.C. 1730), and section 17 of the Federal Home Loan Bank Act (12 U.S.C. 1437), by the Federal Home Loan Bank Board (acting directly or through the Federal Savings and Loan Insurance Corporation), in the case of any institution subject to any of those provisions: and

"(C) the Federal Credit Union Act (12 U.S.C. 1751 et seq.), by the National Credit Union Administration Board with respect to any federally insured credit union.

"(3) For the purpose of the exercise by any agency referred to in paragraph (2) of its powers under any Act referred to in such paragraph, a failure to meet any standard prescribed under paragraph (1)(B) of this subsection shall be deemed to be a violation of a requirement imposed under that Act. In addition to its powers under any provision of law specifically referred to in paragraph (2), each of the agencies referred to in such paragraph may exercise, for the purpose of enforcing compliance with any such standard, any other authority conferred on it by law. Except to the extent that enforcement of such standards is specifically committed to some other Government agency under paragraph (2), the Securities and Exchange Commission shall enforce such standards.

"(4) A savings and loan association, savings bank, or credit union shall not be deemed to be a 'broker' or 'dealer', as such terms are defined in section 3 of the Securi-ties Exchange Act of 1934 (15 U.S.C. 78c), by reason of its engaging in any of the functions described in this subsection.

"(5) For purposes of this subsection, the terms 'bank holding company' and 'subsididary', with respect to a bank holding company, shall have the same meaning given such terms in section 2 of the Bank Holding Company Act of 1956 (12 U.S.C. 1841).".

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. Jones of North Carolina (at the request of Mr. WRIGHT), for today, on account of official business.

Mr. LUNGREN (at the request of Mr. MICHEL), for today, on account of official business.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted

(The following Members (at the request of Mr. Davis) to revise and extend their remarks and include extraneous material:)

Mr. Jeffords, for 10 minutes, today. Mr. Smith of New Jersey, for 15 minutes, today.

(The following Members (at the request of Mr. MATSUI) to revise and extend their remarks and include extraneous material:)

Mr. Forp of Michigan, for 5 minutes,

today

Mr. Reuss, for 10 minutes, today. Mr. Gonzalez, for 30 minutes, today. Mr. Annunzio, for 5 minutes, today.

Mr. ST GERMAIN, for 10 minutes,

SENATE JOINT RESOLUTIONS REFERRED

Joint resolutions of the Senate of the following titles were taken from

the Speaker's table and, under the rule, referred as follows:

S.J. Res. 53. Joint resolution to provide for the designation of September 6, 1981, as "Working Mothers' Day"; to the Committee on Post Office and Civil Service; and

S.J. Res. 98. Joint resolution to authorize and request the President to issue a proclamation designating October 16, 1981, as "World Food Day"; to the Committee on Post Office and Civil Service.

SENATE ENROLLED BILLS AND JOINT RESOLUTION SIGNED

The SPEAKER announced his signature to enrolled bills and joint resolution of the Senate of the following titles:

S. 640. An act to amend the District of Columbia Self-Government and Governmental Reorganization Act to extend the authority of the Mayor to accept certain interim loans from the United States and to extend the authority of the Secretary of the Treasury to make such loans;

S. 1278. An act entitled the "Saccharin Study and Labeling Act Amendment of

1981": and

S.J. Res. 64. Joint resolution designating August 31, 1981, as "National Blinded Veterans Recognition Day."

ENROLLED BILL SIGNED

Mr. HAWKINS, from the Committee on House Administration, reported that that committee had examined and found truly enrolled a bill of the House of the following title, which was thereupon signed by the Speaker:

[Omitted from Congressional Record of July 31, 1981]

H.R. 4074. An act to revise the laws pertaining to the Maritime Administration.

ENROLLED BILL AND JOINT RESOLUTION SIGNED

Mr. HAWKINS, from the Committee on House Administration, reported that that committee had examined and found truly enrolled a bill and a joint resolution of the House of the following titles, which were thereupon signed by the Speaker:

H.R. 1100. An act to amend title 38, United States Code, to improve certain benefit programs of the Veterans' Administration for veterans who are former prisoners of war, and for other purposes; and

H.J. Res. 141. Joint resolution authorizing and requesting the President to issue a proclamation designating the period from October 4, 1981, through October 10, 1981, as "National Schoolbus Safety Week."

BILL AND JOINT RESOLUTIONS PRESENTED TO THE PRESIDENT

Mr. HAWKINS, from the Committee on House Administration, reported that that committee did on the following dates present to the President, for his approval, a bill, and joint resolutions of the House of the following titles:

On July 30, 1981:

H.J. Res. 191. A joint resolution designating August 8, 1982, as "National Children's Day" and

Day"; and H.J. Res. 84. A joint resolution designating the week of October 4 through October 10, 1981, as "National Diabetes Week."

On July 31, 1981:

H.R. 4074. An act to revise the laws pertaining to the Maritime Administration.

ADJOURNMENT TO WEDNESDAY, SEPTEMBER 9, 1981

Mr. HAWKINS. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to.

The SPEAKER pro tempore. Pursuant to the provisions of Senate Concurrent Resolution 27, 97th Congress, the House stands adjourned until 12 o'clock meridian, Wednesday, September 9, 1981.

Thereupon (at 3 o'clock and 23 minutes p.m.), pursuant to Senate Concurrent Resolution 27, the House adjourned until Wednesday, September 9, 1981, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1936. A letter from the Acting Comptroller General of the United States, transmitting his review of the proposed rescissions, deferrals, and revised deferrals of budget authority contained in the message from the President dated June 19, 1981 (H. Doc. No. 97-63), pursuant to section 1014 (b) and (c) of Public Law 93-344 (H. Doc. No. 97-80); to the Committee on Appropriations and ordered to be printed.

1937. A letter from the General Counsel of the Department of Defense, transmtting a draft of proposed legislation to amend title 10, United States Code, to permit persons from foreign countries to receive instruction at the U.S. Military Academy, the U.S. Naval Academy, and the U.S. Air Force Academy, and for other purposes; to the Committee on Armed Services.

1938. A letter from the Acting Assistant Secretary of the Air Force (Research, Development, and Logistics), transmitting notice of the proposed conversion to contractor performance of the commissary shelf-stocking and custodial services function at Little Rock Air Force Base, Ark., pursuant to section 502(b) of Public Law 96-342; to the Committee on Armed Services.

1939. A letter from the Secretary of Education, transmitting proposed final regulations to govern the veterans' cost-of-instruction payments program, pursuant to section 431(d)(1) of the General Education Provisions Act, as amended; to the Committee on

Education and Labor.

1940. A letter from the Secretary of Health and Human Services, transmitting a report on State compliance with medicaid utilization control requirements, pursuant to section 1903(g)(6) of the Social Security Act, as amended; to the Committee on Energy and Commerce.

Energy and Commerce, 1941. A letter from the Assistant Legal Adviser for Treaty Affairs, Department of State, transmitting copies of international agreements, other than treaties, entered

into by the United States, pursuant to 1 U.S.C. 112b(a); to the Committee on Foreign Affairs.

1942. A letter from the Fiscal Assistant Secretary of the Treasury, transmitting a report on the inventory of nonpurchased foreign currencies as of March 31, 1981, pursuant to section 613(c) of the Foreign Assistance Act of 1961, as amended; to the Committee on Foreign Affairs.

1943. A letter from the Deputy Assistant Secretary of Defense (Administration), transmitting notice of a proposed new records system for the Air Force, pursuant to 5 U.S.C. 552a(o); to the Committee on Gov-

ernment Operations.

1944. A letter from the General Counsel, Securities and Exchange Commission, transmitting notice of a proposed new records system, and of changes in an existing system, pursuant to 5 U.S.C. 552a(o); to the Committee on Government Operations.

1945. A letter from the employee benefits and risk manager, Fourth District Farm Credit Institutions, transmitting the annual report of the district's retirement plan for calendar year 1980, pursuant to section 121(a)(2) of the Budget and Accounting Procedures Act of 1950, as amended; to the Committee on Government Operations.

1946. A letter from the Administrator of General Services, transmitting a draft of proposed legislation to amend section 207(c)(1) of the Federal Property and Administrative Services Act of 1949, as amended, to change the criteria therein so that the provisions of section 207 shall not apply to disposals of surplus real property having an estimated fair market value less than \$1 million; to the Committee on Government Operations.

1947. A letter from the Acting Comptroller General of the United States, transmitting a report on the potential for civil agencies to recover silver from photographic wastes (PLRD-81-48, July 31, 1981); to the Committee on Government Operations.

1948. A letter from the Deputy Secretary of the Treasury, transmitting a draft of proposed legislation to amend chapter 25 of title 18, United States Code, to provide penalties for the forging of endorsements on, or fraudulently negotiating, U.S. checks or bonds or securities, and for other purposes; to the Committee on the Judiciary.

to the Committee on the Judiciary. 1949. A letter from the Deputy Secretary of the Treasury, transmitting a draft of proposed legislation to amend chapter 84, section 1752 of title 18, United States Code, to authorize the Secretary of the Treasury to establish zones of protection for certain persons protected by the U.S. Secret Service; to the Committee on the Judiciary.

1950. A letter from the Secretary of Housing and Urban Development, transmitting the semiannual report on energy conservation standards for new buildings, pursuant to section 311(4) of Public Law 94-385; jointly to the Committees on Banking, Finance and Urban Affairs, and Energy and Commerce.

1951. A letter from the Acting Comptroller General of the United States, transmitting a report on safety and health activities at the Department of Energy's nuclear facilities (EMD-81-108, Aug. 4, 1981); jointly to the Committees on Government Operations, Interior and Insular Affairs, Energy and Commerce, and Science and Technology.

1952. A communication from the President of the United States, transmitting a request for additional appropriation language for fiscal year 1982 for the Department of

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

156. By the SPEAKER: Petition of the Executive Council of Church Women United, Estes Park, Colo., relative to military spending; to the Committee on appropriations.

157. Also, petition of the Hawaii County Council, Hilo, Hawaii, relative to the Hawaii Prepaid Health Care Act; to the Committee on Education and Labor.

158. Also, petition of the Executive Council of Church Women United, Estes Park, Colo., relative to foreign economic development; to the Committee on Foreign Affairs.

159. Also, petition of the annual meeting of the National Association of Attorneys General, Jackson Hole, Wyo., relative to funding for successful State and local criminal justice programs; to the Committee on the Judiciary.

160. Also, petition of the City Council, Santee, Calif., relative to nuclear weapons; to the Committee on Foreign Affairs.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 3518

By Mr. BEARD:

-Page 3, immediately after line 21, insert the following new section 104 and redesignate subsequent sections of the bill accordingly:

RESTRICTION ON CONTRIBUTIONS TO THE UNITED NATIONS EDUCATIONAL, SCIENTIFIC AND CULTURAL ORGANIZATION

SEC. 104. (a) None of the funds authorized to be appropriated by section 102(a)(2) of this Act or by any other Act for "International Organizations and Conferences" may be used for payment by the United States of its contribution toward the assessed budget of the United Nations Educational, Scientific and Cultural Organization if that organization implements any policy or procedure the effect of which is to license journalists or their publications, to censor or otherwise restrict the free flow of information within or among countries, or to impose mandatory codes of journalistic practice or ethics.

(b) Not later than February 1 of each year, the Secretary of State shall report to the Congress with respect to whether the United Nations Educational, Scientific and Cultural Organization has taken any action described in subection (a) of this section.

H.R. 3603 By Mr. PEYSER: -Page 10, after line 13, insert the following new section:

LIMITATION ON ACQUISITION OF DAIRY
PRODUCTS

Sec. 107. Title II of the Agricultural Act of 1949 is amended by adding at the end thereof the following new section:

SEC. 204. (a) Notwithstanding section 201, the Secretary may not purchase butter or cheese during the period beginning on the date of the enactment of the Food and Agriculture Act of 1981 and ending September 30, 1985, if as a result of such purchase the Secretary or the Commodity Credit Corporation would own or control more than 100 million pounds of butter or more than 150 million pounds of cheese after the effective date of this section.

"(b) The sixth sentence of section 407 shall not apply with respect to milk and the products of milk, owned or controlled by the Commodity Credit Corporation on the effective date of this section to the extent that such sentence requires that sales be offset by purchases.

H.R. 4169

By Mr. BEARD:

-Page 32, insert the following immediately after line 23:

None of the funds appropriated in this title shall be used for payment by the United States of its contribution toward the assessed budget of the United Nations Educational, Scientific and Cultural Organization if that organization implements any policy or procedure the effect of which is to

license journalists or their publications, to censor or otherwise restrict the free flow of information within or among countries, or to impose mandatory codes of journalistic practice or ethics.

By Mr. ERTEL:

-Page 43 after line 14 insert the following new sections:

SEC. 508. Except for services provided to the Chief Justice of the United States, none of the funds provided in the Act to any department or agency shall be obligated or expended to provide a personal cook, chauffeur, or other personal servants to any officer or employee of such department or agency in the United States, excluding those positions from this provision which serve dual roles pertaining to a security or law enforcement function.

SEC. 509. Except for vehicles provided to the Chief Justice of the United States, or for other security or law enforcement purposes, none of the funds provided in this Act to any department or agency shall be obligated or expended to procure passenger automobiles as defined in 15 U.S.C. 2001 with an EPA estimated miles per gallon average of less than 22 miles per gallon. The requirements of this section may be waived by the Administrator of the General Services Administration for special purpose or special mission automobiles.

H.R. 4241

By Mr. JAMES K. COYNE

-Page 7, line 12, strike out "\$275,545,000" and insert in lieu thereof "\$260,635,000".

EXTENSIONS OF REMARKS

ALABAMA BAND HOTTEST COUNTRY GROUP

HON, RONNIE G. FLIPPO

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. FLIPPO. Mr. Speaker, the University of Alabama football team is being challenged as the most nationally famous group in Alabama.

The hottest group in country music is a band from Fort Payne, appropri-

ately called "Alabama."

The band is composed of Jeff Cook, Randy Owens, and Teddy Gentry, three cousins all hailing from Fort Payne, Ala., and drummer Mark Herndon.

Their meteoric rise on the country music charts recently earned them the prestigious "Top Vocal Group of the Year" award given by the Academy of Country Music.

They are easily the hottest new group in country music, recently scoring their fourth No. 1 single in a row as "Feels So Right" charged to the summit. Previous No. 1 hits were "Old Flame," "Tennessee River," and "Why Lady, Why." They also have a top-selling album.

One of their early hits, "My Home's In Alabama," has become sort of a theme song for those of us who love country music and our beautiful State.

One hears so often about overnight successes in the entertainment field, while the truth is that most entertainers labor for years before they become "overnight" successes. This is true of Alabama.

The band has been working hard for 11 years, and only this year have they hit the top of the charts. However, the fact that they have four consecutive No. 1 hits indicates they have found the magic combination and are destined to become one of the most popular and successful groups of our time.

I think it speaks well of my State that after Alabama achieved the pinnacle in country music, they all decided to move back to Fort Payne. Now they travel all over the country playing to sellout audiences and come back home to the source of their success to rest and relax before the next tour.

They have brought fame and recognition to our great State by taking the name "Alabama" for their band and by writing such songs as, "My Home's In Alabama," "Tennessee River," and others

Jeff, Randy, and Teddy have not forgotten the home folk, as they recently did a benefit concert for Fort Payne High School. They reportedly plan a benefit concert for underprivileged children every year in Fort Payne.

Mr. Speaker, Alabama, the State, is indeed proud of Alabama, the band. On August 12, the nearby city of Scottsboro will honor the Alabama band with an appreciation luncheon at Goosepond Civic Center, sponsored by Central Bank. Mayor Roy Owen will present each member of the Alabama band with a key to the city.

Recently, the Fort Payne Times Journal paid tribute to the group with a 12-page supplement in its May 31 edition. I would like to include one article from that supplement entitled, "Alabama Has Weathered The Storm"

Blood is thicker than water, especially when it flows in the music business. More than 11 years ago, cousins Randy Owen, Jeff Cook and Teddy Gentry, known collectively as Alabama, decided that the recording studio was where they belonged, and they have been on a musical roller coaster ride ever since. There have been at least three times over those 11 years the group has been totally resigned to giving it all up. From personnel changes to injuries to utter disillusionment, Alabama has faced and weathered the storms that rocked other's boats and forced then to turn back.

boats and forced then to turn back.

Alabama first met musically in Ft. Payne,
Alabama, where Jeff was working for Western Electric, Randy going to school and
Teddy laying carpet. Randy (the youngest
of the three cousins) and Teddy grew up on
adjacent farms in the shadows of Lookout
Mountain, showing each other chords and
singing when the families got together, the
two formed a band with Jeff not only for
his local renown as a player, but also because he was the only one around with good
equipment—an important consideration at
that point in a band's evolution.

Around Christmas of 1969, Randy, Teddy and Jeff assembled to jam for the first time. They gathered several more times over the course of the ensuing year, but it took that long and a job offer at a nearby tourist park, Canyonland, to fuse them into an organized unit.

Every weekend, Canyonland brought in an established star which Alabama would back up then follow with a one-hour dance set. It exposed them to the influence of stars like Bobby Bare, Jerry Wallace and Cal Smith and formed their first thoughts of cracking Nashville.

Though Randy was still in school and the others at nowhere jobs, the direction was clear and the dedication soul-deep. "There just was nothing else." Randy states candidly. "We all set goals for ourselves and fully intend to make them. We never considered them easy but we never expected less."

them easy but we never expected less."

In the early 70's, Jeff took a government job in Anniston, Alabama, when there seemed to be no fire left in the dream of the cousins finding the musical brass ring together. Wanting to keep the band intact, Randy and Teddy moved to Anniston where

Teddy resumed his career as a carpet layer and brought Randy (fresh out of high school) into the profession as his assistant. "I told them Randy was my helper. He'd never laid carpet in his life," Teddy recalls.

But there was more to Anniston than the government and carpeting. The three became roommates and assembled every night after work to practice music, concentrating on harmonies. They pushed all their beds into the biggest room in the house so they could continue singing until they went to sleep. According to Jeff, "Even with the lights off we'd lay there in the dark and sing until one by one we'd drift off to sleep."

Alabama continued playing weekend dates and working day jobs until March of '73 when they decided it was all or nothing. They quit the government and carpeting, packed up and headed for Myrtle Beach, South Carolina, and started playing six nights a week in clubs there, making as much as the audience offered in tips. Although they had been writing songs all along, the move was the impetus to begin incorporating original material into the show and concentrate on perfecting it.

The stage success of their own songs prompted them to begin recording and pressing their own records which they personally distributed to regional radio stations.

After being turned down by nearly every label in Nashville, they were signed to GRT Records in 1977. They released "I Want To Be With You" which bottomed out at 77 in the national charts, lost in the excitement over fellow GRT releases "The Telephone Man" and "The King Is Gone." From the buzz created with the first records, Dallasbased MDJ Records and Larry McBride became interested in 1979. Owner Larry McBride signed them and took them to Nashville producer Harold Shedd, with whom he had been working on several projects. "I was very impressed with the group." Shedd states. "They were doing some of the things I wanted to do when I was playing."

With the ball in their court and things finally going their way, Alabama's drummer abruptly quit, and once more it appeared as though their efforts were all for naught. But after a month of searching, Mark Herndon entered the picture. He was the catalyst that tied it all together and put them in high gear.

The Alabama-Shedd collaboration resulted in the single "I Wanna Come Over." Although it peaked at 32, it spread the regional buzz into a national stir and laid the groundwork for "My Home's In Alabama" which reached into the top 20 in early 1980.

The stir cranked to a roar, and, as "My Home's In Alabama" climbed the national charts, the same Nashville labels that had initially turned Alabama down were turning their heads and noticing the success and potential.

In April 1980, the band signed with RCA, releasing the single "Tennessee River" and "Why Lady Why" from the album "My Home's In Alabama"—both Number One Country singles for the now-rising superstars. The debut LP was followed in February 1981 with the release of Feels So Right

[•] This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

which has spawned another hit single for the group from Ft. Payne, "Old Flame."

Reflecting on the rewards of success, Randy notes, "We really never thought we'd be here today. One year ago we were about as low as you can get, but, instead of giving up, we decided the only way was up and started over again." Teddy concurs, "We spent years to get to this point, and it's only taken months for it all to fall into place. I guess we made the right decision."

They may be from Alabama but they're at home everywhere.

Mr. Speaker, Alabama's dedication and hard work in the face of years of frustration have proven once again that the American dream is very much alive. If one works long enough and hard enough and really believes in himself, one can reach the top.

I commend Alabama to the Nation and offer my heartiest congratula-

THE PLIGHT OF RAISA RUDENKO

HON, RAYMOND J. McGRATH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES
Wednesday, July 29, 1981

• Mr. McGRATH. Mr. Speaker, once again I rise to express anger over another example of the flagrant disregard of the Soviet Government for human rights and the tenets of the Helsinki accords which our Nation is a party to with the Soviets.

The arrest of Raisa Rudenko by officials of the Soviet Government has been made known only recently. Apparently out of fear of negative international public opinion, Communist agents arrested Mrs. Rudenko in April and refused to admit to any knowledge of her whereabouts. Information has now come from the Ukraine indicating that she is being detained somewhere in the Sovet Union.

Raisa Rudenko is the wife of Mykola Rudenko, a highly decorated veteran of World War II and a highly acclaimed writer and philosopher. He has been imprisoned since 1977 for "anti-Soviet agitation and propaganda." The charges against his wife have not been announced.

It is obvious that the Soviet Government has no intentions of fulfilling its commitment to human rights. The activities of the Rudenkos in the Ukrainian group established to monitor the Helsinki accords are the sole reason for their persecution and imprisonment.

Our duty as Americans is to continue to demand Soviet compliance with the Helsinki accords and use every possible peaceful means to obtain that compliance. The tide of international opinion and the indomitable spirits of the Rudenkos and others will someday bring about the respect for freedom and human rights which has been

sought for so long. I ask that all Members of this body continue to work and pray for that day.

CALIFORNIA CONDOR RECOVERY PROGRAM

HON. BARRY M. GOLDWATER, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

 Mr. GOLDWATER. Mr. Speaker, I have worked long and hard to insure funds for the preservation and habitat protection of the dying California condor.

There are only about 25 of these majestic birds left, but since 1975, we have begun a condor recovery program. For fiscal year 1982, we have earmarked \$250,000 for this plan.

The major thrust of this recovery effort is a 3-year program with two major provisions. The first provision is the capturing of nine condors for breeding purposes, and the second provision is the tagging of 12 condors with radio transmitters in order to more closely "track" their habits and flight patterns. A Federal permit by the U.S. Fish and Wildlife Service has already been granted, but the California Fish and Game Commission must grant a State permit as well.

Last Tuesday, the California Fish and Game Commission held a public hearing on whether to approve that State permit. A decision is expected this Friday, August 7. If approved, the plan would begin September 1.

Of course, there are those who will object to our attempts at saving the condor by radio telemetry and captive breeding. Some believe man should leave the condor alone, and preserve its habitat instead. The problem with this approach, however, is that we just do not know that much about the condor's habitat to preserve it. A condor can fly 300 miles in 24 hours, making scientific observation extremely difficult; hopefully, this well-prepared recovery program will give us that knowledge.

Recently, there have been successful results from the capturing of Andean condors in South America. Furthermore, Andean condors born in captivity and later released into the wild have adapted to their new habitat remarkably well, and experts believe similar results can be achieved by the California condor.

Mr. Speaker, we are desperately trying to save the remaining California condors. It would be inexcusable for us to preside over their extinction. I urge California's Fish and Game Commission to approve the State permit.

OPPOSITION VIEWS ON EL SALVADOR

HON. GERRY E. STUDDS

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. STUDDS. Mr. Speaker, the twin issues of negotiations and elections have come to the forefront in recent weeks with respect to the ongoing civil struggle in the small Central American nation of El Salvador.

On July 16, Assistant Secretary of State Thomas Enders delivered a speech in Washington which outlined in some detail the U.S. position on these questions. More recently, the Political-Diplomatic Commission of the united opposition groups in El Salvador issued a statement providing their own views on these vital issues.

The Enders speech received wide publicity, and was excerpted in several major American newspapers. Although I do not by any means agree fully with the positions put forward by the Salvadoran opposition—just as I do not fully agree with those put forward by Secretary Enders—I believe that a full airing of the views on all sides is needed. Accordingly, I include the following statement in the Record, with the hope that it will be of interest to my colleagues:

POSITION OF THE FDR-FMLN'S POLITICAL-DIPLOMATIC COMMISSION ON ELECTIONS AND POLITICAL SOLUTION

On July 16, 1981, Assistant Secretary of State for Inter-American Affairs, Mr. Thomas O. Enders, defined U.S. government policy toward El Salvador in his speech delivered before the World Affairs Council.

The Political-Diplomatic Commission of the FDR-FMLN hereby makes the following statements in regards to this policy.

1. We acknowledge that there is a change in tone in Mr. Enders' presentation with respect to the Salvadorean situation and the parties involved in the conflict. Missing from Mr. Enders' speech is the extremist rhetoric characteristic of the present Administration, a rhetoric full of anti-communist slogans intended to conceal the lack of a consistent and defined foreign policy.

2. We acknowledge that a positive step has been taken by beginning to recognize that the Salvadorean conflict is "deeply rooted in domestic Salvadorean political and socioeconomic problems," thus abandoning the simplistic approach of Secretary of State Alexander Haig and the Reagan Administration which portrays the war in El Salvador as a confrontation between the United States and the Soviet Union.

3. However, it is important to discover the real U.S. policy toward El Salvador under the veil of the new language and analysis. Mr. Enders' closing statements clearly express this policy: The Reagan Administration will a) continue with its program of military and economic assistance to the Junta, and b) it will support and contribute to a "democratic solution" by means of elections.

4. The political solution the State Department proposes is that all parties that re-

nounce to violence should be encouraged to participate in the electoral process. For the American people choosing their representatives through elections is a normal and obvious process, but our historical experience in El Salvador is different. In our country elections have been used by all military dictatorships during the last fifty years to deceive the people. The most recent example took place in 1979: General Romero, confronted with the imminent collapse of his government, offered "free elections, with international supervision." The Christian Democratic Party, however, rejected that offer by declaring that as long as the fundamental political problems were not solved (i.e. political prisoners, dismantling the para-military organizations, halting repression, etc.), it was senseless to participate in elections. The Christian Democratic Party expressed this position in a manifesto entitled "Elections Are Not the Solution."

The Salvadoran people have been struggling against the military dictatorship, with arms in hand and through civil disobedience, for many years. This is so because peaceful channels have been systematically closed by the military. If the present prescription from the State Department is that we all peacefully return to elections, the least we can do is examine the real conditions under which the offer of elections is being made:

The same military officers who now offer "free elections," are those responsible for the systematic repression against all popular opposition to the regime. Proof of this are the thousands of murders that have been committed by the Army and Security Forces since January 1980. The MNR (Movimiento Nacional Revolucionario), the political party Mr. Enders is inviting to participate in elections, has had many of its members and leaders assassinated in the last eighteen months, two of its leaders are now in prison and its headquarters have been broken into and looted by the Security Forces.

Fundamental civil liberties are inexistent. For more than sixteen months the "state of decrees have suspended all constitutional rights and since January of this year the government has imposed martial law. News media has been subjected to censorship and those who have been more critical of the government have been physically destroyed by government forces, and their staffs have been assassinated, imprisoned, or exiled. This is the case of the newspapers El Independiente, Orientacion, La Cronica del Pueblo, and Voz Popular. Finally, almost the entire leadership of the opposition has been sentenced to death by the Armed Forces, and their names have been published in a hit list in Salvadoran newspa-

Colonel Garcia, the strong man in the government who is also the Minister of Defense, is the man who in 1972 was president of the national communications system through which one of the most blatant electoral frauds in our history was implemented; proof of this fraud can be found in the U.S. Congressional Record.

The absence of fair conditions for elections is so evident that even the Electoral Council has advised the eventual candidates to campaign through "paid advertisements in the press, radio and T.V., and remain outside the country." (El Diario de Hoy, July 16, 1981).

The FDR-FMLN is not alone in confirming the lack of minimum conditions for the electoral process. It has also been affirmed

by acting archbishop Rivera y Damas, the Salvadoran Bar Association, the Junta's ambassador to the U.S., and foreign observers such as Cardinal Arns, Mr. Ed Broadbent (leader of the New Democratic Party of Canada), members of the European Parliament, etc.

5. But if elections are not a viable political solution, what then remains in U.S. foreign policy toward El Salvador? The answer is simple: Economic and military aid. In practice the State Department's policy is reduced to its true essense: The search for the Junta's military victory over the Salvadoran people.

The State Department wishes to believe in elections because it is not willing to face the fundamental problem of its policy toward El Salvador. The military aid provided to the Junta, instead of helping to achieve a political solution is strengthening the High Command of the Armed Forces which is responsible for the indiscriminate killings and abuses against the people; it is increasing the suffering of the Salvadoran people and it is prolonging the war. We have to ask ourselves, how is it possible for the U.S. government to curb the violence of the Armed Forces if at the same time it provides them with training and arms to carry out the killing?

6. The FDR-FMLN believes that the rational method to bring an end to war and achieve a "genuinely pluralistic" democracy and social change in our homeland is to attack the fundamental problems through a process of discussions in which we, the Salvadorans, will elaborate our own solutions. In order to achieve this objective the FDR-FMLN proposes the following:

a. A comprehensive process of political negotiations involving the FDR-FMLN and the Salvadoran government.

b. Discussions must cover all fundamental problems based on an agenda to be agreed upon by both sides.

c. In order to guarantee a serious discussion and propitiate an understanding among the two parties, negotiations must take place with the participation of a group of mediators to be selected by both parties.

d. As a guarantee of the mediation process, both parties must have access to the mass media with the objective of explaining the process of mediation to the Salvadoran people.

e. Elections could be discussed as part of the comprehensive solution and within the process of mediation. The FDR-FMLN does not reject the electoral process, but it feels that minimum conditions must be created so that the people can freely express their sovereign will.

f. All agreements made by both parties will be consulted with the Salvadoran people who will be their sole and ultimate judge.

We make this proposal because we are convinced that the FDR-FMLN has developed enough military and political strength and we have the support and confidence of our people in defending their interests both, in the battlefield and in the discussion table.

7. Finally, the FDR-FMLN wants to make clear that it rejects the Reagan Administration's policy toward El Salvador not out of anti-American feelings or because we believe that everything that originates in the U.S. government is evil in principle, but because the State Department's proposal does not address the fundamental problems of our country and does not offer realistic and viable solutions. The cause of peace and deviable solutions.

mocracy could be served better if the State Department abandoned its old illusions and stopped deceiving itself through wishful thinking. The great North American people and the heroic Salvadoran people deserve, and are asking for, a more serious and realistic policy.

A CALL FOR THE RELEASE OF MYKOLA AND RAISA RUDENKO

HON. FRANK HORTON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 29, 1981

• Mr. HORTON. Mr. Speaker, it has been 6 years since the United States, the Soviet Union, and many other nations of the world signed the Helsinki accords. This monument agreement affirms the universal rights of men to liberty, freedom, and self-determination. Since that time, there have been a multitude of violations of the accords, both documented and undocumented, by the Soviet Union. It deeply saddens me to hear of yet another usurption of basic freedoms in the Ukraine—the imprisonment of Mykola Rudenko.

Mr. Rudenko's sole crime is that he has publicly endorsed the provisions of the Helsinki accords and the human rights standards it establishes. In addition, Mr. Rudenko was a founding member of the Ukrainian Helsinki Monitoring Group, which has worked to make known the abusive treatment of Ukrainian dissentors. Because of his unwavering convictions, Mr. Rudenko is serving out a 12-year prison sentence.

Although reports indicate that Mr. Rudenko's health is deteriorating, to sustain his protest against his oppressors he is partaking in a hunger strike. Shortly after he began, the distressing news came that Mr. Rudenko's wife, Raisa, had disappeared. She has not arrived at scheduled appointments and neither friends or relatives have been able to locate her. Evidence would seem to substantiate speculation that she is being held against her will in retaliation for her husband's bold actions.

Truly, we must not stand by and allow these flagrant violations of the Helsinki accords to go unnoticed. Those of us who are fortunate enough to live in a free and just society must speak out against this repression.

As a member of the Ad Hoc Congressional Committee on the Baltic States and the Ukraine, I appeal to my colleagues and all freedom-loving people of the world to urge the high-ranking officials of the Soviet Government to make known the whereabouts of Mrs. Rudenko, and, in compliance with the Helsinki accords, allow them their freedom.

HAPPY BIRTHDAY SRI CHINMOY

HON. THOMAS J. DOWNEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. DOWNEY. Mr. Speaker, it is my pleasure and privilege to join my colleagues today in honoring Sri Chinmoy on his 50th birthday, August 27. This remarkable individual is a creative dynamo who has forged his accomplishments from marathoning to directing the meditation group at the United Nations, from scores of concerts across the Nation to creating a major cross-country bicycling route from New York to San Francisco, from his prize winning poetry to his hundreds of thousands of dynamic and colorful paintings. Through his Sri Chinmoy Centres across the Nation, Sri Chinmoy has inspired thousands of individuals through his outpouring in painting, music, composing, poetry, athletics, and as a dedicated public servant.

Sri Chinmoy's philosophy has much to do with the inner life, but parallel with this emphasis on contemplative experience is a strong affirmation of the value of material existence, and of the need to develop and transform every aspect of life through work and action. This view of reality is dynamic and also his profoundly positive view of human potential leads Sri Chinmoy to stress the transcendence of previously attained goals and the pressing

of limits.

Through his remarkable life he is illustrating that there is no end to our capacities for excellence as individuals or as a nation.

NATIONAL COMMISSION ON FOREIGN LANGUAGES

HON. HENRY B. GONZALEZ

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. GONZALEZ. Mr. Speaker, for a number of years I have proposed a bill to establish a National Commission to preserve our non-English language resources. The Education and Labor Committee held hearings on my proposal in the 1970's which resulted in a provision being added to the Higher Education Act of 1975 that touched somewhat on my idea that we should preserve this Nation's heritage of language resources and utilize these resources in today's world.

However, I am convinced that our country still needs a National Commission to focus on the important role foreign languages play in our Nation and today I am again proposing a bill based on my original proposal. My bill calls for establishing a National Com-

mission for the Utilization and Expansion of Language Resources. The purpose of the Commission would be to develop a national policy for identifying, preserving, and improving our language resources as well as a program to encourage the development of language skills for use in nontraditional areas such as commerce, trade, and defense.

I believe that the reintroduction of my bill is particularly timely in view of the recent studies within the Government that show the need for foreign languages. For example, the intelli-gence/defense community has recenttestified regarding their severe shortage of language personnel. On July 15, 1981, Adm. Bobby R. Inman, Deputy Director of the Central Intelli-Agency testified before the gence House Postsecondary Education Subcommittee with regard to the declining foreign language ability of its employees and how this has impacted on the Agency's operations. During Admiral Inman's testimony it was brought out that it is becoming increasingly difficult to recruit personnel adequately trained in a foreign language because many colleges and universities no longer have foreign language requirements as part of their mandatory curriculum.

A GAO study showed that of the roughly 17,000 Federal overseas positions which require a competency in a foreign language, around 3,400 of these were vacant in 1979. The study also showed that the foreign language competency of the U.S. personnel assigned to these positions abroad is less than that required for maximum effectiveness and efficiency. Based on these statistics and Admiral Inman's comment that the intelligence community is especially vulnerable when it comes to the more exotic languages such as Arabic and Farsi, it is difficult not to wonder if some of the situations that have developed in the last few years in Iran and Afghanistan could have been mitigated by a better understanding and appreciation of their language and culture.

A third study known as the Perkins Commission on Foreign Language and International Studies stated that the presence of bilingual minority groups in the United States constitutes an as yet untapped reservoir of linguistic and cultural expertise which our Nation so desperately lacks, and I

could not agree more.

Mr. Speaker, I believe that we are all coming to realize that proficiency in a foreign language is vital to the efficient and effective operation in many areas of our Government. The Perkins Commission pointed out that our national incompetence in foreign languages is evidence of a very weak link in our efforts to develop an internationally competitive defense system, and that foreign languages, which are

important to the political, economic, and intellectual security of the United States have been overlooked and allowed to deteriorate.

From all of these studies the conclusion, unfortunately, is that we are wasting much of our national language resources by not utilizing the more than 28 million people in our Nation who speak foreign languages and we are minimizing the importance of foreign languages by not making any effort on the national level to sustain and support foreign language edu-

Mr. Speaker, I believe that it is important to point out that my bill in no way attempts to disestablish English as the common language of American unity, but rather to reinforce and maintain the other languages spoken in our country to be used to the benefit of our Nation.

While our Nation might not be abundantly rich in oil resources, we are rich with diverse peoples and cultures, yet to date there is no agency or branch of Government in charge of a full-scale incentive program to encourage social, educational and political associations, educational institutions. and educational systems at the State and local level to develop programs to preserve and expand our foreign language resources.

I am hopeful that this Congress will seriously consider my proposal to establish the Commission provided for in my bill. Study after study shows that the understanding of another language and culture is vitally important in communication with those across our borders and oceans, as well as within our own Nation. Let us not waste the resources we have but utilize them in the best interests of our Nation.

ATHLETIC ACHIEVEMENTS OF GALLAGHER CATHO-BISHOP LIC HIGH SCHOOL

HON. DENNIS M. HERTEL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

· Mr. HERTEL. Mr. Speaker, I would like to bring to the attention of my colleagues the work of two high school coaches whose dedication to their jobs has given Bishop Gallagher Catholic High School in Harper Woods, Mich., some fine athletic achievements over the past two decades.

Women's basketball coach Joanne Shirkey has been at Gallagher for 18 years. During this period her teams have won seven divisional championships, one Catholic League championship and a State class B championship. In 1977 she was awarded the Detroit Free Press Basketball Coach of the Year and the Detroit News All-Metro

Basketball Coach.

Coach Shirkey has a B.S. in physical education and a M Ed. in guidance and counseling from Wayne State University. She has served as dean of students since 1963, women's athletic di-rector since 1961 and physical education department chairperson since 1964.

Likewise, James Bresciami, head coach of Bishop Gallagher's baseball team has an outstanding record of 406 wins and 118 losses. Over the 17 years he has coached at Gallagher his teams have won 10 league championships, 3 Catholic championships and 2 States

class A championships.

As a coach he has won many distinguished awards including: Detroit News Coach of the Year, 1971; Michigan Baseball Coaches Association Coach of the Year, 1973; Michigan High School Coaches Association Baseball Coach of the Year, 1979; Catholic League Coach of the Year, 1973; and he was inducted into the Catholic Coaches Hall of Frame, 1981.

Coaches Shirkey and Bresciami have maintained good, solid athletic teams over the years and have been an inspiration to their students and the com-

munity.

THE STORY OF A DREAM HOUSE

HON. HENRY J. HYDE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES Tuesday, August 4, 1981

• Mr. HYDE. Mr. Speaker, I was very touched by an article I read in the Chicago Tribune recently about the efforts of Charles and Gay Marino to help establish a home away from home for parents whose children were patients at Children's Memorial Hospital. They wanted to help found a home near the hospital for the families of sick children who wanted to be-and needed to be-close to their children.

I believe the history of this special home which started as a dream of one man and became a reality through a concerted effort, is extraordinary. Charles and Gay Marino, Dr. Edward S. Baum, the Catholic Archdiocese of Chicago and John Cardinal Cody, McDonald's Corp. and the Children's Oncology Services of Illinois, Inc., all recognition and special deserve

thanks.

I am pleased to share this inspiring article with my colleagues:

[From the Chicago Tribune, July 30, 1981] "MIRACLE" LEADS TO DREAM "HOME"

(By Vicki Kemper)

Charlie Marino believes a miracle saved his daughter's life six years ago, and he has been paying back her good luck with his gratitude ever since.

He doesn't say much about the hundreds of children with cancer or leukemia and their families he has helped; they simply are other miracles that happened because he was willing to dream and to invest himself in his dream.

Life was not always this way for the 47year-old Loop lawyer.

We were just a normal family of six," Marino said. "We were busy living life like everyone else; doing a lot of nothing, frankly, but not realizing it.'

Then Marino's youngest child and only daughter, Gage, was diagnosed as having leukemia. She was 5 years old.

'It was absolutely terrifying," Marino re-

Gage's pediatrician referred the family to Children's Memorial Hospital, and life for Marino and his wife, Gay, became a cycle of hospital visits, chemotherapy, and anxiety.

When Gage developed a serious side effect

from the chemotherapy, she was hospitalized in intensive care, and Marino and his wife spent 24 hours a day in the hospital. They slept on chairs and benches and took turns going home for showers and to change clothing. They shared their grief with other parents

Gage's condition worsened until she even-

tually was put on a respirator.

We were terrified of losing her," Marino said. "We were praying and hoping for a miracle and we received one. On July 21, 1975, she turned the corner and started coming back."

Gage, now 12 years old, receives treat-ments once every four months.

When it became clear that his daughter was going to pull through, Marino began thinking of how to help other parents whose children were hospitalized. He wanted to help parents who had no place to stay when they brought their children to the hospital for treatment.

"I started dreaming about whether it might be possible to have a place where families could go and stay. It was a fanta-

sy," Marino said.
"You might think we had enough trouble with our own daughter recovering, but we felt it was miraculous and wanted to do something to pay it back. But how do you pay God back? You can't. So we just followed our dream. We wanted to start a parent group.

Marino first went to Dr. Edward S. Baum, his daughter's physician at Children's Memorial. Baum encouraged Marino and told him of a similar house in Philadelphia that had been started with the help of the Philadelphia Eagles football team and McDon-

Marino and his wife flew to Philadelphia for a day and found a house much like they

had envisioned.

'Again, it was almost miraculous," he said. After several months of searching, bar-gaining, and a few more "miracles," Marino and Dr. Baum, with the help of McDonald's, signed a contract for a three-story Victorian mansion at 622 W. Deming Pl., the former convent of St. Clement's Catholic Church.

The house has 7,800 square feet of living space and is on a half-acre lot. It was pur-chased from the Catholic Archdiocese of Chicago. John Cardinal Cody guaranteed the \$150,000 mortgage.

About 70 parent attended the organizational meeting on April 28, 1976, of Marino's parent group, now called Children's Oncology Services of Illinois, Inc. One year later the Ronald McDonald House opened.

The purchase price, renovation, and furnishing of the house totaled \$450,000. It was provided by the Association of Chicagoland McDonald's Restaurants, several organizations that heard of the project and wanted to contribute, a minitelethon broadcast during the half-time of a Chicago Bears game, and donated labor materials and fur-

The \$150,000 mortgage was paid off within two years. The annual costs of running the house are about \$30,000.

Marino attributes the success of the project to miracles.

"We felt like we were on a track with the Lord leading us," he said. "All these things were happening and falling into place and I had no control over them."

Marino said that more than once he worried about what he had gotten himself into. but the people and the money kept coming.

Today the 18-bedroom house is almost always full. Families staying in the house pay \$5 a night, if they can afford it. Some food is donated, but usually the families bring their own and cook in one of two kitchens. They are responsible for doing light cleaning work around the house.

"We try not only to give them a place to stay but moral support," Marino said. "We try to make it as much like a home as possible. They are not really guests. They're involved in the house. They have responsibilities. It gives them something else to do each day besides worry about their children, which they spend enough time anyway.'

Marino and Dr. Baum also set out to do something for the children themselves. Dr. Baum heard of a summer camp for children with cancer or leukemia in Florida, and Marino investigated the idea of setting up one in Illinois or Wisconsin.

They secured a site at the Lake Geneva, Wis., campus of George Williams College and distributed brochures at area clinics, but they knew it wouldn't be easy for parents to let their children go to camp.

"When you've got a parent with a child who has cancer, the thought of separation is not something that comes easy," Marino said "You get very overprotective of those children. You don't know how long you're going to have them and you want to spend all your time with them. But we realized it would be good for the kids.'

In the summer of 1978, 100 children attended the "One Step at a Time" camp, where they could swim, canoe, run, play baseball, and participate in arts and crafts. Doctors and nurses volunteered to serve at the camp clinic, and family members volunteered as counselors.

Marino had been involved with Boy Scouts with his three sons, so he proposed to Dr. Baum that for the second year of the camp they let some of the children cook outdoors and sleep in tents rather than cabins. Marino thought there might be 10 interested children. Twenty-seven signed

When Marino overheard the children talking about how they wouldn't be able to see one another for a whole year, he tried to think of a way to get them together sooner.

So last summer he chartered Explorer Post No. 9012, under the handicapped scouting program. The 25 members go on outings such as horseback riding, camping, bowling, skiing, and roller skating once a month.

"These kids enjoy being together," Marino said. "They all have cancer. Many of them have licked it. They perceive themselves as normal kids who had a special problem. They can't relate completely to kids who haven't had cancer."

Gay Marino said that providing the children with the opportunity of going to camp or on other outings "helps them get over the hump of losing their hair or their friends. It gives them something to grasp onto because they've moved into another

Oncology Services currently is raising money to renovate the Hemotology Clinic at Children's Memorial. Marino also is working on ways to expand activities and programs for youngsters who are reaching college age. 'I don't know what's next," he said, "but

there will always be something."

Marino admitted he spent a lot of time each week working with his different programs, "but we all have much more time than we realize," he said. "I've found some-thing to invest it in. It's a way of paying back what we have gotten.".

BLOOD DONORS

HON. J. J. PICKLE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

. Mr. PICKLE. Mr. Speaker, it is my privilege to recognize the wonderful efforts of 15 of my constituents in the Central Texas Regional Blood Center who have each donated a minimum of 80 pints of blood during their lifetime-over 10 gallons a piece of the priceless gift of life to so many of their fellowmen:

Mr. M. H. Crockett, Jr. (138 pints); Mr. A. L. Paul (137 pints); Mr. Hubert Kotrla (133 pints); Mr. Melvin Rutt (122 pints); Mr. C. Baynard Roberts (102 pints); Dr. Edward Marquis (96 pints); Mr. Roy Lancaster (87

pints); and Mr. Rueben Mathias (86 pints). Mr. Charles Walker (86 pints); Mr. A. J. Paul (85 pints); Mr. Hubert Kelley (84 pints); Mr. Ray Bockhorn (82 pints); Mr. R. G. Parker (82 pints); Mr. Lawrence Brown, Jr. (81 pints); and Mr. John G. Perkins (81 pints).

I personally know several of these good men, and know that they lead full and active lives. For them to take the time to make the contribution shows they really care about others, and it shows what we can all do to help others.

All these men deserve our respect for giving the most precious of gifts, for their gifts of blood are indeed the gift of life. As volunteer donors, they stand as symbols of all those who recognize the need to give blood to sustain the life of patients who would otherwise die. Theirs is truly the gift of love.

HONORING JOHN DALTON

HON. TOM LOEFFLER

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

 Mr. LOEFFLER. Mr. Speaker, I rise this morning to recognize a friend, fellow Texan and dedicated public servant who has distinguished himself

in his community and his profession and has given of his time and talents on occasions too numerous to mention.

I speak this morning of John Dalton, who is the former chairman of the Federal Home Loan Bank Board.

John Dalton now lives in San Antonio, Tex., where he has joined the Gill Savings Association of that city. He resigned his chairmanship of the savings and loan regulation agency last December to make way for an appointee of President Reagan.

John Dalton and I have served together as officers and board members of the Texas State Society, of which

he is the current president.

He has been honored in the past, as I honor him today, in his service to the Federal Home Loan Bank Board. I would now at this time like to submit the following resolution of the Federal Savings and Loan Advisory Committee which advises the Bank Board on the whole range of issues concerning the thrift industry and housing finance.

The advisory committee commends John Dalton for his work as a member and as chairman of the board, as I do

now:

FEDERAL HOME LOAN BANK BOARD

Whereas, the Honorable John Dalton has served as a member of the Federal Home Loan Bank Board in a distinguished manner

since February of 1980, and

Whereas, Mr. Dalton assumed the role of Chairman of the Board during an extremely critical period for the S&L Industry, and under his leadership, the Board continued to pursue solutions to the challenges facing the industry during this critical period, and

as a result of Mr. Dalton's Whereas, advice, assistance, support and gracious manner the transition of the Bank Board's Chairmanship took place with a minimum of disruption and no less of leadership for

the thrift industry, and Whereas, Mr. Dalton has left a lasting legacy to the S&L Industry and to the American Public that the Industry serves, particularly in making financing for home ownership available to the widest possible spectrum of the American Public,

Be it Resolved that (1) the membership of the Federal Savings and Loan Advisory Council express their gratitude for Mr. Dalton's outstanding efforts in behalf of the nations' public good, and (2) the Council membership wishes Mr. Dalton unlimited success on his return to the private sector.

SOCIAL SECURITY MINIMUM BENEFITS

HON. EUGENE V. ATKINSON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

. Mr. ATKINSON. Mr. Speaker, I appreciate the opportunity to be placed on record as opposing the elimination of the social security minimum benefit program. The future of our social security system is of vital importance to me and we must act quickly but carefully in establishing our priorities to

remedy the troubles the system has incurred. We cannot, although, subject our Nation's citizens to needless suffering by retracting promised benefit programs.

The modest advantage provided by social security benefits, such as the minimum benefit, are for some individuals a sole source of income support. Eliminating the social security minimum benefit would be unthinkable for persons who have no alternative means of making up such an income loss.

In my home district of Pennsylvania, people work hard all their lives to insure a comfortable, but sometimes modest, retirement income. Programs aimed to ease the hardships of elderly life are suddenly pulled out from under them. I am in favor of reduced Government spending, but there must be a more justified way to resolve the problems of the social security system without harming the backbone of the

country, the elderly.

The full support of H.R. 4331, to restore the minimum benefit, will prove to our elderly citizens of this Nation that they need not fear for their future existence, and that they need not fear that their elected representatives will act in haste again by making further reductions in the area of social security benefits. I urge all my colleagues to support this legislation and provide our senior citizens with not a feeling of abandonment, but a knowledge of effective leadership.

Thank you.

ECONOMIC PROBLEMS OF IN WOMEN MIDLIFE AND LATER LIFE

HON. TED WEISS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES Tuesday, August 4, 1981

• Mr. WEISS. Mr. Speaker, major changes have occurred in our society concerning the family and the roles of women.

The traditional role of women as homemakers has undergone major changes in the past four decades. Only about one out of seven married women actually worked in 1940. In 1970, one out of every two married women was employed.

Today one out of every three marriages ends in a divorce, compared to

one in seven in 1940.

Many women in midlife are discovering that they are ill equipped to adjust to their changing roles, particularly those who have not worked for a long time and are forced to enter or reenter the job market because of a divorce or the death of a spouse.

The net impact is that a whole new generation of women in midlife has emerged in recent years. They have often been victimized by rapidly changing social values, family patterns, and economic developments.

These women—particularly those who are widowed, divorced, or separated homemakers with young children—may find themselves thrust into multiple roles as breadwinners, heads of households, and mothers. They oftentimes are unable to fulfill all these responsibilities adequately, as they attempt to move from their prior fulltime homemaker status.

Economic problems for women in midlife typically produce deprivation in later life. In fact, women represent about 70 percent of all poor persons 65 years or older. They typically suffer from greater extremes of poverty than

older men.

Widowhood also creates major problems for older women, economically as well as emotionally. The death of a spouse is generally regarded as the most traumatizing event in a person's life.

Most elderly women are widowed. The likelihood of being a widow increases directly with advancing age. Only 22 percent of all women 75 or

older are married.

Older black women who live alone are perhaps the most economically deprived group in our entire society. More than five out of every eight who are 65 years or older live in poverty. And four out of five are either poor or marginally poor.

The harsh reality is that almost three out of four married women today can expect to be widowed at some point in their lives. They will survive their deceased spouses, on the

average, by 18 years.

The problems of middle aged and older women are real and serious. They demand attention by the Congress, the administration, and other policymakers.

Dr. Dolores Davis-Wong, the president of the National Caucus and Center on Black Aged, recently described these problems as well as recommendations to improve the economic well-being of older women when she addressed the North American Regional Technical Meeting on Aging.

In addition, she provided fresh perspectives on the economic situation for older Americans and the impact of the administration's proposed cutbacks in social security for elderly blacks.

Mr. Speaker, I insert in the RECORD the remarks of Dr. Davis for my colleagues to read:

STATEMENT BY DOLORES A. DAVIS-WONG, PRESIDENT, NATIONAL CAUCUS AND CENTER ON BLACK AGED

Congressman Pepper and other distinguished members, the National Caucus and Center on Black Aged appreciates the opportunity to testify today at the American Regional Technical Meeting on Aging.

This meeting takes on an added dimension of timeliness because our Nation will hold its third White House Conference on Aging

in less than six months. In addition, the United States will be a leading participant at the World Assembly on the elderly in Vienna, Austria next year. For the first time in UN history, a U.S. citizen—William Kerrigan, the former General Secretary of the International Federation on Aging—will be named as the Secretary General for a World Assembly. This is a well deserved honor for Bill and our Nation.

This conference today also provides an added opportunity for stock taking of the economic situation of older Americans as well as to chart out a blueprint for future actions.

ECONOMIC SITUATION OF OLDER AMERICANS AND AGED BLACKS

Our Nation has made considerable progress in improving the economic well-being of the elderly since the first White House Conference on Aging in 1961. But in many respects today, we seem to be going backwards.

In some vital economic areas, the income position of older Black Americans—as well as other older Americans—has deteriorated markedly. Poverty, for example, increased by almost 400,000 for persons 65 or older from 1978 to 1979, from 2.3 million to 3.6 million. This represented the largest increase for the elderly since poverty statistics were first tabulated about 20 years ago. Poverty data are not yet available for

Poverty data are not yet available for 1980. However, most experts expect another increase—perhaps of the same recordbreaking magnitude that occurred in 1979. The bottom line is that we may see nearly 500,000 to 800,000 elderly persons added to the poverty rolls from 1978 to 1980.

It is ironic, though, that articles have surfaced in recent months in newspapers and magazines, implying that the elderly are living quite well. One example is a February 18, 1980 article on "The Old Folks" in Fortune magazine. The author had this to say about older Americans: "The myth is that they're sunk in poverty. The reality is that they're living well. The trouble is there are too many of them—God bless 'em".

As far as I am concerned, older Americans are not living well when 3.6 million—one out of every seven persons 65 or older—are classified as poor. They are certainly not living well when about 25 percent—one out of every four older Americans—is considered poor or marginally poor under the govern-

ment's own bare bones definition.

The economic deprivation which affects senior citizens can generally be multiplied two or three times for older Black Americans because they suffer from multiple jeopardy since they are old, Black and quite often poor. In fact, aged Blacks are almost three times as likely to be poor as elderly Whites. About 36 percent of all Blacks 65 years or older live in poverty, compared to 13 percent for older Whites. In 1979, 55,000 elderly Blacks were added to the poverty rolls, raising the total from 662,000 to 717,000. This represents the highest number of improverished older Black Americans since 1966, when 722,000 were poor. In addition, almost 300,000 aged Blacks had income not more than 25 percent above the poverty line in 1979.

This means that 1 million Blacks 65 years or older are either poor or marginally poor. The net impact is that one out of every two older Blacks (49 percent) either lives in poverty or so close to it that he or she really cannot appreciate the difference.

Older Black women who live alone or with nonrelatives are among the most economically deprived groups in our society today. A

shocking 65 percent of those 65 or older live in poverty. And 80 percent are either poor or marginally poor.

I have provided these gloomy figures about the economic position of elderly Blacks and other older Americans to emphasize that a retirement income crisis affects millions of persons 65 or older and threatens to engulf many more. NCBA strongly believes that the number one issue confronting delegates at the 1981 White House Conference on Aging is to assure older Americans have an adequate income.

One of the first orders of business—and now more than ever—is to prevent cutbacks in Social Security, which is the elderly's primary source of income. In fact, Social Security, provides at least one-half of the total support for almost three out of four aged individuals who receive Social Security and more than one out of two similarly situated elderly couples. In one form or another, Social Security touches the lives of almost every American family.

A strong and healthy Social Security system and an effective Supplemental Security program are vital for older Black Americans because these two sources constitute the bulk of their income. Most older Americans have income from assets—such as interest from savings accounts and dividends from stocks—but not older Blacks. Elderly Whites are three to four times more likely to have income from assets than Blacks. Approximately 63 percent of White males 65 or older and 40 percent of elderly White women receive asset income—in constrast to 16 percent of Black aged males and 12 percent for Black older women.

NCBA opposes the Administration's proposal to slash Social Security by 25 percent for persons claiming benefits at age 62. Under present law, people retiring at age 62 receive 80 percent of the benefit that would be payable at age 65. The Administration would cut this back to 55 percent.

This penalty for early retirement would work a great hardship for (1) persons who are forced to retire because they are unable to locate employment or (2) those individuals with a disabling condition but not sufficiently severe to meet Social Security's strict definition.

The Administration's proposed cutbacks in disability protection would perhaps impose a greater hardship than the reductions recommended for older Americans. They would greatly erode disability protection for workers and their families by:

Substantially increasing the "recency of work" test to qualify for disability benefits;

Removing vocational consideration in determining disability for older persons and relying instead solely upon medical determinations;

Increasing the waiting period from five to six months to qualify for disability benefits; and

Requiring a disability prognosis to last for at least 24 months, instead of 12 months as under present law. These measures would have a substantial impact upon older persons because more than one-half of all disabled workers are 55 to 64 years old. Older Blacks would be among the major casualties if these proposed changes become law. Blacks account for almost 17 percent of all disabled workers and dependents because:

Blacks run a much greater risk of being disabled than Whites because we are much more likely to work in dangerous occupations; and Economic deprivation increases the likelihood of poor health and deteriorating physical condition.

NCBA also opposes measures to raise the eligibility age for full Social Security benefits from 65 to 68 because older Blacks and other minorities would be most adversely affected by this proposal since they have a shorter life expectancy than Whites. NCBA strongly believes that our national policies should promote employment opportunities for all Americans, including older Americans. But raising the eligibility age for full Social Security benefits is not the way to achieve this objective. There are clearly preferable and more equitable alternatives to implement this objective. For example, the delayed retirement credit may be increased-perhaps from 3 percent to 6 percent beginning in 1982—to make it more attractive for persons to continue working after age 65, rather than retiring. Another alternative is to abolish mandatory retirement completely for individuals in the private sector. And, the earnings limitation could be increased immediately.

If our Nation should decide that it is necessary or desirable to reduce Social Security protection in the future—and NCBA hopes that will not be the case—there are better options than to force persons who cannot work because of physical limitations to absorb the brunt of these cutbacks. These individuals are least likely to have pensions, savings, or other income to supplement their Social Security. They are the people who can least afford a reduction in benefit

protection

I would now like to turn to measures that NCBA supports. First and foremost, our Nation should make it national policy to abolish poverty for all older Americans. We have the resources to allow all older persons to live in dignity and self respect. What is needed is the commitment. NCBA believes that the most cost effective way to implement this objective is to elevate the Supplemental Security Income standards to a level to eliminate poverty for older Americans.

to eliminate poverty for older Americans.

Efforts must also be made to remove the anti-family provisions in SSI. One example is the one-third reduction in the benefit standard for SSI recipients who live in the household of another. This provision penalizes elderly people who are helped by their children or grandchildren. In the long run, it may cost the government more because some of these older persons may wind up in institutions at a much higher public cost than would be the case if they had been maintained in a relative's home.

NCBA urges that the one-third reduction provision be repealed because it discourages families from providing a home for SSI recipients. In some cases, it may actually encourage them to place their relatives in in-

stitutions.

SPECIAL PROBLEMS OF OLDER BLACK WOMEN

The U.S. population is becoming increasingly older and decidedly more feminine. More than 25 million persons are 65 years or older, or one out of every nine Americans. Older women outnumber men by almost three to two.

NCBA strongly believes that our Nation should develop special policies to focus on the unique and growing problems of aged women, and particularly older Black women. Nearly 70 percent of all poor persons 65 years or older are women. Most older women are widowed. Marriage is the exception, rather than the rule, for elderly women. About 52 percent of all women 65 years or older are widowed. Widowhood in-

EXTENSIONS OF REMARKS

creases markedly with age because (1) women have a longer life expectancy than men and (2) men generally marry younger women. In fact only 22 percent of all women 75 or older are married.

Women in mid-life are also discovering that they are ill-equipped to adjust to their changing roles, particularly those who are forced to enter or re-enter the job market after being channeled into marriage and homemaking during their earlier years.

Women have been discriminated against throughout their lives in our society. They are typically paid less than men for the same type of work. Several federal programs view women generally as dependents rather than wage earners. Employers often consider a woman's earnings as "pin money".

These problems are intensified for middleaged and older minority women. They typically suffer a form of "triple jeopardy" because of their age, race, and sex. They are oftentimes channeled into low-paying, sexrelated and race-related occupations, such as domestics, clerical workers and other low status occupations. Their earnings are frequently at the minimum wage or just barely above it.

NCBA is nearing completion of a monograph that summarizes major findings of a one-year study concerning employment problems confronting middle-aged and older women. The report develops several recommendations to maximize employment opportunities for women 45 and above, including: Funding for the Title V Senior Communi-

Funding for the Title V Senior Community Service Employment Program (SCSEP) should be increased to provide more jobs for low-income persons 55 or older. Special efforts should be undertaken to respond to the unemployment problems confronting older women, with major attention to aged Black and other minority females.

The existing Social Security earnings test should be liberalized to encourage more

people to work after 65.

Innovative employment arrangements, such as part-time employment, flexi-time, phased retirement, and others, should be promoted to accommodate a worker's preference and family responsibilities.

Displaced homemaker programs should be

continued and expanded.

Counseling services should be made readily available to enable mature minority women to enter the labor market, particuarly displaced homemakers who have not been employed for several years.

Social Security should assure long-term employees with average lifetime earnings at or somewhat below the federal minimum wage a special minimum monthly benefit above the poverty line.

SOCIAL SERVICES

An effective income strategy alone, though, is not going to solve all the problems of the elderly. Older Americans also need services. Consequently, it is imperative that we have a well thought out social services strategy to complement an effective income strategy.

income strategy.

It is especially important now to develop a broad continuum of care because the "at risk" population—those persons 75 and above who run a much greater risk of being institutionalized—is expected to increase markedly in the years ahead. The Bureau of the Census estimates that the total U.S. population will increase by 21 percent from 1976 to 2000, from 215.1 million to 260.4 million. The 65-plus population, however, is expected to increase almost 39 percent. The sharpest growth will occur, by far and away, among the elderly aged, those people 75 and

above. And, the overall rate will be even higher among older Blacks.

For example, the number of Blacks in the 75-84 age bracket will increase by nearly 78 percent from 1976 to 2000, in contrast to 54 percent among Whites in this age group. The Black and White 85-plus population will nearly double during the final quarter of this century, increasing 89 percent.

One positive step to develop a broad continuum of care is to enact the Pepper-Waxman Community Care proposal which would provide a wide range of home- and community-based services for "at risk" persons who can continue to remain in their communities.

SERVING THE ELDERLY WITH THE GREATEST ECONOMIC OR SOCIAL NEED

NCBA believes that social services should be directed at older persons with the greatest economic or social need. The Congress included this requirement in the Older Americans Act because that legislation simply does not have sufficient funds to serve all persons 60 or older. This requirement takes on added meaning now because poverty increased precipitously for the elderly in 1979. NCBA believes that it is essential that this mandate be fully and effectively implemented.

CONCLUSION

The field of aging is entering a new era. The legislation of the 1960's and 1970's produced major gains for older Americans. It also improved their economic well-being considerably. Quite clearly, we are in a more austere era today. However, I do not believe that people—especially older Americans—want to see years of progress wiped out by hasty or ill-conceived proposals.

The White House Conference on Aging and the 1982 World Assembly on the Elderly can help assure that progress continues in the field of aging nationally and internationally. President Kennedy once remarked that it is not enough to add new years to life. Our goal must also be to add new life to those years. We, as advocates, should work to make this objective a reality.

THE REAGAN PARADOX

HON. JONATHAN B. BINGHAM

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. BINGHAM. Mr. Speaker, in scoring his startling victories over the last weeks, President Reagan has demonstrated an extraordinary talent for communicating with the American public and for using the power of the Presidency to achieve his legislative goals. Not unreasonably, he has been compared by many with F.D.R.

The paradox is that he has used that power to reduce "the power of Government to act for the common good."

In a truly distinguished editorial analyzing the significance of the Reagan victories, the New York Times (August 2, 1981) predicts that "one day soon" the American people will not be pleased with what their duly elected President hath wrought:

THE REAGAN PARADOX

One thing is surely settled: the Presidency is no feeble office. Let a shrewd President single-mindedly pursue a policy broadly grounded in his election mandate, and he can put it across

It does not follow that Mr. Reagan's economic program is therefore wise or efficient, or that a different program, without tax cuts, could have fared so well. But conservatives did not invent the technique of buying votes with Federal monies; democracy tilts toward gratifying private wants. It is plainly untrue, however, as many have com-plained, that the democracy of Congress is bound to frustrate the democratic will that elects Presidents.

Nor is it true that Presidential power requires a telegenic face. Rest in peace, Lyndon Johnson. Power lies in circumstance and in the skill with which it is exploited. The Democrats who opposed Mr. Reagan's budget and tax bills played weak hands, but they played them badly. By turning for help to special-interest lobbies, they only challenged the President to outbid them. By forcing a showdown when they lacked decisive strength, they only magnified the

drama of his victory.

But is this President's paradoxical tri-umph also the nation's? He gathers power for the purpose of denigrating its value in shaping America. He does not say the nation is overextended financially. He does not say guns are momentarily more important than butter. He does not rerank the nation's needs or argue against assorted remedies. He denounces all Federal government as oppressive, as the cause of economic dis-

tress and a threat to liberty.

So Mr. Reagan has arranged to shrink annual Federal spending by 1984 by about \$150 billion and cut taxes to let individuals and businesses spend that sum instead. Economically, that is mostly a transfer of purchasing power which cannot much reduce inflation or unemployment, the Federal deficit or debt. On the contrary, a big increase in military spending will enlarge the deficit unless the President finds further huge savings in civilian programs. And the pressure to find them-wherever-is what he values most about his accomplishment.

But why does the President boast that he has thus improved economic prospects? Because he holds, as a matter of faith, that a dollar spent privately creates more wealth than a dollar spent by Government.

That is surely sometimes true: a Government-run railroad that is politically beholden to its unions will tolerate more waste than a private bus company. But it surely also is sometimes untrue: a Government investment in a student or road or depressed community can stimulate more productive activity than the same sum spent by private citizens on diamonds or cameras. Government may be incompetent to achieve some of its social goals. But uncoordinated private spending is notoriously inefficient in meeting large public needs.

Take the obvious, urgent need to cool inflation. Mr. Reagan's answer is a tortuous chain of incentives: cut a family's taxes by \$500 and the money goes to banks and merchants who invest in more businesses and machines which will be more efficient and hold down prices. Also: reduce a citizen's tax on the next earned dollar from 29 to 25 cents and he'll work harder longer and thus

But if it were primarily interested in economic results, Government has surer ways to achieve those results—as even Mr. Rea-

gan's plan recognizes. For it aims large tax reductions directly at businesses that buy cost-reducing machines or job-producing plants. A still more efficient plan would have aimed more precisely at the most wanted machines and at workers who hold down wages or communities that reduce sales taxes

The unavoidable conclusion is that Mr. Reagan wants to use his power primarily to diminish Government-even where that dilutes economic recovery and prevents efficient allocation of resources.

That the President's plan will revive the economy remains to be proved. What is no longer in doubt is that his economic remedies mask an assault on the very idea that free people can solve their collective problems through representative Government. One day soon Americans will rediscover that their general welfare depends on national as well as parochial actions. And then they will want not just a powerful President but one who cherishes the power of Government to act for the common good.

TRIBUTE FOR COMMUNITY SERVICE

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

. Mr. GARCIA. Mr. Speaker, today I would like to take this opportunity to commend Philip Morris, Inc., and its operating companies for its active participation on behalf of the Hispanic community during the past year. On behalf of the members of the Congressional Hispanic Caucus, I would like to thank them for their support in completing the "National Directory of Hispanic Elected and Appointed Officials," and also for the Philip Morris USA's publication of "A Guide to National Hispanic Organizations.'

For decades, the Hispanic organizations and elected officials of the United States have taken the lead in the continuing struggle for social, economic, and political opportunity. In communities across the land, they have made a powerful contribution to the well-being of the people they serve.

Yet, many of these organizations and elected leaders have had to work in isolation. They have lacked the information that would enable them to communicate with other Hispanic organizations in order to share experiences, establish a continuing dialog, and provide mutual assistance in matters of mutual concern.

That is why these publications are such an important achievement. With these publications the Hispanic community has a comprehensive list of its national, State, and regional organizations and locally elected officials. We congratulate the Philip Morris organization on its active involvement and hope it will continue this level of community activity in years to come.

A BILL TO AMEND THE SHIPPING LAWS

HON, MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

. Mr. BIAGGI. Mr. Speaker, today, I am introducing a bill that will amend the regulatory aspects of our national shipping policy that are embodied in the Shipping Act of 1916. The purpose of this bill is to clarify and amend the shipping laws so as to provide for greater recognition of commercial maritime standards when approving agreements between common carriers by water, to authorize the formation of shippers' councils, to provide for expeditious procedures for the approval of agreements and the handling of complaints, to provide for a simplified method of civil penalty assessment, and for the bonding of freight forwarders and nonvessel operating common carriers. The bill will, in effect, eliminate the controversial public interest test when approving agreements, thereby reducing effect of the antitrust laws. It will. however, continue to provide safeguards against agreements and practices of ocean common carriers serving the United States that would be detrimental to the commercial interests of our Nation.

To that end, this legislation is aimed at preserving competition by continuing the regulation of services, rates. practices, and agreements of common carriers engaged in the foreign waterborne commerce of the United States through tariff filing, investigatory, and decisionmaking procedures of the Federal Maritime Commission. All carriers, whether U.S.-flag or foreign-flag, whether subsidized or not, whether a member of a conference or acting independently, must adhere to these procedures and controls so as to permit all of them to compete under the same rules.

In this era of deregulation, one might ask why do we still pursue a regulatory program for our foreign waterborne commerce? The reasons lie in the historical development of our shipping and antitrust laws, their relationship to international shipping and trading policies, and the realities of competition in the international maritime marketplace.

For many years, all of the nations engaged in foreign waterborne commerce-including the United Stateshave recognized the violent and unpredictable competitive nature of this commerce and the problems it creates. Invariably, the monopolistic and discriminatory nature of rate-war competition destroys the requisite dependability and regularity of service and the nondiscriminatory nature of the

ocean common carrier—all of which acts to the detriment of the exporter and importer and the consumer in general. Nearly all the maritime nations justify the formation of controls, agreements, and conferences so that these carriers may limit or regulate competition between or among themselves. Only the United States imposes regulatory controls over these agreements and conferences in return for a grant of antitrust immunity.

As common carriers, shipping lines that are members of a conference hold themselves out to serve the public in a nondiscriminatory manner and on a previously announced regularly scheduled basis, regardless of the types of cargo offered. The businessman, the importer or exporter, and all others engaged in the movement of goods in foreign waterborne commerce must be reasonably assured that they will be provided with regular, dependable, and predictable ocean common carriage at relatively stable rates. It is especially important to them that they be assured their competitors are not paying a lower rate or getting undue preferential treatment. The Federal Maritime Commission through its regulatory authority attempts to provide these assurances. The history of this internationalized industry, however, does not provide any such assurance and, in fact, indicates that there seldom is an open competitive system for any reasonable length of time.

During the last Congress, I was involved in the consideration of a voluminous bill that contained major alterations to national maritime policy including a major revision of maritime regulatory policy. It also included major revisions in subsidy policies, taxation, and governmental reorganization. This so-called omnibus maritime bill met with considerable resistance from major maritime interests and the administration, primarily, I believe, because it attempted to do too much at one time. However, the hearings on this bill did provide an insight into the interrelationships and mechanisms of our foreign waterborne commerce, its effect upon international trade and our balance of payments, its effect upon the national defense posture of our Nation, and its effect on our domestic economy.

While some continue to advocate an omnibus approach, I have come to the conclusion that a piecemeal approach is more practical. I have also concluded that a complete revision and rewrite of the 1916 Shipping Act—as was proposed by title II of the omnibus bill—is not necessary. That law and the regulations and procedures implementing it are understood by all interested parties and by our competing trading partners. It only requires minor modifications. The modifications this bill proposes will provide for greater regulatory flexibility so as to

make our laws and procedures consistent with those that have been generally accepted in international trade. This is mandatory if we are to effectively compete within the international maritime marketplace and at the same time limit the potential for monopolistic abuse.

Recently, we decisively acted upon the administration's proposal to transfer the Maritime Administration to the Department of Transportation to facilitate the development of a coherent maritime program. In the near future, I hope we can also act expeditiously upon any specific recommendations the administration might have to resolve the serious problems of our maritime industry. In the interim, I believe it is important that we go forward with these revisions that will make some much-needed improvements in our shipping laws.

SHERMAN BIRDWELL, A GREAT AMERICAN

HON. J. J. PICKLE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. PICKLE. Mr. Speaker, recently we laid to rest in the Texas State Cemetery our good friend Sherman Birdwell

Mr. Birdwell was a man whose imprint has been very prominent in our society today. When Lyndon Johnson was elected to the U.S. Congress he selected Mr. Birdwell as his first Administrative Assistant. In those early days he helped our President mold and advance the programs that launched Mr. Johnson on a national career resulting in his achievement of being elected President of the United States. Throughout the years Mr. Birdwell continued his work in good government, particularly in the National Youth Administration, which helped so very effectively the young men and women of our State and Nation. He served as district director of the N.Y.A. and has always felt a sense of great pride in helping disadvantaged youth. He served prominently in World War II as an officer in the U.S. Navy and returned to Austin to engage in both the radio field and in the business world. He was a tireless civic worker, particularly to the Kiwanis Club, and gave to his city of Austin much effort and time in advancing good causes of government.

I have been associated with Mr. Birdwell all my life as a co-N.Y.A. worker, and as a civic worker, as a business associate, and as a personal friend. I join the many thousands of friends this good man has in pointing out to my colleagues that we have all lost one of the best men who lived. I

extend my sympathy to his family and friends.

JOHN S. KNIGHT

HON. DENNIS M. HERTEL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. HERTEL. Mr. Speaker, I would like to join my colleagues in noting and mourning the passage of John S. Knight, Pulitzer Prize winning editor emeritus of Knight-Ridder newspapers. Knight helped build a \$1-billiona-year newspaper empire of 33 newspapers in 24 cities, including the Akron Beacon Journal, Miami Herald, and the Detroit Free Press. His newspapers won 26 Pulitzer Prizes, including the one Knight won for his columns opposing the Vietnam war.

Mr. Knight had a very diversified career in journalism; he worked as reporter, editor, businessman, and publisher, but he was always proudest of being editor. Knight received many distinguished awards for writing, his best work being a signed column, "The Editor's Notebook," which he wrote for nearly 40 years and for which he won a Pulitzer Prize in 1968.

Jack Knight felt that a newspaper's duty was to get the truth and print it. His newspapers followed that philosophy, always striving to meet the high-

est standards of journalism.

We are all saddened by John Knight's passing, but his newspapers continue to reflect his thoughts and ideas and will continue to be a real asset to this great country, informing the citizens, commending and criticizing the issues of the day and a constant reminder of the freedom on which this country is based. In this way, let us memoralize John Knight, the brilliant and reflective man, the distinguished editor, and the inspirational publisher.

THE BIRTHDAY OF RAOUL WAL-LENBERG IS A DAY OF RE-MEMBRANCE AND ACTION

HON. TOM LANTOS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. LANTOS. Mr. Speaker, today, August 4, 1981, marks the 69th birthday of Raoul Wallenberg, Swedish diplomat who rescued 100,000 Hungarian Jews from the holocaust and who, for 36 years, has been held without explanation in Soviet prisons.

The courage and heroism of Raoul Wallenberg was unmatched by any other person in the closing days of World War II. The story of his bravery and sacrifice have become known

to the American public after more than 30 years of silence. The fact that his mission in Budapest was sponsored, directed, and financed by the American War Refugee Board is no longer kept secret.

In fact, many steps to recognize and honor Raoul Wallenberg are underway. Today, on his birthday, the cities of San Francisco and Washington, D.C., have proclaimed Wallenberg an honorary citizen of each city. In a unique action, San Francisco today renamed Green Street for 1 hour, changing its name to Raoul Wallenberg Street. This is the thoroughfare on which the Soviet consulate stands.

On March 26, 1981, I introduced House Joint Resolution 220 in the House of Representatives. This bill, granting honorary citizenship Raoul Wallenberg (with the bipartisan support of now 280 cosponsors) has passed unanimously the House Foreign Affairs Committee and the Immigration Subcommittee of the House Committee. Chairman Judiciary RODINO, of Judiciary, has generously agreed to place the resolution on the committee agenda for consideration early in the fall.

I am confident that when this resolution reaches the floor of the House my colleagues will join me in an unanimous vote for its passage. Yesterday, the Senate of the United States passed unanimously the companion Senate bill awarding honorary U.S. citizenship to Raoul Wallenberg. The timing of the Senate action, on the day before Wallenberg's birthday, is appropriate and I commend them for it.

I anticipate the administration will continue its unwavering support of this international and national human rights issue. I am optimistic that House action will occur early in the fall, permitting the President to arrange an appropriate ceremony to celebrate the signing into law of this historic bill sometime in October.

PEOPLE FOR THE AMERICAN

HON. HENRY J. HYDE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

. Mr. HYDE. Mr. Speaker, one of my favorite journalists is John D. Lofton, Jr., editor, Conservative Digest. He combines wit and tenacity with a unique style and two examples of his work deal with a new group called People for The American Way. This group is supposed to be an antidote to the burgeoning Moral Majority which so terrorizes the trendy left.

I share Mr. Lofton's articles with my colleagues:

[From the Conservative Digest, July 1981] People For American Way Ad Campaign More Proof Of Failure Of Liberal Ideas

(By John Lofton, Jr.)

Anyone searching for additional evidence further demonstrating the bankruptcy of what passes for liberal thought in this country (and I hasten to add that I can't imagine who might need more evidence) should watch closely a series of so-called public service TV ads being offered by an outfit called People for the American Way (PAW).

For the uninitiated, PAW is a new coalition of such ultra-liberals as the Rev. M. William Howard, president of the National Council of Churches of Christ in the USA Norman Lear, the writer and producer, and the ex-mayor of New York, John Lindsay, It. is seeking to counter what is called "the intolerant messages and antidemocratic actions of moral majoritarians"-that is, the New Right, specifically the religious New

Here's the complete text of a 30-second PAW spot bearing the provocative title "Eggs." The ad shows a variety of individuals saying the following:

'What kind of eggs do I like? I'll tell you what I like. I love Western omelettes.

'Eggs with onion in 'em. That's a horrible thought.

'I like eggs with cream cheese."

"That's kind of disgusting.

"I can't eat eggs."

"They're loaded with cholesterol."

"I still prefer my omelette.

"O.K., you could, but I still like 'em sunny side up and I'm not going to change.

The tagline on this ad is a voice saying: the right to have and express your own opinions. Freedom of thought. That's the American way.'

Ugh. Talk about disgusting horrible thoughts.

One can say what one likes about the religious New Right, but at least they're talking about real issues that touch the lives of tens of millions of Americans: abortion, homosexuality, voluntary school prayer, busing, the family, sex education, drugs, reverse discrimination, etc. And, just for the record, there's not one New Rightist I know who favors any kind of law prescribing the way people ought to eat their eggs.

At a PAW press conference in Washington, D.C., when I asked Norman Lear why his group wasn't taking the religious New Right head on and debating their issues with them, he ducked the question, defer-ring to the Rev. Howard, president of the

NCC. Said Howard:

"Our ads make one feel good. There is a spirit developing in the country that it's not okay to differ. And when you pile on that a rather nonhistorical religious conviction, it really stifles the human spirit." Howard says that the idea that it is legally correct and fun to disagree and debate is an old American notion.

Indeed. But, this is my point: The PAW bunch is not debating the issues with the religious New Right. They are ducking these issues, choosing instead to wrap themselves in the phony banner of some sort of absolute pluralism which has truly become the last refuge of the scoundrel. The PAW is

not debating; it is merely calling its opponents names

In a fundraising letter, Lear accuses the religious New Right of labeling those with whom they disagree as "un-American," "un-Godly" and "immoral." But when I asked Lear specifically who in the religious New Right he is talking about, he was unable to

give me a name. I pressed my point, asking Lear if he had been poorly briefed, if his memory was poor or if perhaps he never knew such a name in the first place. He promised me names if I'd call his office. You can't give me just one? I asked. Says Lear: "I feel no shame telling you I can't remember just one."

This is very strange. When Lear and his PAW colleagues speak of the leaders of the religious New Right (they currently threaten "the very essence of individuality" and are "helping to tear our already-splintered society apart"), they are talked about as if they are the spiritual descendants of Hitler or Stalin or Mao. One would think that this dishonor roll of archfiends would forever be seared into the psyche of Norman Lear. But it isn't. Or, at least, that's what he tells me.

The disagreements between PAW and the religious New Right are about something far more tangible than the right of free expression or free thought. This is a battle about whose thoughts or expressions will prevail. This is a fight about whether it should be legal to kill innocent, unborn children; whether those kids who want to should be allowed to pray in the public schools; whether children should be forcibly bused to schools not of their choosing; whether parents should have any say at all about their kids' sex education.

By all means, let's freely discuss and debate these issues. But the PAW crowd should take a stand and let us know where they come down on these matters. As G. K. Chesterton observed, the individual who admires only choice, fails to choose.

AMERICAN WAY PERSON DOES VERY POORLY IN DEBATE ON ABORTION

In the following exchange, admittedly with mixed results, CD editor John Lofton Jr., attempted to discuss a real issue, abortion, with a member of the advisory board of People for the American Way, the Rev. Charles Bergstrom, executive director, office of governmental affairs, Lutheran Council in the U.S.A. This conversation began when Bergstrom maintained that he "just as concerned" about unborn children as is the Rev. Jerry Falwell, head of the Moral Majority.

Lofton: You mean, like Falwell, you favor legal protection for the unborn?

Bergstrom: What is your question?

L: I repeat the question.

B: I'm against any law that would impose any religious view of abortion on the whole country.

L: But you said you were just as concerned about the unborn as Falwell is, didn't you? And Falwell favors legal protection for the

B: The terminology on abortion is very difficult these days

L: But we both know what the word 'unborn' means, don't we?

B: No, I don't-

L: It means a baby that hasn't yet been born.

B: The fetus is a future human being, a form of human life. It is not a person.

L: A lower form of human life?

B: A form. We don't make a judgment.

L: Is the fetus a form of human life worthy of any legal protection?

B: All life has protection.

L: Even the unborn?

B: I don't know what the "unborn" means. L: Okay, the fetus. What is the legal protection for the fetus, as you understand it? How is the life of the fetus presently protected?

B: By the judgment of the individual par-

L: Legal means, is there a law protecting the fetus? Is there such a law now protecting the fetus at any stage of development?

B: Well, what you would call a law to protect the fetus, I would call an oppressive law to force one religious viewpoint on the rest of us.

L: But before we argue this, I want to clearly understand your position. You've already said the fetus is a different form of human life—

B: Not a different form. It's not a person.

L: Is it human life like you and me?
B: It's human life but not a person.

L: Is it a different form of human life than you and me, or is the fetus as alive as you and me?

B: Well, life is a relationship to God.

L: I thought life is God-given.

B: Right, but we have something to do with it.

L: So, even fetal life is God-given?

B: Right.

L: Then should the law protect this Godgiven fetal life? Is this form of life worthy of some kind of legal protection?

B: See, every one of your questions has a pejorative term like, is it "worthy"?

At this point, the Rev. Bergstrom wisely attempts to shift the discussion to my views on birth control. But, as a former fetus, I am not deterred.

L: Do you support the Supreme Court's 1973 Roe vs. Wade abortion decision?

B: What I support is the Lutheran Church's decision made in democratic convention.

L: Does the church support the court's 1973 decision?

B: Yes, the Lutheran Church in America

For the record: The Supreme Court's 1973 Roe vs. Wade decision legalizes abortion-ondemand—a view the precise opposite of that held by Jerry Falwell.

Talking with the Rev. Charles Bergstrom about abortion, one understands why the People for the American Way would rather discuss freedom of choice as regards music, sports and how one likes one's eggs cooked.

THE PRESTIGE PRESS AND THE CHRISTMAS BOMBING, 1972: IMAGES AND REALITY IN VIET-NAM

HON. JACK FIELDS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. FIELDS. Mr. Speaker, after losing the Battle of Waterloo, one of the field officers to Napoleon Bonaparte inquired of him, "What will history say of us now?" Reputedly, Napoleon responded "What is history, but a lie agreed upon?"

According to a new book by Martin F. Herz, Napoleon's sentiments could have been accurately directed toward much of the reporting that filled America's newsprint and airways during the Vietnam conflict. Mr. Herz is the distinguished former ambassador who is now director of studies at Georgetown University's Institute for the Study of Diplomacy.

Mr. Speaker, I am placing into the RECORD a review of Mr. Herz's book, "The Prestige Press and the Christmas Bombing, 1972: Images and Reality in Vietnam." The review is written by Peter W. Rodman, a former member of the National Security Council staff. I expect that this review will entice my colleagues to read this book and others like it, and thereby discover that the Janet Cooks of our day have a substantial geneolgy.

[From the American Spectator, August 1981]

A REVIEW OF "THE PRESTIGE PRESS AND THE CHRISTMAS BOMBING, 1972: IMAGES AND RE-ALITY IN VIETNAM"

(By Peter W. Rodman)

Not long ago, a friend of mine teaching at a well-known northeastern university was discussing Vietnam with a group of freshmen and referred to the Christmas bombing. One of the students asked an amazing question: "What was the Christmas bombing?"—amazing because it betrayed not so much the freshman's ignorance as his age. For a new generation is indeed emerging that has no personal memory of these events. They might as well have been discussing the Treaty of Versailles.

Frankly I find this hopeful. The next generation of Americans may yet be able to consider the Vietnam war with some semblance of objectivity, with minds unpoisoned by the passions, the peer pressure radicalism, or the journalistic distortions of the period. And if much of the junior faculty is still, as it undoubtedly is, the entrenched remnant of the 1960s enrages, perhaps the exuberant skepticism of youth will find even their smug antiwar orthodoxy a

natural and juicy target.

But make no mistake about it, the battle for the minds of the young has already begun in earnest. At the end of April the New York Times Book Review informed us of two new brief histories of the Vietnam war written for teenagers. The reviewer chastised one of them for being insufficiently explicit about the lies, deceptions, atrocities, and general criminality of the United States government. The other book he praised. One can imagine what it must be like.

Fortunately there is a growing library of scholarly work of a more balanced character, interested not in waging ideological warfare but in pursuing historical truth. A few years ago, journalist Peter Braestrup, in "Big Story," did a monumental study of how the American press and television reported and interpreted the Tet offensive of 1968; he overwhelmed skeptics with two volumes of irrefutable evidence that media cov erage of the event was a distortion of reality. Guenter Lewy, in "America in Vietnam," has done a meticulous analysis of the military conduct of the war, critical in many respects, but in the process knocking down canards about American war crimes and atrocities. Now comes a first-rate book answering the puzzled freshman's question: What was the Christmas bombing? The author is Martin F. Herz, a distinguished former ambassador who is now director of studies at Georgetown University's Institute for the Study of Diplomacy. His answer may be even illuminating to many who remember the period, because most of the new cover-age of the time—as the book shows—bore

little resemblance to what really happened. On October 26, 1972, North Vietnam and the United States both acknowledged publicly for the first time that they were close to an agreement on a cease-fire, release of prisoners of war, and American withdrawal; Henry Kissinger declared (a bit prematurely) that peace was "at hand." Negotiations resumed in November, settling many maining issues, but ran aground in mid-December. After several days of frustration, the United States concluded that Hanoi had made a strategic decision not to complete the agreement. The impatient new Congress convening in January could be expected to force the United States out of the war on terms far worse than those embodied in the stone-walled agreement. Richard thereupon lifted restriction on the bombing of North Vietnam, and for twelve days, from December 18 to 29, 1972, U.S. B-52s and fighter-bombers assaulted military targets in and around Hanoi and Haiphong. At the same time, General Alexander Haig visited Saigon to bring around our South Vietnamese ally, who was also balking at the ceasefire. Kissinger's negotiations with Le Duc Tho resumed in early January and quickly resulted in a completed agreement.

The bombing clearly caught the American public by surprise, and was perhaps as much of a shock at home as in Hanoi. The antiwar movement, up to that point demoralized by George McGovern's defeat and disarmed by Nixon's apparent near-achievement of peace, erupted in a cathartic last orgy of vicious attacks on Nixon's Vietnam policy. The United States was accused of indiscriminate carpet-bombing of civilian populations. Analogies with the four-day firebombing of Dresden were common; Hiroshima was called to mind. "Terror Bombing in the Name of Peace," howled the Washington Post; "Shame on Earth," lamented Tom Wicker in the New York Times. Editorials predicted that the bombing would only harden the hearts of the North Vietnamese and make a negotiated settlement impossible. And Nixon was much berated for callously remaining silent throughout the period, never fully explaining to the American public what was happening and why.

Ambassador Herz and his research assistant Leslie Rider have collected the available evidence on the bombing, its background, and its effects. And, methodically and at length, they have examined and analyzed the contemporary news coverage by five leading "prestige" news organizations: the New York Times, the Washington Post, Time, Newsweek, and the CBS-TV "Evening News." They found the media treatment to be unbalanced, misleading, and emotional in its revulsion at the bombing-not only in editorial columns but in one-sided news reportage, not only in light of what is known now but in terms of information available then. Charges of U.S. responsibility for the breakdown of the talks, of reckless use of B-52s, of massive civilian damage, of unanimous foreign criticism, of the futility of bombing as an instrument of pressure—these themes dominated the reporting. Much less space was given to the contrary evidence and opinion which demonstrably existed: "The news was largely generated by opponents, and the U.S. prestige media copiously reported as news (with full attribution) the propaganda given out by the enemy and his allies."

The charges of gross urban destruction and massive civilian casualties were belied by Hanoi's own published casualty figures—about 1,300 over twelve days, which, as the Economist later pointed out, was the same number of civilians killed earlier in the year by deliberate North Vietnamese artillery

fire on a refugee column fleeing Quang Tri in South Vietnam. (Deaths at Dresden and Hiroshima numbered in the hundreds of thousands.) Other journalists who visited Hanoi soon afterwards reported, to their credit, that civilian destruction was minimal and clearly not deliberate. Hanoi's population had already been largely evacuated months earlier; the new U.S. "smart bombs" had effectively zeroed in on military targets. The claim that Hanoi would never negotiate under pressure was disproved by events almost immediately, the talks rewhen. sumed. Herz considers it likely (though not conclusively provable) that the Christmas bombing brought North Vietnam back to the conference table. This, of course, was exactly what the U.S. government had intended.

Herz is highly critical, however, of the Nixon administration's failure to explain its case to the American public. Kissinger had described the breakdown of the negotiations in a news conference two days before the bombing began, but the administration's subsequent aloof silence left the field to its ideological opponents and is thus partly responsible for the one-sidedness of the press treatment. It does not excuse the prestige media: Herz shows that, with few exceptions, they made little effort to present a balanced picture and in fact tailored their news reportage to their editorial position. The administration seems to have been resigned to constant vilification at this stage of the war, and hoped to be vindicated by the outcome. Nevertheless Herz makes a valid point—really a moral point—that a government owes its people an effort to explain an unpopular action, and to keep on presenting its reasons and arguments even in the face of seemingly endless and hysterical criticism. Otherwise the public discourse of a democracy is inevitably dragged down to the level of the most demogogic.

Herz and Rider deserve enormous credit for a fair-minded book that documents its conclusions and is honest in its judgments. It is an essential addition to the growing body of research on the Vietnam war. The nation's hope of having an undistorted historical memory will depend on such contri-

THE NATURE OF DEATH IN A COAL MINE

HON. JOSEPH M. GAYDOS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. GAYDOS. Mr. Speaker, death in an underground coal mine has the lightning bolt arbitrariness of violent death anywhere, but it strikes more often and goes by other names-black damp, roof fall, face fall, rib roll.

Black damp is a term from the early days of mining that describes air so foul that it has no oxygen, and those who die of black damp suffocate.

Three miners died together of black damp this June, and in the matter-of-fact phrases of the Mine Safety and Health Administration's fatality reports, here is what happened:

The continuous miner penetrated an abandoned section * * * mined in 1966; an in-rush of pressurized black damp filled the entire section and the three victims were THE CONGRESSIONAL HISPANIC

They were fatalities 47, 48, and 49 for 1981. There was no warning: there was only black damp and death.

Fatalities 23 through 37—"A coal mine gas explosion occurred * * * resulting in the death of 15 miners

Death finds miners in groups and alone and makes no distinction between the 20-year journeyman and the 20-day apprentice.

Fatality No. 52-"* * * cutter bits engaged with mine machine and walked across the face catching the victim in rotating auger."

Fatality No. 38-"* * * scoop traveled through a check curtain and struck partially removed brattice. crushing victim against frame.'

Fatality No. 10-"While * * * transporting eight employees to the working section * * * the scoop hung up between a crossbar and the mine floor * * * while trying to free it, the victim's head was crushed between the crossbar and the scoop.'

Fatality No. 15-"The dust collector became stopped up * * * victim went between the face and the bolting machine * * * draw rock fell between the bolts, crushing his head against the canopy boom."

Fatality No. 16-"The victim was crushed by a section of roof-625 square feet-that fell due to inadequate roof support."

Fatality No. 17-"The victim was removing a prior rib roll from the continuous miner when additional rock and coal rolled from the rib, pinning his head and upper body against the machine.'

The toll is grim.

Nevertheless, we have evidence it would have been grimmer still without the Mine Safety and Health Administration and Safety regulation.

The General Accounting Office, in a recent study of coal, concluded MSHA "dramatically" reduced coal mining deaths.

In other words, MSHA is one agency that is doing what Congress wanted it to do.

Mr. Speaker, my remarks on mining have been made as chairman of the Subcommittee on Health and Safety to highlight how mining is important and what the Mine Safety and Health Administration has done to make safer one of the most dangerous occupations in the country.

My next, and last, remarks in this series will discuss the related nature of all forms of mining and point out the clear need for centralized and coherent safety regulation.

CAUCUS FELLOWSHIP NOUNCED

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES Tuesday, August 4, 1981

. Mr. GARCIA, Mr. Speaker, the Congressional Hispanic Caucus has realized one of its many goals. Beginning in September, the Congressional Hispanic Caucus will offer four graduate fellowship awards to four students currently enrolled in graduate programs in the public policy area or policy related fields. We would like to take this opportunity to thank the R. J. Reynolds Industries, Inc., for helping to make this dream a reality.

The Congressional Hispanic Caucus fellowship program is designed for Hispanic graduate students or stu-dents for whom that heritage has been an integral part of their academic studies. This program will enable students to gain insight into the legislative process at the national level and advance the nonpartisan preparation of Hispanics for involvement in the political process at State and local levels.

The four students chosen in early July to begin their study in Washington on September 1 are: Michelle Jimenez of Minnesota, Nitza Escalera of New York, Jose Garzon of California. and Amalio Madueno also of California. We wish these students much success during their stay in Washington, D.C. We congratulate the R. J. Reynolds Industries, Inc. on its active participation on behalf of the Hispanic community and hope that it will continue this level of community activity in years to come.

THE OLYMPIC COIN ACT OF 1981

HON. KEN KRAMER

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. KRAMER. Mr. Speaker, in light of the opportunity of the United States to host the 1981 Olympic summer games in Los Angeles, as well as a need to devise a realistic, permanent means to help support both the games and the American athletes involved in them, I would like to urge my colleagues to support the Olympic Coin Act, H.R. 3958.

This bill will provide for the minting of commemorative coins for the 1984 Olympic games without requiring the financial support of either the American taxpayer or the U.S. Government. It is only fitting that we recognize the 1984 games and its participants with a coin that will be in line with our historic tradition and demonstrate our

FUTURE OF HEALTH CARE

HON. DENNIS M. HERTEL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

 Mr. HERTEL. Mr. Speaker, an editorial in last Tuesday's Washington Star discusses the future of health care as a result of the budget cuts.

I would like to share this editorial with my colleagues:

The article follows:

[From the Washington Star, July 21, 1981] BUDGETS AND THE LATE BABY DOWNING

(Larry S. Gage)

Sometimes it takes a tragic, emotional incident like the death of a premature baby to open our eyes to the damage our budget-cutting mania may do to the national health.

Two pounds, six ounces, "baby boy Downing" died of respiratory failure in a rural Florida hospital earlier this month. He had been denied admission, because of recent budget cuts, to a public hospital neonatal intensive care unit just 40 miles away. In the scant few hours he lived, he taught us several valuable lessons about the remarkable past and uncertain future of our nation's

health-care system.

Perhaps "baby boy Downing" would not have been saved in any event by his transfer to the neonatal unit, but he'd have had a chance. Prior to 1950, his chances would have been zero in any hospital. In even the best-equipped facility in 1965 his chances of survival would have been closer to 7 in 100 than the current estimate of 7 in ten. Recent technological advances in emergency transportation and patient care for these infants, as in many other areas of medicine, have been nothing short of astonishing.

AVAILABLE TO NEARLY ALL

Because this technology has been costly, it is perhaps equally astonishing that we have in many areas made it available to all citizens, regardless of their ability to pay. Despite some noticeable gaps, and notwithstanding our consistent failure to enact universal national health insurance, our patchwork crazy-quilt of federal, state, local, and private support has enabled us—at least until now—to provide this care in many parts of the country to almost everybody who needs it.

The federal government, through Medicaid, Medicare, and other health-care programs, is a major partner in this systembut by no means the only one. Many services are directly funded by state and local governments, through publicly owned hospitals, clinics, and other institutions. These subsidized public services are often far more extensive than people realize-ranging from state-wide emergency transportation systems, to shock-trauma centers, burn units, well-baby clinics, poison centers, renal dialysis, and neonatal intensive care. The neonatal unit in this case, for example, was in a county-owned institution: Tampa General Hospital.

Highly specialized services like neonatal units are expensive. Babies often must stay for a long time, at prohibitive cost. In a public institution, government must ultimately agree to pick up the tab.

In a state like Florida, where Medicaid eligibility is extremely restrictive, a public hospital must find other sources of income if such care is to be provided for those who cannot afford to pay. For the most part such hospitals must rely on direct state or local operating subsidies, which often comprise a major portion of a hospital's budget.

When state or local governments cut back on their contribution, however, a public hospital may have no choice but to slash available services. And despite the special tragedy associated with the death of a child, it is only logical that costly, high-technology services which benefit only a few will be early budget-cutting targets.

Baby boy Downing was refused admission to Tampa General for precisely this reason. The state of Florida has cut direct subsidies for neonatal care nearly in half. The Tampa General governing board responded by insisting that the number of available beds be reduced from 33 to 18.

HOLES IN THE NET

At other public hospitals faced with other budget cuts, the services reduced might be different—but the net result will be the same: people denied necessary medical attention, perhaps even in life threatening situations. In fact, cities and counties are going through similar fiscal crises all over the country, even before the current wave of federal budget cuts goes into effect.

This story is being heard in public hospitals—our system's institutional "safety nets"—all over the country. Denver, Los Angeles, St. Louis, Boston, Chicago, Atlanta, and New Orleans, are among those already struggling with funding shortfalls.

There is clear cause for alarm as Congress works to complete the budget reconciliation process. While neither house accepted the president's proposed 5 per cent cap on federal Medicaid increases, for example, the Senate adopted Medicaid cuts of considerably greater magnitude than the House, primarily by reducing the minimum federal share from 50 per cent to 40 per cent, and indexing federal Medicaid increases in later years to the GNP deflator.

ESCALATING COSTS

Reducing the minimum federal match will have a cruel impact on a small handful of states—California, Michigan, Illinois, and New Jersey will lose over half a billion dollars among them in 1982 alone. Tying the rate of later increases to the GNP deflator will also result in severe disruptions for "safety net" institutions. For without major structural changes in health-care systems as a whole, overall health costs will continue to increase at a rate 3 to 5 per cent faster than general inflation—due in no small measure to new developments in areas such as neonatal care.

Fortunately, the House adopted a more moderate and equitable set of health-care budget cuts, especially for later years, and it is thus up to the Reconciliation Act conferees meeting this week to learn the final lesson from "baby boy Downing": That unless they act with utmost caution in fashioning a final list of health-care budget cuts from the House and Senate proposals, there will be many more like him to come.

dians were able to collect approxi-mately \$200 million in Canadian sales alone. Because this coin program has been designed for both international and national markets, it will provide the greatest possible appeal to both coin collectors and to individuals interested in supporting the Olympic games. These coins, issued in four denominations that will include \$1 copper-nickel coins, \$10 silver coins, and \$50 and \$100 gold coins, will provide the coin collector with a wider variety of what will truly become a collector's item. In addition, several series with different designs will be minted. Again, all of these advantages will occur without any expense to taxpayers or to the Government.

patriotic support. The revenue that

will result from the sale of these coins

will provide important and much

needed funding for three important

groups associated with these games:

the Los Angeles Olympic Organizing

Committee, the U.S. Olympic Commit-

tee, and amateur athletes from the

United States who will be participat-

ing. Since the 1968 games in Mexico

City, every country holding an Olym-

pic which has minted a commemora-

tive coin has raised large amounts of

money for their teams. For example,

in the 1976 Montreal games, the Cana-

Both the U.S. Olympic Committee and the U.S. Training Center are located in Colorado, so I am especially aware of their efforts to promote excellence in amateur athletics while contending with significant financial problems. With the boycott of the 1980 Moscow games, the U.S. Olympic Committee was deprived of badly needed public contributions because many believed that they no longer needed them. However, the Olympic Committee needs to maintain a \$71.2 million budget over the next 4 years to continue their present programs. Unlike many other countries, our Olympic Committee allows not only the world-class athletes, but all classes of amateur athletes to compete in our programs. To continue and expand these programs, as well as carry out the responsibility that Congress gave them in 1978 with the Amateur Sports Act, the Olympic Committee must develop a funding approach that will achieve financial self-sufficiency. This bill would not only do this, but would also promote the Olympic games and recognize the endeavors of those who are involved in the success of these

Because of the demonstrated success of this type of program by those countries who have issued commemorative coins, and because of its appeal to such a large segment of the coin market, I have cosponsored H.R. 3958 and wish to urge all my colleagues to lend their full support to this worthwhile legislation.

TRIBUTE TO U.S. DELEGATION TO THE INTERNATIONAL WHALING COMMISSION

HON. JAMES L. OBERSTAR

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. OBERSTAR. Mr. Speaker, the U.S. delegation to the International Whaling Commission deserve the thanks and commendations of the Members of the House and the entire wildlife conservation community for their participation at the annual IWC meeting in Brighton last week.

The U.S. delegation led successful efforts to impose a virtual prohibition on the killing of sperm whales. In addition, the IWC agreed to ban the use of nonexplosive harpons starting in

1982.

Tom Garrett, acting U.S. Whaling Commissioner, led the U.S. delegation. As a member of the House Merchant Marine and Fisheries Committee, I have had the opportunity to work with Tom during the past several years. He is a principled, dedicated conservationist, whom I greatly respect and I want to add a personal note of thanks for his efforts.

Mr. Speaker, I am inserting an editorial from the Washington Post of July 28, 1981, in the Record, along with an account of the IWC negotiations, as reported in the August 3 issue of Time magazine It offers a well-deserved trib-

ute to the IWC.

[From the Washington Post, July 28, 1981] PROGRESS ON THE WHALING FRONT

The good news is that the International Whaling Commission last weekend approved what amounts to a ban on the killing of sperm whales. The bad news is that it once again defeated a proposal for an indefinite moratorium on all commercial whaling. To its credit, the Reagan administration continued the U.S. support for the moratorium that now extends through four presidencies. Interior Secretary Watt was responsible for appointing and backing a dedicated conservationist and whale expert to head the U.S. delegation.

Since the IWC began setting quotas for commercial whaling, the allowed worldwide catch has fallen from near 50,000 to below 15,000. Whaling from immense factory ships has been banned. A sanctuary has been established in the Indian Ocean where whales may not be killed for 10 years. These are significant achievements requiring, as they do, the cooperation of many nations. But whaling is still allowed for several species that are on the international endangered species list. Of what were once the many species of the world's largest-and, don't forget it, largest-brained—creature, only the small minke whale has not been hunted by man to the point of scarcity or near extinc-

Now that there are inexpensive substitutes for all whale products, including the use of whale meat for human consumption, there is little excuse left for continued commercial killing. Yet endangered industries die hard. Despite the fact that sperm whales cannot be eaten because of their dangerously high levels of mercury, and despite their precariously small numbers, Japan fought hard against the complete ban on killing sperm whales that was recommended by the IWC's scientific advisers. The partial ban that was finally adopted included an exemption for the western Pacific and an offsetting increase in Japan's quota of minke whales. Yet the Japanese delegation made no secret of its dissatisfaction with the outcome.

Little by little the pressure of international opinion is eroding the now unnecessary whale trade. Only the Japanese market keeps it alive. Ultimately a ban seems inevitable. The danger is that it will come too late. Among all animal species, the whale's survival seems to be peculiarly chancy. Once a decline in the numbers of a particular type of whale can be documented, the process often seems to be irreversible. Many whale species—including the largest, the Great Blue—have not yet been recovered after decades of protection. The reasons for this unusual behavior are not known. It may have to do with the small number of whale offspring, their long infancy, and the whales' wide range.

whales' wide range.
Until the answers are known, a moratorium, not the let's-wait-and-see-what-happens justification for annual quotas, is the only responsible policy. Perhaps next year the IWC will take the last needed step.

[From Time magazine, Aug. 3, 1981] BATTLING FOR THE LEVIATHANS

To environmentalists, Interior Secretary James Watt sometimes seems to be an avenging Ahab, citing the Bible and warring against nature. But that image may be unfair. Last week, with the Secretary's blessing, the U.S. came to the help of Watt's surprising friends, the whales.

The occasion was the annual meeting of International Whaling Commission (IWC) in the English seaside resort of Brighton. On the street, save-the-whales demonstrators waved placards, chanted slogans and even floated a 110-ft, inflatable whale named Big Flo. Inside the Victorianstyle Brighton Metropole Hotel, the delegates from 31 member nations pondered the fate of the leviathans. The commission, formed after World War II to regulate whaling, has been setting annual quotas ever since. For this season the permissible commercial take had dwindled to 13.851 whales, 80% of them small minkes. That was less than a third of the total eight years ago. Hunting of such endangered species as the blue, bowhead, right and humpback is now forbidden altogether, except by or on behalf of Eskimos and other native peoples, while sperms may be taken only by coastal-based

ships.
Still, marine biologists worry about the whale's future. Chief U.S. Delegate Tom Garrett, a childhood friend of Watt's and longtime defender of the whales, who was appointed at his urging, said that far too little is known about the populations of various species or their reproductive habits to permit the slaughter to go on, even at reduced levels. He backed a British proposal for a moratorium on all commercial whaling.

The Japanese, who along with the Soviets operate the only large ocean going whaling fleets, insisted that enough is known to set safe limits that will ensure the animals' survival. Whaling, they added, was important to their economy and food supply; they felt no legal or moral obligation to accept a ban.

Conservationist groups replied that the Japanese estimates were grossly overstated.

But on the issue of the moratorium, their words, including President Reagan's plea to save "these magnificent creatures," were to no avail. It failed to get a required three-fourths majority. So did another proposal to stop all whaling in the North Atlantic.

But at week's end the antiwhaling forces won two significant victories. Over Japan's objections, the conference set a "zero quota" on all sperm whaling in the Southern Hemisphere and the North Atlantic. As a gesture to the Japanese, a decision on the North Pacific was deferred until the spring. Said Garrett: "This might be the final curtain for sperm whaling."

The delegates also agreed to outlaw "cold" (or nonexplosive) harpoons on minke whales, starting with the 1982-83 season. Conservationists claim these weapons prolong the animal's final agony, but the Japanese insist that faster-killing grenade-tipped harpoons damage too much of the flesh and are dangerous to the hunters. The decision gives them time to develop a less damaging, safer explosive harpoon.

The antiwhalers were not so successful on the issue of next year's overall quotas. The total number of whales that can be legally taken was reduced by only about 500. Still, if this trend continues, whaling may eventually become so uneconomical that even the persistent Japanese will be forced to drop

it.

LEGAL SERVICES FOR MEMBERS OF THE ARMED FORCES

HON. PATRICIA SCHROEDER

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES
Tuesday, August 4, 1981

• Mrs. SCHROEDER. Mr. Speaker, in keeping with a good thing, I wish to introduce a revised version of legislation I introduced last session providing legal services for members of our Armed Forces. Please allow me to also insert into the Record a section-by-section analysis of the bill:

SECTION-BY-SECTION ANALYSIS

Subparagraph (a) is designed to insure the continuation and permanency of the provision of legal assistance to military personnel and their dependents. The intent of this section is not to alter the existing discretion of the Secretary of each Department to direct how legal assistance will be provided within that Department, but rather to assure that each Secretary require the continued provision of legal assistance to active duty personnel. Each Secretary also has full authority to continue to provide legal assistance to retired personnel and dependents of active duty and retired personnel subject only to the availability of resources within each Department.

Subparagraph (b) clearly places upon the Judge Advocates General the responsibility for the creation and operation of the legal assistance programs. The reference to 10 USC 801 is necessary so as to include the Coast Guard. The Coast Guard has no "Judge Advocate General" and the only place in the law where the term "Judge Advocate General" is made applicable to the Coast Guard is in the definitional section of the Uniform Code of Military Justice wherein it is stated that the term "Judge Advocate General" shall include the General Advocate General" shall include the General "shall include the General" shall include the General "shall include the General" shall include the General "shall include the General "shall include the General" shall include the General "shall include the General "shall

al Counsel of the Department in which the Coast Guard is operating. The language "by the Secretary concerned" refers, in this case, to the Secretary of Transportation.

Subparagraph (c) is designed specifically to indicate that this legislation is not authority for the expansion of the legal assistance program to include the representation in court of those presently able to pay legal fees-i.e. to continue the present expanded legal assistance program to the military indigent, but not provide any requirement or authority for expansion to others than the military indigent. If the client can afford legal fees without undue hardship or if the case is one in which attorney can recover a reasonable fee out of the judgment, then the legal assistance program, insofar as presentation in court is concerned, may not be expanded under the authority of this legislation.

QUESTIONS AND ANSWERS ABOUT MILITARY LEGAL ASSISTANCE LEGISLATION

Question. Who will be entitled to legal

services under this bill?

Answer. Except as limited by subparagraph (c), it is the intent of the bill to provide legal services to active duty personnel and others as prescribed in the regulations of each military department authorizing legal assistance. As with other military benefits, legal assistance has been made available to all grades and ranks, but the overwhelming share of legal services are provided to low and middle income service members who, like their civilian counterparts, are least able to afford the services of an attorney. It is expected that full legal assistance will continue to be a high priority for retired personnel and dependents of active duty and retired personnel.

Question. Who may provide legal services to service personnel and their dependents?

Answers. Active duty military lawyers, civil service attorneys employed by the military departments, civilian attorneys retained under contract and reserve military lawyers are authorized to provide legal assistance under the regulations of the military departments authorizing legal assist-ance. The bill presumes that the same regulations will apply after its enactment.

Question. Will the delivery of legal services to Armed Forces personnel at the level contemplated by this bill be detrimental to

members of the local bar?

Answer. During the seven years that the American Bar Association has worked with representatives of the military services in observing legal assistance programs in operation and in visiting with numerous civilian bar leaders and practitioners, the Committee has found no evidence of any abuse of the civil process or injury to the civilian bar at any location where these programs have been established. On the contrary, the ABA has found an expanded awareness of legal rights and needs in each community. Where the local bar association has encouraged and participated in these programs, there has developed a professional rapport between the military and civilian bar members, and between the military services and the local judiciary and law enforcement authorities in a manner which has ultimately resulted in the improvement of legal assistance. Where the state and local bar associations have worked with the military lawyer community, the legal assistance program has produced a higher quality representation, has reduced the areas of confrontation between military and local authorities, and has increased the level and quality of civilian bar legal services.

Question. What legal services are included "personal affairs" in Section 2 of this bill?

Answer. "Personal affairs" is intended to mean only those types of cases authorized by the regulations governing the provision of legal assistance issued by the military departments. Those regulations include assistance in and/or preparation of wills, powers of attorney, tax matters, domestic relations matters, consumer protection matters, landlord-tenant matters, and others. The regulations do not allow (some in fact prohibit), nor does the bill contemplate, providing legal services for the purpose of assisting a service member in any commercial endeavfor the purpose of instituting a class action (which might be a fairly attractive fee-generating cases for a civilian attorney) or for the purpose of suing the Federal government (legal assistance officers are prohibited by 18 U.S.C. 205 and implementing regulations from instituting such suits against the United States).

Question. Will this bill require the additional expenditure of public funds (includ-

ing personnel)?
Answer. No. The bill does not (and is not intended to) mandate a specific level of legal assistance programs of any kind: rather, the bill merely recognizes and protects by statute a long-standing practice of the services, leaving the implementation to the best judgment of the military departments. The only cost factor is an indeterminate but perhaps identifiable continuing cost of maintaining the present program with no new costs. As a practical matter, the bill closes off the possibility of the total discontinuance of the existing practice of providing legal assistance to service members.

EL SALVADOR

HON. MARY ROSE OAKAR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES Tuesday, August 4, 1981

 Ms. OAKAR. Mr. Speaker, as we approach the recess of this current session of Congress, I would like to remind this distinguished House of Representatives of some unfinished business—the bodies of four coura-geous women, brutally murdered last December, and thrown in a ditch to rot-an unsolved crime, and criminals not yet brought to justice.

Meanwhile, another crime is in progress: Our continued support of a regime that implicitly tolerates and is manipulated by militaristic Fascists who use American aid to dominate and decimate the people of El Salvador.

What has been accomplished in the intervening months since our military advisors and \$35.5 million in military assistance were sent to El Salvador?

Not a reduction in violence, but an escalation of it: 2 weeks ago, 28 bodies, most of them mutilated, found under a bridge; this past weekend, 44 bodies dumped into a pool-mostly civilians and a handful of guerrillas. These massacres generally take place during curfew hours when only military and security personnel are free to move about. In the past 18 months at least

22,000 people have been slaughteredin a country of 4.5 million; at least 150,000 Salvadorans have fled across the Honduran border seeking safety. What has happened since we went to El Salvador? A more sadistic and sophisticated terrorism of the population. An increase in the number of victims who are children. More torture: People dumped into battery acid, sawed in half, sexually mutilated, disemboweled. Helicopters used as roving machinegun nests to ravage whole villages. Military hit lists labeling respected teachers, priests, religious, lawyers, and doctors as psychopaths and traitors. Mail is arbitrarily opened and inspected; people are detained and disappear.

What has happened since we announced the eclipse of the U.S. human rights policy? One Salvadoran puts it

When your State Department makes friends with Chile and Argentina, our army gets the idea that if they act like Chileans and Argentines, they too will be rewarded.

The corrupt military power structure has grown so powerful that it reportedly now controls the nationalized banks of El Salvador, all exportimport activities, and is implicated in colluding with former landowners to threaten, evict, and even kill peasants who are attempting to register their plots of land.

Thirty years ago, we began training Salvadoran military officers. Today, there are over 2,000 American-trained Salvadoran officers in control of the security forces of El Salvador. What has been the result?

In testimony before our own House Appropriations Committee, a former Salvadoran army captain admitted that the security forces who prowl the nights as death squads, performing acts of terrorism, murder and torture are actually carrying out orders given by high-ranking military officers.

The four women missionaries killed last December were singled out. The Salvadorans know who killed them. They know the orders came from higher up. Why have no charges been filed in a court of law? The answer should be obvious. Twenty-two thousand Salvadorans have also met the same fate.

We dishonor ourselves as Americans by allowing our citizens and our resources to be used in support of such continuous horror. The Reagan policy has had no impact on the reign of terror in El Salvador. As one witness, a former chief advisor to the land reform program, told a House subcommittee:

What your policy tells the army is that it can kill at will. Your administration has in effect said that it agrees that the army has the right to destroy all those organizations and people who want the army to share

I propose a five-point solution to this disaster of El Salvador that threatens to decimate the Salvadoran population and render it even more vulnerable to both communism and a right-wing coup. We are at a critical point. We have a unique opportunity to win, in the true sense of the word. We should:

First, demand that the Salvadoran courts bring charges on the basis of the evidence in the case of the murdered American women. Demand that the court invite lawyers from a neutral country, Mexico, to serve as counsel for the families and kin of the murdered women.

Second, call for a cessation of all military assistance to El Salvador and withdraw our advisers. Limit all U.S. aid to that which fulfills basic human needs, where the recipients can be credibly certified.

Third, insist that the Salvadoran Government establish a neutral electoral commission to register voters and

supervise elections.

Fourth, commission a 2,000-man international peace-keeping force to insure that Salvadoran Armed Forces remain in their barracks and that guerrillas remain in assigned areas.

Fifth, actively promote multilateral negotiations with neutral intervenors, and insist that the Government of El Salvador cooperate in return for our continued economic assistance.

LIBRARIES IN THE SOVIET UNION

HON. JACK FIELDS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. FIELDS. Mr. Speaker, Jane Fonda once told an audience, "If you really understood what communism is, you would hope, you would pray that one day we would all be Communists."

one day we would all be Communists."

How did comrade Fonda arrive at such a state of philosophical illumination? Perhaps she did her vast background research on comparative sociopolitical systems at the Moscow State

Library.

Mr. Speaker, I am placing in the RECORD a brief article by Matthew Conroy which gives us a better understanding of why the worker's paradise; and the reader's paradise; and why the use of Soviet libraries could turn Miss Fonda into comrade Fonda.

Here again, Mr. Speaker, the illusions and promises of Communist propaganda melt away before the

bright light of reality.

SOVIET UNION'S LIBRARIES MIRROR A LOW-QUALITY SOCIETY

(By Matthew Conroy)

My neighbor recently presented me with Carl Sagan's book, "Cosmos." Perhaps it was meant as a hint: Normally, I am immersed in current political, economic and cultural affairs, and it does one good to be

reminded of the awesome vastness and splendor of the universe.

However, Sagan's book is more than astronomy; it has philosophical content as well. Chapters are preceded with quotations that remind us that the universe is more than galaxies, stars, suns and planets, that there is the glory of man's thought. Sagan quotes from Pascal's "Pensees":

"It is not from space that I must seek my dignity, but from the government of my thought. I shall have no more if I possess worlds. By space the universe encompasses and swallows me up like an atom, by thought I comprehend the world."

To browse through "Cosmos," I had to temporarily put aside another fascinating book, a work dealing with the tribulations of a top Jewish scientist in Russia who inevitably realizes that escape from the totalitarian hell takes precedence over everything. The book is by Mark Azbel and is called "Refusenik," subtitled, "Trapped in the Soviet Union."

What struck me about the book almost immediately was precisely what Sagan tries to impart in his book; the absolute need of a cultivated mind to be exposed to and allowed to explore all aspects of knowledge. It is implicit in Azbel's book, while Sagan quotes T. H. Huxley to get his point across:

"The known is finite, the unknown infinite; intellectually we stand on an islet in the midst of an illimitable ocean of inexplicability. Our business in every generation is to reclaim a little more land."

LIBRARIES AND FREEDOM

To reclaim that land, one must have access to books. This is the legacy upon which every succeeding generation builds. To that end, one of the marks of a civilized country is its libraries and the freedom of the people to use them freely.

Consider, then, these contrasts.

In "Cosmos," Sagan writes of the great library of Alexandria, the city founded by Alexander the Great that flourished for some 600 years beginning around 300 B.C. The library, deliberately destroyed at some point in that past, must have been a true wonder of the times. The civilization that fostered it went to enormous lengths to expand it. The organizers," writes Sagan "combed all the cultures and languages of the world. They sent agents abroad to buy up libraries. Commercial ships docking in Alexandria were searched by the police-not for contraband but for books. The scrolls were borrowed, copied and then returned to their owners.

The estimated half million books the library contained were open to all.

A CLOSED SYSTEM

In the Soviet Union and throughout the entire Russian empire, there are libraries, but the books, journals and other reading material they contain are definitely not available to all. Ever since the Russian revolution, the communist rulers have preemptorily decided what the people under their domination have the right to read. The Bible, for example, is neither available in bookstores nor in libraries. There is a list of officially approved literature, and the works of those authors of whom the communist rulers disapprove are simply nonexistent.

Azbel, in this book, writes about his school years: "Dostoievski was nonexistent, except to be condemned. Tolstoi was a very doubtful writer; we were given almost nothing of his to read. Homer was unknown. The great Russian writers Nabokov. Bunin, Kuprin, Bulgakov, were not even mentioned. They

simply did not exist. Even Gogol, even Chekhov, were heavily cut. . . And I had to suppress from my consciousness the fact that there were such poets as Blok, Akhmatova. Pasternak and many others."

FIRST, FOUR SIGNATURES

Even more restricted to the Soviet public are technical journals, no matter how innocuous. Azbel relates of his efforts to obtain permission to read an issue of Physical Review, a purely scientific journal published by the American Physical Society. Underneath Azbel's application to peruse the journal, the chairman of the Department of Theoretical Physics of Azbel's school had to write, "I attest that the above-mentioned volume of the Physical Review is required for the preparation of a talk at the Science Seminar, and I herewith request that student Azbel be permitted access to it." The dean of the faculty then had to co-sign "I endorse this application." The deputy director of the university then had to sign, "I also support this application." Finally, the director of the library had to write, "I hereby permit student Azbel access to this journal, to be read only on the library premises."

A time span of some 23 centuries or more separates the Great Library of Alexandria from the libraries of the Soviet Union. Is there any doubt where the evidence of greater civilized thought and behavior is to

be found?

A FRESH OUTLOOK-BY RALPH NADER

HON. EDWARD J. MARKEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. MARKEY. Mr. Speaker, Ralph Nader addressed the class of 1981 Harvard graduates on June 3. His speech was articulate and perceptive. It focused on the vital issues society has been and continues to struggle with in this decade. His comments reflected a well-grounded fear about the direction this administration is heading. The young graduates were encouraged to explore an abundance of work options and to strive to better society through citizen work. Mr. Nader urged them to use all their skills, stamina, and creativity to help resolve pressing social, economic, and energy problems.

Ralph Nader's vision of America is one that embodies the pursuits of peace, justice, liberty, and opportunity for all.

For both a keen and insightful view of modern problems and some positive answers, I recommend Ralph Nader's speech to my colleagues in Congress and to the public.

The text of his speech appears below.

REMARKS BY RALPH NADER, CLASS DAY EXER-CISES, HARVARD UNIVERSITY, JUNE 3, 1981

Proud parents, patient mothers and fathers, daughters and sons of the Class of 1981, relatives, friends, members of the society of Harvard University and rulers of the Harvard Corporation.

As you, citizens of the class of 1981, prepare to graduate into various graduate schools, occupations, national service and other activities, it may be worth some of your time to look backward as a way of looking forward. What did you derive from your four years at Harvard? What did Harvard derive from four years of you? Indeed, what is Harvard, or as educator Robert Hutchins used to pose the question at his guest lectures here: what is the justification for Harvard University? "Sui generis," whispered back an irreverent law student at one of Hutchins' lectures. Although a cute reply, typical of the Law School's ability to make its students sharp by making them narrow, it is not helpful.

Harvard is first and foremost a practice of power—the power of knowledge within an academy linked to many sinews of power near and far from the campus. Much of this knowledge is generated by imagination, but much more is shaped and applied by the power of the material world. The patterns of influence which press upon a university decide its range of inhibition, shape its internal governance and evoke the standards by which its consumers—the students—are measured and, indeed, measure themselves.

So large is this institution and so overconfident is its tradition that one can become engulfed by waves of ethnocentrism.

I recall my early weeks at Harvard Law School in 1955, when I asked a law professor why, given the abundance of courses and seminars in the catalog, there was no course on "food and the law." Nonplussed for an instant, he blurted "Food?" Recovering his composure he allowed that the reason was simply that the subject had not developed to a suitable intensity to qualify as an adequate intellectual challenge at the School. Searching for a frame of reference, I asked him what course would so qualify. He looked up at the sky and then a definite glow crossed his face as he responded: "Taxation."

I want to believe that you did not have similar experiences with the curriculum during your years here. We are told that the atmosphere has changed, that your sophistication extends to the involvement of education with the development of major life skills. Right? You perfected your citizen skills by developing a pre-eminent model of student government that changed the governance of the University from an autocracy hostile to the concept of students organizing as a community to one where initiative, community purposes and reasonable self-determination thrive under an overall institutional discipline. Correct? You sharpened your consumer skills by intelligent examination of annual tuition and other price increases-a process resulting in parent/student reviews of the University budget, its determinants and alternatives. You have viewed the world as a social laboratory for your education, linking knowledge to your behavior in a way that organized your thoughts without being too remote either from fact or principle. Or, so we would like to believe.

However, you are not without any deprivations; few of you are old enough to remember when the President of Harvard University used to matter to the country beyond Harvard Yard.

Given a background of Harvard educational pride, how do you view yourself as a citizen? "Justice," said Daniel Webster, "** is the great interest of man on Earth." "Duty," wrote Alfred North Whitehead, "arises from our potential control over the

course of events." And, he added, "Where attainable knowledge could have changed the issue, ignorance has the guilt of vice." What do these words mean for Harvard graduates?

Taken together, these observations can illuminate the pathways of citizenship at the workplace and in the community at large. How many of you want to become leaders in the achievement of greater justice on earth? If not, why not? Could it be that the nation is suffering from an excess of leadership? Or is it more likely that our times reflect a massive escape from leadership responsibilities? With so much human activity conducted within and between larger and larger private and public bureaucracies, is it any wonder that the "I only work here" syndrome has become an epidemic?

Yet, if we pause for a moment and reflect on the blessings of liberty and progress in our country since 1776, they were not brought about by people who got along by getting along. Consider civil liberties, civil workers' rights, women's * Consider the stalwart Amerirights, cans who first broke the bonds of injustice and advanced the enlightenment for so many of their fellow citizens. These leaders overcame, to some degree, raw power or brute force through the compelling advocacy of humane values under the rule of law. These values possessed stamina precisely because they reflected deep survival meanings. The pursuits of peace, justice, liberty, and opportunity transcend different cultures because they spell survival for people, progeny, culture, and environment.

Our constitution and political traditions do permit, however imperfectly, a greater scope than in most countries for pursuing these values under protected rights. In several countries today students are on the ramparts opposing despotisms in order to achieve the rights in their country that you already have in your country but utilize too infrequently. Can we diminish or lose our rights if we do not use them with some degree of constancy? The current Administration in Washington seems determined to test this question.

If you ever require an overt challenge to citizenship, you need go no further than contemporary Washington. The current Administration is largely a nihilistic, virulent, extremist brand of Republicanism that is likely to make its Nixon and Ford predecessors appear benign by comparison. Now that the assumption of power has replaced the soothing stream of last year's campaign rhetoric, the policy directions are unmistakably clear.

The Reagan Administration is working feverishly to lift the rule of law from unsafe, corrupt, fraudulent and anticompetitive behavior of Big Business. A modest sensitivity to consumer and environmental values, developed under both Democratic and Republican Administrations in the past twenty years, is in serious jeopardy.

Anti-trust law enforcement is being severely narrowed during a period of accelerating mergers, cartels and conglomerates. The present White House has declared war on the successful national legal services program for the poor, the fledgling National Consumer Cooperative Bank which encourages economic self-help, infant nutrition programs that have lowered our country's infant mortality rate, the excellent Freedom of Information law which many citizens have invoked against government secrecy and abuse. Information is the currency of democracy but to the current Adminis-

tration that is a currency to be diminished rapidly. Basic scientific research efforts, important data collection projects and programs for solar energy and energy conservation are among the future hopes of our political economy which are to be dashed.

The horizons are not bright for civil liberties, a competitive economy, open, accessible government, human rights abroad, effective help for the poor, the elderly, the handicapped and the ill. This is a government of reactionary ideologues who do not even make a pretense of compassion; their only concession to public opinion is to mask their ideological cruelty with a jovial demeanor and the usual political buzzwords.

You have read about or heard these phrases. Secretary of Transportation Drew Lewis does not say that hundreds of thousands of Americans will be killed or injured on the highways because, as he told a Congressional Committee, there will be no safety standards issued during his four year tenure. But the death or maiming of Americans are empirical consequences of his nullification of the safety laws. He ignores the spectacular and practical availability of very cost-effective crash protection engineering remedies, long ready for adoption. Instead, his explanation is that he wants to reduce tape, not "nit-pick an auto industry and be supportive of the concerns of auto companies. These companies meet regularly in his large office, but the victims of his indifference have no voice, no presence, no power to persuade him to respect the sanctity of human life under the law he swore to uphold four months ago.

The list could go on-the scuttling of nutritional programs at the Department of Agriculture as an economy move, or the big push by Secretary of Interior James Watt to give away or lease for a pittance to "rip and run" multinational corporations, with few environmental safeguards, the federal lands which earlier Republicans in our nation's history strove to secure for future generations of Americans. As coming months and budgets will reveal, this Administration is not really economy-minded nor citizenminded; it is instead an ambitious architect of the corporate state, a transferer of more power and more resources and more claims on the future from the many to the few and privileged. The Reagan Administration is a government of the Exxons, by the Dow Chemicals, and for the General Dynamics. Social Darwinism is back in the seat of government. Only the "fittest" are outfitted with heavy federal subsidies, tax preferences, inflated government contracts, monopolistic licenses and broad exemption from proper regulatory attentions.

What is your role to be in this decade of the Eighties? One approach is easy-just slide off the Ivy and into the waiting professions and positions where your time and talents are amply rewarding as long as you keep your conscience at home. These are the places that measure almost everything the dollar, where crass commercial values control the most hallowed precepts of American society, where the bosses, as the saying goes, know the price of everything and the value of nothing. These are the upwardly mobile jobs full of more "know who" than "know how," elite jobs that are associated with increasing isolation from the anguish, pains and needs of a tormented humanity around the world, jobs where dissent is taboo and obeisance to the Organization is the totem.

If that is your definition of work, you will have little trouble fitting in place. However,

at this time in your life, near the peak of your idealism and possibly as free to experiment, question, pioneer as you may ever be again, many of you may be ready to explore a different kind of work-a work where you bring your conscience and time and talent altogether to work every day to improve your society. This is the meaning of citizenship. It may come as a surprise to some people to learn that citizen work makes possible traditional employment and much economic activity. Citizen work built a nation rights-constitutional to contractual-make possible greater economic prosperity. Police states are almost never prosperous economies, no matter what their natural resource endowment may be, Monopoly capitalism never is much good for people and for equitable economic development. The history of Brazil is instructive on this

Citizen work produced the land grant colleges and the private colleges which provided multiple points of entry of millions of Americans seeking self-improvement and fulfillment. Citizen work enacted the Homestead law in the eighteen sixties which gave one hundred and sixty acres to individuals who worked them and thereby assured that much of the greatest agricultural breadbasket of the world would not quickly become a collection of giant plantations. Instead, this law encouraged a spread of millions of small, productive farmers who loved their land and who, in turn, nourished the main political economic reforms of the past cen-

More recently, citizen work has been responsible for the principal advances in American justice. Four black freshmen engineering students with their now historic sitin at that North Carolina lunch counter twenty-one years ago were engaging in constitutionally protected citizen work. At least the Supreme Court of the United States thought so. Other citizens, individually and in groups, took on the silent violence of pollution and environmental wreckage from the lead-afflicted ghetto children to the poisonous spills in the air and water. Still others stood tall at their place of work to become ethical whistleblowers against corruption, crime, fraud, and waste. They were the trustees for millions of affected consumers, taxpayers, and workers.

These domestic patriots had everything material to lose and everything noble to win. What was that courageous impetus to their intellect that guided their actions? A sense of communion with the most widely shared value of humankind—a golden rule applied to their daily experience. The quality control inspector at GM who, after numerous reports to his foreman were ignored, put his job on the line in the mid-sixties by exposing risks of carbon monoxide leakage in the company's cars was asked why he did what he did. His reply was too simple for the reporters: It was the shopfloor version of the golden rule.

The opportunities for citizen work, on and off the job, have never been more demanding in a world where tragedy, peril, and risk are found side by side with brilliant but unused scientific, engineering, and organizational solutions. These opportunities beckon you. They invite all the skills, stamina and creativity that you possess. No academic discipline is irrelevant. Problems to be resolved are like bodies of knowledge; they are a seamless web demanding the varied best that human minds can offer. Over time a pollution crisis, for example, needs to draw on almost every discipline which your Uni-

versity embraces—from the physical sciences to the social sciences to the traditional professions and, yes, most definitely, to the humanities.

How, you may ask, after some sixteen years of an institutional education largely indifferent to learning about and engaging in citizen work-an education whose primary thrust flows from memorization to regurgitation to vegetation—can one acquire the desire? There is no single entrance. Try viewing these United States as an exporter of humane democratic examples. Try seeing citizen work, not as a necessary chore, but as a delight, a joy, a counterpoint to alienation, powerlessness and boredom, a way to stretch your analytic and normative skills. Try etching out a future America where most citizens would feel a personal obligation to spend at least 10 percent of their time working on the problem or challenge of their choice in order to improve their community or world, where most citizens would reject the "what will be, will be" attitude of never fighting City Hall, nor Goli-Incorporated, where most citizens would reject the facile cynicism of hating "the government" but would rather make it their government and their way of accomplishing community objectives.

These are self-actuating determinations: no laws, budgets, elixirs are required. But, once actuated, solutions begin to be applied to what hitherto were seen as intractable problems. A functioning democracy permits people to always build power behind their quest for fair treatment and opportunity. It permits people to use directly the modern communications systems now controlled by a few firms. It permits people to shape the investment direction of more than a trillion dollars of pension funds and bank deposits which they already own. People gaining control of the wealth that they already own for themselves or as trustees for their descendants-from the public air waves to the public lands, from shares in companies to the pension funds-forges the link between responsible owners and a responsive political economy. Never have the separations between ownership and control, as illuminated in the early Thirties by Berle and Means, been so diverse, so pervasive throughout the economy and so consequential for the future of economic and political democracy. It is well to keep in mind that, unlike past

It is well to keep in mind that, unlike past generations, our generation worldwide has created two risks—nuclear armaments and penetrating masses of pollution—which could destroy life on Earth. These two mounting risks place a particularly strenuous set of moral imperatives on our public citizen roles.

So ask yourself: what kind of work would you really like to do in life after Harvard, if money were no object? Then start cranking in the dollars and see at what dollar level your ideal choice of work becomes overwhelmed by your instrumental choice of work. From there, proceed to adjust your available time so that you do not have either to suffer your satisfaction or satisfy your suffering. There are many hours in the day for diversifying your interests. Whether you choose to develop consumer-side businesses like cable TV coops or neighborhoodbased legal, health or repair services, or whether you choose to enlarge or build problem-solving civic groups—to suggest just two directions-do keep in mind that the highest practice of citizenship is to defend the political rights of those who may disagree with you as well as those who concur with your pursuits. That is truly the golden rule of a democracy.

Congratulations to you and your parents, to your teachers who persevered, and to the country that is entitled to receive your wisest contributions.

Thank you for your invitation. May your 50th Reunion in the year 2031 find you all back here in good health and better spirits.

UNITED STATES CHANGING HUMAN RIGHTS POLICIES

HON. DENNIS M. HERTEL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. HERTEL. Mr. Speaker, a recent editorial in the Detroit Free Press discusses the United States changing human rights policies.

I would like to share this editorial with my colleagues:

[From the Detroit Free Press, July 25, 1981]

HUMAN RIGHTS: THE U.S. AGAIN VOTES ON THE SIDE OF REPRESSION AND TORTURE

For the first time in four years, U.S. representatives to the World Bank have voted in favor of development loans for Argentina, one of the nations targeted by the Carter administration as a gross violator of human rights. The vote was largely symbolic, since the \$300 million in loans for energy development would have gone through with or without American backing, but it marks a significant change in U.S. policy.

The four-year practice of opposing loans to nations with abysmal records on human rights was itself more symbolic than effective in preventing international development aid from reaching them. During the Carter years, U.S. representatives to the World Bank and the Inter-American Development Bank voted no or abstained on 122 loans to 16 countries, most of which were approved by the multinational lending agencies anyway.

The U.S. position was, however, a rebuke and an embarrassment to nations branded as human rights violators. It was a public reminder that states like Argentina, Chile, Uruguay and Paraguay were places where people disappeared or were jailed by the hundreds; where torture and kidnapping and killing were chillingly routine police activities; where journalists, labor leaders, intellectuals and political opponents of the regime risked their lives to dissent.

Now the Reagan administration has reversed the Carter policy as it applies to those four Latin American nations. U.S. delegates to the two development banks will support some \$480 million in loans to the four countries this month. The administration has also asked Congress to lift an embargo on military aid, sales and training to Argentina. Secretary of State Alexander M. Haig, Jr. says the change is justified because the four nations have improved dramatically in the area of human rights.

It is true, if you look at the raw numbers compiled by organizations such as Amnesty International, that fewer people are being snatched off the street in Argentina and Chile or jailed in Uruguay and Paraguay. But political and labor activity is still illegal in Argentina, and perhaps 10,000 people spirited away by the quasi-official death squads are still unaccounted for.

There has been a wave of new detentions in Chile, a nation that steadfastly refuses to extradite the accused killers of Orlando Letelier, a critic of the regime who was assassinated five years ago in Washington. Uruguay has more political prisoners per capita than any other country in the world. And Paraguay has emptied some of its cells but remains one of the hemisphere's more enduring and implacable dictatorships.

Conditions may have improved somewhat in the four nations, but they are still the most repressive in the hemisphere, with the possible exception of Cuba. If the U.S. embraces this quartet of dictatorships too warmly now, the message will be that a few temporary adjustments—a brief vacation for the torturer and a little cleaning out of the jalls—are all that is necessary to regain respectability and access to aid. The resumption of military aid to Argentina, in particular, implies that there is no need for further liberalization, and suggests the U.S. is once

more a firm ally of military dictators. The Carter human rights policy was mocked as ineffective and as a policy that punished our allies more than our enemies. But the whole point was to use American influence where we actually had some. Mr. Carter used the promise of aid and the threat of censure to urge some client nations toward political decency and minimal reform, and when it worked—as it sometimes did—it was a good exchange. Ask the hundreds of people freed from the jalls of Santiago, Montevideo or Buenos Aires—not to mention those who still languish as political prisoners—if it is not a policy worth keeping.

THE NATIONAL WATER UTILITIES BANK BILL

HON. WES WATKINS

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. WATKINS. Mr. Speaker, last Friday I introduced H.R. 4366, a bill to create a joint private/Governmentowned Water Utilities Bank. This bank would provide loans and loan guarantees for the construction and improvement of water utility systems. To create an efficient secondary market for private loans to water utilities, the bank could buy and package private loans to water utilities for resale to investors.

The Water Utilities Bank is modeled after the successful Farm Credit Banks and the Rural Telephone Bank which have greatly benefited my district. Just as the Farm Credit Banks have become entirely private entities, Government capital in the Water Utilities Bank would be gradually replaced by private capital until no Government interest remained.

This bill is very similar to H.R. 7781, which I introduced last year. In the intervening year, the case for the bank has become even stronger. This past year brought unprecedented droughts in many parts of the Nation. Water tables and reservoirs have been dropping and wells have been running dry at alarming rates.

The capital needs of America's water systems are enormous. EPA projects that for normal replacement, maintenance and system expansion, water system capital expenditures during the period 1980-83 will exceed \$10.4 billion-more than \$2.6 billion per year. During the same 1980-83 period, compliance with existing EPA drinking water regulations will require more than \$2.3 billion in additional capital expenditure, according to EPA's own figures. The cost of compliance with these Federal regulations bears most heavily on small, rural systems. New regulations that EPA plans to propose to control synthetic organic contaminants in drinking water will cost billions more. Moreover, much of the expense of compliance with the Dam Safety Act will fall on water suppliers. The Federal task force on urban water supply estimates that over the next 20 years, urban systems alone-that is, those serving over 50,000 people-will need to finance capital investments of between \$80 billion and \$113 billion.

Usually, no help in meeting these demands is available from State or Federal governments. In the past, the Farmers Home Administration has provided needed capital to publicly owned or nonprofit systems in rural areas like my district. But this year, it appears this program will be reduced because of fiscal concerns.

For the most part then, water utilities must compete with other industries for needed capital in highly competitive capital markets where interest rates are higher than ever before in U.S. history. Many of the competitors with water utilities for capital enjoy substantial direct or indirect Federal subsidies unavailable to water utilities. For instance, rural telephone utilities have long had access to low interest loans through the Rural Telephone Bank. Small electric utilities have received subsidies from the Rural Electrification Administration. The sewage treatment industry has received about \$4 billion per year in direct grants.

This bill would not attempt to remedy this critical capital shortage by creating another cumbersome and expensive grant program. Instead, my bill would set up a Water Utilities Bank, modeled after the Farm Credit Banks, the Rural Telephone Bank and the National Consumer Cooperative Bank, to supply capital to water utilities at reasonable rates while minimizing cost and risk to the Government.

The Water Utilities Bank would initially be capitalized jointly by Government and private sources. Stock would be issued to the Government, to utilities that are bank customers, and to water utilities eligible to become bank customers. Government financial participation would be eliminated beginning in 1991 or earlier if practical. As the Government stock was gradually redeemed, the bank would, like the

banks in the farm credit system, become an entirely private entity. The bank could obtain debt financing in private capital markets or, with the consent of Congress—through the appropriations process—and the Secretary of the Treasury, from the Government at the average yield at which the Government is selling securities of comparable maturity.

Past programs have been criticized because they circumvent the appropriation process. All Government loans to the Water Utilities Bank and all Government purchases of stock in the bank would, however, come entirely within the appropriation process. The Treasury should actually make a reasonable profit from the Water Utilities Bank. While the Government is entitled to a 2-percent return on its investment in the Rural Telephone Bank, the return on Government Water Utilities Bank stock is to be determined by the Secretary of the Treasury taking into account the average market yield of U.S. Government securities of comparable maturity.

To minimize any risk to the Government, this bill contains several provisions that carefully protect its investment from loss. The Government would not be liable for obligations of the bank. As long as the Government retained any equity, it would have substantial rights to participate in the management and control of the bank. In fact, all directors would initially be governmentally appointed and gradually replaced by shareholder-elected directors as the Government's share of equity decreased. The Government's stock would be preferred, and entitled to a cumulative dividend and interest on unpaid dividends. The bank's debtto-equity ratio could not exceed 20 to 1. Finally, as long as the Government retained an equity interest, the bank would be subject to an annual audit and required to make an annual report to Congress.

This year's bill follows the same framework as last year's bill but a few changes and refinements have been made. These changes reduce the bank's authorization level, narrow the activities eligible for bank financing, and carefully refine the categories of utilities entitled to preferred status in receiving bank financing, as well as making certain technical changes.

The authorization level requested in last year's bill was \$2 billion per year for 5 years. The bill that I am introducing today requests an open authorization of \$1 billion, with no more than \$200 million to be appropriated in the first year. This reduction in authorization level does not reflect that the dimensions of the problem have diminished; if anything, the problem has grown. Rather, I have requested less in recognition of the serious budgetary problems facing this country.

The bank can start on a smaller scale, on a trial basis.

In a further effort to limit the cost of the bank, the new bill has narrowed the scope of activities eligible for bank financing. Utilities would no longer be eligible under section 9(b)(1) to receive bank loans or guarantees to finance ordinary maintenance such as fixing leaks. Under the bill, bank financing would be available only for "extraordinary and nonrecurring" maintenance, such as unusual maintenance procedures needed in the wake of a disaster.

The new bill also prohibits bank financing of the acquisition of a water system by another system unless the acquired system is small—that is, unless the acquired system serves a population of less than 1,000. The purpose of the Water Utilities Bank is to finance projects that will extend service or improve the cost and quality of service, not to finance changes of ownership. The small system exception provides for cases where, due to economies of scale, acquisition of a very small system is likely to improve the cost and quality of service.

The categories of systems entitled to be preferred in receiving bank financing has been changed in two ways. First, while last year's bill called for preferring systems "ineligible for" other Government assistance, section 9(2)(a) of the new bill favors systems "otherwise unable to obtain" Government assistance. This change would make it easier for municipal systems that may be eligible by law for certain programs but that in practice cannot obtain this assistance, to use the bank. It would also make it easier for small companies technically eligible for a program yet unable to participate due to high administrative costs, to use the bank.

Second, section 9(b)(2)(c) was changed to make it clear that systems simply refinancing outstanding indebtedness should not be afforded any preference in obtaining bank financing. On the other hand, if a system needs a new source of capital because of maturing indebtedness, access to the bank should remain a higher priority

A safe, adequate supply of drinking water is absolutely essential for human existence. It is not a luxury. I believe that this new, scaled down bill would provide a proven, nonintrusive means for assuring that our drinking water systems have access to adequate capital. Please join with me in supporting this workable means of meeting the escalating needs of our water supply system.

LOYALTY OATHS FOR FEDERAL EMPLOYEES

HON. EDWARD R. ROYBAL

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. ROYBAL. Mr. Speaker, I would like to insert in the RECORD and exchange that Hon. PATRICIA SCHROEDER of Colorado and I have had concerning loyalty oaths and the rights of free speech of Government employees. I commend it to the attention of all Members of Congress:

PROPOSED COLLOQUY

Mrs. Schroeder. I move to strike the requisite number of words. I rise to engage the distinguished chairman of the Subcommittee in a discussion of the budget for the Office of Personnel Management. When OPM was created it took over most of the functions of the old Civil Service Commission. Among other functions it took over were security investigations and employment applications. Up until about 1975, the old Commission used to ask applicants about their membership in organizations to see if somehow they were communists or subversive. The Commission had files on a variety of organizations and a name index so it could check out the prior political affiliations of each applicant and employee. After losing a number of court battles, both on Privacy Act and on First Amendment grounds, the Commission revised the 171 application form to remove the offensive language and changed its investigation procedures to avoid interference with the free speech rights of Federal employees and applicants for Federal employment, Now, I understand, the new director of OPM, Donald Devine, has suggested that loyalty oaths and political affiliation questions be restored. I think this is a bad idea, both because of its First Amendment implications and because of its budgetary impact. So, let me ask, did OPM propose that any of its Fiscal Year 1982 appropriation be used for a change in the security programs?

Mr. ROYBAL. No, they never mentioned any change in that program.

Mrs. Schroeder. So, am I correct in assuming that there is no money in this appropriation for an expansion of the security program or the reprinting of Standard Form 171 to add new loyalty questions?

Mr. ROYBAL. That is correct. The appropriation does not assume any new activity in this area. I would consider it an improper use of funds for OPM to use money to change its security and loyalty oath programs.

Mrs. Schroeder. I thank the gentleman. I can assure my colleagues that my Subcommittee on Civil Service will keep a close watch on this area to make sure that no changes are made which affect the rights of citizens or which waste appropriated money.

THE ARROGANT IMMIGRATION OFFICERS

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

Mr. GARCIA. Mr. Speaker, Mr. Nelson Lavergne, chief executive officer of the Command Broadcast Associates, recently sent me a copy of an editorial broadcast on radio station WADO in New York. The editorial is concerned with the mistreatment of a Puerto Rican man by U.S. immigration officials. Mr. Lavergne, who has long been a friend of Hispanics, sent me the editorial to point out some of the problems Hispanics encounter in this country because of their ethnicity. The United States does need a new immigration policy, one that is effective and equitable. But a new and more positive attitude toward Hispanics is also needed. I would like to share with you the poignant commentary sent to me by Mr. Lavergne.

At this time I wish to insert into the RECORD the editorial sent to me by Mr. Lavergne.

THE ARROGANT IMMIGRATION OFFICERS

On February 12, 1951, General Douglas MacArthur said that the Puerto Ricans forming the ranks of the gallant 65th Infantry on the battlefields of Korea were writing a brilliant record of achievement in battle and he was proud to have them in his command. He added that he wished that he had many more like them. In that war, the men of the 65th Infantry won 125 silver stars and four distinguished crosses.

On the day that President Reagan was shot this year, one of the first men to help him when he was taken to George Washington University Hospital was a paramedic called Roberto Hernandez—another Puerto Rican.

There are thousands of us here doing our jobs well and contributing to this society, yet we are living in a country where the government persists in calling us citizens, but violating the rights that are inherent with citizenship.

Take, for instance, the case of Salvador Caban: Salvador is a man born in Las Marias, Puerto Rico, in 1944, and he has I1 other brothers and sisters. As it was for many Puerto Ricans, his early years were difficult, mostly spent on a farm helping his father and obtaining a minimal education that only took him to the third grade. We talked to Salvador Caban and found him to be a quiet, respectful man, obviously endowed with a sincere, beautiful humility that is such a common trait of Puerto Ricans raised in the small towns of the island—indeed, a trait that seems to permeate throughout the "campesinos" of all Latin countries.

Again, like many of the rest of us, when he was about 19, he came to the United States, a place that he believed to be his country as well, to do something for himself and escape the yoke of poverty and the humiliating existence of the poor. And, considering his humble beginnings Salvador has done well. He has lived in the same apart-

ment in the Bronx for a number of years and has held the same job for seven years.

But Salvador made one little mistakeafter working in his present job four years and saving a little money, he decided to visit his family in Puerto Rico during the month of December 1977 and from there, he went to visit some friends in Santo Domingo. Then, he came home on an Air Dominica flight on January 5, 1978 and when he got off the plane he met a girl who believes herself to be more American than anybody else and who works for the United States Immigration Department as an officer-her name is Beverly Gordon. Trying to prove that he was an American citizen, born in Puerto Rico, he showed a New York State Driver's license, gave his address and phone number, showed a membership card from the International Union of Electrical Workers, a social security card, and answered whatever other questions he could, in addition to showing his birth certificate obtained in 1977. But officer Gordon did not believe him. She was interrogating him through an interpreter. Then she went to her superior officer who recommended that Salvador Caban be detained and then another one of those who believes himself to be more American than anyone else (an arrogant immigration officer). Assistant Officer in Charge, Douglas Farrell, gave permission to detain Salvador Caban and he was taken to the detention center in Brooklyn, where he continued to be held for six consecutive days!

The sad part of this story is that, in spite of the fact that Salvador gave the names and addresses of his brothers and sisters, in spite of the fact that he provided the name and address of his landlady, in spite of the fact that he gave the name and address of his employer, those arrogant immigration officers decided that this man, this American citizen was not important enough for them to bother calling anyone. Worse yet, when 3 or 4 of his brothers and sisters went to look for him, the arrogant immigration officers would not let them see him and his family obtained a lawyer immediately. But when the lawyer went to the arrogant immigration authorities, they couldn't find his file!

In the meantime, the arrogant immigration officers in Puerto Rico called the Caban family in Las Marias and told them that Salvador was in a lot of trouble, could go to jail for a long time and they'd better get to San Juan fast to identify a picture of Salvador. They went and they identified him. We wonder, of course, why the arrogant immigration officers couldn't have called his brothers and sisters in New York.

You see, the problem was that Caban was detained on Thursday and we guess that Thursday is too close to the weekend for those arrogant immigration officers to do any work, so they just let him sit in a detention center jall until Tuesday, six days later, which is when they began to think that maybe they were wrong and, to add insult to injury, Salvador's family had to put up a \$1,000 appearance bond before being released!

Through the good graces of a lady to whom Salvador told this story, he got an immigration lawyer, a suit for damages was started against the United States government. Salvador has lost the first round. Some judge decided it was perfectly in order for those arrogant immigration officers to do what they did to Salvador Caban. But, the case is being appealed and, if necessary, will go to the Supreme Court of the land.

In a separate case, on June 9th of this year, arrogant immigration officers raided the Ben Foreman and Sons factory in Brooklyn and arrested, handcuffs and all, 72 people. The only problem was, that out of the 72, 10 are citizens and another 30 were either legal residents or had work permits. But the arrogant immigration officers did not even allow those that were legal residents to take their green cards out of their wallets before handcuffing them.

What sin did Salvador Caban and all the other victims of the arrogant immigration officers commit? Only one—they spoke Spanish and were a little bit darker than some other people. We wonder it those arrogant immigration officers would have detained an English speaking, light skinned, blue eyed, red blooded, Canadian, who is an illegal alien.

In the name of God, when are we going to stop these abuses to our dignity and our rights? When are you going to decide this government must stop these Gestapo-type tactics? The rest of America has to know about this because the arrogant immigration officers are doing it to us now, but sooner or later they'll decide that they don't like green eyes or red hair and before long they'll be the storm troopers of this country for everybody.

Flying to Puerto Rico, U.S.A. is like flying to Los Angeles and back—it's all supposed to be American land. We are supposed to be able to go back and forth at will without showing papers, like all other Americans do. But, when are we going to raise our voices against that ridiculous, insulting, and diminishing counter where more often than not, some arrogant immigration officers asks, "What is your citizenship", before we can

get on a plane to come home?

Next September 10th we have some important elections in New York. During the next few weeks you will be hearing some politicians telling you why you should vote for them—WADO is giving them the time. We want to know from them what they are going to do about these arrogant immigration abusers and what they think of arrogant immigration tactics. After they talk, we will be able to separate the hypocrites from the honest ones and we'll be able to tell who to vote for and who to vote against and this time, let's come out to vote en

And its time too for our representatives who are not running in this election to speak out against this outrage in a loud voice. We want to hear our Assemblymen, State Senators, Congressmen, and Senators protest loudly against this outrage; we particularly want to hear from those elected officials who asked for our votes because they too are Hispanics. And we want to hear from our President too. We want to know whether he condones this or not and we want to hear and read about their protests in every radio and television station and in every newspaper in the land.

We want to know now whether those distinguished crosses and silver stars that they gave our men who died for this country mean something or not. And we want to know if those words on the Statue of Liberty that invites the "tired, poor, and huddled masses" of the world mean something or whether they are just a sham. We will demand that those arrogant immigration despots stop treating us like criminals and start respecting us with the same dignity and care that they accord all other Americans.

In the meantime, we are establishing a Hispanic-American Defense Fund to help Salvador Caban take his case to the Supreme Court if he has to. The fund will be held in trust by an impartial attorney and audited each year to provide you with a report. A board will be established to decide which cases are serious and needy enough to use the fund money for legal defenses. Hopefully, the fund will grow throughout the years and will be able to help Hispanies in this country. WADO will start the fund by pledging \$2.000 annually.

If we were able to raise hundreds of thousands of dollars to aid Cuban refugees last year, how about doing the same thing to save our rights and our dignity. Sit down right now and send whatever amount you can afford in check or money order made to: Fund For Hispanic American Defense, Metro Credit Union, Metro Coop, 725 Calle Exterior, Bronx, New York 10451. Please do not send money to WADO and do not send cash. Send only a check or money order made out to the "Fund For Hispanic American Defense" to the address I have just given you. Whatever you send may help you, one of your family, a friend or any poor Hispanic that is being abused by arrogant immigration officers.

INTRODUCTION OF A BILL TO IMPROVE THE REGULATION OF OCEAN TRANSPORTATION BY THE UNITED STATES

HON. WALTER B. JONES

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. JONES of North Carolina. Mr. Speaker, I join today in the introduction of legislation which will amend the 1916 Shipping Act, the law which governs the way our international ocean shipping is regulated.

For too long now we have seen U.S. liner operators become less and less effective in the way they can compete with foreign-flag operators, many of whom are completely unburdened by regulation or antitrust concepts. Over the past several congresses, the finger of blame has been pointed at the 1916 Shipping Act, particularly at the difficulties current interpretation of this act imposes on those who must comply with its provisions. The bill which is introduced today is directed at overcoming those difficulties.

In the 96th Congress, the Committee on Merchant Marine and Fisheries considered legislation which would have completely rewritten the basic regulatory ocean shipping laws of the United States. This measure, which was known as title II of the omnibus maritime bill of 1980, while substantially supported by many in and out of Government, did not receive the endorsement of the Carter administration. The failure to enact this needed regulatory reform measure was, in large part, due to the prior administration's neglect.

I had hoped that the Reagan administration could have, by this time, given Congress some indication of the

direction to be taken in reforming our archaic maritime laws. Since assuming the chairmanship of the Merchant Marine and Fisheries Committee, I have indicated a willingness to cooperate with the administration to formulate its maritime policy and maritime legislative program. Maritime policy has never been, nor should it ever become, a partisan issue; by the same token, maritime policy and its accompanying legislative program cannot be the function of one branch of Government if it is to come to fruition.

The bill we introduce today is not an effort to have Congress do it alone. We are, however, aware that in the regulatory area other specific legislative proposals are being advanced. I personally feel that until the administration is able to speak to this issue, it would be best to have more than one proposal available for study and consideration. Therefore, we present an alternative solution to what everyone recognizes to be a most pressing problem—an alternative which is more modest than efforts of the recent past, but one which combines all the essential remedial elements.

I commend to my colleagues in and out of the Congress this bill and invite all to use this legislation as a tool, as an outline, as a basis for action which must be taken, and taken soon, if we are to responsibly address the 1980's maritime needs of this country.

ARAFAT OFFERS ALTERNATIVE

HON. PAUL FINDLEY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. FINDLEY. Mr. Speaker, on July 26 Yasser Arafat, chairman of the Palestine Liberation Organization, was interviewed on ABC's "Issues and Answers." It was a fascinating exchange. Once again Arafat sent out a tentative signal that he is willing to talk about an overall Mideast settlement that would provide the basis for a lasting peace for all parties, including Israel.

The reporter pointed out that:

It remains in the Palestine National Charter that you want to create a Democratic secular state throughout all of Palestine. That has been interpreted in the United States as a means of driving the Jews into the sea.

Arafat quickly replied:

No. In 1974 I said we are ready to establish our independent state on any part from which the Israelis will withdraw or to be liberated. And in 1969 I said we want to establish a democratic state where Jews, Christians and Moslems can live all together, all the Jews in Palestine together. I am givingwe the victims have offered two solutions, two solutions, whereas the other side didn't offer anything but annihilation * * * And so, this is their resolution—annihilation, while we are offering two solutions. So, I

didn't mention, and nobody mentioned, that we are going to throw anybody in the sea. But we are offering options while the other side are offering nothing but more annihilation, more oppression, and new slavery to my people.

Chairman Arafat has offered a unique formulation which the United States should quickly explore. He has posited two options—first, the familiar and unacceptable democratic secular state, and second, "to establish our independent state on any part from which the Israelis will withdraw." Obviously, the two options are different from each other, and those who genuinely want peace in the Middle East must now ask what Arafat means when he suggests establishments of an independent state.

Would that state recognize Israel? Would it agree to live at peace with

Israel?

Would it pledge to respect Israel's borders?

Would that state be demilitarized so that it could not present a threat to its neighbors?

If Arafat would answer all these questions "yes," then permanent peace in the Middle East is possible.

But someone in authority must ask these questions, preferably an official of Israel—next best, an official of the United States.

Nothing would be lost by asking. If the answers are unsatisfactory, or if they lead nowhere, then the tension and conflict and violence of recent years will be resumed.

But if the answers are positive—as I believe they will be—then they may open discussions that will lead to a settlement of outstanding differences, a modus vivendi that will mean a better life for Palestinians and an end to the constant state of military alert which keeps a cloud over the lives of all Israeli citizens.

Only those with something to fear will fail to talk. Perhaps Prime Minister Begin may fear to talk to the PLO, because talks might lead to a Palestinian state in the West Bank—and an end to Mr. Begin's dream of expanding the permanent borders of Israel to encompass the West Bank. Mr. Begin keeps insisting that this area is a part of historic Israel—Eretz Israel. Israel has kept this area, including more than 1 million Palestinians living there, under military rule since 1967.

The reluctance of U.S. officials to talk to the PLO is more difficult to understand. We do not support Israel's claim to the West Bank. We have great national interests to protect throughout the Middle East. There the PLO is a political force of great importance. It will not drift away or disappear. Nor can it be bombed into extinction.

U.S. reluctance to talk to the PLO, of course, relates mainly to Israeli opposition to the PLO. Israeli officials, and their supporters in the United

States, are wont to use the term PLO and terrorist interchangeably. And this stereotype is so widely held, and not just among American Jews, that the PLO is considered by many people to be untouchable. Now that Begin has ordered the Israeli version of terrorism in Lebanon, perhaps the stereotype will change.

And usually overlooked by U.S. officials, as well as others, is the fact that many American Jews strongly oppose Begin's policies.

If U.S. officials have until now held back from talking with the PLO for fear of domestic political reaction, they should put these fears behind them. Many American Jews are outraged by the Israeli attack on Beirut and the Begin program of expanding settlements in the West Bank. Many of them favor negotiations with the PLO if the Palestinians will accept the right of Israel to exist.

Most Americans, including at least half of American Jews, now believe that peace between Palestinians and Israelis is possible, indeed is a necessity.

A Lou Harris poll taken in July 1980. and commissioned by Edgar G. Bronfman, acting chairman of the World Jewish Congress, showed that by a margin of 66 to 13 percent, Americans believe that "if the PLO would recognize the right of Israel to exist instead of pledging to destroy Israel, then they should be able to join the peace talks about the future of the West Bank." And by a margin of 53 to 34 percent, a majority of American Jews agree with this statement. Americans also believe by a 71 to 12 percent margin that "the Palestinian people are now homeless and deserve their own independent state, just as much as the Jews deserved their own homeland after World War II." And by a similar margin Americans are convinced "there must be a way to guarantee Israel's security and also give the Palestinians an independent state on the West Bank.'

It is time for American policymakers and politicians to move the Palestinian issue to the front burner and to begin looking seriously for a solution to the problem that will insure a lasting peace.

Excerpts from Lou Harris survey follow:

CURRENT AMERICAN ATTITUDES TOWARD ISRAEL AND THE MIDDLE EAST

(A Lou Harris poll taken in July 1980, and commissioned by Edgar G. Bronfman, Acting Chairman of the World Jewish Congress)

By a margin of 66 to 13 percent Americans believe "if the PLO would recognize the right of Israel to exist instead of pledging to destroy Israel, then they should be able to join the peace talks about the future of the West Bank." (By 53 to 34 percent a majority of American Jews agree with this statement.)

By a margin of 71 to 12 percent Americans believe "the Palestinian people are now homeless and deserve their own independent state, just as much as the Jews deserved their own homeland after World War II."

By a margin of 39 to 29 percent Americans believe "Israel has mistreated the Palestini-

an refugees, and that is wrong.'

By a margin of 72 to 11 percent Americans believe "there must be a way to guarantee Israel's security and also give the Palestinians and independent state on the West Bank"

By a margin of 50 to 26 percent Americans believe "by refusing to come up with a plan to give back parts of the West Bank to let the Palestinians have a homeland, Israel makes peace impossible in the Middle East."

By a margin of 56 to 16 percent Americans believe "if Israel can be assured of its security from attack, then it ought to agree to let Palestinian Arabs set up an independent state on the West Bank." (By a slight margin, 41 to 39 percent, American Jews

reject this proposition.)

By a margin of 48 to 22 percent Americans believe "[Begin] has made peace more difficult by announcing he is moving his office of prime minister to the Arab part of Jerusalem." (By a slight margin, 43 to 42 percent, American Jews are also critical of this

Begin decision.)
By a margin of 54 to 19 percent Americans believe "by advocating and allowing more Jewish settlements on the West Bank, [Begin] is making it almost impossible to

get a peace settlement."

By a margin of 44 to 28 percent Americans believe "Israel is wrong to think that the Jewish lobby in the U.S. is so powerful that it can keep them from making the compromises necessary to achieve peace."

By a margin of 48 to 38 percent Americans believe "Israel seems to feel the U.S. will back them, no matter what they do."

"No more than 38 percent of the public as a whole expresses a great deal of confidence in Begin, compared with 54 percent who feel that way about Sadat."

A TRIBUTE TO THE LATE ROBERT MOSES

HON. PETER A. PEYSER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. PEYSER. Mr. Speaker, on Wednesday morning, July 29, Robert Moses, 92, the man responsible for facelifting the New York area for close to half a century through public works, passed away. He has been described by many as one of the great builders of our time.

It would be impossible to mention all that Mr. Moses accomplished during his most distinguished tenure as a public servant. Highlights of his career include the building of tunnels. and miles of highway bridges. throughout New York State, and many other projects not limited to mass transportation. He gave birth to Lincoln Center, New York Coliseum, the United Nations building, Shea Stadium, zoos, civic centers, the 1964-5 World's Fair, and 75 parks, including Jones Beach. Mr. Moses also had children in mind, increasing the number of playgrounds in New York City from 119 to 658.

Mr. Moses, a Yale graduate and Rhodes scholar, first came to power in 1924 when he was named chairman of the New York State Council of Parks. But he reached the apex of his career as the head of the Triborough Bridge and Tunnel Authority. In Mr. Moses' vision of a city, the structures, roads, and buildings were paramount. He transformed wastelands into parks, created new land on the edge of the ocean and built hundreds of miles of highways. The impact of his work affects all of New York and the way its citizens live. He saw the city as a place for people to work, shop, and live in style.

As the New York Times most appropriately put it:

And thus quietly, the active career of one of the nation's most powerful public officials came to an end. Mr. Moses' name was virtually a household word, not only in New York but also around the nation, first as a fighter for parks and open space and later as a name that had come to symbolize the sweeping, total approach to urban renewal that he favored.

I know that all Members join me in extending our most heartfelt sympathy to his wife, the former Mary A. Grady, and two children, Barbara Olds and James Moses Collins.

HEAD OF PLO POLITICAL DE-PARTMENT PLEDGES MORE TERRORISM AND A WAR TO DESTROY ISRAEL; RULES OUT COMPROMISE

HON. BENJAMIN S. ROSENTHAL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. ROSENTHAL. Mr. Speaker, Faruq Kaddoumi, the head of the political department of the Palestine Liberation Organization gave an interview to the respected West German magazine Stern last week in which he discussed the strategy of the PLO.

Kaddoumi, who is Yasir Arafat's

closest adviser, declared:

First. That the PLO will never

accept Israel's right to exist;

Second. That a Palestinian state on the West Bank and in Gaza will not satisfy the PLO's ambitions which require the complete destruction of Israel:

Third. That guerrilla warfare aimed at Israeli civilians will remain a key

element in the PLO strategy;

Fourth. That in a war between the Soviet Union and the Western democracies, the PLO would fight alongside the Soviets.

Mr. Speaker, I know that public rhetoric often overblows what is said privately but these on-record statements cannot be ignored or explained away. Once again we see that the Palestinians have yet to develop a reasonable and mature political leadership, a leadership capable of accepting Israel's right to exist within secure and recognized borders.

One essential ingredient of successful international diplomacy is the ability to take the world as it is, and moderate one's goals to fit the available space. Israeli diplomacy, and more recently Egyptian diplomacy have contained large measures of the conciliatory and compromising spirit. The next steps in the peace process require that the other parties to the conflict adopt a like posture.

I am grateful to the Congressional Research Service for its prompt translation of this interview:

[From Stern, July 30, 1981]

WE WILL ALLOW ISRAEL NO SECURITY

Despite last Friday's ceasefire agreement between Israel and Lebanon the fighting continues. Arafat's closest adviser, Faruk Kaddoumi, spoke with Stern correspondent Wibke Bruhns about the strategy of the Palestine Liberation Organization (PLO).

STERN. Menachem Begin— Kaddoumi. Terrorist Begin.

STERN [continuing]. Justifies his attacks on Lebanon with success. For more than a year, until this missile war, there had been no Palestinian attack on Israel.

KADDOUMI. That's correct.

STERN. Begin argues that if the Israel attacks on Palestinian targets in Lebanon were not so frequent and so strong, more numerous and more successful commandos would come across the border.

KADDOUMI. Does he say this?

STERN. At this moment, it does not appear that there is any Arab country or any other country ready to go to war with you against Israel. If these sporadic undertakings of the commandos provoke such terrible preventive and retaliatory strikes by Israel, why do you continue them?

Kaddoumi. We must continue the military operations in the occupied areas. It is better to have a small candle in one's hand than to

constantly curse the darkness.

STERN. Militarily this does not change anything and politically this does not create friends for you, such as in Europe. What is your goal?

Kaddoumi. A counter-question. How does a pearl develop? A strange matter penetrates into the mussel. It irritates the creature, which rubs it and causes it pain. This is exactly what we are doing. In the end we will find the pearl in the mussel.

STERN. As long as it is not opened, the

mussels survive.

Kaddoumi. We will never allow Israel to live in peace. We will never grant it complete security. Every Israeli must feel that behind each wall there is a guerrilla standing and aiming at him.

STERN. You cannot expect Israel to accept this situation without doing anything about

Kaddoumi. The most important thing is that Israel began it. Israel is responsible for the dead on both sides. We have no alternative except to give up. And the operations in the occupied areas are the signs that we are not giving up.

STERN. Another possibility would be to speak with the Israeli government.

EXTENSIONS OF REMARKS

KADDOUMI. With the Zionists? Because Zionism means the colonization of Palestine.

STERN. Then you do the same things as the Israelis, who say there is no question of recognizing the PLO as the representative of the Palestinians. How will this then con-

KADDOUMI. Israel has had our country under occupation for 33 years. The first condition is that it withdraw from the occupied areas. Then we will be ready to negotiate the solution of the Near East crisis at an international conference.

STERN. When you say "occupied territories," what do you mean?

KADDOUMI. First of all, the West Bank, the Golan Heights and the Gaza strip.

STERN. That means thus: first withdrawal,

then negotiation.

KADDOUMI. First unconditional withdrawal. We have a vested right to a part of Palestine. There was a UN partition plan which foresaw two states in 1947.

STERN. Which the Arabs rejected.

KADDOUMI. We were like the mother who went before King Solomon with another woman fighting for her son. He proposed to cut the child in two. But the true mother said, "Let him live. He should not be divided.

STERN. The true mother gave the child to the other woman. In Palestine instead of this there was war. Should you get an independent Palestinian state on the West Bank and in Gaza, what happens then to the remaining part, with Israel within the 1948 borders?

KADDOUMI. We will never recognize Israel, never the usurper, the colonialist, the impe-

STERN. Then what?

KADDOUMI. We will fight for our rights, for the return to our land.

STERN. By doing so you will bind the hands of your friends.

KADDOUMI. Why?

STERN. Your idea means the destruction of

the State of Israel.

KADDOUMI. Yes. The enemy who occupied my fatherland, who murdered my parents, my brothers and sisters-I will destroy him. But we are not murderers. We don't want to throw Israelis into prison, as they do with us. We welcomed hundreds of thousands of them in our countries and sheltered them during and after the Second World War. STERN. That is not quite so. There were

enormous tensions and terrible armed con-

KADDOUMI. We are ready to live with the Jews in a democratic state.

STERN. Which would be ruled by you be-

cause you would have the majority.

KADDOUMI. Of course

STERN. There is a difference between political reality and dreams.

KADDOUMI. Dreams sometimes turn into

reality.

STERN. You have condemned the United States as an aggressor and said that the Soviet Union is your most reliable friend. One of the arguments with which Menachem Begin tries to take away any potential support of you is the statement that a future Palestinian State would be a Soviet

KADDOUMI. We are a national movement. Whoever helps us is welcomed. Syrians are helping us, Iraquis, Libyans, Chinese

STERN. With weapons? KADDOUMI. The Chinese were the first. They provided training and weapons to us. The Soviets as well as the other socialist countries stand on our side with political and military assistance.

STERN. And what do they ask in return? KADDOUMI. What could the Palestinians offer them?

STERN. In the future probably something nevertheless?

KADDOUMI. We are now speaking about the present. Who knows what our relations with the Soviet Union will be in the future? STERN. Your Arab friends are a bit more cautious toward the Soviet Union.

This might apply to Saudi Arabia. But King Hussein of Jordan was in Moscow recently, where he and his hosts understood each other well.

STERN. But if it became serious, it would appear less probable that he would fight on the side of the Soviet Union.

KADDOUMI. If it really came to a comprehensive war, the Soviet Union would be our ally. Because we would rather be friends of the Communists than victims of Zionist and imperialist occupation power.

STERN. The Communists can also be an occupation power, we know.

KADDOUMI. They are not in the Arab world.

MR. WILBUR COHEN ON SOCIAL SECURITY

HON. DENNIS M. HERTEL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES Tuesday, August 4, 1981

. Mr. HERTEL, Mr. Speaker, the proposed changes in the social security benefits is an important issue that affects nearly every American. In a recent Detroit News article Mr. Wilbur Cohen, former Secretary of the Department of Health, Education, and Welfare and expert on the social security system, comments on this matter.

I would like to share his views with my colleagues:

[From the Detroit News, July 27, 1981]

CAPITOL CONNECTIONS

(By Richard A. Ryan)

WASHINGTON.-When Wilbur Cohen gets excited, his voice becomes high-pitched, almost squeaky. Talk to Cohen about Social Security and his voice starts to go up. Talk to him further about President Reagan's proposed Social Security cuts and the voice jumps several octaves.

Cohen, retired dean of the University of Michigan's School of Education, is spending a lot of time these days talking about President Reagan and Social Security.

He is chairman of SOS-Save our Security-a coalition of some 100 groups representing an estimated 35 million Americans. About six days a month he leaves the University of Michigan's Ann Arbor campus, where he teaches summer classes, to come to Washington to lead the opposition to the

proposed Social Security cuts.
"This is a labor of love for me," he says. "I have spent 47 years working on these problems and now Ronald Reagan and David Stockman (who has ice water in his veins) are trying to tear it all down."

Cohen, 68, obviously is no newcomer to the issue. As part of his graduate study program at the University of Wisconsin in 1934 he worked with President Roosevelt's Cabinet committee that wrote the Social Security legislation. When Roosevelt signed the bill Aug. 14, 1935, Cohen was the first employe hired by the Social Security Administration, where he worked for 21 years.

And as assistant secretary, under-secretary and eventually secretary of the Department of Health, Education and Welfare (now Health and Human Services) in the Kennedy and Johnson administrations, Cohen had jurisdiction over all Social Security programs.

"People are really upset by the Reagan proposals," Cohen says, his voice picking up both volume and tone. "The anxiety level is way up there. It is the biggest mistake Reagan has made to date."

SOS is not a new organization. It was formed during the Carter administration to combat Social Security changes proposed by Mr. Carter. "But nothing ever happened," Cohen recalls. "We had a letterhead and that's about it."

But then President Reagan made his proposals and the group was revived. Several labor organizations made hefty contributions. "All of a sudden this thing came to life," Cohen says. "Instead of being chairman of an organization with a name and a letterhead, I found myself with an army behind me."

Cohen is an idealist. He would like to defeat all of President Reagan's proposed cuts. But he's a realist, too. "We are not going to win 100 percent," he concedes. But he thinks he can hold the cuts to 50 percent of what Mr. Reagan has asked.

"You have to understand my position." he says. "I'm against every cut. With me it's a matter of principle. But if you ask me if we're successful, I'd say this is the only area where Reagan will be beaten to that extent." (While he is over 65, Cohen does not receive Social Security benefits because his teaching salary is above the \$5,500 limit. At age 72, however, he will be able to receive full benefits no matter what his outside income.)

Cohen doesn't deny the Social Security trust fund is temporarily short of cash. But he thinks that problem can be worked out by borrowing money from the general fund. There is sufficient time to study ways out of the long-term problem caused by fewer workers paying for more retirees, he says.

Whatever the solution, Cohen admits it will cost money. "My theory is there is no free lunch," he says. "If we want it, I'm willing to stand up and tell people they have to pay for it. I'm not advocating something for

But the important thing, Cohen says, is for the government to maintain its commitments and pay recipients what they were promised. "To me it is a moral issue," he

"Seven presidents and 22 Congresses have made these promises to us for over 45 years. Now along come Stockman and Reagan and they say that doesn't mean a thing to us. Well, I think that is breaking faith.

"I've lived for 68 years in this country. I've paid taxes. I have three children. I have three grandchildren. I want to leave a country that keeps its promises, that keeps its faith with people.".

EXTENSIONS OF REMARKS

PRESIDENT REAGAN AND MINORITY PROSPERITY

HON. JACK FIELDS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. FIELDS. Mr. Speaker, President Reagan's recent address before the 5,000 delegates to the NAACP convention in Denver elicited much attention and comment in the public press.

President Reagan's message to the black community is that his economic programs are designed to clear the way for continued and accelerated upward economic and social movement. Minority citizens in Houston, Tex., and all across this Nation have the talents and ambitions to succeed in the private sector of our national economy-many already have, and many more will once the opportunities of a robust and growing economy are open before them. Such opportunities are the goal of the administration's program.

Mr. Speaker, I am placing in the RECORD three articles supportive of the President's approach to the longterm prosperity for our Nation's mi-nority citizens. One article is by the noted political commentator, William Rusher; the other two are by Tony

Brown, a black journalist.

WILL BLACKS ACHIEVE PROSPERITY THROUGH REAGAN'S PROPOSALS?

What do most American blacks want, for themselves and their children? Do they genuinely want to participate in the efforts and rewards of American life, or would they rather be spared the necessity for effort and settle instead for a condition of permanent mendicancy, tactfully defined as compensation for the discriminations they have suf-

Personally, I have no doubt at all that most of our black citizens are eager for full participation, and willing to accept as enough whatever they can achieve on those terms. They know more than the most compassionate white can ever know about discrimination; but they also know that dis-crimination can be used as a crutch as well as a yoke. They have seen, moreover how the money poured by the federal government into programs to aid blacks can tempt a person to spurn honest effort and specialize in hustling the system.

SUPPORTED BY GOVERNMENT

Many blacks, therefore, are more than ready to accept President Reagan's invitation, extended in his address to the NAACP convention, to share in a revived national prosperity, rather than concentrate on lob-bying for ever-larger handouts. "Many"but not all, by a long shot. And therein lies

Partly because so many doors to advancement in the private economy were closed to them, and no doubt partly out of an idealistic desire to help the less fortunate members of their own race, many of the ablest blacks in the last three or four decades have concentrated in the fields of government or charitable work. Some went directly into politics; others entered the civil service, and gravitated toward the social welfare agencies; still others went to work for private charitable institutions such as the NAACP, the Urban League, and the church-affiliated charities. Practically everything that every such organization does is financed, largely or exclusively, by government. (I know, for example, of one church-founded private hospital, specializing in the care of unwed mothers and their children, 90 percent of whose support is today provided by one or another level of government.)

These able blacks are now the bureaucratic backbone of the system of governmental aid that almost totally dominates the black community. There is power in such a role, for those who seek it; there is at the very least a sense of satisfaction for everybody else; and there is-no small point!-financial compensation for everyone involved, for politicians, bureaucrats and social workers

have to eat, too.

Is it any wonder, then, that when President Reagan rose before the NAACP convention to present his plan for cutting back on federal welfare expenditures and encouraging black employment in private industry he was greeted with only "polite applause" The wonder is that there was any applause at all. He was telling these earnest and able people, virtually all of whom had spent their entire adult lives wiring their fellow blacks into the welfare system, that he has an altogether different plan for America's black citizens: full participation in a prosperous private-sector economy.

WHAT WILL HAPPEN?

It is by no means irrelevant to ask what is to become of the whole superstructure of black welfare-a superstructure itself so largely black-if the emphasis in the black community shifts sharply and suddenly to employment in the private sector. Business, and particularly big business, will be welladvised to turn to this pool of talented people for help in adjusting new black work-

Will the Reagan plan work? To argue that it won't amounts, for all practical purposes, to a contention that black Americans as a group are simply unable to compete successfully in our society, and that our obligation, in the historical circumstances, is to carry them on our backs forever. Such a philosophy might provide a good living for the members of a welfare bureaucracy, and a benumbed and marginal existence for most other blacks; but it is not a viewpoint that commends itself to Ronald Reagan-or to most Americans, whether black or white.

CAN U.S. BLACKS SUPPORT THEMSELVES?

Although most blacks want to be self-sufficient, the media image and perception of the black community by most whites and many other blacks is to the contrary.

The recent NAACP convention in Denver a case in point. The news that the leaders of the colored people's group tried to use the media to get across was that they were in the forefront of a struggle to save blacks and the poor from the wrath of a racist president. But the point that was actually made was quite different.

The news that surfaced was not that Ronald Reagan is not going to save blacks with more poverty programs, but that blacks are not willing to save themselves from poverty programs. The stereotype of lazy blacks interested only in their own selfish interests, angry and disinterested in the country's future was reinforced once again.

If some sneering white man had said that blacks can only exist off the surplus of wealth produced by white people, his charge could be safely dismissed as racist. But that, in essence, is what the NAACP implied by its adamant resistance to Reagan's message. It suggests that the self-image of American blacks is terribly feeble and uncertain," wrote Joseph Sobran in the New York Post.

Delicately, President Reagan told the 5,000 NAACP delegates that they spending their \$140 billion non-productively outside of their communities, namely with

white people.

"In most neighborhoods what really brings prosperity is when the income of that neighborhood is then multiplied by turning over several times within that community.

MUST CHARGE SPENDING

"I must tell you that in the black communities in America the turnover is less than once before the dollars, those \$140 billion, go out into the community at large. And that has to be changed."

But Benjamin Hooks, NAACP director, and Margaret Bush Wilson, NAACP chairman, were too busy insulting President Reagan to pay any attention to helping

themselves.

"Executive director Hooks is a seasoned farceur at these performances," wrote R. Emmett Tyrrell Jr. in The Washington Post. If the future of black America was not hanging in the balance, I, too, might enjoy the farce and the joker's stage acting.

Somebody needs to tell blacks to stop begging and help themselves. And I'm glad that Ronald Reagan did so. The black leaders of racial integration are always proposing another room addition to the welfare estate and their grants from the federal govern-

ment top the list.

Moreover, the NAACP spent \$3 million with whites in Denver and avoided the black neighborhood and businesses of Five Points. The "civil rights" group did the same thing to the black community in Liberty City in Miami last year.

'Much of the black leadership is not in the business of leading blacks, but of extracting what they can from whites, and their strategies and rhetoric reflect that orientation" Dr. Thomas Sowell, a black economist noted.

Just how bad is the damage caused by years of government dependency and charlatan leadership? In a television special we asked the Qube two-way opinion poll: "Can Blacks Support Themselves?'

EMPHASIZE RACISM

An overwhelming 86 percent of a television opinion poll conducted did not feel that blacks place enough emphasis on self help and too much on racism. And both guests, professional blacks, agreed that the black organizational ego and how some black leaders put personal achievement above the concerns of the organizations hurt black development. In light of these problems, can blacks help themselves?

Projected figures for 1984 show a black population of over 35 million people earning \$150 billion, with a gross national product that will support an economy of \$300 billion. And the figures just keep growing and

growing.

The bigger the American Dream, the bigger the black reality, Blacks have done a lot of things in 400 years when it comes to dollars and cents, going backwards, however, hasn't been one of them.

Blacks make it and they spend it. They buy Cadillac cars, more wine, more caps and hats, more cologne and mouthwash than whites do for comparable size. They're only 11 percent of the population, but 20 percent

before.

of the heavy users in the rice market, 16 percent of the total market in orange juice, 20 percent of the total market in Scotch whiskey. Blacks account for 32 percent of all sales in malt liquor. They account for 40 percent of record purchases, of a \$3.5 billion market and they're here to stay. Fifty-six percent own their own homes.

As President Reagan pointed out, they make it, but they spend it—not with blacks—but with the wrong people. That's why Hooks and Wilson were in Denver crying racism.

NAACP STABBING OF REAGAN: BLACKS LOST MOST

If a curve is the longest distance between two points, that's what the National NAACP leaders threw President Ronald Reagan at their 72nd annual meeting in Denver recently.

The philosophical difference in social spending between President Reagan and the NAACP heads was generally understood, as was the thrust of his speech, prior to the president's appearance. NAACP Chairman Margaret Bush Wilson and Executive Director Benjamin Hooks had met amicably with the president at the White House the week

But on the day of the president's appearance, Hooks gave the first hint of a surprising hardball attitude when he predicted that Reagan would not get a standing ovation. Mrs. Wilson, in the ultimate condemnation, said that Reagan was reviving "war, pestilence, famine and death" with his budget cuts. Then Mrs. Wilson primed the crowd of 5,000 with more uncivil behavior and something more than a wrist slap when she introduced Reagan with a disclaimer: "The NAACP does not necessarily subscribe to the views which are about to be expressed."

Although the president grinned and waved to the crowd, his face reddened. Nancy Reagan stared straight ahead in unistakable displeasure as the crowd guffawed. Media's projection of this ordeal of a rejected president and an insulted First Lady made, even before Reagan spoke, a loser of the cause of the minority poor. And the extent to which America perceives the leaders of the NAACP as representing all black people is the extent to which the cause of black people has been harmed.

In a furious view, a young black woman questioned why they kept zinging the president: "Why did they invite him if they were going to treat him like that?" Without this raucous overkil, however, it is a fact that the majority of black America either disapproves of or is skeptical of Reagan's budget cuts and the lack of specific proposals to help blacks who will lose benefits because of cutbacks.

His administration's attitude towards affirmative action, his developing policy toward apartheid in South Africa and his reluctance to support an extension of the 1965 Voting Rights Act are liabilities with the nation's blacks.

It's my guess that the violently rude staging of the president's speech was not precipitated so much out of a genuine and absolute concern for those policy areas, but out of the strong emotional bond that the NAACP leaders have with the philosophy of integration or social-racial engineering. Reagan will only succeed with this group if he uses the federal treasury to promote racial assimilation.

Reagan's stunned advisers had overlooked these facts and assumed that a rational

attack on racism, an explanation of the heavy price that inflation extracts from the poor, a promise of 3 million new jobs by 1986 and aid to black businesses would communicate an acceptable policy toward black America. But two miscalculations were inherent in the White House thinking.

The NAACP does not provide, as anticipated, a representative cross-section, but an ideologically segmented group, and the leadership is far to the left of the fundamentalism of the nation's 30 million blacks. The victim of the failed strategy was the pragmatic dialogue with black America envisioned by Reagan's people.

However, on two occasions in his speech—and in a general philosophical sense—the president was more in step with most of the 5,000 NAACP delegates, their 400,000 members and the 29,600,000 black Americans who do not belong, such as myself, than were the national leaders of the host group. Reagan got his soundest applause when he rejected the inherent superiority of white children and the premise of mandatory busing, and extolled the necessity of black colleges.

The NAACP has been the strongest advocate of forced busing—the issue that has estranged it from the majority of blacks it professes to speak for. It had been cool to the continued existence of black colleges.

The president recognized the value of the source of over 50 percent of all black college graduates each year, 80 percent of black professionals and the undergraduate source of over 75 percent of blacks who receive their Ph.D.'s from white universities. He acknowledges the fact that blacks attend black colleges because of a rich heritage and free choice.

By contrast, the NAACP's director of Research, Policy and Plans, Michael Meyers, a Negro, wrote earlier: "No matter what else is taught or how it is taught, the fact that a school is segregated teaches there is a qualitative difference between students in 'black' and 'white' colleges."

Therefore, the Denver clash between the NAACP national leaders and Ronald Reagan was not racial, but philosophical. The president urged blacks, as Booker T. Washington did at the turn of the century, to recognize themselves as a nation within a nation, to develop their own economy and to "turn over" the \$140 billion they spend with other blacks.

"In most neighborhoods, what really brings prosperity is when the income of that neighborhood is then multiplied by turning over several times within that community * * * in the black communities in America the turnover is less than once before the dollars, those \$140 billion, go out into the community at large. And that has to be changed," the president said.

This advice and common sense notwithstanding, the so-called civil rights leaders will march thousands of blacks into conventions in major hotels this summer to unload millions of dollars into the coffers of the white establishment "enemy" while blaming Reagan for the economic ills of black people.

For all of their protestations of injured innocence and fair-sounding rhetoric about programs to help poor blacks, the NAACP's leadership spent more than \$3 million with Denver's white business community to protest white racism and black poverty. Residents of the Five Points area of Denver, a black neighborhood, complained that the NAACP delegates were instructed to avoid that part of the city. The small black businesses and restaurants found their welcome signs to be of little use in attracting any of the money from the NAACP's "affluent poor."

If any of the noble rhetoric of the civil rights groups is going to have meaning, they will have to recognize that the black underclass is hurt more by class segregation from middle-class blacks than from separation from whites by race. The government is obligated to share the tax resources with this impoverished community and the middle class is needed to pry them loose.

But even if the federal government wanted to economically emancipate black ghettos, it lacks the expertise to do so. Help for the new black underclass—including 32 percent of unemployed black teens who have succumbed to drug addiction—will come from one source only; the black middle class. And the so-called civil rights leaders fail to grasp that fact or understand their true role.

The \$140 billion the president referred to is equal to the Gross National Product (GNP) of Canada or Australia and equal to the GNP of the ninth-largest nation in the Free World. Delicately, he told them that blacks were spending their money in a 180 degree angle—in a straight line directly away from themselves—instead of in a 360 degree angle with one another as do other ethnic and religious groups.

Ironically, Reagan's philosophy of a sound economic power base for black America is more compatible with past black leaders such as Marcus Garvey, Booker T. Washington, Elijah Muhammad and Frederick Douglass than are the modern-day disciples of the black establishment.

In announcing a withdrawal of the federal "draft horse," Reagan was suggesting to blacks a return to the fundamental nationalism of their past and asked the NAACP to come to this "realization." Today's black leaders of integration have surrendered the very virtues of thrift, diligence, group cohesion and optimism that are the basic linchpins of black survival.

As a result, the racial misery-index, the gap between black and white achievement, has remained constant and in some cases widened. However, the "new kind of bondage" Reagan warned of isn't too much government help, as he sees it, but a bankrupt policy of too much dependence on the wrong source.

INTRODUCTION OF A BILL TO IMPROVE THE REGULATION OF OCEAN TRANSPORTATION BY THE UNITED STATES

HON. WALTER B. JONES

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. JONES of North Carolina. Mr. Speaker, I join today in the introduction of legislation which will amend the 1916 Shipping Act, the law which governs the way our international ocean shipping is regulated.

For too long now we have seen U.S. liner operators become less and less effective in the way they can compete with foreign-flag operators, many of whom are completely unburdened by regulation of antitrust concepts. Over

the past several Congresses, the finger of blame has been pointed at the 1916 Shipping Act, particularly at the difficulties current interpretation of this act imposes on those who must comply with its provisions. The bill which is introduced today is directed at over-

coming those difficulties.

In the 96th Congress, the Committee on Merchant Marine and Fisheries considered legislation which would have completely rewritten the basic regulatory ocean shipping laws of the United States. This measure, which was known as title II of the omnibus maritime bill of 1980, while substantially supported by many in and out of Government, did not receive the endorsement of the Carter administration. The failure to enact this needed regulatory reform measure was, in large part, due to the prior administration's neglect.

I had hoped that the Reagan administration could have, by this time, given Congress some indication of the direction to be taken in reforming our archaic maritime laws. Since assuming the chairmanship of the Merchant Marine and Fisheries Committee, I have indicated a willingness to cooperate with the administration to formulate its maritime policy and maritime legislative program. Maritime policy has never been, nor should it ever become, a partisan issue; by the same token, maritime policy and its accompanying legislative program cannot be the function of one branch of government if it is to come to fruition.

The bill we introduce today is not an effort to have Congress "do it alone." We are, however, aware that in the regulatory area other specific legislative proposals are being advanced. I personally feel that until the administration is able to speak to this issue, it would be best to have more than one proposal available for study and consideration. Therefore, we present an alternative solution to what everyone recognizes to be a most pressing problem-an alternative which is more modest than efforts of the recent past. but one which combines all the essential remedial elements.

I comment to my colleagues in an out of the Congress this bill and invite all to use this legislation as a tool, as an outline, as a basis for action which must be taken, and taken soon, if we are to responsibly address the 1980's maritime needs of this country.

MONOPOLY BY FTC FIAT

HON. PHILIP M. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES Tuesday, August 4, 1981

• Mr. PHILIP M. CRANE. Mr. Speaker, the war which the Federal Trade Commission has been waging for 9 years against cereal manufacturers can only be viewed as a travesty of jus-For almost a decade now, the FTC has attempted to prove that Kellogg, General Mills, General Foods, and Quaker Oats are engaging in a socalled shared monopoly. Despite all its attempts, the FTC has not unearthed any substantiating evidence to support this claim. Although the FTC charges that the cereal companies are engaging in tacit price collusions, fluctuations in their pricing policies, and the prices of their products differ noticeably.

More important than the lack of incriminating evidence, however, is the nature of the charge itself. The idea of a shared monopoly is not based on any antitrust standard established by Congress, but is merely concocted by a handful of economists at the FTC. According to this theory, a few firms may violate the antitrust laws simply possessing substantial market shares-no proof of illegal collusive practices is necessary. Even the chief economist at the FTC concedes that one-third of the U.S. economy could declared an antitrust violation under this theory. The fallacy of this theory is that the market structure called a shared monopoly is actually a highly competitive market in which firms have taken advantage of economies of scale, utilized managerial expertise built on years of experience. and enjoyed widespread consumer acceptance through the production of quality goods.

Furthermore, the remedies which the FTC seeks to correct this supposed wrongdoing are drastic; they include industry massive restructuring through divestment, royalty-free licensing of trademarks, and expropriation of technical know-how without compensation. Obviously, these measures would result in widespread economic disruption by increasing concosts while simultaneously sumer eliminating jobs in the cereal industry.

The editorial which appeared in the June 4 edition of the Detroit News describes the fallacies of the FTC argument in further detail. For the benefit of my colleagues I submit it in its original, unedited form.

[From the Detroit News, June 4, 1981] Two Anti-Trust Agencies?

Michigan businesses have not fared well at the hands of the Federal Trade Commission (FTC)

The FTC's five-year anti-trust investigation of the auto industry was recently canceled, but not before it cost the auto makers hundreds of thousands of dollars. At one point in the auto case, a senior FTC lawyer conceded that the agency was engaged in a "fishing expedition," but maintained it was nevertheless a "good faith" fishing expedition.

But the FTC reserved what some scholars believe is its most innovative approach to anti-trust enforcement for Battle Creek's Kellogg Co. and its competitors in the ready-to-eat breakfast cereal market.

The Commission's case began in 1972 on the theory that Kellogg, General Mills, General Foods, and Quaker Oats were engaged in unfair competition by operating a shared monopoly." This was a novel charge, to say the least, as there is no statutory discussion or definition of a "shared monopoly.

The companies are not accused of having actively agreed to fix prices, but only of having failed to compete aggressively enough for the FTC, thereby engaging in a form of de facto price collusion. But even this allegation was contradicted by testimony that price increases among the competitors were uneven.

Subsequently, the company with smallest portion of the market, Quaker Oats, was successful in having charges against it dropped, even though it had increased its market share (interesting in light of the FTC's theory of tacit agreement among the alleged co-monopolists of the breakfast table).

Nine years later, the case is still pending. Much of the testimony was heard by an administrative law judge who, because of unique circumstances, was under a personal contract to the FTC. In general, administrative law judges are created and have their pay and tenure determined by the federal Office of Personnel Management rather than the federal regulatory agencies whose cases they hear. But Tom Bethell, in a recent article for Policy Review, a journal of opinion published by the Heritage Foundation, notes that the regulatory agencies may still select their administrative judges. At one time recently, according to Mr. Bethell, almost all of the judges hearing FTC cases were former FTC attorneys.

This is an old problem with administrative hearings, and a troubling one. As the late Federal Judge Fred Kaess observed while hearing arguments in which the auto companies sought to move their case from the FTC to Federal Court: "How can you have a prosecutor, a judge, and a jury all in the same body?"

Kellogg estimates its expenses for the FTC case at \$1 million per year. The cost to the consumers of the defendants' alleged economic crime: one-tenth of a cent per breakfast.

Both the cereal and auto cases seem to be the product of an anti-trust agency in desperate search of work. William Baxter, the Stanford University law professor who is now head of the Justice Department's antitrust division, was asked at his confirmation hearing if the nation needs two anti-trust units. "With only a little effort," he replied, "I can imagine life going on without the anti-trust enforcement efforts" of the FTC.

Based on the commission's record with Michigan firms, so can we.

PRIVATE INVESTMENT IN NUCLEAR FUEL REPROCESSING

HON. BARRY M. GOLDWATER, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES Tuesday, August 4, 1981

Mr. GOLDWATER. Mr. Speaker, I had intended to insert the following paper prepared for an April 23 meeting between Secretary Edwards and industry representatives on reviewing the prospects of future private investment in nuclear fuel reprocessing during my remarks on July 24 on page H4869. I do so now for the RECORD:

To assist the Department in this review, the owners of the Barnwell Nuclear Fuel Plant (BNFP) in South Carolina 1 have prepared this paper to summarize their views on the five topics the Secretary has indicated that he would like to discuss during the course of the meeting:

(1) Industry views on the need and timing for the establishment of commercial nuclear fuel reprocessing capability in the United

(2) The extent of existing private investment in nuclear fuel reprocessing;

(3) Prospects for future investment in the backend of the fuel cycle, particularly nuclear fuel reprocessing;
(4) Review of policy and regulatory issues

that are obstacles to private industry

(5) Other resources which would age private investment in nuclear fuel reprocessing operations.

INDUSTRY VIEWS ON THE NEED AND TIMING FOR THE ESTABLISHMENT OF COMMERCIAL NUCLE-AR FUEL REPROCESSING CAPABILITY IN THE

The need for nuclear fuel reprocessing is urgent if the United States is to deal with the escalating build-up of spent nuclear fuel and to have a viable breeder reactor pro-

Implementation of a breeder reactor program in the United States for production of electric energy will require large quantities of plutonium. Present DOE planning has the Clinch River Breeder Reactor (CRBR) coming on line about 1990 and construction of a larger breeder reactor is being considered for operation in the 1990s. Reprocessing of LWR spent fuel at Barnwell beginning in 1987 is essential to satisfy plutonium feed requirements for this program.

In the long term, reprocessing of breeder reactor spent fuels will be essential to recover the valuable plutonium that is generated. Together, reprocessing and breeders can extend our probable uranium reserves indefinitely, compared to tens of years with-

out them.

Finally, reprocessing provides many significant benefits to the management of radioactive wastes. Reprocessing places the high-level wastes in a chemically stable form (such as glass), with a seven-fold volume reduction compared to storing spent fuel. Also, because of the removal of most of the plutonium, the high-level wastes from reprocessing would be far safer to store

than spent fuel rods. According to recent DOE estimates, Away-From-Reactor (AFR) storage capacity for spent nuclear fuel will initially be required by 1986, and 6480 tons of such capacity are estimated to be needed by 1995. Because essential decisions have not been made, and because of lead times involved, the goal of having AFR storage on line by 1986 is already jeopardized. There is general agree-ment that it would take at least nine years to design, construct, and license a new facility. With respect to existing facilities, like Barnwell and Morris, the first decision concerning government acquisition must be made this year if they are to be on line for regional interim storage in the 1986-1990 period.

THE EXTENT OF EXISTING PRIVATE INVESTMENT IN NUCLEAR FUEL REPROCESSING

In the belief that nuclear fuel reprocessing offered a good business opportunity, Allied Chemical Corporation applied for a permit on November 7, 1968, to build a reprocessing facility in Barnwell, South Carolina. The Atomic Energy Commission, after public hearings, issued a construction permit for the separations facility on December 18, 1970, and work got underway the following month.

Late in 1969. Gulf Oil Corporation, through its subsidiary Gulf Energy and Environmental Systems, Inc., approached Allied and expressed an interest in entering the spent fuel reprocessing business. Subse quent negotiations led, in February, 1970, to the formation of Allied-Gulf Nuclear Services (AGNS), a 50-50 partnership. In 1974, with the formation of General Atomic Company as a partnership of Gulf Oil Corporation and Scallop Nuclear, Inc. (a Company the Royal Dutch/Shell Group), the AGNS partnership name was changed to

Allied-General Nuclear Services

The initial cost estimate for the Barnwell plant was about \$90 million with commercial operation scheduled for 1974. Construction of the fuel receiving and storage, separations, and UF. facilities was completed in 1975. Continued regulatory changes and fundamental governmental uncertainties related to plutonium recycle, safety, safeguards, waste packaging, waste form, and ultimate waste disposal made it impossible for AGNS to continue with the design of the plutonium processing facility and waste so lidification facility. By 1975 design of the waste and plutonium facilities was halted pending resolution of regulatory and policy issues

In 1975, a proposal was submitted by AGNS to the Energy Research and Development Administration (ERDA) to have these additional facilities constructed by the Government as first of a kind demonstration fa-

With President Carter's indefinite deferral of commercial reprocessing in 1977, any chance of proceeding on a commercial basis was precluded. Since this deferral, Congress has supported a modest R. & D. effort at Barnwell with a view to maintaining the option of using the facility productively in the future.

What exists at Barnwell today is the largest modern spent fuel reprocessing facility in the world. The spent fuel pool is completed and can be available for storage with the installation of new racks, a security system, and other minor modifications. It is often overlooked that the plant is presently capable of performing the same reprocessing functions as are currently in operation at all the foreign and U.S. Government reprocessing plants, including the neighboring Savannah River Plant, which has operated successfully and safely for over 25 years.
On April 7, 1981, Allied Chairman Edward

L. Hennessy, Jr., wrote to Secretary Edwards and advised the Secretary that: "As of December, 1978, we and our partners had invested over \$362 million in this project. We have had no return on that very large investment because the Government has prevented us from operating the plant.

PROSPECTS FOR FUTURE INVESTMENT IN THE BACKEND OF THE FUEL CYCLE, PARTICULARLY NUCLEAR FUEL REPROCESSING

Prospects for further private investment in nuclear fuel reprocessing are so bleak as to be non-existent. The uncertainties are simply too great. The first major uncertainty for the future of commercial reprocessing and the utilization of plutonium was introduced by the 1974 decision of the Nuclear Regulatory Commission (NRC) to require a Generic Environmental Statement on Mixed Oxide fuel (GESMO) before allowing the widespread use of mixed oxide plutonium fuel. While this decision did not necessarily foreclose licensing of commercial reprocessing plants, it turned out (after court, review) that the practical effect has been to make licensing contingent on completing GESMO.

On October 28, 1976, a new deterrent to commercial reprocessing occurred when President Ford issued a Nuclear Policy Statement. In this statement President Ford concluded that:

"I have decided that the United States should no longer regard reprocessing of used nuclear fuel to produce plutonium as a necessary and inevitable step in the nuclear fuel cycle, and that we should pursue reprocessing and recycling in the future only if they are found to be consistent with our international objectives."

Up until this point, commercial reprocessing had been regarded as an expected step in the nuclear fuel cycle. The Ford statement questioned this presumption, but did not constitute a definitive judgment against reprocessing, and the GESMO proceeding continued.

On April 7, 1977, President Carter's policy statement on nuclear power terminated future prospects for commercial reprocessing. In his policy, President Carter stated that: "* * * We will defer indefinitely the commercial reprocessing and recycling of the plutonium produced in U.S. nuclear power programs."

Furthermore, he stated: "From my own experience, we have concluded that a viable and adequate economic nuclear program can be maintained without such reprocessing and recycling of plutonium. The plant at Barnwell, South Carolina, for instance, will receive neither Federal encouragement nor funding from us for its completion as a reprocessing facility."

In implementing the Carter administration's policy of indefinite deferral of commercial reprocessing, the NRC, on December 23, 1977, issued an order which terminated its GESMO proceedings as well as the specific licensing proceedings on the Barnwell reprocessing plant. In connection with this order, the NRC Commissioners noted that future licensing of the BNFP would require reversal of the Carter Administration policy following completion of the two-year International Nuclear Fuel Cycle Evalua-tion (INFCE) and subsequent licensing hearings estimated to require an additional two years. The INFCE concluded in March 1980 and the consensus of the nations involved was that reprocessing development is essential for waste management and to support breeder reactor programs.

In addition to these major uncertainties raised by governmental policy decision, the economic viability of reprocessing plants for the private sector has been jeopardized by delays in bringing light water reactors on line and uncertainties about when commercial breeder reactors will be introduced.

While the Reagan administration supports reprocessing, the political and eco-nomic uncertainties demand government ownership of reprocessing facilities. Other nations reached this conclusion long ago.

Allied Chemical Nuclear Products, Inc., a wholly owned subsidiary of Allied Chemical Corp. and General Atomic Co., a partnership of Gulf Oil Corp. and Scallop Nuclear, Inc. (a company of the Royal Dutch/Shell group).

REVIEW OF POLICY AND REGULATORY ISSUES THAT ARE OBSTACLES TO PRIVATE INDUSTRY

The backend of the nuclear fuel cycle has become so entwined with state, national and international jurisdictions and environmental, energy, and security policies that no realistic combination of circumstances could make private reprocessing practicable.

Above all, Federal interests and policies with respect to reprocessing are dominant and clearly override any private investment

The government is, first and foremost, the regulator and licensor with the power to change the rules every Congress and every administration. President Carter changed the rules in 1977 and put the private sector out of the reprocessing business. The same

thing can happen again. Even before the Carter decision to halt reprocessing, it was apparent that the inability of the government to develop a regulatory framework for solidifying and shipping plutonium and wastes was a major impediment to the BNFP's operation. The same impediments still exist today. In the absence of criteria which must be developed by the government, it would be impossible for any private company to be licensed for plutonium or waste solidification. Resolving the GESMO issues alone would take at least several years if the GESMO proceedings were to be reactivated. And the absence of tested licensing criteria could add more years during the normal six-year design and construction time for the additional facilities. The simple fact is that no private investor can possibly predict whether, or when and under what conditions, licensing of a reprocessing facility would be allowed to proceed. Certainly the process would span several Congresses and administrations and probably several Nuclear Regulatory Com-missions with all the opportunities for policy and regulatory changes inherent in such exposure.

The incentive for private investment in reprocessing is even further reduced by the fact that the government will be the only customer for the plutonium recovered through reprocessing in the foreseeable future. Originally, it was planned that plutonium from Barnwell would be recycled in light water reactors. With the uncertainty created by the GESMO, this option is not available at the present time. A higher priority is to provide plutonium fuel for breed-

The decision to fund Clinch River makes reprocessing at Barnwell essential, unless the Administration intends to import plutonium. Reprocessing of LWR spent fuel at Barnwell is essential to satisfy plutonium feed requirements for this program. There is no other source for the feed and the feed should be ready in advance. The entire output of the Barnwell Plant for the first several years would be required to fuel the Fast Flux Test Facility (FFTF), the Clinch River Breeder Reactor (CRBR), and a followon larger demonstration breeder reactor now being planned. Since these are all to be government programs, the government is the only near-term customer for the pluto-

nium to be recovered at the Barnwell Plant. In addition, the government's dominant role in national security and non-proliferation concerns which increasingly affect reprocessing plants creates additional profound doubt about a private role in reprocessing. There is a growing consensus that reprocessing plants require extraordinary safeguards against proliferation of nuclear weapons. The Nuclear Non-Proliferation Act of 1978 has already underscored the

Federal government's virtually total control over reprocessing and this trend will probably continue. While the need for governmental control is understandable, this is one more circumstance which makes private investment commercially impracticable. It is not surprising that reprocessing plants abroad are all owned by government authorities.

OTHER RESOURCES WHICH WOULD ENCOURAGE PRIVATE INVESTMENT IN NUCLEAR FUEL RE-PROCESSING OPERATIONS

The owners of the BNFP cannot envision any form of government support which would remedy the effects of existing prohibitions against private reprocessing.

There is no way that the government can make a private business out of what is a public business.

Furthermore, there is no way that the government can guarantee against new policy changes.

There is no way that any administration can guarantee a continuing regulatory environment which will bring a reprocessing facility into operation within a reasonable period. Moreover, the widespread skepticism and lack of confidence in the regulatory process have introduced additional uncertainties of major proportions.

This is not a situation where devices for government support like loan guarantees or price supports will be effective. The necessity for Federal regulation and control is so great that the traditional forms of government support for private ventures would not be sufficient to attract private capital to reprocessing.

CONCLUSION

In conclusion, it should be emphasized that President Carter's 1977 decision to defer commercial reprocessing and the administrative and judicial implementation of that decision effectively terminated the prospects for private investment in reprocessing. Consequently, the owners of the BNFP cannot in fairness to their shareholders provide any additional funding to maintain the current R&D program, to invest in additional facilities at the site or to attempt to operate the BNFP on a commercial basis. Furthermore, there is no foreseeable combination of regulatory reform and Federal policy initiatives which would be sufficient to remedy the commercially impracticable aspects of the presently existing situation.

This paper has described the many risks and uncertainties facing any private investor in the back end of the nuclear fuel cycle. Although Federal ownership of the BNFP is essential under these circumstances, it does not follow that the costs of developing and operating the BNFP must be borne solely by the Federal government. To the extent that the government might decide to use the BNFP for services to utilities, like reprocessing and spent fuel storage, appropriate fees would be charged to utilities to recover the cost of these services.

There are many advantages to the government once the BNFP is acquired. For example, the facility can be used as an international fuel cycle center, as a safeguards research, development and training center, as a regional site for interim spent fuel storage or possibly even as an integral part of the defense materials production program. These uses can only occur under government ownership.

Despite the best efforts of the owners the Barnwell facility has been in a holding pattern for six years. The facility has received modest government support for reseach and development activities, but such support is presently to expire on September 30, 1981. Unless a decision on government acquisition is made very soon, the most likely result is that the Barnwell facility will have to be shut down: an irretrievable step which would represent the permanent loss of a unique and valuable facility.

INEFFECTIVE WORKER IDENTIFICATION

HON. JAMES H. SCHEUER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES Tuesday, August 4, 1981

• Mr. SCHEUER. Mr. Speaker, Attorney General William French Smith succinctly described the severity of one of our Nation's gravest problems when he announced the administration's new immigration policy. "We have lost control of our borders," he said. "We have pursued unrealistic policies. We have failed to enforce our laws effectively."

Ironically though, the fatal flaw of past immigration policies—the absence of an effective worker identification system for distinguishing illegal aliens from employees who are working here legally—is left unchanged by the administration's plan. Without such a system, no sanctions against employers who hire those illegal aliens can possibly work; and without effective employer sanctions, the job magnet that pulled more than a million illegal aliens to our shores last year will continue to overpower our best efforts to make those borders real.

To be sure, the administration's plan calls for penalties against employers of illegal aliens; but in order to protect themselves from sanctions, employers would merely be required to check for any two of the following forms of identification before satisfying themselves of the legal status of prospective workers: a driver's license, a social security card, a birth certificate or a draft card.

Mr. Speaker, a package containing each of these forms of identification, along with several years of rent receipts, can be bought in any town on either side of the Mexican border for something in the neighborhood of \$50.

The administration plans to build a house of forgeable identity cards that is certain to collapse of its own weight. Simply put, employer sanctions are a vital element of an effective program to check the flow of illegal immigration; and employer sanctions are a paper tiger unless we establish a forgery-resistant identification system to make them meaningful.

Several options are possible.

We could set up a system of computer-stored worker identification numbers. Every worker in America would be assigned a number. Employers could then phone a central computer terminal to verify the authenticity of a worker's number.

Alternatively, each worker could be issued a forgery-resistant identification card bearing a magnetic code similar to those that appear on credit cards. Employers could then verify the authenticity of such cards just as merchants now do in the course of credit card sales transactions.

It has been estimated that such a card system would cost about \$300 million—\$3 per card for each of our country's 100 million workers. That is a significant investment; but in light of the billions of dollars that illegal immigration costs our country, and in light of the untold social, economic, and political strains that the growing flood of illegal immigration imposes on our society, this would be a very wise investment indeed.

There are those who have reservations concerning the civil liberties implications of such a system; but why would a forgery-resistant card pose any greater threat to civil liberties than the easily counterfeited social security card we already require our workers to hold? Other Western democracies such as France and West Germany, already have such systems in place with no adverse effects on the rights and liberties of the card hold-

Moreover, it would not be necessary to establish an identification system for all of our citizens and legal aliens. We need only identify workers-not the elderly, not the infirm, not the very young, not women who do not work outside the home—just workers.
Only with such a reliable worker

identification program in place can we hope to control the influx of millions of illegal aliens whom we have been unable to assimilate or absorb into the mainstream of American life. The alternative is a continued strain of huge proportions on our job market, on social services, and on the scarce resources which we have a moral obligation to employ for the benefit of our own poor and disadvantaged citizens.

This Nation is indeed a nation of immigrants. Over the centuries, new waves of immigrants have sustained and enriched our national life. A reasonable, measured, and carefully controlled program of legal immigration continues to be in the best interests of our country and in the best traditions of our society; but the current flood of illegal immigration is simply intolerable.

The President's new immigration policy contains elements which are a improvement over existing policy. Chief among these is its emphasis on hardening our borders and making them real. Unfortunately, that border-hardening effort is doomed to failure unless we accompany it with an employer sanction program tough enough and effective enough to shut off the job magnet and thus to lessen the attractiveness of illegal immigration into the United States. As long as those jobs continue to lure the developing countries' poor, only the Berlin Wall would suffice as a barrier.

I applaud the administration's determination to regain control of our borders; but until we face up to what it will take to accomplish that mission, appealing rhetoric will continue to bear a hollow ring.

CONGRESS SHOULD SUPPORT THE CONTINENTAL ESOP

HON. LES AuCOIN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

Mr. AuCOIN. Mr. Speaker, the Senate version of the tax bill contained a number of provisions designed to encourage the formation of employee stock ownership (ESOP's). Among them was an amendment specifically relating to the ESOP of Continental Airlines. Unfortunately, in the give and take of the conference, the amendment was lost, However, Congress may have another opportunity to consider this matter and I rise today to urge that it do so favorably and as soon as possible after the August district work period.

Continental has been seeking to implement an ESOP since March as a way of improving productivity, addressing serious problems of capital formation and meeting the challenge of airline deregulation. The plan has survived challenges before the Securities and Exchange Commission and the Civil Aeronautics Board, as well as U.S. District Court in Los Angeles, the U.S. Court of Appeals and the Superior Court for the State of California. Most recently, however, the California corporations commissioner blocked implementation of this plan in spite of overwhelming support for it by the company's directors and 11,000 employees. The Senate amendment seeks to overcome this obstacle by making clear that the statute regulating such the Employee Retirement Income Security Act of 1974, supersedes State laws.

My interest in this effort is shared by the 42 Members of the House who signed a letter from the House Task Force on Industrial Innovation and Productivity to the CAB in April endorsing the plan. I ask unanimous consent to insert that letter in the RECORD at this point.

HOUSE TASK FORCE ON INDUSTRIAL INNOVATION AND PRODUCTIVITY, CONGRESS OF THE UNITED STATES, Washington, D.C., April 28, 1981.

Hon. MARVIN S. COHEN. Hon. GLORIA SCHAFFER. Hon. GEORGE A. DALLEY, Hon. ELIZABETH BAILEY, Hon. JAMES SMITH. Civil Aeronautics Board, Washington, D.C.

DEAR MEMBERS OF THE BOARD: The employees of Continental Airlines have just voted by an overwhelming margin—8,932 to 359 to establish an Employee Stock Ownership Plan which would buy a controlling interest in the airline. We believe that the plan of Continental's employees is a significant milestone in the renewal of American business through increased productivity and capital formation.

Earlier this year, Texas International Airlines sought permission from the Civil Aeronautics Board to purchase 48.5% of the common stock of Continental Airlines contingent on placing the stock in a voting trust. The CAB granted permission on the terms requested, and Texas International purchased the stock. Now Texas International has filed a petition to modify the CAB's order, entered at its own request, for no apparent reason other than to kill the Continental Employee Stock Ownership Plan.

We are writing as members of the House Task Force on Industrial Innovation and Productivity to urge that the Board deny Texas International's petition and allow the employees to buy control of Continental.

During the 1970's Americans reduced the amount of savings which they devoted to business capital formation. The Congressional Budget Office has pointed this out as a major factor in declining productivity.

The Continental Employee Stock Ownership Plan would counter this trend with a practical demonstration of supply-side economics: Continental's workers propose to allocate \$185 million-15 percent of their pay over the next four or five years-to doubling the airline's capital stock. The employees investment would leave the company in an excellent position to buy more efficient, innovative equipment at the appropriate time. (To date, Texas International has not proposed to add anything to Continental's capital stock. Rather, it proposes adding \$93 million in debt to finance the cost of its takeover.)

Efficient workers are as important to productivity as capital formation. The American airline industry can take one of two courses in order to make more efficient use of labor. Texas International has effectively pursued one course-spinning off the assets of its parent corporation to start New York Air, a new carrier with less restrictive work rules and lower wages.

If the airline industry as a whole pursues this course, the nation will have to bear substantial costs-in the short run, unemployment compensation and other payments (potentially billions of dollars under Section 43 of the Airline Deregulation Act) to the employees of existing carriers; in the long run, a costly series of futile strikes by unions alarmed at their shrinking share of the industry base (see example of the United Mine Workers).

Employee ownership of Continental would offer the airline industry a second course toward a more efficient work force, at less cost to the nation than Texas International's course. The President's Commission for a National Agenda for the 1980's has singled out Employee Stock Ownership Plans as an important incentive to worker cooperation with management and greater productivity.

Everyone involved in the debate on airline

deregulation-proponents and opponents

alike—agreed that deregulation must be effected by a period of transition. Everyone agreed that the carriers and their employees, nurtured in a hothouse of government regulation for forty years, could not be expected to adjust overnight. For example, the Senate Commerce Committee reported

A crucial element of the present bill is the gradual phasing in of its key provisions. The Committee accepted without controversy the principle that a transition period should be provided to airline companies in order to allow them time for adjustment before the full force of the new regulatory system is felt. . . . The Committee believes that Congress, having acted to prevent the normal free market evolution of the industry, now has a duty to the industry and its employees which would not exist if such action had not been taken. In order for Congress responsibly to change its policy now and require the industry to move forward to much more competitive market oriented environment, Congress should attempt to minimize the dislocations caused by the change. The change in policy and the temporary dislocations it may cause would not be necessary if Congress had not left in place so long a regulatory framework designed for the condi-tions that existed in the 1930's. (Amending the Federal Aviation Act of 1958, Senate Report 96-631, 95th Congress, 2nd Session, February 6, 1978.)

The employees of Continental have developed a plan pursuant to which they are willing to sacrifice 15% of their earnings and will commit to working harder and smarter to increase their productivity to insure their airline's successful transition. Fairness demands that they be given the chance to try.

We ask that the Civil Aeronautics Board give Continental's employees a chance to succeed by refusing to dissolve a standard voting trust which it has required in other merger cases—denying special treatment to Texas International.

Sincerely,
Pat Schroeder, Robert Dornan, Norm
Dicks, Thomas J. Downey, Robert Lagomarsino, Don Bailey, Gerald Solomon, Morris Udall, Berkley Bedell,
Tom Lantos, John Conyers, Jr., Stanley N. Lundine, Anthony Toby Moffett, Ron Wyden, Les AuCoin, George
Brown, Joel Pritchard, Harold Hollenbeck, Cecil Heftel, Eugene Atkinson,
Don Clausen, Clair Burgener, Dan
Glickman, Ray Kogovsek, Ed Jenkins,
Tom Harkin, Bob Edgar, Richard A.
Gephardt, John Seiberling, Edward J.
Markey, Richard Ottinger, Michael
Lowry, Barry Goldwater, Jr., Wes
Watkins, Trent Lott, William Brodhead, Martin O. Sabo, Bob Stump,
James J. Howard, Al Swift, Don Edwards, Robert A. Young.

As you see, the signers of this letter believe the Continental plan is a significant milestone in the renewal of American business, an opportunity for dedicated people to show the country that by themselves they can solve their company's problems of productivity and capital formation.

The Senate amendment would have allowed this effort to move forward by making clear that the Continental ESOP has satisfied all relevant requirements of Federal law and could not be killed by the imposition of an

endless series of possibly conflicting State regulations. It would reaffirm Congress traditionally strong support for the ESOP concept. I regret that the amendment was not agreed to; but I remain hopeful that other efforts by the employees of Continental will be successful and stand ready to support them.

A NATIONAL POLICY ON FOREIGN STUDENTS

HON. HENRY J. HYDE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. HYDE. Mr. Speaker, as the administration proposes a new immigration policy, it is vital that we include a policy concerning foreign students. They are a part of our problem and, recently, Journalist Georgie Anne Geyer wrote an incisive article on this issue. I commend it to my colleagues:

NEEDED: NATIONAL POLICY ON FOREIGN STUDENTS

(By Georgie Anne Geyer)

Washington.—The world's tired and hungry and those "yearning to be free" still are struggling to the United States. Among them is a new group whose presence is creating myriad new problems for America.

It consists of the 300,000 foreign students now in the United States, a number that soon could soar to half a million. In Southern California community colleges, 15 to 30 percent of the students now are foreigners. Thirty-five percent of the total are from OPEC countries and 24 percent are from

Iran and Taiwan, two countries we do not even have official relations with. Indeed, a new Iranian problem is coming to the fore as federal officials investigate

thousands of Iranians here on counterfeit study and work documents.

Though there is a prevalent idea in the Third World that America owes these students an education and should take them tuition-free, the massive influx of foreign students actually brings in about \$2 billion a year. Nevertheless, these students pay only about 60 percent of their costs; taxpayers are subsidizing almost all of them, particularly at state schools.

It is time, then, that we forge some national policy on foreign students. And a group of leading educators is trying to do just that.

"We have to ask, what is our national policy?" says Richard Berendzen, the dynamic young president of American University. "I think we have to develop a global concern.

"The immigration situation and the foreign student situation are intimately linked. I don't know if the American people really understand the momentum of what is happening here. We are becoming a global village."

Berendzen heads the National Commission on Foreign Students and Institutional Policy, an adjunct of the American Council on Education. The commission is trying to hammer out policy directives for the future. But what should they be?

In formulating these directives we should keep in mind these risks:

keep in mind these risks:

The first danger is that we let the influx of foreign students add a further disintegrative note to an American society already divided by other immigration difficulties. Any responsible nation should know who is actually in that nation, and where and why.

The second danger lies in accepting students as if we were a kind of technology drugstore and nothing more. Every foreign student should be required to know or study English (something many, ironically, now complain about) and to take an appropriate amount of American Studies courses. It is crucial that this country not be perceived as a country without pride in its institutions and ideas; it is crucial that foreign students know what we stand for.

Third, we must clean up the misleading

Third, we must clean up the misleading "come-ons" of colleges needing students, not to speak of such outright corrupt practices as issuing false documents to being foreign students here.

Given these long-overdue clarifications, we should welcome foreign students even more generously than before—and learn from them while they are here.

Berendzen's "global village" is indeed upon us. We need to be clear about the law and principles that allow us to live sanely and with civility within that global village.

SPEECH BY THOMAS KEEFE

HON. MIKE LOWRY

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. LOWRY of Washington. Mr. Speaker, I would like to take this opportunity to share with my colleagues the text of the commencement speech delivered by Thomas Keefe, Sr., at St. Martin's College earlier this summer.

St. Martin's, located adjacent to the capitol of Washington State, Olympia, provides the type of atmosphere that allows students to develop a philosophy of life as well as the technical skills necessary to earn a living. Mr. Keefe inspires those graduating seniors to review and analyze the rhetoric of the time, applying the lessons of history so they may avoid the errors and transgressions of the past. As he states in his address, our system will survive and flourish if our young people become active participants in it.

OUR SYSTEM WILL SURVIVE AND FLOURISH— COMMENCEMENT SPEECH BY THOMAS KEEFE

Abbott Adrian Parcher, Dr. John Ishii, Sister Katherine Gray, members of the faculty, parents, relatives, and friends of St. Martin's College, graduating seniors: I am deeply honored at being asked to address the graduating class of 1981. In looking for prospective material, I came across the address that Art Buchwald, nationally syndicated humorist, gave at the commencement at Georgetown Univesity in 1980. And I quote: "No one remembers a year later what the commencement speaker said and only a few remember who it was. I only hope that when you're asked who gave your commencement address, you'll remember that it was a short, fat fellow who made you laugh."

Anatomically, I don't fit the physical description, and I've been warned by my children, including my youngest daughter, Molly, who is a freshman here, not to attempt any jokes. So, I'm on my own.

This is a time to be Glad and a time to be Sad.

For the parents and relatives of the graduating seniors, it's particularly a time of joy. This day represents the achievement of goal in which they are vicarious participants. A goal which has been achieved by your efforts and by considerable sacrifice on their part. In many instances, by sacrifices of which you are unaware. Like when they bit their lips in silence when you came home at the end of your sophomore year, the selfproclaimed possessor of all worldly knowledge, which you freely distributed without request, but without reservation. Today they justifiably take pride in your accomplishments. You have reached one of your major objectives and the future is yours

For you graduates the joy of completion is tempered with the sorrow of parting. It is extremely unlikely that you will ever again all be together as a group. Yet each of you will carry a common bond indelibly imprinted by your association with each other and your participation as a member in the Benedictine community with its 1,500-year-old

A Benedictine college offers the student something that no secular college can—a way of life. It's not enough to merely equip the student with the technical tools to earn a living. The student must receive a philosophy of life in which concepts of social justice, moral responsibility and charity have meanings and purpose. This is where the Benedictine Abbey and the lay faculty who, at considerable personal sacrifice, join that community, and give meaning and purpose

to St. Martin's College.

This is my Quadragesimo Anno. Forty years ago, I was a member of the second graduating class of St. Martin's College. Since then, I have attended four universities located in widely separated geographic locations in the United States, and have been associated with hundreds of individuals who have attended practically all of the major universities in this country. As a result of that experience, and using that great gift of hindsight, I can say without equivocation that if I had it to do over, I would choose St. College for my undergraduate work. There is a personal relationship here that exists between the faculty and student that fosters the fullest development of both. It is a relationship that cannot exist in larger institutions because of their size, and does not exist in secular institutions because of their failure to seek the development of the spiritual side of the student. At some point in everyone's life there occurs an event, an awakening, or the influence of anperson which in retrospect they regard as the key point in shaping or directing their life's career. Looking back, I find that Father Thomas Hanley, who was the head of the Political Science Department here at St. Martin's, was that factor in my life. When I asked my eldest son Rob, who practices with me, that person or event in his life, he immediately named Dr. Mike Contris. In like manner, my son Tom named Father Jerome Toner and my daughter Joanne, who transferred after two years so she could pursue a nursing education, named Father Killien Malvey. I am certain that other faculty members both in the past and present have had similar effect on former students and on many of you here today.

In leaving St. Martin's, what does the future hold in store for you? What can you do? What should you do? Last week, the front page of an issue of the Seattle Post-Intelligencer demonstrated how little times have changed in the last forty years. One headline read-"Draft Board Being Set Up" another—"Wider Military Role is Outlined for U.S." Forty years ago, members of my graduating class of '41 were registering for the draft and witnessing the military buildup of America.

This is a time to reflect: What can you do to improve the social order?

The two greatest threats to the continuation of our form of government is not foreign intervention-nor internal disruption by persons or parties espousing an anti-American philosophy. We have had these two scapegoats used by both major political parties over the last fifty years as a matter of political expediency. These myths, when confronted and exposed to the scrutiny of objective analysis, have vaporized.

Today once again we are being told that bombs, not butter, must be our chief priority. We are being asked to tighten our belt in order to support a defense budget of \$136 billion dollars. We are told of the great waste in our social programs to aid the underprivileged, aged and handicapped, yet not one word is uttered about the waste and inefficiency rampant in our military-indus-

trial complex.

However, the greatest threat that is daily growing larger on the horizon is the return to McCarthyism in the name of national security. Dissent cannot and must not be equated with disloyalty. Fundamental constitutional rights of the individual must not be infringed upon. Our Constitution is probably the greatest political document ever drafted. Yet we cannot close our eyes to the weaknesses and shortcomings of our government and its leaders when they fail to live up to the high ideals set forth by the founding fathers. In the early 1940's, my generation and its leaders, with hardly a word of protest, by two separate acts, forfeited America's right to sit as unbiased, impartial judges of international morality. They first summarily rounded up and interned loyal Americans because by birth they were of Japanese descent. In April, 1945, one bomb in a time span of minutes killed over 50,000 civilians at Hiroshima, the Christian center of Japan. Contrast that with the handful of civilians killed in the attack on Pearl Harbor. We opened the Pandora's box of nuclear power and now humanity is paying the price. It's little wonder that other nations sometimes question or suspect our mo-

Peaceful protest and opposition to government programs or edicts when indicated is not only proper, but makes for a more healthy political system. It also can occasionally cause personal inconvenience. Four years ago, on my return home in the late evening hours from the annual Washington State Bar Convention in Spokane, my wife Anne and I were greeted by my second daughter Laurie, and I routinely inquired:

Q. "How are you?

A. Fine.

Q. Where are your sisters?

A. In jail.

Q. Oh, that's nice-WHAT?!"

It's true you can turn white not only in a single night, but immediately.

Then the story unfolded-my remaining four daughters, ranging in age from Molly, 13, to Joanne, 23, had participated in the protest at the Trident Base and had been arrested for trespassing and were then housed in the Federal jail in Tacoma. During my midnight drive over to obtain their release, I kept wondering why they couldn't protest at a more convenient time or hour. Unfortunately, meaningful protest cannot always choose the desired time or

Our right to know so that we can make our voices heard is a very precious and valuable right. The Freedom of Information Act of 1966 makes federal agencies' files-subject to certain guidelines and exceptionsavailable to the public. That right of access has been limited by a recent executive

Our form of government is not perfect, nor will it ever be, since its operation depends on human beings. However, it is far superior to any other form of government in the world today. The threat to its continuance comes not from without, nor from political activity from within, it comes from too much apathy and too little accountability. Your generation is particularly subject to indictment. Only 35 percent of the eligible voters in the 18 to 20 age group voted in 1980. Unless you graduates revitalize our political process, both on the local and national level, we are going to witness further erosions of our system.

Overall, in 1980, only 53.95 percent of the eligible voters in the U.S. cast their ballot, resulting in President Reagan being elected by a mere 27.38 percent of those eligible to vote. Contrast that with last Sunday's election in France where 86 percent of the eligible voters went to the polls. Regardless of your political affiliation, you have a duty to participate. I'm sure that a show of hands as to who participated in their precinct caucus to choose their candidate for the presidency would draw little response. Yet while we do nothing, single issue power groups can and do determine our political programs. Moneyed interests from outside our state have even effected who represents us in Congress. A recent member of Congress from this state, not presently serving, was elected with campaign contributions from outside our state, of over \$250,000. Single issue organizations, when they join forces with other similar groups in support of a candidate or a cause, are a potent and dangerous political force. The problem is as prevalent on the state level as it is on the national. Congress will soon be faced with the continuation or scrapping of such key legislative enactments as the Clean Air Act and the Voting Rights Act, both of which will have major long-run impact on our society. You cannot afford to sit silently by. You must actively participate in our political system. Your voice must be heard.

On the national level, the present catch phrase is: "Get Government Off the Back of Business"

Shall we do away with:

Child labor laws?

The minimum wage?

The Flammable Garment Act (which has saved untold hundreds of infants from painful deaths)?

Miners Safety Act?
Occupational Safety and Health Administration (OSHA)?

Federal Trade Commission?,

and I could go on endlessly. All were government enactments to regulate and police areas where private industry either failed or refused to act.

Last week, after three years of periodic work, I settled a case for a 22-year-old quadraplegic. His accident could have been prevented by an expenditure of \$.68 for a covered limit switch on a machine which cost \$196,668.00. Our present OSHA (Occupational Safety and Health Administration) regulations, which are now under attack, would have required this switch had they been in effect at the time of the accident. Certainly, there are abuses of overregulation in many areas, and there should be changes or modifications where there has been demonstrable harm. But to scrap a social philosophy which aims at protecting the uninformed consumer, or those unable to protect themselves, under the generality of "Getting Government Off the Back of Business", is unconscionable.

In addition to becoming activists, you must demand accountability. It is not enough to elect a qualified candidate; you must examine the voting record. How many know the voting record of their legislative representative during the last session in Olympia on such issues as interest rate increase, care for the elderly, environmental impact, a constitutional convention, to name a few? Yet without holding those elected accountable, we either vote for them again because of name association or party affiliation or, worse yet, fall to vote.

Neither major party has a monopoly on virtue nor is it the sole offender. Watergate, Abscam, and Gamscam should not be "put behind us", as some politicians have suggested. Rather, they should be reviewed and rehashed so that the lessons we learned of dishonesty, lying, cheating, and immorality will not be repeated by our elected representatives.

Our system will survive and flourish if you graduating seniors become active participants in it. We must get rid of apathy and demand accountability. St. Martin's has provided you the educational foundation. Now it's up to you to act. The future of America is in your hands.

ANOTHER STEP TOWARD THE ELIMINATION OF SEX BIAS IN THE UNITED STATES CODE

HON. JOHN D. DINGELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. DINGELL. Mr. Speaker, I have today introduced a bill, which is being cosponsored by the chairmen of the committees and subcommittees that will be considering the bill (Messrs. JAMES J. HOWARD, GLENN M. ANDERson, and James J. Florio), to elimivarious gender-slanted words nate from the Interstate Commerce Act. This bill, originally prepared by the Interstate Commerce Commission, will make the legislative revisions needed to implement the recommendations by the U.S. Commission on Civil Rights in its 1977 report ("Sex Bias in the United States Code"), and subsequently in a Presidential memorandum issued on August 26, 1977, to the heads of all executive departments and agencies.

Congress has enacted various laws in the past several years which included many of the revisions recommended by the Commission on Civil Rights.

However, there are still many provisions in the United States Code with gender-slanted language that produce discrimination on the basis of sex, sometimes against women, and some-

times against men.

We commend the Interstate Commerce Commission for reviewing the laws it administers and recommending revisions to eliminate gender-slanted words in the Interstate Commerce Act. We urge other agencies of the Federal Government to do likewise, regarding the laws each of them administers. The Congress will be glad to do its share in this task of cleansing sex bias out of the United States Code.

OMNIBUS BUDGET RECONCILIATION ACT OF 1981

HON. ROBERT W. KASTENMEIER

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 1981

• Mr. KASTENMEIER. Mr. Speaker, one of the issues which could not be resolved in the reconciliation conference (H. Rept. 97-208) was the extension of the authorization for appropriations for the Legal Services Corporation (LSC). Section 1137 of the Senate version of the reconciliation bill (H.R. 3982) contained an extension of authorization for appropriations for LSC for fiscal years 1982 and 1983 at \$100 million for each year. The House version of the reconciliation bill was silent on LSC. As a result of the conference, the Senate receded to the House on this issue, which was contained in miniconference No. 45.

There is some confusion by at least one Member of this body as to the effect of this conference agreement. The gentleman from Wisconsin (Mr. Sensenbrenner) in a colloquy on July 30 with the gentleman from Iowa (Mr. Smith) on the subject of House Resolution 188 erroneously claimed that the reconciliation package had a zero amount for LSC. The gentleman from Iowa (Mr. Smith) corrected him by noting that the reconciliation bill was silent on the subject, and did not zero fund the Corporation. I would like to associate myself with the remarks of the gentleman from Iowa (Mr. Smith)

on that point.

Legislation to extend the authorization for appropriations for LSC for future years is very much alive. This body spent 3 days considering a reauthorization bill (H.R. 3480) which was passed on June 18 with strong bipartisan support, 245 to 137. That bill contained over 20 new restrictions to the Legal Services Corporation Act.

It is expected that the other body will process H.R. 3480 or in its stead its own reauthorization bill (S. 1533) in September. A report on S. 1533 was filed on July 29 (S. Rept. 97–171), and

indicates a strong commitment by the other body to process S. 1533 in order to preserve the Corporation. The ranking minority member of the Committee on Labor and Human Resources in the other body (Mr. Kennedy) has publicly stated this commitment today. Differences between the House and Senate authorization bills would be resolved in conference.

In some ways it is unfortunate that the authorization bill could not have been incorporated into the reconciliation bill. On the other hand, the normal course is to handle such legislation as a distinct bill. Separate consideration will allow the committees of jurisdiction time to work out their dif-

ferences carefully.

One final point should be made on the interaction of H.R. 3480 and the budget process. H.R. 3480 extends the authorization for appropriations for LSC for 2 more years at \$241 million for each year. This represents a 25percent reduction in funding. An appropriation bill in this body (H.R. 4169) would appropriate \$241 million for fiscal year 1982. Both bills are within the budget allocation totals under 302(b) of the Budget Act which were filed by the Committee on Appropriations on June 11, 1981 (H. Rept. 97-139). In the early warning report filed by the Committee on the Budget on July 28, 1981, it was noted that H.R. 4169 was equal to the 302(b) target for the Subcommittee on Commerce, Justice, State, Judiciary in budget authority and \$18 million below in outlays. That subcommittee has assumed a \$241 million appropriation for LSC in its budget allocation of billion-budget authority-and \$8.7 \$9.9 billion-outlays. It is these budget allocation targets which are binding, not the original assumptions in the first budget resolution. Thus, both H.R. 3480 and H.R. 4169 are consistent with the budget process.

INCREASED PENALTIES FOR MARIHUANA SMUGGLERS

HON. LEO C. ZEFERETTI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. ZEFERETTI. Mr. Speaker, I have today introduced a bill to increase the penalties for persons convicted of smuggling large amounts of marihuana. This legislation is needed to close a loophole created last year when Congress raised the penalties for large-scale domestic marihuana dealers but inadvertently failed to provide similar treatment for marihuana smugglers operating off the coasts of our country.

our country.

Congress enacted two important measures last year that have given our law enforcement agencies significant

new weapons in the fight to control the multibillion-dollar illicit trade. First, a provision in the Infant Formula Act of 1980 (Public Law 96-359) raised the penalties for trafficking in more than 1,000 pounds of marihuana from a maximum prison term of 5 years, a maximum fine of \$15,000, or both, to maximum penalties of 15 years imprisonment, a \$125,000 fine, or both (double for subsequent offenses). Prior to this act, highly organized, well-financed traffickers moving tons of marihuana were subject to the same low penalties as the street-level pushers dealing in small quantities of the

Unfortunately, this measure amended only the Controlled Substances Act which applies only to domestic marihuana traffickers. It did not provide for similar increased penalties under the Controlled Substances Import and Export Act which reaches offshore

smuggling operations.

Second, Congress enacted legislation to facilitate increased enforcement by the Coast Guard of laws relating to the importation of controlled substances (Public Law 96-350). This authority has enhanced greatly the Coast Guard's ability to seize and arrest traffickers on the high seas. The penalty provisions of this law, however, incorporate by reference the penalties provided under the Controlled Substances Import and Export Thus, large-scale marihuana smugglers convicted under the Coast Guard Act are also subject only to the lower 5 year/\$15,000 penalties.

My bill amends the penalty provisions of the Controlled Substances Import and Export Act so that firsttime violators convicted for trafficking in more than 1,000 pounds of marihuana under either that act or the Coast Guard law will be subject to the same 15 year/\$125,000 penalties that now apply to large-scale domestic marihuana dealers. By operation of existing provisions of both laws, these penalties would be doubled for repeat drug

offenders.

On July 27, Senator CHILES introduced similar legislation (S. 1522) in the Senate. His bill amends the Coast Guard law passed last year but not the Controlled Substances Import and Export Act. While the increased penalties under the gentleman's bill un-doubtedly will apply to most cases of large-scale marihuana smuggling, I believe the approach incorporated in my bill is preferable because it establishes consistent penalties for this crime regardless of the statute under which a violator is convicted.

We are all acutely aware of the menaces created by the massive and lucrative trade in marihuana including increased crime, violence, and corruption. The abuse of marihuana also poses serious threats to the health and well-being of our children, the Nation's most important resource. To stem the tide of marihuana flooding our country, we must give law enforcement the most effective tools available. The legislation enacted last year and the measures approved so far in this Congress to permit increased military support for drug enforcement agencies and remove restrictions on U.S. funding for paraquat eradication programs abroad are all important steps. My amendment will close existing loopholes that allow large-scale marihuana smugglers to escape with substantially lighter sentences than they would get if they were apprehended within the United States. I urge the House to support this legislation.

ALAN EMORY'S "CHINA DIARY"

HON. DAVID O'B. MARTIN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. MARTIN of New York. Mr. Speaker, I am pleased to insert into today's Record the final three articles of "China Diary" a series by Alan Emory, Washington correspondent of the Watertown, N.Y., Daily Times and dean of the New York correspondents covering Washington. Once again, I recommend this series to all who wish to know more about the People's Republic of China.

[From the Watertown Daily Times, July 18, 19811

TOUR GUIDES VARY IN FLUENCY, SHARE CONCERN FOR CHARGES

(By Alan Emory)

PEKING.-To the guides of the China International Travel Service (CITS), telling visitors about situations that will "drive you up the wall" just as they are about to show them the Great Wall sends them into gales of laughter.

One refers to himself proudly in American

slang as a "greenhorn."

They love to joke, particularly in slang. A woman guide in Datong tried out the phrase 'big hit" and seemed greatly relieved when her audience chuckled.

One told how he had once confused the two words concubine and cucumber. That seemed pretty funny until it developed that another guide had told another group the same story of confusion. It was obviously a CITS staple.

The success or failure of a tour of a city or landmark often depends on the guide's fluency in English-that varies widely-or in the language of the home country of the group being escorted. In Xian one guide's rench for her clients seemed impeccable. Another appeared proficient in Spanish.

But another, who had just been on the job 10 days, was struggling with his English and could barely make himself understood.

The guides always ply tourists with candy. peanuts or white raisins during a trip on a bus or plane. The candy varies from haw flakes, made from a Chinese berry that is also the source of a fruit drink, to chocolate bars, to chocolate-covered malt balls, to semi-hard candies and preserved pieces of fruit. In Canton the bus fare was fresh li-

CITS provides one guide who stays with his group throughout the China tour, plus separate guides for each city. In Peking and

Xian we had two city guides.

Our all-China guide had three years of foreign language college under his belt. Only four to five per cent of middle-school graduates go on to higher education, and Chinese blame extremely difficult examinations for the relatively few persons who enter college.

Although the hours on tour are not strictly regulated, CITS guides, like other Chinese workers, normally work eight hours a day six days a week, getting Sunday off in most cases.

Also, like other workers, they are entitled to 20 days of vacation a year to visit their families if they are separated from them most of the year. They can choose their vacation time, and the work unit pays their expenses.

Pay averages \$36 a month.

The guides are not hesitant about answering personal questions, nor do they hang back in asking questions about the United States.

One guide lives with his parents and three sisters in a three-bedroom apartment with kitchen. He rode a bicycle to class about 121/2 miles away.

He is not a Communist Party member-he explains that by saying he has not "done enough" to warrant being admitted-but he says he aspires to belong and to "serve" his country and the tourists better through party membership

Sometimes they are surprising with their wry remarks, although, in a country as tightly controlled as China, there is a suspicion some of their observations have been

approved in advance. In Taiyuan, for example, our guide disclosed that there were three new hotels under construction, then added drily he did not know why because the city of 2 million inhabitants only had about 100 tourists a

day in town.

At one point the same guide pointed to a factory spewing colored smoke into the air and said it had been required to pay fines for air pollution, but they did not do any good because the plant was state-owned.

"It was just taking from one pocket and putting in another," he commented.

When it comes to history, the guides faithfully take the party line. They refer sarcastically to Chiang Kaishek as one who preferred to fight the Communists among his own countrymen, rather than battle the invading Japanese armies.

They take great delight in describing Chiang's flight to escape capture in Xian, leaving behind his false teeth and most clothes, and how he was caught trying to hide in a cave in the hills that was too small for his body, so his exposed derriere gave him away.

They provide a straight propaganda line about how the cultural revolution was led by a bunch of "crazies," but even though Mao Zedong was in power at that time they still refuse to blame him outright and insist he had not done a bad job.

'Without Mao there is no New China,"

one guide said firmly.

They perform tasks like explaining the plots of opera, helping to recover items left behind by forgetful tourists, expanding the limited Chinese vocabulary of visitors, interpreting in stores, hotels and places of historical interest.

And, at the end, each country guide feels he has made a group of new friends.

Friends is the key word.

Almost every time a guide addresses his group he starts, "Friends. . . ."
And it did not take the magnificent pic-

ture book that Luo Wei Xien's group gave him to make it sound like he meant it.

[From the Watertown Daily Times, July 20, 19811

HONG KONG A BUSTLING CONTRAST TO CHINA (By Alan Emory)

Hong Kong.-Hong Kong is a hustle set in the midst of a traffic jam.

Or vice versa

When a tourist leaves China he can exchange his excess Chinese money-but only into Hong Kong dollars-about five Hong Kong dollars to one American.

The change from China is visible almost immediately. As the train crosses the border into the New Territories the picture is one of construction activity. Where automobiles are something of a rarity in China, they are a regular sight in the New Territories.

There are actually three sections to what is popularly called Hong Kong. One is Kowloon, the arrival point for air passengers from Japan or Hawaii and for those taking

the train from Canton.

Kowloon is home to many of the newest hotels, some of the best shopping and the most popular point for separating the tour-ist from his money, the famed Nathan's Road. It has a population of about 1.8 mil-

Hong Kong is an island reached by ferry from Kowloon, home to the colonial government, the Aberdeen dock area, Victoria Peak and the popular Repulse Beach—so named because it was where pirates were beaten back-and has a population of 1.2

The largest section of the British Crown Colony is the New Territories, a complex of 1,500 islands, with half of "Hong Kong's" 6

million residents.

The lease on Kowloon and the New Territories from China to Great Britain expires in 1997, and China, which ceded the area to Britain following the opium war of the mid-

1800s, may take it back. Hong Kong's teeming population is packed into a tiny area, much of it a shopper's paradise, for the wary, and hell, for the daring. Jewelry is a good buy for the careful, and so is a watch, but most photographic equipment, calculators and tape recorders sell for about the same prices quoted by New York City discount houses, and they are more reliable than most Hong Kong merchants.

The best buy in Hong Kong is clothing, usually made to order. The visitor picks out the material, style and color of dress, suit, blazer, slacks, shirt or blouse and the fin-ished product, after two fittings, is ready in 36 to 48 hours. A merchant will often come to the customer's hotel for the final fitting.

Other good values include sports clothes by European designers, often one-third to one-half the cost in the United States.

There is a Hong Kong Merchants' Association of about 300 members whose seal is displayed in shop windows, but that guarantee often is accompanied by higher prices, and association member stores are heavily outnumbered.

An unwary stroller can be suddenly taken in tow by an eager hustler and steered to a side street shop where prices are low and the goods usually shoddy.

Tourists looking for jade and silk shirts should be particularly careful. Both are

widely imitated. A good made-to-order silk shirt runs about \$30.

Curiously, tennis rackets are a pretty good buy in Hong Kong.

Kowloon and Hong Kong streets are consistently clogged with massive traffic jams. There is a new subway on Kowloon, with only one line so far, which is mobbed at rush hour.

It operates with the same type of fare card as the Washington subway, with cards purchased from machines, the fare varying with the distance traveled. An average fare is about 44 cents a ride, and the passenger needs the card to leave the station as well as to enter.

Buyers can use credit cards easily, but a credit card purchase automatically boosts the price by the fee the merchant pays to the card company.

Prices can be negotiated with merchants, and some stores will make out fake purchase sheets to enable the tourists to get home under the \$300-per-person duty-free limit.

Most of Hong Kong's newer hotels have

large shopping malls inside.

Aberdeen is the home of the "boat people." They live on their craft, closely packed together in an oily, garbage-strewn harbor. Incredibly, the children use the harbor as a swimming hole.

Aberdeen also is home to a couple of pop-

ular floating restaurants.

One of the nicest points in Hong Kong is Ocean Park, with a children's zoo, macaws that ride miniature bicycles and do other tricks, a breathtaking cable car ride over the mountains and a building housing a spectacular coral reef with every kind of tropical fish imaginable, sharks and a moray eel, all of which can be viewed from above and at two levels below the water line. The entry fee for the whole works is \$5.

[From the Watertown Daily Times, July 21, 1981]

CHINA'S NUMEROUS WALLS DO NOT KEEP RESIDENTS IN OR VISITORS OUT (By Alan Emory)

PEKING.-China is a country of walls, around communities, around homes.

A country where cyclists carry infants in little baskets resting on handlebars.

Where, in early morning hours, old and young alike move out into parks, squares and playgrounds to do martial arts exercises with the grace of ballet performers, their hand movements as smooth as those of hula dancers; participate in team or individual sports, including basketball and soccer, and

Where young men wearing white or navy gym shorts or warm-up suits appear in excellent physical shape.

Where only over-the-counter street-front stores show prices on window display items and people carry leatherette or string shopping bags.

Where crowded and well-stocked department stores sell a Sanyo television set for \$350, a blouse for \$5, and prices are not out of line with those in the United States.

The difference is the longer time it takes the average Chinese to save to buy a TV set. China is Inner Mongolia, where residents buy fried bread on street corners, some collect water in buckets hanging from yokes they carry across their shoulders, while others cycle along with pails of human waste for fertilizer.

Much of the clothing is unisex, white shirts and black pants, blue or green shirtand-pant outfits, rain ponchos with attached caps and clear visors. Girls wear dresses, women shirts and pants.

When it gets really hot men often roll up their trouser legs to the knees for relief.

Footwear is mostly sandals and soft shoes. The Chinese people are extremely friendly, anxious to help a visitor, regardless of language barrier, and eager to practice their few words of English. The friendliness is evident from the moment a youngster brings a tourist's luggage to his hotel room and welcomes him in English.

The Chinese are also meticulous about scouring hotel rooms when a visitor leaves. Any item left behind is returned before the visitor can leave the city. It finds him in a restaurant, train station or airport.

People wave at trains and buses filled with easily recognizable westerners. Mothers take their children's hands and wave for them. Some youngsters call out, "Bye, bye," when tourists leave a school or community.

Except for guides, hotel staffers and a few children people shy away from gifts, even a small cake of perfumed soap and even when the gift is explained in Chinese.

There is general delight when a tourist tries out a few words of Chinese, and if the local dialect is different the residents imitate the visitor with a broad grin, rather than try to correct him.

Pay is minimal by American standards-\$60 a month for a six-day week, for example, with Sundays off. Unless the worker is separated from his family, which merits a 20-day vacation, the only "vacation" is on national holidays.

A worker can earn enough in a year for a TV set, but it often takes that long to save for the all-important \$100 bicycle. Professors are among the best-paid individuals.

Factories and farm operations authorize 56 days of maternity leave with pay for the first child. New mothers, however, may take up to a year off, the rest of the time at 70 per cent of normal pay.

For the second child another 56 days are authorized, but that is the extent of maternity leave. The government pays a bonus to couples who have only one child, but they penalize those who go beyond two.

Families are proud to live together despite a lack of space.

Youngsters are fascinated by digital watches and cameras, and an offer to demonstrate either causes a rush and crowding around.

Men smoke cigarets, very few women. Older men occasionally sport beards, but very few young men wear them.

The basic Chinese currency is a yuan, worth about 60 cents. There are 100 fen in a yuan. There are notes of 10 fen, one, five, 10 and 50 yuan in what is called "script," with English writing, and of one, five and 10 yuan and two and five jiao (often pro-nounced like Mao) of old Chinese money. A jiao is equivalent to 10 fen.

The Chinese say that the old money cannot be taken out of the country, and they discourage attempts to turn it back into western money. Visitors must keep receipts they get whenever they obtain Chinese currency to be eligible for exchanges the other way when they leave.

Agriculture is a serious business in China. Every square inch of available land is cultivated. Crops are sold twice a year, after the summer harvest and at a two-week-long spring festival, at which time farm families gather in reunions for a long feast.

China is apartment buildings in big cities and rows of homes resembling sandstone igloos in the countryside. Some people live in houses of mud and brick with tile roofs. Cows may be tethered outside the front doorway, while goats, pigs and chickens run around the yards.

China is trees planted alongside railroad tracks, many of them 15 years old or less.

Lush greenery contrasts with great stretches of desolate arid land.

Although China has geared up for a rush of tourism, there is still a dearth of hotel rooms in some cities, and visitors often have to double and triple up.

China is a country where only visitors travel freely. The Chinese are sharply restricted and there is no chance to change jobs from country to city or the other way around.

The people seize on conversation with visitors to stress what they see as national defects. One teacher asked an American couple, "How do you like China?" and when they answered they liked it very much replied, "I don't think so."

"We have many shortcomings," he said, describing the visitors' hotel as "dirty" and having too many mosquitoes, when they had found it surprisingly clean and insect-

The man, who teaches Russian, which he learned from television, and listens to English-language radio broadcasts, argued that China was making progress until the Gang of Four took over, and it had only been since their ouster that things had started moving again.

This is the line used everywhere, by travel service guides and man in the street alike.

Guides refer to the "crazy" people who led the cultural revolution, but still insist that Mao Zedong, who was in charge then, was not bad.

American experts say the Chinese legal system is relatively new and from 1963 to 1978 there was no real criminal law. Instead, the country employed a kind of frontier justice.

Only for taxes, divorce and minor civil matters was there any defined legal system. In China men are permitted to retire at 60, women at 55.

There is great respect for old people. If they have children it is the responsibility of those children to look after them. The childless aged are provided with five guarantees: Housing, clothing, food, medical care and burial.

The guides are reluctant to show a visitor Peking's Democracy Wall, where, for a short time, Chinese citizens were permitted to express their opinions in wall posters. Some of those opinions did not follow the Communist Party line.

Eventually the practice was stopped, and inquiring visitors are now told that the thoughts the posters expressed were simply "rumors."

Despite the leap in tourism in China, the people's curiosity about western visitors and the friendliness demonstrated in casual contact is genuine. A tourist gets on a crowded bus and the Chinese, men and women of all ages, rise to give her a seat.

A young man comes up to an American on a street in Xian on a warm evening and greets her with, of all things the Gettysburg Address

The walls may be everywhere, but they do not keep the people in or the visitors out.

This is China in the summer of 1981.

TAX INCENTIVE ACT OF 1981

HON. DON BAILEY

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. BAILEY of Pennsylvania. Mr. Speaker, I, like all other Congressmen, have received a number of communications from my constituents concerning the tax package before the House. As a member of the Ways and Means Committee, I naturally favor our proposal. Not only did I personally participate in writing H.R. 4242, but I sincerely believe that the major differences between it and H.R. 4260—the Reagan bill—are highly significant.

In short, the Ways and Means measure will mean less inflation, because it unquestionably will not produce the deficit in the outyears that the Reagan measure clearly shall.

The Ways and Means measure also focuses more attention on savings and investment, not only through use of Keogh and individual retirement account mechanisms, but by providing personal income tax cuts in those areas where Americans who save in capital-forming investment pools will be most encouraged.

The personal income tax cuts also seem to be more fair in that they are aimed more at middle- and low-income working Americans who, because they are unable to shelter their income, have been most affected by inflation. The Ways and Means measure, therefore, it also more just and fair.

But even more importantly, perhaps, the Ways and Means measure channels more revenue resources to small business, as well as America's capital intensive basic industries so necessary to our economic freedom. The comparison of figures is obvious. The Ways and Means measure means \$28 billion as opposed to \$8 billion in cuts to small business in the Reagan bill. It means reinvestment opportunities for productivity-improving investments. that is, section 38 tangible personal property investments that have qualified for investment tax credits that are the lifeblood of the country's basic industry.

The so-called leasing provisions which parody the sincere Ways and Means proposal, which I authored, will not efficiently direct moneys to these distressed industries for these purposes.

The President, however, is to be commended. He has abandoned his original 10-10-10 proposal in favor of now this—his third substitute—as a response to what is an obviously superior Ways and Means tax measure.

But along the way a good deal has been lost, and even more misinformation disseminated. In not one single piece of correspondence that I have received from across the country, is con-

tained one single correct reason for preferring the Reagan tax plan. People apparently think that the Reagan bill is the only measure before the Congress, or erroneously think that it contains solely the ideas expressed by the administration, or more sadly think that the Reagan administration originated many provisions they copied from the Rostenkowski proposal. For example, I have received telegrams from major corporations, including one in my district, who are not even aware that the research and development bills which I have cosponsored with Congressman JIM SHANNON of Massachusetts were provisions written into the Ways and Means bill, and only copied by the administration.

In short, the measures are the same in both bills, but were being flaunted by these corporate executives as reasons for preferring the administration's bill. Examples of misinformation run on and on. People who think they are going to get a 25-percent cutpeople who think that the President's bill is more than technically a 3-year program, since of course the President's bill is not.

The role of television on the eve of an important vote, the pressures applied to many Members on anything from reapportionment to the intensive lobbying from corporate headquarters, raises serious questions about our political process. Added to this was the unique use of the Republican National Committee to buy radio and television time for the purposes of advertisements to create impressions, none of which were accurate, none of which clarified issues for the public, none of which addressed alternatives or substantive matters.

We, of course, have a job to do here in the Congress that places great burdens upon our desires to be popular and to fulfill the whims and wishes of faddish forces that seem to ripple through the contemporary wisdom. Our function is to deliberate, revise, and produce carefully investigated policy alternatives. I hope that we shall continue to do so and I am sure that we shall, but the last few days we have partaken somewhat of a major diversion.

Generally, the feelings expressed are very partisan, or simply proclaim an allegiance or faith in the President, in many cases regardless of what he wants to do. Although these are feelings with which I do not agree, they are feelings which I very much respect, because unlike the information from individuals and companies who purport to reflect distinctions between the measures, every one of which so far has been inaccurate, my heart does go out to those who very simply and very sincerely and honestly proclaim their faith in our President.

While I do not agree with him, because I see our reinvestment needs as much greater and in a different way, I do admire the way he has been able to very effectively get his point across. But at the same time I wonder if we are not into a frightful age of not examining and debating important policy considerations, but instead are into an age of promoting for personality purposes, simplistic and often-times incorrect information for the sake of political victory.

IRVIN R. TCHON HONORED BY ILLINOIS STATE SENATE

HON. HENRY J. HYDE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. HYDE. Mr. Speaker, one of Illinois' outstanding citizens has been honored by the passage of a State Senate resolution commending him for his distinguished public service and leadership to the Polish American community. I am very pleased to share an article on Mr. Irvin R. Tchon which appeared in several newspapers that serve the Polish community, and the resolution which passed the State Senate:

IRVIN R. TCHON RECEIVES ILLINOIS SENATE COMMENDATION

SPRINGFIELD, ILL.—Irvin R. Tchon, one of the organizers of the Copernicus Senior Citizen Center in Logan Square and very active in numerous drug awareness and educational programs, was recently honored by the Illinois State Senate for his twenty five years of "outstanding leadership and distinguished service to the Polish American community."

A resolution presented in the eighty-first general assembly offered by some 58 senators pointed out Mr. Tchon's active interest in programs designed health care being provided to the Polish American community.

Tchon, a Chicago retail druggist, is an active member of the Polish American Pharmacist Association, Polish American Political League, Polish National Alliance and a consulting nursing home pharmacist.

Irvin Tchon, is also a member of SS. Cyril and Methodius Society 145 and from a 100 percent PRCUA family. His parents, Joseph and Catherine Tchon, were long time activists in the PRCUA and the recipients of various awards for their efforts in PRCUA activities.

The Senate resolution concluded, "we express the hope that he will continue to serve his community with vision and enthusiasm." We strongly concur.

STATE OF ILLINOIS, 81ST GENERAL ASSEMBLY, SENATE

SENATE RESOLUTION NO. 729

Offered by Senator Nash, Senator Rock, President of the Senate, Senator Egan; and Senators Becker, Berman, Berning, Bloom, Bowers, Bruce, Buzbee, Carroll, Chew, Coffey, Collins, D'Arco, Daley, Davidson, DeAngelis, Demuzio, Donnewald, Friedland, Geo-Karis, Gitz, Grotberg, Hall, Johns, Jeremiah Joyce, Jerome Joyce, Keats, Lemke, Maitland, Maragos, Martin, McLen-

don, McMillan, Merlo, Mitchler, Moore, Nedza, Nega, Netsch, Newhouse, Nimrod, Ozinga, Philip, Regner, Rhoads, Rupp, Sangmeister, Savickas, Schaffer, Shapiro, Sommer, Vadalabene, Walsh, Washington, Weaver and Wooten.

Weaver and Wooten.
Whereas, Irvin R. Tchon, registered pharmacist, is an active community and civic

leader; and

Whereas, The Senate recognizes his outstanding efforts and achievements in pursuit of excellence in the Polish-American Community, in community consciousness, affirmative action, political education and human relations programs; and
Whereas, Mr. Tchon has an active interest

Whereas, Mr. Tchon has an active interest and has participated in special drug awareness and educational programs designed to enhance community preparation, professional competence and quality of geriatric health care being provided to the Polish-

American Community; and Whereas, His distinguished public service has strengthened the democratic form of government, has served to exhibit the finest ideals of those of American heritage and

has benefited all Americans; and Whereas, He has given many years of unselfish service to the ethnic and minority people of Illinois, and has been honorary president of the Drug Abuse and Education Committee and Nursing Home and Geriatric Health Committee of the Polish-American Political League of Illinois; therefore, be it

Resolved, by the Senate of the 81st General Assembly of the State of Illinois, That we commend and congratulate Irvin R. Tchon for his outstanding leadership and distinguished service to the Polish-American Community; that we express the hope that he will continue to serve his community with vision and enthusiasm; and that a suitable copy of this resolution be presented to Mr. Tchon.

Adopted by the Senate, December 5, 1980.

ROBERT MOSES—BUILDER OF

SPEECH OF

HON. GERALDINE A. FERRARO

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 1981

 Ms. FERRARO. Mr. Speaker, we all know that Rome was not built in a day. Neither was New York City, but if you were going to try to build a city in a day, Robert Moses would have been the man to put in charge.

On July 29, at the age of 92 and after 50 years of service to the people of New York City and New York State, Robert Moses died. Over the course of that half century, he remade the face of New York City, creating hundreds of parks, building miles of major arteries, constructing many of the buildings that define the city today.

It is awesome to consider the number of New York City landmarks that were born of the energy and industry of Robert Moses. Lincoln Center, Jones Beach State Park, the United Nations, Shea Stadium, the 1964-65 World's Fair grounds, and the New York Coliseum are all his cre-

ations. And without the bridges and highways he designed and built, New York City would not today be the premier metropolitan center in the world.

I am proud to join my colleagues in offering condolences to the Moses family and in mourning the passing of this remarkable man.

JUSTICE DEPARTMENT BETRAYING CONSERVATIVES?

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. McDONALD. Mr. Speaker, it appears that on this historic day of final deliberation on President Reagan's tax reduction measure that there is absolute evidence that the President does indeed have a mandate from more than a majority of the American people. If that is a fact, then we wonder if not that mandate does extend to all areas of the President's political and moral philosophy.

It appears from slowly, but steadily mounting evidence that the President's promises to the American people are not extending to one of the most critical Departments in the executive branch—that of the Justice Department.

Today, I would like to share with my colleagues an item from the front page of the Wanderer, the most influential conservative Catholic weekly in America. The article which quotes a source that I am thoroughly familiar with, and a most reliable one, indicates that the Justice Department is consistently taking positions in both domestic and foreign affairs areas that are totally alien to what was promised the American people in the election of 1980. It appears from this article that the activist leftists are still with us in the Justice Department. It also appears that the President at best is being tendered misinformation that is causing deep consternation among that majority of the American constituency that elected him.

We are seeing the Reagan mandate being manifested both in the Senate and the House. We hope that the word will be passed to the President that indeed the mandate will not continue if the leadership from the White House does not continue. The item from the July 30, 1981, issue of the Wanderer follows:

[From the Wanderer, July 30, 1981]

Memo Charges . . . Justice Department "Betraying" Conservatives

(By Paula A. Fisher)

Washington, D.C.—A memorandum prepared by a knowledgeable Capitol Hill conservative, that is not for attribution, charges that the nomination of Sandra O'Connor to be Justice of the Supreme Court is one of

many "major substantive betrayals of conservatives by the Justice Department."

The document dated July 8th, states that "sources within the Administration" emphasize the central role of the attorney general and deputy attorney general in the selection process (of Judicial appointments).

Beyond that, when conservatives raised objections to O'Connor, it was the attorney general who rallied to her defense with a three-page memo full of incomplete or mis-leading information," the memorandum

The "three-page memo" referred to is the one written by Kenneth Starr, counselor to the attorney general, which has been widely cited as the source of data on which the President supposedly made his decision to nominate Judge O'Connor (see The Wanderer, July 16th, p. 8).
The July 8th Capitol Hill memorandum

continues:

The (Starr) memo states that O'Connor 'has never had any disputes or controversies with (Arizona pro-life leader Dr. Carolyn Gerster).' In fact, Gerster has been adamantly opposed to the O'Connor nomination, stating: 'I'm simply stunned. I still trust the President. I think he must have gotten some extremely bad counsel'

The document goes on to note that the memorandum conveniently looked some glaring discrepancies in O'Con-

nor's record.

'Obviously, O'Connor made some misleading statements in order to secure her nomination," the July 8th Capitol Hill memoran-

dum asserts. It continues:

"Equally obviously, the Justice Depart-ment, which had either done a very sloppy job of background investigation or had considered O'Connor's positions on key social issues inconsequential, did its best to cover up for its earlier inadequacies. It did this by forwarding the (Starr) memo to the President without checking into the accuracy of the statements made therein."

Other Justice Department actions that the Capitol Hill memo considers "disas-

trous" are the following:

An opinion prepared by the Office of Legal Counsel declaring the legislative veto to be unconstitutional. "That opinion quoted from a similar opinion issued by the Carter Justice Department.'

A Justice Department opinion that held an anti-affirmative action amendment in the House to be "unlawful," because it constituted legislation on an appropriations

"Robert McConnell, assistant attorney general for legislative affairs, had to be prohibited from actively lobbying against the (Helms anti-busing amendment) by

White House."

Ted Olson, the legal counsel, has prepared an opinion holding that Congress cannot constitutionally divest the courts of jurisdiction over busing, prayer, and abortion under Article III. This would render unconstitutional a substantial number of conservative bills which seek to remedy court decisions in these areas short of con-stitutional amendment."

'The Justice Department has forced the Washington Legal Foundation and 16 con-servative senators out of a suit by liberal representatives challenging U.S. aid to El

Salvador."

The Capitol Hill memorandum continues: "These positions are not aberrations, but rather a sample of what we can expect for the next four years, given the composition of Reagan appointees to the Department (of Justice).

"With regard to (Attorney General) Smith himself, at least one conservative senator has suggested that Smith has no ideology, and has allowed a liberal bureaucracy to continue business as usual.
"Deputy Attorney General Schmultz has

reportedly stated that he doesn't want 'ideo-'conservatives') in logues' (read 'conservatives') in making spots within the department.

With the exception of Rex Lee no nominee to the department has an identifiable conservative background."

The source of this Capitol Hill memorandum is known to this writer, and is wellplaced and well known among key conservatives in Washington.

A BIRTHDAY DEDICATION

HON, EDWARD J. MARKEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. MARKEY. Mr. Speaker, on August 27 Sri Chinmoy will celebrate his 50th birthday. Sri Chinmoy is a man of many accomplishments. Along with 11 years of dedicated service to the United Nations furthering the cause of international understanding, Sri Chinmoy has enriched the world with his esteemed art work, dynamic musical accomplishments, and insightful writings. His work clearly demonstrates his profound sense of quietude and inner peace, qualities respected by

Sri Chinmoy's work has enhanced the quality of life not only for residents of Massachusetts, but in every area of this country. On behalf of my constituents I wish Sri Chinmoy a very happy birthday. His life represents an inspiration to us all and we wish him continued inner peace, ful-

fillment and happiness.

OTA IN THE PUBLIC LIGHT

HON, GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

. Mr. BROWN of California. Mr. Speaker, there are still many Members of the House who are not fully aware of the fine work that is done by the Office of Technology Assessment in their role as a research arm of Congress. In the last few months, a number of valuable assessments have been completed, making our job as legislators much easier in determining positions on issues which involve new and emerging technologies.

An indicator of the quality of OTA's assessments and other studies is the recognition that this work receives outside of Congress. Many of OTA's publications are reprinted by private publishing companies. Many of OTA's staff people are asked to appear at meetings of scientific and technical organizations, or are sought by the

media for expert opinions. Each time that this happens, the public becomes better informed on complex technological issues and the image of Congress is enhanced because of its foresight in establishing OTA.

An example of this public attention which OTA receives is the inclusion of Dr. John Gibbons, OTA's Executive Director, on NBC's show, "Second Sunday," hosted by Peter Hacker hosted by Peter Hackes. Sunday,' While the entire transcript is too long to be reprinted here, I would like to excerpt Dr. Gibbons' and Mr. Hackes' interactions to show my colleagues the type of attention that Congress is getting through OTA. The edited transcript follows:

HACKES. Welcome to another edition of Second Sunday, I'm Peter Hackes in Washington. Our report on coal as you have heard from four coal energy experts carries with it considerable optimism on the part of those who mine it. But there are some important questions and challenges for those who would burn it. Coal, backbone of the industrial revolution was a prime source of power until World War II when cleaner burning oil and gas took over. But today with new combustion technology coal can be burned far more cleanly. It's cheaper and it's here not in some far off politically unstable Middle East Shiekdom. 38% of the oil we use is imported; not only is that supply unreliable it's ruining our balance of trade. This year we'll be sending abroad 95 billion American dollars to pay for imported oil. That hurts the U.S. dollar badly and fuels more inflation. The office of Technology Assessment a Congressional study group have issued a detailed report on how coal might be one way to reduce oil imports. Dr. John Gibbons, Director of OTA says he foresees a coal boom in the near future.

GIBBONS. I think probably we'll see a coal boom based on the following assumptions. That OPEC and World oil prices are not going to go down. That other, as it were, magical deliverances from our energy issues are just not going to be there. And that our demand for energy will at least hold level if not 10 to 1 increase. Now if these assumptions are the case then the number of options we have to feed our energy demand are unfortunately very limited. Coal is one of our few options it has its problems but it's gonna have to help fill a very important gap over the next two decades.

HACKES. If things go as some are expecting, Deputy Secretary of Energy, John Sawhill predicts that by the year 2,000 US coal exports will have re-established a positive balance of trade with coal surpassing grain as the single most valuable US export commodity. For years coal transportation exports have been working on what's called a cold slurry pipeline to transport coal the way oil and gas are transported thru a pipe. The coal is pulverized at the mine and the tiny coal pieces are mixed with water. That mixture is sent thru a large underground pipeline to a regional center where the water is drained off and the dry coals sent on to where its to be burned. Dr. Gibbons says the slurry pipes big advantage is that much cheaper to transport huge amounts of coal over long distances thru a pipe. But Slurry pipes do have problems. Dr. Gibbons

GIBBONS. There are plans to move coal from the western coal fields on down to

you're

wheat field.

Texas in order to get it from the west to Texas you gotta cross a batch of railroads and the argument with the railroads have been why should we give you the right away if you're taking our business away from us. Another argument against the slurry pipeline is it takes water to move that coal. If you're moving coal out of, say, West Virginia, water's not that much of a problem. But if you're moving it out of Wyoming water's a very scarce commodity and it means

Hackes. Still another important factor in the predicted rosey future of demand for coal is in the area of synthetic fuels. But not for at least a decade. Dr. Gibbons of the Office of Technology Assessment.

taking it away from somebody's

Greens To me the largest sleeper in this area is the turning of coal into liquids. Liquids to replace the distoilits from petroleum. Liquids which can take the form of either alcohol, metholalcohol or even gasoline in competition with shale oil and other forms of liquids to fuel or transportation system and other needs for liquids.

Hackes. In addition another synthetic fuel made from coal. Dr. Gibbons explains. Gibbons. A big gas production facility is just getting underway out in the western states to turn some of the Northwestern coal into gas to go into pipelines which in turn will feed either . . make either electricity for use in homes, in industry. I think a lot of coal gasification will occur in the '80s as our lower cost sources of natural gas continue to be depleted.

Hackes. Even assuming we can push technology to the point where immediate coal problems can be overcome, coal won't be around forever. It's being used up just as other fossil fuels gas and oil are being used up. So how long do we have before we'll have to switch to something else? We asked Dr. Gibbons:

Gibbons. Coal was built up over 100 million years or more of earth's history. We now use coal and gas and oil at a rate every year that corresponds to a million years worth of production. So as I see it, we have less than a century left of good fossil resources to use. That 100 million years of production is gonna be used up in the next 50-75 maybe 100 years. So we don't have that much time in terms of civilization to make our conversion to truly long lasting sources.

HACKES. Truly long lasting sources? What are they? After we reach the 21st century, where do we turn? Nuclear . . . yes for a few more years. Solar, yes for many more years. Perhaps other renewable energy sources, such as the heat of the earth. Experts seem to agree on a few major items as we approach coal as an interim energy benefactor. The United States must continue to increase its research and development, to find acceptable alternate energy sources. Meantime, they also agree, that the country must continue to increase its research into the future consequences. The risks connected with the use of not only coal and other fossil fuels, but the uncertain impact of alternate energy sources. And they also agree that there must be stepped up research and development of protective technology to keep the world from committing environmental suicide. If that ever begins it could become irreversible permanent. At that point even discovery of a new super-source of clean, unlimited energy might come too late. Meantime, even as we wrestle with future energy unknowns and as prices and sources of imported oil get more critical the

careful use of additional US coal may make good sense.

GUARANTEED STUDENT LOAN PROGRAM

HON. ANDY IRELAND

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES
Tuesday, August 4, 1981

• Mr. IRELAND. Mr. Speaker, ever since its inception, the guaranteed student loan program has been administered in an extremely lax fashion. The defaults on these loans have been tremendous and efforts to obtain this money by the Federal Government minimal. In a misguided effort to straighten this problem out, the Department of Education is inflicting unreasonable expectations on banks that provide these loans.

For instance, in my district, the intercity offices of the First National Bank of Florida have meticulously worked within the regulatory guidelines set by the Department and have worked with the Department's staff to insure that they work within the regulations. In fact, the bank was assured that they were complying with the regulations. However, the Department has now suggested that the Government may refuse to honor its guarantee on the loans.

I have been a longtime critic of Government waste, but I do not think the solution is to punish those who have worked hard to obey the regulations. The solution is to punish those who break the law, not to punish the law-abiding citizens through unreasonable regulations.

I would like to share with my colleagues the letter I received from my constituent, Mr. Lloyd W. Geiger, the senior vice president of the intercity offices of the First National Bank of Florida, regarding this problem. The letter is below:

First National Bank of Florida, Bradenton, Fla., July 17, 1981.

MARION D. WATKINS,

Program Officer, U.S. Department of Educa-

tion, Atlanta, Ga.

DEAR MRS. WATKINS: Thank you for your recent visit and review of our Guaranteed Student Loan Program. It was the first we have received from the Government since we agreed to extend student loans under the program approximately 15 years ago.

We were frankly shocked by your suggestion that the Government may refuse to honor its guarantee of some of these loans. Our bank entered into the program in a spirit of cooperation and good faith, when very few banks in this area were willing to do so.

We have always made every effort to adhere to the guidelines given us, and the number of past-due student loans which appeared on our past-due loan lists for the last fifteen years concerned us. We have repeatedly been assured by Government employees through the years that we have been following the guidelines set forth, and had no cause for concern.

In particular, you and I discussed those loans which were in default on or about January 1981; and I related to you my conversations with Ms. Rene Simons of the Claims Section. We followed her instructions to the letter, capitalizing the accrued and unpaid interest, refinancing the entire loan and are servicing the loans for the additional 120 days. Ms. Simons assured me that the claims would then be honored for the entire amount, including the capitalized interest.

It seems to me a breach of faith by the Government to entice lenders into a program by promulgating very broad guidelines, and then altering the rules in midstream, and threatening to renege on its guarantee. Unlike the Government, we had no intention of making grants-in-aid to these students.

Our Advisory Board has asked me to convey to you and to the Guaranteed Student Loan Program officials, its strongest protest against this possible breach of faith.

We will appreciate your favorable response to the questions posed concerning the status of insurance coverage on these refinanced loans.

Sincerely.

LLOYD W. GEIGER, Senior Vice President, Inter City Offices.

RETIREMENT OF JUDGE H. T. HADER

HON. IKE SKELTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. SKELTON. Mr. Speaker, this past week, Judge H. T. Hader, associate circuit judge, division III, retired. I did not want this occasion to pass without an appropriate comment commemorating Judge Hader's legal career and contributions to his community.

Long active in youth organizations, Judge Hader is the first person who ever received the rank of Eagle Scout from Lafayette County. His interest in Scouting continued throughout the years. In 1978, he was selected to be the Eagle Scout Court of Honor sponsor for the council. He also serves on the executive board of the Kansas City Heart of America Council.

Judge Hader began his legal career in 1939 in Lexington with the office of Judge Charles Lyons. After serving in World War II in the Army, European theater, he returned to private practice and was elected prosecuting attorney for Lafayette County. In 1966, he and two other attorneys formed the law firm of Aull, Hader, and Sherman. He was named to the bench in 1974, where he has served with honor and distinction. Judge Hader has contributed to the legal system, to Scouting, and to the community. I congratulate him on his many years of service and wish him and his lovely wife all the best in the days ahead.

NEED FOR BETTER PERSPECTIVE ON POTENTIAL HAZARDS

HON. DON RITTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. RITTER. Mr. Speaker, I rise today to discuss an issue that I have been promoting since I came to the Congress 3 years ago. An issue that encouraged me to give up the private sector and academia for elected office. The issue is bringing a better scientific basis to regulation and ultimately regulatory reform.

We all face risks to our health and safety in daily life which we try to reduce. The public wants the benefits of a cleaner, safer environment while the subject of regulatory reform enjoys an ever wider appeal. People are also concerned about counterproductive regulation and its effect on inflation, their jobs and the well-being of their communities. It is evident that regulatory reform must include targeting of scarce regulatory dollars into the areas of greatest risk or dangers to people. With finite tax dollars, regulating risks that turn out to be negligible or very small, means real dangers may go unattended while economic damage is great. In an age very much dependent on technology, we need to put hazards in perspective. We need to draw on all our communications abilities to bring that perspective to the public. Then, take the most intelligent actions within that perspective to sup-

port our regulatory efforts.

From the scientific standpoint, we must understand what we are dealing with. A scientist does not claim to understand something like a "potential" hazard until he has objectively assessed it and its effects. Too often, in the past, we have not been objective in our assessment of potential hazards. Politics enters the fray early on and scientific logic is readily surpassed by sensationalism and the rhetoric of scare. I was reminded of this fact when I read an article in the Bethlehem, Pa., newspaper, the Globe Times, which reviewed some of our recent knee jerks which have caused unnecessary anxiety for the public. The article makes the point that calm, reasonably objective evaluations of a technicalregulatory situation seldom makes news headlines. The article is a compelling argument to give risk assessment its due. I believe that risk assessment will contribute to giving some perspective to the health, safety, and environment regulatory tangle we are in. Legislation I have introduced, I hope will add to the efforts to better the technique and the use of risk assessment as a factor in our regulatory process. I have introduced my revised bill, The Risk Analysis Research and Demonstration Act of 1981, this year

after some productive hearings last year. In addition to developing the methods, this bill offers to organize and give some direction to risk assessing actions already going on in our Federal agencies. Risk assessment needs to be understood more fully, both its strengths and its limitations as we seek the goal of putting hazards in perspective for the public.

For the benefit of my colleagues the

Globe Times article follows:

[From the Bethlehem (Pa.) Globe-Times, July 24, 1981]

RELAXED SKEPTICISM ANTIDOTE TO FOOD HEALTH SCARES

(By Louis Rukeyser)

New York.—It's a cliche of journalism—unfortunately, still all too true—that those who make violent and irresponsible charges will tend to capture bigger headlines than those who come along later and attempt, calmly and objectively, to set things right.

Today I'd like to take a few moments of your time to observe how this phenomenon has been operating lately in an area that affects every one of us emotionally, physically and economically: the effects, real and alleged, of chemicals and food additives on our personal well-being.

To some, it's all simple—and simplistic. All chemicals and additives are bad, existing only because of rapacious corporate greed.

Back to the forest primeval!

Alluring—and nonsense. As one with three children of his own, I'm as concerned as anyone with protecting them from needless risk. But the notion that giving free rein to anti-corporate paranola is the route to a healthier and happier America has now gotten so far out of hand that it deserves to be brought to account. Consider:

(1) In case you missed it (and it wouldn't be surprising if you did), a careful study by the New York State Department of Health—published after painstaking review by the highly respected magazine Science—shows that people living near Love Canal don't get cancer at a faster rate than any of

New York's citizens.

This highly publicized industrial-waste site near Niagara Falls has been the cause of near-panic for area residents for some time now. The very name "Love Canal" has become an inflammatory symbol, to many, of grievous harm to a hapless population. Now comes this little-noticed investigative report on what actually happened; it isn't likely to be the last word on this controversy, to be sure, but it's worth emphasizing that the first word, at least, is surprisingly reassuring.

(2) A much-ballyhooed 1978 study done at MIT for the Food and Drug Administration indicated that rats fed sodium nitrite showed an increased rate of lymphatic cancer. Fears were fanned of still another horrible carcinogen in our daily food.

Yet last year, after further study, the FDA and the Department of Agriculture admitted—ever so quietly—that there really wasn't sufficient evidence linking sodium nitrite to cancer.

(3) The Occupational Safety and Health Administration, which consistently has been among Washington's most conspicuous overreachers, was characteristically quick on the trigger in promulgating rules for exposure to the solvent benzene.

In July 1980, the Supreme Court voided these rules—on grounds that OSHA simply

couldn't justify its speculation with scientific facts.

(4) Perhaps the loudest brouhaha of all was over saccharin, the artificial sweetener that raised such havoc when fed in massive doses to rats. This column was an early voice raising serious, pointed questions about the hysteria being promulgated over saccharin; in this case, fortunately, the public resisted panic, and Congress moved to prevent a precipitate ban.

Now, guess what? Long after the furor had subsided, the American Health Foundation, the National Cancer Institute and Harvard Unversity's School of Public Health all reported that clinical studies on 4,000 humans led to the conclusion that absolutely no tie could be established between normal use of saccharin and bladder cancer.

The point is not to reject all charges blindly nor to discourage those carrying on legitimate and desirable research. But we ought to recognize (a) that the "publish or perish" syndrome sometimes leads academicians to hype their findings and rush to go public; (b) that ideologues are always anxious for new ammunition, however flimsy, with which to attack an economic-growth system they deplore; and (c) that bureaucrats are notoriously quick to issue regulations but slow to admit error in the light of new facts.

Zero risk is unattainable in this vale, but it is natural for all of us to seek a healthier world. There is no conflict between that goal and a calmer, less paranoid reaction to the next scare headline. Too often the truth, when it catches up, is far less terrifying—and far less publicized. A dose of relaxed skepticism has frequently proved the best medicine of all.

WASHINGTON COLLEGE, CHESTERTOWN, MD.

HON. ROY DYSON

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. DYSON. Mr. Speaker, it is my privilege today to introduce a House resolution honoring the 200th anniversary of Washington College, in Chestertown. Md.

The college will celebrate its anniversary next May, as it was on May 24, 1782, that the bill granting its charter was enacted by the General Assembly of Maryland.

I introduce this bill today so that it will be available for the college's bicentennial convocation ceremony, to be held on October 10 of this year.

Washington College is a small school, but its place within the educational history of Maryland and of the Nation endows this occasion with a special importance, It is, afterall, the college first chartered in the State of Maryland, and the 10th in this country. It was named, its charter states, in order to serve "in honorable and perpetual memory" of His Excellency George Washington. Washington himself contributed the "helping sum" of 50 guineas to the school, as "an earnest" of his wishes for its prosperity,

and visited the school in 1784, to sign his name as a member of the govern-

ing board.

In these ensuing 200 years many notable persons have graduated from Washington College: Thomas Ward Veasy, class of 1795, served three consecutive terms as Governor of Maryland; William Holland Wilmer, class of 1802, founded Virginia Theological Seminary, and was elected president of William and Mary College: and John Emory, class of 1805, assisted in the organization of New York University, Wesleyan University, and Dickinson College. These are but three of the numerous Washington College alumni and alumnae who have made significant contributions to the development of this country. I will not list them further, but I do recommend to you an excellent history of the school entitled "Washington College," written by Fred W. Dumschott, which describes in vibrant detail the long history and extensive contributions of Washington College and its graduates.

Washington College has served well the State of Maryland and the United States of America for two centuries. Today in anticipation of the advent of its bicentennial year, I send to all those who are, and have been, a part of Washington College my congratulations. They have much to be proud

of.

THE SMALL AND INDEPENDENT BUSINESS PROTECTION ACT OF 1981

HON. JOHN F. SEIBERLING

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

 Mr. SEIBERLING. Mr. Speaker, the business world is currently experiencing a phenomenon that I believe to be partly responsible for some of the Nation's economic woes—the accelerated activity in corporate takeovers, or the

so-called merger mania.

The recent growth in this activity has been record setting. As reported in the Wall Street Journal earlier this month, W. T. Grimm & Co., of Chicago, a merger broker that keeps tabs on acquisition announcements, says 1981 second quarter merger activity kept pace with the first quarter, when corporate purchases totaled \$17.5 billion, an increase of \$7.2 billion over 1980's first quarter. It has even been predicted that by the end of the third quarter, the 1981 total will surpass the 1980, full-year record total of \$44.3 billion.

This trend is worrisome, to say the least. Beyond traditional antitrust concerns, such as those posed by a possible merger between Conoco and Mobil, there are problems related to national productivity. The resources

that companies devote to acquisitions could better be spent on plant modernization and other capital improvements, or innovative research and new product development. I am afraid that what we are seeing instead is a pattern of short-sighted profit maximization and empire building.

Productivity is already in a severe slump. Our economy is crying out for new investment in modernized plants and equipment, in new technology, new products, in new ideas and for aggressive management. But rather than using capital in this manner to create new jobs and increase productivity, too many U.S. corporations are looking to mergers for paper gains. They are buying, not building. And, this may well cause, at least in the short term, a further rise in interest rates.

Another problem accompanying the merger movement is the transfer of control of local businesses to distant cities. Absentee corporations do not have the sense of commitment and community pride that home-grown enterprises do. Important decisions concerning subsidiaries made in distant headquarters are more likely to be made without regard to the needs of the subsidiary's local community or the concerns of local officials, civic leaders or union members. This often results in more job layoffs, plant closures and the loss of local support services and industries.

Increasing size generally brings with it increasing influence, and this describes another danger posed by the merger movement. As corporate entities grow, their voices in the political arena get louder, drowning out the voices of individual American citizens whose wealth and power cannot approach that of huge corporations. Allowing uncontrolled growth of concentrated economic power can only take Government further away from the people.

Another consequence of enormous mergers is that the American tradition of free competition is jeopardized by unbridled economic concentration. Cross subsidization and reciprocal selling are abilities unique to large profitcentered conglomerates which can, if exercised, do harm to the vigor of competition.

These are just a few of the obstacles I see which uncontrolled conglomerate merger movement presents to our traditional interests and values. Simply stated, if huge multibusiness domains are allowed to continue freely consolidating, growing in size and wealth but decreasing in number, we will face the real threat that the entire American economy and way of life will someday be dominated and manipulated by a minute handful of powerful corporate overlords. The threat to our democracy, as well as our free enterprise system, is obvious,

For these reasons, I am today reintroducing a bill I sponsored during the 96th Congress—the Small and Independent Business Protection Act. Specifically, the bill prohibits mergers between companies with assets or sales exceeding \$2 billion. It also prohibits mergers between companies with assets or sales over \$350 million unless the companies can prove that the transactions would enhance competition or result in substantial efficiencies, or unless the acquiring company divests itself of part of its business equal to that gained in the merger.

I was pleased to learn recently that Representative Peter Rodino has scheduled hearings before the Judiciary Subcommittee on Monopolies and Commercial Law on the merger movement in general. The first day of hearings is scheduled for August 26. I look forward to discussing at these hearings the Small and Independent Business Protection Act and also the antitrust policy of the current administration. I am concerned that this policy may be too lenient. Antitrust enforcement is a very important role which our Government plays in securing the health of the economy. In a climate of effective antitrust enforcement, the market is better able to regulate itself-far better than Government could ever regulate it. An administration that proclaims greater reliance on the marketplace as a regulator should be more, rather than less, active in enforcing antitrust law to make sure that the public will receive the full benefits of unfettered competition.

JACOBO TIMERMAN

HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

 Mr. LAGOMARSINO. Mr. Speaker, in an advertisement in today's Washington Post, the attorneys for Jacobo Timerman, explain why they have withdrawn from his case.

I commend it to my colleagues:

JACOBO TIMERMAN-AS SEEN BY HIS LAWYERS

(We reproduce textually the letter attorneys Ignacio Oclander and Emilio Perliner, prominent members of the Argentine Jewish community, on Oct. 20, 1980 sent to their client, Jacobo Timerman. The letter speaks for itself.

"As of today, our office has notified Argentina's Supreme Court that we have renounced the mandate you gave us in defense of your financial interests.

"We assumed your defense during the most critical moments of the war against subversion, when fear created distances between you and others, including family and strangers. We undertook your defense as a humanitarian duty, ignoring all political considerations.

"We believe one's every act should serve one's homeland with dignity. And as Argentines we would have felt ashamed if, at a time when everyone turned his back on you, we too had been deaf to your plea for professional help concerning your property.

We repeat: we did so as a humanitarian duty, without asking or accepting any remuneration-a principle we uphold now that we withdraw from your defense, rejecting any honorarium, past or future, for our intense professional efforts.

With this background, it is obvious that we vehemently protest your initial statements abroad which affect our nation. At that time, we advised your family of our intention to drop your case. We were then assured that the information had been twisted or mis-interpreted, and that henceforth you would carefully avoid what we were told

were incorrect reports.

"Now, after your voluntary and spontaneous statements to the SIP (Inter-American Press Assn.), explanations are superfluous. We feel completely incompatible in continuing to represent you. This decision is irreversible. And it emanates from us alone. We particularly stress this so that the provocateurs who today envelope you cannot dare claim that we have been subjected to official pressures. We insist: this is our own decision; the only pressure we feel is that of our own conscience as descendants of the noble Jewish gauchos of our native Entre Rios Province. Here in our Fatherland our grandparents are buried, and here our grandchildren flourish.

'Our Argentinism cannot be conferred on us by anyone; nor can anyone, no matter how powerful, deprive us of it. That is the heritage with which we were born, and which we will honor beyond death, through

the generations, which follow us. 'Obviously, you think and act in a very

different way.
"You also think and act differently as a Jew. You have presented the perfidious anti-Semites with an image and an argument the racist beasts have tried vainly to find for a long time: an excuse for irresponsible and resentful hatred.

THE ARGENTINE PATRIOTIC ASSOCIATION, Buenos Aires, Argentina.

THE WINNERS AND THE LOSERS

HON, GILLIS W. LONG

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

. Mr. LONG of Louisiana. Mr. Speaker, the adoption of the tax bill was the final ingredient in President Reagan's economic package. The program is now firmly in place. We all now share his hope that the economy makes a sharp and rapid turnaround-because with victory comes responsibility. If we see interest rates and inflation come down, his economic formula will have proven true. If we do not, there is a lot of suffering ahead for a lot of people. I think Ellen Goodman describes the situation very well in this column:

RICH MAN, POOR MAN (By Ellen Goodman)

Boston.-It is done. Signed, sealed and delivered. Budget cuts and tax cuts. Guns over butter. Rich over poor. We are following the faith of the president.

In the next three years, the big money and big business community will, to put it succinctly, get more.

But there are strings attached to this shifting of wealth. Though they are unwritten, they are common knowledge: a list of ethical and moral promises to be fulfilled.

The cynical, and I have been among them, may simply believe that Reagan and his rich men have done what they always wanted to do: allowed those who make the most money to keep the most. Allowed a few to buy bigger yachts while the majority struggle to keep afloat.

But the glossy presentation to middleclass and working-class American people contained a more saleable visual package. It was a sponsor's dream of what the rich individuals and the big companies could do if

only they were given the chance.

If we believed, if we bought the deal, they could replace the failing public "largess with the private. If we allowed individuals rather than governments to make decisions about money, we would get the economy to work better for all of us.

If there is any truth in advertising, then we are not merely allowing the rich to keep more of the money, to do with it as they will. We are, in effect, giving them our money to use. In return, we expect investments and winnings, and we expect the winnings to be shared.

This is not a wing and a prayer on the part of the working class, the poor, the unemployed. It's a moral obligation on the

part of the rich and the big.

So, there are strings and a cost-accounting to be done on the ethics of these economics and on the morality of the moneyed. We will tally up the ethical balance sheet in at least two human ways: in jobs and charity.

These are not new ideas, but they are measures of decency. As we shift our faith from the public sector to the private sector, we also shift our needs and our hopes. The burden of proof is on those who have promised to be responsible.

There are whole families waiting who have been hit by the buzz bombs of state and federal budget cuts. Some of them have seen a lifetime of public work suddenly dubbed "unessential," a lifetime status changed to "unemployed."

They are now on the losing side of this transfer of wealth.

Others, the poor, whose security has been patched fragilely out of federal programs, have worried less about the government on their backs than the wolf at the door. They

The winners in this national gamble have to perform as promised: to invest in growth, in the creation of jobs for the unemployed, especially those people whose rugs have been pulled out from under them. To behave as advertised, by improving the common wealth.

They will also be judged for charity, for their efforts to replace public support with private. Again and again, Reagan has said that private citizens can and will do what the government has done: care for their own communities. He referred more than once to the Mormon Church, where tithing is common.

The president is himself a poor role model in the annals of private charities. Less than one percent of his own income was given

Yet those who have joined in his marketing campaign bandied about these slogans behind the budget cuts and the tax cuts. Now, the \$100,000-a-year people will have

\$2,137 extra in 1982, \$4,648 in 1983, \$5,822 more in 1984.

They must also join the supply side of fundraising. The most modest supporter of the Reagan philosophy can pay back with the labor of the volunteer.

If all this sounds harsh, full of shoulds, obligations, responsibilities, well, I feel that way. I have had little confidence in the sincerity of the ad campaign. I have seen crude self-interest under a veneer of common

But we bought it, and we bought it with these invisible strings attached. It's up to the winners now to live up to their side of the deal.

We had all better hope it works.

OMNIBUS RECONCILIATION ACT OF 1981

HON. CARDISS COLLINS

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mrs. COLLINS of Illinois. Speaker, on Wednesday morning, conferees completed action on the Omnibus Reconciliation Act of 1981. The conferees resolved differences pending in the 17 standing House Committees and saved over \$35 billion for fiscal year 1982.

The reality of this action is that the conferees agreed upon a compromise on the food stamp program which resulted in a \$200 million reduction which was greater than what the House passed on June 26, 1981.

The reality is that in the telecommunications area, the conferees extended radio licenses from their current 3 years to 7 years. The House prior to this had no comparable position. Deregulation rode high in this policy arena.

Earlier the House Ways and Means recommended that child welfare and title XX were to be kept out of block grants. The reality is that the conferees agreed to a title XX block grant and a community services block grant.

Instead of encouraging the establishment of small business which have helped make this country what it is today. The conferees agreed to considerable reductions in small business loans.

The reality is that the conferees agreed to limit those who can rescue the VA funeral allowance of \$300, limited class II dental benefits and restricted reimbursements for correspondence training.

The reality is that the conferees let stand the repeal of the 122 monthly minimum social security benefit, action which will undoubtedly impact millions of our retired citizens.

The reality is that the conferees reduced Federal funding for medicaid in fiscal years 1982, 1983, and 1984.

The stark reality of the reconciliation conference report is that in numerous instances, the safety nets which the President promised would save those programs designed to aid the truly needy are either rendered so irrevocably impotent or else they are

no longer intact.

Yes; we have a commitment to the Head Start program, section 312 rehabilitation loans, and have removed the restriction on housing assistance for communities with rent control, have agreed to increase authorizations for public housing operating subsidies and retained family planning as a categorical program. We have also paved the way for program infighting on the State and local levels, because many of the block grant proposals which consist of programs to make our citizen lives better are not targeted or directed. Hence, there will be chaos at the expense of the truly needy.

Mr. Speaker, in closing I would like to share with my colleagues a line from the Bible which says that "You reap what you sow." By voting for the conference report to the reconciliation package we will be sowing seeds which do not contain safety nets but death traps. I only hope that Americans reap the full impact of this report before it

is too late.

THE 21ST ANNUAL UNITED STATES-MEXICAN INTERPAR-LIAMENTARY CONFERENCE—

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. GILMAN. Mr. Speaker, the 21st Annual United States-Mexico Interparliamentary Conference was held from the 11th to the 15th of June in Manzanillo, Mexico. That important conference brought together legislators from both nations to discuss issues of mutual concern, seek a better understanding of each other's point of view and to help improve our bilateral relations.

This year's conference came on the heels of the highly successful Camp David meeting between President Reagan and Mexico's President Jose Lopez Portillo. These important discussions set the tone and the mood for the conference that followed. In recognition of the major role that the legislative branches play in our respected political institutions, President Lopez Portillo attended this year's meeting in Manzanillo to personally express his support for its success.

The U.S. delegation to this, the oldest interparliamentary exchange, was headed by Congressman Kika de La Garza, of Texas, representing the House, and Senator Charles Percy of Illinois, from the Senate. The Mexican delegation was ably led by Deputy Luis M. Farias from the Mexican

Chamber of Deputies and Senator Morelas Jaime Canseco from the Mexican Senate. The leaders of both delegations deserve special recognition for their important contributions to the success of this year's meetings.

As a member of the Committee on Foreign Affairs and the ranking Republican on the Subcommittee on Inter-American Affairs, I have followed United States-Mexican relations closely for some time and was once again honored to serve as a member of the U.S. delegation for the fifth consecutive year. In this capacity, I was privileged to lead the discussion on the subject of the law of the sea. For the benefit of my colleagues, I submit the full text of my remarks at this point in the Record.

STATEMENT OF HON. BENJAMIN A. GILMAN, MEMBER OF CONGRESS (26TH DISTRICT, NEW YORK) BEFORE THE 21ST MEXICO-UNITED STATES INTERPARLIAMENTARY CONFERENCE HELD IN MANZANILLO, MEXICO, JUNE 12, 1981

WORKING TOWARD A LAW OF THE SEA TREATY

Mr. Chairman, I welcome this opportunity to discuss briefly the situation with regard to the United States participation in the Third UN Conference on the Law of the Sea, which I have followed with considerable interest for several years as a member of the U.S. Department of State's Public Advisory Committee on the Law of the Sea, as a congressional advisor to the U.S. Delegation to the Conference and as a member of the Committee on Foreign Affairs of the House of Representatives.

Before the 10th session of the Conference that convened in New York last March, the Department of State announced that the new Administration would conduct a full fledged policy review of U.S. participation in the Conference, and several high-level personnel changes were made in the U.S. Dele-

gation.

The Committee on Foreign Affairs has held several hearings following the conclusion of the New York session, with the new head of the delegation, Assistant Secretary of State, James Malone and, with Ambassador Elliot Richardson, former delegation chairman and president of the U.S. Public Advisory Committee on the Law of the Sea.

Permit me to note two points in this regard: first, the rationale for the policy review; and second, certain problems that the U.S. has identified in the text of the draft convention.

Why a policy review?

Any new administration has the inherent right to review policy on foreign affairs matters. Indeed, the review of U.S. policy in the Conference is considered necessary if the draft convention and, ultimately, the treaty is to obtain the advice and consent of the Senate. It would be unfortunate to conclude the negotiations after years of difficult and delicate work only to have the United States not ratify the treaty. The new administration aims to study the convention in order to make its own imprint on the treaty process and thus legitimize what I hope will be its support for the conclusion of a comprehensive Law of the Sea treaty.

Extent of review

With respect to the policy review—In testimony before the Committee on Foreign Affairs, the new head of the U.S. Delega-

tion, Assistant Secretary Malone has indicated that the policy review is to be thorough and to cover all aspects of the draft convention including U.S. interests and objectives. He also indicated that the review would not be complete until late summer or early fall of 1981. Some of my colleagues and I believe that the U.S. should conclude its policy review promptly and be prepared to return to the resumed session of the conference on August 3. Indeed, I have personally raised this issue with Assistant Secretary Malone and in the recent meeting of the Public Advisory Committee on the Law of the Sea.

Besides the problem of the time-frame, the Administration in its review thus far has identified several problems with the text of the draft convention. These mainly relate to the provisions on the international Seabed Authority, some of which had been identified by the previous administration for review. In brief, let me enumerate some of these problems:

First, access by miners to the international seabed—the draft convention provides that applications of mining companies are to be granted by the Authority upon the approval of the Legal and Technical Commission. Such approval can be reversed only by consensus. However, the industry is concerned that there may be an arbitrary delay or disapproval by the Legal and Technical Commission of an application. To provide assurance to miners, it would be useful to provide a provision calling for prompt commercial arbitration in the event of the Commission's failure to approve an application to mine.

Second, the composition of the 36-member council is a concern—In particular, the U.S. government is concerned that the draft convention assures the Soviet Union a guaranteed seat, but it does not guarantee the U.S. a seat. While the U.S. is likely to be able to obtain a seat either as a major investor or net importer of seabed minerals, the Administration and the industry, considering the huge investments involved, believe that there is a need for the U.S. to clearly have a seat on the Council.

Third, the Administration is quite concerned with the provisions for the transfer of technology-The "Enterprise," entity established by the treaty, will parallel the development of the seabed by private companies. The draft convention requires the seabed miner to sell the technology it owns to the Enterprise, if the Enterprise is unable to purchase suitable technology on the open market. It must also provide assurances for the transfer of third-party technology which he is using. The same requirements apply for transfer to developing countries. Some changes in the draft convention are needed which would eliminate the complications of transferring technology used by third parties to the Enterprise and the mandatory sale of technology to parties other than the Enterprise.

Fourth, the preparatory commission and the protection of prior investments—The industry requires that the investments that they are now making in seabed mining be protected under the draft convention. The preparatory commission, which should be responsible for preparing rules and regulations for the authority and the mining system, should also have authority to approve applications of miners that have made major investments over a prior period, thus allowing them to proceed with their mining capability upon receiving assurance of a

suitable mining site and contract terms.

This would protect their prior investments.

I very much hope that these problems can be worked out in the near future. It is my belief that these matters should and can be ironed out within the context of the present negotiations on the draft convention. The Law of the Sea Treaty is a milestone for international relations and represents a most unique opportunity. Never before has such an international agreement on matters of mutual concern to so many states of the world been attempted. One can not understate the importance of concluding a comprehensive treaty on the Law of the Sea. Such a treaty would promote a high degree of international order; it would establish rules by which potential conflicts could be resolved by peaceful means. In this respect the U.S. and Mexico could look to such a treaty as a guide for bilateral maritime relations.

As we know, there has been a lingering disagreement between our two nations concerning our mutual fishing rights within our 200 mile zones. For several years there have been unsuccessful negotiations to resolve these disagreements. Just this past week, as part of the Camp David discussions between President Reagan and President Portillo, it was agreed that these negotiations would be resumed in order to resolve this issue. Acting Deputy Assistant Secretary of State, Everett Briggs, assured our House Inter-American Affairs Subcommittee that the State Department will move expeditiously to activate these negotiations.

Neither U.S. nor Mexican interests are served if we cannot come to some agreement on the regulation of highly migratory species such as tuna. Our governments have had differences in the past over the issue of allocating tuna; however, I hope very much that we can reach agreement soon. Efforts to resolve these issues would be in accord with the general principles of the draft convention on the Law of the Sea that provides that states should engage in international cooperative arrangements concerning living

resources of the sea.

I would finally like to relate my vigorous endorsement of the guiding principle on which the Law of the Sea Treaty is based. The oceans of the world, and the seabed underneath, represent the resources of the future. I believe all states should share the benefits and the administration of the international seabed area. It is my hope that the path of negotiations will not stray from the universal goal of using this "common heritage of mankind" to the utmost of man's capabilities.

Mr. Chairman, I look forward to building a cooperative spirit between our two nations we address these important issues of mutual concern.

COMPULSORY CAMPAIGN CONTRIBUTIONS REFORM ACT

HON. WILLIAM L. DICKINSON

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES Tuesday, August 4, 1981

• Mr. DICKINSON. Mr. Speaker, despite all of the Federal legislation enacted in recent years to regulate the election process in the United States, Congress has failed to limit one of the most blatant abuses of the American political system-the use of compulsory union dues for political purposes. As a result, millions of American voters are forced to support political candidates and causes which they

might otherwise oppose.

Of all private organizations in this country, only labor unions can require a person to pay money as a condition getting and keeping a job. Under this unique special privilege, unions collect about \$3 billion a year from individuals who have to pay up or be fired. The Federal Election Campaign Act, as amended in 1976, prohibits the use of compulsory dues for direct cash contributions to candidates. This appears to restrict the use of compulsory union dues for political purposes. However, the law specifically permits union officials to use money, taken from workers as a condition of employment, to finance the operations of union PAC's and provide extensive "in-kind" political services such as mass mailing, phone banks, precinct visits, and voter registration drives. This in-kind spending is neither documented nor reported to the FEC.

On July 31, I introduced legislation, the Compulsory Campaign Contributions Reform Act, which would guarantee the right of voluntary participation in the election process. This bill would close the current loophole in the FEC law by requiring that all moneys used for political purposes not just direct contribution-be derived from voluntary contributions. It will protect the political freedom of the working man and woman.

We must not permit any man or organization to force any person to make political contributions against his beliefs or convictions. I hope that every one of my colleagues who share that view will actively support my bill, and I invite your cosponsorship.

BRAC INTERNATIONAL PRESIDENT FRED J. KROLL

HON. FRANK J. GUARINI

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. GUARINI. Mr. Speaker, on July 30, 1981, BRAC president Fred J. Kroll lost his fight against leukemia. His death at the young age of 45 is a great loss to his family, his union, and this country.

For us who knew Fred Kroll, the thought of him losing any battle came as something of a surprise even though the opponent was leukemia. Fred Kroll was a hard working man whose determination and drive afforded him a personal success story which in the end benefited every one of his union's members.

Mr. Speaker, with your permission I would like to insert a biography of Mr. Kroll in the RECORD. This biography was prepared by those who knew Fred Kroll, and were fortunate enough to share in his life on a daily basis, the Brotherhood of Railway, Airline and Steamship Clerks, Freight Handlers, Express and Station Employees.

FRED J. KROLL, 1935-1981

courageously-fought five-year battle with leukemia ended on July 30, 1981 when BRAC International President Fred J. Kroll died at the age of 45.

Death came in a Philadelphia hospital where he had been undergoing treatment and where, characteristically, he continued to chart the union's course and to develop programs and strategies for future collective bargaining and legislative campaigns

Kroll first became president of BRAC in 1976 when he was chosen by the union's Executive Council to complete an unexpired term of office. He was reelected president by acclamation at BRAC's 1979 Toronto Convention.

When he was elected a member of the AFL-CIO's Executive Council in 1978, he became the youngest person ever to be named a federation vice president.

Assuming a leadership position within the ranks of rail labor, Kroll was elected chair-man of the Railway Labor Executives' Association in February 1980. Composed of leaders of 20 unions with membership in the railroad industry, the RLEA is a policymaking group dealing with legislative and regulatory issues involving railway workers and the industry of which they are a vital

EARLY CAREER

No stranger to literally thousands of BRAC members, Kroll was an active and dedicated member of the Brotherhood for 28 years.

Born in Philadelphia, Pennsylvania on October 29, 1935, he came from a trade union family. His father was a long-time member of the International Union of Electrical, Radio and Machine Workers.

BRAC's leader launched his rail career in 1953 as an IBM machine operator on the former Pennsylvania Railroad. Quickly becoming involved in Quaker City Lodge 587, he served as vice president, president, and local chairman.

In 1970, he was elected general secretarytreasury of the Penn-Central System Board. The next year he was elected general chair-

Unanimously returned to office as general chairman in 1973, he continued to head BRAC's largest system board until January 1975 when the Executive Council elected him an international vice president. He was reelected at the union's May 1975 Convention in Washington, DC.

During the period of his general chair-manship and later his vice presidency, his leadership abilities were successfully tested while meeting the challenge of protecting workers' rights when the northeast railroads (including the giant Penn-Central) plunged into bankruptcy. He played a key role in shaping the legislation that led to the creation of Conrail.

From his earliest days as a trade unionist, Kroll was widely recognized as a skilled and determined negotiator.

An equally skilled and forceful spokesman on behalf of his own members and all of rail labor, Kroll spearheaded the April 29 Rail Labor Rally in Washington that drew 20,000 railroaders to protest the Reagan Administration's budget-cutting policies with regard

to Conrail and Amtrak. Throughout March and April, he worked tirelessly in testifying before Congress to urge restoration of adequate funding for both railroads.

And, shortly before his death, conferees adopted legislation insure the continuation of Conrail and Amtrak and to provide a solution to the financially Railroad ailing Retirement System.

FROM "REASONABLE MILITANT" TO "MAVERICK LEADER'

Once describing himself as a "reasonable militant," Kroll quickly captured the attention of the media after his election as BRAC president and was frequently profiled in major news magazines and newspapers

The Norfolk and Western strike, which he launched in July 1978 and which lasted for 82 days, tested his mettle, and his masterful handling of it led to the eventual elimination of both the rail industry's mutual aid pact and one existing in the airline industry. Business Week magazine called him "the mayerick leader who bested the N&W."

Kroll himself described that precedent-setting strike as one that "let the railroads know we are an aggressive union, that we mean business and that we have the support of our people."

A cover story in the August 1979 issue of Time Magazine on "Fifty Faces for the Future" cited BRAC's president as one of those who possessed "the sense of boldness that remains the prime prerequisite for leadership." The article described Kroll's efforts to make the labor movement more attractive for younger workers by encouraging greater initiative at the local level.

As Next Magazine phrased it in an April 1981 profile, Fred J. Kroll was one of the 'five-score Americans who has the potential to achieve substantial power over the minds and lives of their fellow citizens during this

That potential ended tragically on July 30, 1981 but his legacy of bold leadership and dedication to economic justice and dig-

nity for workers will endure.

A devoted family man, he leaves his wife Hildegarde; three daughters-Karen, Anita and Michele; his parents—Fred and Catherine; and three brothers—Albert, John and Joseph.

DEDICATION TO REV. HUGH MCHENRY MILLER

HON. JAMES A. COURTER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. COURTER. Mr. Speaker, 35 years ago, Rev. Hugh McHenry Miller came to Dover as pastor of the First Memorial Presbyterian Church. A benign man of religious devotion and knowledge, Reverend Miller took a great deal of interest in the welfare of his congregation and the residents of Dover and Morris Counties.

He participated in and promoted many community service programs, such as the drug and alcohol abuse council, the recreation commission, the library board, and the Dover Volunteer Fire Department. He served as finance chairman of the Dover Child Care Center and the president of the Rotary Club.

Reverend Miller donated his time to other organizations as a member of the health planning council, as chairman of the Morris County Welfare Board, and as director of the Morris County Legal Aid Society where countless people were helped thanks to his unselfish concern for his fellow

A minister of the Presbyterian faith, Reverend Miller was equally involved in church affairs in the local community and on the State level. The First Memorial Presbyterian Church of Dover was cited for ministry to military personnel and families by the U.S. Army Munitions Command at Picatinny Arsenal in Dover. He furthered the cause of interdenominational organizations as well when he served as chairman of the General Commission on Chaplains and Armed Forces Personnel in Washington, D.C., and as a member of the Commission on Ministry to Service Personnel in East Asia of the National Council of Churches of Christ.

Reverend Miller has offered guidance and counsel to many troubled souls, compassion to those in times of need, and spiritual uplifting and peace to many in today's hectic world.

I thank my colleagues for the opportunity to recognize the many accomplishments of Rev. Hugh Miller during his 35 years of service to the secular and religious communities in Dover and Morris Counties. And on behalf of the many people whose lives he has touched in some small way, I would like to offer my most sincere gratitude. I wish the reverend and his family much happiness in the years ahead.

ANTI-SEMITISM IN THE UNITED STATES

HON. STEPHEN J. SOLARZ

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. SOLARZ. Mr. Speaker, I would like to bring to my colleagues' attention a particularly thoughtful article that recently appeared in the Washington Star entitled "Uneasy Eye on the Anti-Semitic Fringe." Phil Baum, the author of this piece and an associate executive director of the American Jewish Congress, has long been recognized as one of the outstanding leaders of the American Jewish community.

Mr. Baum makes two important points in his article. First, he notes that, despite media reports of intensified anti-Semitic vandalism and violence in the United States, there is considerable evidence that anti-Semitism is not on the rise here. In fact, Mr. Baum concludes that anti-Semitism "has become shabby, disreputa-ble, and abhorent" in the eyes of the American people at large. But he also warns that there is still cause for concern about a revival of anti-Semitism, particularly at a time when the economy is declining and social opportunities are narrowing

I urge my colleagues to read this article, the text of which follows:

UNEASY EYE ON THE ANTI-SEMITIC FRINGE (By Phil Baum)

In one sense the Jewish community can never properly be accused of overreacting to signs of anti-Semitic activity. The trauma of the Hitler period does not allow us to feel entirely secure even in free and apparently enlightened societies. The history of Western culture is burdened by a tragic legacy of anti-Semitic prejudice. We sense that this predilection, quiescent from period to period, lurks beneath the skin of our civilization.

At the same time, it is imperative to perceive accurately the situation we currently confront. In recent months, reports of intensified anti-Semitic vandalism and violence have filled the media. These attacks have, for the most part, taken the form of scurrilous graffiti scrawled on the walls of houses and schools, the defacement and looting of synagogues and other public Jewish buildings and demonstrations, rallies and marches by neo-Nazis and the Ku Klux

Viewed against the vastness of our country, the complexity and heterogeneity of our society and the general increase in crime in America, however, the problem of anti-Semitic vandalism cannot be said to be in imminent danger of getting out of control. This judgment is confirmed by the latest Gallup Poll, which shows that positive attitudes toward Jews have increased in recent years.

There is no evidence that any of the reported acts of anti-Semitism were carried out in concert or pursuant to any common design, purpose or arrangement. In the overwhelming of the cases in which the perpetrators have been found, they have been teen-agers under the age of 17, and in virtually all cases they acted independently. There is no evidence of conspiracy.

The principal basis for the persistent belief that there is a resurgent, organized effort to promote anti-Semitism in the United States derives from reports of a reviving Ku Klux Klan and American Nazi party. And, indeed, both government reports and the findings of private investigators tend to confirm that there are significantly more Klan members today than there were a year ago. Yet it seems fair to say that the Klan does not appear on the verge of a breakthrough in terms of public support.

IMPOTENCE DEMONSTRATED

Similarly the various neo-Nazi parties in the last year have captured a larger share of media notice-but with no evidence of concomitant growth in their influence, standing or numbers. On the contrary, American Nazi rallies and demonstrations during the past several years have proved the impotence of these fringe groups and demonstrated their marginality and the total contempt and hostility in which they are held.

Moreover, the results of last November's elections (even though members of the Klan and Nazi party were able to attract enough votes to win two or three primary election contests) attest unmistakably to the sharp, almost historic, decline of antisemitism as a factor in American elections. Jews continue to hold public office in numbers disproportionate to their percentage in the population. In fact, Jewish candidates were elected to high position not only in districts in which there was a large Jewish constituency but also in places in which Jewish voters were few. Here, too, the Gallup Poll confirms the facts. In 1937, 46 percent of Americans responding to the poll said they

would vote for a Jewish presidential candi-

date; by 1978, the figure had risen to 82 per-

All the social indices measuring anti-Semitism over the years converge in this same direction. Jews are not significantly discriminated against in employment or housing. Jews confront no special encumbrances in gaining admission to the most prestigious universities and professional schools. More critically, there is not a single public personality or molder of public opinion, not a single influential publication, not a single important radio or television commentator who has not expressed complete and total abhorence and revulsion over anti-semitism in all of it manifestations.

Finally, there are no significant denominations or church bodies in this country which espouse or condone anti-Semitism, although there are certainly individual religious leaders who come close. When they do, they are invariably repudiated by their own colleagues and their own churches and find it necessary or at least prudent, to attempt to explain away their comments and to disavow any anti-Semitic intent.

LEGACY OF THE SIX MILLION

The fact is that anti-Semitism has become shabby, disreputable and abhorrent since the slaughter of the Six Million by the Nazis. To be sure, this is an intolerable price for our acceptance. We would rather have back the Six Million and take our chances with the world, as we have done throughout our history. But this at least is the legacy left to us by those martyred by the Nazis.

Why then, the persistent, pervasive sense of unease? Because despite these indicators, we still intuit a certain potential for instability at the heart of public life.

Most Jews believe that the well-being and security of our own community is intimately and ultimately bound up with the manner and intelligence with which our country collectively confronts the challenge of national life. At a time of a declining economy and narrowing social opportunity, no one can dismiss a pronounced societal trend toward irrationality, a susceptibility to absolute and simple solutions, a dangerous and increasing impatience with the tensions and ambiguities that inhere in freedom.

The social and psychological mechanisms that produced cults and inspired mystical fads have more recently encouraged a proliferation of extremist political groups that do not flinch at claiming moral rectitude as well as political panaceas. It is not inconceivable that the yearning for certainty and simplicity in a complex world may become further corrupted and induce some to revive the mythology of anti-Semitism.

As Jews, neither our past nor our present allow us to relax into smugness. But neither must we mount the barricades or erect fences around our community. It is in helping to make a better world that the Jewish community acts truest to its prophetic tradition and its own self-interest.

ALL MINERS WORK IN A DANGEROUS LEAGUE

HON. JOSEPH M. GAYDOS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

. Mr. GAYDOS. Mr. Speaker, debating whether metal, nonmetal, and other mining are less dangerous than coal mining is like debating whether to stop is more sudden in falling from 300 yards or 300 meters-distinctions can be found, but they make very little difference in the result.

All forms of mining are dangerous. Distinctions make very little difference when it comes to result.

On these results the Mine Safety and Health Administration (MSHA) keeps statistics and arranges them in a formal fashion so they can be properly introduced to the Congress as data.

And the data for the first 9 months

of 1980 show us:

A death rate underground of 0.08 per 200,000 mine hours among coal

A death rate underground of 0.07 underground for all other forms of mining.

A death rate of 0.03 for surface coal

A death rate of 0.05 for all other surface miners

If the 97th Congress is like Congresses past, bills will be passed to exempt certain forms of surface mining from MSHA jurisdiction on the supposition they are less dangerous or somehow different.

But the data show:

A death rate of 0.06 for those who work in surface stone pits and quar-

A death rate of 0.05 for surface sand and gravel pits.

A death rate of 0.05 in surface nonmetal mines.

A death rate of 0.04 in surface metal

Remember, this is matched against a surface coal mine death rate of 0.03 and an underground rate of 0.08

Clearly some forms of mining for which exemption is sought-on the supposition of difference-approach underground coal mining in danger.

In addition, surface miners of stone and sand and gravel accounted for 47 percent of all surface mining fatalities in the United States.

Stone mining alone accounted for 28 percent

And those who tear stone and sand and gravel from the earth represent only 21 percent of all surface miners, but take 47 percent of the deaths.

The data seem to show that anybody who mines at the surface is playing in the same league, a fast and dangerous

Mining in any manifestation is very dangerous, and there may be small distinctions, but there are very few differences.

By the way, Mr. Speaker, preliminary MSHA figures for last year indicate that mining deaths in 1980 were below mining deaths in 1979.

In MSHA we have an effective agency that pays attention to miner safety and health and only miner safety and health. There is concentration, focus and knowledge. These are Congress should reinforce rather than disturb.

CAPTIVE NATIONS WEEK

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

 Mr. DERWINSKI. Mr. Speaker, Captive Nations Week received a new spirit from the strong support it received from events held across the country. Such active support for the cause of freedom will provide the spark to effective year-long efforts in the unending struggle for a triumph over communism. This is the inspiration of Captive Nations Week.

I would like to insert several news articles and reports of observances of the week as evidence of this new spirit. These reports follow:

Invocation by the Very Reverend Stephen Shawel, C.S.S.R., Before the Captive Na-TIONS WEEK LUNCHEON OF JULY 15

In the name of the Father, and the Son, and the Holy Spirit:

Merciful God, as we gathered here today to mark the 22nd anniversary of the Week of Captive Nations and the 40th anniversary of the renewed statehood of Ukraine, we ask Thee, shed Your grace upon all those subjugated nations enslaved by godless communism and free them from captivity.

We especially pray for all those proud we especially pray for all those proud people who stand up and demand their God given freedom for their nations, and for this they are committed to forced labor camps, exile, mental institutions, and even subjected to a mandate famine.

Bless, O Father, our President Ronald Reagan, the Members of the Senate, and House of Representatives. Grant them the strength and courage to stand without compromise in the defense of human and national rights for all oppressed people in the whole world.

We ask this in Thy name in the hope that our prayers will be answered, Amen.

[From the Washington Inquirer, July 17, 1981]

REAGAN REVIVES CAPTIVE NATIONS WEEK

An indication that the recent change of administrations brought with it a hardnosed stance on what poses the greatest threat to human rights in the world appears in the contrast between President Ronald Reagan's Captive Nations Week proclamation issued on July 1 and those of his predecessor.

Reagan's proclamation denounces "the denial of the most elementary forms of personal freedom and human dignity," with specific indictments of Marxism-Leninism and other forms of de-humanizing statism. Former President Jimmy Carter's Captive Nations Week proclamations were for the most part bland, cryptic memos whispering praise for the ideal of self-determination.

On July 17, 1959, a joint resolution of the Eighty-sixth Congress provided for the President to proclaim the third week of every July as Captive Nations Week. In Carter's first year in office, the week was half over before he woke up and belatedly commemorated the occasion.

Carter was better prepared in 1978; his proclamation of July 11 preceded Captive Nations Week by five days.

Carter's proclamation on June 22, 1979 designated July 15 as the start of Captive Nations Week. In this same timeframe, another captive nation was born. The Sandinista guerrillas, whose dedication to the ideals of Fidel Castro serves as inspiration to others, completed their conquest of Nicaragua—Anastasio Somoza Debayle resigned as President on July 16 and the interim government collapsed two days later.

In 1980, Carter issued the Captive Nations Week proclamation far in advance of the July 13 commencement date: May 19, the day before the Michigan and Oregon primaries. After the 1979 fiasco over the Soviet infantry brigade in Cuba, Carter may have been inspired to demonstrate that he wasn't "soft on Communism," for in a notable departure from his previous proclamations, he singled out an oppressor-a nation which had betrayed his trust and taught him much about its true nature the previ-ous December. "Our ideal has remained that of our founding fathers: governments derive their legitimacy from the consent of the peoples they govern. Soviet aggression against Afghanistan is the latest stark reminder that this ideal is not universally re-Carter growled.

Soviet aggression proceeded unchecked throughout 1980's Captive Nations Week, and while Soviet heavy weaponry reduced Afghan villages to rubble, the Olympic Games opened in Moscow with many Free World teams competing in spite of Carter's call for a boycott. There was one consolation for the year 1980: on July 20, the first day of the following week, 12-year-old Walter Polovchak asked for political asylum in the U.S. when his disenchanted parents prepared for the family to return to the Soviet Union.

Common to all four Carter proclamations—with the exception of the single reference to Soviet aggression—is the banality of the texts. These seemingly half-hearted proclamations are weak reeds to lean on when critics of the Reagan administration ballyhoo Carter's human rights principles.

From the language of his proclamation designating July 19 as Captive Nations Week, President Reagan appears to have a leg-up on eclipsing the Carter record. In length alone, it is two-thirds of the sum for Carter's prim releases: in vigor and feeling, it is a passionate sermon from the "bully pulpit" in condemnation of oppression.

CAPTIVE NATIONS WEEK, 1981—BY THE PRESIDENT OF THE UNITED STATES OF AMERICA A PROCLAMATION

Twenty-two years ago, by a joint resolution approved July 17, 1959 (73 Stat. 212), the Congress authorized and requested the President to proclaim the third week in July as Captive Nations Week.

Last January 20 saw again a change in Administration under our Constitution, the

oldest written document of its type in continuous force in the world. The peaceful and orderly transfer of power in response to the sovereign will of our people is sometimes taken for granted by Americans. Yet events in some other areas of the world should remind us all of the vital, revolutionary ideal of our Founding Fathers: that governments derive their legitimacy from the consent of the peoples they govern.

During Captive Nations Week, Americans should realize our devotion to the ideal of government by consent, a devotion that is shared by millions who live in nations dominated today by a foreign military power and an alien Marxist-Leninist ideology.

This week, Americans should recall the series of historical tragedies—beginning with the broken promises of the Yalta Conference—that led to the denial of the most elementary forms of personal freedom and human dignity to millions in Eastern Furope and Asia.

In recent years, we have seen successful attempts to extend this oppression to Africa, Latin America and Asia—most recently in the brutal suppression of national sovereignty in Afghanistan and attempts to intimidate Poland.

During Captive Nations Week, we Americans must reaffirm our own tradition of self-rule and extend to the peoples of the Captive Nations a message of hope—hope founded in our belief that free men and women will ultimately prevail over those who deny individual rights and preach the supremacy of the state; hope in our conviction that the human spirit will ultimately triumph over the cult of the state.

While we can be justly proud of a government that is responsive to our people, we cannot be complacent. Captive Nations Week provides us with an opportunity to reaffirm publicly our commitment to the ideals of freedom and by so doing maintain a beacon of hope for oppressed peoples everywhere.

Now, therefore, I, Ronald Reagan, President of the United States of America, do hereby designate the week beginning on July 19, 1981, as Captive Nations Week.

I invite the people of the United States to observe this week with appropriate ceremonies and activities and to reaffirm their dedication to the ideals which unite us and inspire others.

In witness whereof, I have hereunto set my hand this thirtieth day of June, in the year of our Lord nineteen hundred and eighty-one, and of the Indpendence of the United States of America the two hundred and fifth.

RONALD REAGAN.

OPENING REMARKS GIVEN BY HORST A.

UHLICH, CHAIRMAN OF THE CAPTIVE NATIONS COMMITTEE OF NEW YORK, ON
SUNDAY, JULY 12, 1981, THE OPENING DAY
OF CAPTIVE NATIONS WEEK, AT THE CENTRAL
PARK MALL IN MANHATTAN

Senator D'Amato, Mayor Koch, Congressman Biaggi, Congressman Green, Honorable Bruce Caputo, Dr. Garcia—President of the World Anti-Communist Action Front—, Honorary Chairman Dr. Docheff, Distinguished Guests and all our Friends:

On behalf of the Captive Nations Committee of New York, I welcome you to the 23rd Annual Captive Nations Rally. We are very happy that you are all here with us today, because every one of you represents a forceful symbol of freedom. Your spirit proves that you care deeply about our work. Your very attendance at this important rally for

freedom—in these worsening times—tells the world that you have not forgotten your homelands, and you have not forgotten those who still suffer under Communist domination over these homelands. It also proves that you care very much about your adopted country, the United States. The history of this great country sets a perfect example for us. Certainly, if our Founding Fathers had sat back in their chairs, just waiting for things to happen instead of working hard, this country as we know it today would not exist.

The struggle, beginning in 1776, for freedom of the American Colonies from English tyranny, looked hopeless. To all observers, it looked like a foolish dream. But a handful of determined and courageous men risked their lives against that tyranny.

When we think of English tyranny, we cannot help but sympathize with the suffering population of Northern Ireland. And going back only a few decades, we remember with contempt the diabolical Anthony Eden, Foreign Minister of Great Britain, who was such a worshipper of the criminal Josef Stalin that he ordered hundreds of thousands of freedom fighters from the many Captive Nations-numbering many of our Slavic brothers-back to their deaths at the hands of the bloodthirsty regime in Moscow. This brutal plan, hatched in London, has become known in history as "Operation Keelhaul." On top of this, we are reminded of that product of the English political intelligence-the expulsion of 17 million East Germans from their homelands during the years 1945 to 1947. The hordes of Bolshevism were invited to overrun Eastern and Central Germany, subjecting over 3 million helpless women and children to rape and massacre while the British government rejoiced and applauded. And, of course, there were entire nations, such as the Cossacks, which were entirely exterminatedand Eastern and Central Europe were delivered to the Commies.

The United States was founded as a haven of refuge for oppressed peoples from all nations; and as such, it should be the foremost enemy of the Communist Party International. Our Founding Fathers would have wanted it that way. However, there are those who represent the Devil who, since 1917, has had only one thing in mind-to deliver more and more nations of people into the hands of the Communist Party International. We see it in the work of the New York Times, which devoted every column to the defeat of our heroic soldiers and sailors in Vietnam. And now, the same newspaperassisted by the rest of the mass media that has always leaned toward the Communist dictators—is hard at work checkmating American efforts in Central and South America, with Cuba in between. And their sympathies have been with all the Red movements on the continent of Africa-even as they leaned toward Mao Tse-tung in his brutal career in the Far East.

We must get to work to overthrow this force of pro-Communist propaganda that is hiding the truth of history from the American people—especially our youth. These propagandists have no right to use the airwaves that belong to the American people, for the promotion of ideas that are leading to the destruction of American freedom, American morality—and America itself.

Now, as far as our organization and our activities are concerned: you may rest assured that the more successful we become in our efforts, the more danger there is of attack against us through negative attitudes

and undermining rumors. We must be on the alert that no one and nothing succeeds in undercutting and dividing our common front against the Communist enemy. We go forward, as we have always done, undivided and always expanding our organization and increasing our activities.

Thus, we will carry on toward our objective of total success in freeing the Captive

Afghanistan, Albania, Armenia, Azerbai-Cambodia. jan, Bulgaria, Byelorussia, Cambodia, China, Croatia, Crimean Tatars, Cossackia, Cuba. Czechia, East Germany, Estonia, Georgia, Hungary, Idel Ural, Karatchays, Laos, Latvia, Lithuania, Mongolia, North Caucasus, North Korea, North Vietnam, Poland, Romania, Serbia, Slovakia, Slove-Vietnam, Tibet, Turkestan, nia. South Ukraine.

We can and we must stop the advance of the Communist Party International. Let's stand united. And God bless us all.

FIFTH AVENUE MARCH STARTS SPECIAL WEEK FOR CAPTIVE NATIONS

(By Joachim C. Becker)

Nations Week in the United States got off to a colorful start in the City as flags of 35 communist-ruled countries fluttered in yesterday's breeze during a march up Fifth Avenue to a rally at the 72nd Street bandshell in Central Park.

The parade, which began with a mass in St. Patrick's Cathedral, featured an estimated 1,000 ethnic Americans dressed in their native folk costumes and clutching national flags, an all-girl Croatian marching band and placards urging freedom for the peoples in captive nations from Afghanistan to Viet-

Sen. Alfonse D'Amato, the grand marshal; Rep. Bill Green, parade marshal; Horst Uhlich, chairman of the Captive Nations Committee, and other committee officials marched from parade start at 51st Street to

the bandshell.

'Our nation must be second to none to thwart Soviet aggression at home and abroad. We must put the Soviets on notice that the United States has the will to oppose them and encourage the rest of the world to stand firm against them," D'Amato told the assembly gathered at the band-

'God has entrusted this nation with a special mission, it has the absolute obligation to the peoples of this world to remain strong and steadfast with a commitment to peace and justice. Freedom is everyone's right," the Republican junior senator from New York concluded to cheers and applause.

Rep. Mario Biaggi, D-Bronx and Queens, joined officials at the bandshell and called attention to the important principles involved in the meaning of the week, which was established by Congress in 1959.

"This handful of committed individuals continues year after year to give hope to those people behind the Iron Curtain that some day they will have the freedom they

once knew," Biaggi said.

When the paraders had filed into the bandstand area, an Israeli tourist who saw the red flags carried by the Polish contingent asked if they were a communist demonstration.

"No they are anti-communists," someone replied.

The Israeli clapped. Then he read their signs saying they were from captive nations.

Only they know what communism means and what it really means to be without a nation, like we were once," he said.

The parade had earlier passed the Yugoslavian mission to the United Nations at 66th Street, where 10 police officers watched the flags and chanters pass on the other side of the street.

This is not a difficult detail," one patrolman remarked.

Before the parade had started, marchers talked about the situation in their enslaved homelands.

"We have to be careful what we say in our letters to my brother who is in Afghanistan. We can only say social things," said Abdullah Kwaja, who was dressed in a chapan (robe of many colors) and dopou (cap), the traditional native costume.

'We can't open our heart to them," said his wife, Sabahat.

THEY'D PUNISH OUR FAMILY

Kwaja added: "There is no freedom to send letters, it is just too dangerous. They'd punish our family, relatives, even friends.

Estonians waiting next to the people from Turkistan agreed with the Afghan refugees.

The Soviets took the snap shots out of letters to our relatives, and we know they never got them," said Hilga Holpus, who lives in Suffolk County with her parents, who fled Estonia after World War II

Miss Holpus, wearing a "rahva riided" or folk costume of a rust-colored skirt, white blouse and muetz (headdress) said all her relatives still lived in Estonia.

When they write us, they ask for clothes, materials, shoes and nylon stockings," she

At the bandshell, Uhlich assailed The New York Times for defending communism and trying to defeat "our heroic soldiers and sailors in Vietnam." He also criticized the media in general for working to "checkmate the U.S. and freedom in Central and South

Uhlich further warned that "media-supported communist propaganda is hiding the truth from America, especially our youth. Something has to be done against the use of U.S. air waves which are being used to destroy American young people, their morality and spirit and America herself," he said.

During the ceremony, a deeply tanned youth on rollerskates, wearing earphones, rolled to a brief stop in front of the bandshell. He listened, then skated rythmically

Catholic War Veterans and Ladies Auxiliary will observe Captive Nations Week July 1981 with a Rosary Service at St. Domi nic's Church, 630 E Street S.W., Washington, D.C. Various nationality groups have been invited to recite the decades of the rosary in their respective languages as a means of emphasizing the plight of the people behind the iron, the bamboo, and the sugar cane curtains. All will assemble outside the church at 11:45 am. After the mass there will be a reception in the Assembly Rooms. All invited.

INSIGHTS ON CONGRESS

HON. THOMAS P. O'NEILL, JR.

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES Tuesday, August 4, 1981

Mr. O'NEILL. Mr. Speaker, I would like to take this opportunity to share with my colleagues an article which appeared in the July 13, 1981, issue of Newsweek magazine. Its author, Mr. Norman J. Ornstein, has observed the deliberations of the Congress for more than a dozen years. I am sure that you will find his insights to be of interest.

DON'T BE BEASTLY TO CONGRESS. (By Norman J. Ornstein)

America's second favorite indoor sport is knocking politicians. True, this has long been the case-it goes back well before Mark Twain referred to Congress as America's only native criminal class, or Will Rogers said we have the best politicians money can buy. But lately, the criticism of our government and our leaders has been at almost a fever pitch. If the news on Congress doesn't focus on Abscam, sex scandals or alcoholism, it features tales of overseas junkets, overgenerous political perks or oversize Congressional office buildings. Political cynicism and public bitterness over our politicians' venality are rising at an even faster rate than the national debt.

None of the news stories are made up, but they tell only a small part of the story. I have watched Congress and Washington closely for more than a dozen years, most of it from the outside, and I can add with total confidence the following startling tions:

1. Congress is clean and honest. I would bet a lot of money that the proportion of alcoholics, drug abusers, homosexuals, bribe takers and sex maniacs is no greater in Congress than it is among any other group of people with similar high-pressured jobs, whether they be doctors, lawyers, dentists, journalists, bankers or industrialists. In fact, it is probably less. But a congressman sleeping with a lobbyist or even his own wife (if it's on the Capitol steps) is news, while a businessman's affair is not-and even if the latter makes the headlines, it's not generalized in the same way. The plain fact is, however, that the overwhelming majority of people in Congress are of the basic, dull, family-oriented variety.
2. Congress works hard. The average

member of Congress works 70 to 80 hours a week in public business, ranging from committee hearings to floor debate to meetings with consitutents. The workweek is usually seven days, four or five in Washington and the weekend back in the district-a nomadic existence that strains family life and physical well-being. Everyone derides congressional recesses, including the President, and newsmen are especially fond of poking fun at the Congress's own term for them "dis-trict work periods." In fact, they are district work periods. Most legislators go back to their districts and work long hours-meeting with individuals, visiting senior-citizen homes or community centers. We all try to have it both ways: we accuse the member of Congress of "losing touch" if he doesn't spend a lot of time back home, and of "laziness" if he misses a vote or a meeting in Washington-but then we deride him when he tries to meet all our demands.

3. Most Congressional 'junkets' are in the public interest. It is the rare trip that is taken for pleasure alone. Most congressional travel is brief, with as much time in the air as on the ground, and involves far more work than play. Our domestic and foreign policies are shaped by Congress; we need to have congressmen travel. We would be in a fine mess if we forced our legislators to become insulated from the outside world. We cannot possibly set the best policies for the United States in agriculture, arms sales,

energy or any other area without seeing how our key allies in Europe do things or how they feel about our policies. We also need direct contact with the Russians, the Chinese, the Salvadorans and every other nation. Congressional trips inform and educate, and an informed and educated Conis in everyone's interest

4. Congress's working conditions should be improved. Capitol Hill is filled with uncomfortable offices. It may be hard to believefor those who read about expensive, posh office buildings (and the cost overruns are inexcusable)—but, despite the odd exception, legislators and their staffs do not luxuriate in plush offices with fancy furniture. They sweat and strain in overcrowded offlees with too many people and too much noise. Few if any businesses would tolerate such a setup. Congress should have better

office arrangements.
5. Members of Congress are underpaid. Every attempt to increase Federal pay results in a cacophony of screams of outrage. Of course, it is hard for the average citizen to feel sorry for a poor congressman trying to get by on "only" \$60,000 a year. But the fact is that in Washington—where a truly modest family home in a decent location goes for \$200,000 and up-\$60,000 does not go very far. This is especially true for a member of Congress, who must maintain two residences, including one in the district. Moreover, for most members, serving in Congress means a substantial financial sacrifice; their "peers"—lawyers, lobbyists and consultants-command anywhere from two to five times a Congressional salary. Our best public servants regularly receive lucrative opportunities out of government. We should keep Congressional pay at a level where legislators like Sen. Pete V. Domenici (with eight kids waiting to go through college) are not forced out of public life because they can't afford it.

I am well aware that many people will greet my claims about Congress with disbelief and outrage. But many others-including, I suspect, some who make their living reporting on Congressional scandal and sloth-will recognize their truth. I hope the latter group will start to echo my themes, or at least to counter some of the worst negative excesses. I hope that people and organizations with some clout and prestige will apply some resources to recognizing and rewarding our best public servants, instead of publicizing and emphasizing our worst.

For the foreseeable future we living in a political system where citizen demands exceed public supplies, where government services are cut back and redistributed, taking more from some than from others. There is no better way to commit societal suicide than to reinforce the erroneous belief that Congress is a collection of corrupt, venal, greedy and hypocritical characters who, by extension, make unfair and illegitimate decisions. I for one would rather have Congress making tough decisions than any other legislature on earth, or than any other collection of people I could name.

PERSONAL EXPLANATION

HON. CHARLES PASHAYAN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES Tuesday, August 4, 1981

• Mr. PASHAYAN. Mr. Speaker, in the debate on July 31, 1981, I stood

with the gentleman from Illinois, Mr. MICHEL, in his position on minimum social security benefits, that the needy are not deprived by its elimination.

I therefore should have voted the other way.

OLD PROBLEMS OF BUREAUC-RACY GET ATTENTION

HON, JAMES A. COURTER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

Mr. COURTER. Mr. Speaker, I commend to the attention of my colleagues a recent column which appeared in the Washington Star, discussing the progress of Office of Personnel Management Director Donald Devine. Philip Shandler, the Star's columnist on Federal Government affairs, discusses Mr. Devine's efforts to improve OPM operations, in the interest of better serving Federal employees and taxpayers as well.

The article follows:

OLD PROBLEMS OF BUREAUCRACY GET ATTENTION

The new man at the helm of the federal bureaucracy is moving to untangle it from some costly and frustrating procedural seaweed that has accumulated over the years.

One mess is possible classification. It's been estimated that as many as 100,000 federal white-collar jobs are classified at too high a grade-meaning they're overcompensated, to the tune of about \$500 million a

Another morass is a backlog of retirement applications. As recently as January, it was about double the 30,000 cases a year that the government itself considers normal. Processing time averaged 98 days per application-in the face of a 35-day work standard. The situation has been demoralizing.

Both classification and retirement are overseen by the Office of Personnel Management, the government's central person-

nel agency.

In March, at a confirmation hearing, Donald J. Devine, President Reagan's nominee to head OPM, listed the retirement claim backlog as his top concern. He noted that OPM has had more complaints from Congress about this in recent years than about anything else.

Actually, the retirement backlog has been target of OPM efforts for several years. By the time Devine came aboard, the agency, under the leadership of Gary R. its associate director for compensa-Nelson. tion, already had streamlined its procedures and was beefing up its processing staff.

Devine kept up the momentum, and last week was able to report that the backlog was down to about 41,000 cases, that processing time had been sharply cut and that OPM expected to meet its work standards processing fully documented applications in 35 days, for example-by Oct. 1

Devine's report was made to members of Congress who in 1979 had asked the General Accounting Office to look into the backlog. GAO recently came up with some outdated findings and recommendations. But Devine said he welcomed GAO's "helpful suggestions.

The classification problem was laid before Devine in April, in a report by an OPM task force that had made the first major analysis of the situation in a decade. The report said that about 11 percent of the government's nearly one million whitecollar positions were over-graded and about 3 percent were undergraded-a net over-grading of about 8 percent

To deal with the over-grading problem, the report urged a \$3 million, two-year crash effort to develop new position classification standards, many of which were a decade or more old and virtually meaning-

Devine said in an interview recently that OPM didn't have the resources for a crash reclassification program. But he said the agency is stepping up the pace of an ongoing overhaul of job standards by contracting out some of the work. It hopes to contemplate the work "over the next few vears." he said.

In a speech recently, Divine also promised to resist mis-classification by federal agencies. He said he had been told that some OPM evaluators feared they wouldn't be supported if they objected to irregular classification. But Devine said he would "back anyone who reports abusive practices will go all the way up to the president, if that is what is necessary . .

As with reclassification, Devine cited a lack of resources for not accepting a staff recommendation that OPM review all conversions by agencies, after Jimmy Carter had lost the White House to Ronald Reagan, of political appointees to career positions (from which these people can be dislodged only with considerable difficulty).

During the transition this winter, OPM had investigated reports of impropriety in 43 conversions, had found that 13 had been improper and had reversed them, GAO reported in June GAO endorsed an OPM staff recommendation for a review of the conversions-a proposal that the Carter White House had rejected, as it was disclosed here.

But Devine said recently that he was satisfied that in investigating allegations of impropriety during the transition. OPM had "caught the real problems." In any case, he said, OPM couldn't spare the staff to go back over all of the conversions.

Devine said he has under study a recommendation from one of his own appointees to deal with a simmering career executive problem. The executives resent the fact that Congress last year cut from 50 percent to 25 percent the number of them who could be given bonuses (which at their level are in place of raises) and the fact that OPM later cut the number to 20 percent.

Devine has been urged by George Nezterczuk, associate director for executive personnel, to go back up to the 25 percent level to help offset a brain drain-an unprecedented exodus of unhappy veteran careerists.

And Devine said he would like to encourage more bonuses. But he said Congress still is touchy on the issue and "I want to make sure we don't endanger the whole bonus process."

A FIGHTER WHO WILL KEEP GOING

HON. JULIAN C. DIXON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

 Mr. DIXON. Mr. Speaker, I would like to bring to the attention of my colleagues the accomplishments of Mrs. Marnesba Tackett.

Marnesba Tackett recently retired as executive director for Southern Christian Leadership Conference serving Los Angeles. At 73, she has not abandoned the civil rights struggle and will continue to direct a project promoting greater participation in elementary and secondary education. Twenty schools and 5,000 parents in the Los Angeles area have come together in this effort, guided by Mrs. Tackett's enthusiasm and leadership.

To many, retirement is a time of relaxation, but Marnesba has chosen to seek her dream; the realization of equal educational opportunity for black and other minority children. In her words, she "will hang in there

until the last."

Marnesba Tackett easily recalls the days when separate was the prevailing mode of equal. Separate pay counters in dime stores, restaurants, and sections on public transports scar both her child and adult memories. But not even separate classrooms with only "white" text books could shake her determination to attain a college education. And after a joyful delay, caused by the birth of her daughter, she attended the Negro Branch of Kansas City College, graduating cum laude 2 years later.

As a child and then an adult, the dual system of education greatly disturbed Mrs. Tackett, causing her to believe "the whole thing is engineered to keeping a certain group of people in

an inferior place.

Raised in Kansas, Mrs. Tackett's lifetime involvement with civil rights began when she joined the NAACP while still in high school. After moving to Fort Valley, Ga., where her husband, a minister served the Trinity Baptist Church, the Tacketts moved Los Angeles. It was in southern California, while looking for a job, that she had her first taste of discrimination on account of both her sex and race. This reconfirmed her convictions about our color-conscious society and rekindled her activity in the NAACP. Marnesba's meeting of Dr. Martin Luther King in 1953, only further resolved her dedication to the cause of equal educational opportunity.

Mrs. Tackett's philosophy regarding education has kept pace with the times, and in many an instance, is a few steps ahead. Many in the Los Angeles area know Mrs. Tackett for her tireless activity in the school board.

Though never a candidate herself, she has been a key figure in many local campaigns, seeking to insure that her ideas are well represented.

Mrs. Tackett has also been instrumental in breaking down discrimination in housing in the Los Angeles area and is in fact a licensed real

estate broker.

Her recent retirement dinner supplies a touching and telling story about this indefatigable woman. She arrived at her dinner, which at her request was held in a restaurant operated by a black businesswoman, with a small doll in hand. A gift from old college friends, the doll had a notice pinned to its yellow dress and read:

Put this doll on your bed or in your rocking chair. It can retire, but you keep going.

Marnesba Tackett cannot be sufficiently thanked for her devotion and continued commitment to helping others. A poem by Langston Hughes captures the spirit which she embodies.

STILL HERE

I've been scarred and battered. My hopes the wind done scattered. Snow has frix me, sun has baked me.

Looks like between'em
They done tried to make me
Stop laughin', stop lovin', stop livin'—
But I don't care!
I'm still here!

Mr. Speaker, I can attest that those of us in Los Angeles are indeed fortunate and grateful that Marnesba is still here. Much work remains in our cause, and it won't be done without her.

MONO LAKE

HON, FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. STARK. Mr. Speaker, I recently cosigned a letter to Congressman SEIBERLING with a number of my California colleagues regarding Lake. In this letter we urged the chairman of the Subcommittee on Public Lands and National Parks to hold hearings this fall in Washington, D.C., on the whole issue of Mono Lake. Because of the increased interest in the Mono Lake issue I would like to bring to the attention of my colleagues an article that appeared yesterday in the Christian Science Monitor. This may help explain the growing concern about current policy with regard to the entire Mono Lake area.

Los Angeles is Drinking Up Beautiful Mono Lake

(By Leon Lindsay, staff correspondent of the Christian Science Monitor)

San Francisco.—Efforts to save Mono Lake, a unique natural wonder bequeathed by the ice age to the Sierra Nevada region of California, are receiving renewed atten-

tion because of recent developments—some discouraging, and some positive.

The blue, saline lake, in dry hill country abutting 14,000-foot, snowclad peaks, is not nearly so well known as its resort-rimmed neighbor, Lake Tahoe. But it is being cited by environmentalists as a classic example of how human society can, in a few years, dismantle nature's works of eons.

Formed some 12,000 years ago when glaciers receded, Mono Lake is salty, but not "dead"—at least not yet. Its waters support a chain of life that begins with microscopic plants (phytoplankton) and takes wing with gulls, ducks, and other bird species.

Tourists who find their way to the lake marvel at the geological formations—including two volcanic islands; the Mono craters, a recently formed chain of cones and lava flows; and "tufa towers"—chalk-white, erosion-sculptured upthrusts of calcium carbonate which are in some cases delicate, in others grotesque.

What endangers Mono Lake is the thirst of Los Angeles. Since 1941, the metropolis to the south has diverted water from streams in the Mono basin to help meet its ever-growing need for water. At present, the city water and power department takes 101,000 acre-feet a year from the basin. Over the past 40 years the lake level has dropped at a rate of 1 to 2 feet a year. It was at 6,417 feet (measured from sea level) in 1941; in June of this year it measured 6,373 feet.

This summer it was discovered that, possibly because of increased salinity, the population of brine shrimp, a key part of the Mono Lake food chain, had dropped sharply. Researchers found that only 5 to 15 percent of shrimp eggs hatched in June.

One-fourth of the California gull population in the United States nests at Mono Lake, and the chicks are nurtured on brine shrimp. This summer, says biologist David Gaines, practically all the gull chicks have starved. If it happens again next year, he adds, that will be the end of the California gull colony at Mono Lake.

California gulls are not an endangered species; they breed at a number of other locations, including Utah's Great Salt Lake. But Mr. Gaines and others say that what is happening to the shrimp and gulls at the lake is dramatic evidence of how the whole system is slowly—or perhaps not so slowly—destroyed.

The answer, they say, is for Los Angeles to reduce the amount of water it diverts from the lake. In 1979 a state task force recommended several alternative plans for maintaining the lake level at 6,388 feet. The Mono Lake committee, of which Gaines is chairman, supports one of the plans.

But Los Angeles, which has a permanent state license to divert as much as 167,000 acre-feet of water annually from the Mono basin, accepts none of the alternatives.

Further, the city recently informed the US Department of the Interior that it would like to purchase 23,000 acres of federal land along the Mono Lake shore. This was in response to a letter sent out by Interior Secretary James G. Watt inviting state and local governments to apply for the right to purchase federal lands at \$1.25 an acre.

Acquisition of this land would give the Los Angeles Water and Power Department control over much of Mono Lake's shoreline.

But there are countermoves afoot in California and Washington, D.C.

A bill to establish a Mono Lake state preserve was introduced this year in the Legislature. Passed 30 to 0 by the state Senate, it is expected soon to be approved by the Assembly.

Although this step would not affect the rate of water diversion by Los Angeles, Gaines says, it would at least give official status to the lake environs and help protect against vandalism, which is increasing.

US Rep. Norman D. Shumway (R) of California, whose district includes Mono County, has introduced two bills in Congress. One would grant national monument status to the immediate Mono Lake area and provide for a study of ways to reduce water diversion. The other bill would repeal the 1936 federal law under which purchase of federally owned land at \$1.25 an acre is authorized.

Both bills have been sent to the House Subcommittee on Public Lands, and Gaines says hearings are expected in October.

He says the effort to preserve Mono Lake has gained support among state legislators and California congressmen. There is a good deal of support among officials of state resources agencies, he adds, but Gov. Edmund G. Brown, Jr. has taken no position. The governor, who plans to run for the US Senate in 1982, is treading a fine line on water issues, always politically dangerous here.

Perhaps more than anything else, Gaines points out, the Mono Lake committee needs support in Los Angeles. The group maintains an office there and is circulating news letters and petitions. Response lately has been encouraging, the committee chairman says.

CLEANING UP FEDERAL WORKERS' COMPENSATION

HON. JOHN N. ERLENBORN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES
Tuesday, August 4, 1981

• Mr. ERLENBORN. Mr. Speaker, I am introducing today, together with my colleagues Mr. Ashbrook and Mr. Johnston, comprehensive amendments to the Federal Employees' Compensation Act, the Federal Government's workers' compensation program for its own civilian employees. FECA provides compensation—wage-replacement income, medical benefits, and death benefits to survivors—for job-related injuries or death.

This bill, entitled the "Federal Employees' Reemployment and Compensation Amendments of 1981," stems from the administration's proposal of June 2, 1981, which was incorporated in the Gramm-Latta substitute and, thus, in the House-passed reconciliation bill (title V, subtitle C, ch. 1, subch. C). The Senate did not include any amendments to FECA in its reconciliation bill. The Senate FECA subconferees, however, recognized the underlying merits of the administration's package and were prepared to recede to the House with clarifying and improving amendments. My bill incorporates those amendments.

Despite the manifest fairness of the Senate amendments, the House majority members of the subconference, in confederacy with the House majority budget conferees, and contrary to their responsibility under the House rules to support the House position, immediately voted to recede to the Senate and, thus, sabotage the FECA amendments and the mandate of reconciliation as it related to the FECA subconference. Senator HATCH agreed only when it became apparent that his refusal would jeopardize timely consideration of the conference report on the Omnibus Reconciliation Act.

The thrust of the administration's amendments is to reduce the skyrocketing costs of the program (currently exceeding \$1 billion annually) by removing some of the current incentives for fraud and abuse, by revising the benefit structure, and by integrating the program with civil service retirement (CSR).

The record shows strong medicine is necessary. Since the 1974 amendments liberalizing the program, claims filings and costs have skyrocketed.

In fiscal 1978 the total number of FECA claims had risen to 126,000 from 31,000 in fiscal 1974, prior to the amendments. More specifically, annual filing of COP (continuation of pay) claims rose from 32,000 in fiscal 1974 to over 94,000 in fiscal 1978; and, as an indication of employees taking advantage of COP, lost-time reported injuries during this period increased from 36 to 51 percent.

Long-term claims have increased in numbers and complexity; 30,000 back injuries reported annually since fiscal 1975; hearing loss claims have jumped from 13,900 total between 1966 and 1974 to 37,200 between fiscal 1975 and 1978. These long-term cases accounted for about two-thirds of total costs in 1979, with direct payment rising from \$26.4 million in 1966 to \$463.6 million in 1979. Estimated future costs for long-term cases are over \$6 billion.

Total compensation costs have risen from fiscal 1974 to fiscal 1979 from \$270,676,000 to \$700,023,000 to an estimated \$1 billion in fiscal 1982.

While acknowledging significant FECA cost problems, some minimize this explosion by citing Federal pay increases to which FECA benefits are tied, medical costs, and cost-of-living adjustments as major contributing factors. They are, indeed, contributing factors, but focusing on these ele-ments ignores why claims find their way into the system in the first place. That is utilization, and GAO findings indicate a rapid rise in utilization since 1974. The Government Printing Office suffered an astronomical increase in lost time injuries from 1974 to 1976 of 862 percent. The comparable figures for the Postal Service is 112 percent: for the General Services Administration, 109 percent; for Department of the Army, 106 percent; and for the Veterans' Administration, 115 percent.

Undoubtedly, some sudden incentives must have been injected into the

system to produce such a rapid expansion in caseload, utilization and costs. The narcotic is the 1974 amendments; and the FECA system has just about overdosed on them.

Significant changes were incorporated in the 1974 amendments:

First, a 45-day continuation of pay period was enacted permitting agencies to continue an employee's full pay up to 45 days following an injury. Its purpose was to alleviate claimants' cash-flow problems stemming from claims processing delays;

Second, employees were granted free choice of physician; and

Third, the 3-day waiting period before which compensation is payable was moved from the onset of disability to after the 45-day COP period.

GAO's extensive study of the FECA program places the onus for FECA's difficulties largely on these three changes. As to:

COP: Although the Federal civilian workforce has remained stable over the past 10 years, lost-time traumatic injury claims, as noted above, have risen sharply. Claims actually dropped during the period 1970 to 1974—from 17,000 to 12,000. Passage of the amendments, however, saw claims—COP claims—jump the next year to 37,000, then to 80,000 in 1976, and to 101,000 in 1979.

Three-day waiting period: The 1974 amendments' elimination of a 3-day waiting period at the onset of disability is clearly the most serious shortcoming in the present law and has led to an avalanche of abuse. GAO found that up to 46 percent-nearly half-of all COP claims could have been eliminated were there merely a 3-day waiting period at the onset of disability. Fully 46 percent of surveyed claims were considered by GAO's physician to be minor, frivilous, or marginal claims-37 percent minor or frivilous and 9 percent marginal (lasting 4 to 7 days).

Free choice of physician: The 1974 amendments granted an employee the right to choose his own physician. This, GAO concluded, has contributed to abuse of COP and to employees not using light duty to the extent possible. Specifically, GAO found that 20 percent of its claims sampled appeared abusive in occurrence, job relatedness, or duration; and that in all cases light duty could have been used.

The free choice of physician permits doctor shopping for a sympathetic physician. Not surprisingly, if the claimant's personal physician is not sympathetic, another doctor is likely to be. A physician, especially one unfamiliar with the patient or his employment, often must accept the patient's statements that he is in pain.

FECA's problems extend beyond these three areas, however:

Benefit structure: The overlay of an uncommonly generous benefit struc-ture on COP, lack of a waiting period, and free choice of physician has aggravated FECA cost and administrative problems. The current formula based on 66% percent or 75 percent (if one or more dependents) of gross pay (taxfree) replaces far too great a proportion of predisability pay-from 86 percent for a GS-2, receiving the basic benefit under FECA, to 118 percent at the maximum FECA rate for a GS-15. The result is claims filing incentives, and rehabilitation and return-to-work disincentives.

Retiring on FECA: The law now permits Federal employees to use FECA as a retirement system. There is essentially one reason for this malady: Generally, FECA benefits are higher than Civil Service Retirement Act annuities or other disability benefits and are tax free. In recommending conversion of FECA beneficiaries to retirement programs at age 65, the Department of Labor explored the differences in the

two programs:

FECA beneficiaries receive a greater net compensation beyond retirement age than persons who retire with the maximum years of Federal service (41 years and 11 months). While current FECA benefits are tax free, and Civil Service retirement income is taxed at regular rates, the disparity between FECA benefits and CSRA retirement income would, with few exceptions, not be resolved by taxing FECA benefits. In nearly all instances, FECA benefits would still be greater than the retirement income of an

uninjured worker.

The disparity in benefit rates between FECA and CSRA creates substantial economic incentive for Federal employees to seek FECA benefits. Although the absolute number is not great, there is increasing evidence that employees are seeking FECA benefits in lieu of retirement, particularly when few years of service are involved. The economic incentives are inversely related to years of service * * * In fact, under the existing system, it is possible for a permanently disabled employee to obtain FECA benefits and also withdraw all contributions from the CSR system. Workers who are in-jured or diseased and otherwise eligible in-

creasingly argue that their injury is workrelated.

GAO's claims survey revealed that 85 percent of FECA beneficiaries on long-term rolls will probably never return to work; 51 percent were over 55 years old. Of these, 62 percent were over 60, and 30 percent exceeded age 65. Thus, most long-term beneficiaries have, in effect, already retired. In fact, GAO found that most Federal employees retire within 3 years of eligibilityage 55 with 30 years' service-so a case could be made for converting them to CSR at age 58.

This bill addresses these and other

shortcomings in FECA by:

Changing the benefit formula from 66% percent or 75 percent of gross pay to 80 percent of spendable income, defined as gross pay minus amounts withheld for Federal, State and local income taxes, mandatorily withheld pension contributions and, where applicable, social security;

Eliminating the 45-day continuationof-pay period but providing a safety net of interim compensation beginning on the 21st day following the Labor Department's receipt of all information necessary to adjudication. The employing agency would also have the option of advancing compensation be-

ginning on the third day of disability if the employee was expected to be totally disabled for at least 28 days; Establishing a waiting period of 7 workdays at the onset of disability,

with 5 days compensation repaid if the

disability lasts beyond 14 days Converting FECA beneficiaries to civil service retirement at age 65 or when vested after age 65, returning FECA to the proper role of workers' compensation of replacing lost wages due to employment injuries;

Paying the same benefit (80 percent spendable income) to survivors as paid

to disabled workers; Paying the same benefit (GS-8 step 1) for loss or loss of use of a body member regardless of income level with no offset for wage-loss benefits;

Instituting mandatory rehabilita-

Increasing funeral, attendants, and

maintenance allowances:

Amending the basis for the cost-ofliving adjustment from increases in the Consumer Price Index to the average annual Federal wage increase, so that employees on disability are treated equally with nondisabled employ-

Pursuant to hearing, prohibiting re-imbursement under FECA to medical providers who have been indicted or convicted of fraud, in connection with another Federal program, or have been found to have furnished inappropriate medical services;

Requiring the Labor Department to develop a fee schedule for providers of

services under FECA;

Granting employing agencies, pursuant to a recommendation by the GAO, specific authority to order agency-paid

medical exams; and

Revamping the claims review process by narrowing the scope of review of cases by the Employees' Compensation Appeals Board consistent with appellate-level review, and providing both employing agencies and employees with a new right of case-reconsideration by the Office of Workers' Compensation Programs.

The legislation's effect would be prospective only, both as to the new benefit formula and conversion to CSR. Current beneficiaries would be "grandfathered" and, thus, not sustain bene-

fits cuts.

I call on the chairman of the Labor Standards Subcommittee to schedule hearings and markup on remedial legSOVIET UNION PERSECUTES CHRISTIANS

HON, JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES Tuesday, August 4, 1981

. Mr. KEMP. Mr. Speaker, in the Soviet Union, equal protection under the law means that not only Jews are persecuted for their religious beliefs. While we hear frequent horror stories of the plight of Soviet Jewry, this story of five Christians sentenced to labor camps and internal exile for seeking to emigrate to practice their religion freely is a reminder that in the Soviet Union all creeds are equally repressed so long as they deviate from the party line.

[From the Los Angeles Times, Aug. 3, 1981] SOVIETS SENTENCE PENTACOSTALISTS

A court in the Ukraine sentenced five members of a religious group to terms in labor camps and internal exile on charges of slandering the Soviet Union dissident. sources said in Moscow. Four of the Penta-costalists were given five years in labor camps followed by five years of internal exile. The five had asked for emigration visas and renounced their Soviet citizenship in protest against not being allowed to practice their faith freely.

WHEAT INDUSTRY COUNCIL BEGINS OPERATION

HON, THOMAS S. FOLEY

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. FOLEY. Mr. Speaker, it gives me a great deal of pleasure to announce that on July 1, 1981, the Wheat Industry Council began its first fiscal year of operation. The entire wheat industry is to be congratulated and commended for their efforts in making this organization a reality.

The Wheat Industry Council was established by the Wheat and Wheat Foods Research and Nutrition Education Act of 1977. As one of the sponsors of that legislation and a longtime advocate of a wheat industry education, research, and promotion organization, I am happy to report that the intent of Congress is being fulfilled in the clearly stated goals, objectives, and planned programs of the council adopted March 24, 1981, as follows:

Contribute materially to the health and well being of all people;

Enhance the quality and use of American Wheat, processed wheat, and wheat end products to insure the economic vitality of the wheat foods industry;

Educate the public on the nutritional and economic value of wheat foods;

Increase sales and per capita consumption of wheat based foods; and

Evaluate effectiveness of the program.

The programs and activities of the council are directed by its members who represent the entire wheat foods industry and consumers. Specifically the members include the following segments: Producers-wheat farmers; processors-millers and others; end product manufacturers-bakers, pasta manufacturers, and cereal producers; and consumers. Incidentally, it should be noted that the inclusion of consumers as members of the council is unique among industry-wide promotion organizations.

The following have been appointed by the Secretary of Agriculture to serve as members and alternates of

the board of directors:

Baird, Vernon, Mrs. Baird's Bakeries, Inc., Fort Worth, Tex.

Bathurst, Harry, National Wheat Growers' Association, Blackwell, Okla.

Batty, Lauren, ITT Continental Baking Co., Rye, N.Y.

Bisogni, Dr. Carole, Cornell University,

Ithaca, N.Y. Capps, Clifton, California Milling Corp.,

Los Angeles, Calif. Davis, Raymond, National Wheat Grow-

ers' Association, Potter, Nebr. Feeney, J. J., General Mills, Inc., Minne-

apolis, Minn. Hale, H. D., ADM Milling Co., Shawnee

Mission, Kans. Hatcher, E. L., National Wheat Growers'

Association, Lamar, Colo.

Hayes, Earl, National Wheat Growers' As-

sociation Stafford Kans Heffelfinger, M.W.K., Peavey Co., Minne-

apolis, Minn. Hinkle, B. J., Interstate Brands Corp.,

Kansas City, Mo.

Howard, Chelsea Milling Co., Holmes. Chelsea, Mich. Jepsen, Robert, National Wheat Growers'

Association, Heppner, Oreg. Knutson, Carolyn, Clackamas Community

College, Lake Oswego, Oreg.

Krafft, Richard, Star of the West Milling Co., Frankenmuth, Mich.

Kruse, Richard, National Wheat Growers' Association, Breckenridge, Minn.

Liebman, Bonnie, Ctr. for Science in the

Public Interest, Washington, D.C. Milner, Dr. Max, American Institute of Nutrition, Bethesda, Md.

Myers, R. G., Seaboard Allied Milling Corp., Shawnee Mission, Kans.

Nelson, Wayne, National Wheat Growers' Association, Winner, S. Dak.

Nissen, John, Nissen Baking Co., Falmouth, Maine.

Orth, Philip, Philip Orth Co., Oak Creek, Wis.

Rasmussen, Dr. Arlette, University of Delaware, Newark, Del.

Rawlinson, Frank, Centennial Mills, Portland, Oreg.

Sands, Frank, Sands, Taylor & Wood Co., Brighton, Mass.

Schaus, Robert, Reymond Baking Co., Waterbury, Conn. Shepard, Victor, National Wheat Growers'

Association, Gilliam, Mo. Sidles, Sheila, Iowa Consumers League,

Centerville, Iowa.

Stack, Richard, Capital Area Community Food Bank, Washington, D.C.
Thom, Jeane, Consumers Coop. of Berke-

ley, El Cerrito, Calif.

Thurston, Lester, C. F. Mueller Co., Jersey City, N.J.

Tollett, Clifford, National Wheat Growers' Association, Thornton, Wash.
Viviano, Joseph, San Giorgio-Skinner,

Inc., Hershey, Pa. Wager, Robert, American Bakers Associa-

tion, Washington, D.C.

Winterfeldt, Dr. Esther, Oklahoma State

University, Stillwater, Okla.
Witteman, William, National
Growers' Association, Mohall, N. Dak.

Oversight is assigned to the U.S. Department of Agriculture. Initially the role of the USDA was to hold hearings, conduct the referendum, and other adminstrative procedures. On a continuing basis it is responsible for seeing that the council's programs meet the mandate of the law.

The formation of the council was officially approved in a March 1980, referendum of end product manufacturers. The end product manufacturers will support the council under an assessment based on wheat flour usage.

I particularly want to commend nose forward-looking, progressive business leaders who are supporting the Wheat Industry Council. Their efforts and their financial support will help insure that every knows that wheat and wheat food products are essential for good nutrition: that wheat food products are an important protein source; and that wheat food products are not fattening.

Everyone-from the wheat producers to the consumers-will benefit by the council's information, education, and research programs. The council plans a balanced program which will help all segments of the wheat foods industry and the general public.

For more information on the specific programs of the council, contact executive director, C. Joan Reynolds, Suite 205, 6000 Executive Boulevard, Rockville, Md. 20852; telephone (301)984-1300.

A TRULY AMERICAN FOREIGN POLICY

HON. RON PAUL

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES Tuesday, August 4, 1981

. Mr. PAUL. Mr. Speaker, for over a century and a half, with only a few, short-lived violations, the United States followed the foreign policy formulated by President Washington: peace and commerce with all nations; permanent, entangling alliances with none.

However, over the last 30 years, we have intervened in countries around the world, subsidized the defense of wealthy allies, provided aid and comfort to our enemies, and spend a national treasure on the military. This policy has had devastating effects on the economy and has compromised the security of the Nation.

Recently, the writer and former FBI official Dan Smoot commented that while President Reagan may be "the right man, in the right place, at the right time," without the right policy direction we will travel even further down the path to national destruction.

If we merely change the names of our "friends" and "enemies," direct our rhetoric and aid to different quarters, and spend trillions more on outmoded weapons systems that do not increase our real defense capabilities, we will continue to fail.

I commend Mr. Smoot's essay to the attention of my colleagues.

THE DAN SMOOT REPORT ON OUR FOREIGN POLICY

All of the necessary governing powers of a great nation cannot be listed in a constitution, defined, and limited to specified functions. Many forces-global wars, political upheavals, technological revolutions, natural disasters-change society and its needs. Government cannot remain static, and serve a social order forever changing.

These assertions being considered, we must marvel at the wisdom of our Founding Fathers. They made no attempt to list, define, or circumscribe the vast governmental powers that are, or may be, necessary in regulating domestic affairs. They specified the few matters they wanted the federal government involved in, explained its jurisdiction in those matters, and left all the rest (unmentioned, undefined, unlimited) to the states or to the people. On the other hand, they denied the states direct power in handling foreign affairs, giving all necessary powers, largely undefined, to the federal government.

Consequently, the Constitution is not the same infallible guide to the proper handling of foreign affairs that it is in the handling of domestic affairs. We do have an adequate guide, nevertheless: George Washington's Farewell Address to the nation in 1797. Washington warned against foreign influence in the shaping of American affairs. saying the nation could not fulfill her high destiny if government kept her permanently entangled in the wars, revolutions, and internal politics of other nations. He suggested a foreign policy of benign neutrality.

President Washington's benign neutrality became America's traditional foreign policy. Americans clung to that policy doggedly even reverently, until the middle of the Twentieth Century. For decades, internationalists-largely under the pervasive influence, if not consciously under the direct control, of the international Communist movement-vilified and misrepresented the policy of benign neutrality, calling it "isola-tionism." Eventually, America surrendered tionism." Eventually, America surrendered to the internationalists. Our traditional foreign policy was abandoned in 1949. Now, 32 years later, the consequences are hideous and obvious.

In October, 1980, Burt Raynes published an analysis concerning the probability that the Soviet Union will destroy the United States in a preemptive first strike with nuclear weapons. Raynes, former chairman and chief executive officer of Rohr Industries, had spent a year studying this momentous problem and working on possible technical solutions. He says the Soviet missiles that can reach the vitals of the American nation greatly outnumber American missiles that can reach comparable Soviet targets. The Soviets have an anti-ballistic missile defense system; we have none. We have only a warning system that might give us an 18- or 22-minute alert before impact of

Soviet missiles.

Raynes believes the Soviets will make the strike against us not later than the fall of 1983, because, by that time, the Soviets think the N.A.T.O. nations of Europe will be sufficiently armed with nuclear missiles threatening Russia that they will be a real danger to the Soviets. So, the Soviets will reason that if they hit European N.A.T.O. nations, the United States would come to the aid of Europe, and that would be dangerous. On the other hand, if the Soviets hit the U.S., the European nations will not come to our defense, and the building up of European nations as nuclear threats to Russia will be stalemated and neutralized.

But the Soviets are stupid to believe that N.A.T.O. ever was or ever will be a threat to Russia. The United States has squandered something like a quarter of a trillion dollars on N.A.T.O., which has never provided a dime's worth of deterrence against Soviet imperialistic aggression, or a penny's worth of defense for the American homeland. It follows, therefore, that N.A.T.O. has been a mighty boon to the Soviets in that it has drained off immense sums of money that could have been spent on weaponry to defend America against a Soviet surprise attack. I agree with the Soviet conclusion that none of our N.A.T.O. allies will come to our aid if the Soviets attack us. Consequently, I think we are near the point of no return in defending our homeland.

AMERICA IS ON ITS OWN

Frankly, we do not have any allies. We have accelerated our own rush into bankruptcy by a hemorrhage of about a trillion tax dollars to aid, arm, defend, and fight wars of other nations everywhere, without thus acquiring one ally who would make a life-or-death decision to stand with us in the face of a Soviet nuclear threat. With this prolonged outpouring of our treasure and our blood, we have helped build the industrial and military strength of our sworn enemies, the Communist nations; we have overthrown governments and destroyed rulers friendly to the United States, aiding the installation of Communist rulers; we have subsidized socialist nations, and foreign industries which have captured world markets from American industries; we have aided both sides in some 50 wars since the end of World War II.

For 35 years, we have armed, aided, and defended other nations in the vain hope that they would be willing and able to help us when needed. In our preoccupation with mutual defense of the world, we have left our homeland without adequate defense in the presence of the deadliest foreign

menace in our history.

Yet, there is no national leadership to change the basic foreign policy which has so betrayed us. Patriots have been outraged, of course, at what our foreign policy has been doing for decades, but they attribute this to mismanagement of the policy. Most of them are now rejoicing that the Reagan Administration shows promise of managing the policy so that it will support our friends instead of our enemies and will thus secure for us sturdy foreign allies who will stand by us in need.

It will not work, it has a 2,000-year record of never working. A great nation is dependent exclusively upon its own strength (and God) for survival; and that strength cannot be kept at the level necessary for survival if it is shackled and dissipated by permanent

commitments to, and entanglements with, other nations.

In World Wars I and II. we violated our traditional foreign policy, but the public did not realize the consequences. Presidents Wilson and Roosevelt lied repeatedly and engaged in secret commitments to draw us into the two World Wars. In 1916, while E. M. House was manipulating Wilson to get us into World War I, Wilson campaigned for re-election on the promise that he hated war and would continue to keep America out of the then-raging European conflict. In 1940, while maneuvering to get us into World War II without it looking as if he were doing so, Roosevelt campaigned for reelection on the promise that he hated war and would continue to keep America out of the then-raging European conflict. On both occasions, the American people clung to their traditional policy of benigh neutrality until the adroit falsehoods and manipulations of their Presidents frightened them into accepting temporary involvement, as allies, in the wars and internal affairs of foreign nations. Temporary, notice! The people did not give up their traditional foreign policy until 1949, when Truman committed us to the N.A.T.O. pact, clearly entangling us permanently in the internal political and military affairs of foreign nations.

THE TRADITIONAL SOLUTION WILL WORK

Our discarded traditional policy is more needed today than it was when President Washington first explained it. Other nations could not afford the expensive and destructive wars they have been fighting for more than half a century with our money. Restoration of our traditional concepts of national defense is also necessary. We cannot afford, do not need, and cannot effectively use massive land armies, permanently mobilized and stationed in foreign lands—or even at home.

If we had, in place, the kind of defenses against intercontinental weapons that we are capable of building; if we had, in readiness, the kind of retaliatory and first-strike capability that we could produce; if these were manned by a relatively small corps of technicians and engineers, all under the control of the kind of commander-in-chief that Ronald Reagan appears to be, no nation or combination of nations would ever risk a preemptive first-strike or any other kind of strike against us.

Having that kind of national defense would necessarily mean that our government was no longer aiding and abetting the existence and expansion of the worldwide Communist slave empire, as it has been doing for a generation. This fact alone would provide the non-Communist nations of the world more security against foreign aggression than they now have under the

prevailing imbalance of terror.

Thus, by looking to our own national interests and concentrating on our own national defense, we would make the greatest contribution to world peace that we have ever made since the foundation of the Republic. This would not be done under the duress of aggressive military power, or bought with foreign aid, or achieved with mutual defense pacts, or sustained by any other form of meddling in the affairs of other nations, but guaranteed simply by our resolve to leave other nations alone, and to inflict grievous wounds on any who do not leave us alone.

If President Reagan could persuade Congress and the people to restore constitutional government, as I believe he could, surely he could lead them in restoring traditional

American foreign policy and creating effective defense for the nation. The public has no respect for the foreign policy our nation has followed since 1945. People would rejoice at the idea of spending our tax money on armaments to defend our homeland, rather than on largess to foreign nations.

It may be that we have the right man, in the right place, at the right time. But all of us who helped put him there need now to help him move quickly in the right direction.

DONALD STINGEL'S CONTRIBU-TION TO THE EXPORT-IMPORT BANK

HON. DOUG WALGREN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. WALGREN. Mr. Speaker, on August 2, Don Stingel, stepped down from his position as a director of the Export-Import Bank. I hope this Congress and the country will recognize the contributions Mr. Stingel has made to the Export-Import Bank and to our economy through his work in promoting American exports.

Mr. Stingel came to the Ex-Im Bank from the presidency of Pullman-Swindell, a Pittsburgh-based corporation engaged in engineering and construction worldwide. Although a Republican, Mr. Stingel was appointed by President Carter in 1977 and was unanimously confirmed by the U.S. Senate. He brought to the bank the distinction of being the first graduate engineer to serve as a director of the bank along with his broad background in business management.

Over the last 4 years, Mr. Stingel worked hard to dispel the deep misunderstanding in the American public and Congress about the purpose and benefits to our economy of the Ex-Im Bank. He gave a special effort to educate Members of Congress and the press about the direct benefits to the American economy of Ex-Im Bank financing—a program that is often mistakenly confused with foreign aid or thought to be an expenditure of Government funds rather than an investment.

The fact is that, although treated in our budget process as a current expenditure, Export-Import Bank loans have, for all practical purposes, always been repaid with interest and have resulted in increased revenue flowing to the Federal Treasury of almost \$2 billion since its inception.

Mr. Stingel has been an effective advocate in presentating the bank's case to House of Representatives and the Senate. Thanks to his efforts to a considerable degree, the Export-Import Bank supported \$18.2 billion worth of exports alone in 1980. That represents \$18.2 billion of income for American

companies to employ tens of thousands American workers.

Exports now make up a major part of the American economy. What was simply an "add on" 30 years ago has become a major factor in the strength of the American economy. It is a certainty that exports will only increase in their importance as international trade grows in the future. If this part of our economy is to grow, our commitment to the Export-Import Bank must grow

Donald Stingel has made a major contribution in giving future Congresses a good base to build on. The country is better off from this man's public

service.

TWENTY-FIRST ANNUAL UNITED INTERPAR-STATES/MEXICAN CONFERENCE-LIAMENTARY PART II

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. GILMAN. Mr. Speaker, as I indicated in Part I of my report on the 21st Annual United States-Mexico In-Conference, terparliamentary this year's meetings in Manzanillo, Mexico, took on added significance in light of the highly successful Presidential talks concluded just prior to the conference. In addition to the distinguished delegations from both bodies of the two nations' legislatures and visit by Mexican President Lopez Portillo, the conference was honored by the presence of the U.S. Ambassador to Mexico, His Excellency John Gavin. and the Mexican Ambassador to the United States, His Excellency Hugo Margin. Both the visits by President Portillo and the Ambassadors underscored the important role the legislators play in helping to formulate and implement bilateral policy.

One of the major issues in our bilateral relations and one that played an important part in the conference discussions was the subject of coopera-tion in the fight against the production, traffic, and consumption of drugs. As a member of the Select Committee on Narcotics Abuse and Control, I was privileged to lead the discussions on this important topic. For the benefit of my colleagues, I am inserting the entire text of my remarks

at this point in the RECORD:

STATEMENT OF THE HON. BENJAMIN A. GILMAN BEFORE THE 21ST MEXICO-UNITED STATES INTERPARLIAMENTARY CONFERENCE HELD IN MANZANILLO, MEXICO, JUNE 11-15, 1981

Mr. Chairman, distinguished legislators from Mexico and the United States, I welcome this opportunity to participate again with our Mexican colleagues in the 21st Mexico-United States Interparliamentary Conference and to discuss the progress of

our mutual efforts to prevent and control narcotics trafficking and drug abuse.

As a member of the Select Committee on Narcotics Abuse and Control and as the ranking minority member of the Foreign Affairs Subcommittee on Inter-American Affairs, I detect a new ERA of mutual respect and understanding between our two nations on a variety of issues: Trade, tourism, immigration, fishing agreements, energy, and drug abuse prevention and control.

We have come a long way since both our delegations adopted, in 1977, the Hermosillo Declaration committing both of our nations to greater cooperative efforts in combatting

the traffic in drugs.

The efforts of the Mexican law enforcement authorities and the Mexican military forces in interdicting narcotics trafficking and in eradicating the illicit production of drugs at their source have become successful models for other nations to emulate.

During the past year, we have been advised that Mexican law enforcement authorities are establishing new records in drug interdiction. During the first 6 months of this year, Mexican law enforcement authorities seized 7 heroin laboratories, 1.870 pounds of narcotics, more than 1.8 million pounds of marihuana and hashish, 726 pounds of cocaine, compared to the seizure 6 heroin laboratories, 3,476 pounds of opium, and slightly more than 2 million pounds of marihuana and hashish for the entire preceding year.

The eradication of opium poppy fields has dramatically increased by 70 percent-from the destruction of 863 poppy hectares in 1979 to the eradication of 1,468 poppy hec-

tares in 1980.

Although Federal, State, and local drug law enforcement authorities in my country also reporting increased seizures of heroin, cocaine, marihuana, hallucinogens, and other dangerous drugs, our two nations must not become complacement and must not rest on our accomplishments.

Drug trafficking is a multibillion-dollar business, reaching into every region of the world and causing misery for unknown millions of citizens throughout the world. Drug trafficking just in the United States alone has reached a staggering \$64 billion in street sales, compared to an estimated \$48 billion in 1977. Obviously, this is only the tip of the iceberg since global narcotics traf-

ficking far exceeds that amount.

Both our nations share the common urgency to prevent and control drug trafficking. According to one recent report, the cultivation of illicit drugs in Oaxaca, an area of 570 municipalities and 2.8 million inhabitants, far exceeds the lawful cultivation of food crops by more than 7 billion pesos. Food crops in this area amount to 3.6 billion pesos, compared to the cultivation of marihuana and poppy valued at 10 billion pesos, thereby making Oaxaca the number one cultivator of marihuana and poppies in Mexico and replacing Sinaloa as the main producer of marihuana and heroin. (See article entitled, "Drug Crop in Oaxaca Worth More Than Legal Crops," by Rafael Medina C., Mexico City, Excelsior, 7 March 1981, Pp. 4-A, 20-A.)

We share this problem with you. In the United States, domestic cultivation of marihuana in California has become a billiondollar business, replacing that State's largest legal crop, grapes, by more than \$136

The "war" on drug abuse is a dangerous, difficult, and frustrating task confronting law enforcement officials throughout the

world. According to the regional coordinator of the Office of the Attorney General of the Republic of Mexico:

The fight against drug trafficking in the area is difficult. The drug traffickers take advantage of the [people . . . and] the fact that the Federal authorities cannot reach many of the sites in the mountain ridge. give the [people] money to sow death.

The regional coordinator further states that when government officials arrive to eradicate the marihuana and poppy fields,

The people receive us with applause and greeting from below. They think we are the same people who invited them to plant marihuana. When we land and tell them that that is bad, they agree, explaining that the ones who gave them seed and money also were in helicopters and were well armed.

Mr. Chairman, there is an urgent need for both our nations to continue to work closely together to prevent and control drug abuse. There is also an urgent need to develop a comprehensive, coordinated regional drug strategy designed (1) to interdict drug trafficking, (2) to eradicate the illicit production of drugs at their sources, (3) to educate our citizens regarding the dangers of drug abuse, and (4) to properly treat and rehabilitate those individuals who are dependent upon or addicted to drugs.

In this regard, we urge the Government of Mexico, whose drug eradication and drug interdiction programs are highly respected throughout the world, to help us formulate such a regional drug strategy. If the "war" on drug abuse in this part of the world is going to be won, then there is an urgent need for all of us to benefit from the leadership, skill and dedication of Mexico's law en-

forcement officials.

Mexico is a leader in the drug field * * * it is self-sufficient in this area. The entire international community is indebted to this great nation for the expenditure of funds and for the commitment of its law enforcement officials who have dedicated their lives to the interdiction of parcotics trafficking and to the eradication of the illicit production of drugs harvested in Mexico's dangerously rugged mountains.

Finally, Mr. Chairman, we commend the Government of Mexico for its support of the United Nations Funds for Drug Abuse Control (UNFDAC). Last year, for the first time since UNFDAC was created a decade ago, Mexico contributed to the UN Fund. In 1980, 6 nations from Latin America contributed \$25,000 to the UN Fund: Argentina (\$10,000); Bolivia (\$1,000); Brazil (\$5,000); Chile (\$3,000); Mexico (\$4,000); and Venezuela (\$2,000), compared to the \$20,000 contributed by Argentina, Brazil, Chile, and Venezuela for 1979. Hopefully, Mexico will encourage other members of the Latin community America to contribute UNFDAC.

With regard to United Nations drug initiatives, Mexico is to be commended for its leadership in hosting this December a UN sponsored conference on combating the illic-

it production of drugs.

Preventing and controlling drug abuse is a never-ending task * * * a herculean prob-lem. It requires the concerted, cooperative efforts of the entire international communi-ty. In this regard, Mexico plays a vital role: Its leadership and expertise are urgently needed. We encourage cooperative efforts between Mexico and our National Aeronautics and Space Administration (NASA) to develop sophisticated scanning devices to identify marihuana and opium poppy fields.

Mr. Chairman, on behalf of those in my Government who have been working on our drug problems, I want to thank the people of Mexico and its distinguished President for your efforts in assisting us in trying to stem the tide against drug traffickers whose business transactions are undermining the health of our citizens and corrupting the political, economic, and social institutions of our two great nations.

Thank you, Mr. Chairman, for providing

me this opportunity to share with you and this distinguished committee my thoughts regarding this vitally important issue.

BLANCHARD ANNOUNCES QUESTIONNAIRE RESULTS

HON. JAMES J. BLANCHARD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. BLANCHARD. Mr. Speaker, earlier this spring I mailed a questionnaire to residents of Michigan's 18th Congressional District. My purpose was to find out what priorities people feel I should be spending my time on, and how people feel about President Reagan's economic policies.

To date I have received responses from nearly 5,000 citizens, I believe that the preliminary results of this survey would be of interest to my col-

leagues.

The questionnaire consisted of four parts. The results were as follows:

In response to the statement, "(A) I wish that you would give the President what he wants; (B) vote the interests of your district; (C) make your own judgment and vote as you think best", the breakdown was:

Give the President what he wants. Vote the interests of your district.. 41 Make your own judgment and vote 25 as you think best

In response to the statement, "I would like to see you spend your time on the following issues and activities", the 5 most frequently cited concerns were:

 Decreasing waste in Federal programs. 2. Preserving the social security system in its present form.

3. Reducing taxes.

4. Exempting education from budget cuts. 5. Diversifying and revitalizing Michigan's

Mr. Speaker, the difficulty we face is determining how best to make progress on these issues. Hopefully we can craft innovative and forwardminded proposals.

I would especially note that the fifth most often mentioned point, was the issue of diversifying and revitalizing Michigan's economy. While this issue would probably not be listed as a major concern in other parts of the country, the results of the questionnaire clearly demonstrates the need for developing an effective economic revitalization policy targeted to certain sectors and regions.

The House Banking Subcommittee on Economic Stabilization, which I chair, is in the process of a thorough indepth examination of the subject of economic revitalization. We have already conducted 17 days of hearings and heard from 61 witnesses in such key issues as capital formation, research and development, job retraining and relocating policies, the effects of high interest rates, the status of the defense industrial base, and urban infrastructure needs. We have also contacted experts from all over the country in the fields of business, labor, finance, and education seeking their ideas and insights. We plan to continue hearings in September and hopefully issue a report with recommendations later this fall.

CALIFORNIA ENERGY CONSERVATION PROJECT

HON. DAVID DREIER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. DREIER. Mr. Speaker, I would like to take this opportunity to commend Southern California Edison Co. and the Community Services Department of San Bernardino County for the effective implementation of a unique, cost effective energy conservation project.

The southern California mobile home audit program resulted in an annual energy savings of approximately 500 kWh and an estimated \$40,000 reduction in energy costs for 1,000 lowincome families in San Bernardino County. I applaud this joint private/ public sector effort to reduce energy costs and conserve energy.

I am inserting an article which presents the specifics of this creative energy conservation effort which was awarded the President's Award for Energy Efficiency.

The article follows:

A joint conservation campaign sponsored by a San Bernardino County poverty agency and Edison has helped 1,000 low-income families reduce their energy bills by a total of nearly \$40,000.

In conjunction with the campaign, Robert L. Boyton, vice president, Eastern Division, presented a plaque during ceremonies before the County Board of Supervisors citing the "substantial contributions" that have been made.

Bob Hammock, board chairman, and Rodolfo Castro, executive director of the County Community Services Department (CSD), accepted the plaques, which read:

'In recognition of outstanding contribution to America's economic and national security, through exemplary leadership in the national effort to achieve energy efficien-

Edison and CSD focused their consideration efforts on low-income mobile home residents, since that group is among the hardest hit by rising energy costs.

Dina Hunter, SCE conservation resources

coordinator, said that Edison has contributed several thousand dollars for the year-

Energy-use surveys were conducted by CSD conservation teams trained by Edison personnel and were able to identify no-cost or low-cost ways to cut energy waste.

It's estimated that because of the yearlong, joint effort, the average family experienced an annual consumption cut of about 400 to 500 kilowatt-hours, representing an annual savings of about \$40,000 in reduced energy costs.

Most older mobile homes, it was pointed out, have little insulation. The metal sides and roofs act as conductors of heat and outdoor temperatures quickly transfer into living areas. The older mobile homes are thus hot in summer, cold in winter.

"In many cases, families in such situations were paying more than the average customer living in conventional housing," Boynton

Results of the campaign were noted in the Company's candidacy last year for the President's Award for Energy Efficiency. Edison was subsequently honored for "successful residential programs" which contributed to achieving the national goals of reducing U.S. oil imports during 1980.

"And remember," Ms. Hunter added, "the low-income families involved will be saving energy for years to come, thanks to this program."

SALUTE TO JANE HANSON

HON. CHARLES E. SCHUMER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES Tuesday, August 4, 1981

. Mr. SCHUMER. Mr. Speaker, it is with great honor that I rise to salute Ms. Jane Hanson of WNBC-TV in New York. Ms. Hanson is that special kind of reporter whose work in my district in Brooklyn typifies the impact a persevering and caring journalist can have on a neighborhood.

Jane Hanson first reported that raw sewage was backing up to residents' homes in the Midwood section of Brooklyn and that community pressure alone had not gotten the proper government agencies to alleviate the problem. She, however, did not stop there. She pursued the matter with district office staff and and pressed the municipal authorities who had theretofore turned a deaf ear to the residents. Ms. Hanson continued her efforts until the sewage pipes were repaired.

On behalf of our neighborhood, I want to thank Jane Hanson for an outstanding job of reporting and investigating and even more importantly, for her persistence and commitment in helping to solve what had seemed an unsolvable problem. She is a journalist that the people of New York City need, and we applaud her for her outstanding work.

CONGRESSMAN CLAY ADDRESS-ES THE LOW VOTER TURNOUT ISSUE

HON. LOUIS STOKES

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. STOKES. Mr. Speaker, I take this opportunity to bring to the attention of my colleagues an interesting and provocative article written by my distinguished colleague and good friend from the First Congressional District of Missouri—the Honorable WILLIAM "BILL" CLAY. The article is entitled "What Low Voter Turnout?" and was published in the July, 1981 St. Louis Journalism Review.

In the article, Congressman CLAY carefully examines the sometimes confusing and distorted view projected by media organizations to the Nation about the existence and reasons for the proverbial low voter turnout in recent national elections. In a very concise manner, Congressman CLAY clarifies the issue by contrasting the voter turnout in previous elections versus the 1976 and 1980 Presidential elections. From this contrast, he effectively sets the record straight about the dismally low voter turnout stories we hear so often.

Mr. Speaker, probably just as important, Congressman CLAY, in his well written article, outlines possible reasons as to why the voting record in this country is not better. It is on this point that I refer back to my initial statement that the article is quite provocative and is worthy of more than just passing acknowledgment.

I believe that the facts and theories presented by our distinguished colleague from Missouri on this matter provides a good starting point for Members of this body and journalists alike to responsibly analyze the voting behavior of the American people in general and more specifically, voting patterns of underrepresented groups in this nation.

At this point, Mr. Speaker, I insert in the Record, the article entitled "What Low Voter Turnout?" written by Congressman William "Bill" Clay. I hope that my colleagues will join me in applauding Congressman Clay's efforts in addressing this issue and in starting the dialog on the appropriate note for this issue.

The article follows:

WHAT LOW VOTER TURNOUT?

(By Representative WILLIAM L. CLAY)

The gentlemen of the media have made quite a to do about the fact that less than a majority of the voting age population participated in the 1976 and 1980 presidential elections. Editorials and news stories flourish with indignation because only 27.2% and 26.7% of the voting age population went to the polls in 1976 and 1980 respectively. The point is emphasized that the republic is fall-

ing apart and citizens no longer care about who will lead the nation.

But the simple truth is that those percentages are higher than the turnout for twenty-eight previous presidential elections. Not once in the history of this country has a majority of the voting age population cast votes to determine who would be president. It's misleading for the media to give the impression that the number of persons involving themselves in the electoral process is decreasing. That number may be shocking. but, nevertheless, it is not decreasing. It's pretty much par with the percentage of voters since 1920 when Warren Harding was elected by 25.6% of people of voting age. Certainly it's better than the 23.7% which elected Calvin Coolidge, the 25.3% which elected Harry S. Truman and the 26.4% which elected Richard Nixon to his first

Between 1828 and 1916, from Andrew Jackson to Woodrow Wilson, 23 presidents were elected. The highest percentage of voting age population participating was during the election of William McKinley and it was only 18.8 percent. Admittedly the entire populace was not permitted to vote during those years. Blacks were not permitted to vote until 1870 when the 15th Amendment abolished race as a barrier to voting. Even then only a few actually were permitted to vote. Then, in 1920, the 24th Amendment give suffrage to women. In 1971 the 26th Amendment lowered the voting age to 18 years, giving this privilege to those who were allowed to fight in the military.

Without attempting to condone the practice of not voting, it should be pointed out that there are many reasons people don't exercise this right. Probably the biggest reason is that they don't have the capability of relating government and its leadership to their everyday lives. But beyond that there are factors which tend to discourage voting. Registration in itself is an impediment. When the media attempts to compare election results in this country with foreign contests, the comparison is tainted. In most of the countries where 80 to 90 percent of the electorate go to the polls, there is no requirement for registration.

Perhaps the second biggest reason for boycotting elections is fear. Many are actually afraid to enter a polling booth and pull levers. Some cannot read and are ashamed to ask for assistance. Some are not acquainted with the candidates or issues and fear voting blindly. Others, usually in low income areas, refuse to register for fear that the information is not confidential. In too many instances they have moved to new residences in order to avoid creditors. A change of registration immediately alerts the creditor to their new addresses.

Criminal records also play a role in low registration and voting. In most states persons who have been convicted of a felony automatically lose citizenship and the right to vote. Until the governor or some state agency restores that citizenship, it is another felony to register to vote.

So, until the rules of the game are drastically changed, there will be no drastic change in the percentage of people who exercise their right to vote.

CAREER INTERN PROGRAMS

HON, ELWOOD HILLIS

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. HILLIS. Mr. Speaker, unemployment among our youth remains unacceptably high. Unless we take the necessary actions to lower the unemployment rate among teens, we will soon have an entire generation of capable people who have never held a meaningful job. This type of tragedy cannot be allowed to happen.

As our lives become more complicated due to ever higher levels of technology, the level of education needed to obtain gainful employment increases. Young people who have failed to learn how to read and write adequately, or who have simply dropped out of school, are unable to compete in today's job market. The sophistication of today's technologies means that even entry-level jobs require high school degrees at a minimum.

Our Government must address the problems associated with youth unemployment. To help in this effort, I have today introduced a bill which I feel will go a long way in solving the problems of youth unemployment. The bill will encourage local educational agencies to develop career intern programs (CIP).

The career intern program is not a new idea. It is a proven way of helping the educationally disadvantaged unemployed youth. The program was started in the early 1970's by Dr. Leon Sullivan through the Opportunities Industrialization Centers in six cities. Since then hundreds of young people have earned a high school degree through the CIP's.

The following is an excerpt from an OIC publication discussing in detail the career intern program. I commend this reading to every Member of the House. Hopefully, when the Congress returns in September work can begin to insure passage of this program.

The decade of the 1960's was a time of struggle, strife and turmoil. Millions of Americans who had been systematically excluded from the economic mainstream of American society demanded access to improved economic conditions. The nonviolent protests of the Civil Rights Movement opened the doors of opportunity for a few of these alienated and disenchanted Americans. The vast majority, however, lacking skills to compete for meaningful jobs, were left in a state of hopelessness, frustration and despair. Their anger erupted into riots in urban centers throughout America.

The Opportunities Industrialization Centers of America (OIC/A) was born during this period, led by Dr. Leon H. Sullivan, Founder and Chairman of the Board. OIC provides alternatives through training and services which enable the poor and the disadvantaged to make reality of their hopes. From the beginning, in 1964, the program

focused on individualized, integrated work/ life planning, fusing academic instruction, skills development and personal and occupational counseling.

Today, OIC/A is the largest private, nonprofit, skills-training network in America. OIC programs are in over 140 communities in various states, serving thousands of adult

poor and disadvantaged persons.

As the impact of OIC/A spread throughout America and the world, Dr. Sullivan turned his attention to the problems of young people who were dropping out of high school. Without a diploma and without a job skill, they were poorly prepared for a constructive role in society. To stem the tide of dropout-ism, Dr. Sullivan formulated the Urban Career Education Center (UCEC) in 1971. It involved parents supportively in the educational, career and personal development of their children. It introduced career education concepts and techniques into traditional school curricula. The first CIP was a model, experimental career education program. With the endorsement and cooperation of the Philadelphia Board of Education, and the support of the National Institute of Education and the Office of Education, UCEC was initiated as a pilot project in Philadelphia, Pennsylvania. Its central component was an alternative high school program for potential and actual high school dropouts, as well as other students who needed help to integrate their educational, career and personal goals. Thus was born the Career Intern Program (CIP). Since then, expansion of the Program has been guided by the experience OIC has gained from organizing independent affiliates throughout America and abroad.

Formal, internal and external assessment has been rigorously applied to refine the CIP model. Current operations are rooted in the experience of what works. There are now five CIP branches, locally operated but based on CIP principles. The CIP design provides the flexibility needed to adapt to

local conditions.

CIP requires each intern to set specific career goals and to work toward those goals. Interns are provided with a consistent flow of honest feedback on both educational and personal progress. Assessments are formalized in report cards; interns also are appraised in other ways: staff conferences review each intern's status, problems, progress and contingency alternatives. Thus, constant communication between staff and interns provides honest "readings" of individuals' progress.

Program performance has been objectively measured. In 1972, the National Institute of Education established an external evaluation component to conduct a rigorous formative and summative evaluation of the

Career Intern Program.

The evaluation consisted of administering a battery of standardized instruments to measure the comparability of CIP interns to control and comparison groups in academic, career and personal growth. The control groups were randomly selected and the comparison groups consisted of traditional high school students. An ethnographic design was employed to identify casual linkages and basic interrelationships among various components of the CIP and observed intern outcomes. A follow-up component was added to the evaluation to determine what happens to interns after graduation from CIP.

No CIP program starts without the endorsement and a resolution of cooperation and support from the local school system.

CIPs are authorized to function as an adjunct to the school system, to enroll eligible youth as interns, to help interns earn the course credits necessary for graduation and to validate those credits. The CIP course requirements and credit-awarding procedures meet local educational standards. CIP staff members should meet the certification requirements of the local school system.

Each CIP thus becomes semiautonomous, observing the procedures of the local school system but providing an alternative educational experience and setting for students. Each CIP cultivates a close working relationship with its local school system. It is not a rival, but rather a specialist and an ally to the school system, educating disadvantaged youth. Interns maintain their association with their "parent" school and can participate in athletic and extracurricular programs. Upon graduation, they receive diplomas from that school. The strong, cooperative bond between CIP and the local school system gives interns a mix which furthers their educational, personal and career goals.

For CIP to be viable on a local level, other strong supports have been established. These include, but are not limited to, cooperative linkages with the business and industrial sector, institutions of higher learning, skills-training and technical schools, social service and community agencies, state and local governmental institutions, civic and professional groups. CIP staff members continually strengthen and broaden this array of supportive linkages so that interns have access to a network of effective ancillary services. A CIP Advisory Council is an important channel for this support systems; with representation from the public and private sectors. Local Councils assist in expansion and practical implementation of the linkage system. Council members also advise the CIP leadership of changing conditions and new opportunities in the various fields they represent.

The CIPs incorporated the OIC policy of cementing partnerships with federal, state and local agencies. They recruited as advisors, executors of major business and industrial corporations, religious and social institutions, community and civic groups, and educational and professional organizations.

After passage of the Youth Employment and Demonstration Projects in 1977, Dr. Robert Taggart, former Administrator of the Department of Labor's Office of Youth Programs, and the National Institute of Education authorized OIC/A to establish four additional CIPs: Detroit, Michigar; New York, New York; Poughkeepsie, New York; and Seattle, Washington. This was to test whether CIP would work in communities with different clienteles and different programs.

In such manner, CIP evolved from problem-analysis, adapted OIC philosophies and formulated career education concepts which have been tested and have proven effective in a variety of settings. It is a replicable, educationally-sound model. It is flexible and responsive. It adapts to specific community and youth problems. Interns get individualized, one-on-one attention. The program fosters a supportive atmosphere. CIP interns respond positively to a staff which cares about them, respects them and gives them practical assistance in the maturation process. CIP interns develop social identity and a positive sense of status, tools which will help them all their lives. CIP is not where they have to be, but where they choose to

Interns learn first-hand how and why employers select, supervise, discharge or promote employees. They learn which skills, work habits and interpersonal techniques are essential. They learn about career options in the world of work. They are prepared to address that world and to negotiate for themselves a place in the economic life of the nation.

CIP staffs deal with the personalized needs of the whole individual. Academic progress is inter-related with personal wellbeing. Curricular materials, teaching and counseling methodologies are designed to facilite individual and groups inquiry, to fuse career and affective information into academic subject areas, and to provide opportunities for experimental learning through in-class and out-of-class experiences. CIP staff members impart positive expectations to interns and convey both the determination and inspiration that interns can, will and must succeed.

Recruitment is active wherever young people congregate. Referrals come from the school system. Others are nominated by social, religious, and community agencies, by parents and peers. Some candidates are found in pool halls, youth centers, and on street corners. CIP recruiting is designed to reach and involve all eligible and interested youth within a community.

From the first day, staff members strive

From the first day, staff members strive to create an atmosphere of awareness, understanding and cooperation with a prospective intern. Parents are encouraged to become involved, as they must become an active and integral part of the educational process.

The Intake Interview and an assessment determine the youth's potential for adaptability to CIP, and that CIP is the program the youth is seeking and needs. Since CIP is designed to screen young people in and not out, all efforts are made to insure that a correct and unanimous decision is made by the prospective intern, his/her parent(s) and the CIP staff. If it is determined that another program would be more appropriate, CIP refers the youth to such a program. CIP staff "follow-up" afterwards to see that youth get such other services.

Orientation officially welcomes the intern into CIP and gives interns and their parents additional information about CIP. Orientation facilitates information exchange, fosters supportive relationships between interns, their families and staff, and estab-

lishes mutual goals.

Career Awareness course offerings consistent with the courses required by the local school system. They vary in accordance with the state and local educational reguirements. Classes and other activities provide fundamental academic skills, improve attitudes and stimulate interest. Instructors use creativity and initative in designing course syllabi and lesson plans-consistent with school system requirements. They utilize minilessons, individualized instruction, small or large group interactions, didactics, and other teaching techniques. Subject matter, activities and materials are careeroriented. Career fairs, resource speakers. field trips, and off-campus activities correlate classroom subject-matter with the surrounding environment, the world of work, and personal, career and academic aspira-

During the summer, interns become involved in other summer employment programs, summer classroom programming, off-campus educational programming, or consumer programming. This keeps them

motivated and committed to learning while meeting their income needs.

CIP utilizes the entire community as a learning resource. More advanced interns who have accrued sufficient credits and are successfully progressing in all levels of CIP endeavors are involved in a variety of other activities. These include educational enrichment programs, collaborative programming with postsecondary institutions, technical schools, and on-the-job training.

Counseling is intensely individualized and encompasses academic, career, and personal development. Counseling sessions are held with each intern at least once every two weeks. Counseling is the coordinative bond to provide such services to interns as child care, employment, health, etc., from service resource centers within the community. Counseling also involves parents in support activities to assist interns in achieving their goals. Counseling support further prepares the intern for the attitudinal and behavioral adjustments which are required in the world of work.

As interns complete more quarters (or semesters depending upon the schedule of the local school system), and accrue more credits toward graduation, more advanced course work is introduced. A variety of more sophisticated instructional methodologies are used. More specialized career-oriented subject matter and supplementary materials are introduced. Career options are explored through career fairs, resource speakers who are employers, field trips, and off-campus activities. There is more intensive career counseling as well as greater parental involvement.

As interns begin to focus upon particular careers, they are prepared for their "handsexperiences. Interns spend time at worksites where they observe pace and procedures and learn the parameters and educational requirements of careers in which they are interested. This usually includes performing tasks, under a worksite supervisor, through which they learn more dimensions of the work world. (When company or union regulations preclude their performing "hands-on" tasks, the interns observe in-tently—and review processes and procedures afterward, in class.) Interns who complete the "hands-on" phase of their training have a more realistic perception of their career choices, the world, and the expectations associated with their career choices.

When the intern approaches graduation, planning for the next level of activity begins. Interns interested in college get enrollment and scholarship information. Interns interested in employment are taught job-finding skills. Those seeking advanced skills or technical training are assisted to enroll in appropriate institutions. Interns interested in the armed forces or on-the-job training are assisted in researching proper placement. CIP is designed to insure interns' transition into situations commensurate with their training, abilities, goals and ambitions.

Entering the 1980s, the problems of youth have reached epidemic proportions. With no chance for meaningful careers and lives, millions are dropping out of school. The unemployment rate has reached nearly 40% among some youths. Hopelessness and despair are spreading.

The CIP's effectiveness has been demonstrated in terms of the compelling evidence presented in the publication, the Career Intern Program: Final Report: An Experiment in Career Education That Worked and the Citing of CIP by the U.S. Divison of

Education's Joint Dissemination Review Panel as an exemplary, educational program in 1977. Though the evaluation reports for the CIP Replication have not been published, (they are to be published by June 1981), the Interim Reports present strongly encouraging evidence, across sites, of the effectiveness of the CIP on a national plane. According to the Reports, among the findings are:

Statistically significant gains were observed in both reading and math across sites.

Statistically significant gains were observed across sites on the Planning, Use-of-Resources, and Informational Scales of the Career Development Inventory; the Self-Esteem Inventory, and the Internal-External Scale.

Enforcement of maintenance, system, e.g. school rules and regulations regarding promptness, appropriate apparel, etc., contributes to interns' internalizing "world-of-work" norms.

Enforcement of the program's maintenance component is also responsible for the absence of profanity, smoking in class or in the hallways, graffiti and loitering.

The use of contracts and various teaching devices contribute to a greater understanding and sense of responsibility on the part of the intern.

Maintaining high expectations of interns, personally and academically, contributes to an improved attendance pattern, higher grades, and increased self-esteem for many interns.

Providing a supportive context for interns contributes directly to increased attendance, higher grades, selection of a career, and graduation.

Providing auxiliary services, e.g. day care facilities, enable them to attend on a regular basis.

VOTING RIGHTS REQUIRE BIPARTISAN SUPPORT

HON. ROBERT McCLORY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. McCLORY. Mr. Speaker, the Voting Rights Act of 1965 extended in 1970 and again in 1975 will expire in October 1982.

Efforts to further extend this act are based upon a need to continue its beneficial effects without impairing the voting rights of any American against whom discrimination might still be practiced.

It should be borne in mind that under the 1965 legislation those States and counties which are subjected automatically to the stringent requirements of this law have been obliged to submit all statutes and ordinances relating to elections or voting to the U.S. Attorney General for preclearance. This requirement imposes a 60-day delay in the effective date of all such measures pending which the Attorney General may interpose objections and thereby nullify the attempts of States and local units of government to amend their statutes or ordinances.

In the pending legislation intended to extend for another 10-year period, the original Voting Rights Act, substantial interest has been expressed to permit States and counties to bail out of the stringent preclearance requirements where practices of discrimination have been discontinued. Certainly a 10-year record of nondiscrimination would seem sufficient to liberate States and communities from the burdensome preclearance provisions.

Mr. Speaker, the diligent efforts to reach a bipartisan agreement on this issue were frustrated, not from within the committee but from sources outside the committee structure where adamant demands were made, intended to impose restrictions on affected jurisdictions even beyond those established in the original Voting Rights Act of 1965.

Mr. Speaker, it is my hope that a bipartisan measure may yet emerge from persons of good will in this body from both sides of the political aisle. Fairness and equity should control our actions. Precious voting rights should be enhanced, discrimination must be discouraged, and those jurisdictions where discrimination has been eliminated should be restored to equality with other areas of the Nation where Federal examiners have never been installed and where preclearance has never been imposed.

Mr. Speaker, the Voting Rights Act must not be permitted to descend into the uncertainty of the political arena when a truly bipartisan solution is ready and available to keep this worthwhile program in effect.

THE DEFENSE BUDGET IN CONTEXT

HON. DOUG WALGREN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. WALGREN. Mr. Speaker, as the Congress has deliberated the 1982 Federal budget in recent months, I have had deep reservations about the level of defense funding that has been approved.

The Reagan administration has requested \$222 billion for the Department of Defense for 1982. The administration has indicated that they plan to spend \$374 billion annually by 1986, meaning that defense will receive 37.6 percent of the Federal budget compared to the 24.7 percent it now receives. During this 5-year buildup, defense expenditures will total \$1.65 trillion.

Congress has in effect ratified this plan by adopting the Gramm-Latta amendment to the budget resolution, by adopting the Gramm-Latta reconciliation amendments, and by approving the Department of Defense Authorization Act, H.R. 3519.

I am disappointed and worried about the course this administration has set for defense and which Congress seems willing to rubberstamp. No one, and certainly not I, denies the need for a strong defense. But we should put the magnitude of these numbers in perspective and examine just what these dollars buy for us. Few Americans can conceive of \$1.65 trillion; it is a mind-boggling figure. What it means is spending \$1 billion a day in 1986.

I am troubled about this course for several reasons: First, national priorities have gone awry; second, efforts to cut waste from the Defense Department have failed; yet almost every other Federal program has been reduced; third, spending \$1.65 trillion is not good economics; fourth, spending \$1.65 trillion will not necessarily get us a good defense.

PRIORITIES ASKEW

The flood of budget cutting has left the Department of Defense essentially untouched. The Gramm-Latta budget included \$226.3 billion for 1982. Let us compare this to some other programs. For the current year, the following programs are receiving these amounts:

[In millions]

Elementary and secondary educa-	
tion	\$2,800
Education for handicapped chil-	
dren	1,100
Alcohol and drug abuse education.	3
Rehabilitation services for the dis-	
abled	930
Home health care	4
National Cancer Institute	1,000
Emergency medical services	30
Highway safety research	9
Mass transit	3,700
Bridge repairs	200
A 11 A 11 Y 11 1 11 1	PROPERTY AND

Quite frankly, I think this policy puts peoples' needs last.

Waste, fraud, and abuse have been popular catchwords lately, yet we have refused to apply them to the DOD, and to that Department alone. Congresswoman Schroeder proposed a sensible amendment, requiring the President to cut \$8 billion of waste from the Defense Department by January 15, 1982. In my view, this was quite reasonable in light of the \$16 billion or more of waste found by both the GAO and the Republican Study Committee. I supported that amendment, but it was voted down.

There are ways to reduce the Defense budget and I have cast several votes to do so:

On July 16, I voted for the Schroeder amendment to require the President to make rescissions of at least \$8 billion in Defense Department spending so as to combat waste, fraud, and abuse.

On July 9, I voted for an amendment that would have permitted the President to transfer B-1 procurement funds to research and development for an advanced technology bomber.

On July 9, I also supported measures to reduce spending for the MX by \$2.4 billion and to prohibit obligation or expenditure of funds for the MX missile system basing mode until the President certifies a specific mode to Congress, and Congress is given 60 days in which to disapprove the basing mode selected.

On May 7, I voted against the Gramm-Latta budget, which allocated \$226 billion to the Department of Defense, \$7 billion more than in the Jones budget, which I supported.

On July 16, I voted to tighten up on multiyear weapons procurements, which increasingly have resulted in seemingly uncontrollable cost overruns.

DEFENSE SPENDING IS INFLATIONARY BY ITS NATURE

Economic recovery has also been the watchword this year, but I am not convinced that massive spending for defense is going to revitalize our economy. In fact, it might help drag it down. Quite simply, putting money into expensive weapons systems is inflationary by its very nature. Just as printing money to cover deficit spending by the Government leads to inflation by causing more dollars to chase the same amount of goods, defense expenditures, by their very nature, have the same inflationary result.

It is in the nature of defense spending that the product produced by our money is removed from the market-place because we do not offer things like the B-1 bomber for sale. The result of removing the work product of defense expenditures from the marketplace is to have the same amount of money chasing fewer goods. The inflationary effect of this kind of spending is equal to deficit spending; defense spending only affects the other side of the equation that must be kept in balance if we are to avoid inflation.

TRILLIONS DO NOT MEAN A STRONG DEFENSE

The philosophy reflected in the size of these figures seems to suggest that spending is the sole path to a strong defense. In my view, there are several other important elements.

First, there is people. We must have members of the Armed Forces with a high morale and dedication to their country. To attract and retain these individuals, we must offer incentives and provide good working conditions. And yet, what few military cuts that have been made have been made in the people aspect of the military—not the weapons, not procurement, not in the military functions that are duplicated in the various branches.

Maintaining peace and national security also depend on cooperative international defense, like that that we have with NATO, with efforts like nuclear disarmament and arms limitations—not to mention a healthy domestic economy. I am very afraid that this spend-spend course will endanger international peace, by stimulating a new arms race and by threatening our economy with more inflation.

I have supported and voted for a strong national defense. I am concerned that defense spending today is going largely unscrutinized, largely unquestioned. When programs like social security, school lunches, and medicare get slashed, defense too must take a share of the slice.

Because the average person does buy things like guns and airplanes, the production of defense equipment will result in the same number of dollars chasing fewers goods. When the same amount of dollars chases fewer goods, inflation will be inevitable.

GARY HYMEL ENTERS PRIVATE SECTOR

HON. LINDY (MRS. HALE) BOGGS

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mrs. BOGGS. Mr. Speaker, at the beginning of last month a very good friend and key employee of the House of Representatives left to enter the private sector. I am sure all of us feel the loss of our good friend, Gary Hymel, but we understand his reasons for leaving, and we congratulate Gray & Co. for its gain.

Gary was a long-time close personal friend and confidant of mine and my family. He has helped me immeasurably over the years by providing advice, counsel, and moral support in times both trying and joyous. His dear wife, Winky, and their lively and attractive children have added precious dimensions to our relationship.

Last Saturday, the Richmond Times-Dispatch carried a column in which Gary shares some of his observations of the political changes that have taken place in this body in the years since he came to Washington to work with my husband, Hale. I would like to take this opportunity to share Nick Thimmesch's column with my colleagues.

[From the Richmond Times-Dispatch, July 31, 1981]

THE SPEAKER LOSES RIGHT-HAND MAN (By Nick Thimmesch)

Washington.—Gary Hymel, until recently Tip O'Neill's right-hand man, is little known in the Republic, but was an important figure on Capitol Hill for 16 years. To hear Hymel, a gentlemanly Louisianaian, ruminate is to realize how dramatically Congress has changed in recent years.

When Hymel arrived in 1965 as the late Hale Boggs' administrative assistant, the great Society legislation of the Johnson administration was being churned out. The federal government swelled and so did Congress The number of House employees has nearly doubled since Hymel arrived, and now totals 12,200. It costs nearly three times as much to just run Congress now. Where there were 107 subcommittees in 1972, often unstaffed and lethargic, there are now 136 busy ones fully staffed.

"The proliferation of subcommittee and staffing is the biggest change in my time on the Hill," Hymel says. "By allowing younger members to bid for subcommittee and committee posts, and even let them become chairmen, the old seniority system was shook. The Watergate class of 1974 made the reforms, but they were originated by the Democratic Study Group (a liberal congressional organization).

"Another big change involves trust.

"People don't trust each other like they did when I came here. If a committee voted a bill out, members trusted the chairman's advice to vote for it. Now, the members are younger and brighter and want everything proved."

In an earlier time, say, when Sam Rayburn was speaker, freshmen members were sworn in, and resigned themselves to constituent services, listening to their elders, and waiting for years before earning a measure of power. That situation prevailed in Hymel's first years on the Hill when John McCormick was speaker.

"LBJ had made a fine art out of tuning Congress, and with the discipline we had then, legislation poured through," Hymel said. "When Tip was leader during the Watergate period, and Carl Albert was speaker, Congress overwhelmed Nixon. The benchmark was when Congress passed the anti-impoundment act, and stopped Nixon from tying up funds.

"Nowadays, there isn't the party loyalty there was when I first came. Members get elected by running against the Establishment. There's less fun up here and more scrutiny by the press. There are fewer characters and wheel horses—the kind of men with a sense of humor who didn't take themselves so seriously. And there are no more spitoons. The last one was owned by Speaker McCormick."

In 1971, Hymel's boss, Hale Boggs, was killed in an airplane crash in Alaska where he was compaigning for Rep. Nick Begich. "You know," says Hymel, "that trip showed the kind of man Hale was. Begich had opposed Hale when he ran for leader, but Hale went out and campaigned for him because he felt the key to being a good leader is not to get mad and stay mad.

"Hale hired me from the New Orleans States-Item where I was a political reporter. He thought I knew the political turf in Louisiana and could help him. He treated me fine, and was the brightest man I ever knew.

fine, and was the brightest man I ever knew. "With Hale gone, Tip became leader and kept me in the job. I was the only Southerner on his staff. Tip felt I could help him with the Southerners. But New Orleans is a little different from the rest of the South.

"Tip and I had some things in common—we are both Catholics, Jesuit-educated, and regarded ourselves as liberals. I must say that Tip wasn't for McGovern in 1972 though. He was the only Massachusetts delegate for Ed Muskie.

"The hardest decision in my life was to leave Tip. He was a great boss, a warm human being, unpretentious, and totally honest. I had been holding back, and finally, at the elevator one day, I just let it out, and I flinched a little."

O'Neill misses Hymel professionally and personally. Hymel was the eyes and ears for

Tip on the Hill, and also served as his connection to the press. But Hymel, father of eight, has three children in college and a wife about to enter college. He felt that his \$55,000 salary wasn't enough, though it is top pay on the Hill for a staffer.

So Hymel, 48, signed on with Bob Gray, a Reagan Republican, who runs an influential public relations firm. Hymel is now paid a selery reported to be in six figures.

salary reported to be in six figures.

He'll be working the Hill, but in a different way. He has lost none of his affection for it. "The beauty of the House is that it is a mirror of what America is," Hymel says. "America is more educated and independent now, and so is the House. Running every two years is good for members, because it makes them respond to their constituencies. This is a very human institution.

SOCIAL SECURITY OVERVIEW

HON. NORMAN D. SHUMWAY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. SHUMWAY. Mr. Speaker, no issue has generated more controversy and caused more concern among the citizens of this country than that of the future of the social security system. The intense debate over social security's financial problems has tended to undermine public confidence in the ability of the system to meet future commitments; current and future retirees alike are growing increasingly concerned that anticipated benefits may not be forthcoming at all.

Because of the confusion presently surrounding the social security debate, I would like to take this opportunity to discuss the history of the social security system, the nature of current problems, and prospects for the future. In so doing, I hope to lay to rest much of the misunderstanding which now exists.

When the social security system was established in 1935, it encompassed a social insurance system to provide benefits for retired workers, an unemployment compensation program to be financed by the States, and a mechanism for matching grants to States to provide help for the aged, blind, dependent and crippled children, and for maternal and child welfare. Title II of the basic Social Security Act provides the statutory authority for the old age survivors insurance program (OASI) and the disability insurance program (DI), through which most current recipients receive benefits.

Social security was originally intended to be a form of social insurance to protect against the loss of income at retirement. It was never expected that social security would be the only means of support for the elderly, but rather one source of income to be supplemented by private investments, pensions, and savings. As a social insurance plan, social security is today further meant to protect individual

workers and their families from income loss as a result of occurrences such as retirement, death, and disability, as well as to protect society as a whole from the problems associated with those individuals who, for one reason or another, are not self-sufficient. Inherent in this basic premise is the concept of social adequacy rather than social equity. Unlike traditional annuities, for instance, benefits are not now and were never intended to be allocated strictly on the basis of earnings and years employed, but are instead computed by a benefit formula weighted to favor the long-term, lowwage earner. In so doing, social security is to some degree an income redistribution system which awards the highest relative benefit to the lowest earner, and vice versa.

The original act covered only workers in commercial and industrial occupations—about 60 percent of the workforce in 1935—but amendments over the years have extended mandatory coverage to more employee classes as well as increased the categories of eligible beneficiaries.

Federal employees as well as railroad workers were exempt from the outset because it was felt their own retirement systems were adequate. State and local government employees were excluded because of the constitutional difficulties levying a Federal tax on States and localities; nonprofit employees were considered to have the same tax-exempt status as their employing organizations, and agricultural and domestic workers were excluded because of administrative problems in keeping comprehensive wage histories-one of the advantages of social security is that OASDI credits are "portable," that is, "carried" with the employee as he moves from job to job.

Over the years, mandatory coverage for OASDI has been extended to regularly employed domestic and farmworkers, most self-employed professionals, members of the Armed Forces, Federal civilian employees not under a retirement system, residents of Puerto Rico and the Virgin Islands, Americans working overseas for American employers, home workers, ministers, and some religious orders. Voluntary group coverage was extended to State and local government employees as well as to nonprofit workers.

As mandatory coverage was expanded, so have the categories of eligible beneficiaries. The original act provided benefits to retirees age 65 or older who had been paid wages in 5 different years—after 1936 and before reaching age 65—the sum total of which was not less than \$2,000. Recognizing the effect that loss of income could have on an entire family, the act was amended in 1939 to provide benefits to dependents and survivors of insured wage earners—the eligible cate-

gories included: Aged wife, child under 18, widowed mother caring for an eligible child, aged widow and dependent aged parents, if there were no surviving eligible widow or child. This approach also served to further the concept of social adequacy since benefits are not strictly related to contributions-even though a single wage earner and the primary wage earner of a household pay the same payroll tax, the family of the primary wage earner receives a higher return on contributions through survivors benefits than does a single person who would only receive his or her retirement benefits.

Currently, primary old-age benefits are paid to a fully insured worker who has reached age 62—the amount of monthly payment is 80 percent of what would otherwise be received at age 65—and terminate with the monthly payment for the month prior to the death of the insured worker.

Primary disability benefits are paid to workers who are unable to engage in "substantial gainful activity" by reason of any medically determinable physical or mental impairment which can be expected to result in death or which has lasted for a period of not less than 12 consecutive months, or blindness. A disability-insured worker under age 65 is entitled to a disability benefit after a waiting period of 5 consecutive months; benefits terminate with the payment for the month prior to the month of death or attainment of age 65, whichever happens first. A worker receiving disability becomes entitled to an old-age benefit when he reaches age 65.

As noted, secondary benefits-that is, benefits payable to dependents and survivors of the wage earner-have expanded drastically since the social security system was established: Dependent aged husbands of insured workers were added in 1950; widows, aged 62 in 1956; children aged 18 to 21 who are full-time students, in 1965; undergraduate students up to the end of the quarter or semester of their 22d birthday, in 1972; and dependent grandchildren in 1972. In 1965, the hospital insurance (HI) benefits program (medicare, part A) was started, financed by a portion of the payroll tax. In addition, benefit levels have been repeatedly raised and adjusted for inflation.

Contrary to widespread popular opinion, OASI benefits are not paid to illegal aliens. In fact, it is far more likely that such illegal workers are paying social security taxes, but never collecting benefits, and that they are obtaining false social security cards to work rather than to collect benefits. Further, supplemental security income (SSI) which is totally funded through general revenues-although administered by the Social Security Administration-is paid only to eligible U.S. citizens or eligible aliens legally admitted for permanent residence.

With regard to prisoners' benefits, Public Law 96-473 passed last year suspends the payment of DI benefits to any individual who is in prison due to conviction of a felony unless he or she is actively and satisfactorily participating in a court-approved rehabilitation program. Legislation has been introduced in this Congress to suspend all social security benefits paid to prisoners

The mechanism by which the social security system is financed is often misunderstood. Since its beginning, social security has essentially been operated on a current-cost financing basis; that is, current taxes are used to pay current benefits and administrative expenses, and to maintain the reserve levels of the trust funds. A few, relatively minor programs are funded by general revenues. Because the current-cost financing mechanism is designed to produce tax collections that are approximately equal to the beneand administrative expenses during a given period-plus a small amount to maintain the trust funds at an appropriate contingency level-the trust funds generally serve as reserve accounts only, to be used to pay benefits for a short period of time should current payroll taxes not be sufficient to cover all of the costs of current benefits

Since an individual's contributions to the system are not retained by the trust funds, but are passed along to pay benefits to current retirees, the social security program is sometimes said to be a "treaty among generations" whereby current workers pay OASDI taxes which are used to fund benefits for an older generation of retirees. When the younger generation reaches retirement age, its social security benefits will be paid only if the following generation of workers agrees to support the system with its taxes. Viewed in this light, the system can also be termed an intergenerational income-transfer mechanism, by which part of the earnings of current workers is transferred to current retirees.

The current-cost financing system was more than adequate in 1935 when there were 11 workers for every person 65 or older. Today, however, there are only three workers for every retiree, and by the year 2020, the ratio is expected to be 2 to 1. Further, when social security was enacted, the life expectancy of the average American was 61 years. Today it is 73.2 years; those males who reach the age of 65 today can expect to live an additional 14 years, females an additional 18.4 years.

Initially, social security was financed by a matching 1-percent employer-employee tax on maximum earnings of \$3,000. The tax rate was first increased in 1950, to 1.5 percent on \$3,600, and has since been raised on several occasions—including the 1977 enactment of the largest peacetime tax increase in our history. Today the social security or FICA tax is 6.65 percent on maximum wages of \$29,700, for a maximum annual tax contribution of \$1,975.05. Yet, because of inflation, unemployment, the demographic changes mentioned above, rising health care costs, and extended benefit coverage, current social security taxes cannot assure the future solvency of the system.

Each year the trustees of the OASDI and HI funds-the Secretaries of the Treasury, Labor, and Health and Human Services, and the Commissioner of Social Security-issue a report to Congress and the public on the financial condition of the trust funds. This annual report outlines trust funds expenditures for the previous year, and provides long-range, actuarial predictions of trust fund financing and retiree benefit needs based on several different scenarios. While actuarial assumptions can be highly accurate, they are nevertheless dependent on variables such as employment rates-high unemployment decreases contributions-inflationhigh cost-of-living adjustments increase expenditures-and the kind of demographic changes discussed earli-

At this point, I would like to quote from the Trustees' 1981 annual report:

The actuarial cost estimates presented in this report are based upon economic assumptions which are subject to considerable uncertainty. Nevertheless, it is virtually certain that, unless legislation to strengthen the financial status of the OASI Trust Fund is enacted soon, that fund will be exhausted in the latter half of 1982. The DI Trust Fund, on the other hand, is projected to increase rapidly. The enactment of legislation to reallocate tax rates from the DI Trust Fund to the OASI Trust Fund or to permit interfund borrowing between the two funds would not, however, postpone the latter's exhaustion by more than a few months.

The fact of the matter is that, based on current projections, the OASI fund will be bankrupt by fall 1982 unless major changes are soon made. Simply stated, the increase in benefits paid is now significantly greater than revenues received. The problem is not new—the large 1977 social security tax increase was an effort to insure solvency at that time-nor is it by any means insoluable. In this regard, much of the political rhetoric that has surrounded the social security question thus far has been quite misleading. In drawing attention to the precarious nature of social security financing, the administration and others are not attempting to frighten or threaten recipients, and are not contemplating a reduction in benefits for current retirees, but rather are attempting to openly explain the problems that now exist. In so doing, reasonable and effective solutions can be openly debated and hopefully implemented before insolvency becomes a real threat.

From the outset, the administration has expressed its willingness to compromise on its preliminary proposals, which have not yet been introduced in the form of legislation. As announced by Secretary Schweiker in May, the administration proposes to reduce the pensions of workers who retire before age 65, reduce somewhat payments to those who retire at the age of 65 or older-again, no current recipients would be affected-relate disability insurance more closely to a worker's earnings history and medical condition, and eliminate the social security minimum benefit. The administration also proposes to abolish the outside earnings limitation on recipients between the ages of 65 and 72, and to gradually reduce the social security payroll tax.

With respect to early retirement, those who elect to retire at age 62 receive, under current law, 80 percent of the benefits they would be entitled to at age 65. The President proposes to discourage early retirement by offering only 55 percent of the maximum entitlement for those who retire at age 62, but under the President's plan, this amount would gradually escalate over an 18-month period until, at age 63½, retirees would receive exactly what they would have under existing law: 80 percent of full benefits.

Although I do not necessarily agree with all of the changes proposed by the administration, these proposals have the advantage of restoring both the short- and long-term solvency of the system without raising the retirement age, without taxing benefits, without changing the cost-of-living adjustment formula, and except for a one-time delay in the COLA of 3 months, not affecting current retirees.

The elimination of the minimum benefit is another proposal which has generated tremendous constituent concern, and one which I would like to discuss briefly.

The original Social Security Act of 1935 provided for a minimum social security benefit of \$10 a month in the interest of administrative efficiency and to avoid the public relations problems that would arise if very small monthly benefits were paid. The minimum benefit amount has been continuously raised over the year, and in 1972 a special benefit computation formula was provided by Congress for certain long-term, low-paid workers so that no one would get less than the minimum payment—currently \$122 per month-regardless of the amount earned through contributions. The share of minimum payments which exceeds earned benefits constitutes a pure welfare payment; one which the trust funds can no longer afford.

Careful analysis of the 3 million minimum payment recipients indicates that virtually none would suffer significant hardship as a result of this change. The General Accounting Office estimates that 1.2 million would continue to receive the same size payment because they earn the benefit based on their contributions or because they are classed as "minimum" through an accounting technicality; 200,000 are college students and minor children of double-dippers; up to 800,000 have comfortable total incomes which exceed an average of \$20,000 a year. Only about 300,000 would be seriously affected by elimination of the minimum benefit, and even they would be protected by a Federal safety net of supplemental security income, food stamps, and medicaid

which, added together, provide the equivalent of \$6,980 for individuals and \$10,600 per couple. Another 500,000 could make up the loss, dollar

for dollar, through SSI.

Other comprehensive legislation to restructure social security financing and benefits-most notably H.R. 3207 introduced by Representative JAKE PICKLE-is currently pending in the Ways and Means Subcommittee on Social Security. Several of the provisions of H.R. 3207 have already been included in the Omnibus Reconciliation Act of 1981, including the phaseout of postsecondary student benefits, termination of mothers' and fathers benefits when a child attains age 16. elimination of the minimum benefit-PICKLE's bill would have eliminated it prospectively, but the Reconciliation Act applied the termination to both current and future minimum beneficiaries-rounding of benefits, a cap on disability benefits, and elimination of funding-with certain exceptions for vocational rehabilitation services.

In closing, Mr. Speaker, the social security system has been one of this country's most successful social programs. I share the President's desire to restrain the growth of the nonretirement portions of social security, and to redirect the program to its original purpose. Further, I am committed to doing all I can to see that those who have contributed for many years to the social security system continue to receive their rightful benefits upon retirement.

A SALUTE TO FRANK L. "DOC" KELKER

HON. LOUIS STOKES

ог онго

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. STOKES. Mr. Speaker, thank you for providing me with this opportunity to bring the man who, in every sense of the phrase, has been the doctor of the spirit of the city of Cleveland and many of its residents to the attention of my colleagues—Mr. Frank L. "Doc" Kelker. Probably more than any other Clevelander in recent memory, Frank "Doc" Kelker has helped to cure the societal ills of the city and pave the way for achievements by both the city and its residents.

As Doc Kelker, as we affectionately call him, enters retirement, I would like to pay tribute to him on behalf of the residents of the 21st Congressional District.

Mr. Speaker, I can attest to the outstanding virtues of Doc Kelker through the long association that I have had with him. My brother, Carl, and I were two of the Clevelanders of whom I spoke who were taken under the protective wing of Doc Kelker. He showed us that mediocrity was intolerable. He instilled in us the philosophy that bridging the gap between rich and poor, white and black and between the haves and the have-nots should be our primary goal. We aspired to these philosophies because of the shining example Doc Kelker set for us to follow.

Mr. Speaker, like many other Clevelanders, I remember when Doc Kelker came to the old Central High School in Cleveland as the physical education teacher. It was at that time that he took an interest in me and my brother.

The guidance and fatherly image he portrayed continued as I participated in youth clubs directed by him at the central YMCA in Cleveland. Throughout our association, he armed me with both the physical strength and moral conviction which has helped me to achieve and face seemingly insurmountable odds. I know that he did similar things for others. That is why the respect and love for Doc Kelker is shared by so many people in the city of Cleveland.

Mr. Speaker, you would think that a man like Doc Kelker who had dedicated himself to improving the lives of so many young people and the vitality of the city would have little time for career achievements in his own right. This is not the case with Doc Kelker. A well-known high school and college athlete, Doc Kelker went on to become chairman of the Cuyahoga Community College Board of Trustees, a great civic and civil rights leader, and confidant to many of the public officials in the city of Cleveland.

In his career, Doc Kelker fought racism and forged new paths where others dared not tread. He almost singlehandedly has taken this drive, determination, and power and instilled it in prominent city officials so that Cleveland today is a much better place for all residents to live regardless of their race or economic class.

EXTENSIONS OF REMARKS

Mr. Speaker, Doc Kelker is a man of great integrity. He is a man of great vision. He is loved and respected by

people throughout the city.

Most importantly, Doc Kelker is one of Cleveland's shining stars. He placed a glimmer of hope in the lives of many of the less fortunate in the city while letting them know that success in any endeavor was within their reach. For these unmatchable gifts and for being an exceptional human being, I thank him and send him my best wishes as he enters retirement.

At this time, Mr. Speaker, I would like my colleagues to join me in wishing Doc Kelker the very best as he starts his new life. I enter in the RECORD an article which appeared in the Cleveland Plain Dealer on Doc

Kelker:

[From the Cleveland Plain Dealer, May 24, 19811

DOC KELKER HELPED MOLD, HOLD CLEVELAND TOGETHER

(By Dan Coughlin)

People remember Frank L. (Doc) Kelker as a great athlete, probably the greatest who ever played for Western Reserve University in its heyday as a regional sports power in the 1930s. This is unfortunate, because that is but a speck on the sundial of his life.

The impact Kelker made on Cleveland in the 43 years since he was graduated is the stuff of legend. He was part of this city's backbone. He helped mold it. He helped

"Everything I ever was, did or will be was Cleveland," he said May 12, the final day his address was 13935 Southington Rd., Shaker Heights.

Kelker, 65, and his wife, Audrey, left the next day for their retirement residence, an

apartment in Los Angeles.

'My wife has a sister and two brothers there. She's been bugging me-no, she asked me to consider it-for a long time," Kelker explained. "Oh, yes, I'll miss Cleveland. But you remember when the Browns played Oakland last January? We were in Los Angeles and watched it on television. It was 85 degrees. The next day it was 90."

Kelker had more going-away parties than anybody in recent memory, 15, he estimat-ed. Every civic group he belonged to honored him with a luncheon: Cuyahoga Community College, Juvenile Court, the Citizens League, Rotary Club, Marymount Hospital, Dyke College, Case Western Reserve University, and the Great Lakes Region of the YMCA. Mostly it was the YMCA, where he

spent the last 41 years.

Kelker did not become rich, although he was graduated from Western Reserve in 1938 with honors and with nine athletic letters, three each in football, basketball and track. Upon graduation, he was offered coveted jobs in Cleveland industry. He eschewed them to work with youngsters

For two years he taught and coached at old Central High. In 1940 he joined the Cedar YMCA, where he remained until 1950, when he moved to Kansas City as executive director of a YMCA there. In 1956, he returned to Cleveland and became executive director of the Cedar YMCA.

All the time, the legend of Kelker as a civic leader grew. He became chairman of the board of Cuyahoga Community College, which he served nine years. Last year, he served as foreman of the Cuyahoga County grand jury. Afterward, he advocated abolition of the grand jury system, calling it redundant.

Ironically, the man who gave so much was rewarded with abuse late in his term as chairman of the CCC trustees. In 1969, during the peak of racial unrest, black students labeled him an Uncle Tom and called him a pig and racist.

There were times during that turbulent period when that became almost a full-time job," Kelker reflected. "One time we had meetings for 15 consecutive days.

Kelker's philosophy never changed. He turned the other cheek and plunged even more enthusiastically into his job.

"All these things I became involved in were therapeutic," he explained. "If they asked me to join something, I wouldn't unless I knew something about it and felt I could make a contribution. So few people are willing to take on responsibilities beyond their jobs. So many people helped me. I wanted to do my fair share to make life better for everybody."

Like those who taunted him in the '60s, Kelker experienced racial ostracism

He came out of Dover High School in 1934, after leading the Tornadoes to undefeated football seasons and to the state basketball championship. Paul Brown, who coached Massillon at the time, dropped Dover from his football schedule after Kelker's team beat Massillon two years in a

Kelker recalls that there were about 1,000 blacks in Dover's population of about 10,000 in those days. As a youngster he was oblivious to racism. It didn't touch him until he made a trip to Springfield with the Dover High basketball team.

"We went into a hamburger stand, just a little hamburger stand, and they wouldn't serve me. We thought those people were crazy. So we all left," Kelker recalled.
"You'll see a lot of that," his father ad-

vised him.

When Dover played for the state basketball championship in Columbus, Kelker found that as the only black on the team, the only place he could get a meal in the state capital was the diner at the railroad

He was headed to Ohio State University. where the coaches said he would break the Big Ten color barrier, but Western Reserve coach Sam Willaman persuaded Kelker's father to send the young man to Cleveland.

"My father said I was going to Western Reserve, and I said, 'Yes, sir,'" Kelker re-

College scholarships for blacks were rare in those days. Kelker was an exception. A scholarship at Western Reserve consisted of free tuition, period. He worked for his room, board and everything else.

He rose at 5 a.m. to sweep floors and wash walls at Flora Stone Mather College, working three hours each morning for 40 cents an hour. After classes and practice for either football, basketball or track, he studied and then sifted ashes at the school power plant.

He was graduated with honors.

He made Little All-American in football. He scored as many as 21 points in basketball. He ran the 100-yard dash in 9.9 seconds and the quarter mile in 49.1 seconds, both school records at the time. His speed was remarkable for a man so big, 6 feet 2 and 195

Kelker set school scoring records in basketball against competition that included such major powers as Stanford, Nebraska, Notre Dame and City College of New York.

Until the Unversity of Dayton and Syracuse defeated Reserve on consecutive Saturdays, Kelker had played in 53 straight victorious football games in high school and col-

On the football field, Kelker was a rangy, sure-handed end who also occasionally carried the ball from the backfield position and on end reverses.

Kelker was a target not only for his own tailback's passes, but for the other teams' mayhem. He always had to be alert on the football field, jumping to his feet after making a tackle. When he was on the ground, he was vulnerable to a kick-not because he was Kelker, the great football player, but because he was Kelker, the black football player.

"People always asked me why I jumped up so quick," he said with a laugh. "I said I was anxious for the next play. It was survival, that's what it was.'

He wasn't always quick enough. He came out of some games with his face swollen and bleeding, his countenance bearing enemy bootmarks. He was knocked out of the Dayton game in the first quarter because of a vicious kick, for which his assailant apologized many months later.

Kelker learned in later years that some schools, Nebraska and Georgetown among them, canceled football games with Western Reserve because of Kelker.

His contemporaries contend he could have starred in the National Football League or in major league baseball, but professional sports were not sufficiently enlightened.

In September, following graduation from Reserve, Kelker played on an Ohio collegiate all-star team in an exhibition game against the Cleveland Rams of the NFL. The Rams won, 9-0, at League Park.

Kelker recalls a Rams' assistant coach saying to him afterward, "We'd like to use you, but you know we can't do that."

The idea of traveling around the country playing in the Negro National League of baseball did not appeal to him. Thereafter his sports interests were in golf. He became an excellent golfer, scoring in the mid-70s. Later he gave golf lessons.

"I'd teach doctors how to play golf," he remembered. "I'd call them Joe or Bob or John. They'd call me Doc."

Many people thought Kelker was a medical doctor because of that nickname. He acquired it as a toddler learning to say "Da

The nickname was pinned on him by his twin brother, Fred, who died of cancer three years ago.

The Doc spent a lifetime trying to cure what ails Cleveland. He has been closer to former Mayors Ralph J. Locher and Carl B. Stokes and Mayor George V. Voinovich. Locher was a football foe at Heidelberg. Stokes and his brother, Rep. Louis Stokes, D-21, came under Kelker's wing at the

"This city is having its problems, but they can be cured. The city is better than it was,' Kelker maintained.

The city is better, of course, because of Doc Kelker.

THE SMALL BUSINESS INNOVATION RESEARCH ACT

HON. BERKLEY BEDELL

OF IOWA

IN THE HOUSE OF REPRESENTATIVES Tuesday, August 4, 1981

• Mr. BEDELL. Mr. Speaker, today I am introducing a bill, the Small Business Innovation Research Act, together with the Honorable Joe McDade, the Honorable JERRY LEWIS, and 42 cosponsors. This bill seeks to amend the Small Business Act to strengthen the role of small innovative firms in federally funded research and development programs.

I believe this bill will also serve to strengthen our Nation's economy. We are in grave danger of losing our technological superiority and this dearly affects our desire to maintain our national security, achieve energy independence, increase our industrial productivity and expand the quality of

our lives.

The bill we are introducing today is similar to one introduced in the Senate by Senator RUDMAN. The Senate bill has attracted 82 cosponsors. The bill simply requires that large Federal agencies with research and development budgets over \$100 million establish a small business innovative research (SBIR) program to enable small firms to develop new products and processes that fall within areas of national need as designated

by the agency.

The small business innovative research programs the agencies will organize under this legislation will be modeled after the National Science Foundation's successful small business program. That program provides for a three-phase developmental cycle for small business research and development proposals. In the first phase, selected proposals are funded to determine technical feasibility. Phase II funding would be given to those projects that are deemed technically feasible and are suited for the marketplace. Phase III requires that the private sector pay for the commercial development of the research.

This legislation also requires that Federal agencies with research budgets in excess of \$20 million annually evaluate their activities with small business contractors and set goals that would increase the role of small businesses in their research and development contracting activities every year.

Mr. Speaker, this bill is needed because the role of innovative small businesses has continuously been neglected by Federal agencies. The statistics are astounding. In addition to being the economy's leader in job creation and employment growth, small businesses have provided this Nation with over half of our major innovations since World War II. According to the

National Science Foundation, small businesses are far more cost effective than larger corporations when engaging in research, producing 24 times more innovations per research and de-

velopment dollar.

How do our Federal agencies respond to those statistics? The answer is disappointing, but the facts are that small businesses' share of Federal research and development funding is between 3 and 4 percent of the total Federal research and development effort. For example, one witness told the Small Business Committee Senate that of the more than \$15 billion of Federal research and development procurred from business, just 70 companies contract for 80 percent of this research, and only 4 companies contract for nearly 20 percent.

find those statistics incredible. Those large companies whose research programs are being financed by the Federal Government have the funds to pay for their own research. Of course, there are some projects of such a huge scale that the prime contract work must be performed by large companies; but is it really necessary for the Federal Government to fund for a new automobile engine program with General Motors, or pay to develop the commercial viability of a catalyst

These companies have plenty of money to fund their own research programs. And are we that naive to believe that a large company, with considerable investment in existing technologies, is going to fully and quickly exploit a new innovation that may make a part of their product line obso-

owned by the Mobil Oil Co.

lete?

Small businesses, on the other hand, do not have the access to internally generated funds to support their research programs. And they do not have the embedded investments in other product lines, manufacturing facilities, and channels of distribution that are threatened by new innovations. It is in the best interest of a small firm to quickly and fully exploit new innovations, through joint ventures, licensing agreements, and internal growth. This self-serving interest on the part of the small entrepreneur in turn serves the best interests of society.

Mr. Speaker, it is important to note that this legislation would require no new Federal spending. In fact, where applicable, I would like to see the Federal Government recoup its investment in successful research and development projects. I would like to encourage Federal agencies to set their own rules in this area. This legislation merely states that each Federal agency that is covered, set aside by 1984 only 2 percent of what it is already spending on research and development for its small business innovative research program.

In light of the tremendous contributions that small business makes to our Nation's economy, it is not unreasonable for Congress to ask that large Federal agencies spend 2 percent of their research budgets to promote small business innovative research.

Mr. Speaker, I ask unanimous consent that the text of the bill be print-

ed in the RECORD.

H.R. 4373

A bill to amend the Small Business Act to strengthen the role of the small, innovative firms in federally funded research and development, and utilize Federal research and development as a base for technological innovation to meet agency needs and to contribute to the growth and strength of the Nation's economy

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. This Act may be cited as the Small Business Innovation Research Act of

Sec. 2. (a) The Congress finds that-

(1) technological innovation creates jobs. increases productivity, competition, and economic growth, and is a valuable counterforce to inflation and the United States balance-of-payments deficit; and

(2) while small business is the principal source of significant innovations in the Nation, the vast majority of federally funded research and development is conducted by large businesses, universities, and Government laboratories.

(b) Therefore, the purposes of this Act

(1) to stimulate technological innovation; (2) to use small businesses to meet Federal

research and development needs; and (3) to increase private sector commercialization of innovations derived from Federal research and development.

SEC. 3. Section 9(b) of the Small Business Act is amended-

(1) by striking out "and" at the end of clause (2):

(2) by striking out the period at the end of clause (3) and inserting in lieu thereof and"; and

(3) by adding at the end thereof the following:

'(4) to develop and maintain a source file and an information program to assure each qualified and interested small business concern the opportunity to participate in Federal agency small business innovation research programs;

"(5) to coordinate with participating agencies a schedule for release of SBIR solicitations, and to prepare a master release schedule so as to maximize small businesses opportunities to respond to solicitations:

"(6) to independently survey and monitor the operation of SBIR programs within par-

ticipating Federal agencies; and

'(7) to report annually to the Committee on Small Business of the Senate and the Committee on Small Business of the House of Representatives on the SBIR programs of the Federal agencies and the Administration's information and monitoring efforts related to the SBIR programs.".

SEC. 4. Section 9 of the Small Business Act is amended by adding at the end thereof the

following new subsections:

"(e) For the purpose of this section-"(1) the term 'Federal agency' means an executive agency as defined in section 105 of title 5, United States Code, or a military department as defined in section 102 of such title:

title;
"(2) the term 'funding agreement' means
any contract, grant, or cooperative agreement entered into between any Federal
agency and any small business for the performance of experimental, developmental,
or research work funded in whole or in part
by the Federal Government;

"(3) the term 'small innovation research program' or 'SBIR' means a program under which a portion of a Federal agency's research or research and development effort is reserved for award to small business concerns through a simplified, standardized acquisition process having a first place for determining, insofar as possible, the technical and economic feasibility of ideas proposed under the program, and a second phase, the awarding of which shall take into consideration the potential commercial applications of the research or research and develop-ment, to further develop the proposed idea to meet the particular agency needs; and a third phase where private capital pursues commercial applications of the research or research and development; phase three may also involve follow-on production contracts

Government; and "(4) the term 'research' or 'research and development' means any activity which is (A) a systematic study directed toward fuller scientific knowledge of the subject studied; (B) a systematic study directed specifically toward applying new scientific knowledge to meet a recognized need; or (C) a systematic application of new scientific knowledge toward production of useful materials, devices, and systems or methods, including design, development, and improvement of prototypes and new processes to meet specific requirements. Such term does not include studies related to the social sci-

with some agencies for products or processes intended for use by the United States

ences or the humanities.

"(f) Each Federal agency which has a research or research and development budget in excess of \$100,000,000 for any fiscal year beginning with fiscal year 1982 shall expend not less than three-tenths of 1 per centum of such budget for fiscal year 1982, not less than 1 per centum for fiscal year 1983, and not less than 2 per centum of such budget for all subsequent fiscal years with small business concerns specifically in connection with a small business innovation research program which meets the requirements of this Act and regulations issued hereunder. Funding agreements with small business concerns for research or research and development which result from competitive or single source selections other than under an SBIR program shall not be counted as meeting any portion of the percentage requirements of this section.

"(g) Each Federal agency required by subsection (f) to establish a small business innovation research program shall in accordance with this Act and regulations issued

hereunder-

"(1) establish an agency small business in-

novation research program;

"(2) determine categories of projects to be in its SBIR program;

"(3) issue SBIR solicitations in accordance with a schedule determined cooperatively with the Small Business Administration;

"(4) receive and evaluate proposals result-

ing from SBIR proposals;

"(5) select awardees for its SBIR funding agreements:

"(6) administer its own SBIR funding agreements (or delegate such administration to another agency);

"(7) make payments to recipients of SBIR funding agreements on the basis of progress toward or completion of the funding agreement requirements; and

"(8) make an annual report on the SBIR program to the Small Business Administra-

tion.

"(h) In addition to the requirements of subsection (f), each Federal agency which has a budget for research or research and development in excess of \$20,000,000 for any fiscal year beginning with fiscal year 1982 shall establish goals specifically for funding agreements for research or research and development to small business concerns, and no goal established under this subsection shall be less in actual percentage than the portion of research or research and development awards made to small businesses in 1981

"(i) Each Federal agency required by this section to have an SBIR program or to establish goals shall report annually to the Small Business Administration the number of awards pursuant to grants, contracts, or cooperative agreements over \$10,000 in amount and the dollar value of all such awards, identifying SBIR awards and comparing the number and amount of such awards with awards to other than small business concerns

business concerns.

"(j)(1) The Administrator of the Office of Federal Procurement Policy, in conjunction with the Small Business Administration, shall promulgate and issue appropriate regulations, in accordance with the provisions of subsections (f), (g), and (h) and within one hundred and twenty days after the date of enactment of the Small Business Innovation Research Act of 1981, for conduct of small business innovation research programs within the Federal Government. Such regulations shall—

"(A) provide for simplified standardized and timely SBIR solicitations, proposals,

and evaluation processes; and

"(B) require Federal agencies to coordinate SBIR solicitation release schedules with the Small Business Administration.

"(2) The National Science Foundation and the Small Business Administration shall furnish the Administrator of the Office of Federal Procurement Policy advice and assistance in the promulgation of regulations under this section.".

SEC. 5. The amendments made by this Act do not authorize the appropriation of

funds.

TRIBUTE TO THE MEMORY OF MASTER BUILDER ROBERT MOSES

HON. JAMES H. SCHEUER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. SCHEUER. Mr. Speaker, I rise to pay tribute to the memory of

to pay tribute to the memory of master builder Robert Moses, who passed away on July 29, 1981, of con-

gestive heart failure.

Mr. Moses was a firm believer in satisfying the needs of the people, especially those of moderate resources. Due to his efforts to connect New York City with its outlying areasthrough the construction of 481 miles of highways and 11 bridges—Moses made New York City the "Nation's

first city for the automobile age." He will also be remembered for his work in building 75 State parks, 658 playgrounds, the New York Coliseum, the Lincoln Center, the Robert Moses Niagara Powerplant, zoos, civic centers, exhibition halls, the 1964-65 New York World's Fair, and Jones Beach—as well as other beaches. Moses also reconditioned Central Park Zoo. Many of these projects were funded by the revenues obtained from previous projects that came under the control of the public authority.

During his 40 years of service, he held positions on the city planning commission and the housing authority. Moses also served as New York City Park Commissioner from 1934-60, the head of the city parks department and Triborough bridge authority, consultant to the Triborough bridge and tunnel authority, and city construction coordinator. He was also instrumental in bringing the United Nations to its present East River location.

The city of New York and the Nation at large are indebted to Robert Moses for his vision, his creative genius, and his lasting contribution to the society in which he lived.

A-PLANT FUNDING STATEMENT

HON. BOB McEWEN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. McEWEN. Mr. Speaker, I want to express my sincere appreciation that both the budget reconciliation bill and the energy and water appropriations bill contain the necessary funding for continuing the scheduled construction of the gas centrifuge uranium plant at Portsmouth. The timely completion of this plant is a key element in reestablishing the United States as a reliable international supplier of enriched uranium. To date, foreign sales of enrichment totaling nearly \$3 billion have added favorably to our balance of trade.

The assured supply of uranium is also an essential element in the development of alternative energy sources in this country. In addition to supplying 100 percent of our domestic needs. all the requirement for defense needs must be met by the gaseous diffusion plants operated by the Department of Energy. DOE currently holds longterm contracts to supply separative work well above the capacity of its diffusion plants. These demands for enrichment can be met most economically by keeping the Portsmouth centrifuge plant on schedule for operation in 1989.

There are other compelling reasons to complete the Portsmouth plant as rapidly as possible. The centrifuge process requires one-twentieth the electric power consumed in the diffusion process. The energy savings would result in tremendous cost savings as well.

In closing, let me point out another serious problem addressed by the enrichment activities. Today there are approximately 10,000 people engaged in the operation, maintenance, and support of the three diffusion plants at Portsmouth, Oak Ridge, and Paducah. In addition, more than 3,000 people at all locations are engaged in the design and construction of the gas centrifuge project. This does not include the subcontractors who supply components, materials and servicesperhaps another 5,000 to 7,000 people gainfully employed by this worthwhile project.

The important economic impact of uranium enrichment on U.S. jobs, balance of trade, and efforts to reduce dependence on foreign oil are quite evident. Therefore, I thank my colleagues for their foresight in approving adequate funding for this project so vital to the interests of the United States.

MY VOTE AGAINST THE REAGAN TAX CUTS

HON. LOUIS STOKES

OF OHIO

IN THE HOUSE OF REPRESENTATIVES
Tuesday, August 4, 1981

 Mr. STOKES. Mr. Speaker, I have received many inquiries relative to my vote on President Reagan's tax cut proposals. I think it is important for me to state for the record my reasons for not supporting the President's proposals.

First, let me assure you that I believe that tax reform is essential to the revitalization of the Nation's economy. I do not believe, however, that the administration's tax reform proposals will provide economic relief or incentives in those areas needed to stimulate our economy. Unfortunately, and I use this term in complete sincerity, the House of Representatives approved the administration's tax proposals by a vote of 238 to 195 on July 29, 1981.

I did not support the administration's proposals because I believe that these proposals are geared toward the rich rather than the low- and middleincome families who really need tax relief. I disagree with the administration's "trickle down" philosophy which has already proven to be inequitable and unworkable in this country back in the early part of this century.

The Washington Post has labeled the tax package "a monstrous grab bag of expensive gimmicks" which "could lead to a nearly uncontrollable loss of revenue in future years." The combination of untargeted individual

tax cuts, distortionary business tax cuts, and special interest provisions will fail to encourage orderly economic growth and will produce massive deficits. At a time when the public is increasingly concerned about the reality of future budget cuts and inflation, the magnitude and bias of these tax cuts can hardly be justified. Public opinion polls have shown that voters do not want large tax cuts that will set off another round of rampant inflation.

The individual tax cuts in the President's proposals would disproportionately benefit upper-income taxpayers who are less vulnerable to inflation and cuts in Government programs. These taxpayers would receive virtually all the benefits from more favorable capital gains treatment, the all-savers certificates, incentive stock options for executives, and estate and gift tax

The business depreciation proposal, 10-5-3, would cost more than \$100 billion between fiscal year 1981 and fiscal year 1990. Although 10-5-3 has been billed as a major stimulus for all industries, it would, in fact, provide uneven benefits and distort investment flows. It would be especially generous to very profitable, capital-intensive industries and in some cases would actually provide tax subsidies for investments in certain kinds of assets when the new, more valuable investment tax credit is taken into account. As a result, businesses will be encouraged to invest in plants and equipment solely because of tax benefits. Similarly, investors will be drawn to invest in some industries for their tax shelter potential, not for their prospects for long-run economic growth.

The tax proposal which I supported, the Udall-Obey-Reuss substitute, was the only fiscally responsible and realistic proposal. This substitute would have provided significant tax reductions while balancing the budget. It would have resulted in a \$2 billion surplus in fiscal year 1982 and more than \$20 billion surplus in fiscal year 1983. The substitute permitted a balanced budget which would not have required the Government to enter the money market and compete with businesses and private borrowers to raise the money to pay for the tax cut. In addition, the substitute contained no costly special interest giveaways to the oil industry, savings and loans, and the very wealthy.

For individuals, the Udall-Obey-Reuss substitute would have provided the lions share of tax relief to those families with incomes of \$30,000 and below—the majority of the American public. The Udall-Obey-Reuss approach would have allocated 50 percent of the tax cut for these families as compared with only 36 percent under the administration's bill. In

stark contrast, the administration's bill provides a whopping 35 percent of the tax relief to the most wealthy families in America—those with incomes above \$100,000. These prosperous families would have received a more moderate 18 percent of the tax cut under the Udall-Obey-Reuss substitute.

For businesses, the substitute would have provided \$9.5 billion in tax incentives for modernization and increased productivity in fiscal year 1982. It would have helped small businesses by lowering their corporate tax rates and widening the tax brackets, but would not have provided bailouts to failing industries or unnecessary cuts in the maximum tax rates for large corporations.

Mr. Speaker, this is why I did not support the President's tax cut proposals. As in the past I will continue to oppose those Reagan policies which I deem to be inimicable to the best interests of the American people.

ENDORSEMENT OF SOLIDARITY DAY

HON. GUS SAVAGE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. SAVAGE. Mr. Speaker, on July 8, I sent a letter to Lane Kirkland, President of the AFL-CIO, informing him that I was circulating a "Dear Colleague" among the Members of the House of Representatives, asking for their endorsement of Solidarity Day.

I think the American people should be aware of the Representatives who are actively opposed to the Reagan administration's "feed the rich and starve the poor" economic program.

Listed below are the names of those who have endorsed Solidarity Day. I would like to take this opportunity to commend them and thank them for their support.

MEMBERS OF CONGRESS—SOLIDARITY DAY ENDORSEMENT

Joseph Addabbo of New York. Mike Barnes of Maryland. Jonathan Bingham of New York David Bonior of Michigan. William Brodhead of Michigan. John Burton of California. Phil Burton of California. Bill Clay of Missouri. Cardiss Collins of Illinois. John Conyers of Michigan. George Danielson of California. Ron Dellums of California. Bob Edgar of Pennsylvania. Dante Fascell of Florida. Geraldine Ferraro of New York. Thomas Foglietta of Pennsylvania. Harold Ford of Tennessee Augustus Hawkins of California. John LaFalce of New York. Mike Lowery of Washington. Frederick Richmond of New York.

A THANK YOU FROM A GRATEFUL NATION

HON. ED WEBER

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

· Mr. WEBER of Ohio. Mr. Speaker, August 30, 1981, will mark the end of a 33-year career of a medical officer in the U.S. Army who dedicated himself unselfishly to the service of our country. His efforts have gone beyond the realm of just duty. It has touched the lives indirectly of everyone in every State, Puerto Rico, the Virgin Islands, Guam, and the District of Columbia. I am referring to Col. John Raymond Daniels, U.S. Army, affectionately known as Jack Daniels. He is a fellow Ohioan. He is from Columbus, Ohio. He typifies the all-American from the Midwest and never hesitates to make the fact known that his hometown is Columbus, Ohio. Yes, you can take the boy out of the country, but you cannot take the country out of the boy-that is Jack.

Columbus, Ohio was the center of his formal education—North High School, Ohio State University, and his medical degree from the Ohio State University College of Medicine in 1950. His medical internship was served at William Beaumont Army Hospital in Texas and he came to Washington, D.C. in 1952 to attend the Army Medical Graduate School at Walter Reed

Medical Center.

I will quickly touch on some highlights of his career before I concentrate on his final assignment here in Washington. In August 1952, he was assigned as the Army Surgeon of MAAG—Formosa where he worked closely with the Chinese Nationalist Army. Using an interpreter was timeconsuming, so he learned to speak Mandarin. In July 1954, Captain Daniels was sent to airborne school at Fort Bragg, N.C., where he earned his parachute wings. He subsequently attended the jump master school there and made 54 jumps from the heavens. He was assigned as Regimental Surgeon of the 82d Airborne Division, and sent to Germany as Clearing Company Commander and later, Medical Battalion Commander of the 11th Airborne Division. He learned to speak German there.

November 1957 and the following year found Major Daniels in general surgery at the U.S. Army Hospital at

Fort Bragg. That tour was followed by service in urology at Tripler Army Hospital in Hawaii. It was during that tour that he met and married Lorna Leong Douglas. His Hawaiian assignment moved him to the famous Schofield Barracks. However, all good things must come to an end. At the end of 2 years, in February 1962, he was transferred to Fort Hood, Tex.

In Texas, Lieutenant Colonel Daniels was the Division Surgeon of the First Armored Division. Shortly thereafter, he was transferred to Fort Lawton, Wash., and then for 1 year from July 1964, was the Corps Surfrom July 1964, was the Corps Surfrom July 1964.

geon of I Corps in Korea.

It was in September 1965 that he was first assigned to the National Guard Bureau at the Pentagon as the Army Surgeon, an assignment which he thought would be his longest tour-5 years. There he began the task of pulling all the loose ends togetherthere it was that he realized he needed all his experience and knowledge of hospital and field medical training. His ability and his personality were assets and a great deal of diplomacy was required since he dealt with all the adjutant generals and the State physicians of the Army National Guard. He slowly became aware of the needs and most of all basic requirements to function more effectively in their respective missions.

At the end of 5 years, Col. Jack Daniels was sent to Alaska as the Chief Surgeon of the Army Medical Alaskan Command. Again, there he established new guidelines and implemented the regulations which were required for the then expanding command. He was even able to establish a rapport with the State medical officers and the Natives in the bush, making it possible for the villagers in the back country to receive basic medical assistance while using unique ideas and giving the Army physicians the practice they wanted. You can't say that Jack doesn't make the most of an assign-

Following the rigors and hardship of Alaska for 2 years, Jack and his family were packed off for another 2-year assignment at Schofield Barracks in Hawaii again.

And then, in April 1974, Col. John Daniels was reassigned back to the Pentagon—a tour to last 7 years! He was asked to return to his old job as Army Surgeon of the Army National Guard Bureau—but the responsibilities were greater in view of the emphasis being focused on the growing National Guard of our country and the growing decline of the Volunteer Army.

It is on this tour that I would be remiss if I did not especially recognize his efforts which went beyond the scope that was required. He established and implemented ideas which stirred the very spirit and drive of his

colleagues and fellow physicians throughout the Nation. He guided the medical officers of the Army National Guard in programs which helped them in their own areas of responsibility. Those programs and ideas were successful and are ensconced as procedures today.

Jack Daniels is responsible for the medical readiness of 390,000 individual Army National Guardsmen and the organizational readiness of more than 200 Army Guard medical units comprised of 20,000 individuals. He substantially upgraded the medical situation within the Army National Guard throughout the country by creating a centrally planned, regionally coordinated, and State-operated medical service. He successfully established an Army National Guard physicians assistant program coordinating with the U.S. Air Force which enabled the Army Guard to utilize their facilities to train personnel in a physicians assistant program when such capabilities were not available within the Army. He was also able to establish a civilian education program for licensed practical nurses using the facilities of the civilian community to train these personnel for Army National Guard duty. He established three Army National Guard medical brigades in the three Army areas, one of which is in Ohio.

In face of the acute shortage of physicians in the military and in order to procure and retain qualified physicians in the Army National Guard, Jack established a program which enabled physicians in the National Guard to participate in a continuing medical education (CME) program at Federal expense.

Jack, no doubt, has gained much satisfaction from his career in realizing the fruits of his efforts to build and maintain a physically fit and healthy Army National Guard. His colleagues and multitude of friends are sad to see him leave for other challenges.

The Army National Guard found recognition as a result of Jack's efforts to become active in the Association of Military Surgeons of the United States where he served as Chairman of the Army National Guard Section. The section is now well-established and the Army National Guard has found its place in this prestigious medical association. It can now share in decisions with other military services of our country.

Colonel Daniels has been recognized by individual States and other governments he has worked with. Among the awards he was decorated with by the Army, he wears the Legion of Merit with Oak Leaf Cluster, Meritorious Service Medal with Oak Leaf Cluster, the Army Commendation Medal, the Good Conduct Medal, American Campaign Medal, and the World War II Victory Medal.

He still finds the time to belong to civic organizations. He is a member of the American Medical Association, Association of American Physicians and Surgeons, Association of Military Surgeons of the United States, a Member of the Pan-Pacific Surgical Association, and an active member of the Arlington Rotary Club.

Jack found the time to be a father to his son, Capt. William Douglas, who is stationed in Fairbanks, Alaska, Glen Douglas of Spokane Washington, Tom who is a senior at Dartmouth, and his daughters, Lori attending Mary Washington College and Lisa attending James Madison University, both of

Virginia.

Mr. Speaker, on behalf of the citizens of Ohio and the rest of the Nation, I would like to express our heartfelt thanks to Col. John Raymond Daniels, a friend whom I am proud of, for a job well done. I wish him good health and success in all his future endeavors.

VISTA PROGRAM

HON. TED WEISS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. WEISS. Mr. Speaker, I am extremely disturbed by the recent charges issued against the VISTA program by the new Director of ACTION, Thomas Pauken. His attack is unwarranted and illustrates the Director's inexcusable disregard for the goals of the program. Clearly, the dubious action of the administration's appointee reflects the President's interest in eliminating this valuable program.

Mr. Pauken recently distributed a "hit list" of 32 VISTA projects which had allegedly taken "partisan political positions" which they are prohibited from doing. The evidence makes clear, however, that these accusations are nothing more than an attempt to undermine many worthwhile VISTA

projects.

The factual errors and distortions in Mr. Pauken's list betray the haphazard methodology used to prepare it. At the time the list was compiled, 6 of the 32 criticized projects no longer had VISTA volunteers on staff. Projects were singled out for no discernible reason and without indepth documentation of their purported wrongdoing. Each of the questionable projects has been previously approved by the ACTION State and regional offices as well as by the Governor of each State involved. Many targeted projects, such as the Massachusetts Association of Older Americans, which has succeeded in securing the construction of housing projects and an eye clinic for the elderly, have been applauded for their contribution by public officials in the communities they serve.

The VISTA program embodies many of the values that we as Americans

of the values that we as Americans have espoused throughout our history. Over the 17 years it has existed, it has proven that our noble tradition of volunteerism can effectively help people

to help themselves.

Since 1964, VISTA has focused its attention on the most challenging and serious of our Nation's concerns: Poverty, equality and social justice; 70,000 men and women of all ages and ethnic groups have served as VISTA's in thousands of communities across the country. They have successfully demonstrated innovative approaches to assisting the less privileged and fostering feelings of hope in their communities.

Last year, 4,000 VISTA's served more than 4 million low-income people. A recent survey found that each VISTA volunteer mobilized an average of \$25,000 in resources at the local level and recruited an average of 15 community volunteers to work on the project. Remarkably, 75 percent of the projects were continued and supported by the community after the VISTA assistance was phased out.

There are many examples of the fine work that VISTA has performed to date. In 1 year, 4 VISTA's, working with a citizens' organization in Chicago, generated jobs for 1,200 unemployed people. Two tenement buildings were rehabilitated and converted into cooperative apartments for low-income residents in the South Bronx through the work of VISTA's and the neighborhood association. VISTA volunteers started the first battered women's shelter in Anchorage, Alaska. I've offered only a few examples, but the list goes on and on.

At a time when we are examining the cost effectiveness of every program that aids the poor, it should be clear that VISTA is worth the relatively small sum we spend on it. VISTA's budget for 1981 was \$34 million. The president plans to slash its budget by \$15 million next year and phase out the program entirely by 1983. VISTA's budget constitutes less than one tenthousandth of the Federal budget. For that minimal investment, the rewards have been substantial.

VISTA continues to generate needed jobs, resources, and services for poor communities as well as to create a sense of self-respect and dignity for those it serves. I urge my colleagues to express their support for this program and condemn the unjust attack of its new Director on its goals.

TIME TO GET WITH IT

HON. CARROLL HUBBARD, JR.

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. HUBBARD. Mr. Speaker, Lawrence Hinton of Lomstead, Ky., recently sent me a clipping from the Kentucky New Era, published in Hopkinsville, Ky., which reflected the thinking of many of my constituents when he said it is time for Congress to embrace President Reagan's solutions to this Nation's economic and defense problems. I feel the editorial should be shared with my colleagues and I wish to do so at this time. The editorial follows:

Reagan Is Trying To Do What He Promised To Do

The basic issues seemed very clear as the presidential campaign progressed last year. In November, the voters made their choice and overwhelmingly voted for Ronald Reagan.

We don't believe most of those Reagan votes were cast for the man Ronald Reagan, but rather for the solutions he proposed to the country's economic and defense problems.

After all, Reagan was no American hero. Although he was a former movie actor, he never attained great stardom in that field, If there is a personal quality about the man that attracted masses of voters, it is his ability to communicate well in speech.

But there were legitimate doubts about candidate Reagan when the campaign began, some of which persisted right up to the election. There was his lack of experience in national affairs, and certainly the matter of his advanced age. He turned 70 shortly after taking office. In short, many wondered whether he could handle the job.

There seems little doubt that Reagan's ultimate appeal to the voters grew out of his message. He struck a responsive chord with Americans who had lost patience with inflation, burdensome taxes, government interference in their daily lives, and lost national respect around the world.

The people bought Reagan's proposals for turning the country around and pointing it in a new direction.

He promised to reduce federal spending and the taxes that fueled it. He vowed to attack waste, fraud and mismanagement in government agencies.

He pledged to get the federal government, where possible, out of people's lives and off the back of the country's free enterprise system. And he promised to rebuild the nation's defenses to counter the massive military buildup of the Soviet Union.

Even President Reagan's severest critics must admit that he did not hoodwink the American voters. His plans for the country were made crystal clear.

The voters had a clear choice of whether to continue down the path the country had been following in recent years or opt for real change.

They chose the latter, thus giving Reagan a mandate to initiate the programs he described so vividly throughout his campaign.

So far, at least, he has followed through on his campaign pledges, even while dragging the Democratic congressional leadership kicking and screaming every step of the way. Such now is the case with the president's across-the-board income tax cuts.

The issue is being clouded with charges that the president's plan is inflationary and favors the rich over the poor.

Reagan is trying to do what he promised to do. That's what the voters wanted. It's time for Congress to get on with it.

IL PROGRESSO-100 YEARS OF QUALITY AND EXCELLENCE IN JOURNALISM TO BE COM-MEMORATED IN NEW YORK

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

. Mr. BIAGGI. Mr. Speaker, on December 13, 1980, a major milestone in journalism occurred as II Progresso, the leading Italian language newspaper, observed its 100th birthday, On September 9, 1981, a special 100-page issue will commemorate the 100th anniversary of the founding of this newspaper. I am honored to bring this information to the attention of my House colleagues, and wish to pay tribute to Il Progresso for this marvelous achievement.

In 1880. Il Progresso was founded by Carlo Barsotti to serve the needs of the burgeoning Italian immigrant population in the United States. The first issue was published on December 13 of that year. Il Progresso continued to operate under its original owners until 1928, when the paper was sold.

New ownership and life came to Il Progresso in the summer of 1928, when it was purchased by Generoso Pope, the famous industrialist and philanthropist. Under Mr. Pope's direction, this journal became the leading Italian language newspaper in the United States. It is published daily and on Sundays. To Italian immigrants, Il Progresso became a dear friend, aiding them in assimilating into the United States while allowing them to remain in touch with their homeland.

Throughout its 100 years, Progresso has had a profound impact on politics, business, government, education, and the professions. When Generoso Pope assumed ownership of Il Progresso in 1928, Italians and Americans of Italian origin held no high positions in the aforementioned fields of endeavor. By demonstrating the kind of journalistic persistence that has characterized Il Progresso, he labor let politicians, businessmen, people, educators, and professionals know that there were highly qualified, intelligent, hard-working, dedicated men and women of Italian origin available and ready to accept important and responsible positions. Fortunately, the tide began turning; today we can point to great progress, measured by the increased number of Italian Americans in the upper echelons of these fields.

Il Progresso has always used the columns of its newspaper to reinforce the bond of friendship between Italy and United States. It has consistently been in the forefront of all campaigns to help Italy whenever the country was

struck by a disaster. One personal example I can recall occurred following the tragic earthquake which devastated the Friuli region of Italy. Working closely with Il Progresso, we were able to pass emergency legislation providing some \$25 million in relief aid to Italy. Il Progresso leadership also aided in raising millions from other sources to help the affected area. Il Progresso has never let the Italian people down in their hours of need.

Another area in which Il Progresso has been in the lead is the battle to end discrimination against Italians. I worked with Il Progresso throughout my life in public service, in a partnership to eliminate those false stereotypes and stigmas about Italian Americans which have been allowed to exist for too long in our society. This is a battle in which progress, though it is being made, never seems to be swift enough. Yet we would not have made what progress we already have, had it not been for the work of Il Progresso and the Pope family.

In April of 1950, Generoso Pope passed away and his son Fortune Pope became publisher and editor. I am proud to say that Fortune is one of my closest friends, and that under his leadership, many important technical and editorial changes have been made to improve the quality of the newspaper. Through his talent and hard work, Fortune Pope has earned both national and international acclaim and respect. Like his father, he continued to defend and fight for the rights of Italians and Americans of Italian

origin.

The profession of journalism is a highly competitive one in these United Through some 1,700 daily newspapers and 8,000 weekly newspapers, the multiplicity of journalistic voices in the United States by far surpasses that of the rest of the world. Consequently, in order for a newspaper to continually publish for 100 years, it must maintain both a standard of excellence and a fluidity to reflect the changing times. Il Progresso has done this and much more in its

Journalism has always been a profession in which experience is the best teacher. The breadth of experience associated with Il Progresso is remarkable. As it observes its 100th anniversary. Il Progresso looks back with pride on what it has accomplished, and forward—to another 100 years of service. know my colleagues in the House join me in congratulating Il Progresso on its 100th anniversary.

During this anniversary period. there is a new and special excitement at Il Progresso. The first and oldest Italian-language daily published in the United States has started on a new course, under the direction of its new publishers, Piero Pirri Ardizzone, Oscar Maestro and Carlo Caracciolo,

who have acquired the newspaper in order to relaunch it, revamp it, and redesign it. They could not have seized upon a more favorable time and opportunity. For, in the United States of the eighties, the nearly 30 million Italian-Americans are surely going to exert a growing, powerful influence on the decisionmaking process of this country. With their combination of knowledge, culture, dedication, willpower, affluence, and well-placed ambition, they already represent a power-collectively and individuallyrecognized by the entire country.

I look forward to Il Progresso's continuing inspiration toward the advancement of the Italian-American community within this country in the decades ahead-for another 100 years of solid development and achievements. I delight in the expectation of new improvements at Il Progresso to carry their message. Il Progresso has opened its pages to an unconditionally free debate among all segments of the Italian-American community. newspaper is about to become a real bridge between the public opinions of this country and Italy. Most exciting of all, the format of the newspaper is being redesigned and the publication will become bilingual. This is certainly a sign of the times, and a turning point in the century-old life of the

My very best wishes to the new leadership at Il Progresso, Piero Pirri Ardizzone, Oscar Maestro, Carlo Caracciolo, and general manager and managing director, Carlo Scarsini, for their success in all their good and talented efforts. With the aid of all Italian-Americans of good will, I am certain that they will succeed. Clearly challenges lie ahead-as they did in the previous century. However, I am certain that like the Pope family, the new leadership of Il Progresso will meet these challenges with the same standards of excellence which have highlighted the history of this great newspaper. I wish them and Il Progresso another century of success and accomplishment. It has been and will continue to be a mainstay of the all important Italian American community in this Nation.

THE SOVIET DAY OF SHAME

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES Tuesday, August 4, 1981

• Mr. DERWINSKI. Mr. Speaker, I would like to direct the attention of the Members to the upcoming 13th anniversary of the Soviet Day of Shame, which occurred on August 21, 1968, when Soviet-led armies invaded Czechoslovakia. The continuing violation of human rights of the people of EXTEND THE VOTING RIGHTS ACT

HON. CHARLES E. SCHUMER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

On that day in August 1968, the Soviet troops invaded Czechoslovakia to crush the reform-minded government of the then President, Alexander Dubcek. Although this invasion contravened the independence of a sovereign state and denied its people selfdetermination, it is important to note that there existed and does exist today a strong yearning for freedom in Czechoslovakia. This strong nationalistic spirit is still evident. Unfortunately, experience has shown that the Soviet bloc, despite an occasional small concession to its people, has no regard or respect for human rights and justice. Even peaceful dissent is not permitted and to express an unpopular view is to invite imprisonment.

Czechoslovakia under Soviet occupa-

tion obliges us as representatives of a

free people to denounce the Soviet's

contempt for the Helsinki accords, the

United Nations Charter, as well as the

Czechoslovak Constitution. With its invasion and occupation of Afghani-

stan in 1979, the Soviet Union contin-

ues its quest for world domination.

The Helsinki accords forbid political or military intervention into the affairs of other countries. However, the Soviets have shown no inclination toward embracing a policy of upholding those basic human rights outlined in the Helsinki accords.

We must continue to express our support for the freedom-loving Czechs and Slovaks who suffer under the tyranny imposed upon them by the Soviet Union. The Soviets justify their occupation with what has become known as the "Brezhnev Doctrine." We must emphasize the strong opinion that exists in the U.S. Congress that the people of Czechoslovakia and other peoples of Eastern Europe have a right to self-determination.

It is especially evident that the people of Czechoslovakia continue to oppose the violations of their human rights by the Soviet-imposed government by their demands for the restoration of fundamental civil and political rights in manifestos, "Charter 77" and "Petition 78" which were circulated and signed by nearly 1,000 signatories, and their numbers are growing despite the severe oppression by the puppet government in Prague.

As attention is directed to this tragic anniversary, we must express our support for the cause of freedom for the people of Czechoslovakia. Only with the end of political repression, religious persecution, and cultural genocide, will the Czech and Slovak peoples be able to obtain their legitimate aspirations of independence and self-determination.

• Mr. SCHUMER. Mr. Speaker, in 1965 President Lyndon B. Johnson signed into law the landmark legislation which has been vitally important in increasing the voting opportunities for all citizens—the Voting Rights Act. Now, some have suggested that we no longer need the protections embodied in the act. They argue first, that the act has accomplished its goal and, therefore, is no longer needed, and, second, that we should get the Federal bureaucracy off the backs of State governments. I strongly disagree with both of these arguments.

It is imperative that those who still want to guarantee the rights embodied in the fourteenth and fifteenth amendments vigorously support H.R. 3112, Judiciary Committee Chairman Rodino's bill to extend the Voting Rights Act past its August 6, 1982 deadline

We must extend the Voting Rights Act in order to express our most vehement determination to curb a disturbing trend toward discriminatory election changes made by local authorities. There is a distinct difference between Federal interference in local affairs and the need to keep a close eye on the discriminatory practices of localities in order to protect freedoms guaranteed by the Constitution. The citation of 538 election violations over the last 5 years should be enough to convince anyone that we cannot afford to weaken the major vehicle for protecting these freedoms.

It is important that, in this time of merciless cuts in social services to minorities and the rekindling of hatred by groups like the Ku Klux Klan and the American Nazi Party, we in Congress do all we can to strengthen rather than weaken the inalienable, constitutional right of all Americans to vote. At the very least, let us extend the Voting Rights Act so that all Americans can enjoy that most cherished of American freedoms.

I proudly join my colleagues who have spoken out on this issue, and urge those who have not yet done so to join us in this effort.

Mr. Speaker, a New York Times editorial of July 28 persuasively states the case for extending the act. I ask that it be printed in the Record.

SUSTAINING THE RIGHT TO VOTE

These are critical days for the Voting Rights Act, even though the struggle for its renewal is not even half over. The House Judiciary Committee meets today to mark up a bill extending the 1965 law for another ten years. Given the chilly atmosphere in the Senate, the House is the more promising forum for early action on a strong bill. Much depends now on the legislative skill of diverse factions. The trick will be to meet civil rights needs with enough flexibility to attract the votes of moderates.

It seemed for a time that this most effective of all civil rights laws had run its course and lost its broad, bipartisan support. Some argued that the past 17 years brought so much more political freedom for blacks and Hispanics that the law was no longer needed. Some found the law oppressive, putting whole States in political receivership by requiring them to clear any voting rule changes with the Federal Government.

But the House hearings have shown that the job is not finished. And fresh political soundings have shown that the act is still widely appreciated.

The hearings made clear that minority gains are too recent and too fragile to withstand the hostility that endures in many states and localities. Some jurisdictions still observe the law in name only; they continue to make it hard for minorities to vote and still cook up schemes to devalue their ballots with racial gerrymanders. This was the notable finding of Representative Henry Hyde, the Committee's ranking Republican, who at first opposed but now favors extension of the act.

Others, too, have been coming around and no longer see extension as a political liability. Senator Barry Goldwater supports it. Southern Republicans are going along, chastened by the loss of a House seat last month in Mississippi, where the act was an issue. President Reagan, though slow to join the issue, is leaning toward renewal.

The politics surrounding the measure come down now to a few major issues, the most crucial of which is something called "bailout." It has been virtually impossible so far for a reformed State or locality to get out from under the act's restrictions. Civil rights forces recognize that the time has come to allow some jurisdictions to earn back their sovereignty. The challenge is to draft a bailout procedure that does not become a sleve for the undeserving.

If the House can hold out realistic hope for jurisdictions with clean records and constructive programs for wider enfranchisement, it will command the respect of all factions and probably the support of the Senate. But if Congress adopts a bailout that is really a copout, permitting wholesale reversion to the old discriminatory ways, the act itself will not be worth renewing.

NAIROBI CONFERENCE ON RE-NEWABLE ENERGY (PART III): U.S. NATIONAL PAPER READY

HON. BERKLEY BEDELL

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. BEDELL. Mr. Speaker, I offer today the third and final report on the upcoming U.N. Conference on New and Renewable Sources of Energy—UNCNRSE—scheduled for August 10-21, 1981, in Nairobi, Kenya.

Because the conference is drawing near we should reflect on the preparation conducted during the past 2 years. As initially conceived, UNCNRSE was organized into three distinct groupings: Eight technical panels, six ad hoc expert groups, and a synthesis group. The technical panels were to assess the "state of art" and development prospects for solar energy; biomass; fuel wood and charcoal; wind energy; oil shale and tar sands; ocean energy; geothermal; and hydropower. The ad hoc groups were responsible for studying certain cross-cutting issues including financial barriers; inadequate education and training; R. & D.; and restricted informa-tion flows. In addition, the ad hoc groups examined the broad restraints on energy applications in the rural and industrial sectors. Finally, a preparatory synthesis group summarized and integrated the technical panel and ad hoc group recommendations for use at the conference itself. Copies of all these studies are available through the U.N.

For its part, the United States has prepared three major documents, each to be distributed to participating delegations: "The U.S. National Paper," "Information Resources in the U.S.A.," and "U.S.A.: Living With the Sun." These represent, in highly readable form, the latest national effort to assess the growing potential of renewable energy, and can be obtained through the State Department.

The "U.S. National Paper," prepared by the Solar Energy Research Insti-tute (SERI), details the U.S. experience with and expectations for 10 new and renewable energy technologies: Low temperature solar collectors, intermediate and high temperature solar collectors, solar cells, biomass, wind energy, ocean energy, hydropower, geothermal systems, oil shale, and tar sands. It begins by noting that the United States depended almost entireon renewable energy—primarily od—until the late 1800's. At wood-until the present, however, renewable sources meet roughly 5 percent of U.S. energy needs: 3 percent hydropower, 2 percent wood, and a small fraction from wind, solar water heaters, and alcoholfuel supplements. The study is careful to point out, however, that while "renewable energy may be humanity's most ancient power source * * * it is also becoming the basis for some of our most modern power systems." Indeed, the report concludes that by the year 2000 renewable technologies could account for 20 percent of the Nation's energy consumption.

The document "Information Resources in the U.S.A.," is an excellent reference work prepared by the Department of Energy's Technical Information Center. It describes not only what technical research is being done, and by whom, but also how this information is distributed, including a discussion of trade secrets, patents and international technology transfer. As such it outlines the availability of U.S. scientific and technical information on

renewable energy, the policy framework in which these technologies are developed, and the roles of both public and private sectors. Equally important, the report contains a directory of sources for additional printed materials, computerized data bases, institutional services, and personal contacts at Government facilities, trade associations, nonprofit research institutes, and special libraries throughout the country.

The third document, "U.S.A.: Living With the Sun," was prepared by the National Center for Appropriate Technology (NCAT) as an illustrated pamphlet of successful private and grassroots renewable energy projects. The pamphlet will add to the international awareness of small-scale opportunities in the field of renewable energy, as well as give practical examples of possible near-term demonstration projects. In addition, it will demonstrate to developing countries the commitment within the United States to small-scale renewable technologies.

The State Department has stated three broad U.S. goals for the Nairobi Conference:

Accelerate the development, acceptance and use of new and renewable sources of energy, taking into account the effects on the global environment and resource base:

Elaborate a program for improved and expanded international cooperation in new and renewable energy as part of our overall strategy of furthering constructive international treatment of energy matters; and

Help educate all countries about the real opportunities new and renewable sources of energy offer in meeting energy needs.

In many ways, the UNCNRSE preparations have brought us closer to these goals. Through the process of drafting a "national paper," many countries for the first time have assessed the potential for new and renewable technologies within their own borders. Participating countries, more-over, have created "national focal points" on new and renewable energy, which will be critical to future awareness and development of these resources. Above all, the conference preparations have legitimized greater reliance on nonconventional energy sources, much as the 1972 Stockholm Conference did for environmental concerns, particularly in skeptical LDC's anxious for rapid modernization.

A SALUTE TO AGNES JACKSON

HON. LOUIS STOKES

OF OHIO

IN THE HOUSE OF REPRESENTATIVES
Tuesday, August 4, 1981

• Mr. STOKES. Mr. Speaker, I take this opportunity to bring to the atten-

tion of my colleagues an individual who is on the frontline every day in the fight for decent housing and economic equality for all residents of the Buckeye-Woodland area in Cleveland. That individual is Agnes Jackson, president of the Buckeye-Woodland Community Congress which is located in my congressional district.

Mr. Speaker, Mrs. Agnes Jackson is a master negotiator and formulator of policy and planning for housing for the disavantaged and working class of the Buckeye-Woodland area in the 21st Congressional District. She is a fierce warrior when it comes to fighting for the cause she has dedicated her life to-the right to quality housing and safe neighborhoods. At the same time. Agnes Jackson displays the savvy and tactical shrewdness of a seasoned veteran in working with housing financiers and government officials to secure needed funds for housing and neighborhood revitalization.

However, Mr. Speaker, under this tough facade, Mrs. Jackson is a kind and warmhearted individual. People in the Buckeye-Woodland Community Congress know that she is a relentless fighter for them and at the same time is keenly sensitive to their needs. For these reasons, she is loved by everyone in the Buckeye-Woodland area and maintains a rapport amongst her associates and neighbors that is unmatched.

Mr. Speaker, I have had the pleasure of working with Agnes Jackson on many occasions. I, too, respect and admire her. The comments I have made about her are an attempt to give my colleagues an opportunity to feel and see in their mind's eye just what Agnes Jackson has meant to the residents of the Buckeye-Woodland area in Cleveland.

If it had not been for Agnes Jackson, many of the renovated houses in the Buckeye-Woodland area still would be gutted shacks, eyesores and useless to the community. If it had not been for Mrs. Jackson, the number of homeless and ill-housed people in that area would be at an abominably record high level. Finally, if it were not for Agnes Jackson, many people in the Buckeye-Woodland area would be stranded hopeless with little or no motivation to fight for what they deserve and need—quality housing.

Mr. Speaker, for these people and for myself, Agnes Jackson has been an unflinching supporter and pillar of strength. I take this opportunity to formally thank Agnes Jackson for that commitment, determination, and sensitivity to her peers and disadvantaged in the city of Cleveland. I ask my colleagues to join me in a very special tribute to Mrs. Agnes Jackson.

Mr. Speaker, at this time, I will insert in the RECORD, an article which appeared in the Cleveland Plain

Dealer on this very special woman-Mrs. Agnes Jackson, president of the Buckeye-Woodland Community Congress in Cleveland, Ohio.

The article follows:

[From the Cleveland Plain Dealer, May 31, 1981]

AGNES JACKSON: A TOUGH, LOYAL FRIEND TO THE DOWNTRODDEN

(By Judy Pennebaker)

She's battled everyone from the board chairman of AmeriTrust Co. to the lowest city bureaucrat, challenged the federal government and made Cleveland's fat cats howl.

Agnes Jackson, president of the Buckeye-Woodland Community Congress, what it means to be tough. She learned

early and does it well.

Dressed in black jeans and a bright floral tunic that bespeaks a forceful personality, the tall, imposing Jackson is someone you know you wouldn't want to cross. Yet, beneath that tiger-like facade beats the heart of a pussycat, filled with genuine concern

for her downtrodden fellow man.
"She doesn't always use the right verb said one of her supporters, "but she

gets the job done."

Jackson learned about toughness in Tuskegee, Ala., where she grew up in the '40s, being pelted with eggs and overripe tomatoes hurled by unfriendly white children as she walked home from the movies.

They didn't like us being there," she recalled. "There" was a reference to a segregated section of the theater. "If we fought

back, we got jailed."

Retribution, when it came, was sweet

As a teen-ager, Jackson participated in a boycott of town merchants, which served as a model for some of the early civil rights action in the South and made Jackson an optimist for life.

"I believe there's always a way to get things done," she said. "I'm always willing to give it my best shot."

She remembers growing up on a small farm outside Tuskegee with six brothers and two sisters, helping her parents raise "mostly cotton and corn." Her family was strongly religious, Southern Baptist, and "that basic belief in God and goodness has kind of gotten me through," she said.

Jackson's mother, 73, has only a fifthgrade education, the fond daughter said, but she is the smartest woman I ever met.

"My mother was kind of like Jesus," she continued. "He turned water into wine. She could turn water into meat. She made us think we were eating well even when things were rough."

Jackson said that as she was growing up, her mother would say to her, "You're the black sheep of the family. You always ques-

tion things.

When Agnes Jackson was graduated from high school in 1953, she was more than

ready to come North.

"There were no jobs for us in the South, besides picking cotton and baby-sitting," she

She moved to Cleveland, lived with relatives and got a job running a knitting machine at Dalton of America. Soon after, she was married.

Today she has daughters, 23 and 9, a son

7, and two grandchildren.

"Being with my family is one of my greatest joys," said a sentimental Jackson, whose streetwise countenance melts quickly when she talks about those she loves.

Her husband, Theodore, was disabled on the job and no longer works: "He stays at

home, cooks, takes care of the kids and says to me; 'Go get 'em.' I do.

Attracted to the Buckeye-Woodland Community Congress in its early years because of her frustrations as a homeowner, Jackson has stayed to help the group become strong. It was formed in the early 1970s, and is the granddaddy of Cleveland community associations.

Jackson has been able, through tough talk and demonstrative action, to get banks and savings and loan associations to invest more in the neighborhood. Dealing repeatedly with the Federal Housing Administration, she has successfully countered many of the problems of early foreclosure and faulty home inspections.

envision the world as good and democratic," she said. "That's what I was taught in school. I became disappointed when I saw how things really are, how the fat cats-the oil companies, the utility companies the banks and the big politicans-control every-

"We have to put Government back in the hands of the people," she philosophized. "We're the taxpayers. They can't shove us

around '

Jackson, who is not one to mince words about politicians or their politics, had some relatively kind comments for former Mayor Dennis J. Kucinich.

"We had the same philosphy: Get the fatcat establishment. He was on the right track, but couldn't execute it," she said. "He was often surrounded by bad people.

Jackson classifies Mayor George V. Voinovich as "a smooth operator. I like his style. He isn't too flamboyant, but I take issue with a lot of things. We need a safety director and a safer city to live in."

She considers the Reagan administration a major setback. A staunch supporter of former President Carter and his policies, she finds the Reagan cutbacks "to the poor, the elderly, the oppressed-shocking.

"If he continues this, all hell is going to break loose," she predicted. "When you have a family to support, hungry kids to you've got to have some income or there's going to be a lot of trouble.'

Jackson is involved in many political and activist groups and was instrumental in the recent formation of a local jobs program

committee.

"We're going to fight back," she pledged. "We're going to start at the local level and go all the way to Washington." (She's been there before, testifying at hearings on hous-

Jackson believes in peaceful racial co-existence, and has fought hard for that in her

neighborhood.

'Maybe I'm a dreamer, but I still think we can be a great country-when more people become aware of others' hurts and needs,' she said.

COMMUNITY CRIME PREVENTION ACT OF 1981

HON. JULIAN C. DIXON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. DIXON. Mr. Speaker, today I am introducing the Community Crime Prevention Act of 1981, which would authorize the Attorney General to make grants and contracts with units of local government or nonprofit community based organizations, for the prevention of community crime.

We all know that crime is the first and foremost problem currently plaguing our Nation's communities. My hometown of Los Angeles, as well as most communities throughout the country, have experienced dramatic crime inceases. According to a recent poll taken by Public Response Associates of California, crime surfaced as the No. 1 concern among Californians. Correspondence from my constituents indicates that they want some action by Congress to combat the crimewave sweeping our country. While we are not in the position to intervene locally, we should provide encouragement alternatives at the Federal level. I believe the key to fighting community crime lies with organized, visible, and vocal neigborhood organizations, and Federal efforts should be steered toward involving community residents in fighting crime.

As you know, the Congress has significantly reduced the authorization and appropriation for the Law Enforcement Assistance Administration. over the past year. While some of its programs and projects were perceived as ineffective in reducing various crimes, a significant number of the Agency's programs proved to be very effective. One such program is the community anticrime program, which encourages neighborhood residents to get involved in neighborhood crime prevention. I believe it important that we continue this commitment.

Created in 1977, the community anticrime program has funded nearly 200 projects in urban and rural communities throughout the country and between 100,000 and 200,000 citizens have been mobilized to fight crime. Since the lack of citizen involvement is a major problem in efforts to prevent crime, we should encourage approaches to prevention which involve individuals and stimulate the interest and involvement of entire neighborhoods and communities.

A wide range of important services have been provided through this program, including escort services for the elderly; block watch programs; tenant patrols in housing projects as well as suburban communities; victim assistance programs; security education campaigns; youth crisis centers; and community based approaches to crime prevention. The program has been particularly responsive to the needs of the elderly, in providing services to prevent victimization. This aspect should not be overlooked, because for the elderly, fear of crime is often the most serious problem, and because of that fear, many older people virtually imprison themselves in their own

The Community Crime Prevention Act of 1981, would allow the Attorney General to make grants and contracts with units of local government and nonprofit community based organizations, to continue those programs and services which have been available to our Nation's crime-ridden neighborhoods and communities. The program would be authorized for a 3-year period, with annual authorizations of \$25 million. The Attorney General would be authorized to identify those affected communities through consultation with the Community Relations Service. As you know, the Community Relations Service has much expertise working with communities and local law enforcement agencies, which can be drawn upon in identifying success-

ful model programs.

I believe it important to note that these projects are not limited to our major urban areas, just as the problems of crime know no geographic boundaries. The community anticrime program has helped to create lasting improvements in all types of communities. I believe it would be a mistake to send a message that Congress no longer cares about community participation in fighting crime, at a time when our Nation's problems in this regard have reached crisis proportion. I strongly urge that we maintain this small but effective sign that we care and ask that we act swiftly to enact the Community Crime Prevention Act of 1981.

OBSERVING WORLD FOOD DAY

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES Tuesday, August 4, 1981

o Mr. GILMAN. Mr. Speaker, my colleague, the gentleman from Illinois (Mr. Simon), and I have introduced legislation, House Joint Resolution 243, to commemorate October 16, 1981 as World Food Day. I urge my colleagues to support this legislation in order to demonstrate our commitment to helping resolve the critical problem of world hunger and malnutrition.

I recently received from Ms. Patricia Young, Coordinator, National Committee for World Food Day, suggestions which the committee has prepared, for World Food Day observances. At this point in the RECORD I would like to share these suggestions with my colleagues who may be receiving inquiries from their constituents

about World Food Day:

SUGGESTIONS FOR WORLD FOOD DAY OBSERV-ANCES BY NATIONAL COMMITTEE FOR WORLD

Letters are coming to us from individuals and community groups throughout the country requesting suggestions on how to organize World Food Day observances. The first thing to remember is that there is no single theme for the Day this year. It was decided that each country-and even each

group or community within a country—might have different food-related interests and priorities for local, national or international action.

The link between national and international action is clear. All World Food Day observances will serve to heighten awareness of food, nutrition, land use and poverty issues, and all observances together will demonstrate our global concern.

Remember, too, that the National Committee for World Food Day, the U.S. Department of Agriculture or the Food and Agriculture Organization of the United Nations will help you with appropriate materials or further guidance once your group shows a special interest in an observance plan. Requests sent to the National Committee will be forwarded to one of the official organizing channels or to appropriate organizations among the committee's participating members.

With this as background, we offer the suggestions below. Any one of them will contribute to our national and world effort

1. Raise the idea of holding a World Food Day study meeting with friends or a community organization to which you belong. For a good analysis of the issues, write to the U.S. Government Printing Office, Washington, D.C., 20402, for a copy of "Overcoming World Hunger: The Challenge Ahead" (Price: \$2). This excellent 29-page booklet is an abridged version of the report of the Presidential Commission on World Hunger. It can be a valuable resource for discussion with public officials.

2. It's hard to act alone. Join a community or national organization which is doing something to solve hunger problems year around. These groups may already be planning World Food Day observances or be able to give you advice on how to organize or

participate in one.

3. Ask your local school officials to organize World Food Day events that involve parents and students, and to include world food and hunger material in social studies for that week (Oct. 12-16). School observances might include essay contests, homework projects or World Food Day fairs that combine fun with educational material and perhaps fund raising for a food-related cause at home or abroad. (Ask school officials to write to the National Committee for guidance on study materials.)

4. Have your study group, club or church invite local government officials to discuss hunger and poverty problems in your town, county and state, and what programs are available to those in need. One action plan for World Food Day would be to insure that all people in your area are aware of state and federal programs they might be entitled to share in. With local officials, discuss how well food programs are working and what problems they face.

5. Find out what resources on world hunger issues are in your local public library and school library. If these are limited, suggest that additional material be obtained for World Food Day, including audiovisual presentations. Both FAO and the Department of Agriculture have both free and sale materials, as do many of the sponsoring organizations of the National Committee. Ask that libraries organize special displays of this material throughout the week of World Food Day.

6. Does your town have a community vegetable garden? World Food Day would be a good time to launch one. Plots can be offered to apartment dwellers and others without gardening space to grow an impor-

tant part of their own food. These community gardens have proven extremely popular across the country.

7. If your children belong to a Boy Scout Girl Scout unit or any other kind of youth organization, talk to the group leaders to suggest ideas for youth programs built around World Food Day. Ask group leaders to write to the National Committee for further ideas on how this can be done.

8. Ask the editor of your local newspaper and other media in your community (radio/ TV) to publicize the World Food Day observance you are planning and also to include world hunger material in their publications and broadcasts during that week. Materials to give to media, including suggested editorials, will be available through the National Committee. Have your group leader offer to appear on local radio or TV programs to discuss food issues and your World Food Day observance.

9. The United States is a "representative"

democracy. After your World Food Day observance write a joint letter to your national congressman or senator stating your views on what should be done to solve hunger problems at home and abroad. Your representatives in Washington want to hear from you. Without your guidance he or she cannot fully know your views and therefore cannot fully "represent" you as an Ameri-

can citizen.

In all of the suggestions given above, you can find an organization eager to provide further information or technical advice on programs. Why not write to several of them and then choose a program that suits you best. Even if you decide not to pursue one of these ideas, you will be learning more about national and international food and poverty issues by contacting the organizations involved. And simply by doing that you will be participating in the spirit of World Food

ROBERT MOSES

HON. HAMILTON FISH, JR.

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES Thursday, July 30, 1981

Mr. FISH. Mr. Speaker, it is with a sense of loss to our country that I join my colleagues in paying tribute to the late Robert Moses, who almost single-handedly changed the face of New York State as no one else probably ever will.

Mr. Moses, the quintessential urban planner, directed a bevy of public works projects throughout his life, from building highways through New York to developing over 70 State parks encompassing 2.6 million acres of land. He helped bring the world to New York City with the building of the United Nations and through his presidency of the New York World's Fair Corp. in 1963.

His building achievements and contributions to New York State aside, Robert Moses left his influence on the way in which all of America has built her cities. He once said, "Those who can, build. Those who cannot, criticize." Robert Moses certainly built, and we can only admire.

FULFILLING THE PROMISE OF THE BLACK LUNG BENEFITS PROGRAM

HON. JOHN N. ERLENBORN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. ERLENBORN. Mr. Speaker, today I am introducing a bill to amend the Black Lung Benefits Reform Act of 1977 and the Black Lung Benefits Revenue Act of 1977, both enacted in 1978. The necessity of understanding the problems of the Federal black lung program and the need to tighten up the eligibility for the program are

overwhelming.

The black lung program originated in 1969 as a one-shot deal to compensate those who had contracted totally disabling black lung before it was recognized by the States as an occupational disease. Even though all States now recognize black lung as a compensable occupational disease, it remains a permanent Federal program. Originally, the program was to compensate miners totally disabled by black lung. In 1972, the program was changed to compensate all miners with some stage of black lung, whether or not the disease was in a disabling stage. In 1978, the program was changed to compensate most miners and their dependents and survivors whether or not the miner had any medical evidence of the disease.

It should be pointed out that the scientific and medical testimony clearly establishes that black lung is medically detectable and that disability can be medically determined. Black lung, known as coal workers' pneumoconiosis (CWP), can be determined by Xray. Simple CWP is categorized as stages 1, 2, and 3, and in those stages is not usually disabling and is not usually progressive. The complicated form of CWP is called progressive massive fibrosis (PMF) and is usually disabling and is usually progressive without fur-

ther exposure to coal dust.

In 1976, the National Academy of Sciences issued a report entitled "Coal Workers' Pneumoconiosis Medical Considerations, Some Special Implications" which showed that after working 30 years in coal mines of the anthracite regions, only 14.3 percent of the miners had progressive massive fibrosis, the disabling stage, while 60 percent had some stage of the disease. The number of miners with the disease is smaller in other regions. In the Appalachian region, only 2.1 percent of the miners were disabled, while 45 percent had simple stages of the disease. In the Midwest and West, no statistically significant number were disabled and 25 percent in the Midwest and 10 percent in the West had the simple stage of the disease. In recent testimony before the Subcommittee

Ways and Means, July 27, 1981, the National Institute for Occupational Safety and Health reported some of the results of the third round of examinations in the national coal workers' health surveillance program. Over 95 percent of those examined had no evidence of the disease, over 3 percent demonstrated category 1 of CWP, and no statistically significant number had advanced stages of this simple form of the disease or the complicated form of the disease.

With these figures in mind, despite the low percentage of miners with the disabling stage of black lung, the General Accounting Office (GAO) reports that from 1969 to December of 1980, the Social Security Administration (SSA) has paid over \$9 billion in benefits to almost 400,000 claimants, out of 537,000 miners and survivors who filed claims with SSA. From July 1973 through April 1981, the Department of Labor has approved over 94,700 claims out of the more than 282,500 claims it has reviewed, paying benefits of over \$1.75 billion from the black lung disability trust fund created in

Very clearly, the approval of these claims has not been based on disability. The startling fact is that in 88.5 percent of the cases, medical evidence was not adequate to establish disability or death from CWP (GAO report entitled "Legislation Allows Lung Benefits To Be Awarded Without Adequate Evidence of Disability' (HRD-80-81, July 28, 1980)). In a recent review of the Department of Labor's administration of its program, GAO concluded that in 84 percent of the cases deemed eligible for benefits, the medical evidence was not adequate to establish disability or death from black lung (testimony of GAO before the Subcommittee on Oversight, Committee on Ways and Means, July 27,

These statistics and these findings by GAO, the National Academy of Sciences, and NIOSH demonstrate the need to drastically revise the black lung program. The bill I am introducing today will bring the black lung program closer to a real disability program. Further, the bill fulfills the promise of the sponsors of the original law by having State workers' compensation cover future black lung claims after February 28, 1983, the same as States cover other occupational diseases.

A summary of the provisions of the bill follows:

The bill narrows the definition of pneumoconiosis since the present definition has been interpreted to include such conditions as emphysema, which is not a chronic dust disease of the lung, and lung cancer, which has not been shown to be related to coal workers' pneumoconiosis. In addition, the

on Oversight, House Committee on bill excludes sequelae, thus excluding unrelated lung conditions.

The present definition of "miner" includes anyone who has worked around a mine, in transportation, or even in construction. The Benefits Review Board has allowed a claim of a laboratory analyst who worked in the lab analyzing coal. There is no evidence that these people suffer any increased likelihood of developing coal workers' pneumoconiosis. The bill amends the law to define miners as those who have been employed directly in the mining-extraction-of coal.

In order to keep definitions in different Federal laws parallel, the bill amends the definition of "total disability" to be compatible with that of the Social Security Act. To collect benefits for total disability, the claimant should be unable to perform any work. The definition of total disability applied by the Social Security Administration requires proof that the claimant cannot "engage in any substantial gainful activity by reason of any medically determinable physical or mental impairment."

The bill also restricts the use of the present presumptions in the law and strikes the 411(c)(3) and 411(c)(4) presumptions and the 411(c)(5) entitlement. It is really necessary that proof of the existence of black lung disease be required before any presumption is raised, and the bill does this. Besides, if there is medical evidence that black lung disease does not exist, the bill provides that a presumption cannot be used to establish a claim.

The bill deletes the provisions tying the benefit level to the increase of the Federal wage level of a GS-2. The increase only contributes to the rate of inflation and the rapidly increasing costs of the program. Since the program was intended to provide a supplement to income-not as the sole income of a recipient-there is no reason to index these benefits.

The bill removes the "unrelated death benefit" provision. Presently if a miner who is entitled to benefits dies from any cause-even a cause completely unrelated to his pneumoconiosis-his eligible survivors are entitled to benefits. This amounts to a life insurance program and not a compensation program and should be repealed,

which my bill does.

Black lung benefits are presently offset only by benefits from a State black lung program. They are not offset by workers' compensation benefits from any other program. This means that for benefit purposes a worker can be disabled twice-an irrational concept. The bill amends the statute to permit the offset of black lung benefits by any other workers' compensation benefits.

Since an X-ray is one way of proving or disproving a claim, the bill allows

the denial of a claim based on negative X-rays and strikes the provision that does not allow for the rereading of X-rays. If the program is to be placed on a sound medical basis, the best available medical evidence should be sought and allowed. Presently, claims may be denied or allowed based on a totally inaccurate reading of X-rays. The bill will correct this inequity.

The present law allows an affidavit to be sufficient where there is no medical or other relevant evidence. That means those who will benefit can submit an affidavit that a miner had a cough and can receive benefits. This provision is probably one of the most important reasons the GAO concluded that 88.5 percent of the random sample of claims are not supported by medical evidence of disability. It is a provision encouraging fraud. Because of its total inappropriateness, the bill strikes this affidavit provision. The bill further strikes the provision requiring the Secretary to accept an autopsy report. That does not mean the Secretary cannot accept an autopsy report; it just means the Secretary does not have to accept all autopsy reports submitted.

One of the original promises of the black lung program was that it would be a temporary Federal program. However, despite vast improvements in State programs and benefits, no State program has yet been approved. This is in part because the black lung statute requires the States to adopt standards similar to the Federal law for the determination of the existence of the disease and the definition of disability, and to automatically provide widow's benefits without proof that the miner's death was the result of pneumoconiosis. Even if the Federal Government were to approve a State plan, the program would still remain federally regulated. Rather than have the Federal Government approve State plans, my bill totally terminates the Federal program from processing new claims after the fifth anniversary of the 1978 amendments (Feb. 28, 1983). This is compatible with the original promise that the black lung program was to be a temporary supplemental

The black lung program has incorporated many of the provisions of the Longshoremen's and Harbor Workers' Act. One of those provisions provides for a 20-percent penalty when a claim is not paid upon approval. This is an abuse of the due process procedure. Accordingly, the bill provides that no penalty is added to the compensation award until the operator, or trust fund, has the right to contest the claim. In addition, the bill provides that no retroactive payments shall be made of reviewed claims until all administrative and judicial review is completed. Those retroactive payments which have already been paid

out where it was ultimately concluded that the miner or survivors were not entitled to benefits have not been retrieved by the Federal Government. This adjustment to the law will provide that those moneys will not be lost to the Government.

Presently, benefits payable from the trust fund are not subject to being contested by either operators or the trust fund. The bill establishes a special counsel in the Department of the Treasury in order to controvert claims that are the responsibility of the trust fund. By being able to protect the trust fund from ineligible claims, it is hoped that moneys from the Federal Treasury will be saved. Although the trust fund is financed by a tax on coal, the trust fund is insolvent, with con-tinued projected insolvency, and the trust fund must borrow against general revenue funds. Those funds should be protected and the Office of Special Counsel will do that.

The present 50 cent tax per ton on underground coal and 25 cent tax per ton on surface coal is inadequate to fully fund the trust fund. The bill changes that tax to 3 percent and 1 percent of the price at which coal is sold by the producer of underground and surface coal, respectively. Projections by the Department of Labor in early May show such a tax would make the trust fund solvent in fiscal year 1986.

A summary of the bill follows:

Section 1. Short Title—"Black Lung Amendments Act of 1981"

TITLE I. SECTION 101 GENERAL (AMENDMENT TO SEC. 401)

Changes the findings and purposes to reflect that all States now cover occupational disease, that Congress will cooperate with the States, and removes the reference to death unrelated to pneumoconiosis.

Sec. 102. Definitions (Amendment to Sec. 402)

- (a) Redefines "pneumoconiosis" as it was originally defined in 1969, eliminates "sequelae" and "respiratory and pulmonary impairments."
- (b) Redefines "miner" by striking "or around" and transportation and construction workers. The definition specifically excludes certain workers, including those listed above as well as lab workers, supply clerks, administration and supervisory persons who do not work in a coal mine.
- (c) Redefines "total disability" to have the same meaning as "disability" in section 223(d) of the Social Security Act.

Sec. 103. Presumptions (Amendments to Sec. 411(c))

- (a) Requires 15 (instead of 10) years of mine employment for a rebuttable presumption that pneumoconiosis arose out of such employment.
- (b) Strikes Sec. 411(c)(2)—the presumption that if a miner who had 10 years' employment died from a "respirable disease," it is presumed that death was due to pneumoconiosis.
- (c) Changes the irrebuttable presumption in 411(c)(3) (redesignated 411(c)(2)) to a rebuttable presumption.

(d) Strikes 411(c)(4)—the 15-year rebuttable presumption of pneumoconiosis where there is a negative X-ray but other evidence of respiratory or pulmonary impairment—and 411(c)(5)—the 25-year employment before June 30, 1971, and death prior to February 28, 1978, entitlement of survivors—and requires the presumptions in the remaining 411(c) (1) and (2) to come into play only where there is no relevant medical evidence.

Sec. 104. Benefit Payments (Amendments to Sec. 412)

- (a) Removes the indexing of benefit payments to the cost of living adjustment to the pay of a GS-2.
- (b) Removes the "unrelated death benefit" provision. IIf a miner is receiving benefits, but dies from an unrelated cause, the eligible survivors are presently entitled to benefits—this is striken. However, if a miner dies from pneumoconiosis, the eligible survivors are still entitled to benefits under this amendment.]
- (c) Provides for offset of black lung benefits by other workers' compensation, unemployment compensation, or disability laws of the State. Requires the Secretary to take action to insure that the reductions are carried out.
- (d) Provides for offsets in part C, in other than just "due to pneumoconiosis."

Sec. 105. Medical Examinations (Amendments to Sec. 413)

- (a) Allows denial of a claim on the basis of an X-ray.
- (b) Strikes the provision allowing affidavits to be sufficient where there is no medical or other relevant evidence; strikes the no rereading of X-ray provision; and strikes the provision requiring the Secretary to accept an autopsy report.

Sec. 106. State Compensation (Amendments to Sec. 421 and Sec. 422)

Terminates the part C Federal program on February 28, 1983 (the fifth anniversary of the 1978 amendments), and provides thereafter that claims of a coal miner will be treated under State workers' compensation laws.

Sec. 107. Penalty Payments (Amendments to Sec. 422)

Provides that no penalty is added to the compensation award until the operator, or trust fund, has had the right to contest the claim.

Sec. 108. (Amendment to Sec. 430)

Apply amendments to part B of this act to part C as appropriate.

Sec. 109. (Amendment to Sec. 435)

Provides that no retroactive payments shall be made of reviewed claims until all administrative and judicial review is completed.

TITLE II. PROTECTION OF TRUST FUND

Establishes a special counsel in the Department of the Treasury in order to controvert claims that are the responsibility of the trust fund.

TITLE III. COAL TAX

Changes the tax from 50 cents per ton on underground coal and 25 cents per ton on surface coal to 3 percent and 1 percent of the price at which each ton of coal is sold by the producer of underground and surface coal, respectively.

THE VIEW FROM LITHUANIA

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

 Mr. DERWINSKI. Mr. Speaker, I would like to insert the following article from Newsweek into the record describing the political reforms of Poland's Communist Party and the rippling effects on the people of Lithuania and the Baltic States.

Ever since solidarity cast the first stone at the glasshouse of Poland's Communist Party, the entire world has focused its attention on the historical changes taking place in the lives of Polish workers.

But few have watched the events with greater interest than the neighbors of Poland: the people of Lithuania. Although Lithuania is far smaller than Poland they both share a historical hatred for Moscow's constant efforts to deny their countries independence.

We can only hope that the monumental reforms of Poland's Communist Party will play a major role in breaking down the imperialistic colonialism which the Soviets maintain over the nations of Eastern Europe. The Soviets, through their illegal occupation of the Baltic countries, holds captive the people of these nations with barbed wire, prison fences, and a relentless KGB. We pray that the tide is turning.

[From Newsweek, Aug. 3, 1981] THE VIEW FROM LITHUANIA

After six days of outspoken meetings, the reform congress of Poland's Communist Party closed last week. At the final session, delegates chose a new, fifteen-man Politburo; it included eleven new faces but kept a careful balance of centrist reformers, conservatives and liberals. In a tough speech, Wojeciech Jaruzelski Minister warned that a 110 percent increase in food prices-far more than the boosts that have led to strikes in the past-is required if Poland is going to address its desperate economic crisis. The government also cut the individual meat ration by 20 percent. The Soviet Union seemed willing to live with the results of the congress, at least for now. Just across the border, Soviet Lithuania was intently watching Poland's experiment in reform. From Vilnius, the Lithuanian capital, Newsweek's Moscow bureau chief Andrew Nagorski filed this report:

Every Sunday, St. Theresa's Church bustles with worshipers of all ages streaming in for the Masses that are conducted alternately in Lithuanian and Polish. Outside, one eye cocked for Soviet authorities, peasant women do a brisk business selling rosaries, imitation-gold crosses and holy cards. No sooner had I begun taking pictures than one alarmed middle-aged woman ordered me away, assuming that I was a KGB agent. After we cleared up the misunderstanding, the woman apologized, explaining that Soviet authorities have been trying hard to keep Lithuania's Catholics on a very tight rein. "They are trying to prevent what is

going on in Poland from happening here," she told me.

Like the Poles, Lithuanians are overwhelmingly Roman Catholic. They share Poland's pride in famous sons such as the nineteenth-century nationalist poet Adam Mickiewicz and last year's Nobel Prize laureate Czeslaw Milosz, both of whom studied in Vilnius. And they join the Poles in a deep, historical hatred of Russian domination. "Everyone talks about Poland all the time," said one woman of mixed Polish-Lithuanian background. "Lithuanians say the Poles are smart and they know what they are doing—if only it could be like that here."

It probably can't be: Poland's population is 36 million and Lithuania's only 3.4 million. Even so, Moscow has much to worry about. Lithuanian partisans resisted the 1940 Russian seizure of their country well into the 1950s, and even today, Lithuania is one of the most troublesome Soviet republics. Despite Soviet repression of Lithuanian dissidents, numerous underground journals now circulate widely, protesting everything from the Soviet invasion of Afghanistan to the regime's new policy of teaching Lithuanian children Russian as a second language beginning in first grade. "To destroy a country, the most important thing is to destroy it language," chided one dissdent.

REPRESSION

The government's anti-Catholic policy is another very sore point. The Soviets permit only ten churches to operate in Vilnius, acity of nearly 500,000, and the church at the university is now a "museum of science." Priests are not allowed to teach religion to the young. Only one seminary, at Kaunas, offers training for the priesthood, graduating about twelve young men each year, and the KGB must approve candidates. It is not unheard of for priests to be waylaid and beaten by thugs presumably working for the regime.

Lithuania's Catholics have long since found ways to cope. Believers who occupy state or party positions often avoid trouble by attending Mass in towns where they will not be recognized. The church conducts a small underground seminary, and many women who work in occupations such as nursing also belong to secret orders of nuns.

To stop the "Polish disease" from spreading to Lithuania, the Soviets have restricted contacts with Poland: once-routine visas for family visits are now granted rarely and grudgingly. Lithuania's Polish minority complains that letters from Poland arrive weeks late, if at all. "I don't know what is happening with my family," said one elderly woman who had not received a single note since Polish strikes began a year ago. Newsstands now sell only those Polish newspapers the authorities consider "safe." At political sessions for Lithuanian workers, Soviet lecturers stress the dangers of "counter-revolution" on Poland. Anyone with personal ties to Poland is suspect—and the KGB has stepped up its surveillance.

Lithuanians are nevertheless fascinated by Poland's heretical path. Although the Soviets often jam Western broadcasts, Lithuanians listen to Polish radio and some have been able to watch Polish history—from the Pope's visit to Lech Walesa's press conferences—unfold on Polish television. But if Lithuanians yearn openly for a Polish-style renewal, most seem to realize it is an impossible dream for them. "We can only envy the Poles—and we can only be happy for them if they succeed," one Lithuanian dissident told me. Then she added,

with a shrug of hopelessness: "Our poor Lithuania."

RABBI LOUIS J. CASHDAN RETIRES AS SPIRITUAL LEADER OF TEMPLE SOLEL, BOWIE, MD.

HON. STENY H. HOYER

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. HOYER. Mr. Speaker, I rise to pay tribute to an outstanding religious and civic leader, Rabbi Louis J. Cashdan of Bowie, Md.

For 48 years, Rabbi Cashdan has served as spiritual leader of congregations in Great Britain, Canada, and the United States. In 1967 he came to the Temple Solel in Bowie, where his tireless dedication to his congregation and his community made him one of the area's most beloved citizens.

A native of New York City, Rabbi Cashdan was ordained at Hebrew Union College, after graduating from the University of Michigan and doing graduate work at the Universities of Wisconsin and Chicago.

As rabbi of the West London Synagogue during World War II, he was one of the few American rabbis who remained at his post during the torturous days of the Battle of Britain. After his home was bombed, he lived in the synagogue during 58 days and nights of intense aerial bombings.

Throughout Rabbi Cashdan's distinguished career, he has served as the president of the welfare councils in West Virginia and Missouri; he is a past national officer and member of the executive committee of the Central Conference of American Rabbis. Rabbi Cashdan was a delegate to President Truman's White House Conference on Children and Youth and was president of the Rabbinical Associations of both Greater Kansas City and Toronto.

Since coming to Maryland, Rabbi Cashdan has served on the faculties of Johns Hopkins University and Bowie State College. He is a member of the Board of the Jewish Social Service Agency of Washington, D.C., and is the immediate past president of the Washington Board of Rabbis.

Mr. Speaker, on June 12, 1981, I had the great honor to attend services at Temple Solel in Bowie for retiring Rabbi Cashdan. His congregation and civic and political leaders in Bowie paid tribute to the rabbi and his lovely wife, Eve, for their outstanding contributions to their community, both religious and secular.

Since then, Rabbi and Mrs. Cashdan have toured Egypt and Israel and, on their return, have become able advisers to me on the question of Soviet Jewry.

As Rabbi Cashdan assumes his new role of rabbi emeritus of Temple Solel, I know all the Members of this House will join with me in wishing him and his lovely wife, Eve, good health and happiness in the years ahead.

REAGAN'S UNJUST ATTACK ON AMERICA'S ELDERLY

HON. LOUIS STOKES

OF OHIO

IN THE HOUSE OF REPRESENTATIVES Tuesday, August 4, 1981

• Mr. STOKES. Mr. Speaker, I address my remarks to a subject which touches the life of each and every individual in this country. It is a subject which we, as a body, will have to take action on very soon, and will shortly thereafter have to account for to our constituents. I am speaking of the proposed changes in the social security program that the administration has asked this Congress to approve.

In return for approving the changes, the President claims we will at some future point in time be able to reduce the social security tax workers must

currently pay.

In preparing for the debate on the President's proposals, and I use the word debate in a very literal sense, I believe we here in Congress need to fully understand the effect of the President's proposals on a program which was designed to protect this country's workers, and their families, from the loss of income suffered through retirement, death, or disability. I believe that we also need to consider the circumstances under which these proposals are offered. And finally, I believe we need to view these proposals in light of the very severe and extensive cuts this body has already imposed on social security benefici-aries through the budget reconcilia-

While I am inclined to believe that even the changes incorporated in the budget bill may not be enough to completely solve social security's financing problems, I am firmly confident that all of the proposals submitted by the President are not necessary to save this vital program. I have just returned from a working trip in my district where my constituent's very clearly voiced their disapproval of the President's reversal of his position on social security. In campaigning for office the President repeatedly stated that he would not change social security. Then, less than 2 months after taking office he began unfolding a very comprehensive, inhumane, discriminatory, and unjust program for changes which can only lead to financial disaster for this Nation's aged population, survivors of deceased workers, and those who have been dis**EXTENSIONS OF REMARKS**

The proposals are comprehensive because they touch every current beneficiary, 36 million people, regardless of the type of benefit being received. For example, the proposal to compute the annual cost-of-living increase based on the annual CPI rate will result in small, yet very real, decreases in the system's ability to protect individuals against inflation. For a great many individuals, every dime in benefits received is accounted for before their check arrives. When one considers that the payment of the cost-of-living increase is made after prices have risen, the effect of the administration's proposal would be to further erode the purchasing power of each and every beneficiary.

administration's proposals The would also reduce benefits for future retirees by changing the formula used to compute benefits. According to estimates by the Select Committee on Aging, approximately 3.5 million new retirees and their dependents would be affected by this proposal during the first full year of enactment alone.

The administration's proposals are inhumane because they will force cur-rent beneficiaries, and those workers planning to retire in the near future, to make radical changes in their plans and spending habits, without advance notice. For workers planning to retire at age 62, the administration plans to reduce the benefit payable by about one-third from current levels. In addition, if those workers have dependent children, the children's benefit will no longer be payable.

In the same vein, the proposal to change the requirements for disability benefit eligibility will result in over 30 million people losing coverage overnight. To approve a change such as this would be a disastrous travesty for individuals who, through no fault of their own, suddenly became unable to work.

The administration's proposals are discriminatory because they eliminate or reduce benefits for lower paid workers, the category many minorities and

women fall into.

Through past discrimination in jobs and educational opportunities, minorities and women have had to accept lower paying jobs thus having smaller earnings records on which benefits are based. The administration proposes to cap benefits for families in the lower earnings group so that families that have an average indexed monthly wage of \$196 or less would not receive any dependent benefit. Families with an average indexed monthly wage between \$196 and \$270 would have dependent benefits reduced. Families with three or more dependents and an average indexed monthly wage in excess of \$270 would also have dependent benefits reduced. This provision, contrary to the original intent of social security, would all but eliminate

protection from the loss of income for those most in need of it; lower paid minority and female-headed households.

Finally, the proposals are unjust because they provide for removing the work test as a criteria for eligibility. Over 67 percent of the increased benefits payable based on this provision would go to individuals already earning over \$17,000 annually. To use an old phrase, this amounts to "the rich getting richer and the poor getting poorer.

I think it is important at this point to understand that the administration. through these inequitable proposals, intends to solve both the short-term and long-term problems faced by the social security system. This is important because in projecting the magnitude of the long-term problem, the administration has changed the rules on us. First, the rules are changed to use a more pessimistic set of economic assumptions for social security financing purposes than were used in the overall budget request. To me, that smacks of 'having your cake and eating it too.'

Second, the rules were changed by using a new method of interpreting the effect of the economic assumptions on the social security program. The administration, in projecting the needs of social security, wants us to believe that everything that can go wrong will go wrong-for the next 50 years. Based on this philosophy, the President and David Stockman want us to approve a program which can only lead to the dismantling of the social security entirely.

As a result of the budget reconciliation process, both Houses of Congress have passed measures which virtually guarantee the elimination of the social security minimum benefit for all current recipients, not just those individuals receiving a Government pension: and the elimination of new student benefit awards with a reduction and phaseout of current student benefits. The House provisions were included in the Gramm/Latta amendments in the nature of a substitute to H.R. 3982, and the Senate provisions were included in the Senate budget bill (S. 1377) introduced by Senator PETE V. Do-MENICI, chairman of the Senate Committee on the Budget. These changes. if coupled with a provision to allow interfund borrowing between the old age and survivors insurance fund, the disability insurance fund, and the health insurance fund would be sufficient, I believe, to address the critical shortterm financing shortfall. To go beyond these changes at this time to correct dubious, at best, or nonexisting longterm problems would be a grave error.

On Thursday, July 16, 1981, one of the major networks aired a program entitled "Social Insecurity." At the conclusion of that program the question was asked-"what do we-the American people—want social security to be?" That question will be answered by the measures we here in Congress pass. Secretary Schweiker, during the course of the program, suggested that the administration's proposals are bitter but necessary medicine to solve the system's long-term problem that workers and beneficiaries will swallow, and must swallow now.

Well, I say that we, the Members of Congress are the doctors who prescribe the medicine. I for one, don't intend to prescribe what can only be described as an overdose to a problem not clearly or adequately diagnosed.

JOHN M. SNYDER, POINT MAN FOR THE PROGUN LOBBY

HON. DONALD JOSEPH ALBOSTA

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

Mr. ALBOSTA. Mr. Speaker, I include in the Record today an interview with John Snyder, director of public affairs for the Citizens Committee for the Right To Keep and Bear Arms. I think you will find the interview most interesting and informative. Mr. Snyder is an acknowledged expert on this subject:

JOHN M. SNYDER, POINT MAN FOR THE PROGUN LOBBY

Question. Americans more than any other people seem peculiarly fascinated with guns. Why this preoccupation with weaponry? Doesn't the easy availability of handguns perpetuate the climate of violence in our so-

SNYDER. The fact that most Americans want handguns is not necessarily an indication that they also want violence. The fact of the matter is that handguns are peculiarly suited to the purpose of self-defense. You can't assume that Americans want handguns simply for nefarious purposes. Regarding the easy availability of handguns, it is virtually impossible to legally buy a firearm without complying with a few of the 20,000 gun laws we already have in the United States governing various aspects of gun ownership and acquisition. Most of the guns used in crimes are illegally acquired.

Question. It is believed that some 60 million handguns are now in circulation in the United States, with more than 2 million being added each year. At the present rate, Americans will have 100 million handguns by the turn of the century. What are lawabiding citizens doing with all these handguns? Are you saying that all are used for self-defense?

SNYDER. There's no question that a good portion of the handguns are in private possession are acquired for purposes of self-defense. But many are purchased for other legitimate activities like target shooting, including competitive shooting as well as for plinking and hunting. Few people realize it, but 48 states have laws specifically regulating hunting with handguns. So there are various legitimate purposes for which people acquire handguns.

The climate of crime and violence that we

The climate of crime and violence that we are experiencing in this country has caused a lot of concerned people to buy handguns

and learn how to use them for self-defense. I think it is pretty obvious that the police cannot protect all of the people all of the time. People must have a way to protect themselves, and the acquisition of a handgun is one of the simplest means of accomplishing that objective.

Question. But any way you look at it, handguns are made and sold for one purpose: to kill human beings. Why not put limits on their availability? Why this obsession with the "right" to bear arms?

SNYDER. Often the mere presence of a handgun in the possession of a law abiding citizen is enough to deter a criminal. As I pointed out before, there are also other legitimate uses for handguns. As a matter of fact, many of the most valuable handguns monetarily are those that are made for competitive shooting, including Olympic competition. It's a fallacy to argue or state that handguns have only one purpose, to kill. Their chief purpose, I believe, is to save life; to protect oneself from criminal attack.

Any limits on the availability of handguns should be placed on their availability to criminals. The best way to do that is by placing mandatory minimum penalties on the use of handguns in felonious acts of violence. But I don't think the limitation should be general. You're taking the position that anyone and everyone who wants a handgun is a criminal. The right to keep a gun for self-protection is in many cases concomitant with the ability to protect one's life. So the interest in the right to keep and bear arms is not an obsession.

Question. You told Congressional Quarterly recently that the gun is a symbol of freedom and that it has more significance to many people than a job. You don't call that an obsession?

SNYDER. Not at all. An obsession is an interest in one aspect of life to the exclusion of all others. For many people, their job is not an all-consuming interest in life. I have to believe that more men and women have a greater interest in their spouses than they do in their jobs. In that context, keeping a firearm for protection is more important than a job because it is the means by which one can protect their loved ones.

Question. Do you seriously believe that your right to possess handguns should take precedence over someone else's right not to

be gunned down in the street?

SNYDER. That's a loaded question. I believe that the right to possess handguns is necessary in order to prevent one from being gunned down in the street. The two issues should not be posited as antitheses, but rather as concomitants.

Question. New Right conservatives are the first to defend the right of life for the unborn and are willing to impose government controls on abortions. But when it comes to protecting the lives of individual citizens through gun control, they seem to adopt a "pro-choice" attitude and insist on their "rights." How do you grapple with this philosophical inconsistency?

SNYDER. It's not a philosophical inconsistency at all. The right to life is the paramount right. It is a right given to us by God. It precedes any grant of privilege by any government. In order to maintain the right to life one must have the capability under certain circumstances to protect one's life against those who would illegitimately try to take it away. In other words, if you deny the means to protect life, you deny the right to life.

Question. Gun advocates claim controls won't work. Isn't it a fact, though, that in

Japan where laws make it almost impossible to get guns, the kill rate is 200 times lower than in the United States, where 10,000 people a year die by the gun?

SNYDER. In Japan the conquering army of the United States under General MacArthur disarmed the citizenry. I would hope that the gun control advocates do not seriously believe that we should regard ourselves as a conquered people. But there are countries that have strict gun laws and high homocide rates—some of which are much higher than the United States. I'm talking of Mexico, which the gun control advocates usually don't like to mention because it has strict controls on firearms. There the homocide rate is 22.1 per 100,000, whereas in the United States the rate is 9.7 per 100,000.

Question. Wait a minute. You say "homocide rate." Shouldn't you differentiate that from deaths caused specifically by handgun violence?

SNYDER. What difference would that make to the victims? What difference does it make to a dead person whether he's been stabbed to death or shot to death?

Question. It makes a lot of difference. You're distorting statistics to bolster your argument against gun control.

SNYDER. Are we talking about preventing homocide or merely preventing gun owner-ship?

Question. C'mon, you know what we're talking about. We're talking about preventing homocide and violent crimes using hand-

SNYDER. The real issue here is the prevention of crime per se. As I said, it makes little difference to a dead person whether he's been stabbed to death or shot to death. The interest on our part is in preventing homocide—period. So when I cite the example of Mexico, which has strong gun controls but a homocide rate three times higher than that of the U.S., I'm using it to show that the imposition of strict gun control laws is not something which can be correlated with a homocide rate. My interest is in preventing homocides and I point to Mexico to show that gun control laws don't necessarily prevent homicides.

Question. With the killing of John Lennon in New York and the attempted slayings of Ronald Reagan and Pope John Paul, the nation again expressed shock and outrage as it has so many times before. Until handguns are eliminated altogether, won't we eventually lose all sensitivity to such violence?

SNYDER. It's interesting that you should bring up the case of Pope John Paul II, one of the great religious leaders of our time. It brings to mind the Biblical story of the first murder, when Cain killed Abel. This was thousands and thousands of years before gun powder was even discovered. So obviously homocide is something which preexisted firearms. The argument that sensitivity to violence will increase as the number of handguns are decreased simply doesn't make sense. It's the guy who pulls the trigger on unsuspecting victims who is insensitive to violence. That's the guy who should be dealt with, not the inanimate object.

Question. Cheap crimes by cheap criminals with cheap handguns. Is this the kind of image of America that your organization has come to tolerate? What has to happen before you become outraged too?

SNYDER. I'm outraged by violence period, whether it's committed with handguns or anything else. But my outrage is directed against the perpetrators of violence and not at the instruments with which such acts are

criminal acts.

GOLDEN DOOR AWARD

HON. FRANK GUARINI

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

The gun control advocates are inadvertently contributing to a climate favorable to crime. The only people who obey gun laws are the law abiding citizens. A criminal bent on murder or theft certainly won't think twice about disobeying laws limiting the possession of firearms. Thus, the effect of gun control would limit the availability of firearms to law abiding citizens who would become even more helpless against criminals.

committed. The gun control advocates, if

they are sincere about reducing crime, will

begin to direct their outrage at the crimi-

nals and not at the mere possession of hand-

guns by people who use them to prevent

Question. Every publicized shooting revives the debate about gun control without bringing the two sides closer together. Is there no room for compromise, or is the safety of every American citizens just not that important?

SNYDER. There is room for compromise, provided the gun control advocates surrender. Without that there will be no compromise because the right to keep and bear arms is concomitant with the right to life itself. There is absolutely no way we are ever going to give up arguing for that right. There's no room for compromise on so basic an issue.

Question. Progress in reducing handgun violence would almost certainly require aggressive police methods, undercover operations, and other techniques that would trample on the civil rights of all of us. Isn't gun control the lesser of two evils?

SNYDER. That's another loaded question because the lesser of two evils is still an evil. To be effective any gun control law would jeopardize the rights of law abiding citizens against unreasonable searches and seizures.

Question. Isn't the reluctance of elected public officials to do anything about either gun control or to stiffen the penalties for violent crimes nothing less than an abdication of their moral responsibilities?

SNYDER. I can't comment on the morality of individual legislators. I don't know what their motives are. But I would way that they do have a responsibility to penalize violent criminals and to make punishment swift and sure. Until we really sock it to these criminals, I don't think we can ever stop this outrageous groundswell of violent crime. Our public officials have a moral responsibility to address this issue and to address it promptly.

Question. Finally, what is the status of gun conrol legislation on Capitol Hill? Does the election of Ronald Reagan and a GOP Senate put the lid on controls for the foreseeable future?

SNYDER. The climate for the repeal of existing federal firearms legislation is warmer now than it's ever been in the last 13 years. The McClure-Volkmer bill would eliminate certain of the more onerous provisions of the gun control act of 1968. It has been endorsed by the Reagan administration and has wide support in both the House and Senate. It has a good chance for passage sometime during the 97th Congress.

• Mr. GUARINI. Mr. Speaker, I am honored today to present for the edification of my colleagues here in the House of Representatives a report of an outstanding event, sponsored by the International Institute, which has taken place at St. Peter's College in Jersey City, N.J.

The International Institute is an organization in Jersey City, more than 60 years old, which has dedicated itself to assisting newcomers to the United States adjust to the American way of

Indeed, this group has a record of outstanding service, helping tens of thousands of individuals enter the mainstream of our society, many of whom have distinguished themselves in medicine, law, education, nursing, and business. They are a volunteer group which develops programs in immigration assistance, interpreter services, refugee resettlement, and student, ethnic, and cultural awareness.

As a tribute to the tremendous efforts of individual volunteers, the International Institute has established the Ethel Jones Golden Door Award, in honor of one of the founders of this fine group. The coveted Golden Door Award is presented annually to a foreign-born person who has contributed significantly to the betterment of the community. A main stipulation is that the recipient must not only have gained opportunity for himself but must have taken the opportunity of being an American to help others.

On a visit to the Statue of Liberty, which I am proud to say rests in the geographic boundary of my district, but 200 yards off the Jersey City shore, one will find The New Colossus by poet Emma Lazarus engraved on the famous Bartholdi statue, symbol of hope for the millions of immigrants who have come to our shores. This poem provides the inspiration for the Golden Door Award:

Give me your tired, your poor, your huddled masses yearning to breathe free, the wretched refuse of your teeming shore. Send these, the homeless, tempest-tost to me: I lift my lamp beside the golden door.

The award, which was created 3 years ago, was first received by Charles Kreiger, an Austrian-born financier, who rose to become the mayor of Jersey City. Last years's recipient was Mrs. Santa de Gross, who has spent a lifetime of service to others in the development of mental health programs. Born in Tunis, North Africa, of Italian, French, and Jewish ancestry, she was motivated by a problem with one of her family members, and has dedicated her life to helping others in

gratitude for the great blessing of American citizenship she has received.

This year, Melachrine Karagounelis, president of the International Institute, has advised me that a 96-year-old Italian immigrant, Dominick Colonna, of Hudson County, has received the prized Golden Door Award. Grace Bilotti Spinelli, past president of the International Institute, told me that Colonna, a successful businessman, is being honored because he opened his own golden door after landing alone, a virtually penniless immigrant at the age of 18, on the shores of the United States.

Mr. Colonna's hard-working, forward-minded attitude can be summed up in the following passage from the museum at the base of the Statue of Liberty, which states:

Before World War I, the crowded streets of New York's lower east side echoed with the many-tongued cries of pushcart vendors and the squalling of newborn Americans. Life was hard in the teeming, squalid tenements but the immigrant generation endured hardship so that the next generation might enjoy the promise of America. At least there was hope and always the inspiring example of those who had succeeded by self-sacrifice and hard work.

The Jersey Journal, in an excellent article written by Marion Courtney, traces the saga of Mr. Colonna from the day he came to the United States in 1902, landing in Jersey City, to his current status, that of founder and president of the flourishing Colonna Food Products.

After living briefly in Manhattan, Mr. Colonna worked as a barber and with his brother-in-law in an electric business. In 1907, he married the former Grace Di Lena. They made their home in Union City, N.J., and rasied four children. Grace Colonna died in 1939; they would have celebrated their 74th anniversary only days before this award's presentation.

Mr. Colonna entered the food business during World War I in response to the scarcity of certain products. Purchasing cheese wherever he could, he grated and packaged it at home, and sold his goods to the many neighborhood stores in surrounding communities. This later developed into the family grocery operation now operated by Joseph and Leonard, his sons.

Our Golden Door Award recipient feels that it is not yet time to retire, at age 96, and shows up every morning to work. He now lives in Fort Lee with his daughter, Madeline Florio, his sonin-law, and grandhchild. He has six grandhildren and six great-grandchildren.

His contributions have been many. He has touched thousands of immigrants who sought him out as their friend and counselor. His friends point with pride to St. Rocco's Church in Union City, which he helped found. He has given a start to hundreds of

families by providing work in his operation. He has provided financial assistance to countless small businesses, which have always been the lifeblood of our Nation.

Dominick Colonna has worked hard to catch the good within our reach. He is a master of the great art of living because he encourages the golden moment of opportunity. He epitomizes the late John F. Kennedy's message that:

As the iron of the new world is being forged and being readied for molding, our job is to shape it, so far as we can, into the world we want for ourselves and our children and for all men.

I am pleased to join Nino Domingo, chairman of the program, and Alberto Rosiak, Albert Arendas, members, and Nicholas Montaldo, executive director of the International Institute, who have worked so long and hard on this tribute, along with Geraldine Gillio and Grace Schut. Of special significance is the work of Purita Hornilla, who led the Garden State Filipino-American Dance Ensemble in a fine presentation.

Dominick Colonna is a reminder to some within our Nation who have attempted to build walls of social stratification. They are reminded of President Franklin D. Roosevelt's famous message delivered November 4, 1944, in Boston, that:

All of our people all over the country—except the pure-blooded Indians—are immigrants or descendants of immigrants, including even those who came over here on the Mayflower.

Dominick Colonna proves that life gives nothing to man without labor.

God has blessed Dominick Colonna and has also blessed us by sending Dominick to America. May he enjoy good health for many years to come.

A SALUTE TO MARYLAND PUBLIC SERVANT, JO-ANN OR-LINSKY

HON. STENY H. HOYER

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES
Tuesday, August 4, 1981

 Mr. HOYER. Mr. Speaker, I would like to take the opportunity to recognize the achievements of one of Maryland's leading public servants, Jo-Ann

Orlinsky of Baltimore City.

Mrs. Orlinsky's 2-year term as chairperson of the Maryland Commission for Women has just recently ended, as well as her 7-year tenure on the commission, and her friends, colleagues and fellow commissioners will be gathering in Baltimore on August 5, 1981, to honor her many achievements. Unfortunately, I will not be able to attend, which I deeply regret, since my association with Jo-Ann goes back many, many years. I have been privileged to work with Jo-Ann and her

husband, Walter S. Orlinsky, the distinguished president of the Baltimore City Council, in the Democratic politics of our State for much of the past two decades.

A graduate of Mount Holyoke College, Jo-Ann Orlinsky has been associated with and served as an invaluable adviser to numerous government officials. She began her career as a special assistant to former Maryland Senator Joe Tydings, and is presently executive assistant to the commissioner of the Maryland Division of Labor and Industry. However, in her ceaseless volunteer efforts she has had a most dramatic impact in our State, and it is for these numerous and varied activities that she is this week being honored.

In the mid-1970's Jo-Ann served as the first chairperson of Women Together, a coalition of 23 Baltimore metropolitan area women's organizations representing more than 20,000 women. Because of her knowledge and leadership of women's rights in 1974, the Governor of Maryland appointed Jo-Ann Orlinksy to what was then known as the Maryland Commission

on the Status of Women.

In her work on the commission, Jo-Ann has been a tremendously effective advocate of strengthened laws relating to crimes of rape and sexual assault. On the commission she chaired the central assault task force, the rape task force, the rape coalition and the rape coalition conference on legislation. While I was president of the Maryland Senate, and chairman of the general assembly's committee on rape and sexual offenses, I was privileged to work with Jo-Ann on legislative efforts to investigate and reform the State's laws regarding rape and sexaul assault crimes. With her able assistance, the general assembly enacted a comprehensive package of reforms which provide appropriate penalties to the criminal and create a system with greater compassion toward the victim. I believe Maryland's laws in this area are a model for the rest of the Nation. and they would not have been enacted without the significant contribution and dedication of Jo-Ann Orlinsky.

In other work on the commission, Jo-Ann was the guiding force in establishing a State network of sexual assault centers. Maryland's program of centers is far ahead of most other States, and again we have Jo-Ann Or-

linsky to thank.

In the implementation of title IX equal education opportunity programs in our State, Jo-Ann has played an important role as a member of the committee to implement title IX of the Maryland Department of Education. On the Commission for Women she chaired the title IX task force on equal education and women's sports and cochaired the conference for title IX equity.

Certainly Jo-Ann's expertise and leadership ability has been recognized nationally and she currently serves as a board member of the Women's Equity Action League.

Jo-Ann's history of public service does not begin and end with her more than 7 years on the Commission for Women. While it is specifically for her service on the commission that this occasion has been planned, I would be remiss if I did not mention the other contributions Jo-Ann has made to her community and State. In hospitals. homes for the aged, programs for youth activities and children's rights, cultural and religious affairs, indeed in every facet of the Baltimore community, Jo-Ann has made an indelible mark. As you can see, it is with good reason that she has been more than once named "Woman of the Year" by various civic and professional organizations.

Mr. Speaker, I know you would want to join with me in a salute to Jo-Ann Orlinsky for her many achievements, and for her dedication as a true public servant.

FRED J. KROLL

HON. TOM LANTOS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

 Mr. LANTOS. Mr. Speaker, several days ago Fred J. Kroll, one of the outstanding men of our time, died at the age of 45. Fred was elected president of the Brotherhood of Railway, Airline & Steamship Clerks in 1976, when he was only 40. Two years later he was the youngest person in history to be named to the AFL-CIO Executive Council. Time magazine praised him for possessing the sense of boldness that remains the prime prerequisite for leadership, and pointed out his efforts to make the labor movement more attractive for younger workers by encouraging greater initiative at the local level.

As we all seek in the days and years ahead to resolve the difficult social, economic, and collective-bargaining problems that face the country, Fred Kroll's wisdom and leadership will be badly missed.

I would like to place in the RECORD a summary of Fred's unique achievements:

FRED J. KROLL, 1935-1981

A courageously-fought five-year battle with leukemia ended on July 30, 1981 when BRAC International President Fred J. Kroll died at the age of 45.

Death came in a Philadelphia hospital where he had been undergoing treatment and where, characteristically, he continued to chart the union's course and to develop programs and strategies for future collective bargaining and legislative campaigns.

Kroll first became president of BRAC in 1976 when he was chosen by the union's Executive Council to complete an unexpired term of office. He was reelected president by acclamation at BRAC's 1979 Toronto Convention.

When he was elected a member of the AFL-CIO's Executive Council in 1978, he became the youngest person ever to be named a federation vice president.

Assuming a leadership position within the ranks of rail labor, Kroll was elected chairman of the Railway Labor Executive's Association in February 1980. Composed of leaders of 20 unions with membership in the railroad industry, the RLEA is a policymaking group dealing with legislative and regulatory issues involving railway workers and the industry of which they are a vital part.

EARLY CAREER

No stranger to literally thousands of BRAC members, Kroll was an active and dedicated member of the Brotherhood for 28 years.

Born in Philadelphia, Pennsylvania on October 29, 1935, he came from a trade union family. His father was a long-time member of the International Union of Electrical,

Radio and Machine Workers.

BRAC's leader launched his rail career in 1953 as an IBM machine operator on the former Pennsylvania Railroad. Quickly becoming involved in Quaker City Lodge 587, he served as vice president, president, and local chairman.

In 1970, he was elected general secretarytreasurer of the Penn-Central System Board. The next year he was elected general chairman.

Unanimously returned to office as general chairman in 1973, he continued to head BRAC's largest system board until January 1975 when the Executive Council elected him an international vice president. He was reelected at the union's May 1975 Convention in Washington D.C.

tion in Washington, D.C.

During the period of his general chairmanship and later his vice presidency, his leadership abilities were successfully tested while meeting the challenge of protecting workers' rights when the northeast railroads (including the giant Penn-Central) plunged into bankruptcy. He played a key role in shaping the legislation that led to the creation of Conrail.

From his earliest days as a trade unionist, Kroll was widely recognized as a skilled and

determined negotiator.

An equally skilled and forceful spokesman on behalf of his own members and all of rall labor, Kroll spearheaded the April 29 Rail Labor Rally in Washington that drew 20,000 railroaders to protest the Reagan Administration's budget-cutting policies with regard to Conrail and Amtrak. Throughout March and April, he worked tirelessly in testifying before Congress to urge restoration of adequate funding for both railroads.

And, shortly before his death, congressional conferees adopted legislation to insure the continuation of Conrail and Amtrak and to provide a solution to the financially alling Railroad Retirement

System.

FROM "REASONABLE MILITANT" TO "MAVERICK LEADER"

Once describing himself as a "reasonable militant," Kroll quickly captured the attention of the media after his election as BRAC president and was frequently profiled in major news magazines and newspapers.

The Norfolk and Western strike, which he launched in July 1978 and which lasted for

82 days, tested his mettle, and his masterful handling of it led to the eventual elimination of both the rail industry's mutual aid pact and one existing in the airline industry. Business Week magazine called him "the maverick leader who bested the N&W."

Kroll himself described that precedentsetting strike as one that "let the railroads know we are an aggressive union, that we mean business and that we have the support of our people."

A cover story in the August 1979 issue of Time magazine on "Fifty Faces for the Future" cited BRAC's president as one of those who possessed "the sense of boldness that remains the prime prerequisite for leadership." The article described Kroll's efforts to make the labor movement more attractive for younger workers by encouraging greater initiative at the local level.

As Next magazine phrased it in an April 1981 profile, Fred J. Kroll was one of the "five-score Americans who has the potential to achieve substantial power over the minds and lives of their fellow citizens during this decade."

That potential ended tragically on July 30, 1981, but his legacy of bold leadership and dedication to economic justice and dignity for workers will endure.

A devoted family man, he leaves his wife Hildegarde; three daughters—Karen, Anita, and Michele; his parents—Fred and Catherine; and three brothers—Albert, John, and Losenh

In lieu of flowers, the family requests that contributions be made to the Herbert L. Orlowitz Institute for Cancer and Blood Diseases, Hahnemann Medical College and Hospital, 230 North Broad Street, Philadelphia, Pennsylvania 19102.

GOLD STANDARD SUPPORT

HON. JIM JEFFRIES

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. JEFFRIES. Mr. Speaker, even before the dust has settled over the recent budget and tax cut votes, many are saying the economy cannot be turned around until the United States returns to the gold standard. I concur with this analysis as the 10-year experiment with an unbacked paper currency has been disastrous. The president is moving the country in the direction of slower monetary growth, reduced Federal spending increases, and true tax cuts. But an important ingredient in this recipe for economic growth is a gold-based currency.

History has proven that irredeemable paper has almost always been accompanied by soaring inflation, unbalanced budgets, and high-interest rates. On the other hand, during most times in our history when the dollar was backed by gold, we have seen reasonable price stability, balanced budgets, and affordable interest rates. Since severing the tie of the American dollar with gold, the debasement of the dollar has accelerated, with both the money supply and prices doubling in the last 10 years.

Obviously, gold is not the only currency which can be used by a free society. But it has served as the chief instrument of exchange throughout history because its value does not depend upon the whims of government. It is scarce, transportable, and impossible to counterfeit. On the contrary, the worth of paper money is dependent upon the promises made by government, and it is too easy to reproduce when in short supply.

I look forward to the Gold Commission's report in October and future congressional hearings on the subject. The return to the gold standard must be considered if our economy is to get back on the right track.

SUGGESTIONS FOR A BETTER FOOD STAMP PROGRAM

HON. NEWT GINGRICH

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. GINGRICH. Mr. Speaker, there are features—such as useless regulations—that hamper the efficiency of the food stamp program. James M. Huddleston, director of the division of family and children services of the Georgia Department of Human Resources offers an interesting commentary on the inequities of the food stamp program. The food stamp program must be returned to its original purpose: To provide nourishing food for the truly needy. I would like to share his letter with my colleagues:

DEAR NEWT: The workers and myself in this office, the Division of Family and Children Services, object to some features of the food stamp program with perhaps most of them being regulations.

In the case of Aid to Dependent Children, the parent must register for work when the youngest child reaches six, but it is not required in food stamps until the youngest child reaches 12. Of all the clients who are required to be referred to the Labor Department, only about 20% apply. We cannot deny them benefits until we contact them to find out if they have a good excuse, as everybody does, and refer them a second time.

We are not allowed to prosecute in the case of food stamps until there is an administrative hearing or court has ruled that it is fraud. Since this policy was instituted, we have yet to have the first administrative hearing.

A client can report no income and receive the total allotment of food stamps. The person no longer has to prove how they are paying other expenses such as rent, house payment or utilities. They can simply say somebody loaned them the money or is paying it for them.

An applicant can apply for food stamps on April 30th and if qualified, we must issue stamps for April and May. They have already survived the month of April, and they are not allowed to pay off a grocery bill using the stamps. We feel this is unnecessary.

An applicant can have a reserve of \$1,500 in the bank, and if they meet the Federal regulations on expedited services we must issue stamps within two days which sometimes does not give adequate time to check all the facts. We felt it was better when the local office was allowed to determine cases which were emergency and issue stamps in an expedited manner.

Under regulations it is permissable for a recipient of food stamps to refuse to work more than 30 hours per week, if by working more than 30 they would become disquali-

fied from receiving stamps.

If husband and wife had a child under 18 and one is working, the other cannot be forced to accept employment. If the wife could earn \$125.00 per week working and the man had a skill paying \$500 per week, they could elect for her to work, and there is no requirement that he be required to work.

These are some of the objections we have to the program. We feel if these inequities were corrected, benefits might be more reasonable to those who are in need and qualify. I am not restricting this information, but you understand I am not agitating opposition to whatever our state officials thoughts may be in the matter.

Sincerely,

JAMES M. HUDDLESTON,

Director III.

REAGAN ADMINISTRA-THE TION'S RACIST ABANDONMENT OF HUMAN AND CIVIL RIGHTS

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. OTTINGER. Mr. Speaker, I am including in today's Record two articles which recently appeared in the New York Times and which clearly reveal the Reagan administration's racist attitude, opposed to human rights abroad and civil rights at home.

The first piece, written by James R. Hanson, concerns Mr. Lee Moon Young who is imprisoned in South Korea. Mr. Lee has been beaten so severely that he cannot raise his arms, he is plagued with frostbite, and he is condemned to solitary confinement all for expressing his views freely. Yet the administration studiously has refused to seek to prevent the brutal human rights abuses perpetrated by the regime of Chun Doo Hwan.

"Looking back at United States involvement," notes Mr. Hanson in his article, "I think that the Soviet Union has succeeded in stripping us of our principles, for which we have substi-tuted an inverted ideology under which we bind ourselves to dictatorships throughout the world." Clearly this is the inverted ideology which the President is pursuing, as enunciated in Ambassador Kirkpatrick's ludicrous theory on "benevolent tyrannies."

The administration is not against human rights abroad, it opposes civil rights at home. This is made clear in another article which I EXTENSIONS OF REMARKS

am including in today's RECORD, by Robert Plotkin, former chief of the special litigation section of the Justice Department's Civil Rights Division. Mr. Plotkin protests the Reagan administration's attempt to turn back the clock on civil rights, and thus turn its back on millions of Americans.

I am appalled at efforts by the administration to replace principled civil rights policy with political gamesmanship. Indeed, as this article points out, not only has the Justice Department moved away from vigorous enforcement of civil rights laws, but in some instances it has purposely manipulated the legal process in order to abandon the country's commitment to civil rights. This reflects the administration's deep-seated hostility toward the laws that protect minorities and

handicapped persons.

President Reagan claims that he is undecided about extending the Voting Rights Act of 1965. Recent hearings in the House Judiciary Committee demonstrated that our country has a long way to go before the rights of every citizen are guaranteed. Tactics which obstruct minorities from voting are still employed in some localities. In the face of these attempts to deny some Americans their most fundamental rights, the administration should be unwavering in its commitment to enforcing civil rights laws. Yet, as Mr. Plotkin states in his article: "* * * In a government otherwise tickled by its own ability to seem bold and imaginative, the lack of a coherent civil rights policy is ominous. It masks an antipathy toward civil rights that stretches far beyond particular disputes about effective remedies for discrimination."

Mr. Speaker, I commend both of these important articles to the atten-

tion of my colleagues:

INJUSTICE DEPARTMENT

(By Robert Plotkin)

Washington.-President Reagan may be undecided about extending the Voting Rights Act of 1965, perhaps the most important civil rights legislation in United States history. But Justice Department policy across the entire spectrum of civil rights issues reveals a deep-seated hostility toward the laws that protect minorities and handicapped persons.

Attorney General William French Smith has already promised that the Justice Department will not pursue busing orders in school-desegregation cases, that it will not seek the imposition of numerical quotas to correct employment discrimination, and that it will not impose "onerous" standards upon state and local prisons to correct conditions that violate inmates' rights.

The Attorney General has not said how ever, what the Reagan Administration will do in these and similar cases. This silence is not simply the pause of indecision. Indeed, in a Government otherwise tickled by its own ability to seem bold and imaginative, the lack of a coherent civil rights policy is ominous. It masks an antipathy toward civil rights that stretches far beyond particular disputes about effective remedies for discrimination.

This Administration sees civil rights laws as imposing unnecessary regulatory and economic burdens on society, and would like nothing better than ultimately to replace today's tough laws with toothless "tigers." The debate about the voting legislation is simply the opening round in a bout that is sure to go the distance.

Principled civil rights policy-making at the Justice Department has been replaced by the political gamesmanship of Deputy Attorney General Edward C. Schmults. Allies of the new Administration have learned quickly that a telephone call to Mr. Schmults will achieve favorable results and bypass the lawyers of the Civil Rights Division, whom their new bosses see as subver-

sive "liberals."

For example, Senator Jeremiah Denton, Alabama Republican, recently called Mr. Schmults to complain about language that he found objectionable in a legal document filed by the Civil Rights Division in a voting case against the city of Mobile, Ala. Within 24 hours, an amended pleading had been filed at Mr. Schmults's personal direction, removing the offending words. Although the legal significance of the change was inconsequential, its political message was clear: The Civil Rights Division is under control.

The "Denton maneuver" was also executed by the Governor of Texas, William P. Clements. Complaining about a successful prison-conditions suit brought in district court by the Civil Rights Division, Governor Clements wrote to the Attorney General that the court's decision would cost Texas "billions of dollars" to implement, pointed out that "it makes good political sense" for the department to reconsider its position. The letter was referred to Deputy Attorney General Schmults, who agreed to review the case and wrote to the Federal District Court for the Southern District of Texas asking it to delay further orders. To its credit, the court refused to delay again the eight-year-old controversy, but Mr. Schmults's promised review will continue while the case is on appeal.

Similarly, in a discrimination suit against North Carolina's college system, the Department of Education, without consulting the Civil Rights Division lawyers responsible, negotiated a settlement that failed to resolve important issues in the case. When those attorneys refused to sign the agreement, Mr. Schmults reassigned the case to another division and ordered the compro-

mise to be filed.

The Administration has publicly denied that the Justice Department has moved away from vigorous enforcement of the civil rights laws. Labeling the new course as a "change of focus," Attorney General Smith has promised minority groups that he intends to seek more "innovative and practical approaches" to achieve racial equality.

Significantly, not a single Reagan appointee at the Justice Department has any background in civil rights. Not a single appointee is a member of a racial minority. No special "task force" exists to study controversial civil rights problems, although the Attorney General has made much ado about other task forces he has created, such as the one on violent crime.

If we are to believe that creative new solutions will replace the supposedly outmoded policies of the past, who will devise them? And when?

It is remarkable that the Reagan Administration continues to refuse to admit that the era of civil rights enforcement is dead.

This refusal, obscured as indecision, deprives concerned citizens of their right to publicly debate the matter. It also assumes that public dissatisfaction with busing equals rejection of racial equality. The Administration is not only turning back the clock, it is also turning its back on millions of Americans.

A Korean In Prison (By James R. Hanson)

COLUMBUS, OHIO.—A friend of mine, a law professor in South Korea, was arrested last year, imprisoned, and beaten so severely that he could not raise his arms. He was in solitary confinement; last winter in his cell he suffered frostbite on his face and on an ear. He can contemplate spending next winter in the contemplate spending next

winter in the same prison.

I have great respect for this man and his courage, and his grasp of the simple, central principle that to live, one must give his life.

He is Lee Moon Young. In 1952, he was in the South Korean Army; I in the United States Army. I helped him find a school and

a sponsor in the United States.

He was at the University of Michigan when I began law practice in Ann Arbor. My first assigned case was that of a black youth charged with wrongfully entering an automobile. His family and friends didn't have the \$250 for bond; attorneys were forbidden to put up bail. When Moon Young heard of it, he insisted on providing the money, despite the fact that he was skipping breakfast to economize. In his soft, halting English, he told me he could not understand how a person could be kept in prison for not having \$250.

Last year, impatient with the Carter Administration, I wrote the President about my friend's situation, enclosing a check for \$250 as "the least I could do for Moon

Young."

A White House aide undramatized my gesture by returning the check, admonishing me that it was against the President's policy to accept money. I sent the \$250 to the American Friends Service Committee toward its campaign to save the opposition leader Kim Dae Jung from execution.

It was his association with Mr. Kim that got Moon Young in prison. He was quoted as having told Mr. Kim that he was not interested in political office but that he would advise him.

He was in prison before, when Park Chung Hee was President. He had ample opportunity to leave South Korea. When he was in Ohio a few years ago, he told me that he expected persecution, "even death"—the words startled me then, and now ring in my ears. He was removed from his professorship at Korea University. That didn't silence him, so he was imprisoned. He and others were released when Chun Doo Hwan took office. They were arrested by General Chun in May 1980.

When Mr. Kim's life was spared in this year's "amnesty," the sentences of Moon Young and some others were reduced from 20 years to 15. One gets the feeling that the chapter, and the book, are closed. The last letter to me from the State Department, in May, declared that the department does "not believe it either appropriate or productive for the U.S. to intervene." The American news media have turned to other subjects. Koreans feel abandoned.

We hear little from South Korea because of total censorship of press and mail, and the effectiveness of the Korean Central Intelligence Agency, even in this country. The full-page ads purchased by American Koreans welcoming President Chun in February were a tribute to the K.C.I.A.

Moon Young's wife held a prayer meeting recently for wives and friends of the prisoners, and for this spent four days in jail. She gets to go to island jail once a month for a 10-minute view of Moon Young through a double glass. He is not allowed to speak of conditions, but once he told her it was good to see light! Those who have seen the prisoners say that some still bear scars from last winter's frostbite.

I went to South Korea in 1952 with ideals like Moon Young's. We spent our time there, and a goodly number spent their life's blood, to save Southeast Asia from Communist rule.

Looking back at United States involvements, I think that the Soviet Union has succeeded in stripping us of our principles, for which we have substituted an inverted ideology under which we bind ourselves to dictatorships throughout the world, I am told this is necessary and that the human cost can't be helped. Be that as it may, it doesn't follow that we should avert our eyes from what is happening on this frontier of liberty, which was established with our blessing and our blood.

At this time of renewed patriotism in America, it is important for us to recognize the quality of the devotion of these men to their ideals, which are the very ones we revere in our Founding Fathers.

COMMUNITY EFFORT IN ARLINGTON

HON. FRANK R. WOLF

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. WOLF. Mr. Speaker, I would like to bring to the attention of my colleagues the following article, "Search and Save' Drive Aims to Reclaim History," which appeared recently in the Arlington Journal. It describes the noble community effort headed by Janet Green, chairman of Arlington County's historical commission, to locate Arlington's records. Once part of the Nation's Capital, Arlington is rich in history which makes this work especially important.

The article follows:

"Search and Save" Drive Aims To Reclaim History

(By Lee Michael Katz)

Once part of the nation's capital, and still home of innumerable political and military leaders, Arlington is rich in history. The problem is, most of it is recorded elsewhere.

"Arlington County has been part of the District. It has been a part of Fairfax. And it's been a part of the city of Alexandria," explains Janet Green, chairman of the county's historical commission. "So its records are dispersed in all directions."

In 1911, Arlington County became an independent government entity, according to historical commission member Michael Pol-

But the county's history began in the early 1600s. And to make up for the more than 300 years Arlington didn't keep its own records, the historical commission is conducting a "search and save" drive in Northern Virginia. It is looking for photographs,

papers or letters that might provide clues to earlier Arlington life.

While county residents are being asked to comb through their attics and family safes, part-time genealogist Pollock aims to search a different written source: gravestones.

By reading the epitaphs in cemeteries with marked graves, Pollock hopes to ferret out information not now available.

Tombstones "can indicate the quality of life at the time," he says.

For example, "a significant number of infant deaths in a two- to three-year period might indicate an epidemic of some sort."

He estimates there are between 40 and 50 cemeteries in Arlington, though "many of them do not have stones."

Pollock and the other commission members, meanwhile, are launching an appeal for the personal archives of noted citizens.

"Many prominent public officials have lived in Arlington," commission chairman Green says. "We want any papers relating to such people as congressmen and senators." According to a commission study, six senators and 33 congressmen live in Arlington.

Chief Justice Warren Burger of the U.S. Supreme Court has been a resident for many years, Green notes. Former President Dwight D. Eisenhower lived in Arlington when he was a general stationed at Fort Myer.

And the Wright Brothers conducted one of the earliest airplane flights at the turn of the century at Fort Myer, Green says.

Further back, Confederate leader Colonel (later General) Robert E. Lee was once master of Arlington in the late 1850s.

And colonial settler John Smith started it all by sailing up the Potomac in 1608 to the area that later became part of Arlington.

Interest in historical research has grown nationwide, Green declares. "I think the future is built on the past and always has been."

ALBERT FRAENKEL: FREE ENTERPRISER OF THE YEAR

HON. W. HENSON MOORE

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. MOORE. Mr. Speaker, we are all familar with the rags-to-riches idea popularized by Horatio Alger. In almost any other country such stories would be labeled fairy tales, but in the United States the right to succeed and prosper is as basic to the foundation of our Nation as the Declaration of Independence itself.

Such opportunity is possible because of our economic system, the free enterprise system.

Like any freedom, however, it is easy to lose sight of its importance until we lose it.

Each year I sponsor in my congressional district a special program, Free Enterprise Week, to remind the citizens in my area of the importance of the free enterprise system and the opportunity we all enjoy through it.

One of the most important aspects of this program is the Free Enterpriser of the Year Award. This is presentSRI CHINMOY

HON. BEVERLY B. BYRON

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Monday, July 27, 1981

This year, the Free Enterpriser of the Year Award was presented to Mr. Albert Fraenkel, owner of Fraenkel Wholesale Furniture Co., of Baton Rouge. Mr. Fraenkel's story is one which serves as an example to us all.

ed to a local individual who has suc-

ceeded through the free enterprise

system. The award recognizes the ac-

complishments of the individual and it

also serves to remind others that such

opportunity still exists. By honoring

such individuals we identify role

models for our young people.

He attended high school in New Orleans, where he was the recipient of the American Legion School Award and the National Honor Society Award. He was a member of Beta Gamma Sigma scholastic fraternity and Kappa Delta Phi leadership fraternity, while attending Tulane University, from which he graduated with a bachelor's degree in business administration in 1947.

Mr. Fraenkel learned the wholesale furniture business while working for the Lester D. Scharff Wholesale Furniture Co. in Shreveport, La. He remained with that company from 1947 to 1959, taking time out for a 2-year tour of duty with the U.S. Navy, during the Korean war.

In February 1959, he opened Fraenkel Wholesale Furniture, in Baton Rouge, with three employees: himself, his wife, Eleanore, and M. L. Stewart. Now that company employs 113 persons and the Baton Rouge facility is currently being remodeled and increased to some 120,000 square feet of showroom, warehouse, and manufacturing space.

The company expanded to Memphis in 1972 and to Atlanta in 1976. Today, it serves over 2,000 retailers in a 12-State area.

Even with the demands of his growing business, Mr. Fraenkel has given unselfishly of himself to his community. He serves on the boards of directors of: Audubon Council of the Girl Scouts of America, Junior Achievement, Baton Rouge Alliance for Good Government, and the Louisiana Association of Business and Industry. He is a member of the board of trustees of the Baton Rouge General Hospital and the advisory board of trustees of the Baton Rouge General Hospital and the advisory board of the Salvation Army. In addition, he is a tireless worker for the Baton Rouge Chamber of Commerce.

Mr. Fraenkel is also currently serving as president of the congregation of Temple B'nai Israel and is past president of the Jewish Welfare Federation of Greater Baton Rouge.

Mr. Speaker. I salute Mr. Albert Fraenkel, Free Enterpriser of the Year for 1981. • Mrs. BYRON. Mr. Speaker, I would like to take this opportunity to briefly acknowledge the accomplishments of a public servant who will be celebrating his 50th birthday on August 27. Sri Chinmoy Kumar Ghosh came to the United States from India 17 years ago. In this period of time he has pursued the twin goals of public service and individual growth through his personal example as well as through the establishment of several nonprofit centers nationwide.

I met Sri Chinmoy last year as a result of our mutual enthusiasm for physical fitness. On this occasion, the gentleman was receiving an award on the steps of the Capitol from the President's Commission on Physical Fitness and Sports. The award was prompted by Sri Chinmoy's efforts in organizing a Nation-crossing bicycle route, a 50-State relay run in honor of the bicentennial, as well as his sponsorship of running events, tennis tournaments, and lectures.

Supporters and friends of Sri Chinmoy are quick to note that this is merely one interest of this multifaceted achiever. It has been brought to my attention that Sri Chinmoy is an artist, composer, musician, writer, and poet who has been nominated for the Nobel Prize in literature. In addition, he was named chaplain for the 1980 winter Olympic games in Lake Placid and has offered weekly meditations at the United Nations for diplomats and staff for several years.

In closing, I would like to submit Sri Chinmoy's tribute to the hope and promise of America:

SALUTATIONS TO AMERICA

Yesterday America enjoyed the sacred flame of liberty.

Today America enjoys the sacred light of equality.

Tomorrow America shall enjoy the sacred sun of divinity.

America's vision was to become transcendentally great.

America's mission is to become universally good.

The spirit of the past was the discovery of inner adamantine will to fight against bondage. The present spirit is the aspiration for God-manifestation plus the aspiration to become humanity's brother, humanity's selfless lover and divinity's constant server.

There are two special qualities that Americans can work on to help bring forward all their potential divinity. These two divine qualities are the feeling of universal oneness and constant and cheerful self-giving to the Supreme Pilot, who is man's own highest Reality.

American citizens can learn to love their country more by realizing the supreme fact that there is no difference between true love of one's country and true love of God.

One's country is nothing short of God's concentrated creation.

America gained her independence two hundred years ago by virtue of her determined will power. Now her spiritual independence will be founded upon her conscious oneness with God, and this can be established only on the strength of her implicit surrender to God's divine Dispensation and Will.

In a freedom-loving country patriotism is a conscious prayer, a conscious concentrated force to spread freedom so that the country can achieve and distribute love-light to each of its countrymen and to the world at large.—SRI CHINMOY.

H.R. 4144—ENERGY AND WATER DEVELOPMENT APPROPRIA-TIONS BILL

HON. DOUG WALGREN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. WALGREN. Mr. Speaker, on July 23 and 24, I cast several votes to bring the Federal budget under control and which question several wasteful Federal expenditures. I opposed several large construction projects that I believe are not only questionable on their merits, but also drain resources from our waterway needs in the Northeast.

In western Pennsylvania and Ohio. we have a network of rivers that must be able to handle growing traffic, particularly heavier barge traffic as the Nation converts to increased coal use and as coal exports grow. A recent Corps of Engineers' national waterways study has reported that of the Nation's 184 principal locks, the average age is 40 years. Many of these locks have been in service for 80 years and are greatly in need of rehabilitation and/or replacement. According to the report, waterborne commerce has tripled since 1947 to 2.1 billion tons a year and will increase to 2.7 billion during the 1979-2003 period. Coal, grain, chemicals, metallic ores and crude petroleum-Alaskan crude-will be the fastest growing commodities.

The economy and jobs of the Northeast are greatly dependent on our ability to move these goods, and we must take some serious steps to make sure our waterways are capable of handling this traffic. Because of these needs, I have a hard time supporting questionable projects like the Tennessee-Tombigbee, the Garrison diversion, and the Clinch River breeder reactor. The rivers of our Nation are a vast network requiring careful planning and coordination among all the interlocking pieces. My region of the country, whose economy so greatly depends on our rivers, must receive our fair share of the Nation's resources. I believe that these three projects, should they go ahead, would proceed at the expense of the waterway needs of the Northeast.

TENNESSEE-TOMBIGBEE UNSOUND

I cannot support construction of the Tennessee-Tombigbee Waterway, at a cost of \$2 billion. The proposed route. connecting Tennessee with the Gulf of Mexico, would parallel two perfectly usable routes, the Mississippi River and an existing rail network. The costs, originally projected to be \$386 million, have now mushroomed to \$3 billion, an inexcusable cost overrun. The General Accounting Office, Congress investigative arm, has concluded that only 20 percent of the benefits projected through 1981 have actually materialized. And at this \$3 billion price tag, there will be no flood control, no improvement in water supplies, and no hydropower benefits. Finally, the legal status of this project is cloudy. On July 13, 1981, the U.S. Court of Appeals for the Fifth Circuit halted construction on the project, saying, "We find no solid evidence that the corps has ever asked the right question, much less answered it reasonably.

GARRISON DIVERSION: MORE PORK BARREL

I also opposed the Garrison diversion irrigation project in North Dakota, to delete \$4 million earmarked for the project for 1982. For this project, the taxpayer would be spending over \$3,300 per acre to be irrigated, \$810,000 per farm. Irrigators are scheduled to repay less than 3 percent of these costs. During these budget-tightening times, I cannot support this tax-free subsidy to a handful of people for a very questionable project.

The Garrison project too has legal problems. In May, a Federal district court judge ruled that construction could not continue prior to congressional reauthorization. Finally, this project is not welcomed by our Canadian friends across the border. In 1977, the International Joint Commission reported that the project would introduce pollution into Canada's waters.

CLINCH RIVER BREEDER: COST OVERRUNS OFF
AND RUNNING

The Clinch River breeder project cannot meet the test of cost-effective Government spending in an effort to make our country energy self-suffi-

In 1973 the project began as a cooperative agreement between a consortium of utilities and the Federal Government. At that time, the utilities agreed to contribute \$257 million or 61 percent of the total expense of \$422 million. Since then, however, the costs have ballooned to a total of \$3.2 billion. As the utility contribution has remained static, the Government share has grown to a point where the taxpayers are now paying 30 times more than what was originally agreed upon.

A graphic example of the cost growth in the Clinch River project is

described in a report recently issued by the Energy and Commerce Subcommittee on Oversight and Investigations. This report points out, among other things, that original plans called for spending \$56 million on 11 generators; yet the first 2 purchased have already cost \$143 million.

Mr. Speaker, during this time of economic trouble we are asking the American public to make sacrifices in the form of reduced services and reduced assistance. It is clearly appropriate that the same budgetary scrutiny and discipline be applied to all Government activities.

If we are going to tighten the Federal spending belt, we must do it in all areas, and make sure that no sacred cow, no boondoggle goes unnoticed. In the area of waterways, we must be especially prudent. These projects are often very expensive and mammoth in scope. We must be especially sure that they are sound and do contribute to restoring the Nation's economic vitality.

SUPPORT FOR THE NATIONAL SCIENCE FOUNDATION

HON, VIC FAZIO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. FAZIO. Mr. Speaker, I wish to state for the record my strong support for the National Science Foundation and for its research programs in the areas of economical, biological, behavioral, and social sciences.

On July 21, 1981, when the House of Representatives was considering H.R. 4034, the Department of Housing and Urban Development and independent agencies appropriations bill for fiscal year 1982, Mr. Winn offered an amendment to reduce the NSF's funding for these programs by \$70 million. I incorrectly voted for this amendment and now wish to clarify my position on this matter.

For the past 3 years, since my arrival in Washington, I have continuously supported the National Science Foundation and have consistently opposed any efforts to cut NSF's budget for research programs.

I firmly believe, that if this Nation is to retain its position as a major industrial and social force throughout the world, we can ill afford to neglect basic essential research programs. We are not talking of frivolous and meaningless activities. We are speaking of indepth studies which go to the core of the problems which plague us as a nation and a society, and which must be resolved if we are to continue to advance. Issues like: the national decline in productivity—causes and solutions; the monumental breakthroughs in technology and society's ability to

adapt and progress; methods of improving innovation in small business; women and minorities in the work force—trends and implications. These are but a few of the social and economic issues that we must fully understand in order to formulate sound and intelligent public policies.

Furthermore, if we are to improve the quality of life, we must increase our understanding of biological and behavioral matters. But this is basic research, as opposed to applied research, and must be funded, at least in part, by the Federal Government. We cannot expect the private sector to bear the full cost of such studies, nor would it be in our overall best interest for that to occur. The results of basic research are too unpredictable and require a large investment in time. Private firms cannot afford these risks: but more importantly, the successes are of such enormous consequences that no single firm should be allowed a monopoly on this knowledge. Thus it becomes a necessary and legitimate governmental role to fund biological and behavioral studies. Otherwise, how are we to learn more about what causes abnormalities in behavior and how to address mental and psychological problems? How are we to know what types of widespread behavioral reactions will result from changes in environment, changes in demographics? These are issues that will have a profound effect upon us. Who will conduct these studies if the NSF can no longer award grants to our universities for such?

These institutions of higher education are responsible for 80 percent of the basic research done in this Nation. The men and women who conduct these studies are dedicated to the acquisition and dissemination of knowledge. They must be allowed to continue their vital work without unnecessary restrictions being placed upon them due to unsound budgetary constraints. For this would lead to a diminution of necessary information on which decisions are based. And indeed, without adequate data and indepth analysis on which to decide public policy, we, as Members of Congress who must draw upon these resources, are likely to make the wrong decisions thereby compounding our problems and our costs.

I realize that we are in an era of budgetary restraints and that we must look for areas where we can reduce Federal expenditures. But, we can ill afford to make across the board cuts without looking carefully at the full ramifications of our actions.

I commend the HUD Appropriations Subcommittee on the NSF funding levels contained in H.R. 4034, and I commend the House for overwhelmingly rejecting the efforts to cut funds for NSF's basic research programs. I wish this statement to represent my views on this matter, and to reconfirm my present and future commitment to our Nations research institution.

A SALUTE TO CHARLES V. CARR

HON. LOUIS STOKES

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

. Mr. STOKES. Mr. Speaker, it is a pleasure for me to introduce to my colleagues in the House of Representatives a man of legendary stature in the city of Cleveland-Mr. Charles V. Carr. Mr. Carr is a giant of a figure in the city of Cleveland and is a fountain of wisdom for city politicians.

Mr. Speaker, in honor of Charles Carr's 30 years of public service, I think that this is an opportune occasion and forum to salute him with all the dignity he deserves. By this salute, I want Charles V. Carr to know that his services in the past have been appreciated and that he will be remembered forever by people from every walk of life in the Cleveland metropolitan area.

Mr. Speaker, even though Charles Carr normally shuns such praise, he is, in fact, a legend amongst the citizens and politicians in Cleveland. One only needs to reflect on the positive deeds and continuous service to the community during Charles V. Carr's life to see what an important and priceless person he has been to the city of Cleveland.

Mr. Speaker, Charles Carr had the longest running career in the Cleveland City Council when he left that body in 1975. He was a wizard of city administration and particularly city finances. He also was the first black elected to a city council leadership position when he served as the council's majority leader. Currently, he is one of the senior members of the 10member Regional Transit Authority board and perhaps the most respected

member of that body.
In addition, Mr. Speaker, he has been the confidant of many politicians in the city of Cleveland. My brother, former Mayor Carl B. Stokes, relied on his advice and political wisdom often during his tenure. The current city council President George Forbes also has a great deal of respect for Charles Carr's opinion and advice.

Mr. Speaker, Mr. Charles V. Carr has been characterized by some as having a computerlike mind and being a shrewd politician. That is the absolute truth. However, I would like to add that Charles V. Carr also is a man who throughout his career has dedicated himself totally and unselfishly to working on behalf of the city and its people. He did that on city council. Even today, he continues to display those same commendable qualities as a member of the Regional Transit Authority board.

It is exactly this dedication and lovalty which has made Charles V. Carr a legend among the politically powerful and the electorate. At the same time, this dedication and commitment for the people has kept him alive and alert

At this time, Mr. Speaker, I take this opportunity to thank Charles V. Carr for his service on behalf of all those people in Cleveland who have benefited from his wisdom and work. I ask my colleagues to join me in saluting Charles V. Carr. At this time. I am inserting in the RECORD an article which appeared in the Cleveland Plain Dealer on Charles V. Carr.

[From the Plain Dealer, May 25, 1981] OLD FOX STILL SLY

(By Brent Larkin)

He is kept alive by a tiny pacemaker which steers the heart on a proper course. The hearing is fading, and what was once a walk is a slow shuffle.

The years have taken their toll on the man referred to as the old fox. The hospital stays are becoming more frequent, the public appearances few and far between. In view of these physical limitations, it would seem that, at 77, Charles V. Carr is perhaps a mere shadow of his former self.

But like the old story about judging a book by its cover, those still granted the rare opportunity of watching Carr in action marvel at the shrewd, computer-like mind which functions beneath the surface.

As one of the senior members of the Regional Transit Authority (RTA) board, Carr is perhaps the most respected of the 10member panel.

"When he is up to par physically, Charlie is always the one who puts things into proper perspective, and the rest of the board members seem to fall right into line behind him," said one high-ranking RTA official. "When the chips are down, he's the best."

Further testimony to Carr's RTA wizardry came from old friend, Council President George L. Forbes, D-20.

"Leonard Ronis (RTA general manager) told me Charlie Carr is the most talented member of the board," said Forbes. "He knows finances backward and forward. He's slowed down physically, but mentally he's as sharp as ever.

But Carr shrugged off such praise as unnecessary flattery. "I just try to keep up with the younger members of the board," he said. "Public service is something that's in my blood-or what's left of my blood.'

It has been nearly six years since a young upstart named Lonnie L. Burten sent shockwaves through Cleveland political careers by drawing the final curtain on the longestrunning career in City Council history.
Over a 30-year period, Charlie Carr

became an institution in council, representing the near East Side's Ward 12. Having ousted W. O. Walker from the council seat in 1945. Carr proceeded to serve 15 uninterrupted terms before being unseated in 1975.

Through the years, Carr earned the reputation in council as the master of city finances. He was a trusted adviser to former Council President Jack P. Russell, former Mayor Carl B. Stokes and to Forbes. He served a brief stint as council majority leader, the first black to be elected to a council leadership position.

Yet, away from City Hall, Carr was continuously haunted by rumors of involve-ment in illegal numbers betting. In 1948, his house was bombed during what police officials described at the time as part of a war among rival numbers factions, and rumors about Carr persisted for so long that they became accepted fact.

Carr shrugged off the numbers talk as gossip and the frustration of law enforcement officials who spent years attempting to prove his involvement in illegal gambling. But the closest they came was in 1975, when a federal court jury found Carr innocent of evading \$74,000 in income taxes. It was soon thereafter that the voters sent Carr into retirement, and Forbes rewarded him with a seat on the RTA board.

Today, Carr said he devotes all his working hours to RTA and the board of directors of a Chicago insurance company on which he serves. But he keeps a close watch on city politics through conversations with old friends. Of city government in 1981, Carr pronounced Mayor George V. Voinovich as unbeatable in this year's election.

"Voinovich is a smart man," he said. "I admire him a lot. He can do no wrong and has a great future.

"Forbes is the shrewdest man I've ever seen in council." said Carr. "He's a magician. He's the greatest I've seen at getting councilmen to do what he wants. They act like trained seals for him.

Carr said that, health permitting, he has no intention of stepping down from the RTA board

'RTA has a bad image, but that's because we've depended too much on the federal government in the past for help and now those funds are being cut back," he said.

One who pays little attention to RTA matters is Stokes. But the former mayor warned that RTA officials would be wise to follow Carr's suggestions, whatever they might be

"I never went wrong by relying on him, and I'm sure the RTA people wouldn't either," said Stokes, "Charlie Carr has seen it all. He knows all the players, and he comes up with the decisions that will work.
"He's the old fox. There's no one

better.".

RUDOLF HESS, POLITICAL PRISONER NO. 1-PART 2

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES Tuesday, August 4, 1981

Mr. McDONALD. Mr. Speaker, I have not yet succeeded in finding any sane explanation of why the United States cannot extricate itself from continued participation in a Soviet atrocity. Last Saturday, on August 1. American troops marched through West Berlin to Spandau Prison. Their mission is a shameful one-to prevent the release of the single 87-year-old inmate who had, on that day, begun his 14,694th consecutive day of captivity. By August 6, that will become a rounder number, 14,700 days.

Rudolf Hess, who flew to Britain hoping to make peace between Britain and Germany, on May 10, 1941, has paid more horribly for that than anyone could have imagined. From that day to this, he has never known freedom. So long as the American Government chooses to comply with Soviet wishes, he will never even be permitted to embrace his wife and son, much less step into freedom.

During this month, then, American troops are participating once more in this Soviet atrocity. We are told that the Soviets would not like to see Hess freed because they would then be deprived of their six-times-a-year parade through West Berlin. Well, perhaps we could allow them to guard a totally empty prison—the absurdity would be no greater than it is now.

Our officials claim to be terribly worried about a "tit for tat," as they put it. We might, that is, have to endure a tit of Soviet retaliation if we inflicted the tat of ending this sickening atrocity.

One might hope that the U.S. Government includes a few people who could think their way around a tit for

On July 31, I placed in the RECORD (pages 19273-19275) part I of a summary of the Hess case. This is part II.

On September 30, 1966, two of the remaining three war criminals in Spandau were released, yet appeals to include Hess as well, and bring to a close this entire episode, fell upon callous Soviet ears.

Thus, on October 1, 1966, Rudolf Hess entered upon a period of unparalleled solitude as the only prisoner in the 600-man prison. From that day until today, four supposedly great nations have continued the ponderous process of keeping an old man imprisoned. Forty years now, and three governments claim to be slaves to the whims of the fourth.

Hardly able to believe it, the Hess family and its lawyer, Dr. Albert Seidl, embarked upon a campaign to publicize the gratuitous cruelty exhibited by the so-called great powers. Frau Ilse Hess and Wolf Ruediger Hess issued a public statement which was addressed to the Pope, the World Council of Churches, and the United Nations Commission on Human Rights. The text appears below:

STATEMENT BY THE HESS FAMILY, OCTOBER 1, 1966

Frau Ilse Hess and Wolf Ruediger Hess, the only living relatives of Rudolf Hess, erstwhile Reichsminister, make public the following statement, which they have also addressed to His Holiness Paul VI, the Council of World Churches at Geneva, the United Nations Commission on Human Rights at Strasbourg, and the Heads of State of the four custodian powers:

After hoping for many weeks for the release of our husband and father, Rudolf Hess, a possibility which for the first time had left remoteness and approached to within the bounds of possibility, it has today, 1st October, 1966, to our greatest consternation, become certain that he is to

continue to be held in allied custody as a solitary prisoner. We are convinced that this cruel situation, hitherto unknown in the annals of modern law, was neither foreseen nor desired by the Nuremberg Court.

In the verdict it passed on 1st October, 1946, the Court exonerated Rudolf Hess of the charges of war crimes and crimes against humanity brought against him. The only count on which he was found guilty was based on the historical and political accusation that he had aided and abetted the preparations for and the implementation of a war of aggression. During the proceedings, Rudolf Hess withheld comment; we, as his next of kin, decline to put forward any argument.

Even those who acknowledge the verdict of the Court will appreciate the fact that Rudolf Hess hoped, by his act of personal courage in flying alone to Britain during the night of 10th May, 1941, to terminate hostilities. Since that night-more than a quarter of century ago-he has been in custody. It was not the intent of the Nuremberg Court to impose the maximum penalty; that is why he was not sentenced to death. In every civilized country, however, a life sentence is considered to have been duly served after fifteen to twenty-five years, and the practice at Spandau with regard to release has also thus far taken account of humanitarian points of view. Admiral of the Fleet Raeder and Walter Funk, Minister of Economics in Third Reich, both, like Rudolf Hess, sentenced at Nuremberg to imprisonment for life, were returned to their families in 1955 and 1957 respectively to spend the waning years of their life on earth in peace; Baron von Neurath, Minister of Foreign Affairs in the Third Reich, sentenced at Nuremberg to fifteen years, was also prematurely released—in 1954.

What is now about to begin in Spandau, however, in absolute solitude, constitutes, we feel, what is tantamount to a subsequent aggravation of the sentence originally imposed and is perhaps a more dreadful process of extinction even than the executions at Nuremberg—a process exercised on a septuagenarian.

We appeal to every man and woman who thinks humanly to protest against this martyrdom before it ends as it must, unless restrained.

During the next few years, the Hess family obtained statements from many leading British and American participants in the Nuremberg trials who agreed that 25 years in prison was long enough, that in civilized countries a life sentence was considered served in less time than that. Normal human decency says as much, as reflected in the shift of public opinion in favor of Hess.

The best American expression of opinion on this subject which appeared during these early efforts to reach a larger public appeared in Modern Age, a quarterly published by the Intercollegiate Studies Institute of Bryn Mawr, Pa. It reviews Hess' motives and expressly deals with the fact that Hess was not convicted of war crimes or crimes against humanity. Rather, Hess flew to Britain on a peace mission and is the only man in human history to be sentenced to life imprisonment for crimes against the

It is so sad to note that the same editorial could be written today—nothing has changed during the past 12 years—but we do not see the paladins of human rights rising to the occasion at all. Rudolf Hess is surely the most senior political prisoner in the world, yet the humanitarians with access to the mass media ignore him. Perhaps that is because he is not a Communist.

EXCERPTS FROM "THE PRISONER OF SPANDAU," AN EDITORIAL IN MODERN AGE, SPRING 1969 (By Eugene Davidson)

The last of the Nuremberg prisoners and the last man to be the cause of military collaboration by the four powers common deployment has long been limited to Spandau, is Rudolf Hess, the man who flew to Scotland on a self-appointed mission of peace to prevent the two Nordic powers, Britain and Germany, from shedding more of their precious blood. Hess told his British captors he saw unspeakable horrors ahead unless peace were made, he saw long lines of women grieving over the bodies of their uselessly slain in a conflict that was 'suicidal for the white race." Convinced that only a dramatic gesture would bring an end to this civil war of the Germanic brothers he had flown to Britain without Hitler's knowledge but with the conviction that peace would be made if the British would only listen to him .

It is the ambiguities in the search for peace that have been his downfall. For Rudolf Hess is the only man in all history to be sent to prison—in Hess's case the sentence is for life—for having plotted to wage aggressive war and then to have waged it. The decision to make war has hitherto been regarded as an act of state, an impersonal act made on behalf of a government and its people, and it was only the Nuremberg Tribunal that stated this new and retroactive law that sent Hess to Spandau for as long as he lives.

[Hess had] agreed with Haushofer that a victorious Russia would mean the end of the British empire and the triumph of Communism on the continent of Europe. In any event, what Hess yearned for was the collaboration of Britain and the Reich. Germany would get its colonies back, control the continent of Europe, and would help preserve the British empire...

Many people including Goering thought Hitler had secretly sent Hess to Britain so that if the mission failed he could disavow it, and if it succeeded England would at last be out of the war. But this seems an unlikely hypothesis. It was unnecessary for the Fuehrer's deputy to fly to Britain to make contact with British representatives. Switzerland, Spain, Sweden were all used during the war for negotiations between nationals of the warring powers and Hitler had no need to place such high propaganda cards in the hands of the British to make his "peace known. Hitler's propaganda chiefs could not possibly make any capital from the flight, but Churchill could not use it to full advantage either. Hitler was beside himself when he heard the news. Here was his deputy taking off on a private peace mission, a demonstration to all the world of political crack-pottedness in the Third Reich, and this at a time when the preparations for the war with the Soviet Union was going into high gear. "I hope he dives into the ocean," Paul Schmidt, Hitler's chief interpreter, heard Hitler say . . .

Hess was indicted on all four counts of the Nuremberg charges-on the two counts of plotting to wage and waging aggressive warfare and also of committing crimes against humanity and war crimes. On the latter two he was found not guilty but concerning his crimes against peace the Court was stern. Hess' signature appeared on the law of March 16, 1935, establishing compulsory military service, the Court said, and he had known how determined Hitler was to realize his ambitions and how little likely the Fuehrer was to refrain from resorting to force. Also the Court declared that Hess had been an informed and willing participant in the aggressions against Czechoslovakia, and Poland. All this was the dogma of the New Revelation written under pressure of the gaseous notions of a world order to be administered by peace-loving nations; and imaginary order which had already broken down long before the end of the trial.

As for the Court's findings, how could it be criminal for any member of a government (Hess was a Minister in Hitler's Cabinet) to sign a bill establishing compulsory military service when every country in Europe had conscription? How could Hess have been aware of Hitler's belligerent intentions when Hitler himself shifted as opportunity offered from pro-Polish to anti-Polish, from years of denouncing the Soviet Union as the arch enemy to making a pact and even a short-lived military alliance with her? As for the aggression against Austria, the German soldiers were joined by Austrian units in their "flower march" and were received with wild enthusiasm by the rejoicing millions of this most pro-Nazi segment of the Germanic peoples. As for Czechoslovakia, she had been partitioned with the aid of Britain, France, and Italy in as legal a fashion as any nonviolent change of borders in Europe has ever been effected. And as for Poland, almost every serious writer on the subject of Germany's post-Versailles boundaries had said the next war would be likely to originate there in the land of the Corridor and of a Polish state that has existed in modern Europe only when either Russia or Germany or Austria-Hungary were unable to partition her or to bring her in one piece into the Slav or Germanic orbit. In any event Hess had had nothing to do with Hitler's orders to invade.

Aggression like sin may be more readily identified than defined and despite the labors of recent generations of international lawyers its definition still eludes any formulation. It is what the enemy does, it is what those who disturb the status quo do, it is any move made by any power we dislike or fear and above all it is the notion that we can never be safe until the world is moulded in our own image. Hess, the man who flew to England to stop the war, committed no crimes whatever against peace, and it is unlikely that anyone in a position to act on behalf of a sovereign power commits such a crime as a personal indulgence, persuasive as it may seem to equate members of governments with common law breakers. Heads of state and their advisors act for better or worse, mainly it seems for worse, on behalf of their own people. To prepare an invasion of a neighboring country like Cuba, which has intercontinental missiles aimed at the United States supplied by a hostile foreign power, can be regarded either as self-defense or as an act of aggression and any decision as to which it is will depend more on one's ideology than "pure" legality. The Allies who put him in prison have long since

abandoned any notion of bringing post-Nuremberg aggressors to trial . . . Only this extraordinary precedent of the case of Rudolf Hess who flew off to stop the war and so landed in prison for the rest of his life, remains, for a time at least, a living reminder of the mental aberrations of those presumably sane people in high places who were building a world order of law and peace no wider than the Nuremberg courtroom.

In November 1969, Hess fell ill at Spandau, suffering the effects of a perforated ulcer—yet the Kremlindominated Soviet doctor vetoed his removal to the hospital for 5 days. At last Hess was moved to the British military hospital nearest to Spandau, and was successfully treated.

His recovery was slow, however. until a visit from his family was arranged. Hess had not wanted his family to visit him under prison conditions, especially Soviet-imposed Spandau conditions, which involve the physical humiliation of visitors, regardless of age or sex. But, facing the likelihood of dying soon without ever seeing them again, Hess relented and the visit took place on Christmas eve in the British military hospital. Naturally, it was marred as far as possible by the Soviets. The heartless rules they impose mean that Frau Hess. who has been faithful to her husband through the long and often extremely unpleasant years since 1941, has yet to be permitted to touch her husband. Nor has Hess ever been allowed to embrace his son, who he had not then seen since the boy was 3 years old. If the Soviet Government has its way, they will never be able to touch each other.

Actually, it tells us nothing which the experience of tens of millions of other people over the years since 1917 have not tried desperately to tell us about how Communists treat people when they have them helpless.

Because the visit took place at the hospital, there was some journalistic coverage despite the draconian gag rule imposed upon the family. Coming as it did in the holiday season, British and European public opinion was roused to considerable sympathy; 96 percent of Britons polled, in December 1969, favored the release of Hess. Nearly 200 Members of Parliament eventually, over the next few months, braved the slings and arrows reserved for anyone who tries to help any person bearing the Nazi label by signing a statement supporting Hess' right to freedom at long last.

In March of 1970, a discussion of the Hess case took place in the House of Lords. Beneath the various titles of those speaking lay government officials and former intelligence and Foreign Office veterans, nearly all with some first-hand familiarity with the case. Each in turn deplored what was being done to Hess, and most then followed the standard Western excuse for being part of it.

The standard excuse, from that day to this, is that the four-power agreement governing the status of Berlin is incredibly fragile and beyond price. A unilateral transfer or release of Hess, we are told, would bring upon us unnamed horrors which are nowhere laid out in any detail. The evocation of vague, murky, ponderous threats, inevitably left without supporting detail, could lead toward the suspicion that the actual dangers are overdrawn, but are summoned to screen a mere reluctance to shake the status quo.

By the end of 1970, all efforts had come to nothing, because the Soviet Government is not merely impervious to public opinion, both domestic and foreign, but because it serves the interests of political terrorism, the basis of Soviet rule, to be perceived as relentlessly vindictive.

The West German Government can do nothing except to pay the bills. West Germany is not yet a free and sovereign state, because among other things, no free and sovereign state would budget tax money, year after year, for the maintenance of a political prison which it does not control and does not want. But the German people are still required—not by, but through their Government—to pay for Spandau.

Dr. Seidl, the family lawyer, has constantly peppered every possible person or group which could bring influence to bear to end what one critic has called this macabre theatrical performance: The futility of appealing to organizations like the World Council of Churches or Amnesty International or the United Nations High Commission on Human Rights can be imagined, but in this case it has been experienced. The United Nations, by the way, ducked behind the enemy stat clauses, articles 53 and 107, of the United Nations Charter, to maintain that, 35 years after the end of World War II, the winners still have the right to do anything they like to the losers. Those articles were inserted to make certain that none of the idealistic vaporings of the period interfered with the business of vengeance.

Life in Spandau is divided into monthly guard turns, when each country in turn provided the luckless platoon of soldiers who must man the grim brickpile within which a single man is buried alive. The American guard turn is the months of April, August, and December. Each such month represents opportunity to end our own dishonor. We have completed 44 guard turns since Hess has been in solitary at Spandau. Forty-four times our Government has lacked the courage to do the elementally decent thing.

Will August mark the 45th consecutive demonstration of that fundamental failing?

TRIBUTE TO FRED J. KROLL

HON. MARTY RUSSO

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES
Tuesday, August 4, 1981

• Mr. RUSSO. Mr. Speaker, last week the labor movement lost a courageous and dedicated leader with the passing of Fred J. Kroll, international president of the Brotherhood of Railway, Airline & Steamship Clerks, Freight Handlers, Express & Station Employes (BRAC).

Time magazine cited this fine man in its "Fifty Faces for the Future" story in 1979 as one of those who possessed "the sense of boldness that remains the prime prerequisite for leadership." In this instance they were describing Kroll's efforts to make the labor movement more attractive for younger workers by encouraging greater initiative at the local level.

This was only one of Fred's achievements and as an active and conscientious member of the brotherhood for 28 years, his record of such achievements is long and impressive. He played a key role in shaping the legislation that led to the creation of Conrail. He spearheaded the April 29 rail labor rally in Washington opposing the administration's budget-cutting policies with regard to Conrail and Amtrak. Throughout March and April, he worked tirelessly in testifying before Congress urging that adequate funding for the two railroads be restored. And, shortly before his death, congressional conferees adopted legislation to insure the continuation of Conrail and Amtrak and to provide a solution to the financially ailing railroad retirement system.

Fred Kroll was recognized from his earliest days as a trade unionist as a skilled and determined negotiator. The Norfolk & Western strike in 1978 lasted 82 days and led Business Week magazine to call him "the maverick leader who bested the N. & W." Kroll described the precedent-setting strike as one that "let the railroads know we are an aggressive union, that we mean business and that we have the support

of our people."

He first became president of BRAC in 1976 to complete an unexpired term of office and was reelected president by acclamation at BRAC's 1979 Toronto convention. When he was elected a member of the AFL-CIO's executive council in 1978, he became the youngest person ever to be named a federation vice president. Assuming a leadership position within the ranks of rail labor, Kroll was elected chairman of the Railway Labor Executives' Association in February 1980.

It was a relatively short career as president for the Philadelphia-born son from a trade union family. He traveled a long distance from his days as an IBM machine operator of the former Pennsylvania Railroad and active involvement in Quaker City Lodge 587. Along the way he made friends and countless contributions to the lives of union members and strength of the union movement. This man who once described himself as a "reasonable militant" leaves behind a great legacy.

We will miss him. As Next magazine said in its April 1981 profile, Fred J. Kroll was one of the "fivescore Americans who has the potential to achieve substantial power over the minds and lives of their fellow citizens during this decade." The potential ended on July 30. In 45 years he had proven himself a winner in many a battle, but there was one last courageous battle with leukemia he could not win.

I know my colleagues join with me in extending deepest sympathy to his wife Hildegarde, his daughters Karen, Anita, and Michele and his parents Fred and Catherine and brothers Albert, John, and Joseph. Many of us who were privileged to know and work with Fred Kroll share their grief.

DINGELL-JOHNSON SPORT FISH RESTORATION ACT

HON. JOHN BREAUX

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. BREAUX. Mr. Speaker, on March 3, 1981, I introduced legislation at the request of many sport fishing organizations to expand the Dingell-Johnson Sport Fish Restoration Act. That bill is now being considered in the Subcommittee on Fisheries and Wildlife Conservation and the Envi-

ronment, which I chair.

George Reiger, the noted columnist for Field and Stream magazine, has written a thoughtful article on sport fishing in America that highlights many of the problems facing recreational fishing that I commend to my fellow Members' attention.

[From Field & Stream, June 1981] SPORT FISHING IN AMERICA (By George Reiger)

An unprecedented conference on the future of sport fishing in America was held March 4 on Capitol Hill. Its purpose was to elicit the support of the U.S. Congress and the Reagan Administration for an expended Dingell-Johnson Fund that would include a 3 percent tax on the factory price of boats less than 25 feet long (excluding hydroplanes, kayaks, and sailboats), outboard and electric trolling motors, boat trailers, fish finders (including depth sounders and temperature devices), outriggers, downriggers, fishing chairs, rod belts, harnesses, gaffs, nets, and other angling accessories.

The present Dingell-Johnson fund is woefully inadequate in meeting the rising costs of building launch ramps, artificial reefs, and hatcheries; acquiring property and easements for angling access; and conducting

fisheries research and restoration programs. The current 10 percent tax on rods, reels, and terminal tackle does not even cover your fishing line or the tackle box in which you pack your gear!

Thus, while the average American angler spends many hundreds of dollars per year on his recreation, he contributes well under a dollar in taxes specifically ear-marked to improve his angling opportunities and to maintain the resources that make his recreation possible. By comparison, hunters pay between six and ten times as much per capita toward the perpetuation of their sport through the Pittman-Robertson Fund.

More than 100 senators and representatives turned up at the conference, along with Vice President George Bush, who pledged the Administration's support. However, the battle is just beginning. Several leading boat and motor manufacturers are opposed to anything that will increase their products' base price—even though there would be no market at all for their products without wholesome and productive waters to use them on!

Unfortunately, such short-sighted business considerations are not unique to boat and motor manufacturers. Back in the mid-1930's, when the Pittman-Robertson Fund was being created, certain arms and ammunition manufacturers fought like fury against the proposed tax with some of the same kind of arguments that are used by the boat and motor people today.

For example, "The nation is in an economic slump; it's the wrong time to propose another tax." (When is it ever the right

time to propose another tax?!)

Or "why should target shooters have to share the tax burden with hunters?" Today, it's "Why should water skiers have to share the burden with fishermen?"—as though target shooters never hunt and water skiers never fish!

All of the manufacturers who originally fought the Pittman-Robertson Fund now march at the head of the parade extolling its virtues and their part—although manufacturers don't pay the tax; hunters do!—in restoring wildlife in America. Hopefully, boat and motor manufacturers will soon be heading a similar parade on behalf of fisheries restoration.

My job at the conference was keynote speaker, and I began with a thought that had occurred to me the day before on my trip into Washington, D.C. As I drove across the Chesapeake Bay Bridge, I saw a great flock of whistling swans flying north along the Kent Island shoreline. Those birds would be obvious harbingers of spring everywhere they pass on their way up the Susquehanna before bending west to Canada. Migrating swans, geese, and ducks remind people that a new season is beginning—that throughout the temperate and sub-Arctic zones, life has begun to stir again.

Yet in the waters of the Chesapeake, other harbingers were on the move. They are not noticed by poets and politicians, so the miracle of their renewal has few artists and writers championing their cause. They do not pass in clamorous ranks to stir the imaginations of ordinary people.

Yet the unseen migrations of herring, shad, eels, and the striped bass are no less majestic than the migrations of birds, and no less apt symbols of spring. Certainly fishes are more important to the ecological and economic well-being of the areas they frequent than the here-today, gone-tomorrow waterfowl.

However, what most men cannot easily see, they cannot easily imagine, wonder at, or worry about. And each spring, the seeing becomes a little more difficult for most aquatic resources.

That is why there is a more important harbinger of spring than all the flights of swan, blackbirds singing in a marsh, or blooming redbuds—a harbinger that is readily perceived by anyone, and that should be viewed with increasing respect by politicians and economists.

I'm referring, of course, to the recreational fishermen, and whether he fishes for perch in a New England lake, for suckers in a Midwestern river, for trout in a Rocky Mountain stream, or for mackerel on the cold green waters of the Atlantic, he is as much a part of the seasonal landscape as his unseen prey.

In a sense, the fisherman is a seer, for his experience and imagination enable him to see things that other people cannot; and his optimism and energy enable him to prove that such wonderful things exist.

Where nature's first green is gold, the fisherman is there to share its wealth. When sunlight first thickens with the luxury of lengthening days, the fisherman is there to watch it scintillate from the ripples on a snow-fringed stream or burst through icy spray hurled against the coast.

Even in the seemingly endless summer of the Florida Keys, the pace of life begins to quicken when fishermen report the first daisy-chaining tarpon sculling their serpentine shadows across the dazzling flats.

Too often man perceives himself as something outside nature—an exception to its rules and a voyeur to its beauties. This describes the mode of those content to dip into national parks and view wildlife through rolled-down car windows. But it does not describe the angler.

In order to derive the most pleasure from his outings, the fisherman must immerse himself in his environment—sometimes literally. Stream fishermen prefer wading to walking the margins; surf fishermen turn their backs on the safety of the strand for the surge of the surf; and bass fishermen—contrary to the popular picture of them racing hell-bent-for-leather across the surface of placid lakes—are happiest when they've worked themselves back into a mosshung slough where the biggest bass in the state should be living—if she has any esthetic sense, that is!

In matters affecting water quality, the recreational fisherman serves society the way the canary serves the miner. No one understands the cycles of aquatic life as microcosms of human life so well as the educated angler. His concern for healthy fish and compatible waters next season, and the season after that, has saved more than one river from thoughtless foresters, arrogant industrialists, and ignorant bureaucrats. By the example of his commitment, the angler has helped make many such men—and in the process, himself—a little less thoughtless, arrogant, and ignorant.

In The Infinite River, biologist and fisherman William H. Amos describes how each brook originates in the sun-heated seas, and how the ocean's gift is transfigured by clouds and rain to mist glistening on a rod and beading briefly at the tip before dropping and merging with the one immortality of which all men are certain.

Each angler has his favorite environment among the many ecosystems in which fish are found. Some prefer the sight of snowcapped mountains while they ply a broad river with a fly rod; others like the domain and sanctuary-sense of cane-pole bobbing in a farm pond.

I'm an estuaries and ocean man myself—but only a fool, or a non-angler, would perceive such preferences as mutually exclusive. Water is the matrix of life, and it binds each ecosystem to the other and binds them all to the angler's soul. Any fisherman knows that when we're not near the waters we love and fish, we fish and love the waters we're near.

Yet all is not well with most of our favorite ecosystems, and, like the miner's canary, recreational fishermen have been earnestly telling the rest of society about it. The majority seem to be listening, but as often happens with people who achieve power, many of our politicians and industrialists have lost the acute sense of hearing that once gave them their power.

Dammers and channelizers continue to pore over maps to find free-flowing waters to homogenize and pasteurize; careless farming and industrial practices over-enrich some waters, sterilize others, or just plain poison still others; developers put up PRI-VATE—KEEP OUT signs along every foot of coast, until their building schemes run afoul of Mother Nature's commonsense, and the developers begin sobbing for public money to pay off these bad gambling debts. Tragically, Uncle Sam not only antes up

Tragically, Uncle Sam not only antes up the money under such euphemistic guises as "flood plain insurance" payments and "beach nourishment," but he also underwrites the continuing search for markets for what he calls "under-utilized fishery resources."

Now, whenever you hear a bureaucrat use the word underutilized, you know that (a) the resource to which he refers will sooner or later be a candidate for a threatened or endangered species list, because (b) the bureaucrat doesn't know the first thing about its ecological requirements, and because (c) commercial exploiters, by and large, don't care

Open most any contemporary magazine and discover how our lack of political, economic, and biological restraint continues to erode America's once-vaunted Quality of Life.

American Forests magazine points out that for the supposed safety of U.S. drivers, one-tenth of all the world's annual salt production is dumped on our winter highways. Adverse rebates include slick and hazardous films left on pavements by dissolved salts, contaminated aquifers and reservoirs all across the nation and into Canada, and dying trees and fishes by the countless thousands during spring runoffs.

Rail used to be the ultimate symbol of life, but besides overdoses of salt, freshwater fishes must now contend with sulfuric acid transported in our overindustrialized skies. The February issue of Natural History magazine documents how this problem was first noted by a Norwegian fisheries inspector in 1959, and how despite a growing number of articles concerned with the problem over the past two decades-including an award-winning piece by Field & Stream's Ed Zern-our elected officials continue to waffle on clean air standards, and every year more unsuitable factories continue to operate and more unsuitable power plants are built. As a consequence, with every year, more lakes, rivers, and streams throughout the Northern Hemisphere continue to die.

It is pathetic to consider that concerned anglers were once able to help the Atlantic salmon in its battle for survival with Danish drift-netters, and that we continue to help this beleaguered species in its fight with coastal gill-nettlers and river poachers, but that we are helpless without support from our elected leaders during this, the most far-reaching war of all, in which countless salmon eggs, larvae and parr are destroyed before their first taste of the sea.

Finally, there is the endless, but increasingly passionate, story of water in the West. Since all life is based on water, so is all wealth. But what we in the East have long taken for granted, and even complained about—our humidity—some Westerners have literally committed murder to acquire. In these emotional, and often violent, arguments over who has the greater right to water—the farmers and ranchers who live near the source, or the majority living in cities many hundreds of arid miles away—the instream flow needs of aquatic life are often ignored.

In the allegedly farsighted plans for the Columbia River Basin, not one politician or engineer paused to compare the promises of fifty years or irrigation and power with the immense values of food and recreation from the the river system as it was—without spending one public dime.

Sad to relate, the once-mighty Columbia and its tributaries had the capacity to feed more people more high-quality protein than will ever be possible by diverting its precious waters into irrigation pipes for farmers and ranchers.

Oh, sure, I know fishing is fine in many parts of the country. However, these areas are still good either because man has used his knowledge and skills to maintain local waters, or because man has found substitutes for missing resources.

Take the Chesapeake, for example. Fishing is great these days because Sciaenids such as weakfish, drum, croaker, and spot have moved in vast numbers into the lower bay to take the place of the vanished striped bass, and bluefish have moved into the middle bay to provide recreation for trollers and chummers who also once counted on the missing striper.

A multi-million-dollar program is underway to find out what happened to the striped bass. That knowledge may give us the opportunity to restore this magnificent food and game fish to the mid-Atlantic region and New England.

Yet what about the Sciaenids? Do we know enough about their life histories and ecological needs to prevent them from vanishing, as they periodically tend to do?

What about bluefish? They, too, experience cycles of abundance and scarcity. In fact, they are somewhat overdue for decline.

Are such cycles inevitable? What role does man play in these cycles? Why have we not worked out a management plan for this species in advance of seeking new markets for its products? Is it possible for man to learn anything at all from experience and history?

And so we approach the bottom line: The angler's responsibility to the resources he exploits. In the past, we either bought an inexpensive license to fish in freshwater, or no license at all to fish along the Atlantic coast. Many anglers seemed to view the freshwater license as a kind of an absolution: By paying a \$1 or \$2 fee, we consigned to the states our obligations to the resources.

Many fishermen still think this way. Yet not all states are equally competent as custodians, and even those that are working with shrinking budgets and, rising costs. Broader bases for funding must be found.

Still, our fisheries crisis offers opportunity as well as adversity. After all, there are many areas and ways in which fisheries management can be improved and for which the ordinary angler should demand improvement. This is painfully evident in marine recreational fishing.

Of course, part of the problem is that appointed officials take their cues from elected officials, and elected officials know that fish don't vote. People who like to fish vote, but if many fishermen still complain about paying even a token share of the cost of research and maintaining resources, why should politicians care?

The word recreation means just that: Recreation. It is absolutely essential to our souls to have recreation, and anywhere between 40 and 75 million Americans derive significant portion of their annual recreation from fishing

Yet the very fact that angling proponents don't know exactly how many of us there are is the politician's clue that we are not a very potent political force to reckon with.

Any politician is familiar enough with generalities, vague promises, and hyperbole to know that the only thing that really matters to his continuing occupancy of public office is a body of organized constituents willing and able to write letters, appear in court, and fight for their vested interests.

In other words, the people with political clout are those who are willing to pay something, not to have somebody else do their dirty work for them, but as testament of their willingness to take on greater burdens themselves. Squeaky hinges get oil, but only after they prove themselves worthy of the oil.

Thus, the two principal objectives of the Washington conference on the Dingell-Johnson Fund were to discuss ways to get more "oil"—the kind that will give American anglers energy independence long before the rest of the nation achieves that elusive goal—and to discuss whether there are ways we can build better "hinges."

For example, I'd like to see a genuine bluefin tuna management plan. But I know I won't see one until the hypocritical and ecologically disastrous tuna exemption in the 200-miles-fisheries law is eliminated. And I don't see a management plan even then until biologists pull together all that they know about this resource, decide what still has to be learned, learn it, and then allot the bluefin's annual surplus optimally—meaning with the welfare of the oceanic environment along with the sustained yield of the resource in mind.

Naturally, none of these things is possible without a recreational saltwater fishing license. Representative John Breaux of Louislana recently introduced a bill for such a license. Since the Atlantic coastal states have refused to act, it is sadly, but inevitably, time for the federal government to create its own omnibus measure for making coastal anglers accountable to themselves and to our coastal resources. At the same time saltwater anglers are long overdue their fair share of the rebates from the Dingell-Johnson Fund.

A bluefin tuna management plan, just one of dozens critically needed, requires not only more money, but more thoughtful participation by anglers. Sadly, there are still too many fishery administrators who want less of our participation, and too many anglers who believe themselves too busy to participate.

I said at the outset that anglers are like seers in their ability to envision wonders to which others are blind. Yet in ancient mythology, seers themselves are depicted as blind. The idea was that after superficial sight is eliminated, a person may then be able to perceive things as they really are.

Hopefully, the conference on the future of sport fishing will help us perceive the fact that we are at an economic and political crossroads. Even more important, we are at a crossroads with the very resources that make our recreation, and—in turn—our revitalization and wisdom, possible.

William Shakespeare, evidently no stranger either to fishing or the sea, said it succinctly nearly 400 years ago:

"There is a tide in the affairs of men "Which taken at the flood leads on to for-

"Omitted, all the voyage of their life
"Is bound in shallows and in miseries
"On such a full sea are we now afloat

"And we must take the current when it serves.

"Or lose our venture."

Gentlemen and ladies, that tide is now, We need your support. Write your representatives and senators and ask them to vote for HR. 2250 and S. 546. These bills are the future of sport fishing in America.

CRITICAL DECISION ON MIDDLE EAST

HON. HOWARD WOLPE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES
Tuesday, August 4, 1981

. Mr. WOLPE. Mr. Speaker, in the very near future, this body will be called upon to make a critical decision which will have great impact in shaping the future of the Middle East. Congress will have to decide whether the United States should arm Saudi Arabia with AWAC's aircraft, Sidewinder missiles and other materiel. I hope that Congress will not acquiesce to the administration's new strategy of using Saudi cooperation in Lebanon as a justification for the AWAC sale. While laudable, these are separate issues and must be considered as such. The fact remains that the AWAC sale is not in the national interest of the United States. That must remain the bottom line, sole consideration.

I have already voiced my oppostion to the AWAC sale for several reasons. First, Saudi cooperation in the recent Lebanese crisis notwithstanding, Saudi Arabia has done little to advance the peace process in the Middle East and remains an implacable foe of Israel. The Saudis have opposed the Camp David peace accords and the Egyptian-Israeli Peace Treaty. The kingdom remains in a state of war with Israel. And Saudi princes have rejected any restriction on the use of their military equipment.

Second, from the standpoint of American security interests the transfer of AWAC technology to a region whose long-term stability is in serious question makes little sense. This technology represents the highest, most advanced state of the art, and needs to remain under American control. It is sobering to reflect, in this connection, that the last time the sale of AWAC's was contemplated it was the Shah of Iran that was the intended recipient.

Mr. Speaker, during the last month Saudi actions have further proven the folly of providing Saudi Arabia with this military hardware. The desert kingdom has vowed to "bear the cost of rebuilding the Iraqi nuclear reactor * * * to shoulder its responsibilities in full." And last week, Saudi Arabia pledged to add an additional \$20 million to the hundreds of millions of dollars it already gives to the PLO.

These Saudi actions as well as the recent events in the Middle East reinforce my oppostion to the sale of offensive military hardware to Saudi Arabia. The region is just too volatile, the Arab animosity to Israel is just too great, and the threat to our Nation's security is just too dangerous. I join the hundreds of may colleagues who stand opposed to the sale.

VIETNAM VETERANS OF SOUTH BOSTON

HON. JOE MOAKLEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. MOAKLEY. Mr. Speaker, over 20 years have passed since the first young Americans were killed in Vietnam. When that grueling struggle finally ended, 57,000 American men and women had lost their lives. Equally important, however, are the estimated 9 million Vietnam-era veterans who have returned to civilian life.

No brass bands and cheering crowds greeted these men and women on their arrival. They returned to a nation that was desperately trying to forget the horror and the trauma of the Vietnam war. The Vietnam veteran went to a war which, in most cases, he did not understand. He came back to a peace where he found either an indifference or a contempt for the military service he felt compelled to perform.

The Vietnam war was an unpopular war, a war which incurred a great deal of suffering, not only on the battle-fields, but also in the hearts of many Americans. It was altogether understandable that a majority of Americans were more than happy to put the war squarely behind them. But wars do not end when the shooting stops. They live on in the lives of those who fought. They live on in the lives of those who are survivors and dependents of those who lost their lives in war.

But most of all they live on and on in the memories of those who have served—who have given their best for

this country. That is why this Nation should never forget, because the veteran never forgets.

The men and women who served in the war brought back with them pain and problems-rage and guilt, sorrows and confusions-that have gone ignored and unattended for years. Now, at last, they are commanding our attention.

The Reagan administration's plans to cut \$131 million out of veterans' counseling, employment, and education programs met with considerable criticism from all sectors of the population. Editorial writers pointed out the hypocrisy of increasing defense spending while cutting out veterans' benefits and many veterans angrily stated that they would never let their sons fight for a country which victimizes and betrays its soldiers upon their return to civilian life.

Last month, the House of Representatives approved a number of bills which give Vietnam-era veterans long-

deserved benefits.

But legislation can only make a dent in the Vietnam veteran's profound sense of exclusion, his bruised conviction that America has done him wrong. What is needed is a change in the attitude of the American public toward the individual Vietnam veteran. Unless the sacrifice they selflessly made for this country is acknowledged, younger Americans will be left with the inescapable impression that military service merely invites contempt.

A symbolic change in attitude toward veterans did begin last January. The lavish welcome home that America proffered the hostages filled many vets with a sense of maddening unfairness. It awakened in them a sense of aggressive pride, unencumbered by the old shame of the loser. For the first time, Vietnam veterans began insisting that they are an important resource for the Nation, not an embarrassment. Despite the fact that they are among the business, professional, and everyday people whose contributions to the community make up the news columns, one is never identified as a Vietnam veteran until he robs a store or shoots someone. The result has been the perpetration of the myth that Vietnam veterans are walking time bombs that cannot be trusted. It is about time that we changed the myth.

The men who went to Vietnam deserve much more than a guilt complex from their countrymen. The vast majority of them went, not willingly, but because their country called. And when they got there, the vast majority performed the same acts of valor and bravery that American soldiers have in every other war. So let us honor those men, not as poor unfortunate victims, but as we honored soldiers of past wars.

South Boston, Mass., lost 25 of its sons in the Vietnam war. This is the highest figure for a community of South Boston's size anywhere in the State of Massachusetts, and ranks among the top five in the Nation. A committee of South Boston Vietnam veterans was created over 3 years ago with the intention of erecting a fitting memorial to those 25 brave men. Both veterans and neighbors felt it their moral responsibility to pay homage to the memory of their brothers, to let their sacrifice be known forever to the people of the community, and on September 13, 1981, their goal will be realized.

Their effort not only bears witness to the depth of South Boston's spirit. but it stands as a forerunner to the larger national memorial which will be completed in Washington within the next 2 years. It is an outstanding example of the people of this Nation reassessing their attitude toward those who served in Vietnam.

Mr. Speaker, I would like to pay tribute to those 25 men from my community who gave their lives for this country by having their names recorded in

the Congressional Record.

They are:

VIETNAM VETERANS OF SOUTH BOSTON

Joseph Agri, Lance Corporal, United States Marine Corps.

Charles Bazzinotti, First Lieutenant, United States Army.

Richard Borovick, Specialist 4th Class,

United States Army.

John Calhoun, Lance Corporal, United

States Marine Corps.

John Cole, Private First Class, United States Marine Corps. Paul Daley, Specialist 6th Class, United

States Army. Ronald Delverde, Private First Class,

United States Marine Corps. Joseph Desmond, Private First Class, United States Marine Corps.

Joseph Dunn, Private First Class, United States Marine Corps.

Devon Enman, Sergeant, United States Army.

Eugene Grover, Staff Sergeant, United

States Marine Corps. Francis Hubisak, Private First Class,

United States Army. Douglas Itri, Specialist 5th Class, United States Army.

John Jacobs, Corporal, United States Marine Corps.

John Joyce, Corporal, United States Army.

Edward Milan, Sergeant, United States Air Force.

James O'Toole, Private First Class, United States Army.

Burton Peterson, Lance Corporal, United States Marine Corps.

Paul Sheehan, First Sergeant, United States Marine Corps.

Edward Sullivan, Private First Class. United States Marine Corps.

James Stewart, Private First Class, United States Marine Corps.

Edward Stone, Private First Class, United

States Marine Corps.

Joseph Thomas, Private First Class, United States Marine Corps.

Donald Turner, Lance Corporal, United States Marine Corps.

James Wheeler, Specialist 6th Class, United States Army.

Those men, who were diverse in age, education, and interests, all shared one common ingredient-a loyalty and devotion to God and country. They went to war because their country called, and they made the ultimate sacrifice for something they believed in. That is why they deserve to be remembered. Those 25 young men who were friends of my family and me, as well as the entire South Boston community should be honored as positive examples of true patriotism during a period of profound uncertainty.

RESOLVING THE MONO LANDS ISSUE

HON. JERRY M. PATTERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES Tuesday, August 4, 1981

• Mr. PATTERSON. Mr. Speaker. today I am introducing a bill which is intended to resolve a longstanding issue between the city of Los Angeles and Mono County, Calif. Back in 1936, when the city of Los Angeles was building its Mono Basin aqueduct project, Congress passed a law authorizing the Secretary of the Interior to sell to Los Angeles certain public lands and grant to the city rights-of-way over public lands in Mono County. Los Angeles has had, since 1944, applications pending before the Department of Interior for the purchase of 23,850 acres of Federal land. For many years now, a cloud has hung over the status of this land and officials from Mono County and the city of Los Angeles have worked together to resolve this issue. This bill, which is the product of that effort, will repeal the 1936 act while at the same time it will retain for the city the rights-of-way it needs to insure the operation of its project.

Mr. Speaker, while the purpose of this bill is to resolve the Mono lands issue, the Mono Lake issue cannot be overlooked. The situation at Mono Lakes needs to be addressed. It is my hope that a long-term solution which will protect this environmental resource will be achieved. This solution should not, however, come at the expense of the southern California ratepayers. The first step in finding this solution must be a careful and comprehensive study of problems at Mono Lake. The bill I am introducing directs the Secretary of the Interior to work cooperatively with the city of Los Angeles to study the effects on Federal lands and natural resources of the continued operation of the city's Mono Basin aqueduct project.

Mr. Speaker, I commend my California colleagues who have joined me in sponsoring this legislation and I look forward to working with all of the interested parties in resolving both the Mono lands issue and the Mono Lake issue.

INDOCHINESE REFUGEE GROUP ASSISTANCE PROGRAM

HON. LES AuCOIN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. AuCOIN. Mr. Speaker, over the last several years, Oregon has opened its doors to more than 15,000 refugees from Southeast Asia. About 10,000 of these refugees rely on services provided through the Indochinese refugee group assistance program. Its services include the teaching of English and employment training. This program is a lifeline to refugees and their families who are struggling to adjust to a new culture and overcome the hurdles that lie between them and productive, independent lives.

Sadly, this program has been handicapped by unpredictable and inconsistent management by the Reagan administration. State program administrators in Oregon have no assurance from one quarter to the next that Federal allocations will be received—even though Oregon welcomed refugees from Southeast Asia on the basis of assurances that the Federal Government would share in the costs of resettlement, adjustment, and education.

One out of every four calendar quarters the Government has been so tardy in meeting its commitments that Oregon has had to turn to its congressional delegation for help. I am acutely aware of the problems because I have had to prod the Department of Health and Human Services time and

Whether it is ineptness at HHS or a begrudging attitude toward refugee assistance, I really cannot say. As recently as May, I wrote to Secretary Schweiker asking for his personal attention to the State of Oregon and the overall management of the refugee assistance program. I pointed out that the shortsighted policy of limiting and delaying funds would have severe consequences.

Meanwhile, Oregon's third-quarter allocation for this fiscal year was unaccountably postponed. Under law, program administrators in Oregon ultimately were forced to send out termination notices to refugees.

The Department of Health and Human Services needs to know that it is manipulating people, not just numbers. Its accounting practices create uncertainty and have grave human consequences.

In the case of Shue Long Vue, a 62year-old refugee from Laos, the consequences were tragic and irremediable. Two years ago, Mr. Vue and his family joined the exodus of people fleeing political repression and genocide in Southeast Asia. They found sanctuary in Oregon.

Mr. Vue and his family were among the refugees receiving help through the Indochinese refugee group assistance program. A week ago, Shue Long Vue opened his mail to find a notice that financial aid would not be forthcoming. He was devastated by the news. He literally lost hope. In the early morning hours of Monday, July 27, Mr. Vue committed suicide.

Two weeks before Mr. Vue's death, the State notified the Department that termination notices would have to go out if funds were not forthcoming at once.

There is an ironic twist to this tragedy. Just hours after Mr. Vue's death, State administrators announced that the Federal Government was sending the State's allocation. Oregon now has \$2.6 million to keep the refugee assistance program in operation. Mr. Vue's family has been notified that help has been restored, and their grief is deepened by the knowledge that Mr. Vue's death was pointless.

In the aftermath of Mr. Vue's death, in the Indochinese community in Portland, a connection is being drawn between this death and the evident restoration of assistance hours afterward. In the refugee community, the question is being asked: Are suicides required to assure that help will be continued? These are people who have known unimaginable hardships, who are prepared to make sacrifices they believe are necessary and honorable for the sake of their families.

The Secretary of Health and Human Services needs to know this. The Secretary needs to understand the potential consequences in the Asian refugee community of administrative delays and holdups. I am not sure this is understood by the Secretary or his Department, or that he cares. The Secretary has not been responsive. I have not heard from him.

I wonder if he has heard about Shue Long Vue.

DELAWARE COUNTY'S IDEA MAN

HON. BOB EDGAR

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. EDGAR. Mr. Speaker, I would like to take this opportunity to commend "Delaware County's Idea Man," Mr. Carl Mau. Throughout his 40 years in the area, Carl has been in the forefront of leadership of many charitable and civic activities. He has raised countless thousands of dollars for the less fortunate, particularly those left

destitute by the Johnstown flood and the Italian earthquakes. He has organized a program that recruits clergymen to give the opening prayer at county council meetings. Carl's notable record of service to his fellow man has been acknowledged through the many awards that he has won; the Philadelphia Bulletin's "Jefferson Award," the Delaware County Jaycee's "Man of the Year" award, and the Associated Press plaque for outstanding radio broadcasting. But as a member of the Veterans' Affairs Committee, I am most proud of the work that Carl Mau has done on behalf of the brave men who have served our country in the military. Mr. Mau's distinguished contributions have been recognized most recently by the Pennsylvania chapter of the American Legion, who have bestowed on him the high honor of the "1981 Distinguished Service Medal." For these accomplishments, and other too numerous to mention. I would like to thank Carl Mau for his service to Delaware County, and to express my best wishes for his future.

A SALUTE TO DR. NOLEN ELLISON

HON. LOUIS STOKES

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. STOKES. Mr. Speaker, I would like to take this opportunity to introduce to my colleagues an exceptional educator in the city of Cleveland—Dr. Nolen Ellison. As president of the rapidly expanding Cuyahoga Community College, Dr. Ellison simultaneously is a symbol of educational opportunity in Cleveland and a bulwark in the community.

Mr. Speaker, Dr. Ellison has worked tirelessly in planning the growth in physical facilities and academic reputation of the three-campus Cuyahoga Community College. His energetic and ambitious labor has reaped the fruits of accessible and quality educational opportunities for individuals in every economic class and age group in the Cleveland metropolitan area through the Cuyahoga Community College.

Appropriately Mr. Speaker, this achievement has brought recognition and accolades to Dr. Ellison. Even though he normally prefers to stay out of the limelight, I take this opportunity to officially applaud Dr. Ellison for his efforts and am proud to share his achievements with my colleagues.

Mr. Speaker, as I review in my mind the association I have had with Dr. Ellison and his background, I have come to the conclusion that Dr. Ellison's success is built on an uncanny desire to win. This motivation apprently has been with him throughout his life.

From his early days as an All-American basketball, football, and baseball star to his association with the Kansas City Community Junior College, the key to Dr. Ellison's achievements has been his constant determined effort to succeed with dignity and to break down barriers for himself and others. This philosophy about success has served him well as he has accumulated many firsts in his career.

Mr. Speaker, Dr. Ellison at the age of 31 was this country's youngest college president. Currently, at the age of 40, he serves as the president of the Cuyahoga Community College which is the third largest school of higher learning in the State of Ohio.

At the Cuyahoga Community College. Dr. Ellison has been the unshakable force which has prodded and managed the expansion of the college. Dr. Ellison has utilized his educational and administrative expertise, finesse and foresight to make Cuyahoga Community College one of the best in the

Furthermore, Mr. Speaker, Dr. Ellison has made the kind of lasting and significant mark on the community which many men dream of doing but few actually attain. He has helped to construct a superior campus and at the same time a quality academic program geared to the unique needs of the community.

The faculty of Cuyahoga Community College has followed the lead of Dr. Ellison in terms of enthusiasm for and commitment to the school and its students. This has resulted in a college which operates well administratively and academically. Therefore, the college serves as a tribute to him.

Dr. Nolen Ellison, in every meaning of the word, is the cornerstone of the Cuyahoga Community College. By virtue of that fact, Dr. Ellison also has been a positive force for the community.

With those thoughts in mind, Mr. Speaker, I ask my colleagues to join me in applauding the work of Dr. Nolen Ellison, president of the Cuyahoga Community College in Cleveland. At this time, I will insert in the RECORD, an article which appeared in the Cleveland Press on Dr. Ellison.

> TRI-C'S ELLISON LEADS QUIETLY EX ATHLETE THRIVES ON HARD WORK (By Barbara Chudzik)

In high school he was an all-state and all-American athlete. He attended college on a full athletic scholarship and was the third draft choice of the Baltimore Bullets bas-

ketball team. At age 31, he was the youngest college president in the nation. Today at 40 he's president of Ohio's third largest school of learning-Cuyahoga Community higher College.

On or off the court, Nolen Ellison is a

He was born in Kansas City, Kans., the second son of Tavern Ellison, chief mechanical inspector for the city, and Margaret, manager of a neighborhood grocery store. Ellison and his brother Benoyd grew up knowing Satchel Paige and other professional athletes.

"Ours was a family where sports was stressed, and I believe this has contributed to my success," he said, "Athletics is a broadening experience for kids. It's an important part of the maturation process and helps develop the fiber of leadership.

"Athletics blurs the lines of separation between people. It's a way for mutual respect to be established. Thanks to athletics, have strong feelings of respect for individuals. Colors and religions are not differences that separate us. They're strengths.'

Living in the black neighborhood of Kansas City, Ellison became acquainted with urban renewal at an early age when his family was ousted from their home so the city could build a school on the site.

He attended black elementary and junior high schools, but along with a dozen friends chose to walk three miles to all-white Wyandotte High School.

'It was just after the Brown vs. the Board of Education court case which started desegregation," he said. "I've always made adventuresome choices but the main reason I wanted to go to Wyandotte was for the

'I had been a successful athlete in junior high basketball and track. But the black high school had no basketball or swim team, and it didn't play in a conference league."

During his sophomore year, Ellison won a varsity letter in basketball. In his junior and senior years, he won six letters—two each in basketball, football and baseball. He was named all-American for basketball and allstate for football and baseball.

He was equally successful in his studies and was the first black inducted into the

National Honor Society.
"I was the only black in most of my classes, and this was a stimulus to achieve." he remembers. "I worked extra hard to prove I was as good as the white students and that I had come from a good background."

Ellison won a full basketball scholarship to the University of Kansas and soon was known as the "Kansas Iron Man" for his strength, tenacity, skillfulness and cunning on the court

He played every minute of every game in his senior year, and with a career point total of 1,400 was the highest-scoring guard in the history of the school.

Despite his athletic success, Ellison says he never planned on a career in professional sports because "you have to be brutal." He majored in history and social studies, intending to become a high school teacher. In 1963 he was the third draft choice of the Bullets.

Ellison said he turned down the tempting offer because he "had a pregnant wife, a job offer at Sumner High School (the black high school in his hometown) and was a folk hero back in Kansas City.

After one year of teaching and coaching, Ellison accepted an invitation to join a State Department sponsored basketball team on a two-month goodwill tour of the Orient.

He returned to teach three more years before turning to a new career at City Hall.

'I was elected to the board of trustees of Kansas City Community Junior College, and the day after the election, the Sumner High School principal told me to choose be-tween teaching or being a trustee," he said. "So I quit and joined the Kansas City plan-

ning department for two years."

During the next four years, the busy Ellison earned his master's degree from Hampton University in Virginia and his doctorate from Michigan State University, became executive assistant to the president of Michigan State and executive assistant to the chancellor of the Metropolitan Junior College District in Kansas City.

In 1972 he was named president of Seattle Central Community College. At 31 he was the youngest college president in the nation. Two years later he came to Cleveland as head of the three-campus Tri-C.

The 6-foot, 2-inch, mustachioed Ellison says he has spent the past seven years "trying to keep a low profile and simply do a good job.'

"Who Nolen Ellison is isn't as important as what Cuyahoga Community College is," he says. "I have a great responsibility to serve the citizens and not get my own role out of focus. Leaders can be more effective if they're not always looking to be in the public eye.

He and his wife, Carole, sweethearts since junior high school, will celebrate their 20th anniversary this year.

The Ellisons live in Shaker Heights with sons Marc, 17, who will continue the family tradition of attending the University of Kansas in the fall, and Steven, a student at Woodbury Junior High School.

TRIBUTE TO SRI CHINMOY

HON. CLAUDINE SCHNEIDER

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES Tuesday, August 4, 1981

• Mrs. SCHNEIDER. Mr. Speaker. I would like to take this opportunity to pay tribute to a man of many talents who has contributed greatly to the effort of increased human cooperation and international peace. Through his work, Sri Chinmoy, a prolific musician, artist, author and spiritual leader has sought to foster the ideals of inner reflection and action in human life. As the Director of the Meditation Group at the United Nations, Sri Chinmoy is active in the pursuit of world peace and has been recognized by this esteemed body when he received the Silver Medallion.

Sri Chinmoy has also made important contributions to the State of Rhode Island. The Sri Chinmoy Center in Bristol has been active in community service through the sponsorship of cultural, civic and athletic events. On August 10, the Center will be sponsoring a triathlon in Watch Hill, R.I. Last year, Sri Chinmoy presented Brown University with 100 titles of his work. These represent a significant contribution to the University's collection of literary, religious and philosophical documents. Sri Chinmoy has also lectured at other universities in Rhode Island and a mural of his paintings hangs in the children's ward at the Rhode Island

On the occasion of Sri Chinmoy's birthday on August 27 I would like to share one of his many poems with my colleagues:

SALUTATIONS TO AMERICA

Yesterday America enjoyed the sacred flame of liberty.

Today America enjoys the sacred light of equality.

Tomorrow America shall enjoy the sacred sun of divinity.

America's vision was to become transcendentally great.

America's mission is to become universally good.

The spirit of the past was the discovery of inner adamantine will to fight against bondage. The present spirit is the aspiration for God-manifestation plus the aspiration to become humanity's brother, humanity's selfless lover and divinity's constant server.

There are two special qualities that Americans can work on to help bring forward all their potential divinity. These two divine qualities are the feeling of universal oneness and constant and cheerful self-giving to the Supreme Pilot, who is man's own highest Reality.

American citizens can learn to love their country more by realizing the supreme fact that there is no difference between true love of one's country and true love of God. One's country is nothing short of God's concentrated creation.

America gained her independence two hundred years ago by virtue of her determined will power. Now her spiritual independence will be founded upon her conscious oneness with God, and this can be established only on the strength of her implicit surrender to God's divine Dispensation

In a freedom-loving country patriotism is a conscious prayer, a conscious concentrated force to spread freedom so that the country can achieve and distribute love-light to each of its countrymen and to the world at large.

—Sri Chinmoy.

TESTIMONIAL DINNER TO HONOR POLICE CAPTAIN McLAUGHLIN

HON. MARTY RUSSO

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

 Mr. RUSSO. Mr. Speaker, good laws make it easier to do right and harder to do wrong. And good policemen to enforce these laws help to keep our loved ones and our cities secure. Paul McLaughlin has been a member of the Chicago Police Force for the past 35 years and a captain for over a decade. He has served our city well. During his long and illustrious career, Captain McLaughlin has shown leadership, dedication, professional expertise, and personal courage throughout many troubled times such as the Chicago riots, the Croatian hostage situation, and the El train accident. In thanks, Captain McLaughlin has received hundreds of letters and many commendations praising his behavior in action.

On May 4, 1981, Paul McLaughlin retired from the Chicago Police Force. On September 3, 1981, there will be a testimonial dinner in honor of Captain McLaughlin. All those family, friends, and fellow police officers who have ad-

mired and respected him through the years will have the chance to thank this outstanding public servant.

I commend Captain McLaughlin for his unfailing service and I know my colleagues join with me in wishing him a full and happy retirement.

LIBERALS, CONSERVATIVES, AND GOD

HON. BILL ALEXANDER

OF ARKANSAS

IN THE HOUSE OF REPRESENTATIVES
Tuesday, August 4, 1981

• Mr. ALEXANDER. Mr. Speaker, recently I had the opportunity to attend Sunday services in Heber Springs, Ark., at the St. Francis Episcopal Church. Rev. Arnold Hearn delivered a most enlightening and thought-provoking sermon which I would like to share with my colleagues here in the House. Reverend Hearn's sermon of July 5, 1981, follows:

Liberals, Conservatives, and God (By Rev. Arnold W. Hearn)

The annual observance of Independence Day turns our thoughts to the life of the nation. And that prompts reflection on the turmoil, the divisions, the changes which have marked our experience as a people in recent decades and on the further change of direction represented by last fall's national elections. And these thoughts immediately raise the tangled questions of future social realies.

Each must ask: What stance, what posture shall I adopt? What shall be my hopes and expectations? How shall the church be related to society's decision-making processes? What orientation is appropriate from the standpoint of Christian faith?

1

We are in the habit of speaking as if we have two broad options. We can be liberals, or we can be conservatives. The situation is actually far more complicated than that and for a number of different reasons. Yet there is enough truth in designating liberalism and conservatism as the major alternatives to make it a useful way of speaking and to enable that distinction to serve as a starting point for further reflection. The labels "liberal" and "conservative" do seem to stand for two distinctive ways of confronting and participating in the life of the world.

At the risk of considerable further oversimplification, let me try to characterize the difference between these two postures. Liberals might be described as those whose chief concern is to bring new good into being. The liberal inclination is toward changing things, toward experimentation, toward extending the frontiers of justice, equality, and human rights. Liberals want to change things in the conviction that things could be much better than they are.

Conservatives, on the other hand, can be thought of as those whose chief concern is to prevent established good from being lost. The conservative inclination is toward tradition and order and the stability of institutions, toward preserving values and systems and practices that work—however imperfectly—rather than running the risk of chaos and disorder. Conservatives are skeptical of change and want to cling to the

goods we have for fear that, if we do not, things may turn out to be much worse than they are.

Whether or not "liberal" and "conservative" are the most accurate and illuminating labels for them, there are, in any case, these two ways of confronting the present. There are those who are turning on by a vision of a better future and who seek to bring new good into being. Theirs is a creative impulse. And there are those who are filled with appreciation for the accomplishments of the past and who refuse casually to discard the heritage of long experience. Theirs is a preserving impulse.

II

If, however, you and I are at all serious in our affirmation of Christian faith, then our concern is not just to decide whether we are going to be liberals or conservatives. Our first concern is to ask: where is God in all this? What is God doing in the midst of human affairs?

An important clue appears in words which you and I repeat each time we offer the General Thanksgiving from The Book of Common Prayer: "We bless you for our creation, preservation, and all the blessings of this life." These two words, "creation" and "preservation," point to a great deal of what God is doing in his world. When you and I try to locate ourselves within or beyond the options of liberalism and conservatism, it seems to me profoundly important to remind ourselves that (while it might seem odd to call God liberal or conservative) the God we worship is both creater and preserver. He is one who is constantly at work to bring new good into being. He is one who is ever concerned lest any good be lost.

I am not suggesting God is a timid, middle-of-the-road moderate, lukewarmly creative and half-heartedly preserving. There is a thoroughgoingness and a steadfast faithfulness to be discerned in both his creative and his preserving work.

The God of biblical faith is one whose creative Spirit is constantly brooding over and surging through his world to bring new good to birth—though the birthing be painful and though something of the old does have to be surrendered to make way for the new. In the long story of natual evolution, God's power is at work, bringing a wonderful diversity of species into being to share in the life of the earth. In human affairs he moves for the increase of justice and the liberation of the oppressed. He is ever leading and goading his people toward greater and richer fulfillment of human possibilities and human community. He is the creating God who brings new good into being.

Yet the God of biblical faith is also one whose fatherly care is constantly exercised to confirm and conserve the good that has been already achieved—though the preservation of past achievements does sometimes establish banks within which the river of creativity must flow. By his providence advances are consolidated; protective structures develop; nature acquires the balance and harmony on which its creatures depend. In human affairs, stability is achieved through the emergence and experience of institutions such as family and state and laws and church and school; through functioning systems for the production and distribution of goods and services; and through all the things that make possible a sane, orderly, reliable, and at least tolerably just human existence.

The influential American theologian Paul Lehmann has described the divine activity by saying that God is at work in the world "to make and to keep human life human." And that is exactly the point! This making and keeping, this creating and preservingthese are what God is doing.

The philosopher Alfred North Whitehead has said that God is always leading and luring not only human life but the whole universe into what he calls "creative advance." But Whitehead says also that God is constantly exercising "a tender care that nothing be lost."3

Creating and preserving-these are nothing less than the work of God. And these are divine activities with which faith intends always to be aligned. We dare not forget either concern.

The creative thrust involves making human life more and more fully and completely and authentically human. It involves bringing new good into being. The preserving thrust involves keeping in human life the humaneness and the humanity which have been already achieved. It involves preventing established good from being squandered. The God you and I worship is one who works both to create and to make and to preserve and to keep. And in the process he resists, overthrows, destroys whatever thwarts either his creative or his preserving concern.

III

So what does all this mean with respect to the question with which we began? With what outlook shall you and I face the decisions which confront our nation and ourselves? I shall not suggest how any one of us should resolve any particular issue, but I think what I have been trying to say about the nature and activity of the God we worship does imply something about the attitudes with which you and I can best face the future and participate in the society of

which we are members

If the God of Christian faith is both creator and preserver, then both "liberal" and 'conservative" concerns have a legitimate role within the life of the church. Both have a place in our concern for human well being. Both have a place in our striving to express love to God and neighbor. But since both have validity, none of us ought let himself or herself get locked into a doctrinaire position wherein response to every is automatic. Whether our reflexes tend to be liberal or conservative, we need the grace to get beyond the knee-jerk response. We need to keep ourselves open to diverse possibilities.

As servant of God and neighbor, one ought to be willing to find oneself aligned with conservatives on one issue and with lib-

erals on another.

We ought also be able to welcome correction from those who see things differently from the way you or I may see them. Each of us has got finally to come to his or her own decisions. We have to follow the best light we have. Yet we can, at the same time, glad that-within the providence of God-there are other persons who see things differently and who are laboring on behalf of values we might be inclined to ne-

Political and social struggle gets pretty messy sometimes. But through it all, you insights and fragmentary wisdom and onesided, unbalanced efforts of a lot of differing people as the context out of which he can bring forth something better than any one of us, or any limited group of us, could ever have achieved alone. And that conviction is surely close to the heart of what democracy is all about. Still, it is not enough to say God is creator

and preserver and leave it at that. There is more in the General Thanksgiving that what I quoted earlier. Listen to the same passage slightly extended: "We bless you for our creation, preservation, and all the blessings of this life; but above all for your immeasurable love in the redemption of the world by our Lord Jesus Christ.'

The God we worship-the creator, the preserver-is also savior. And that conviction supplies the assurance you and I need if we are to do much of anything at all, whether in the more public arena of political activity or in the more private circle of personal life and interpersonal relation-

For anything we do is risky. We can always be mistaken in our choices. We can always be misled by our own biases and our

own blindness.

But we can run the risks and take the chances in the faith and trust that the same God who is creating and preserving is also saving. He will take your blunders and perversities and mine, and those of the persons and interests we oppose, and he will redeem them and use them for good as he weaves them into the story of his own gracious and ongoing purpose.

ERIE, PA., ZOO

HON. MARC L. MARKS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. MARKS. Mr. Speaker, this past weekend, I had the distinct pleasure of visiting the Erie Zoo in Erie, Pa. The zoo, founded in 1924, is a small 15-acre public park run by the Erie Zoological Society. Director James Rhea and his friendly, highly competent staff are always on hand and eager to explain particulars and answer questions.

Besides housing 70 species and 200 specimens, the zoo contains picnic facilities and playgrounds which are in full use throughout the spring and summer months. The zoo also sponsors an annual spring parade which is widely attended by the entire community. More than a quarter of a million people visit the Erie Zoo in the course of a year. Erie ranks third in the Nation as the most attended zoo for the size of its metro area. One of the zoo's most popular attractions is Pixie Land, a playground of tame animals that roam about free from confinement. Children have the opportunity to pet and feed goats, lambs, ducks and a wide assortment of friendly, gentle animals.

While at the Erie Zoo this past weekend, I was particularly fortunate to be able to see their newborn giraffe. The beautiful baby giraffe calf was

born on Monday, July 27, 1981. The birth of a baby giraffe is unusual for a zoo the size of Erie because giraffes and other large specimens often do not reproduce in relatively confining habitats. The calf was approximately 7 feet tall at birth. The calf is unique in his markings in that he has the identical shamrock design on his chest that his father possesses. The calf has yet to be named, but as is the custom for popular newborns at the Erie Zoo, officials are planning a name contest in which the community can participate.

The Erie Zoo, despite its relatively small size, has also been successful in breeding polar bears, having had successful births in 1977 and again in 1980. The birth of polar bears in confinement is a delicate procedure since a polar bear will often abort or devour its young at the slightest provocation. The officials at the Erie Zoo were able to devise a successful method of isolation which provided the proper conditions for birth.

I would like to take this opportunity to commend the Erie Zoological Society, its many patrons and the officials and attendants at the Erie Through their dedication and hard work the Erie Zoo has served as one of the community's favorite sites for recreation and family get-togethers as well as a fascinating museum of live wildlife.

PRUDENCE AND PUBLIC HEALTH

HON. CARL D. PURSELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES Tuesday, August 4, 1981

. Mr. PURSELL. Mr. Speaker, the head of Michigan's Department of Public Health recently testified before Appropriations Subcommittee, which has jurisdiction over programs of the Department of Health and Human Services. I have been asked to make an abstract of his remarks available to the full House and would like to do so at this time.

Thanks for this opportunity. I have some true stories to tell you this afternoon. They come from a quarter of a century in Michigan's State Health Department. They also reflect the views of the 55 other states and territories. I believe, as do colleagues in county, city and state health departments, that it is prudent to invest in public health. Here's why:

In southwest Michigan this afternoon, a child lies in bed in a hospital. He does not recognize his family. Doctors say his brain has been destroyed. He is a victim of Eastern Equine Encephalitis, a disease carried by mosquitoes. The cost to him and to his family is beyond words. The cost to taxpayers through Medicaid is \$450,000 this year. We face more such losses to the extent that prevention funding is reduced. The sequel to this story is that, thanks to an alert Governor and Legislature and dedicated staff, we were able to move some money around

^{&#}x27;Paul L. Lehmann, "Ethics in a Christian Context" (New York: Harper & Row, 1963), p. 85 et passim.

² Alfred North Whitehead, "Process and Reality" (corrected edition, eds. D. R. Griffin and D. W. Sherburne; New York: Free Press, 1978), p. 344 et

³ Ibid., p. 346.

fast enough to hire DC-3s for a massive spray program, which wiped out the mosquitoes and held the damage to one child

and several horses.

You've heard how we made spectacular advances against infectious diseases. Our death rate has gone down by over 60 percent since the turn of the century. Your lifetimes and mine, on the average, are 20 years longer than they would have been in 1900. Each year, local and state health departments serve over 30 million people directly in communicable disease control programs, and the entire population indirectly. However, in order to sustain a reasonably adequate national program to protect children from acute infectious diseases, you've been persuaded to provide special, high level funding for immunization. This may be one of the easier things to support. It is harder to help Michigan battle Equine Encephalitis. Or Arizona, with rabies along the border. Or Mississippi, with tuberculosis. That was why we worked with you in 1978 to design the PHS 314(d) cost sharing incentive, and the companion accountability tool known as the National Public Health Program Reporting System. Apparently, this halfway house between block grants and categoricals-a national investment, state by state, in a defined set of services, subject to local priority setting, but accountable to you-has been all but abandoned. We do not understand why. But, we urge you to do all you can to sustain the national investment in disease prevention and control. We urge you to sustain the Centers for Disease Control, which those of us in public health look to as a beacon of hope and direction in an otherwise bizarre world of Federal acronyms

In Michigan, as in the nation as a whole, our investment in sickness care in the last 15 years has far outstripped prevention. We pay about a billion yearly for Medicaid alone, in our State, compared with less than one-third billion for local and state health department services combined—and many of these include treatment activities. This is

a costly imbalance.

In a nursing home in central Michigan a 55 year old man spends most of his days rocking endlessly in a worn, maple rocker. He had uncontrolled high blood pressure for many years. A stroke at age 54 left him partially paralyzed. Even though our health department regulatory programs assure him a reasonable hope for quality care, he is a failure of public health. We didn't act soon enough to help him learn to control his disease. We face more such losses to the extent that funding for prevention is reduced. Each year, it's estimated that we needlessly lose 65,000 Americans to the plague of hypertension—as many as from highway accidents. In Michigan, less than one of three of our nearly one million adults with hypertension have their blood pressure under control. Where our country's local and state health department maternal and child health programs serve over 20 million people and our communicable disease program about 30 million, our chronic disease programs (heart disease, cancer, stroke, diabetes, renal disease) serve only a little over 5 million. We do not have equity.

In southeast Michigan, a three year old has scars around her face which will last her lifetime. She was bitten by rats in her crib. She will carry the evidence of those hungry rats into her teens and adult life. She is a failure of public health. We didn't move fast enough to save her. The cost is in medical bills and whatever the scars may do

to her life chances. We face more such losses to the extent that funding for prevention is reduced. Even though you've provided, in the past, some funds for the control of hazards such as rats and lead-based paint poisoning, the investment has not reached out sufficiently to help us do the job. In Michigan, for instance, we have six community programs in rat control, while nearly all urban centers have similar problems and are not helped. In 1979, state health officials of the nation reported 3.9 million field inspections in environmental health and 179,000 enforcement actions. But environmental health program data also show a broad variation in what is available and accessible to our people and communities, depending on which state you live in. We do not have equity.

In a small southern Michigan town of Adrian, a Mexican-American will lie awake tonight worrying about his children. His home, his dooryard, the playground, the neighborhood, have been contaminated with a chemical dust which potentially can cause cancer. The dust (Curene 442) was spread by a nearby plant, where his family and most of his neighbors work. His fears are a failure of public health. We didn't act in time to help protect this community. More communities will face such anxieties and disruption to the extent that prevention funds are reduced. The cost of cleanup, from private and public sectors, is expensive. The local and state governmental agencies are being responsive to this severe problem. But we are playing catch-up, having already lost the battle for community protection.

This is one of scores of examples of the substantial tasks confronting local and state health departments of the country, in collaboration with state environmental and agricultural agencies and the Centers for Disease Control.

We have emphasized that it is prudent to pay the lower cost of health, rather than the higher prices of sickness; that it is prudent to promote health; and prudent to help people and communities protect themselves and prevent contamination. The axiom remains that an ounce of prevention is still worth a pound of cure. In my written testimony, I include additional examples indicating what the country will lose if public health is cut, and what we will gain if we sustain robust public health programs. We salute you. We stand ready to try to respond to your questions on behalf of the Association of State and Territorial Health Officials.

INVASION OF CZECHOSLOVAKIA

HON. MARY ROSE OAKAR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Ms. OAKAR. Mr. Speaker, August 21, 1981, marks the sad anniversary of the invasion of Czechoslovakia in 1968. This brutal invasion was a violation of the sovereignty of a member state of the United Nations and a cruel negation of the right of self-determination of peoples. The continued occupation of Czechoslovakia is another crime against the right of a country to determine its own destiny and aspirations.

Since that sad day in 1968, the brave people of Czechoslovakia have made repeated efforts to assert their right to freedom and self-expression. Over a thousand citizens of Czechoslovakia signed the Charter 77 which petitioned their government to adhere to the principles of the Helsinki Final Act. Instead of responding to the honest and heartfelt sentiments of its citizens, the Prague government responded with repression. Thousands have been arrested and harrassed. Many more have had their careers ruined.

It is important that the United States take a strong stand opposing the invasion and occupation of Czechoslovakia, no matter how many years have elapsed since the first Soviet tanks crossed the border to crush the Prague spring 13 years ago. The American people support the efforts of all people to be free. After all, our own country began with the stirrings for independence and freedom.

And so I join with Americans of Czech, Slovak, Subcarpatho-Ruthenian and Moravian descent in commemorating this sad occasion to pray for the eventual deliverance of Czechoslovakia from the cruel occupation. May the day soon come when Czechoslovakia stands proudly and independently as a free and equal partner in the international community of nations.

LIST OF KEY VOTES

HON. DONALD J. PEASE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

 Mr. PEASE. Mr. Speaker, it has become my practice to periodically list in the Congressional Record the key votes I have cast in the U.S. House of Representatives.

This list of my key votes is arranged as follows: Each item begins with the rollcall number of the vote, followed by the number of the bill or resolution, and a description of the question on which the vote was taken. This is followed by my own vote on the issue. Finally, the vote of the entire House of Representatives is indicated by passed or failed followed by the yeanay vote totals.

The list printed here includes key votes taken between January 5, 1981, and June 26, 1981.

LIST OF KEY VOTES OF CONGRESSMAN DON J. PEASE, 97TH CONGRESS, 1ST SESSION

(10) H.R. 1553. Bill raising the temporary public debt ceiling by \$50 billion to \$985 billion, effective through September 30, 1981. Yes. Passed 305-104.

(13) H. Res. 13. Resolution re-establishing the Select Committee on Narcotics Abuse and Control for the 97th Congress. Yes. Passed 276-101. (14) H. Res. 67. Resolution continuing the investigation of alleged improper conduct by Members of Congress in the ABSCAM

affair. Yes, Passed 390-1.

(16) H. Res. 115. Amendment providing for a 10 percent reduction in the spending ceiling for standing and select committees in the U.S. House of Representatives for calendar year 1981. Yes. Passed 407-2.
(17) H. Res. 115. Amendment reducing the

spending ceiling for standing and select committees to \$35.3 million or 9 percent below actual expenditures in 1980. No.

Failed 184-225. (20) H.J. Res. 182. Resolution designating April 26, 1981, as a national day of recognition for veterans of the Vietnam era. Yes.

Passed unanimously.
(33) H. Con. Res. 115. Obey amendment to the budget resolution which mandated \$26 billion in spending cuts, provided a budget surplus in fiscal year 1982 as well as fiscal year 1983 and 1984, and delayed individual tax cuts until January 1, 1983. Yes. Failed 119-303.

(36) H. Con. Res. 115. Amendment to the budget resolution offered by Reps. Gramm and Latta which mandated \$23.1 billion in spending cuts, provided a \$31 billion deficit and provided a \$51.3 billion tax cut for fiscal year 1982. No. Passed 253-176.

(37) H. Con. Res. 115. Final passage approving the Gramm-Latta substitute to the

budget resolution. No. Passed 270-154. (39) H.R. 3512. Amendment to renege on the American commitment to the International Development Association by further decreasing our contribution even though the amount requested was the smallest per-centage ever committed by the United States and 75 percent of IDA loans go to the poorest countries. No. Passed 272-126. (40) H.R. 3512. Amendment to reduce

direct loan authority for the Export-Import Bank which promotes overseas sales for U.S.

corporations. No. Passed 231-166. (49) H.R. 2098. Bill establishing Offices of the Inspector General in Defense, Justice, and Treasury Departments and in the Agency for International Development. Yes. Passed 334-65.

(50) H.R. 2979. Bill providing \$3 million in each of fiscal years 1982 and 1983 for the National Historical Publications and Rec-

ords Commission. No. Failed 165-231.
(53) H.R. 3520. Bill extending the deadline for steel industry compliance with requirements of the Clean Air Act on a case-by-case basis provided that funds saved as a result of the extension are committed to modernization. Yes. Passed 322-3.

(54) H.R. 3499. Bill providing hospital care to Vietnam veterans exposed to Agent Orange and extending pyschological read-justment counseling. Yes. Passed unani-

(56) H.R. 3337. Bill extending youth employment programs for one year while their effectiveness is being thoroughly reviewed. Yes. Passed 309-84.

(57) H.R. 1100. Bill changing from 6 months to 60 days the length of time a former POW must have been interned to establish a presumption of service connection for certain diseases and medical conditions. Yes. Passed 394-2.

(62) H.R. 3455. Amendment deleting \$29.6 million to acquire 244,000 acres to expand Fort Carson in Colorado and preventing a further encroachment of federal land own-

ership. Yes. Failed 175-209.

(63) H.R. 3455. Amendment withdrawing authority to construct a facility at the Pine Bluff Arsenal designed to produce binary nerve gas. Yes. Failed 135-220.

(64) H.R. 3455. Bill Approving \$7 billion for fiscal year 1982 for military construction and family housing covering 773 construction projects at 399 military installations. Yes. Passed 311-36.

(69) H.R. 3462. Amendment prohibiting the Department of Justice from using funds to require directly or indirectly the transportation of students to a school other than that nearest the students' home. No.

Passsed 265-122.

(73) H.R. 3413. Amendment prohibiting the Department of Energy national security programs from using federal funds for the production or research and development of enhanced radiation nuclear weapons. Yes. Failed 88-293

(76) H.J. Res. 287. Resolution urging the Reagan Administration to notify the World Health Organization that the United States will cooperate fully with other nations to protect children from illness and contamination from U.S. infant formula. Passed 301-100.

(83) H.R. 3480. Amendment preventing the Legal Services Corporation from acting in behalf of poor persons to bring class action suits against federal, state and local governments. No. Passed 241-167.

H.R. 3480. Amendment preventing the Legal Services Corporation for providing legal assistance to promote, defend or protect homosexuality. Yes. Passed 281-124.

(86) H.R. 3480. Amendment prohibiting Legal Services Corp. lawyers from informing eligible clients of the current state of abortion law. No. Failed 160-242.

(88) H.R. 3480. Amendment prohibiting Legal Services Corporation-funded legal assistance for or on behalf of aliens not legally admitted or permanent residence in the U.S. Yes. Failed 141-262.

(91) H.R. 3480. Bill continuing the Legal Services Corporation in fiscal year 1982 and 1983 and requiring the establishement of state advisory councils to review grant and contract applications. Yes. Passed 245-137.

(94) H.R. 32614. Bill further increasing Department of Defense funds already approved for fiscal year 1981 by \$2.66 billion. No. Passed 360-50.

(102) H.R. 3238. Bill to continue the Public Broadcasting Corporation with budget reductions from previous year. Yes.

Passed 323-86.

(113) H.R. 3982. Omnibus reconciliation bill revising existing law to achieve budget savings by cutting social security, supplemental security income, school lunches and consolidating numerous education, health, energy and community services programs into block grants. No. Passed 232-193.

RODINO QUESTIONS WAVE OF MERGERS

HON. JOHN F. SEIBERLING

OF OHIO

IN THE HOUSE OF REPRESENTATIVES Tuesday, August 4, 1981

 Mr. SEIBERLING. Mr. Speaker, I want to share with my colleagues piece that appeared on July 26, 1981, in the Newark Star Ledger by the distinguished chairman of the House Committee on the Judiciary, PETER W. RODINO, Jr. This piece reflects and comments on the present "merger madness" infecting the upper echelons of corporate America and the response or lack thereof by our institutions of government. I should add that the Subcommittee on Monopolies and Commercial Law of the House Committee on the Judiciary will begin a series of hearings on Wednesday, August 26, 1981, on present merger policy.

MERGER MADNESS

(By PETER W. RODINO, JR.)

The message to the corporate giants is out: Seldom will be heard a discouraging word from the new "trustbusters" out of the

Attorney General Smith has assured them that bigness is not badness. Assistant Attorney General Baxter has told them that Antitrust Division guidelines on permissible concentration are too tough.

Responding to these signals, some of our nation's largest corporations have embarked

on a new wave of mergers.

All right, bigness may not necessarily be bad, but neither is it inevitably best, whether the evaluation is economic, political or

Disciples of relaxed merger standards suggest that the resulting freedom will ultimately bring about a more efficient industrial structure that more sensibly uses our valuable resources. This is questionable.

Studies show that economies of scale are also subject to the law of diminishing returns and are unlikely once a corporation exceeds a certain size. Moreover, any efficiency gains are most likely in mergers among competitors, the very type of horizontal combination that Mr. Baxter says should be most closely monitored. Anyway, according to former FTC Commissioner Robert Pitofsky, few of the recent large mergers have been undertaken to achieve efficiencies. Rather, as the Wall Street Journal has pointed out, corporate officials pursue mergers to deversify investments, to obtain tax breaks, or simply to increase the size and prestige of the corporation (and thereby nationalizing higher salaries for the top management).

These facts indicate that many mergers may be nearly meaningless for most of us, if not for a fortunate few. But, although all the evidence is not in, there are mounting indications that a continuing merger wave is not merely passive, that it could in fact adversely affect our nation's economic growth. The large sums of cash available in many corporate treasuries could be well invested in research and development or in capital expenditures to promote long-term growth. If, instead, this money is spent to acquire the assets of other firms, a major potential source of fruitful investment has been dissipated, because cash in the hands of stockholders usually only reluctantly finds its way quickly into productive investment.

Other drains on corporate cash result from merger. Every time there is an acquisition, significant transactional costs gnaw away at available capital: fees for lawyers, for accountants, for investment bankers. Also, the attention of a company's highlevel management probably is diverted from other pursuits that might better benefit the company and our nation in the long term.

There is also the question of whether these huge merger efforts affect the credit markets and the flow of capital. In the Conoco affair and related developments, six corporations reportedly have borrowed or hold options to borrow some \$25 billion at a

time when the prime interest rate hovers around 20 percent. Is this borrowing devouring available credit? Is it driving rates up to the detriment, for example, of the auto industry, the housing industry, and small business?

Finally, there is evidence in a recent National Science Foundation study that, while bigness may not in itself be bad, it may be less productive of new technology. Over a 20-year period ending in 1973, the study found that small firms produced 23 times more exploitable ideas per dollar spent on research and development than did the

large corporations.

These concerns I have expressed relate only to the economic effects of mergers. The Members of Congress who passed the Sherman Act of 1890, reacting to the economic domination of "trusts" such as Standard Oil, also feared the social and political consequences of concentrated corporate power. Local communities and their workers, they knew, suffered when plants were closed or relocated. But, at least, they dealt with local owners who likely had a personal commitment to the community's well-being. Today these local groups more often must deal-if, indeed, they can deal at all-with a far-away conglomerate management interested primarily, if not only, in short-term profits. Some businessmen may admire such detached decisionmaking that is devoid of human and community values, but in the long run, I doubt that our Nation will tolerate this kind of aloof management.

There are also troubling social and political consequences if small businesses were to die. Self-reliance, hard work, innovation, these are the threads of the fabric of American life, woven into it by the traditional independent entrepreneurs of this nation. Will these values survive if all our economic assets are concentrated in the hands of a few large corporations? Might not complacence replace self-reliance? Why work hard if benefits flow only to a distant management and unknown shareholders? surely are concerns as important as the presumed beneficial economic effects of monopoly that seem to be the sole point of ref-

erence of this administration.

Any departure from long-term antitrust policy, I think I have shown, brings with it large, political, social, and economic risks. And once mergers and acquisitions have occurred, the damage may be irreparable. When any merger or acquisition has been consummated, assets are comingled; personnel shifted, hired or discharged; technology and trade secrets shared. Recreation of the original separate entities becomes impossible, even when dictated by the courts. For example, the 1959 Pabst acquisition of the Blatz Brewing Company was declared un-lawful by the Supreme Court; but, after 16 years of litigation, the case was ended when the Government could not obtain any divestiture of Blatz. And recent Government antitrust litigation involving IBM and AT&T suggests the crushing economic and political costs in any attempt to restructure an industry.

Because of the Government's inability to deal effectively with illegal mergers and acquisitions, I sponsored the Hart, Scott, Rodino Antitrust Improvements Act 1976, which gave the enforcement agencies sufficient access to advance information about proposed acquisitions and mergers so they could block unlawful activity. However, all the Government's enforcement tools are worthless if the Administration declines to tighten the screws, or close the cutoff valve. In short, despite the available enforcement tools, we may suffer structural changes to our economic system that might

be damaging and irreversible.

The new merger wave highlights rather dramatically some of the remaining inadequacies of our merger law, including its failure to address directly large conglomerate acquisitions. The Administration by its nonchalance about these issues, could, ironically, spark a campaign that will end up deciding that bigness, if not bad, is not benign.

FREEDOM OF CHOICE AND RETIREMENT PLANS

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

McDONALD. Mr. Speaker, Mr. within the Economic Recovery Tax Act of 1981, under the innocuous title of "Miscellaneous Provisions," is section 314(b), a section that will drastically alter the basic concept of individual retirement accounts (IRA's) and other types of individual retirement plans. Section 314(b) will impose a prohibitive penalty on those individuals who seek a hedge against rampaging inflation by investing in tangible assets. By this provision, we are, in essence, establishing a national economic policy with regard to retirement plans whereby only intangible assetspaper-are to be considered as a proper form of investment by those who are working and who are making investments and attempting to plan for their retirement.

We must ask ourselves if this is our intent, because regardless of our intent, this will be the effect of our actions. In a fluctuating economy, can we say with certainty that one form of investment, tangible or intangible, is acceptable while the other is not?

Section 314(b) is contrary to the basic principle under which Congress enacted legislation creating IRA's and other types of individual retirement plans. Is it now our intention to renounce that principle and declare that the individual is incompetent to invest the money that he or she has earned and that Congress will direct such investments? What is to become of the concept of freedom of choice and its basic tenet that the individual is the best judge of his own personal affairs? For in no uncertain terms, section 314(b) deprives our citizens of that basic freedom of choice, to self direct their investment dollars.

In the near future, legislation will be introduced to correct the unfortunate provision that we are voting on today. However, I bring this matter to my colleagues' attention at this time and I urge them to support legislation that will return the individual's freedom of choice in directing their investment dollars into whatever medium they believe will provide them with the greatest security.

In addition, I recommend to my colleagues the following statement of Harry V. Lamon, Jr., Esq., of Atlanta,

I am founder and past president of the Southern Pension Conference and the Southern Federal Tax Institute, and served as a member of the ERISA Advisory Council representing the general public from 1975 through 1979. In my view, the conference committee report language is unfortunate for a number of reasons.

Current tax law generally permits individuals to self-direct investments in individual retirement accounts (IRA's) or in accounts held under qualified retirement plans. Many individuals have chosen to invest in coins. metals, gems, stamps, art and other items of tangible personal property. To avoid current taxation on such investment, current law requires that such investments be held under the earmarked account, and not be held as a personal possession of the individual. A little known provision of the Economic Recovery Tax Act of 1981, Sec. 314, would change current law effective January 1. 1982, and would provide that any investment in a "collectible" automatically would be deemed a current distribution subject to current taxation. This provision should be repealed for the following reasons:

The provision was adopted without prior notice to the public and without hear-

ings

2. The provision effectively prohibits a form of investment which has substantially outperformed more traditional investments in recent years.

3. The provisions substantially curtail the freedom of individuals to invest their own money as they determine is in their own best interest

4. The provision discriminates against individuals who wish to invest their own money in tangibles as opposed to intangi-

The provision will have a substantial and detrimental impact on thousands of businesses, most of which are small, which trade in coins, stamps, gems, antiques, art, precious metals, antique automobiles, and other items of tangible personal property.

6. The provision grants to the Internal Revenue Service through the Secretary of Treasury, extremely broad powers expand the restrictions to "any other tangible personal property". It would appear that IRS could assert the authority extend the restrictions to investments in commodities and equipment and items not even contemplated by the Congress.

7. Portions of the provision are unclear. Does it extend to jointly owned property? To property owned in a joint venture or general partnership? To property owned through a limited partnership? To property owned by a corporation? To property owned by an electing corporation under Subchapter "S" of the code? To property owned by a trust?

8. The provision is limited to IRA's or individually-directed accounts. It apparently does not apply to non-directed accounts under qualified plans. This would permit a trustee to invest plan assets in "collectibles" for all participants, whether the individual participants desired such investments or not, but would not permit individuals to direct their own investments.

In conclusion, I wish to emphasize that Sec. 314(b) applies not only to Individual Retirement Accounts (IRAs) but also applies to acquisitions of "collectibles" by participants in all self-directed qualified retirement plans described in Internal Revenue Code Sec. 401(a).

This is a major reversal of tax policy and one which will begin a rush, in the coming months before December 31, 1981, by individuals to earmark "collectibles" which they may never have considered had they been given the option to acquire them over a period of years. This is simply bad tax policy. It focuses millions of dollars in a direction which might never have been conby participants under qualified plans had collectibles not been singled out for elimination as a permissible investment. in "individually-directed accounts"

In the hearings leading to enactment of ERISA, much testimony was given in favor of exempting "individually-directed accounts" from the normal rules on diversification and prudence. The concept adopted was to allow individuals to invest their own money as they saw fit. This policy is now being attacked by defining as impermissible investments, those "hard assets" which have always been the ground rock of our

American democracy.

This opportunity to protect one's purchasing power at his actual retirement date is now, by this section, being eliminated without the benefit of any hearings or public discussion of this important tax policy change.

Sincerely.

HARRY V. LAMON. Jr.

NEW ECONOMIC CHAIR AT HARVARD

HON. MARC L. MARKS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981 . Mr. MARKS. Mr. Speaker, I have

the unique good fortune to count as one of my dearest friends, Mr. Herbert Ascherman of Erie, Pa. Herb is one of Erie County's leading business figures, having served for years as the president of American Hardwood Industries of Union City and as a consultant and a leading stockholder of Hammermill, Inc., one of the Nation's major producers of paper products.

Herb is a highly competent business executive, a community leader, philanthropist, and a devoted husband and

father.

One of his particular areas of interest has been economics. Herb in my opinion is one of the most thoughtful and articulate defenders of a free enterprise economic system that it has been my privilege to know. It is Herb's nature to support with his time, energy, and financial resources that in which he believes strongly. He has therefore just recently generously endowed a teaching chair in economics at Harvard, which is his alma mater.

This new economic chair at Harvard. the Ascherman Professorship, was created specifically to "stimulate consideration of alternate ways of providing for the legitimate social needs of the American people within the framework of our free enterprise system." Herb's own articulately expressed rationale for endowing this economic chair gives real insight into Herb's combined commitment to free enterprise economics and to the social welfare of his fellow human beings, and I quote:

1. In December 1980, an under-publicized but very significant conference entitled 'Eurosocialism and America' was held in Washington under the auspices of Michael Harrington's Democratic Socialist Organizing Committee. Speakers included Willy Brandt, Olof Palme, Francois Mitterrand, Tony Benn, Joop den Uhl and other leading Western European socialists-intelligent, committed, persevering leaders of western society, not wild-eyed radicals. They espouse a very appealing meassage for large numbers of people in the western world.

Based on twenty years of extensive business travel throughout Europe, my observation is that Europeans perceive socialism to be the best available means of effectuating a justified correction in the imbalance between the way of life of the rich and the average, not just the poor. That the process involves central planning, the concentration of economic power in the hands of a bureaucratic few and the erosion of a degree of individual freedom is regarded as an acceptable price to be paid for the benefits received. Restrictions on free enterprise hardly justify conversation, much less concern, Economic systems are not nearly as interesting to European voters as the promised size of their piece of the economic pie—as evidenced by the recent national elections in France, notwithstanding the economic problems currently developing for the socialist governments of Sweden, the Netherlands, Belgium and West Germany.

In my opinion, Western Europe today is a mirror of this country tomorrow unless strong, affirmative action is taken to counteract socialism's ideological momentum. If we do not devise and articulate an understandable, creditable and appealing social program consistent with our free enterprise system we will lose our way of life simply by default-not because of any conscious effort to change our economic system, but because political promises to ameliorate society's social ills will lead to bigger government, central planning and socialism. In short, the social tail will wag the economic dog

2. While we Americans are quite articulate in our criticism of what we are against in the socio-economic sphere, we are very inarticulate in promulgating what we are for. If there is a well defined, proactive, creditable and appealing approach to America's social system, it is well hidden from the vast majority of Americans. We don't read about it, we don't hear about it and we are incapable of debating it with those who urge and defend other systems.

3. The American genius has often solved difficult problems when attention is focused and energies, resources and creativity are harnessed in concerted effort. The formulation of a social policy consistent with our free enterprise system that can renew the hope of all Americans for a life of dignity characterized by freedom from want war-rants (indeed demands) a coordinated attack by thinking, concerned Americans,

I think all Americans will benefit from this magnanimous act of Herb Ascherman and I am privileged to bring his philanthropy to the attention of my colleagues in the Congress.

THE RESPONSIBILITY OF THE MEDIA

HON. LOUIS STOKES

OF OHIO

IN THE HOUSE OF REPRESENTATIVES Tuesday, August 4, 1981

Mr. STOKES. Mr. Speaker, thank you for providing me with this opportunity to put forth my candid assessment of the performance and responsibility of the media to serve every citizen of this Nation regardless of their race or economic class.

From my perspective as a public figure and one confronted with the press on a daily basis, I have to say that the media does not always meet its responsibility. Too often, it is my belief that the determination and actual communication of the news is done without taking into account the news needs of every segment of the population.

Mr. Speaker, we need not look far to find supporting evidence for this assessment. In March 1981, when I and my colleagues in the Congressional Black Caucus met the President's challenge by developing an alternative budget which was more in line with the needs of the poor and disadvantaged in America, news organizations across the country were provided information on the budget. However, few news organizations with the exception of the ever vigil black press. gave the proper coverage of this significant news event.

Through this arbitrary classification and disregard for this legitimate news event comes the stark realization that news affecting minorities and the less influential Americans, especially positive news, is oftentimes ignored.

Mr. Speaker, for a medium that enjoys such freedom and one that repeatedly references the fact that it fulfills "the people's right to know", this absence of news and communication to minorities and the downtrodden in this country is a breach of responsibility and inexcusable.

Mr. Speaker, I would be remiss in my duty if I merely cited the problem and provided no solution. One way that I envision that this situation can be rectified is by the hiring of blacks and other minorities by our news organizations. This hiring should range from the starting reporter position up the ladder to include the people who actually determine what is newsworthv.

At this time, Mr. Speaker, I would like to insert in the RECORD the speech delivered by Mr. Thomas Winship, president of the American Society of Newspaper Editors on this subject:

REMARKS OF THOMAS WINSHIP, PRESIDENT. AMERICAN SOCIETY OF NEWSPAPER EDITORS

My president's speech will be short and to one point. I appeal with all my heart to the conscience of the leadership of the print media to confront our failure in minority hiring. I realize social engineering is a taboo subject in Washington these days but maybe I can have safe passage because I'm talking about social engineering initiated and paid for by private industry, not government.

Our casual attitude toward minority employment is particularly embarrassing because our mission is semipublic and because it is protected by constitutional guarantees. Yet newspapers, with a nearly all-white face, attempt to portray accurately a mixed society.

Our industry has spent millions in dra-matically successful technological research separation for the age of satellites, computers, cable and video.

Our industry has invested millions in readership and market research.

Our industry has devoted uncounted programs, panels, discussions and staffing in a national push for better writing.

The commitment and funding for these

enterprises has been impressive.

But how strong is the moral commitment to equal opportunity inside our newspaper offices? Where is the commitment to sensitivity in new coverage that can be enhanced

by racial mixture on our staffs.

Fourteen years ago, the Kerner Commission, which studies racial strife, said: "By and large, news organizations have failed to communicate to both their white and black audiences a sense of the problem America faces and the sources of potential solutions. The media report and write from the standpoint of a white man's world. . . . this may be understandable, but it is not excusable in an institution that has the mission to inform and educate the whole of our socie-

ty."
The Kerner Commission barely pricked our conscience. The effort to increase the number of minority journalists simply never has had broad-based backing among editors and publishers. The majority of the daily newspapers in the Nation still do not employ minority journalists—and never have. The number of minorities in newspaper management jobs is still negligible.

A year ago, there were 47,300 professional journalists in the country-reporters, copy editors, photographers, artists and news executives, and of these, 2,400 were minorities, up 100 from a year ago and 4.96 percent of

our work force.

Two years before, in 1978, the same survey showed 1,700 minority journalists out of a total 43,000 in the profession-or 3.9 percent.

Although 4,300 more minorities were hired in 1980 as business expanded, only one

of every 11 was a minority.

But, according to Jay Harris, Assistant Dean of Medill School of Journalism, the percentage of newspapers with minorities on their news staffs has dropped 40 to 37

percent in the past year.
From the standpoint of background, 29 percent of the minorities have five or more years experience. Ten percent have 10 or more. Only a trickle of minorities are work ing their way up the ladder. Most are still coming in as reporters or at other entrylevel positions rather than closer to the top.

You can count the number of top-ranking

minority editors on one hand.

No one can feel comfortable about that record. One conclusion can be drawn from

the last 14 years: Apparently most publishers and editors do not see a compelling enough argument-professional moral or economic-for ending this history of neglect of a truly integrated American press. It is fair to ask whether such compelling arguments do exist.

I believe they do.

First, the right of the press to be free from government control was guaranteed by an amendment to the U.S. Constitution in 1791. The goal of the framers of that was not just to ensure that newspapers in the country would be free. Rather, the Amendment was intended to protect the press because newspapers are an ssential means to an important end-a fully informed citizenry as the necessary foundation of a democratic society.

As far as minorities are concerned, the press has failed to satisfy that responsibility and a major reason for this failure is the paucity of minorities among the ranks of re-

porters and editors of newspapers. Consequently, too many minority readers reject newspapers and in so doing reject an important opportunity to become fully-informed. They thus lessen their ability to participate effectively in the process of self-

government.

Second, newspapers are—or at least should be—the glue which makes a community out of a group of individuals who live in the same area. But, once again, because of the absence of an integrated staff and the resulting inadequate reporting, this community service is not performed well. To be there are periodic blockbusters produced by newspapers-those impressive and often commendable one-shot efforts to "tell it all." But persons in a community live But persons in a community live from day to day, and need to be informed about each other's lives on just that regular

Newspapers also offer leadership to a community-or should. Most often that is accomplished through reporting or editorials. But newspapers also lead by example, and in all too many American communities the example newspapers set and the leadership they offer in the matter of equal opportunity are ultimately quite out of step with the

best principles in this Nation.

Third, profits. The time has come to cease being shy about mentioning profits in connection with minority hiring. There are literally millions of minority nonreaders to whom, I believe, newspapers can be sold. And, if we are able through the development of a better newspaper, a more widely distributed newspaper, to sell newspapers to more minorities then we can sell those new minority readers to advertisers. Thus, newspapers will be more prosperous and in a better position to do more important things for more important reasons.

The racial complexion of nearly all city rooms in 1981 presents a crisis in moral values and demographic blind-sidedness. Can we afford business as usual in minority employment at a time when our electronic brethren and exploding scientific and computer breakthroughs are bombarding newspapers in all directions; at a time when newspaper circulation and lineage gains are

not the easiest to achieve.

Today the black population stands at 26.4

or 11.7 percent of the Nation's total.

Today there are 19.8 million Hispanics in the United States. A figure that has grown 14.3 percent in just the last 5 years. In Texas one of every four residents is Hispanic; in California, one out of five. Recent Census figures on minorities in all major cities underscores this dramatic shift.

Yet the average daily newspaper is still covering this multi-faced society through white eyes and ears.

Ask any circulation manager how he is doing in the nonwhite areas of the city.

Ask any advertising director how well he does in the nonwhite market. A respected market research firm in California places the combined income of blacks in this country at \$125.8 billion and Hispanic income at \$60 billion and rising.

Fourth, and most important is the morality issue. We believe in equal opportunity for all. The momentum has somehow slipped. Let's pick it up.

I have a proposal, not a cure-all by any means, but one I wish the various journalist organization would consider. Among newspaper organizations, the Nation's editors have been in front of others in expressing concerns over minority hiring. Only ASNE has a standing committee on minorities. thanks to the wisdom of Eugene Patterson of St. Petersburg, who set up this committee 3 years ago during his presidency. Since then, this committee, especially under the leadership of Chairman Richard Smyser, has been the most active group in ASNE.

But, we are dealing with a critical situation that is industrywide. We need the help of the advertising directors, who know the growing purchasing power of Blacks and the Hispanic population. We need the help of circulation managers who are out on the streets, and above all, we need the help of the publishers, who are the ultimate word on hiring and firing and who negotiate the union contracts.

Dick Smyser's ASNE report mentioned the need for a "super committee." I take his thought a step further.

Let us use the Newspaper Readership Project, now in its second year, as a structural model for bringing all elements of the newspaper industry together to address this most crucial moral and economic problem. I suggest that we set up a separate newspaper minorities project. It should have adequate industry funding and be directed by a respected publisher or expublisher. It should be represented equally by all the standing industry organizations-the American Newspaper Publishers Association, the American Society of Newspaper Editors, the Associated Press Managing Editors, the International Advertising Executives Association and the International Circulation Managers As-

This plan would at least do two things. It would display a new sense of urgency about this social blight in our business. It also would provide the funding for fresh hardheaded market research into the economic and educational aspects of our crisis in morality. There's no other way to describe it.

I urge the hierarchy of ANPA, ASNE and APME to consider the proposal. Tear it apart, come up with a substitute approach. if you will. But, please at least address seriously this overriding problem.

COMMEMORATING THE DAY OF THE INVASION OF CZECHOSLO-VAKIA

HON. DON RITTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

Mr. RITTER. Mr. Speaker, August 21 will mark the 13th anniversary of the Soviet invasion of Czechoslovakia. It was on that fateful day that the Soviets invaded that country with over Warsaw Pact troops crushed the dreams and liberal reforms of the Czechoslovak nation. With events in Poland somewhat similar to those of Czechoslovakia 13 years ago, this anniversary takes on an increasingly important meaning.

Throughout the early part of 1968, the people in Czechoslovakia had begun to enact liberal reforms. Under Alexander Dubcek, the Government attempted to incorporate these reforms while at the same time not arousing Moscow's ire. In many respects, the Czechoslovakian reforms followed the Khrushchev doctrine of roads to Socialism." summer, though, the Soviet press had begun a war of vilification against the liberal reforms of the Dubcek government. By August it seemed a compromise had been worked out between the Kremlin and Prague. The denunciations in the Soviet press stopped, Soviet troops were removed from the border, the problem seemed to have lessened. A business-as-usual feeling prevailed and plans were underway for the summit meeting between President Johnson and Prime Minister Kosygin in Glassboro, N.J.

The euphoria in the streets of Prague, however, was to be shortlived. Late on the night of August 20 and early into the morning of August 21, without the slightest warning or provocation, Soviet troops and tanks poured over the border and destroyed whatever hopes the Czechoslovakian people had of reform. In all 650,000 Soviet troops were employed, and Prague, with a population of only 1 million, was awash with Soviet troops and tanks. By means of comparison, the United States at the very height Vietnam War had 530,000 the of combat troops in all of Vietnam.

The invasion of Czechoslovakia did little more than cause international condemnation and instill in the people of Czechoslovakia an undying hatred of the Soviets. The invasion also shattered once and for all the myth that the Soviet Union was the "fraternal brother" to all the Eastern European peoples. It was a grim reminder of how totalitarian and how unmerciful the Soviet leadership is. Most significantly though, it demonstrated that these Eastern European satellites Soviet have an unquenchable thirst for na-

tionalism. As was the case with Czechoslovakia 13 years ago, and in Poland today, the Soviets must always look over their shoulder and be wary of nationalism. Today in the Ukraine, the Baltic States, East Germany, and most notably in Poland, the seeds of nationalism have again begun to germinate. Marxism-Leninism has not given any cohesion to compete with nationalism. Cracks have appeared all over the Soviet house of nations.

As a Congressman, representing a community deeply tied to its roots in Eastern Europe and in the nations of the Soviet Union, as a member of the Helsinki Commission, I am proud to stand up today and speak with pride and respect for the people of Czechoslovakia and for all the people who continue to work toward the day when freedom replaces totalitarianism. Although 13 years have passed from that fateful day in August, the spirit and courage they demonstrated to the world has not and will not be forgotten.

SPACE IS A VITAL AREA FOR CONSERVATIVES

HON. NEWT GINGRICH

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

Mr. GINGRICH. Mr. Speaker, I do believe that America is back in space to stay. But it is a critical time for America's space program; we must look toward the future and set clear goals for America in space. George F. Will in a column for Newsweek takes a creative look at politics and space. His column follows:

MEET HALLEY'S COMET (By George F. Will)

In 1910, the last time Halley's comet came by, an Oklahoma sheriff had to stop some peculiar citizens from sacrificing a virgin to the comet. The comet is coming again in 1986, so Oklahomans should lock up their daughters. And David Stockman should stop sacrificing science on the altar of parsimony.

I shall use my dying breath to whisper praise of Stockman, but he should not have killed NASA's plan to send a satellite to intercept the comet. It would have cost \$300 million over five years, 25 cents per person a year, and it should have been an occasion for the Administration to leaven its frugali-

ty with a farsighted exception.

Comets, and especially Halley's, have excited superstition far from Oklahoma. The historian Josephus said a comet resembling a sword (Halley's, in A.D. 66) foretold the destruction of Jerusalem (A.D. 70). The visit of Halley's comet in 1066 was thought to have been a portent of the unpleasantness that befell King Harold at Hastings. Shakespeare said: "When beggars die, there are no comets seen; the heavens themselves blaze forth the death of princes." The day Edward VII died (May 6, 1910) Halley's comet was especially vivid (more vivid than that particular prince merited). Mark Twain, born during the comet's 1835 visit, said he would be disappointed if he didn't depart when it came again. He died April 21, 1910, just before the comet's "tail" brushed earth and as (Twain would have loved this) people were selling anti-comet pills to a public panicky about gases in the tail.

In "The Comet Is Coming! The Feverish Legacy of Mr. Halley," Nigel Calder says Halley's comet is, as most comets probably are, "sky pollution," a "dirty snowball that comes tumbling out of the freezer of twilight space." (There are an estimated 100 billion comets in our itsy-bitsy system.)

FLU MACHINES

These cosmic jaywalkers rarely bump into each other because space is even more vacant than Wyoming. (If there were just three bees in America, the air would more congested with bees than space is with stars.) But there is a constant rain onto earth of meteoric debris, and an occasional "thump." Calder writes: "Early in the morning of 30 January 1908 the driver of the trans-Siberian express heard loud bangs and imagined that his train had exploded. his wide-eyed passengers said they had seen a bright blue ball of fire . . ." A small comet had leveled a 70-mile-long strip of forest.

But some collisions may have been constructive. One theory is that a comet brought to earth the first bacteria or whatever it was that started the ol' ball of life rolling 4 billion years ago (fortunately, before governments demanded environmental-impact statements). Another theory is that comets are "flu machines," bringing viruses to earth. Ask now what caused the fall of Rome and the rise of Christianity. Calder says some theorists argue: "During the period from A.D. 400 to 1400 the earthlings had a particularly nasty time with the clouds of diseases spun off from comets. A 'diseases-filled' millennium forced people to live farther apart and thus to 'uncivilise' themselves; it also . . . moved the Europeans to adopt the 'sombre' religion of Christianity.'

But if that is true, Calder asks, why not "If a millionth part of the meteoric debris falling to earth from comets consists of viruses, a small garden could collect millions of viruses every day, ready to assail plants, pets and humans."

Calder finds a bit more plausible the theory that a comet killed the dinosaurs; they did die out suddenly, and folks used to think they were just too big for Noah's ark. Today some scientists think a big comet, perhaps 6 miles in diameter, struck earth, throwing up a hundred times its weight in dust-much more dust than was sent up by the eruption in 1883 of the Krakatau volcawhich produced "glorious sunsets" around the world for two years. The theory is that the cloud produced by the comet collision blocked out sunlight, and in the fouryear "night" much vegetation and most dinosaurs died.

Why, then, is there no crater? Well, there is a suspicious ring-shaped something on the seabed north of Australia. (Oceans and continents have been meandering around during the last 65 million years.) And in geological formations around the world are thin layers of clay with a chemical composition that suggests that long ago the earth was suddenly swamped with a particular element (iridium) in an amount that seems unlikely to have come from a source on earth. If this theory is true, then if, 65 million years ago, the comet had come by an hour

earlier or later, it would have missed and dinosaurs might still rule the earth. So a comet may have been a benefactor.

MYSTERIES

Anyway, comets are owed the respect due the elderly. Most comets in our solar system spend most of their time lottering (relatively speaking) beyond the outer planets. So they are among the "oldest," meaning least changed, objects; they experience less of the erosion and evolution that erases the imprint of the birth of the solar system. A rendezvous with one might reveal evidence about the origins of the universe, the human race and Oklahoma.

If our curiosity about such things atrophies, so will our humanity. That is why the Halley's comet intercept program, which can still be saved, should be used by the Administration as an opportunity to practice "creative exceptionalism." The country wants conservatism, but needs conservatism subtle enough to make exceptions to the principle of parsimony. Conservatives cannot turn space exploration over to their two lovers, federalism or capitalism—to the states or the private sector. Neither Utah nor Exxon can do it. Only Big Govern-

ment—only our government—can do it.

Conservatives are supposed to take the long view, and to take intangibles seriously. They should want to look back toward the creation of the universe that has produced, as its crowning glory, the Reagan Administration. And they should look far into the future and imagine a future in which mankind is not curious about the wondrous mysteries of its situation.

We know next to nothing about virtually everything. It is not necessary to know the origin of the universe; it is necessary to want to know. Civilization depends not on any particular knowledge, but on the disposition to crave knowledge.

JOHN GLENN'S CONTRIBUTION TO THE TAX BILL

HON. BOB SHAMANSKY

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. SHAMANSKY. Mr. Speaker, I would like to call to the attention of my colleagues the efforts of Senator John Glenn on the recent tax bill as outlined in the Wall Street Journal of July 28, 1981.

[From the Wall Street Journal, July 28, 1981]

MORE TAX CREDITS FOR RESEARCH ARE VOTED BY SENATE, COMING CLOSER TO HOUSE BILL

Washington.—The Senate voted to liberalize corporate tax credits for research and development costs, bringing its measure closer to the more generous provisions in the House tax bill.

By voice vote, the Senate approved a measure offered by Sens. John Glenn (D., Ohio) and John Danforth (R., Mo.) that would allow business to calculate incremental tax credits for research-expenses incurred for wages, supplies and leasing computers. The original tax bill based the credits only on wage outlays.

The Senate amendment broadens the definition of eligible research expenses but doesn't change the original bill's formula for calculating the credit.

Under the formula, a business would average its research expenses over the preceding three tax years, then take a 25% tax credit in the fourth year for the amount exceeding that average. For example, if a company spent \$1.5 million on research in one year after spending an average of \$1 million in each of the prior three years, its credit in the fourth year would be 25% of the

\$500,000 difference, or \$125,000.

However, the eligible research expenses in the fourth year can't be more than twice the average of the past three years. Therefore, if a company's average research expenses are \$1 million during the three-year period, its 25% credit would only apply to as much as \$2 million in outlays in the fourth

The ceiling, which Senate sources said was pushed by the Reagan administration, was imposed to keep the estimated loss of revenue from the new provision in line with the losses projected from the original measure. The credit is expected to cost the Treasury \$40 million in fiscal 1981, \$329 million in fiscal 1982, \$602 million in fiscal 1983 and \$724 million in fiscal 1986.

The House is considering two versions—offered separately by Democrats and Republicans—that include a broad definition of research expenses along the lines of the one the Senate approved. In addition, both House versions allow corporations to deduct 65 percent of their expenses for research contracts granted to universities. The Senate version doesn't have any such provision.

Separately, the Senate approved an amendment of Sen. George Mitchell (D., Maine) that would make the last-in, first-out method of inventory accounting more attractive for businesses whose annual sales averaged less than \$3 million over the three preceding tax years. Under the LIFO method, items purchased last are considered sold first and charged against current sales. This reduces the ballooning effect of inflation on profit.

Under generally accepted accounting standards, companies must increase their inventory values when they adopt LIFO. That generally raises their tax liability.

The Mitchell amendment, which was approved in a 94-to-0 roll call vote, would allow small businesses to spread that higher tax liability over three years instead of the current one year.

In addition, the Mitchell amendment would let companies use either the Labor Department's consumer price index or the Commerce Department's producer price index for valuing their inventory under the LIFO method. Under current law, a company must calculate its own index at a huge cost. The index is applied to its inventory for each year after the year LIFO is adopted.

ROBERT ABRAMS' COMMENTS ON THE VOTING RIGHTS ACT EXTENSION

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

 Mr. GARCIA. Mr. Speaker, under leave to extend my remarks, I herewith insert in the following testimony on the Voting Rights Act to my colleagues:

STATEMENT OF ROBERT ABRAMS, ATTORNEY GENERAL OF THE STATE OF NEW YORK, ON EXTENSION OF THE VOTING RIGHTS ACT OF 1965

I am grateful for the opportunity to testify before this distinguished subcommittee in support of the proposed extension of the Voting Rights Act of 1965. I speak as the elected Attorney General of the State of New York—a state which has three of its largest counties covered by the special provisions of the Voting Rights Act. I believe that extension of those provisions is essential.

The right to vote and to have that vote count is the bedrock of our democracy. By ratifying the Fourteenth and Fifteenth Amendments in the 1860's, the states declared this to be true. By passing the Voting Rights Act one hundred years later, Congress sought to make the Constitution's promise of voter equality a reality, at long last, for our minority citizens.

Every state of course has the right to determine its own electoral processes, and the Voting Rights Act does not interfere with this right. But Congress has also declared that states' activities must be exercised within the constraints of the Fourteenth and Fifteenth Amendments. Federalism can mean no less.

The history of the past fifteen years has proven Congress right. The Voting Rights Act does give practical effect to the Fourteenth and Fifteenth Amendments. It has led to dramatically increased registration and voting among Black and Hispanic citizens, and has helped to increase the numbers of Black and Hispanic elected officials. Because the Act works so well, Congress wisely decided to extend its terms in 1970 and again in 1975.

The Act eliminated the literacy test for voting, a discriminatory requirement of long standing. And to assure that more novel or subtle devices did not replace older forms of discrimination, the Act included a "preclearance requirement." For the past fifteen years, this requirement has deterred the use of new forms of discriminatory practices—in many cases by discouraging even their introduction into state legislatures.

In 1975, many argued that because the affected jurisdictions had made significant gains, the Act's preclearance requirement was no longer necessary. It turned out not to be true. In 1976, the Department of Justice objected to as many or more proposed changes from some affected states as it had in any previous year. The same arguments are being made today, and are equally likely to prove untrue. Unfortunately, discriminatory practices will continue to be devised next year, and in future years, and our nation cannot tolerate that. Extension of the preclearance requirement is the crucial safeguard we must maintain.

In 1975, Congress also extended the protections of the Voting Rights Act to language minorities, after finding that they too had been systematically excluded from the electoral process. In the last six years, bilingual elections have begun to translate the Fourteenth Amendment into a reality for many American citizens who are not fluent in English. For example, the number of Hispanic citizens who voted last November was 20% higher than in 1976. And this increase took place despite what the Federal Election Commission in 1979 found to be "minimal" compliance with the bilingual provisions in some areas of the country.

The Voting Rights Act's prohibition against discrimination in voting applies nationwide. The special provisions of the Act apply only to states and political subdivisions that meet certain specifications. Kings, New York and Bronx counties in New York State are subject to the Act's special provisions, including Section 5, which requires preclearance of any changes in voting, and Section 203, which requires bilingual elections. The balance of my testimony will relate to New York's experience in complying with these requirements. That experience convinces me that neither requirement is overly burdensome and that both requirements effectively serve to protect the rights of minority citizens.

ADMINISTERING THE PRECLEARANCE REQUIREMENT

The counties of Kings, New York and Bronx first came within the purview of the Act in March, 1971. It was then that the United States Attorney General determined that the literacy requirement imposed by New York law was a "test or device" within the meaning of the Voting Rights Act, and the Director of the Census Bureau determined that less than 50% of the persons of voting age residing in each of the three counties had voted in the preceding presidential election.

Thereafter, as allowed by the Act, the three counties attempted, to be exempted by the federal court from the preclearance requirement. They tried without success to demonstrate that New York's literacy test had neither the purpose nor effect of abridging any citizen's right to vote on account of race or color. As a result, New York has been required to submit to the Department of Justice all the voting laws and procedures enacted since November, 1, 1968 which affect any of the three counties.

Because any change in state law or regulation necessarily affects the three counties, all such changes are precleared with the Department of Justice. Redistricting affecting any of the three counties is precleared; two examples are the upcoming statewide reapportionment and the recent realignment of the New York City Council after the 1980 Census. Additionally, changes unique to any of the three counties, such as location of polling places, are also precleared.

Because responsibility for complying with the Act's preclearance requirement regularly falls both on the New York City Board of Elections and the New York State Board of Elections, I recently had my staff discuss with the heads of these two agencies their views on the preclearance requirement. From these discussions, it became clear that the preclearance requirement has not been overly burdensome to administer.

The New York State Board submits to the Justice Department for preclearance all amendments to our Election Law. On average, eight to twelve amendments are submitted each year. The submission includes a cover letter of transmittal, a copy of the bill, the memorandum in support prepared by the bill's sponsor, any other memoranda that were influential in gaining passage, and the memorandum explaining the bill's terms and effect, which is prepared by the State Board of Elections for the Governor. By submission of these documents, the State Board of Elections is usually able to provide the Justice Department with all the information it requires to determine whether or not a proposed change will have a discriminatory impact. It should be noted that with the exception of a routine cover letter, the submission generally includes only documents which had already been prepared as part of the process by which the bill was enacted into law. On the rare occasion when this information is insufficient, the additional information required can generally be transmitted by telephone. When the voting change is not objectionable, the preclearance process imposes an insignificant burden on the state and results in no delay in implementing amendments to our voting laws.

The preclearance procedure followed by the City Board of Elections is similarly not cumbersome. The vast majority of changes submitted involve changes in local district lines and polling places. Again, the original submission is usually sufficient; when the Justice Department requires additional information, that information can also generally be provided by telephone.

OBJECTIONS TO VOTING CHANGES

Since becoming subject to the Act's preclearance requirement, New York has had approximately 500 changes in voting practices reviewed by the Justice Department. The Department raised objections three times: twice in 1974 and once in 1975.

A brief mention of these situations aptly demonstrates the Voting Rights Act's effectiveness in preventing changes with harmful consequences for minority citizens. In September 1974, the Department objected that certain polling places had been located in New York County in apartment complexes with mostly white tenants, although polling places had not been similarly located in complexes with mostly minority tenants. As a result of the objection, steps were taken to make polling places equally accessible to white and minority voters. In September 1975, the Justice Department objected to the consolidation of two Democratic leadership districts in Manhattan. The proposed consolidation would have dismembered a predominantly minority district, with the possibility that the votes of minority voters would be diluted. As a result of the objection, the consolidation plan was abandoned. In each case, the objection was interposed in a timely manner, causing the minimum necessary disruption to the electoral process. And, in each case, the matter was resolved without litigation.

The third objection, and the one which resulted in the United States Supreme Court's decision in *United Jewish Organizations of Williamsburgh, Inc. v. Carey,* involved the 1974 redistricting of State Assembly, State Senate, and Congressional districts in Kings and New York counties. Most of the redistricting was unobjectionable. However, the Justice Department was concerned that the creation of certain districts in those two counties would have the effect of abridging the right to vote on account of race.

While, of course, New York had the right under the Voting Rights Act to challenge the Justice Department's determination in court, the state chose instead to redraw the districts to prevent vote dilution. The reapportionment amendments were submitted to the Justice Department on May 31, 1974 and were approved one month later. However, white voters in Kings County sued, alleging that the plan violated the Fourteenth and Fifteenth Amendments.

Ultimately, the Supreme Court in the UJO case upheld the plan, ruling that the Constitution does not prohibit racial considerations when they are used to minimize the consequences of racial discrimination. New York, in redrawing the districts, had appropriately sought to alleviate the consequences of racial inequities and to achieve a

fair allocation of political power among white and minority voters in Kings County. Under the Voting Rights Act, the effectiveness of minority voting power could not be diluted by dividing minority communities among predominantly white districts.

The Court's decision in UJO acknowledges that a blind approach to redistricting may well produce grossly unfair results—albeit perhaps unintended. For example, in Kings County, in the early 1970s, the bulk of the Black population was concentrated near the center of the county. At that time, the traditional method of drawing district lines in New York State was to start at the peripheries of a county and work toward the center. Using this method of redistricting, the Black population would likely have been divided among more districts than would have been the case if the redistricting procedures started at the interior of the county and worked outward. The 1974 district lines in Kings County were, accordingly, drawn to avoid any unintentional discriminatory fects that prior districting plans may have had in distributing black residents, and thereby reducing the chances to elect representatives responsive to the needs of the minority community.

I have spoken in some detail about the effect of preclearance on the redistricting in Kings County because it raises the issue of vote dilution; that is, the practice of reducing the potential effectiveness of the votes of minority group members by redistricting, at-large elections, and annexations. We cannot permit the voices of black and Hispanic voters to be muted by dispersing these voters among districts in which by their numbers they comprise ineffective minorities. Both on local and national levels, legislatures will reflect the interests of all of the people, and not just one segment of the population, only when election districts are drawn in a non-discriminatory manner.

In the 1970's and 80's, the issues of voting discrimination have shifted from vote denial to vote dilution. With this shift, the preclearance requirement of Section 5 has become crucial. The overwhelming majority of objections interposed under Section 5 to expire just as the post-1980 census redistricting is taking place would be particularly inappropriate.

One recent New York example again highlights the complexities of redistricting and the continuing need for the preclearance mechanism. After 1980 census figures were released (unadjusted for minority undercount), the New York City Council rewrote the council lines in all five boroughs of New York City. The Voting Rights Act, and especially the preclearance requirement, has figured prominently in this redistricting. On the one hand, the Council redistricting appears to preserve the opportunity for incumbent minority members to be reelected. On the other hand, some claim that the Council could have been realigned to increase the number of districts in which minority voters constitute a majority, and thereby more accurately reflect the increased minority population of New York City which went from 31% to 47% between 1970 and 1980.

The Council's redistricting plan will have to be submitted to the Department of Justice for preclearance prior to its implementation. Obviously, we cannot now adequately analyze the factors that went into the reapportionment, or the effect on minority voters of the City Council redistricting. The Voting Section at the Department of Justice, with its acquired expertise, will evalu-

ate its ultimate impact. It will do so within 60 days, before the plan is implemented. If there were no preclearance, a potentially discriminatory redistricting plan might be implemented, and years spent in expensive and time-consuming court challenges. And even if the plan were ultimately found to be fair, the perception of deception or discrimination that might grow out of accusations made in protracted, heated litigation could not easily be eradicated.

The 1980 and 1990 post-census redistricting create the opportunity for diluting the voting strength of the growing numbers of minority voters. This seems to me argument enough for a ten-year extension of Section 5's preclearance requirement. Additional argument, however, is found in Section 5's deterrent effect. Some point to the fact that of the hundreds of submissions from New York, only three have resulted in objections. They cite this as evidence that Section 5 has become an unnecessary burden. I believe rather that these figures are evidence of the Act's effectiveness as a deterrent. A former member of the New York Senate's Election Committee has described to us how amendments to the Election Law, which might have had a discriminatory effect if passed, were often defeated or not even offered because of the barrier erected by the Voting Rights Act and the need for preclearance by the Justice Department.

The burden of meeting the preclearance requirement is one we can well afford. It is far less costly and far more expeditious to hundred voting five process through the Justice Department than to litigate through the courts the manifold challenges that would ensue absent preclearance. And, more importantly, Section 5 is a crucial safeguard of the gains the nation has made in transforming the promises of the Fourteenth and Fifteenth Amendments

into reality.

PROTECTING THE RIGHTS OF LANGUAGE MINORITIES

The language minority provisions of the Voting Rights Act are equally important in guaranteeing the right to an effective vote. New York State has a Hispanic population of at least 1.6 million people, 1.4 of whom live in New York City. As much as I would like to be able to say that New York has a long history of protecting the voting rights of its language minority citizens, I cannot fairly say that. However, I can state that with a prod from Congress and the federal courts-we are now taking steps to bring our Hispanic citizens into the electoral process.

In 1965, the Voting Rights Act included a provision, Section 4(e), which mandated that no person who had successfully completed the sixth grade in a public school,1 or a private school accredited by the Commonwealth of Puerto Rico in which English was not the language of instruction, could be denied the right to vote in any election because of an inability to read or write English. This provision was sponsored by Senators Robert Kennedy and Javits and Representatives Gilbert and Ryan, all of New York. Its explicit purpose was to deal with the disenfranchisement of large segments of the Puerto Rican population in New York because of an English-language literacy requirement in New York's constitution and election laws. There were those who honenstly believed that New York's English-language literacy requirement for voting was

an appropriate mechanism to encourage our citizens who did not speak English to learn it. But Congress declared that so precious a right as the right to vote cannot be withheld while a citizen, otherwise qualified to

vote, is learning English.

As an example, all those born in Puerto Rico are citizens of the United States. While Puerto Rico has a bilingual society, the primary language of Puerto Rico's people and its classrooms is Spanish; many citizens, born and educated in Puerto Rico are unable to speak, understand or read English. Until the mid-1970's, New York had no comprehensive program of instruction in English and Spanish. Congress recognized that it was inappropriate to penalize citizens for attending Spanish-language schools in Puerto Rico, or schools in the United States which had only recently begun to implement effective educational programs to teach English.

Elimination of the English literacy test was only the first step in opening the New York electoral process to citizens who are not fluent in English. In 1974, in Torres v. Sachs, a federal court, finding that New York's English-only voting procedures violated the Voting Rights Act, ordered New York City to provide bilingual elections. Specifically, the court order requires the New York City Board of Elections to:

1. Provide all written election materials, including ballots, in both Spanish and Eng-

lish;
2. Provide a sufficient number of bilingual election officials at each Board of Elections county office and at all polling places in areas with a high concentration of Hispanic

3. Post Spanish-language signs at all polling places and places of registration, stating that election officials are available to assist Spanish-speaking voters or registrants, and that bilingual printed materials are available: and

4. Publicize elections in the media in

Spanish.

In 1975, the State Board, after encountering some difficulties in obtaining statewide implementation, consented to a similar federal court order requiring bilingual elections statewide in Ortiz v. New York State Board of Elections.

New York's experience with bilingual elections demonstrates that although local officials may indeed be committed to a fair electoral process, it may take federal legislation or a court order to ensure that the commitment becomes action. The 1975 amendments to the Voting Rights Act, requiring bilingual elections in areas with significant numbers of language minorities, do precisely that. The Act's bilingual election provision, like those of Section 5, apply only to the counties of the Bronx, Kings and New York, where they serve to reinforce federal court

The New York experience demonstrates the importance of the bilingual provisions and the fact that they are not burdensome or costly to implement. In New York City. all printed election materials are bilingual. the extent possible, all forms are printed in both Spanish and English on the same form—either front and back, top and bottom, or left and right side. This policy extends even to the "No Smoking" signs. The envelope containing the "Notice of Cancellation of Registration" has a return address in English and Spanish, and a warning that the enclosed material is "very imconcerning voting status" both English and Spanish. And, needless to say, the enclosed notice is entirely bilingual.

The financial burden to the state of bilingual elections is minimal; beyond start-up costs, the sums are truly insignificant. For example, all translation of state-wide registration and voting materials is handled by the New York State Board of Elections. The translations are done by the Chairman of the Political Science Department of the State University at Albany, and cost, on average, just over \$1,000 per year for the entire state. In Westchester County, with a Hispanic population of over 45,000 people, the costs of providing bilingual materials is approximately \$3,000 per year, or less than 2% of the County Board of Elections' budget. By using volunteer interpreters provided by the Maryknoll priests and local Hispanic organizations, Westchester County spends no money on interpreters. And the return on these insignificant expenditures is enormous. It is estimated that since New York first provided bilingual elections, Hispanic registration has increased by 20 percent. Since 1965, the number of New York Hispanic representatives in the state and federal legislatures has more than doubled. With minimal costs or burden, New York has done much to integrate the Hispanic community in New York into the electoral

To those who contend that the bilingual provisions of the Act are no longer necessary, I point to the fact that significant numbers of people still emigrate to the United States from Puerto Rico alone. All of them, and many other Hispanic citizens who are not fluent in English, are citizens, entitled to vote. The Fourteenth Amendment's guarantee of voter equality demands continuation of the Congress' commitment to the Act's bilingual provisons.

CONCLUSION

The special provisions of the Voting Rights Act apply to all or part of 22 states. As I have testified, three New York counties, with more than 4.8 million people, are covered by the Act's special provisions. More people are protected in these three counties than are protected in the States of Alabama (3.9 million), Mississippi (2.5 million) or South Carolina (3.1 million) and only slightly less than in Georgia (5.4 million) or Virginia (5.3 million).

I am troubled by the argument that the Act singles out the Southern states. Even the few statistics that I have cited indicate otherwise. Furthermore, the Act's special provisions are triggered only by practices that are demonstrated to have a discriminatory impact, regardless of the state where they occur.

I am equally troubled that one response to this perception of regional discrimination is that preclearance should be implemented nationwide, without a trigger mechanism. Unless there is a need in all jurisdictions, it seems simply wasteful and arbitrary extend preclearance in this fashion. At a time when the stated goal of Congress is to cut the budget, and the goal of the Administration is to do away with excessive government, it is ironic that some in Congress would propose extension of a program without any prior showing of need for that extension. One can only suspect that the effort to extend preclearance nationwide is in reality an attempt to undermine the Act's effectiveness.

At a time when our national priorities are undergoing a major reassessment, it is critical that the Congress as our representatives not permit our commitment to voting rights to wane. The right to vote is fundamental

^{&#}x27;In 1970 Congress eliminated the sixth grade education requirement.

because, as the Supreme Court has noted, it alone preserves all other rights. If elected officials are to consider eliminating programs which aid racial and language minorities in obtaining social and economic equality, it is imperative that those minorities fully and fairly participate in the electoral process. We can ill afford to send to the American people a signal that voter equality is no longer a top national priority. Failure to extend the special provisions of the Voting Rights Act would do just that.

QUESTIONNAIRE RESULTS

HON. TOBY ROTH

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. ROTH. Mr. Speaker, I am pleased once again this year to present to my colleagues the important results of the latest congressional questionnaire from my own Eighth District of Wisconsin. I know that other Members of Congress feel as I do that our job of representing the people of our great Nation would be much more difficult without the detailed information these thoughtful citizens bring to us in the form of questionnaire responses.

This survey was returned by more than 10,000 residents of my district. They responded from not only the metropolitan areas, but also from rural areas of northeastern Wisconsin. The ages of the respondents corresponds to recent Census Bureau information about our district's population. In all, I am assured that the respondents mirror quite well the balance of their fellow citizens in the Eighth District.

trict.

Briefly, Mr. Speaker, the respondents gave President Ronald Reagan's economic recovery plan their endorsement. They supported his spending and tax-cutting program with optimism. These have been important steps we have taken in Washington this year.

The distribution of Federal aid through the administration's planned block grant programs was also endorsed by a 70- to 22-percent margin. The Eighth District's respondents thus reflect not only a high degree of support for President Reagan's economic program, but realize, too, that the cost of doing business in Washing-

ton has risen far too high.

Crime control, specifically legislation I have introduced to extend mandatory sentencing for most Federal crimes committed with the use of handguns received overwhelming, across-the-board support. Stricter probation standards and less plea bargaining by our prosecutors similarly motivated a favorable response from all parts of northeastern Wisconsin. Crime is an issue which I trust this Congress will adequately address in the coming months because our coun-

trymen undoubtedly sense more needs to be done to stem lawlessness in our cities and towns, at the Federal level no less than the local level.

People were generally in favor of a firm stand toward the Soviet Union. Stressing a resurgence of American prestige around the globe appeals to over 80 percent of the respondents to this questionnaire. Support of some form of national service by young Americans continues to be a matter of great concern among the people of the Eighth District as is also evident around the country.

Those are highlights of the responses I received. I am certain that this information is of value not only to my fellow residents, but to other Members of Congress and the executive branch. For that reason, and to further clarify the views of the participants, I add the detailed results to the Record today:

CONSTRUCTION GRANTS PROGRAM

HON. BOB EDGAR

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. EDGAR. Mr. Speaker, I would like to commend Chairman Roe of the Public Works and Transportation Subcommittee on Water Resources and the members of the subcommittee for their diligent work in conducting 5 days of comprehensive hearings on the construction grants program of the Clean Water Act.

Construction grants provide Federal assistance for communities to build sewage treatment plants. Our recent hearings in the Water Resources Sub-

committee conclusively reaffirmed that this program is critical to our Nation's efforts to clean up and protect our waters. As one witness testified:

Nationwide, the program helps stop the further degradation of our waters, and fosters significant improvements in the quality of our waterways * * * when the nearly 5,000 projects currently under construction begin to come on-line in the next few years, we should see more dramatic improvements in the Nation's water quality.

Furthermore, we have the firm commitment of the Reagan administration to work for reforms in the construction grant program and insure the program's continuation. Speaking for the U.S. Environmental Protection Agency, Deputy Administrator John Hernandez testified:

I really believe that the administration wants a bill and wants this thing to move along * * * We will do everything we can to move it along * * * so that we have some kind of consensus that will be funded.

In Delaware County, Pa. (Delcora), the regional water authority, will need over \$20 million from the construction grants program as local sewage treatment projects enter construction. Philadelphia treatment facilities, which are used by many Delaware County residents, also require multimillion dollar grants to continue current construction.

The current construction grant authorization expires September 30, and the Water Resources Subcommittee is currently drafting a reauthorization bill. Witnesses testified about a number of important changes in the program which would increase water quality benefits, reduce costs, and avoid project disruptions. I would like to point out several important changes which I feel should be included in the new clean water legislation:

Multiyear reauthorization: An authorization of at least 4 years would insure the kind of stability that is the most essential ingredient for an efficient construction grants program.

Maintain and increase the current set-aside for innovative and alternative technologies: These technologies, such as land application, water and energy conservation, and others, are our best hope for attaining clean water at a reasonable price.

Eliminate Federal funding for reserve capacity and collector sewers: This should encourage communities to more realistically assess their future growth needs, and more carefully plan their projects.

Increase emphasis on water conservation: Conservation should be recognized as an important means to reduce needed treatment capacity and costs. This is a legitimate focus for Federal assistance.

Retain funding for infiltration/inflow and rehabilitation: This is especially important in older urban areas where ground water leaks and rain-

water inflow unnecessarily burden treatment capacity.

Increase operator training and public education: We must protect the huge Federal investment in treatment plants by insuring that they are properly operated. Expanded education programs and information sharing would increase use of innovative, cost-effective technology.

Implement plans on nonpoint source pollution: Toxic pollutants entering water from urban and agricultural sources can defeat the water quality gains made through sewage treatment. Federal funding for areawide planning boards under section 208 must be made available as well as funding for the implementation of these plans.

Combined sewer overflow development program: This is a major water quality issue, especially in older cities. A development program should be created to provide grants to develop cost-effective solutions to combined sewer overflow problems.

Contractor liability: Faulty design and construction, leading to costly plant malfunctions, is made worse by a lack of accountability of designers and contractors. Supervision of construction, design standards, and liability provisions must be strengthened.

Taken together, these changes would increase the effectiveness and efficiency of the construction grants program. In addition, these reforms are consistent with the key elements of the Reagan administration's proposed program reforms, and also paralleled many of the provisions of a clean water bill approved by the Senate Environmental Pollution Subcommittee. The President has made a funding recommendation for construction grants contingent upon program reforms, and the budget reconciliation conference report includes conditional budget authority for the program if a reform bill is enacted.

I am confident that the House subcommittee will approve a bill which addresses these important reform issues. We are at a critical stage in the reauthorization process. The legislative committees of the House and Senate must move quickly and responsibly in order to insure that proper funding action is taken by the Budget and Appropriations Committees. Further disruptions in program funding would wreak havoc on vital sewage treatment programs across the Nation.

The health and safety of the American people depend to a large extent on clean water. We must responsibly reform the construction grants program so that it can continue its vital function.

AGONY PROLONGED—THE MIA PROBLEM

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

. Mr. McDONALD. Mr. Speaker, the recent return of the bodies of three of our MIA's from Vietnam highlights the cruelty of the Hanoi regime as regards the MIA problem. Communist countries think nothing of keeping prisoners years beyond the end of hostilities as they have proved time after time. It makes no difference whether they are dealing with a live or dead prisoner. Prisoners are not taken by the Communists just to prevent them from fighting against them as in the normal rules of warfare. To Communist nations, prisoners are a prize to be tortured in order to break their spirits, used for propaganda purposes and then if possible sold for ransom. The individuals and families mean nothing to the Communist rulers. The Richmond Times-Dispatch of Friday, July 24, 1981, summed this all up in an excellent editorial which I strongly commend to the attention of my colleagues.

[From the Richmond Times-Dispatch, Friday, July 24, 1981] AGONY PROLONGED

Nothing more graphically illustrates the ghoulish nature of the communist regime in Vietnam than the facts behind this month's release of the remains of three American servicemen who were shot down in the war from 10 to 14 years ago.

It is not as though these three men were killed in action and their bodies lost in some remote place, their skeletal remains to be recovered only years later. They had been seen parachuting to safety. The Navy told the family of Lt. Stephen O. Musselman that he probably had been shot to death as he floated to earth. But Cmdr. Ronald W. Dodge and Capt. Richard H. Van Dyke were known to have been taken into captivity.

The evidence of Cmdr. Dodge's incarceration as a prisoner of war, although never confirmed by Hanoi, became a matter of worldwide record when Paris Match, a French magazine, published a photograph of him in September 1967 being escorted by North Vietnamese soldiers after capture. The photo was subsequently reprinted on the cover of Life magazine and used on five million brochures distributed by an organization on behalf of the MIAs.

And yet Hanoi not only failed ever to acknowledge that Cmdr. Dodge had been in custody, but also never reported his death, even after the end of the war, never produced the smallest scrap of information about him. Brad Dodge, who was 4 when his father was shot down in 1967, grew up wondering about his baseball-playing father, a prospect for the Cincinnati Reds, wondering if he would ever have a chance to play catch with him some day.

As for Capt. Van Dyke, POWs who were later released confirmed that he had been in the same camp with a leg injury incurred during bailout. A Vietnamese guard told one of them.

"Your buddy has to have his leg amputated," and then returned to say, "Your buddy didn't make it."

Once again, Hanoi did not have the elementary decency to report this death or to repatriate the body until a decade later, when American laboratory technicians had to identify it.

Why would any regime want to prolong the agony of the MIA families for so long by holding corpses and refusing to acknowledge their identity? The only conclusion, if there is any rational one, is that the Vietnamese Reds were trying to hold America hostage by means of a diabolical sort of body politics. It was the kind of ghastly ploy that even Iran's grim ayatollahs only briefly indulged in after eight American servicemen were killed in the aborted raid to free the U.S. Embassy personnel in Tehran. Hanoi hoped, by keeping the fate of some Americans a secret, to retain leverage that might be used to extract concessions from the U.S.—diplomatic recognition and billions of dollars worth of reconstruction aid.

There are still 2,528 Americans listed as missing in action in a tragic war that ended for America, essentially, with the signing of the ill-fated Paris treaty of Jan. 23, 1973. Based on the grossly tardy return of these three bodies, it is reasonable to assume that Hanoi knows about the fate of many more MIAs—and it is even remotely possible that a few may still be alive in Indochina.

Americans should never forget the MIAs and the agony their families have bravely endured, and the Reagan administration ought to continue to make plain to the jackals of Hanoi that prolonging the agony beyond the ridiculous extreme it already has been dragged out will gain them nothing, and in fact cost them much.

DISTRESSED INDUSTRIES

HON. DON BAILEY

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. BAILEY of Pennsylvania. Mr. Speaker, there have been a number of insertions in the Congressional Record alluding to the so-called Bailey bailout in a detrimental fashion. None of them have been accurate; all of them have been false. Every single one of them engendered either a misunderstanding or a misperception of the changes these carryback provisions make, as well as serious misperceptions of their obvious and clear interrelationship to current law.

First, no profitable company would have an incentive to take advantage of these provisions to the detriment of any other company in a designated industry. In fact, under current law a profitable company, because of current tax liability, would be encouraged to avoid the incentives that we have provided. Simply put, if you are profitable and have current tax liability, instead of having to elect to collect your investment tax credits over the next 4 years, write them off under this year's tax liability, as current law provides.

Second, it simply is not true that the industries chosen were haphazardly, surreptitiously, or deliberately chosen for selfish, unfair, or unreasonable purposes. These industries were chosen because they are all highly capital intensive. They were chosen because the remaining bulk of the unused investment tax credits carried by marginally profitable firms, eligible to utilize them, lie almost totally within the utilities area. Utilities have other advantages in the Tax Code, and because of pass-through problems, quite frankly would not choose to participate in these provisions if they could.

The arguments that you have heard about other industries who need this help or could use this help and are being denied it because they were not one of the chosen few is completely and totally false, without foundation, do not make good economic sense, and any person who studied these matters would know that.

Quite frankly, other industries either lack the capital intensive nature of the distressed industries, and thus are not carrying earned but unused ITC's, or are in an economic environment where they have either not earned the unused investment tax credits referred to in these provisions, or they have already utilized them.

Third, you have been told that this is a giveaway or a slush fund of some type for a designated few. That also is not true. None of the above are accurate. It is no type of slush fund. These credits and the tax liability against which they can be used are only applicable to productivity-improving investments of the type of property that qualifies for an investment tax credit in the first place.

In short, not one penny could be used for dividends or profits, and because an investment tax credit only has value of 10 percent of the qualifying investment made, there is certainly no incentive under this provision to invest with that kind of writeoff in mind. Therefore, these provisions do not encourage acquisitions or mergers, as has been erroneously reported to you. They are only good and provide some necessary relief for capital intensive industries, who suffer under a discriminatory Tax Code and under the yoke of harsh environmental regulation requirements.

Takeovers would not be encouraged; mergers would not be encouraged. There is no special tax break involved. The use of language like "slush fund" and "boondoggle" and "bailout" are sad misrepresentations of proper recognition only to the extent of tax liability for qualified investments which have already been earned. Unfortunately, we had a chance to do something for America with these provisions—something to insure basic industries like steel, where 19 percent of our

domestic market goes to more modern foreign companies. And that 19 percent will grow year after year. Modernization of our mills is vital to our national defense.

This irresponsibility and inaccurate misrepresentation of the intent and purposes of these provisions will not serve this Nation's industrial base very well. Long-term investment suffers in our system; capital is taxed disproportionately and excessively. Only some type of response to this situation will enable this Nation to survive with an industrial base that will serve her needs

It is no curious fact that the industries most in trouble in this country are our capital-intensive industries. Automobile manufacturing is a good example. Airlines are another good example. And in the case of these industries, the examples go on and on.

All this extended carryback provision was intended to do was to allow marginally profitable companies within these vital industries to write off qualified investments they have already made against taxes they have already paid to help modernize these industries, to help make them competitive, to save American jobs, to insure America's strength.

A profitable company and/or an unprofitable company with a profitable partner or parent company, would not want to wait the 4 years and elect to take the payback against past tax liability. But you have been told incorrectly that this is the situation—beneficial to such profitable entities under these provisions that I have drafted. Such is not the case.

This opportunity to change the Code is being disserved by inaccurate and misleading information, and is a sad commentary on the dire need our Nation has to recognize the precarious problems faced by her vital and necessary capital-intensive industries.

THE TRUE MEANING OF THE REAGAN ECONOMIC PROGRAM

HON. DON BONKER

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. BONKER. Mr. Speaker, with today's House passage of the conference report on the tax cut, President Reagan now has had 100 percent of his economic program approved by the Congress.

The President has accomplished this radical turnaround in American economic policy in just 6 short months. Although much of the impact of the deep cuts to social, health, and educational programs will be felt almost immediately in the months ahead, the most profoundly important repercus-

sions of the President's program will not be apparent for a number of years.

Recently, an article in one of the leading newspapers of the Pacific Northwest, the Seattle Post-Intelligencer, offered a glimpse of what these long-term repercussions might be. The vision is a sobering one, and I commend it to the attention of my colleagues.

In the article, Prof. Arval Morris of the University of Washington School of Law argues that President Reagan's program represents a wholesale shift away from the enhancement of our Nation's greatest resource—the energy and creativity of the American people—toward a concentration upon the machinery, capital investment, industrial plant, and all the other trappings of our manufacturing-based economy of the 1940's which represents economic recovery to the Reagan White House.

Professor Morris' analysis exposes the poverty of the administration's shortsighted policy of pursuing immediate budgetary savings through slashes to social program spending, without regard to the consequences—and, ironically, higher costs—in the future.

[From the Seattle Post-Intelligencer, July 23, 1981]

REAGAN PLAN SHOULD PUSH PEOPLE POWER (By Arval A. Morris)

President Reagan declares that the point of his economic plan is to produce a welter of new capital investment—new plant and machinery, the instruments of production that will reindustrialize America.

His method is enormous budget and tax cuts that greatly favor the rich, because, he says, the rich will save the money. Savings institutions will loan that money to businesses which will use it to buy new capital goods, and thereby increase the productivity of the American economy. With a greater supply of goods available to meet existing demand, Reagan expects prices, and inflation to fall. He does not say exactly when, especially since he is increasing defense spending by about \$40 billion.

It's a supply-side, trickle-down plan, with a vengeance. Also, it's very "iffy"—if the rich save, if business borrows and invests, if, if, if. John Maynard Keynes once said that there are many a slip between cup and lip. And, THAT may well be the fate of Reagan's plan.

But, no one can deny that we have suffered a decline in productivity for more than a decade. From 1948 to 1965, the output per hour of all workers in the private sector increased an average of 3.2 percent per year. But, between 1965 and 1973, the average rate of increase dropped to 2.3 percent a year. From 1974 to 1979, it rose by only 0.6 percent. Except for the depression, one must go back to before World War I to find such low increases in productivity

LOOK AT GNP

So, Reagan sees the need to increase productivity, but his plan to do it probably will fizzle. What he does not see is the revolution that has occurred during the last 20 years in our labor force. First, there was the

post-war baby boom, and second, the dramatic entrance of significant numbers of women into our work force. But, most importantly, there has been a wholesale shift away from production to service jobs in the private sector.

We had a Gross National Product of \$259 billion in 1948, with the manufacturing share accounting for \$74.5 billion and the service sector share accounting for \$140.6 billion, roughly twice that of manufacturing. By 1977, manufacturing's share of GNP was \$456 billion and the service sector's share was \$1,250,2 billion, or roughly three times that of manufacturing.

Reagan's tunnelvision is concentrated solely on increasing productivity in manufacturing. It ignores the real productivity pattern in our country as a whole. It is obvious that the President's focus should be on human beings in the services sector as well as on machines in the manufacturing sector. Simplistic assumptions that the American economy is predominantly a manufacturing economy are at least 35 years behind the times. Eli Ginzberg recently stated that 'proposed reindustrialization of an economy dominated by services is an exercise in futil-This is Reagan's supply-side follies

What America needs from its President is fresh look at human capital formation. And this need is rooted in the actual production patterns of this country today.

"SPIRIT" SPREADS

Yet, Reagan is marching in precisely the wrong direction with a significant share of his drastic budget cuts. For example, the Stockman-Reagan cut in the National Science Foundation's education budget threatens its extinction, going from \$80.7 million in 1981 to \$9.9 million. Reagan has cut research in cognitive and behavioral sciences by 70 percent, from \$40.1 million to \$10.1 million. It goes on and on, slashing items like the school lunch program to provide money to build tanks and buy military hard-

This "spirit" has caught on at state and local levels. The University of Washington's budget is austere, and community colleges are turning away students for lack of funds. Human capital investment is denigrated.

The people of this country did not give Ronald Reagan a mandate to change the fundamental structure of American society. Nor was last November's election an endorsement of supply-side economics. presidential choices offered were so lackluster that only 54 percent of this country's eligible voters bothered to vote. Of that 54 percent, only 50.8 percent voted for Reagan. So, he was elected by 27.4 percent of the eligible voters of this nation, most of whom were worried about inflation and voted for a change from Jimmy Carter. It was not an ideological victory at all.

York Times-CBS poll A recent New showed that only 31 percent approved of Reagan's budget proposals; and only 38 percent supported his proposed tax cuts; about half were undecided or bemused by it all. That is no mandate for radical change in the fundamental structure of American soci-

On the other hand, there is the Soviet Union. University of Chicago Mathematician Izaak Wirszup has published an article showing that the Soviet Union is far surpassing us in mathematics and science edu-The new program was voted on in 1966. Its effects are just being felt. All young Russians now get:

1. Three years of arithmetic (grades 1-3)

2. Two more years of arithmetic combined with algebra (4-5)

3. Five more years of algebra (6-10)

4. Ten years of geometry (1-10)

Two years of calculus (9-10). Five years of physics

Four years of chemistry One year of astronomy

9. Five and one-half years of biology

10. Five years of geography

11. Three years of mechanical drawing 12. Ten years of workshop training

ADVANTAGE TO SOVIETS

Obviously, if Russia were a free country it would have to include significant amounts of liberal education in the humanities-literature, history, philosophy, classics, and drama-as well as social sciences. But it is totalitarian, and seeks to develop only science and technological skills in its people.

Professor Wirszup assesses the situation

this way:

'The Soviet Union's tremendous investment in human resources, unprecedented achievements in the education of the general population, and immense human pool in science and technology will have an immeasurable impact on that country's scientific, industrial, and military strength. It is my considered opinion that the recent Soviet educational mobilization, although not as spectacular as the launching of the first Sputnik, poses a formidable challenge to the national security of the United States, one that is far more threatening than any in the past and one that will be much more difficult to meet."

Perhaps Reagan should give serious thought to the quip that the departments of defense and education should be combined because that is where the money is! Education is, after all, the best way for America to improve its human capital, which is its real, first line of defense, as well as its largest sector of domestic productivi-

ty.

He has no ideological mandate, and it makes no sense for Reagan principally to favor the manufacturing sector and to permit the service sector of the economy to be victimized by evangelical political simplism. He must focus on our broader and greater need to develop the human capital of America. Otherwise, our country will suffer, and Reagan's presidency aptly will be termed that of "The Man In the White House from Fortune's 500."

DR. MARVELLE COLBY

HON. WILLIAM LEHMAN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES Tuesday, August 4, 1981

• Mr. LEHMAN. Mr. Speaker, it is with particular pleasure that I congratulate Dr. Marvelle Colby on her recent appointment as executive director of the Greater New York Council of Girl Scouts of the U.S.A. Dr. Marvelle Colby, a former constituent and close friend, was recently honored at a special congressional reception. Her appointment is particularly noteworthy because the council is the New York metropolitan area's largest grassroots organization for young girls age 4-17 and it enjoys a membership of over 34,000.

The parent organization, Girl Scouts of the U.S.A., was founded by Juliette Gordon Low in 1912. Ms. Low began with a troop of less than 20 girls and today Girl Scouts of the U.S.A. has a membership of nearly 3 million. The Girl Scout program is a "continuous adventure in learning that offers girls a broad range of activities which address both their current interests and their future roles as women." Through activities that stimulate self-discovery, they are introduced to the excitement in the world of science, the arts, the out-of-doors, and people. Girls have opportunities to develop new skills and self-confidence, to have fun, and to make new friends, and through meaningful community service to acquire understanding about themselves and

In conjunction with Girl Scouts of the U.S.A., the Greater New York Council has designed a career education program to address the critical need expressed by educators for ageappropriate career exploration and planning methods for children. The council's proposed program is specifically designed to fuse with New York City public school curriculum. Its present objectives are: To employ 100 teenagers in internship programs at minimum wage; to employ 10 college interns to help implement the program; to employ a full-time career education project director and administrative assistant; to initiate careeroriented activities; and finally to evaluate the program.

The program is fully developed and has been implemented and utilized in New York and other areas throughout

the country.

Access to career development opportunities is important for all of our youth, and Dr. Marvelle Colby should be commended for her participation in this area.

OMNIBUS PENAL REFORM ACT

HON. RONALD V. DELLUMS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES Tuesday, August 4, 1981

• Mr. DELLUMS. Mr. Speaker, today introduced the Omnibus Penal Reform Act. The bill consists of original legislation built around what I feel is the most progressive proposals for penal reform introduced in Congress. In developing this legislation I sent copies of the bill to nearly 100 Federal prisoners as well as to criminal lawyers and experts in penology and requested that they all review the proposal and make suggestions for improvement.

The response to this mailing was incredible; many Federal prisoners said it was the first piece of legislation which realistically confronted the problems of penology in the United

States today. At the same time, the prisoners, due to their uncanny insight into the true nature of the prison system, made many suggestions to close loopholes, improve language, and to make the bill much more effective. Experts in penology and criminal lawyers were able to be most helpful and commented on both the form and content of the bill.

I believe this legislation now represents the most workable, progressive, and comprehensive piece of penal reform legislation to be introduced in the House of Representatives.

Many penologists and prison authorities say prisons have changedthat prisons are for rehabilitation, not for punishment. Despite these claims, rebellions at Attica, San Quentin, Soledad, and virtually every other major penitentiary have aptly demonstrated they are wrong. Prisoners across the land continue revolting against brutalizing and inhumane conditions. The sad truth is that in many instances prisons are no different today than at the turn of the century. For example, the Federal Government operates one of its largest institutions at Atlanta. It was built in 1910, and is just as oppressive today as then. Certainly, it is not an atmosphere in which rehabilitation could take place.

We must realize that no person is made more fit to function as a member of society through systematic corporal punishment. And despite claims to the contrary, such punishment exists in prisons today. I have seen the scars. We must also realize that prisoners are entitled to every human and moral right as members of free society. Confinement in a penitentiary is certainly punishment enough and is in itself a most extreme act of retribution by society. Any prisoner will tell you that the sexual and psychological tortures one goes through in prison leave their mark stamped indelibly on the individual's pysche.

Prisons-the backbone of the criminal justice system-reek of injustice and inhumanity. They also have a very definite class characteristicthere are very few white collar criminals in penitentiaries. White collar criminals responsible for millions-if not billions-of dollars worth of crime annually are not in prison. Prisons are full of people who have committed \$10 or \$15 robberies; prisons are full of people who told me that in order for them to survive in what they see as a most oppressive economic atmosphere they went outside the law to provide food and shelter for their families. For them, prisons are the final defense in the maintenance of a social order that insures the affluence of certain seg-ments of society at the expense of others.

And exploitation does not stop when one reaches prison—it increases. Prisoners are paid minimal wages—they

perform virtually slave labor for the Government, which receives a handsome profit in the process. The U.S. Penitentiary at Atlanta-the oldest and most experienced are here-has the highest average sentence per prisoner in the Federal system. It is here where the Federal prison industry produces a major share of its products. We are told that there is extensive rehabilitation in the process-rehabilitation that somehow takes place on outdated machinery that has little or nothing in common with machinery in outside industries. We should ask why such an extensive "rehabilitation" program should be in an institution where the average prisoner is serving a 20- or 30-year or life sentence, instead at institutions where prisoners are serving 2- or 3-year sentences and could benefit from training programs. The situation at Atlanta cannot help but make one wonder if prison authorities are more concerned with making a profit from the exploitation of captive and free labor than with the rehabilitation of the prisoner population.

It is my sincere hope that Congress will see fit to pass this legislation. The uprisings and tragedies we have experienced in our Nation's prisons clearly demonstrates the need for a massive overhaul of the system. If we are truly concerned with penal reform, we must treat the causes, and not the symptoms of the problem.

At this time I would like to submit to the record a summary of the revised Omnibus Penal Reform Act.

SUMMARY

The "Omnibus Penal Reform Act" is divided into eight titles. Five sections expand and solidify prisoners' rights, two titles are concerned with reorganization of the United States Board of Parole, and one title restores voting rights of felons once they have successfully completed their sentence. If passed into law, each title would independently represent a major progressive change in penological practices. However, despite this independent nature, each title highly complements the other sections of the measure.

TITLE I MINIMUM STANDARDS

Establishes the National Prison Standards Administration, as an independent agency in the Executive branch. The Administration would promulgate and enforce rules to insure minimum standards in prisons, including:

No discrimination on grounds of race, sex, language, religion, national or social origin, wealth, or political beliefs.

Establishment of living quarters taking into account prisoners age, sexual preference and criminal record; adequate and private sanitary facilities and minimum standards with respect to cubic content of air, floor space heating and ventilation in living quarters.

Adequate medical, psychiatric and dental care; pre-natal care for women.

Minimum standards for food preparation and service.

Restriction on corporal punishment and solitary confinement.

Written regulations of appropriate prison behavior which will be provided to every prisoner upon admission.

Restriction on prison authorities from inspecting incoming mail except for the purpose of detecting contraband. Mail to government officials, courts, or attorneys to be serviced only by employees of the United States Postal Service.

Allowance of at least three visits a week, and that visitors need not be on an approved list.

Unimpeded availability of newspapers, periodicals, radio and television; media not to be restricted for ideological reasons.

Protection of prisoner property.

Comprehensive vocational training, rehabilitative and work release programs.

Restrictions on nature of prison work and establishment of maximum work hours.

Title I also provides up to a five year \$5,000 sentence for prison authorities who deprive or attempt to deprive a prisoner of rights granted under this title. Such a provision provides prisoners with a minimum assurance that their rights will be protected.

TITLE II. MINIMUM WAGES

Provides for minimum wages equal to the highest minimum wage rate in effect under Section 6 of the Fair Labor Standards Act of 1938 for all Federal prisoners working in prison industry. Also gives prisoners the right to form unions for the purpose of collective bargaining regarding their employment.

TITLE III. FAMILY VISITATION

Provides at least 12 days of furlough a year for prisoners with satisfactory conduct records.

TITLE IV. COMMITMENT AND TRANSFER

Instructs the Attorney General to designate as initial place of confinement the institution nearest the person's place of residence suitable for immates of the prisoner's classification, and stipulates that no transfer shall be made to another place of confinement solely for punitive reasons unrelated to a clear and present danger to the physical safety of the transferred prisoner, other prisoners, or of prison officials and employees.

TITLE V. FEDERAL PRISONERS IN STATE INSTITUTIONS

Provides protection under federal prison regulations for all federal prisoners quartered in state or local institutions.

TITLE VI. REENFRANCHISEMENT

Reenfranchises felons to vote in Federal elections after they have successfully completed their term of sentence, probation or parole.

TITLE VII. PAROLE

Restructures the Parole Board into a national board and five regional boards. This decentralization of parole powers will bring the prisoner closer to the individuals who make parole decisions. Also provides that the boards proportionately reflect the racial and ethnic composition of the prison population.

Gives the prisoner the right to examine all documents that were used in the parole determination hearing. This enables the prisoner to more readily ascertain why parole was denied or why certain restrictions were placed on the parole.

Sets up provisions for goodtime allowances for parole. The longer a parolee maintains good conduct, the shorter the term of parole.

EXTENSIONS OF REMARKS

Entitles the parolee to an attorney at revocation hearings and the opportunity to confront and cross-examine witnesses, as well as stipulating that there be a full and complete hearing record.

TITLE VIII. STATE PLANS

Provides federal assistance to the states for improvement of state parole programs and to develop and operate community oriented for the supervision of and assistance to parolees.

TRIBUTE TO BISHOP JAMES WALSH

HON. BEVERLY B. BYRON

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mrs. BYRON. Mr. Speaker, last week the people of Cumberland, Md., lost one of their most distinguished citizens. Bishop James Edward Walsh faithfully represented his church as a foreign missionary to China for 40 years, the last 12 of which were spent in a Shanghai prison. He was deeply revered by the Chinese Catholics which he diligently and enthusiastically served, and despite his arrest in 1958 and subsequent incarceration, he never lost his love and respect for the Chinese people.

To a man who sacrificed his personal freedom in the name of religious freedom, no tribute can be too great. Receiving his assignment to China in 1915, Bishop Walsh accepted a monumental challenge which was only to become more difficult as the years progressed. After serving as Superior General of Maryknoll Fathers in Ossining, N.Y., he returned to China in 1948, remaining firmly committed to his task despite the turmoil surrounding the Communist insurgence which was to take place the following year. Though his mission was ordered closed in 1951, he was never discouraged from preaching the gospel of Christ to a people desperately needing a form of security in the midst of unprecedented change in a land so deeply founded in its ancient traditions. He persisted in this courageous work until it led to his

arrest in 1958.

Not only will a man of his character be missed among the millions of Chinese and American Catholics who were touched by his energetic preaching, but he will also be remembered by all people who value honest and sincere devotion to a call in which they believe. Perhaps the people of Jiangment in southern China best described the head of the mission by the name they gave him, Wha Lee Sou, meaning pillar of truth.

Mr. Speaker, I submit for inclusion in the Record a copy of an obituary of Bishop Walsh, which was printed in the Washington Star on July 30, 1981.

BISHOP JAMES WALSH DIES, ONCE IMPRISONED IN CHINA

Ossining, N.Y.—Bishop James Edward Walsh, the last Christian foreign missionary to serve in China and imprisoned there for 12 years, died Wednesday at headquarters of his order, the Maryknoll Fathers. He was 90

Only the day before, he had been released at his request from St. Agnes hospital in White Plains, N.Y., to return to his room at the seminary here. He previously had expressed a wish to die on home ground.

He had undergone surgery last month for a urinary allment, and a subsequent infection had forced his return to the hospital last week, but his strength had ebbed.

Walsh, a Maryland native, was released from Shanghai's Ward Road prison in 1970 after serving nearly 12 years of a 20-year sentence. He had been accused of counter-revolutionary activities, including spying for the Vatican and the U.S.—charges he vigorously denied.

When released, the gaunt, aging missionary of 79, clad in rumpled khaki trousers and a faded checkered shirt, walked across Hong Kong's Lo Wu bridge to freedom on July 10, 1970, hailed as a hero by the free world and a modern Rip Van Winkle.

The last of about 7,000 Roman Catholic and Protestant missionaries from the West to be expelled from China, he had received no news reports during his long imprisonment. He had to be told of such events as the moon walk, the election and assassination of the first Catholic president, John F. Kennedy, and the sweeping reforms of the Second Vatican Council.

He said afterward that the reforms, which increased participation of people by allowing them to use their own language in worship instead of Latin, "surprised and pleased me very much because the church is for the people and the clergy are only servants of the people."

Of his imprisonment, he said: "I have no bitterness toward those who tried and condemned me. I love the Chinese people."

But he strongly denied the espionage charges.

"I came to China in 1918 as a priest and missioner for the purpose of preaching the gospel of Christ to the Chinese people. I can tell you in all honesty and sincerity that I have never spent a day during my 40 years on Chinese soil in doing anything but that."

He applauded later American efforts establishing diplomatic relations with China.

"The Chinese have a natural genius for friendship and sociability," he said, adding that "establishing communications with them may bring about a modification of the Chinese government's policies and perhaps eventually be of some help to the church."

eventually be of some help to the church."

The Chinese since have allowed reopening of churches and greater religious freedom.

Walsh was born April 30, 1891, in Cumberland, Md., one of nine children. After finishing college, he worked for two years in a local steel foundry and then at age 21 entered the then-new Maryknoll Seminary with its first class of six young Americans studying to serve in foreign missions.

He was assigned to China three years later as a member of a four-man team of the Catholic Foreign Mission Society of America, popularly known as Maryknoll. One of his companions was the Rev. Francis X. Ford, who also later became a bishop and died in a Chinese prison in Canton in 1952.

Walsh was made a bishop at the age of 36, the first bishop of Jiangment (Kongmoon) in southern China. Chinese Catholics gave Walsh the name of Wha Lee Sou—Pillar of Truth.

"The task of a missionary," Walsh said when he became bishop, "is to go to a place where he is not wanted but needed, and to remain until he is not needed but wanted." He returned here in 1936 and was elected Maryknoll superior general. He served a 10-year term, returning to China in 1948.

When the communists came to power in 1949, foreign clergy was harassed and pressured to leave. Walsh's bureau was ordered out in 1951.

When Maryknoll officials expressed concern about his safety he showed a bit of Irish temper, saying, "To put up with a little inconvenience at my age is nothing. Besides, I am a little sick and tired of being pushed around on account of my religion." He was arrested in 1958.

He is survived by four sisters. All of them

COMMUTER AIRLINES: AN INDUSTRY COMES OF AGE

HON. THOMAS A. DASCHLE

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. DASCHLE, Mr. Speaker, for the last 8 months I have been involved in the search for commuter airlines to replace service in South Dakota communities which have been threatened with termination of all air service by the major carriers. In that time, I have come to realize that the commuter industry is a growing, aggressive one which can offer a real opportunity for improved air service to many communities. The following editorial which appeared in the July 1981 issue of Commuter Air outlines some of the progress that has been made within this industry, particularly in its public perception. I would like to recommend it to all of my colleagues, particularly to those whose districts might, like mine, soon face the necessity of finding replacement air service.

AT THIS POINT IN TIME—COMMUTER: IT'S NOT A DIRTY WORD

Much today is still being said about the word "commuter." Some question its fitness as a proper label for shorthaul, high-frequency air carriers. Others argue it is appropriate and should be given strong buildup in the marketplace.

Those who want to dump it say its popular image is that of a nine-to-five metro train or bus service. They claim it is too restrictive for longer-distance intercity air carrier operations.

Purporters, however, say the name already has been accepted in the marketplace as a proper label for the special brand of community air service these smaller airlines provide. Contending the "bad apple" stigma attached to the name two years ago has disappeared, they point to a "tremendous improvement in stature during the last 12 months" because commuter air carrier operating records have shown remarkable improvement and because the world transportation industry has accepted the name as the logo for this type of air service.

Webster gives "commuter" broad application, saying it means "to travel back and forth regularly," an appropriate definition for commuter airlines whose passengers do

Whatever the name, it must be one accepted and employed by the entire industry to prevent confusion. Commuter Air sampled opinions from more than 80 world industry aerospace executives at Paris and from select executive groups in Washington, DC, where there is a high concentration of aerospace officials who commute on a global scale. The survey found:

Most U.S. executives believe "commuter" is an appropriate word; they say it clearly stands for shorthaul, high-frequency feeder

service to hub terminals.

All respondents, including the small minority of U.S. executives who believe the name is inadequate, couldn't agree upon a substitute

Non-U.S. executives reflected the labels for commuter-level service in their particular country. "Regional," "third-level" and "feeder" were the most-used names. They indicated, however, that the U.S. "commuter" label is beginning to appear and gain favor in international official documents. They cite the international aerospace media's use of the term as evidence.

During each interview respondents were asked to offer their preference for alternate names. Those offered by CA were: feeder, third-level, connector, regional, local, air taxi, shuttle, shorthaul, small-regional and community. None received rave notices with shuttle, feeder, connector and regional re-

ceiving mention only.

Here are some humorous but significant observations made by survey respondents: "Feeder" conjures up visions of a mother feeding her child ... "Shuttle" reminded some of New York's graffiti-adorned subways ... "Local" reminded one executive of a smoke-belching milk train ... "Regional" was termed meaningless unless applied to governmental population statistics ... CAB's term "small-regional" was ridiculed as an unpopular tag used in desperation to satisfy a statistical purpose when all else fails ... "Connector," according to one executive, "sounds like some kind of electrical plug."

Thus, from this small venture into opinion-molding executive and passenger views it appears that "commuter" is still top dog

among names.

The alleged "unsafe" tag attached to commuters is fast disappearing as well, say respondents to the survey. Many felt commuters are as safe as the large airlines. Only one or two said they were less safe.

Since commuter is no longer a dirty word, perhaps it's time to embellish its image to symbolize those public service qualities exemplified by this special class of carrier—safe, reliable shorthaul air transportation fitted to community needs.

GENESIS, REWRITTEN

HON. CHARLES E. SCHUMER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES
Tuesday, August 4, 1981

 Mr. SCHUMER. Mr. Speaker, there have been many questions raised regarding Israeli Prime Minister Menachem Begin's recent actions in the Middle East. Because of the questions that have been raised, I would like to bring the following editorial to the attention of my colleagues. The editorial, entitled "Genesis, Rewritten," was written by Mr. Sidney Zion, a journalist who often writes about the Middle East. The editorial appeared in the July 31, 1981, edition of the New York Times.

GENESIS, REWRITTEN (By Sidney Zion)

The Middle East memory bank is empty again. Just read the papers, watch the television. The new Book of Genesis begins with the raid on the Iraqi reactor and climaxes with the bombs over Beirut. The world is outraged and the world will not forget. The world has forgotten everything else, and if the American news media is representative, the world does not want any reminders. It is angry with Menachem Begin, it is impatient, it is at wit's end. And so history becomes intolerable. Still, history has its claims, does it not? And a memory bank is the only bank in history that needs a run on it to get back in business. So here are a few facts.

Lebanon. Israel never touched Lebanon until the Palestine Liberation Organization moved in after King Hussein drove it out of Jordan in September 1970. Prime Minister Golda Meir warned the Lebanese Government that Israel would not countenance a new sanctuary for terrorists. Still, Lebanon gave the inch to the P.L.O. and the rest is what we see, the destruction of a nation. The P.L.O., with leftist Lebanese forces sacked and pillaged Christian cities until Syria, fearing a radical takeover, came in and began slaughtering the Palestinians and their cohorts. After the Syrian "peacekeeping" mission had succeeded in putting the P.L.O. under its control, Syria and the P.L.O. turned their guns on the Christian minority. There are 32,000 Syrian troops in Lebanon and at least three times that many Arabs have died in that land in the last decade thanks to these peacemakers and their Palestinian allies.

During this period, successive Israeli Governments have bombed Palestinian enclaves in Lebanon. Sum up all these Israeli strikes, including the invasion of Lebanon in 1978, including the bombing of Beirut, and still the casualties inflicted by Israel are minuscule next to what the "Arab nation" has done to its own people. The world hardly took note. When more than 90,000 Arabs die by Arab guns and bombs, it's just one of those crazy things. When 300 Arabs die by Israeli fire, it's a Holocaust committed by a Jewish Mad Bomber, Begin. It begins with Begin. Read the papers, watch the televi-

Jordan. In September 1970, Hussein killed 10,000 Palestinians and drove the P.L.O. out of Jordan. From that moment on the Jordanian border has been virtually without incident. No P.L.O., no trouble. There is balm in Gilead, but nobody notices. Indeed, President Reagan is asked to press his "client state" Israel to establish a Palestinian entity next door. But not a word is said about leaning on Jordan—a client state if there ever was one—to recognize Israel and join the Camp David Accords.

When it comes to Jordan, the memory bank was closed before it opened. I know people who think it's 2,000 years old. But Jordan was only the name of a river until 1922, when Winston Churchill, then Colonial Secretary, turned its east bank into the Emirate of Transjordan—created an emirate

out of the British Mandatory territory of Palestine. Transjordan was 80 percent of the land mass of Palestine. Transjordan is Palestine. In 1946, by British fiat, Hussein's grandfather Abdullah became King of Transjordan. In 1948, Abdullah changed the name of his country to the Hashemite Kingdom of Jordan. Presto! The Ancient Hashemite Kingdom of Jordan. So what? So everything. What was in every respect Palestine became a refugee camp for Palestinian Arabs, a host country for those "driven out" by the Jews. And so it is viewed today. The Hussein family, brought out of Arabia by Churchill, are the only truly non-Palestinians living in Jordan today. Yet the world sees Palestine as wherever the Jews live.

Hussein, who took over in 1953, is considered a benign, embattled monarch. Yet from 1948 until 1967, Jordan not only occupied but annexed the west Bank. Without a scintilla of international authority, without the consent of the West Bank population. And without a whimper from the world.

Egypt. A consensus as big as the Pyramids holds that Israel gave nothing for peace with Egypt. By turning over the Sinai oil-fields, which it discovered and developed, Israel merely gave up its economic security. The future will tell whether it surrendered its physical security as well. And all for little more than Anwar el-Sadat's word of honor.

Israel did not, however, agree to turn over the West Bank and Gaza to the P.L.O. For this it is accused of intransigence. But why do it, at least until those who want the territories recognize Israel, not to say sue for peace? Have we forgotten that Hussein lost the West Bank because he went to war against Israel in 1967?

Have we forgotten that only yesterday the Arab world condemned—and still condemns—Sadat for Camp David? If not, why are we continually advised that Begin is the obstacle to peace, that he has isolated Sadat from the Arabs? Does anyone really believe that the Arab world wants a Palestinian state? Israel's neighbors, if they want peace, have a track to follow. They need only walk in Sadat's footsteps.

History is often intolerable—just ask the Jews. It also instructs—just tell the Arabs.

PRESIDENT REAGAN'S TAX CUT

HON. BOB EDGAR

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. EDGAR. Mr. Speaker, by now everyone knows that Congress recently enacted the largest tax cut in American history. Not everyone is fully aware of the alternatives that Congress faced on the tax cut issue. I have always favored a responsible, targeted, fair tax cut which would demonstrate the proper concern for reducing the Federal deficit. I voted for such a tax cut when it was offered on the House floor on July 29, 1981.

The fact is that Congress faced three major alternatives on July 29: First the administration proposal which President Reagan advertised in a major televised speech on July 27; second the House Ways and Means Committee proposal, representing a more cautious approach but essentially paralleling the administration proposal; and third a balanced-budget tax cut offered by senior Representatives DAVID OBEY, MORRIS UDALL, and HENRY REUSS. I supported the Obey-Udall-Reuss tax cut, and I'd like to take a moment to explain why.

The overall size of the tax cut I supported is less than half the administration tax cut, leaving enough revenue in the Federal Treasury to balance the budget in 1982 and provide a \$20 billion surplus in 1982. Under Obey-Udall-Reuss a business tax reduction would have been effected immediately in 1982, while cuts in individual income taxes would have been phased in over 1982 and 1983. The alternative tax cut was designed to provide a 5-percent reduction in marginal tax rates primarily for middle-income families. Also, a series of specific tax reductions would be enacted to address longstanding inequities in the tax code.

Admittedly, this alternative tax cut would use tax policy to achieve certain needed social goals and reforms. The administration proposal also repre-sents a use of the tax cut to advance the interests of certain members of society, whether President Reagan recognizes this or not. In fact, the administration's tax cut disproportionately benefits the wealthy instead of targeting tax relief to lower and middleincome taxpayers. The administra-tion's tax cut in 1982 will give the 5.6 percent of taxpayers who earn more than \$50,000 a year 35 percent of the tax cut. Even worse, 0.2 percent of taxpayers—the one taxpayer in 500 who makes more than \$200,000 a year-will get over 10 percent of the administration's tax cut, or over \$3½ billion.
The Obey-Udall-Reuss substitute

The Obey-Udall-Reuss substitute also represents certain clear goals for Federal budget policy. For years Congress has been advised that continuing Federal deficits are a contributor to inflation and high interest rates. How-

ever, many of the so-called conservatives who once favored balancing the budget now have found a new theme—supply-side economics. The Reagan administration has minimized the harmful effects of the Federal deficit in order to justify an economic program which guarantees a Federal deficit until the last year of President Reagan's term in office.

Moreover, even the projected bal-anced budget in 1984 assumes that Congress will enact \$45 billion in future-year spending reductions which the administration has not yet even proposed. Additionally, the administration's projections assume enactment of an unpopular \$10 billion cut in social security benefits which the Republican-controlled Senate has already rejected 96 to 0. Furthermore the Reagan administration has fallen victim to the old political habit of making unrealistic projections about the future performance of the economy. If interest rates, inflation, and unemployment fail to meet the administration's goals of performance, the Reagan tax cuts and defense spending increases will produce the largest budget deficits in American history

The House Ways and Means Committee tax proposal, though it mirrored the administration tax cut in many respects, foresaw the potentially devastating effects of massive tax cuts on the Federal deficit. For this reason, the Ways and Means Committee sought to guarantee some measure of flexibility in future economic policy by setting a trigger mechanism on the last 10 percent of the 25-percent individual tax cut the administration proposed. It is interesting to note that the administration did not have enough confidence in its own economic projections to accept these projections as conditions for the triggering of the final year of the tax cut.

I give the President credit for his boldness and his political skill in securing adoption of what is clearly the most radically new policy initiative since the 1960's, or perhaps even the 1930's. Within the last few days Congress has approved the Reagan budget and tax program and time will tell of its success or failure as economic policy. Though I have grave doubts about this new course, we all must hope that it will work.

It strikes me that the primary thrust of President Reagan's appeal on behalf of his program has little to do with economics. As during his Presidential campaign, Mr. Reagan's appeal is based on his attack of the role of the Federal Government. The tax cut has been argued for as a way of diminishing the Government's role in American social and economic life. If you take away the Government's revenues, you limit the Government's policy options for attempting to solve the Nation's problems.

This is fine up to a point. The American public asserted its right to check the growth of Government by electing President Reagan. I am concerned, however, about the President's apparent inability to define what the legitimate role of Government ought to be. I feel most Americans would agree that there are areas of national life where the Government must act firmly. Among these areas are education, transportation, energy policy. health policy, planning of growth and preservation of infrastructure, protection of workers and consumers, employment security, protection of the environment, protection of the elderly, the disabled, and the disadvantaged, and many other tasks for which there must be a public responsibility.

The President has shown his ability to lead an attack on the Government which he now heads. I hope that in future tests of his skills the President's leadership will extend to constructive actions which the Government must take to insure our Nation's political, economic, and social prosperity.

SENATE-Wednesday, August 19, 1981

(Legislative day of Wednesday, July 8, 1981)

NOTICES OF HEARINGS

SENATE SMALL BUSINESS COMMITTEE

• Mr. WEICKER. Mr. President, I would like to announce for the information of the Senate and the public that the Senate Small Business Committee will hold 2 days of oversight hearings on the Small Business Administration's farm disaster loan program on September 9 and 10, 1981. The hearings will convene on both days at 9:30 a.m. in room 424, Russell Senate Office Building. For additional information, contact Mike Haynes, chief counsel for the committee, at 224-5175.

SUBCOMMITTEE ON ENERGY AND MINERAL

RESOURCES

 Mr. WARNER. Mr. President, I would like to announce for the information of the Senate and the public the scheduling of public hearings before the Subcommittee on Energy and Mineral Resources.

On Friday, September 11, beginning at 10 a.m., the subcommittee will hold a hearing on S. 1542. a bill to amend the Mineral Lands Leasing Act of 1920.

On Tuesday, September 15, beginning at 10 a.m., the subcommittee will hold a hearing on S. 1516, to amend the Geothermal Steam Act of 1970 to expedite exploration and development of geothermal resources.

On Thursday, September 17, beginning at 10 a.m., the subcommittee will hold a hearing on S. 1457, S. 651, S. 466, and S. 383, bills to provide for the reinstatement and validation of U.S. oil and gas leases numbered OR-13713, W-46102, M-15450(ND), and M-16402(ND) ACQ., respectively.

On Tuesday, October 27 and Wednesday, October 28, beginning at 10 a.m., the subcommittee will hold oversight hearings to consider America's role in the world coal export market. The subcommittee will receive testimony with regard to the European countries on October 27 and with regard to the Pacific rim countries on October 28

All of the subcommittee hearings will be held in room 3110 of the Dirksen Senate Office Building.

Those wishing to testify or who wish to submit written statements for the hearing record should write to the Committee on Energy and Natural Resources, Subcommittee on Energy and Mineral Resources, room 3104, Dirksen Senate Office Building, Washington, D.C. 20510.

For further information regarding these hearings, you may wish to contact Mr. Roger Sindelar of the subcommittee staff at 224-4236.

COMMITTEE ON ENERGY AND NATURAL RESOURCES

 Mr. McCLURE. Mr. President, I would like to announce for the information of the Senate and the public the scheduling of public hearings before the Committee on Energy and Natural Resources. On Thursday, September 10, beginning at 10 a.m. in room 3110 of the Dirksen Senate Office Building, the full committee will hold a hearing to consider the nominations of Robert A. G. Monks, Victor M. Thompson, Jr., C. Howard Wilkins, and Victor A. Schroeder to be members of the Board of Directors of the U.S. Synthetic Fuels Corporation.

On Monday, September 14, beginning at 10 a.m. in room 3110 of the Dirksen Senate Office Building, the full committee will hold a hearing to consider the nominations of William A. Vaughan to be an Assistant Secretary of Energy for Environmental Protection, Safety and Emergency Preparedness; Rayburn D. Hanzlik to be Administrator of the Economic Regulatory Administration; and Dallas L. Peck to be Director of the Geological Survey.

Those wishing to testify or who wish to submit written questions for the hearing record should write to the Committee on Energy and Natural Resources, room 3104, Dirksen Senate Office Building, Washington, D.C. 20510.

For further information regarding these hearings you may wish to contact Mr. David Doane at 224-7144 or Mr. Gary Eilsworth at 224-7146.

SUBCOMMITTEE ON ENERGY AND MINERAL RESOURCES

• Mr. WARNER. Mr. President, I would like to announce for the information of the Senate and the public the scheduling of a public hearing before the Subcommittee on Energy and Mineral Resources regarding the Surface Mining Control and Reclamation Act of 1977. This oversight hearing will be held on Wednesday, September 2, beginning at 10 a.m. at the Russell Building Auditorium on the Southwest Virginia Community College campus which is located on U.S. Route, 19, 3 miles south of Richlands, Va.

Those wishing to testify or who wish to submit written statements for the hearing record should write to the Committee on Energy and Natural Resources, Subcommittee on Energy and Mineral Resources, room 3104, Dirksen Senate Office Building, Washington, D.C. 20510.

For further information regarding this hearing, you may wish to contact Mr. Roger Sindelar at 224-4236 or Mr. Ron Andes at 224-3159.

ADDITIONAL STATEMENTS

THE U.S.S. "OHIO"

 Mr. CHAFEE. Mr. President, as the Space Shuttle Columbia was landing in the desert after a flawless pioneer flight, another landmark achievement in American technology was waiting in the wings.

Just 2 months after the Columbia completed its astounding success, the U.S. Navy's first Trident submarine completed successful sea trials.

The completion of the U.S.S. Ohio, the Nation's first Trident strategic nuclear ballistic missile submarine, is a milestone in the history of this country's defense. It measures 560 feet—5 feet taller than the Washington Monument, if the ship were placed on its stern. It will carry 24 Trident missiles, each armed with up to 10 warheads, and will be manned by 154 officers and men.

August 19, 1981

The Trident, which will be delivered on October 31, was built by the 25,000 men and women of Electric Boat, which has facilities in Quonset Point, R.I., and Groton, Conn. These workers take pride in their design and construction of the Ohio, which will serve as our country's first line of defense, acting as an underwater deterrent to nuclear attack.

Built to replace the Polaris and Poseidon fleets, the Trident is the most survivable and effective submarine ever built. Along with the 688 class of attack submarine, the Trident will be the cornerstone of a strong sea-based defense of our Nation.

This year to date, Electric Boat has delivered three Los Angeles-class fast attack submarines: The U.S.S. Bremerton, the U.S.S. Jacksonville, and the U.S.S. Dallas. Three more Los Angeles-class submarines will be delivered this year: the U.S.S. La Jolla, the U.S.S. Phoenix, and the U.S.S. Boston.

The delivery of six major nuclear submarines to the U.S. Navy is a major development at this time, when the United States-Soviet strategic balance is in question. When we continue to debate the fate of the MX missile program, as well as development of a manned penetrating bomber, the Trident production line is open, having launched its first ship successfully.

Mr. President, I ask that the following two articles, one from the Norwich, Conn., Bulletin, and one from the Readers' Digest, be printed in the RECORD.

The articles are as follows:

[From the Norwich (Conn.) Bulletin, July 27, 1981]

CHEAPENING A TRIUMPH
The Space Shuttle blasted into the sky

from Cape Canaveral early one Sunday morning for its trials above the earth. Half the nation witnessed the event on television.

The reusable spacecraft circled the planet for two days before making a picture-perfect landing on a California desert, to the amazement of the world.

America's technological ego and the spirit of the people soared with the shuttle's success. It provided a long-overdue flush of national pride.

The shuttle project's afterglow dispelled widespread public concern over the Columbia's staggering cost overruns, years of delays and government ordered redesigns.

Months later, an event of equal national importance took place in eastern Connecticut, with far different public response.

No widespread acclaim emerged when another technological triumph, the sea trials of the Ohio, America's first Trident, took place.

The massive submarine slipped through the fog one early morning for two days at sea. The mission was shrouded in secrecy, mandated by the U.S. Navy, but news leaked out that the vessel performed nearly perfectly.

More flawlessly than the shuttle, according

to some well-placed sources.

Neither the shuttle nor the Trident are bargains, from the standpoint of cost. But while the shuttle overran its federal allocation by a factor of 9, the Trident went to sea just percentage points above its original cost estimates.

Perhaps Admiral Hyman G. Rickover's harangue about Electric Boat poisoned the well prior to the Ohio's maiden voyage. Perhaps Navy allies on Capitol Hill, during the Seapower Subcommittee hearings, unleashed too many barbs against the shipyard.

One point stands out. The Ohio, for all its significance to future national security, didn't draw the attention given the Columbia despite, in many aspects, surpassing the space shuttle as a triumph of American enterprise and technological achievement.

Rather, the Trident program seems to be fair game for Navy and congressional cheap-shot artists who seems hell-bent on a mission to discredit the only shipyard capable of such accomplishment.

A case in point. . .

In the most-recent issue of *Time* magazine. Adm. Rickover is quoted as telling a congressional committee, "They (workers and management at EB) don't care if they manufacture horse turds or ships."

We can't fathom why the admiral would

make such statements.

Why would a national news magazine would print such a statement—two months after the fact?

The logic escapes us, other than the magazine was used as a conduit for a Navy compulsion to hold the shipyard, its employees and the Trident program itself up to national ridicule.

The last thing EB, eastern Connecticut or the nation needs is to have the shipyard con-

tinually tarred over the Trident program.

Trident was constructed in Groton—by thousands of men and women who live in the region.

Ignoring, downplaying and now ridiculing the significance of the Trident is an unacceptable low blow.

It is time for Trident to be recognized fully for what it realiy is: technology equal to or greater than the shuttle, and at cheaper delivery cost. It is also time for Rickover and his allies in the Navy and on Capitol Hill to offer cooperation rather than crude vituperation.

TRIDENT: DEADLY NEW DETERRENT (By Joseph A. Harris)

When the Navy commissions the USS Ohio, expected later this year following extensive sea trials, America will get much more than just another nuclear-powered, missile-toting submarine. The 560-foot Ohio will be twice as big in tonnage as any other U.S. submand the most deadly. On board, her skipper will have at his fingertips the power to bring a total of 192 targets under nuclear attack.

Everything about this lethal leviathan is outsize. Its 42-foot-wide hull could accommodate four city buses side by side. Its 90.000-horsepower nuclear reactor can propel it more than 400,000 miles—some 16 circumnavigations of the globe—at underwater speeds approaching 30 knots (35 mp.h.). Equally impressive is the Ohio's price tag: \$1.2 billion. In all, the 15 Trident subs now planned, plus new missiles, and two large support bases, will cost taxpayers nearly \$30 billion—America's most expensive weapons program to date.

What are we getting for all that money? The first real improvement in our nuclear deterrence in a decade. Except for the airlaunched cruise missile, Trident is the only major strategic system approved by Congress during the 1970s. Like Neptune's spear, Trident has three prongs: the sub itself, its long-range nuclear missiles, and its support bases for maintenance and crew training.

The Sub. Trident, the third generation of Fleet Ballistic Missile (FBM) submarines following Polaris and Poseidon, is significantly superior to them in every department. With its greater speed and range, Trident can operate in an area some ten times larger than previous subs. Sophisticated engineering reduces the telltale noise that subsearchers listen for. Longer patrols and shorter maintenance time in port mean that Trident subs will spend some 66 percent of their 30-year lifetimes at sea, compared with 55 percent for Poseidon subs.

The Missile. Each Trident will carry 24

The Missile. Each Trident will carry 24 missiles, compared with 16 for previous FBM subs. And the range of the Trident I missile is 4,600 statute miles, 60-percent greater than its predecessor the Poseidon, with each missile packing up to eight warheads. "This gives a single Trident more capability than ten Polaris subs," says Chief of Naval Operations

Adm. Thomas B. Hayward.

The Trident I missile can reach to within striking distance of potential targets almost as soon as the sub leaves home port on Kitsap Peninsula, near Seattle. The missile can be prepared for firing in about 15 minutes—approximately the time it takes the sub to come up from its normal cruising level to launch depth. On the sub's back, a muzzle hatch swings up and open. Steam pressure pops the missile through the surface in a foaming geyser of sea spray, and the two-million-horse-power, first-stage rocket ignites. The eight hydrogen-bomb warheads can be independently aimed at different targets, and each is able to strike within a few hundred yards of dead center.

The new missile will serve not only the U.S. Navy but our British allies as well. The United Kingdom is planning to buy 100 Trident I missiles and spend \$4 billion to construct four subs to accommodate them. Says former British Defense Minister Francis Pym, "We need to convince Soviet leaders that even if they thought the United States would hold back as a conflict developed, the British force could still inflict a blow so destructive that the penalty for aggression would prove too high."

The Bases. Trident's third prong was ready July 1, when Naval Submarine Base Bangor went operational. Across Puget Sound from Seattle, the huge Kitsap base will be home port to the first squadron of ten Tridents. Returning from their 70-day patrols, the subs will be refitted here at the deepest dry dock the Navy has ever built. While the boats are being repaired and provisioned, their crews will be reunited with their families in handsome quarters set among towering firs. Having complete Trident support facilities at a U.S. site avoids the costs of renting a base abroad and of shuttling crews back to various locations to join their families.

Bangor has certain strategic advantages too. The majority of Soviet antisubmar'ne forces are concentrated in the Atlantic and Mediterranean, so putting Trident in the Pacific complicates the Russians' subdetection process and stretches their resources thinner. The Pacific site also uses Trident's greater speed and range to fullest advantage. But the Navy is not neglecting the Atlantic. Its second Trident squadron will be located at Kings Bay, Ga.

Completion of Trident's three prongs can come none too soon, for the program is nearly

2½ years behind schedule. (The Ohio was originally planned for delivery in April 1979.) Perhaps it was inevitable that such a gigantic project would have problems. From the start, Trident was engulfed in controversy, with critics in Congress and the Navy asking why a sub had to be so big and costly. The Navy conducted studies of possible alternatives before going ahead with Trident. No acceptable one was found, and a contract was awarded to the Electric Boat Division of General Dynamics Corp. in 1974.

The initial debate over Trident was followed by workaday problems once construction got under way. From the original \$800 million, the price of a single Trident sub shot up 50 percent to its present \$1.2 billion. "We never put together a sub of this size before," a Navy spokesman admitted. Another added, "We had difficulty with people, plans, production, material, scheduling."

New management and increased attention to recurring quality-control problems at Electric Boat seem to be getting Trident production on track. Eight vessels are under construction at its ten-acre yard beside Con-

necticut's Thames River, and there are plans

to turn out three Tridents every two years. In the field of anti-submarine warfare, the U.S.S.R. is making great strides, most notably production of "killer" subs designed to find and destroy ballistic-missile subs. But with the Trident's advanced sonar, superior speed and range, and its super-quiet running, the sub's crew is not likely to spend much time worrying about being found. Its 15 officers and 142 enlisted men will be more concerned with getting through the inevitable boredom of spending 70 days in a long metal cylinder where the temperature is always around 70 degrees Fahrenheit and the light is always fluorescent.

Even a common cold should be infrequent, thanks to air conditioning that scrubs the air of microbes. As compensation for being cut off from the sun—and rain and traffic jams—there is a new movie every day and plenty of popcorn—600 cans of its on a typical patrol.

The crew will sleep in roomy nine-man bunk areas. Each bunk has a stereo headset, and there are a study area and a gym on board. Says one young sallor who was selected for Trident duty, "Now I won't be in the middle of a passageway every time I jump out of bad."

The operational heart of Trident is the gray-green control center directly beneath the conning tower, or sail. So precise is the instrumentation that even at hundreds of feet below, the skipper will know exactly where the sub is. For one thing, he can "read" much of the ocean floor with sonar and compare its configuration with Navy charts. But mostly he will rely on computerized reports from the Ship's Inertial Navigation System (SINS). SINS contains accelerometers that measure the sub's movement with respect to true North. They are held in position by electrostatic gyromonitors—rotating beryllium balls the size of marbles, suspended in air by electromagnetism. The extreme precision of SINS is vital not only to navigation but also to precise missile targeting, which depends on pinpointing the exact launch position.

on pinpointing the exact launch position. Submariners are a notoriously taciturn lot. If the captain and crew of the Ohio, along with those of other upcoming Tridents, worry about their awesome responsibilities, it does not show. Asked whether he is excited about being one of the first Trident skinders, Capt. Thomas A. Meinicke admits, "It's a choice assignment, but when you get down to it, a sub's a sub." As to the possibility of wreaking nuclear devastation, his answer is unhesitating: "If we have to push the button, then the whole deterrent system has

failed."

Trident is America's strongest statement to date of that basic rule of the nuclear age: deterrence must not fail.

THE MORAL MONETARY SYSTEM

Mr. HELMS. Mr. President, the morality of money is not a commonly discussed subject. Yet, it seems to me that the constantly depreciating unstable currency system we have is, indeed, an immoral one.

Inflation is unjust.

The corruption of the most important economic standard in society—the dollar—is an unforgivable act committed by the Government.

On the Wall Street Journal editorial page of July 30, Lewis Lehrman comments on "the case for the gold standard."

His comments go to the heart of the issue and should be read by every member.

Mr. President, I ask that the Lehrman article be printed in the RECORD at this time.

THE CASE FOR THE GOLD STANDARD (By Lewis E. Lehrman)

The U.S. dollar today is an inconvertible paper currency. But this is nothing new. In 1690, the Massachusetts Bay Colony promised a limited issue of 7,000 pounds in paper notes. But by 1714, the colony had issued 194,000 pounds worth, and the value of the paper pound had fallen 70 percent. Naturally, the politicians blamed the currency depreciation on the people, they being "so softish as to deny credit to the government."

During the Revolution, the Continental Congress financed the war with paper money. "Do you think, gentlemen, that I will consent to load my constituents with taxes," said one member of Congress "when we can send to our printers, and get a wagonload of money, one quire (25 sheets) of which will pay for the whole?"

Congress issued \$2 million worth of continental currency in early 1775. At first, the law required two Congressmen to sign and number each note—a sunlight procedure that much appeals to me. But that implicit restraint limited the number of paper notes, and the issuing technique was soon changed. By 1779 Congress had issued \$200 million in continental currency and its purchasing power had fallen to 1/100th of gold's.

American patriots suffered most of the depreciation, wrote William Gouge, President Andrew Jackson's financial adviser, since they accepted and held the paper money. "The Tories . . . made it a rule to part with it as soon as possible." More than two centuries later, we still hear the phrase "not worth a continental."

PAPER MONEY

During the Civil War, both North and South printed paper money. The Union issued \$450 million worth, and the price level more than doubled. Every American knows what happened to Confederate paper money.

In our time, President Nixon officially uncoupled the last link between the dollar and gold. The U.S. currency became once again an irredeemable paper money issued at will by the government. Since that act in 1971, the money supply has more than doubled, and so have prices.

Irredeemable paper money has almost always been accompanied by unbalanced budgets, high inflation and high interest rates. But the true gold standard has been associated with balanced budgets, reasonable price stability and low interest rates. Paper, money has been the handmaiden of war, protectionism and big government. But the gold standard was the symbol of peace, free trade and limited government.

At one time, American companies could sell 100-year bonds paying 4 percent interest. Because of the gold standard, Americans saved and lent their savings for generations to growing corporations. People saved because the gold dollar's purchasing power did not decline. The price level was no higher in the 1930s, when we left the domestic gold standard, than it had been under President Washington.

Today, we must decide whether to have a nominal paper dollar or a real dollar, defined by its weight in gold; whether to have a budget balanced at current tax receipts, or continued deficits.

Establishing the gold standard would by itself balance the budget. One trillion dollars in national debt will cost the Treasury about \$100 billion in interest payments next year, at about a 10 percent average annual interest rate.

Under the gold standard, the national debt could be refinanced at an interest rate of 5 percent or less, thus saving at least \$50 billion. David Stockman estimates the 1982 deficit at approximately \$45 billion.

The road to the balanced budget is paved with the gold standard.

To choose the gold standard and the balanced budget is to choose stable prices, low interest rates and economic growth. To some, that choice seems too simple—a prime reason many economists, politicians, and intellectuals reject the gold standard. Even a balanced budget is too straightforward for them. They want more complex institutions and problems to manipulate.

But a gold-based currency is the only money worthy of a free people. Most Americans cannot afford sophisticated financial and tax advisers, nor an economist to figure out the Fed's actions. Gold money, on the other hand, can be easily understood by everybody, and working people can control the quantity they desire. People, free to choose, decide for gold, because it is democratic money.

Gold is also the best co-ordinator of a world market order. For centuries gold has been a common international currency. A gold dollar would benefit all nations, because there is only one economy, the global economy. Through the mechanism of arbitrage, the prices in all national economies are linked. This is, of course, a good thing. It leads not only to the maximum amount of individual liberty, but also to the maximum production of goods and services, to the special benefit of the poor. To choose the gold standard is to choose openness over isolation.

Inflation is immoral as well as an economic problem. The gold standard, being a human institution, is imperfect. But it is the least imperfect of all monetary institutions. Paper currenctes and unbalanced budgets are dishonest and disorderly. The depreciation of the dollar deranges the movement of relative prices and interest rates around the world, and it causes unemployment through misdirected investments and uncertainty.

Above all, inflation fraudulently transfers hundreds of billions of dollars from the weak and honorable to the slick and wellplaced. This wealth transfer—from the thrifty to the speculator, from the small businessman to the giant government contractor, from the saver to the spender, from the aged and poor to the rich and powerful—violates our reli-

glous heritage, makes a mockery of honest work and erodes our faith in constitutional government.

Today, interest rates are at the highest levels in American history: higher than during the Civil War, when the very life of the nation was in question. The real value of the average worker's paycheck is 14% less than 10 years ago. Small businessmen are being crushed by government bond sales, the result of federal deficits. At present interest rates, Americans can no longer afford to borrow money for a car or a house. They are not consoled by government officials who preach sacrifice for working people while spending more on the public sector.

ALMOST IMPOSSIBLE

The Dow Jones average is 52% lower, in real terms, than in 1971. The bond market is 61% lower, and most companies find it almost impossible to raise long-term capital.

As a remedy we are offered austerity and monetarism. But these well-meaning policies will not work here, any more than in Margaret Thatcher's Britain, where in two years they have doubled unemployment to 11.8%. Compassionate and enterprising Americans reject such an outcome here.

What America needs is a policy of financial order, the Reagan tax program and economic growth. That is why the establishment of the U.S. Gold Commission by Congress was so timely. The commission will consider, in the words of the Helms-Paul Amendment, what role gold should play "in the domestic and international monetary systems."

The National Monetary Commission of 1908 led to the creation of the Federal Reserve System in 1913. The Gold Commission could be as significant, as its work inspires a national debate about the choice between paper money and the gold standard. There is nothing like the free market to determine the real value of a product or idea.

As in the marketplace of ideas, so in the world of money: Now every American must discover again what is false, and what is true.

PRESQUE ISLE COMMEMORATES "DOUBLE EAGLE II" VOYAGE

• Mr. MITCHELL. Mr. President, it is my privilege to join the community of Presque Isle, Maine, to honor three American heroes. Three years ago, on August 11, 1978, balloonists Maxie Anderson. Ben Abruzo and Larry Newman took off in the Double Eagle II from Presque Isle, Maine, for a journey that would make history.

Lifting off from Merle and Alice Sprague's field, which is next to a potato field, before a crowd of 11,000 cheering people, these three men set off to do what no men had done before: cross the Atlantic Ocean in a balloon.

In honor of this flight, the Spragueville Extension and the Presque Isle Chamber of Commerce sponsored an anniversary celebration on August 11, on the Sprague field. Students of the Northern Maine Vocational Technical Institute have constructed an 11-story high commemorative balloon, which is now displayed on the field, at the site of the take-off.

The three men braved severe weather conditions which forced them to throw everything but bare essentials overboard as ballast. But despite the incredible odds against them, Anderson, Abruzo, and Newman were able to find the *Double Eagle II* in Misery, France, on August 17, 1978—ironically, next to a potato field.

I congratulate Maxie Anderson, Ben Abruzo and Larry Newman of the *Dou-ble Eagle II* for their heroic deed. The citizens of Presque Isle, Maine, and indeed the entire country, can take great pride in this historic event.

CHAIRMAN DIRK F. MUDGE

• Mr. ANDREWS. Mr. President, recently I was visited by Dirk F. Mudge, Chairman of the Council of Ministers of the Government of South West Africa/Namibia. Namibia is a territory under the Republic of South Africa, similar to our own U.S. territories of the Virgin Islands, Puerto Rico, and Guam. It was mandated to Great Britain by the League of Nations in 1920, and when South Africa became independent in 1961, Namibia continued under South African jurisdiction until such time as it achieves full independence on an internationally acceptable basis.

It is significant to me that Mr. Mudge was elected as Chairman of the Council of Ministers by the 12 members, 10 of whom are black. He tells me that since December 1978, Namibia has had black majority rule, on a one man, one vote, universal adult suffrage basis. Because of the failure of the United Nations to develop an acceptable plan to hold elections in 1978, the internal political parties decided that they had to keep their commitment to the people of Namibia to hold elections. As a result, the Namibian people went to the polls and elected a 50-member National Assembly which exercises full legislative authority. The Council of Ministers has been selected by the National Assembly from its elected members to exercise executive authority in the Territory.

As a member of the Senate Appropriations Committee, I am concerned with the fact that the United Nations continues to help finance activities of various terrorist groups, including the South West Africa People's Organization (betknown as SWAPO). Chairman Mudge tells me SWAPO, as a Soviet-bloc terrorist organization, is engaged in active efforts to intimidate the people of Namibia into supporting and electing a SWAPO government. Each year U.S. taxpayers contribute more than \$700 million in the United Nations' budget-25 percent of the total. Not a single dollar of U.S. taxpayer money should be used by United Nations to finance the operations of SWAPO or any other terrorist group. Chairman Mudge has asked that the U.S. Congress include in our appropriations bills a prohibition against U.N. financing of terrorists anywhere, anytime, or for any purpose. He tells me there can be no free and fair elections in Namibia until the United Nations withdraws its support from SWAPO. Because of the interest of U.S. taxpayers and my colleagues in the U.S. Senate in helping Namibia toward full independence and sovereign recognition, I ask that Chairman Mudge's letter to me be printed in the RECORD.

The letter follows:

GOVERNMENT OF SOUTH WEST AFRICA/NAMIBIA, August 4, 1981.

Hon. Mark Andrews, U.S. Senator,

Senate Office Building, Washington, D.C.

Dear Senator Andrews: The people, the political parties, and the people's duly elected government in Namibia strongly support President Reagan's declared policy of opposition to Soviet sponsored terrorism and his refusal to negotiate with terrorists. The black civilian population in the northern part of our country has been under more or less continuous terrorist attack by Sam Nujoma's Communist-bloc terrorists of the South West Africa People's Organization—better known as SWAPO.

The people of Namibia hope the United States will take leadership among the Western Five (United States, West Germany, Canada, France, England) to compel the removal of the SWAPO terrorist bases which are now given sanctuary by the government of Angola. From these Angolan bases, SWAPO terrorists cross the northern border of Namibia and plant Russian made landmines in our highways, fire Russian-made mortar weapons into living compounds, kidnap Namibian school children and carry them across the border to SWAPO headquarters where they are impressed into guerrilla military duty, set fire to food stores in Namibia, and extort money from Namibian shopkeepers on threat of murder and arson against Namibian people and property in the area.

We want the representatives of the Western Five who are negotiating our independence to know that the duty elected representatives of the Namibian people in the internal political parties insist that they be consulted and be permitted to participate in any decisions affecting the future of Namibia. There can be no fair and free elections in Namibia until (1) the SWAPO bases in Angola have been closed down and the SWAPO terrorists have been removed, (2) the Cuban soldiers who maintain the Marxist government in power in Angola have been sent back to Cuba, (3) the United Nations withdraws its financial support from SWAPO, (4) the United Nations withdraws its preposterous and farcical recognition of SWAPO as the "sole and authentic" representative of the people of Namibia, (5) the United Nations ends permanent observer status at the U.N. it now grants to SWAPO, (6) and until appropriate guidelines have been adopted by the internal parties and the people of Namibia through their duly elected representatives.

There are no circumstances under which we will permit a Soviet-sponsored government to be imposed on the people of Namibia or allow the Kremlin's flag to fly over our capital city of Windhoek. There are no circumstances under which the duly elected internal party representatives of the Namibian people will authorize or participate in an election which is not based on constitu-tional principles adopted by the Namibian -an absolute essential if we are to avoid civil strife. There are no circumstances under which an election can be held under the auspices of the United Nations as long as it continues to support the SWAPO terrorists financially and through recognition. There are no circumstances under which we will permit U.N. troops to enter Namibia as long as these troops are perceived by some of the people of Namibia as being supporters of the SWAPO terrorists.

The United States and the free world have an important national security interest in maintaining the freedom and independence of Namibia. We do not intend to make a unilateral declaration of independence from South Africa, and we want full independence at the earliest practicable time, couper which sovereign recognition by the community of nations. However, we will not have a false independence thrust upon us which results in a Soviet-bloc take over our country and its resources. We are well aware that the Communist-bloc would like to gain control of Namibia and of our vast uranium reserves and other mineral resources as well as our deep water port at Walvis Bay.

We ask the people and Government of the United States to draw the line and stop further Soviet expansionism in Africa at the northern border of Namibia—surely by now the free world will have learned its lesson and will have had enough of Russian-sponsored "liberation" movements designed to add more territory and mineral wealth to the Soviet Empire. We have one man one vote majority government now as a result of our 1978 elections. We will not give up our right of self-determination by allowing a Soviet-bloc SWAPO government to be forced upon us. We have chosen freedom, and we hope the United States will help us maintain it.

Very truly yours,

DIRK F. MUDGE,
Chairman, Council of Ministers, Government of Namibia.

SOVIET HUMAN RIGHTS VIOLA-TIONS CONTINUE IN UKRAINE

• Mr. HEINZ. Mr. President, I am unhappy to report that the number of Ukrainians arrested by the Soviet Government since the beginning of the Madrid Conference last November has been increasing. These human rights violations cannot be permitted to continue and we must demand compliance with the Helsinski Final Act in Ukraine.

Unfortunately, the repressive Soviet policies against the Ukrainian people are worsening. Twenty-seven Ukrainian Helsinki Monitors were recently arrested and sentenced. Ivan Kandyba, the last free member and one of the founders of the Ukrainian Helsinki Group, was arrested on March 24, 1981 and is awaiting trial for unknown charges.

The World Congress To Free Ukrainians (WCFU), representing approximately 2 million people of Ukrainian descent in North and South America, Western Europe, and Australia, has been monitoring the human rights situation in Ukraine and has consistently criticized the Soviet human rights violations. The group recently completed a study entitled "Ukraine and the Helsinki Accords: Soviet Violations of Human Rights, 1975–1980," which discusses the repeated violations by the Soviet Union of the Helsinki Final Act. The documents include verified lists of Ukrainian citizens imprisoned for political and religious activities in the last 5 years.

Four specific requests were made by the WCFU of the governments of the countries participating in the Madrid Conference. These included demanding that the Soviet Union immediately release the imprisoned members of the Ukrainian Helsinki Group and other human rights spokesmen. They also asked that the government of the U.S.S.R. terminate the imprisonment of innocent people for simply expressing their political or religious beliefs and

permit freedom of religious worship in Ukraine. The fourth request demanded that the Soviet Union remove emigration restrictions for all people, regardless of nationality, religion, or political persuasion.

The WCFU and other courageous supporters of human rights in Ukraine are to be commended for their hard work and dedication in their ongoing struggle for freedom for the Ukrainian people. The pressure of world public opinion must be maintained and we must continue to demand compliance with the Helsinki Final Act in Ukraine. These violations of fundamental human rights cannot be tolerated, and our Government must recognize and denounce the repressive Soviet policies.

OUTSTANDING PERFORMANCES BY RHODE ISLAND PUBLIC SERVANTS

 Mr. CHAFEE. Mr. President, we Americans too often take for granted the exceptional services performed by public safety personnel in our cities and towns. Unfortunately, the daily risks encountered by these men and women frequently go unrecognized.

As examples, I would like to recount the experiences of three individuals from different communities in my own State

of Rhode Island.

Howard M. (Bucky) Sheats is a patrolman in the town of Cumberland.

He was on duty on a recent Sunday evening when he received a call for assistance from a fellow officer sent to investigate a report of a gang fight behind a local school.

As the first officer arrived, a car sped by him, and he radioed Officer Sheats. The car struck a utility pole, and the first officer arrested one occupant, while Mr. Sheats pursued the other three. One was caught, but two jumped into the Blackstone River.

Without regard for his own safety, Officer Sheats jumped into the river in an attempt to rescue a 15-year-old young man who was unable to reach the other side.

Fighting the current and the cold water, he sought to reach the boy. Unfortunately, he was unable to do so, but he refused to quit until he was totally exhausted. Police and firemen finally persuaded him to grasp a life-ring thrown from shore and accept rescue himself.

At 3 p.m. the next day, the boy's body was recovered by a U.S. Navy diver.

Rene Coutu is a lieutenant with the Central Falls Fire Department.

He recently responded to an alarm for a fire in a seven-unit apartment house. Bystanders alerted him to the fact there were a woman and a 3-year-old child stranded in a second floor apartment. He climbed a ladder in an effort to reach them, but an explosion threw him to the ground, and he suffered a broken jaw, broken left arm, and cuts and bruises.

The happy part of this incident is that the child was dropped safely from a window into the arms of another firefighter. The woman died in the blaze.

Donald R. Casanta, Sr., was a patrolman with the Warwick Police Department and proud of his job. In addition, he was active with the Police Athletic League and other youth organizations.

He was on duty on a Saturday afternoon when a call was received about a minor accident on Interstate Highway P-37. Patrolman Casanta was dispatched to direct traffic around the area.

It was what could be considered a routine assignment without a great element of danger. However, another driver sought to speed by the scene and struck Patrolman Casanta full force. He was thrown off the highway and over the guard rail. Despite efforts by his fellow officers to assist him, he was pronounced dead at Kent County Hospital.

What had seemed to be a minor incident on a quiet summer afternoon had become Don Casanta's final tour of

duty.

Suddenly, Mrs. Casanta was a widow with two fatherless children.

Mr. President, these three seemingly unrelated occurrences illustrate graphically the daily hazards which are part of the lives of those men and women who serve in public safety organizations. They are by no means unique. Such events take place every day, not only in Rhode Island, but throughout the Nation.

By calling to the attention of my colleagues the selfless efforts of Patrolman Sheats, Fire Lieutenant Coutu, and Patrolman Casanta, I mean to pay tribute not only to them but to all who serve all of us in local, State, and Federal law enforcement and firefighting organizations.

May we never again take for granted the protection which they provide.●

STUDY REVEALS BROAD BUSINESS SUPPORT FOR EXPORT TRADING COMPANY LEGISLATION

• Mr. HEINZ. Mr. President, the New England Congressional Institute recently conducted a month-long survey involving 650 businesses and banks in the six New England States on the export trading company (ETC) legislation. The respondents included manufacturing and service firms, banks and export managing companies. The following information highlights the overall favorable response of groups from the aforementioned categories to proposed ETC legislation:

First, manufacturing and service firms show a keen interest in legislation which could allow them to increase their export potential. Eighty-nine percent of the responses in the manufacturing and service sector came from firms with less than \$50 million in annual sales and less than 500 employees. Fifty percent of all survey respondents currently export less than 10 percent of their sales. While 80 percent of the respondents had no detailed working knowledge of the ETC legislation, over half expressed a desire to utilize ETC services: 76 percent needed expertise in marketing, while 69 percent indicated a need for financing expertise.

Second, banking sector respondents were small- to medium-sized full service banks of which 71 percent had assets of less than \$450 million and 38 percent had assets of less than \$50 million. The survey revealed that large metropolitan

banks openly support legislation to allow bank control of ETC's. Few bankers surveyed demonstrated awareness of the specific provisions of the ETC legislation; however, 100 percent of the surveyed banks stated that banks should have the option to invest in and control ETC's. Ninety-two percent of all respondents assumed that larger banks already active in international trade transactions would be the primary initiators of ETC's, while small banks hoped to use their correspondent relationships with city-based banks to offer extended trade-related services to their clients. Eighty percent of the bank respondents stated that the S. 734 antitrust provisions were sufficient to avoid giving the large banks and companies an unfair competitive advantage. All of the bankers' statements suggested that decisions about relinquishing corporate control would be based upon individual circumstances after the legislation is complete.

Third, export management companies operating in New England responded positively to ETC legislation: 73 percent surveyed indicated that they would want to be certified as an ETC with the Department of Commerce. Over half of the respondents indicated that they would like to cooperate with a bank in a joint venture ETC under a specific contractual agreement. One-hundred percent of those polled indicated they felt that the ability to offer direct financing to their clients would increase their sales: 57 percent expected an increase of over 25 percent, while 36 percent felt that this capability would increase their sales by

11 to 25 percent.

These survey results are clear indicators of the broad base of support that exists for ETC legislation. We must continue our efforts to improve domestic export performance and reduce our trade deficit. The ETC legislation is an important step to help promote U.S. exports in order to increase U.S. competitiveness in the world marketplace.

SUCCESSOR GENERATION

• Mr. HEINZ. Mr. President, I call my colleagues' attention to the following commentary on the "Successor Generation" problem that troubles the Western Alliance. It is a companion piece to my July 16 Record statement.

Tensions over the direction of East-West relations, arms limitation talks, deployment of strategic weapons, and trade and economic questions are making the news these days. But a fundamental problem underlies the more visible pressures creating divisions within the Western Alliance. Many of the rising young leaders in the Western democracies suffer from historical amnesia, focusing too often on the relatively minor topical differences that separate us and not on the cultural and historical bonds that unite us.

As the United States sets out in a new foreign policy direction, it is high time we in the Congress and our counterparts in the Reagan administration realize the full dimensions of the successor generation problem. One ramification is the alarming strength of pacifist sentiment

in the Western democracies and another is the apparently increasing vulnerability of Western Europe to "Finlandization." Too many European and Japanese young people who lack a sense of history and a sense of cultural kinship with the United States see little difference between the United States and the Soviet Union. I fear that we have not yet seen the full implications of this historical and cultural oblivion.

The answer is largely a matter of information and education. I call on my colleagues and the administration to develop a strategy to deal with the problem-and to begin by reading the penetrating analysis by David Broder that follows:

[From the Washington Post, July 12, 1981] FADING MEMORIES THREATEN THE WEST

(By David S. Broder)

Oxford, England .- I don't know what President Reagan will hear when he meets with allied leaders in Ottawa in a week, but I suspect the talks won't convey the full tale of what lies beneath the troubled state of the Western alliance. They couldn't, because the most critical voices will not be heard there.

That is the impression left from separate conferences here and in Berlin of groups of about three dozen European parlimentarians, politicians, educators and journalists and their American counterparts. At those meetings of the Aspen Institute Berlin and the Atlantic Association of Young Political Leaders, we heard the following things,

- not all of them mutually consistent:

 1. There is a growing potential of crisis within the alliance, keyed to the deepening doubts in Europe about the wisdom of American policy and the prudence of seeking security primarily through military efforts to deter the Soviet nuclear threat. The skepticism is most evident among younger peoplethe so-called "Successor Generation" to those now in power, who inherited their leadership from the original architects of the postwar alliance. It centers now on the question of deploying medium-range nuclear missiles in Europe while delaying arms talks with Russia, but it represents deep currents of religious as well as political belief and can be ignored only at peril.
- 2. At root, some say, the challenge is cultural and generational. It reflects the young Europeans' boredom with the Cold War and the suspicion that it is a relic of their parents' fixation.

Or it represents a failure of permissive education systems on both sides of the Atlantic to impart the lessons of history to these youths. A German professor sees it as a healthy reaction in Freudian terms, a necessary revolt against the "father figure," Uncle Sam. A French politician says it represents the ambivalence of the young about the values of materialism, the very concept of progress. In any event, the argument is not between the United States and Europe but between the generations.

3. Alternatively, at root the problem is eco-We have our internal SS20s." Frenchman says, referring to the Soviet missiles targeted on Western Europe. "They are called inflation and unemployment." A British Tory MP reports that unemployed youths in Liverpool mix "ban-the-bomb" shouts with their imprecations against the bosses and the cops. A German says that young people feel that just as their governments have lost control of their economies they will lose control of the weapons they are eager to build. A countryman asserts that unions fear that Reagan's "reverse redistribution" policies may be adopted as the model for Europe. In any case, a veteran American diplomats says, the threats of trade wars or oil-access rivalries dwarf the differences over

- military strategy.
 4. Some would like to believe the problem is Russia. What is shaking Europe, they say, is nothing more complicated than naked -fear engendered by the realization that the Soviets have upset the military balance in their own favor and now have the capacity to reduce Europe's cities to smoking ruins. Others think the Soviets are shrewdly manipulating European opinion by promoting the "peace" movements and by propagan-dizing in ways that suggest they are "reasonand the Americans intransigent on arms control.
- 5. Many assert the problem is not anti-Americanism but anti-Reaganism. Some of them are honest enough to concede that six months ago, they would have used Jimmy Carter's name instead of Reagan's. But despite the differences in the policies and personalities of the two presidents, they see a common denominator: an uncertain, illdefined approach to foreign policy, symptomized by sudden swerves of policy. To them, Reagan represents high interest rates, minimization of human rights concerns, an ef-fort to drag the Third World into the Cold War arena and a slowdown if not an outright sabotage of nuclear arms negotiations. "The nswer to anti-Americanism," says a Dutch parliamentarian, "must be found in America."
- 6. If there is a problem, others assert, it is no one's "fault." Nations must operate their foreign policies on the basis of interests, not sentiments, and in some areas, Europe's and the United States' interests just diverge. Europe has profited from trade with the Eastern bloc since the beginning of detente, and is understandably more reluctant to see it end. Europe has its own economic and political links to the Arab nations and the Third World in general. It cannot accept that NATO must function as monolithically in regard to those countries as it does toward Russia. The alliance will be all right, these Europeans maintain, so long as there is tolerance for the inevitable differences that will arise among allies.

7. Finally, there are a few who say the whole "problem" is a fantasy, a concoction of Soviet propaganda, or a few alarmists, or a European press some of whose members may projecting their own hostility to the United States. All three parties in Germanya focus of the current concern—espouse the alliance as the keystone of their foreign policy, a German diplomat calmingly declares. Opinion polls show the United States still by far the most admired foreign country.

In France, where anti-Americanism is nothing new, the recent campaigns were singularly devoid of such expressions, a French journalist contends, and President Mitterrand has given the mildest of rebukes to American criticism of his appointment of Communist Cabinet members—an impertinence which no U.S. president would tolerate from an ally. As for England, the Thatcher government is eagerly buying Trident missile submarines, and the best known names in the Labor Party broke ranks rather than accept the left-wing "unilateralism" of those now in the ascendancy. So what's to worry? The "Dutch disease"—the possible rejection of new "theater nuclear forces"-can hardly

infect all of Europe.

After listening to this talk fill the Junior Common Room at St. Peter's College here, or the villa that Aspen has built on the lakeside site of Joseph Goebbels' former residence, one can grow more than a bit confused.

But the most dangerous course for American policymakers, I came away believing, would be to accept the last view, the counsel of those who say there is no cause for concern. I say that because the most urgent voices—the most critical and passionatewere those of the politicians in their 30s, and they are the ones best qualified to point

where Europe may be headed in the future. It is clear that the tensions which made a John J. McCloy say, "I have never been as concerned about the alliance as I am today," are at least in part generational in their origins and expression. "Every sixth-former (16- to 19-year-old) I meet is wearing a CND Committee for Nuclear Disarmament) button," Chris Patten, a British Tory MP, said at lunch. His colleague, David Hunt, a defense specialist in Parliament, told the con-ference here that the young people in his Merseyside district "are agnostic, antistructuralist, almost anarchic in their views and responsive only to broad sentiments like 'peace.' I'll go to a meeting of young blacks in Liverpool 8, where youth unemployment is about 36 percent, and in the middle of talking about jobs, they'll say, 'Oh, by the way, when are we going to get rid of the nukes?' It seems like an irrelevancy to me, but to them, 'nukes' are part of the 'arrange-

ment' of society that they reject."

At the Berlin meeting, Jakob Kohnstamm, a 30-year-old newly elected member of the Dutch Parliament, said, "Anti-Americanism is not the problem; it's really more of an international generation gap. We don't see government bringing the economic solutions we want and there is fear that nuclear deterrence is creating its own problems. We all agree that the SS20s are a threat, but we think it is ridiculous to build up our destructive power to the point we can kill every Russian three or four times."

"Do you and your friends ever talk about Hitler's exploitation of the military imbalance?" one of the older conferees asked in a sharp tone.

"The balance of power is not irrelevant," Kohnstamm replied disdainfully. "But being able to kill a person once is enough. Why should I have the power to kill him three or four times?"

As that exchange indicated, even in the artificially polite atmosphere of the conference rooms, far from the demonstrations or the amplified oratory of the antinuclear rallies, like the church-sponsored Kirchestage that drew more than 100,000 people, many of them youths, to Hamburg late last month, there was a real edge to the generational ex-

When Karlheinz Schonauer, the paid executive director of the youth wing of Ger-many's ruling Social Democratic Party, joined the Berlin conference, the atmosphere changed. The young Socialists had just re-pudiated Chancellor Schmidt's policy of commitment to 1983 deployment of medium-range missiles in Europe. Schonauer arrived just as McCloy was warning that "anti-Americanism in Europe" could trigger a go-it-alone response in Congress and the administration.

"It's not anti-U.S.," Schonauer corrected the American, who is old enough to be his grandfather, it's anti-U.S. policy. You speak of 'the free world.' but there are very different interpretations of that phrase. Alexander Haig's view on right-wing regimes makes some young people think that if his policy had been in effect 40 years ago, the U.S. would have been allied with Hitler instead of opposing him. The medium-range missile raises the spectacle of a 'winnable' nuclear war being fought in Western Europe. Many, many of our young people are afraid of that, and their fear feeds the new peace move-

The older generation of Germans—diplomats, politicians, professors—were pained, incensed, embarrassed by Schonauer's words. "My party is trying to teach history to our young people," said one Free Democratic member of the Bundestag, with an expression that suggested, "You see what we are up against."

But what they are really up against is the passage of time. World War II, the Marshall Plan, the NATO alliance, the Berlin airlift, even the Berlin Wall—a few miles away—were all before the young people's time.

As Karsten Voigt, a predecessor of Schonauer in the youth job who is now a sometimes critical young supporter of Schmidt in the Bundestag, said, "It is important to understand what lies behind the alienation of our youth. You cannot expect young Catholics to support U.S. policy in El Salvador. You cannot expect young Protestants to support his [Reagan's] policy in South Africa. You cannot expect our environmentalists to applaud James Watt, or our trade unionists to praise the cutbacks in social programs in the U.S. We need the freedom to try to influence each other, without condemning each other as we do it."

A member of Schmidt's government, who may not be identified by name, said toward the end of the Berlin meeting that "my impression is that the interdependence of Germany, Europe and the U.S. is much more complicated and critical than I had realized. There are such changes taking place that we cannot afford to take things for granted."

And here at Oxford, a few days later, David Hunt, the mid-thirtyish Tory MP, said, "I hear all this concerning about the 'Successor Generation.' I'd guess I'm what they're talking about. And I want to tell you, there's a lot smaller gap between me and the generation now in power than there is between me and the young people I meet when I go home to Liverpool—the ones in their 20s. If the policies were hard to explain to us, think what it's going to be like to explain them to them."

STRONG MULTIFILTER ARRANGE-MENT WILL AID DOMESTIC KNIT-WEAR INDUSTRY

• Mr. HEINZ. Mr. President, the American knitwear industry is being seriously injured by imports. The number of imported sweaters as well as knit shirts and blouses has been growing steadily in recent years, leading to increased unemployment rates in the domestic knitwear industry and lost business for thousands of Americans across the country. New foreign suppliers have invaded the domestic market, joining with the existing low-cost suppliers to contribute to the 1980 trade deficit for knitted outwear overall of \$1,650,000,000.

The multifiber arrangement governing world trade in these products, which expires at the end of this year, must be strengthened in order to reduce the current onslaught of foreign products in the knitwear industry as well as many others. A coherent, aggressive negotiating strategy is needed now in order to accomplish our objectives, preserve American jobs, and resolve this important trade policy issue for American industry.

I recently received a detailed letter from Stanley Matzkin and George Vargish, president and chairman of the board of the National Knitwear and Sportswear Association, respectively, which describes some of the current problems in the industry. I ask that the letter be printed in the RECORD.

The letter follows:

NATIONAL KNITWEAR & SPORTSWEAR ASSOCIATION, New York, N.Y., July 24, 1981.

Hon. John Heinz, Russell Senate Office Building, Washington, D.C.

DEAR SENATOR HEINZ: The knitwear import crisis is now. More than half of all sweeps and almost one-third of the knit shirts and blouses sold in our country are imported. Five-hundred-forty-three million, yes, 543,-000,000 of these garments alone were imported in 1980. The 1980 trade deficit in sweaters was \$706,000,000 and for knitted outerwear overall was \$1.650,000,000.

outerwear overall was \$1,650,000,000.

These imports mean lost jobs, wages and tax revenues on the one hand, and higher unemployment, welfare payments and government spending for relocation allowances on the other. The most sharply affected are the least skilled workers of the small firms, frequently those located in the inner cities.

Sweaters have taken the brunt of this charge and demonstrate the seriousness of the import threat to the entire knitwear industry.

In 1980, domestic sweater shipments amounted to 9.1 million dozen—a 16 percent increase—while imports reached 12.5 million dozen—a 25 percent increase—that accounted for 58 percent of the U.S. market. In women's sweaters, the more important segment of the U.S. market, 1980 imports exceeded domestic shipments by more than 40 percent despite a 19.5 percent increase to 6 million dozen in those domestic shipments. The situation has been worsening throughout the decade.

The heavy surge of wool sweater imports from China demonstrates just how rapidly this trade can develop. In 1979, U.S. imports were 17,000 dozen, and in 1980 the figure rose to 500,000 dozen or six million wool garments.

Wool sweaters are among the most heavily impacted categories of any U.S. apparel item. According to the U.S. Department of Commerce, the ratio of wool sweater imports to domestic production in 1979 was 136.4 percent. Women's wool sweater imports exceeded domestic production by more than 2½ times, with an I/P ratio at 260.7 percent. And in 1980, imports increased by more than 81 percent over 1979.

Concentration of these sweater imports is important. Key low-cost suppliers are Hong Kong, Korea, Taiwan, and the People's Republic of China. They accounted for 11.4 million dozen imports last year.

New countries are moving in. Significant amounts of wool sweaters were imported in 1980 from small suppliers which had hardly shipped in 1979.

SOME NEW SUPPLIES TO THE U.S.—WOOL SWEATERS—1979 TO 1980

1980	1979
14, 024	3, 647
35, 405	925
32, 536	6, 346
13, 623	0
17, 010	1, 365
112, 598	12, 283
	14, 024 35, 405 32, 536 13, 623 17, 010

In May, 1981, tiny Mauritius accounted for 57,000 dozen more. These figures highlight but one example of the degree and magnitude of this sweater and knitwear import problem, and the pace at which it can worsen.

China further compounds the problem, and on a scale not previously experienced. The Chinese bilateral with the United States expires at the end of 1982. Their desires and demands will be extensive, and may not be approachable absent a massive redistribu-

tion of existing quotas forcing Hong Kong. Korea and Taiwan to compete with China for a single major country quota.

CURRENT SITUATION AND OUTLOOK

The Commerce Department's Import/Production ratios show just how far imports have moved into the U.S. sweater market. In the principal area of the domestic market, women's, girls' and infants' sweaters, imports far e_ceed domestic production.

Sweater categories I/P Ratio	1979
All Cotton	146.5
Men's & Boys' Wool	67.8
Women's, Girls' & Infants' Wool	260.7
Men's & Boys' Manmade Fiber	78.6
Women's, Girls' & Infants' Manmade	
Fibers	133. 0
Total	120 5

While 1980 and 1981 have been relatively strong sweater years, the cycle is due to turn, and the 1982-1983 outlook is likely to show weakness.

Labor costs are a key element in our vulnirability to imports. In June of 1980, average hourly wages in the U.S. knitwear sectors were \$4.51 for knit apparel, \$4.71 for knit fabrics, \$4.63 for yarn, and \$4.40 for dyeing and finishing. Compare these to China, where the sweater mill wages are 15 cents per hour, or to Mauritius where it is understood to about \$1.80 per day!

Low wages enable extensive production on hand-powered knitting machines, greater finishing and detail work, and overall, a significantly lower production cost. And that assumes that production cost is relevant. In China, where foreign currency earnings and employment maintenance are crucial, production cost does not appear to be an important concept in sweater production or export pricing.

THE IMPACT At wholesale

The impact of all this on our industry comes at the store level. U.S. industry sells at wholesale to chains and independent retail operators. The price at which retailers may obtain goods from foreign suppliers is crucial; regardless of the price at which those goods are sold to the U.S. consumer. Some recent import values are shown below. Retail stores seeking higher mark-ups, search out the lowest cost imported goods which are then sold to consumers at prices as close as possible to those being charged for domestic goods. Consumers do not benefit fully from the low wholesale prices of these imports. Importers and retailers of Chinese wool sweaters have acknowledged buying sweaters in China for \$5.00 each which they have sold to U.S. consumers at \$24.00 each, a mark-up of more than three hundred percent—after duties and freight!

Unit prices for U.S. wool sweaters at wholesale are in the range of \$7.75 to \$10.00 for lower-end, reprocessed wool and wool blend sweaters. Fine goods range to \$15.00 per and up. Some unit values of imports—as declared for duty purposes—shown here:

Average Unit Price Wool Sweaters; Women's, Girls' and Infants—446

Country	1980
Sri ! ani-a	\$3.35
Thailand	4.86
Malaysia	3.62
Singapore	4.13
Macao	5.79
Mauritius	4.31
China	5.57
Hong Kong	7.15

On job opportunities

Sweater imports represent lost jobs and business for people and companies in all sectors of the industry. Ten people produce approximately 100 dozen sweaters per week. The 1980's 12.5 million dozen sweater imports, on a 47 week production year, common in this industry, would represent a full year of employment for more than 28,000 sweater production workers. Additional supervisory and management positions are also displaced. And, it is not sweaters alone that lose out. Sweaters are at the top of a broadly-based manufacturing pyramid.

These sweaters require yarn. Imported sweaters account for approximately 8.325 lbs. of yarn per dozen, so that 1980 imports would displace more than 103 million pounds

of varn.

Dyeing and finishing generally assumes 10 lbs. per dozen sweaters. 12.5 million dozen would yield 125 million pounds for dyeing operations, and would represent a year of employment for an industry the size of that presently employed in U.S. operations.

The wages lost range from \$3.50 per hour for trimmers in sweater operations to \$8.40 per hour for sewing machine mechanics. The average wage for domestic sweater production is in the area of \$4.65 per hour, plus approximately 25 percent for fringe benefits. An annual payroll of \$300 million is involved here.

Additional amounts are spent by local, state and federal government unemployment compensation and social action programs required to deal with the impact of these imports.

Where does it hurt? States with important sweater and knitwear production are Pennsylvania, New York and New Jersey, Massachusetts, and the rest of New England, North and South Carolina, Ohio, Wisconsin, Virginia and California. Cities hurt by imports include Cleveland, Philadelphia, Milwaukee, and of course, New York County. The industry's fiber, yarn, materials and services suppliers are located throughout the country. All would benefit from immediate relief, and from the prevention of further damage.

Threat to other knit sectors

Repetition of the sweater import problem in other knit sectors, particularly knit shirts and blouses, is feared unless action is taken, because the knit sectors are open to low cost investment and ease of entry. Imports of knit shirts and blouses already exceed 43 percent of domestic production. Knitting mills can be set up quickly, with high productive output.

Can this sector be saved?

The Multi-Fiber Arrangement governing world trade in these products is up for renegotiation now. The United States can and should use this chance, and 1981-1982 bilateral negotiations to freeze the quotas for sweaters, and to establish the system rules needed to prevent further damage. The U.S. must take up President Reagan's campaign commitment:

"The MFA expires at the end of 1981, and needs to be strengthened by relating import growth from all sources to domestic market growth. I shall work to achieve that goal."

INDUSTRY RECOMMENDS

Emergency action on the sweater categories is needed until the domestic industry is assured a 50 percent share of the U.S. market now and through the next upward sweater market cycle.

Imports from the major suppliers must be

Imports from the major suppliers must be frozen at 1980 levels (below in the case of China), and new suppliers must be limited to the average of their 1979/1980 imports for 1982. (Alternatively, quotas from the major suppliers could be reduced and partially reassigned to newer, small developing countries.) These overall levels must be retained until 1983-1984, when the sweater market should have passed through its next downturn and be into a recovery period. At that

time, if U.S. producers have regained at least half the U.S. market, import growth could be permitted in line with anticipated growth in domestic production.

Knit shirt imports should be frozen for two years (1982/83), so that any growth in the domestic market in these categories is reserved for domestic production. Following a two-year freeze, imports would be allowed to grow annually at a rate not in excess of average annual domestic production growth in these categories during the preceding five

All other knitwear categories should be monitored closely and regulated so that import growth is limited on the basis of a five year moving average of domestic production growth (or decline) during the period beginning 1982.

During this special control period, all flexibility on these products in bilateral agreements, including swing and carryover shall be eliminated. Thereafer, all such flexibility should not be permitted to total more than

1% of the relevant quotas.

In the last analysis, the U.S. must apply comprehensive restraints in these heavily import penetrated categories so that excessive low cost country imports will not be accepted into the market, in excess of the amounts indicated, regardless of the diversity of their country or countries of origin; this action must be combined with vigorous enforcement of existing Customs laws to prevent quota and tariff evasion, false product marking, and transshipment frauds.

Domestic producers are investing in new technology and can recapture an improved share of the market, but not if each emerging, developing low-wage country is permitted to obtain an important slice of the market in addition to the shares already held by the Far East giants. Major import supplies must give ground in the U.S. if the U.S. market is to accept still more goods from emerging country producers. U.S. producers can give no more.

Very truly yours

GEORGE VARGISH, Chairman of the Board.

MACNEIL-LEHRER REPORT

Mr. PERCY. Mr. President, there has been much discussion lately concerning the alleged oil glut in this country, and its effect on business and industry. While it is true that there appears to be plenty of oil available at present, we must not allow ourselves to be beguiled into thinking that the need for energy conservation has passed. The fact that oil is readily available at the moment is due in large part to the successful efforts of many Americans to conserve energy. Last month, I chaired hearings of the Subcommittee on Energy, Nuclear Proliferation and Government Processes on conservation strategy for the 1980's, at which a number of important conservation topics were raised, and the subcommittee concluded that conservation remains one of the most cost-effective means of reducing our dependence on foreign oil.

In June, the "MacNeil-Lehrer Report," a highly respected public affairs program aired on public television, presented an excellent program dealing with the so-called oil glut and the possible consequences for energy conservation efforts. Representatives from the travel and hotel industry talked about the consumer response in terms of summer travel plans, and a utility president spoke about

the effect on short- and long-term utility prices. The fourth guest was the executive director of the Alliance to Save Energy, Ms. Linda Parke Gallagher, a woman with whom I have worked closely to shape national energy policy, and who testified at the subcommittee hearing.

The alliance is a coalition of business. labor, government, and public affairs groups that the late Senator Hubert H. Humphrey, the Honorable Carla Hills. and I organized in 1977. The alliance has long promoted energy conservation as an important means of reducing our national dependence on foreign oil, and as chairman of the alliance, I have worked with this organization to encourage conservation in all sectors of society. Ms. Gallagher has worked closely with the industrial sector concerning the potential for increased energy efficiency in this area, and she discussed this important topic on "MacNeil-Lehrer.'

Her testimony touched upon many issues that must be of interest to all of my colleagues who are concerned about the energy future of this Nation. Therefore, I ask that excerpts from the "Mac-Neil-Lehrer Report" of June 15, 1981 be printed in the RECORD.

The excerpts follow:

THE MACNEIL-LEHRER REPORT

CONSERVATION UPDATE

MacNeil. To some, conservation is not merely to be viewed as a sacrifice, but as the equivalent of new energy sources. The Alliance to Save Energy is a coalition of business, government, public interest and labor organizations committed to that view. Linda Parke Gallagher is the executive director of the Alliance. Ms. Gallagher, how much do you reckon conservation has contributed to the recent fall in oil imports into this country?

LINDA PARKE GALLAGHER. Well, Robert, we think that as much as one-half of the reduction in oll imports, or perhaps as high as 75 percent, could be due to conservation. Of course, that's a very difficult figure to quantify. But we do think that it has been substantial and significant, and that it will continue.

MacNeil. Is your association worried that the so-called glut may reduce the incentive

in this country to conserve?

Ms. Gallacher. No, we really are not. The price of oil since 1972 has jumped dramatically, by about 1,000 percent, and has gone up significantly—doubled—in the last couple of years alone. So consumers have an adequate incentive right now to conserve based on the price of energy. And energy is going to continue to rise at least at the rate of inflation for the foreseeable future, so that the built-in incentive—the price incentive—will remain.

MacNeil. So you think the price is really

MacNeil. So you think the price is really the determining thing in conservation and not availabilities, like gasoline at the moment?

Ms. Gallagher. I think that the availability of gasoline is what in the past has been referred to as conservation. The conservation response after the Iranian oil cutoff, when long lines at gasoline stations were experienced by consumers, did lead to shorterm curtailment. But it was just that: short-term curtailment. When we speak of conservation, we speak of investments in automobiles, in appliances, in more efficient building stock, in more efficient industrial processes. And those are the types of long-term investments which will induce meaningful and long-lasting conservation.

MACNEIL. You don't see any change in those trends since the supplies became more plentiful?

Ms. GALLAGHER. No, not at all. No, I think if anything, they're accelerating.

MACNEIL. Do you see any change in business-in its commitment to greater conservation efforts?

Ms. GALLAGHER. Business has been one of the—one of the real success stories in con-servation. Business has achieved about a 17percent savings in efficiency improvements since 1973. These trends are continuing. However, business, like the average consumer, is constrained right now by the lack of availability of capital at reasonable interest rates. So to the extent that we move to bring down the rate of inflation to make more reasonable interest rates a reality, and make capital in general more available—through new capital formation legislation—to industry, we should see this capital begin to be invested systematically in efficiency improvements

MACNEIL. I see. So you would agree with Mr. Pistilli that tax incentives coming down-hopefully coming down for business-could be an incentive to more conservation investment? Is that-would you agree with that?

Ms. GALLAGHER. Yes, I would definitely agree with that. I think specifically in the six most energy-intensive industries, where energy costs at times represent as much as 70 percent of total product cost—so, for these industries, the incentive to conserve is very, very great, and may mean the difference between the competitive edge between one company and another.

MACNEIL. Briefly, apart from the tax plans, is the federal government doing everything it could to encourage conservation?

Ms. GALLAGHER. I think the attitude of the Reagan administration right now is rather a mixed bag. We would applaud it-the Alliance—the accelerated decontrol of oil prices. However, we have to realize that natural gas prices remain subsidized, remain controlled; that we are giving very large incentives to produce oil and gas and other forms of energy, and that one of the administration's first acts was to drastically slash the conservation budget from about a billion dollars to about \$300 million. So cuts were aimed at the conservation area to much greater extent than to any other area of the Department of Energy. So we are concerned that a more thoughtful approach towards energy efficiency and conservation needs to be taken by the administration. We are rather have a wait-and-see attitude, though, because we think they are moving in the right direction in terms of general capital incentives, bringing down the inter-est rates, and decontrolling the price of energy.

LEHRER. But the Reagan administration is

removing some of that heat, is it not?

Mr. MAULDEN. Well, I think that that is true. I don't think that we're getting the federal mandates—or the approach to federal mandating getting off gas and oil and onto coal that was prevalent in the previous administration. But it's still a matter of economics, and I believe that the utility companies will follow that course of action that will produce the lowest-cost product for their customers.

LEHRER. Is that the kind of thing that bothers you, Ms. Gallagher, in terms of the Reagan administration—like taking the heat off Jerry Maulden and others to convert, get out of the oil-using business?

Ms. Gallagher. Well, I should say that we are working with Jerry Maulden on a study that is sponsored by the John A. Hartford Foundation on encouraging utilities to more aggressively go after conservation investments. We think that-

LEHRER. You mean-whats a conservation investment for a power company?

Ms. Gallagher. The kind of thing that we're working with Arkansas Power & and other utilities, is to identify invest-ments actually on their customers' premises that might save energy. An example might be cogeneration and allowing the utility and the industry to go into a partnership, of them to put up capital and to split the savings and also the profits that may accrue. This is a more creative, innovative financing arrangement.

LEHRER. Sounds like a great deal, Mr. Maulden. I don't know why you're not doing

Mr. MAULDEN. Well, we're certainly working toward that end.

LEHRER. Okay. Robin?

MACNIL: Yes, Ms. Gallagher, if this country has succeeded, since 1978, in lowering its daily imports from 8 million to 5.4 millionthat's roughly one-third-how much further do you reckon practical conservation measures could lower it over the next few years? The import figure?

Ms. Gallagher. I think it's quite amazing that conservation has gone as far as it has gone as quickly as it has gone. It has absolutely outstripped any energy prediction from Harvard's energy future, to Ford Foundation studies, to the Department of Energy's own forecasts. The Department of Energy in NEP III was forecasting oil imports of over 6 million barrels of oil a day by 1900. And we're already beyond that. And yet we have barely begun to tap the energy source of energy conservation, energy efficiency. There is enormous potential. Our work with industry in another study that we're doing-sponsored by the MacArthur Foundation—we're working with the six most energy-intensive industries, and there are literally billions of dollars—it's been estimated as high as \$50 billion worth of productive investments in conservation that have yet to be made. So I think that as market forces begin to work, they may outstrip our wildest expectations as to what is possible.

MACNEIL. Would you agree with that, Mr.

Pistilli? That you've got a long way to go?

Mr. PISTILLI. Yes. We have a long way to go. Some of us in our industry think that oil is the fuel of transportation, and the fuel for generating electricity and running our industrial plant has to come from coal and nuclear energy, and I think this is going to be the ultimate solution.

INTERNATIONAL HARVESTER MEETS WITH CONGRESS

Mr. PERCY. Mr. President, on June 25th I had the honor of meeting with my two good friends, Brooks McCormick and Ben Warren, of International Harvester. This year is the sesquicentennial of the invention of the reaper by Cyrus McCormick, truly a landmark event in our Nation's agricultural and industrial history. I ask that the remarks made by Mr. McCormick, chairman of the board, and Mr. Warren, president of IH's Agricultural Equipment Group, on June 25th to a luncheon with Members of Congress representing States and districts with IH facilities be printed in the RECORD.

The material follows:

REMARKS BY MR. BROOKS MCCORMICK

Distinguished members of the Senate and the House of Representatives, some of our International Harvester people have come to Washington today because our company is recognizing its 150th anniversary. To help commemorate that event, we're sponsoring a special exhibit at the Smithsonian's National

Museum of American History. The exhibit, which we dedicated this morning, is titled "The Changing American Farm," and that title, it seems to me, is a massive understatement. The "Productivity Revolution" on the American farm would be far more accurate.

In the exhibit is one of Cyrus McCormick's earliest reapers which he successfully brought to market in the early 1830's. That was the beginning of a global revolution in farming. When that early reaper was perfected, one farmer, using a cradle, could cut two acres of grain a day. The same farmer could produce enough food to feed himself

and three other people.

The McCormick reaper quadrupled the harvest to eight acres a day. But more importantly, the exhibit contrasts this to the miracle which takes place every day on our American farms—the farms of many of your constituents. Today our company's Axial-Flow combine can harvest 100 acres of wheat in a single day. This kind of productivity enables one American farmer to produce enough food for 48 U.S. citizens, and there is enough left over to feed 20 other people overseas. I don't have to tell you how important that is to the strength of the dollar and our balance of payments position.

However, at this particular moment, I be-lieve all of us may be more concerned with IH's future than its past. There have been many opinions expressed in the media, and many of these opinions are in conflict with each other. As I believe I've heard some legislators say from time to time—I'd like to take a few moments and set the record

straight.

The company is in the final stages of what is thought to be the largest debt restructuring program in history. It involves nearly \$5 billion and, as you well know, there is no government involvement whatsoever. I am pleased to tell you that lenders accounting for more than 95 percent of the funds involved in forming two revolving credit facilities totalling about \$3.4 billion have approved, in principle, their participation in these facilities. Indications of interest also have been received in connection with the \$1.5 billion of additional funds which would be provided by banks through a proposed purchase facility for IH Credit Corporation receivables.

This is just a long way to say that IH is well on its way to regaining the financial flexibility that is needed to assure its longterm stability, growth and success

The company's short-term liquidity problem resulted from a number of events which unexpectedly converged at the same moment. In April of last year, when the company settled a long and hard six-month strike, all three of its major markets were moving into a time of recession. It is the first time in decades that all three of IH's major product lines have simultaneously experienced such soft market conditions, both domesti-cally and overseas. This includes highway trucks, agricultural equipment, and con-struction machinery. In the agricultural sector the problem was aggravated by the grain embargo and drought.

In addition the roller coaster jumps in interest rates hit the company from two directions. We had modernized our plants with huge sums of money, increased our debt, and the increased interest expense cut into our profit margins. In addition, our customers looked at these interest rates and promptly postponed the purchase of equipment.

Now what are we doing at International Harvester to combat these adverse pressures? I can tell you that the company's management is taking continuing and intensive steps to insure that IH can be profitable even if demand for our products was to remain at today's low levels.

For example, in 1977, our profits were about 2 percent of sales on a LIFO pasts.

Today, on a modest increase in unit volume, we will be much closer to being a 5-percent company, and our goal is at least an 8-per-

cent return on sales

We are making the strides that will allow to meet this goal through a variety of initiatives. In the last three years, our company has introduced cost improvement programs which are now saving us over 400 million dollars a year. This year alone, we realistically expect to achieve additional cost reductions of over \$300 million. These improvements have resulted from such efforts as reducing the cost of purchased items, more commonality of parts, cutting transportation costs, decreasing inventory levels by taking a leaf from the Japanese book, increasing utilization of our plants and equipment without working our people harder, and using energy more efficiently.

Non-profitable or underutilized assets are

being identified and eliminated. At the same time, we are still spending money to further modernize our facilities—an expected total of more than \$300 million in 1981. This will enable IH to meet the future challenges of competition from this country and abroad. It also means that our plants and offices will be able to provide secure employment for the over 80,000 TH em-

This year, we are introducing 51 new prod-ucts—an all-time record for the company. And we have one of the strongest dealer networks available to any company. In the United States, IH has almost 4,000 dealers with an aggregate net worth of about \$1.5 billion, and a total of over 7,000 dealer outlets around the world with an aggregate net worth of perhaps \$3 billion.

An independent study by Booz, Allen & Hamilton of both International Harvester and competitive dealers verified our dealers'

strength, loyalty, and confidence.

These three ingredients—capital equip-

ment advanced products, and dealer orga nization—are combined with a base of skilled and loyal employees. That's the recipe for long-term stability and future record earn-

The signs of this strength are apparent even in today's depressed capital goods economy. Our market shares in heavy and medium duty trucks are expected to set all-time records this year. We are a strong number two to John Deere in farm equipment, and we're really closing the gap on a world-wide basis. Ben Warren will discuss that with you in just a few minutes.

But the bottom line is that with our market shares and our improved cost structure. we will be able to achieve substantialy increased profit margins as our unit volume

The independent Booz, Allen study projected that IH could return to traditional levels of profitability from continuing opera-tions in 1982 and that earnings in 1983 could be an all-time record. With the capital gain which we expect from the anticipated sale of our Solar Turbines International division for \$505 milion, we should be in the black for all of this current fiscal year.

We're making progress that makes me very proud. But we really need Congress to quickly pass a program that would allow significantly faster depreciation. This would stimulate business investment in productive equipment-something that is urgently needed if we are to meet the challenges of global competition. We also believe such action will break the dam of pent-un demand and move the economy forward so it will more than make up any short-term revenue loss from lower tax levels.

I would now like to introduce one of my colleagues, Mr. Ben Warren, who is president of our Agricultural Equipment Group. Ben will give you an overview of the outlook for this segment of our business.

REMARKS BY MR. BEN H. WARREN

Thank you, Brooks. Agriculture is the industry in which our company had its begin-ning 150 years ago. Today, farm equipment continues to be a basic cornerstone of IH's future, and it is the business segment into which we are currently placing the highest percentage of our company's capital and search dollars.

About 65% of the Agricultural Equipment Group's sales are generated in North America. We have about 10,000 of our Group's employees at five U.S. plants. If you were to look at a map, our plants line up like a belt right down the fertile Midwest center of the country—stretching from Rock Island and East Moline, Illinois at the north—through Canton, Illinois—to Memphis. Tennessee-and down to Gulfport, Mis-

As Frooks mentioned, our company is introducing an all-time record of over 50 new products in 1981. More than 30 of these are advances in agricultural machinery to in-

crease farm productivity.

IH has already added new tractor models which are being produced at the Farmall plant in Rock Island. This includes the innovative 2 + 2 tractor which has the traction and strength of four-wheel drive coupled with the mobility of two-wheel drive. It allows farmers to get in their fields earlier and stay longer-despite adverse weatherduring the critical planting and harvesting seasons

At East Moline, IH is producing the most modern line of combines available—the Axial-Flow rotary models. They increase productivity by improving yield, reducing grain damage, and cutting fuel consumption.

Our new line of Early Riser planters became available to farmers just this spring. They're produced at East Moline and Canton and offer faster field speeds as well as a system which packs moist earth around the freshly planted seed for faster germinating

crops.

At Memphis, we are now building disk harrows that for the first time incorporate our own Earth Metal disk blades that are up to 30% stronger and last up to 20% longer than conventional blades. And the Gulfport plant adapts small and medium-sized tractors for the North American market.

This quick tour around the nation's heartland shows the stake IH has in agricultural equipment. In the first six months of this fiscal year, our sales of farm machinery amounted to \$1.6 billion which equalled 43% of IH's total sales in that period. We be-lieve this percentage will continue to grow in the future

There's another figure which shows our dedication to the farmer. Our company spent a total of \$384 million on capital improvements in 1980. Of that total, \$229 million, or 60%, went into agricultural equipment plants. And this commitment to investment hasn't slowed. We still have multi-million dollar programs moving forward to increase efficiency, upgrade the quality of our prod-ucts, and improve the working environment of our employees

In addition to advanced products and plant modernization, the third part of our future success formula is the capability of our dealers and the IH marketing organization that supports them. We have a well-established network of 1,835 IH agricultural

equipment dealers in the U.S. These are privately controlled, independent businesses that have been with IH for an average of 18.4 years.

Like our farm customers, they too are looking forward to new legislation that speeds up depreciation on farm equipment

and buildings

As we all know, we are still in the midst of a difficult time in the farm equipment business. Because of low levels of retail de-mand, primarily due to continuing high rates and declines in commodity prices, many of our plants-as well as those of our competitors—will be closing for an extra week or two on top of normal three-week vacation shutdowns this summer.

However, we continue to be moderately optimistic about the remainder of 1981. Most business indicators are good in the agricultural sector. Interest races are predicted to decline to more reasonable levels. Crop prospects are generally favorable for most of the country. Export demand is still heavy. And even though commodity prices have dropped in recent months, farmers are generally assured of good prices for their crops.

With the fundamental strengths of IH, we will take full advantage of this turnaround. Our company expects another 150 years of productive accomplishment-and I personally believe the coming years will be even better than the first decade and a half.

To show you why we are so optimistic, I'd like to give you some insights into the futuristic systems we're looking at in our IH

technology and engineering centers.

An example is the combine of the future. We're looking at total systems rather than just a few functions in our advanced harvesting group. It is now possible to make a combine that can harvest, process the crop, package it, freeze it, and have it ready for shipment. The technology exists which could make this a reality. But I honestly have to tell you that it's economically impractical today.

I mention this concept to illustrate that we are working on similar systems approaches that will be equally revolutionary, and will literally be on the market in less than a decade. The essence of our work in advanced harvesting systems is to look at the individual links in the chain of agricultural production—the soil, the crop, the harvesting mechanism, the product, the by-product, and finally the manner in which the final product will be used in the marketplace. We're looking at all the links in the chain of agricultural production and how they all integrate together to efficiently and effectively produce food, feed, and fiber.

Like advanced harvesting, our biomass department also is taking a systems approach

in its activities.

We see a tremendous opportunity for the farmer, or cooperative groups of farmers, to significantly be more fuel efficient than they are today. In addition to growing food, feed and fiber, the farmer might also be able to grow fuel perhaps as a direct or indirect product of his agricultural business.

The IH biomass group is exploring a variety of technical approaches to producing energy from wood, farm waste and municipal wastes. As a feed stock, these materials could be used to generate synthetic gas as a fuel to heat homes, farms or factories; to burn in electricity-producing generators; or to be used in chemical synthesis to produce methanol.

At International Harvester, we feel energy uses of biomass should be prominently ex-plored and utilized. It is common ground that can benefit all mankind.

EXTENSIONS OF REMARKS

BEST WISHES TO TED PIERCE

HON. JOHN G. FARY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES
Tuesday, August 4, 1981

• Mr. FARY. Mr. Speaker, later this month, August 21, is the last day which Mr. Ted Pierce will be with my office. Ted served in my Washington office this summer as our L.B.J. congressional intern. He will be returning to his studies at New England College in Henniker, N.H.

I would simply like to reiterate how invaluable the intern program is to the operation of congressional offices, as my colleagues well know. Ted was a dependable and enthusiastic worker whose efforts contributed measurably to our efficiency. There was nothing that he was not willing to tackle.

I served with Ted's father, State Representative Daniel Pierce, in the Illinois General Assembly, and I trust that this experience gave Ted an insight which one from a political family will savor. As president of his own student senate at New England College, I am sure that Ted will soon become a successful and respected gentleman in whatever profession he chooses.

I extend my gratitude for his services and wish him well in future endeavors.

SAFE ENERGY SOURCES— SURPRISING RESULTS

HON. MARILYN LLOYD BOUQUARD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mrs. BOUQUARD. Mr. Speaker, the Energy Research and Production Subcommittee, which I chair, recently held hearings on the topic of "Societal Risks of Energy Systems." These hearings addressed the general area of risk analysis and how it has been, or might be, applied in assessing the comparative risks involved among various energy generation technologies.

All of the expert witnesses agreed that risk analysis, if properly used, can be a valuable aid to the policymaker. The methodologies developed by professional risk analysts allows one to systematically assess the risk for any given energy technology.

It is, of course, not altogether clear that one can quantify all of the various facets of risk, even though they can be enumerated. For example, how does one quantitatively assess the risks involved in not providing enough

energy to fulfill society's needs? Or, in contradistinction to this facet, the risks of having provided the energy—at the cost of having not funded some other societally beneficial activity—and then not needing it. Risk assessment, clearly, must be used as only one of the many tools which the policymaker has at hand to help understand the impacts of technology, or a lack thereof, on society.

There are, however, some topics for which there is sufficient quantitative information available to perform a comparative risk assessment. In the hearing, Dr. Lester Lave, a distinguished visiting scholar to the prestigious Brookings Institute and former head of the Economics Department at Carnegie-Mellon University, did a very convincing job of showing us, with some concrete examples, where risk analysis has been appropriately utilized. Interestingly enough, he noted that the results are sometimes counter to what may be one's casual impressions.

In particular, Dr. Lave quotes work performed at the Brookhaven National Laboratory (Report No. BNL-51307) in which a number of energy systems were analyzed with regard to illness, accidents, and fatalities-both per unit energy production-which would most probably occur due to the construction and implementation of various energy production technologies, for example, solar photovoltaics, wood burning, coal-steam electric fuel cycle, nuclear fission-including the complete fuel cycle, and others. Dr. Lave reports that the study shows that after a comprehensive examination of the alternatives, that seemingly benign technologies such as solar photovoltaic electricity production and wood burning appear to offer as high or higher risks than coal and nuclear electricity production.

This Brookhaven report derives quantities data from actual present day energy production systems. Obviously, these systems will improve with time and the relative risks will change, for example, less energy will be needed to produce solar photovoltaic cells, even safer nuclear fission powerplants will be built, better scrubbers will be installed on coal-fired powerplants, et cetera. Nevertheless, the results of the study are food for thought for those who would radically change our existing energy supply system.

I am including in the RECORD today Dr. Lave's testimony, and I commend it to the attention of my colleagues and the American public in the continuing debate about energy.

TESTIMONY BEFORE COMMITTEE ON SCIENCE AND TECHNOLOGY, THE RISKS OF ALTERNA-TIVE ENERGY SOURCES BY LESTER B. LAVE, BROOKINGS INSTITUTION, JUNE 18, 1981

INTRODUCTION

In this testimony I will sketch the methods of estimating the risks, particularly to health, of energy systems. Some of the difficulties in analyzing these risks will be discussed along with current methods of solving them. Finally, I will present the results of analyses of the risks of a number of current energy sources including nuclear reactors, coal fired plants, various solar energy technologies, and the use of wood for home heating.

THE COMPLEXITY OF SETTING GOALS

Social goals are rarely simple and actions to achieve them never have a single consequence. We desire electricity that is cheap, safe, and reliable. No one is satisfied to have electricity that is extremely expensive, but is safe and reliable, or indeed, to achieve any two of the three attributes while sacrificing the third. As I illustrated in a recent paper on federal regulation of the automobile, society is not well served by ignoring any of the significant aspects of a problem (Lave, 1981a). In the case of the auto, over ten years Congress successively regulated safety, emissions, and fuel eoncomy, and may yet get around to regulating the other important aspects such as price and styling.

As the auto paper shows, a second lesson is that society is not well served by considering one goal at a time; regulation of fuel economy was necessitated partly by the regulation of safety and emissions. The relevant goals have to be considered simultaneously so as to reconcile the pulls and tugs of conflicting goals. In setting national energy policy, we have been guilty of focus-ing on one attribute at a time and ignoring the effects of our decisions on other attributes. For example, the only attribute of importance in regulating nuclear power has been safety. The consequent ignoring of cost and reliability has reduced, and in many cases eliminated, the competitiveness of nuclear power. Project independence considered only reliability and produced a plan that had vast increases in cost and important compromises in safety.

I have simplified by discussing the attributes of cost, safety, and reliability. For energy, other attributes include the future supply of fuel and international aspects of our decisions. All five of these attributes or dimensions of the problem must be considered together in arriving at a national energy policy. Safety does not dominate the decision, but neither can it be ignored. What follows is an attempt to explore and quantify safety aspects of energy decisions. These aspects are but one of five that must be considered in arriving at sensible energy policy.

A PRIMER ON RISK ANALYSIS

To determine the risks of accidents associated with a project, one must begin by deliniating those parts of the project where there is an accident risk (Lave, 1981b). The second step is to determine the type of injury and probability of injury associated with each risky part. The third step is to

find a number of people exposed to each risk. The final step is to characterize the hazard (magnitude of possible harm), who is at risk, and the expected number of injuries of each type.

To determine the risks of occupational disease or disease in the general population, the steps are similar. The first step is determining the substances to which people are exposed. The second step is to determine the dose-response relationship for each sub-The third step is to determine the population at risk and the dose received by each person. The final step is to characterize the type and amount of disease expected for each group, the amount of disability and

premature death.

It is relatively easy and straightforward to describe the procedures for characterizing accidents and disease; however, applying these procedures is rarely easy or straightforward. For example, accidents are rarely due to a single cause. Instead, a number of factors contribute, generally including some human mistake or lack of attention. What really caused the accident and what is the cheapest (and most reliable) method of preventing it? For example, a large number of people are killed each year in accidents involving freight trains; generally there is a collision between the train and a vehicle at crossing. Since coal represents a large fraction of railroad tonnage, a large number of accidents must be attributed to carrying coal. What is the cheapest and most reliable way of eliminating these accidents? A very expensive way is building grade crossings and putting up fence along the right of way. The latter is unlikely to be effective in preventing people from getting close to the tracks. The best alternative might be to substitute coal slurry pipelines for freight trains.

The difficulties associated with occupational disease are much greater. There are myriad toxic substances in minute quantities in the workplace and in the surrounding environment. Occasionally the concentration and resulting dose are great enough to produce an acute effect. More generally, minute doses contribute to some unknown increase in chronic disease. Often latency periods of several decades are involved, the actual incidence of the resulting disease is known, and rarely can one be certain of the

cause of a particular disease.

Epidemiological studies provide some evidence about the health effects of various occupations and exposures. More generally, there is at best information from animal bioassays, or no information at all.

Estimating the population at risk and the dose they receive is conceptually straightforward, but extremely difficult in practice.

Even assuming the analysis can be performed, the result is a set of disparate health effects, accidents involving consequences that range from trivial to fatal and set of disease effects that range from slight, acute effects to chronic disease resulting in death. To make sense of this array of effects, one must aggregate them somehow. But how many slight injuries are equivalent to a serious injury? How many serious injuries to a fatality? Is a fatal accident better or worse than a fatal cancer?

Some effects, such as accidents and acute disease occur immediately; some occur only after decades. What is the cost to society of a fatality now versus a fatality in thirty

Some people believe it is important to distinguish between accidents or disease to workers and to the general public. Workers generally know the nature of the risks and are paid to assume the risks. The general public is often not aware of the risks and is loathe to have the risks imposed on them.

The point to be emphasized is that the risk assessment is a careful, systematic attempt to estimate the health effects of an technology and to aggregate the risks so that the decision makers can make sense of them. For the situations at issue, it is extremely difficult to estimate the effects with confidence. For example, the public health effects of air pollution from burning coal are subject to intense controversy. While one cannot accept the estimates as gospel, one should not dismiss them as guesses. They should be an important input to energy policy, but one must be careful to recognize the amount of uncertainty associated with each estimate.

A COMPARISON OF CURRENT ENERGY TECHNOLOGIES

Systematic attempts to infer the risks of energy technologies date back less than one decade (Lave and Freeburg, 1973; Sagan, 1973, 1974). The early studies focused on electricity generation technologies and compared coal with nuclear, with some consideration given to oil and natural gas. With the OPEC embargo came the realization that oil would be scarce and so the only near term alternatives are coal and nuclear. The initial evaluations found that both the occupational and public health risks of coal were many times greater than the risks for nuclear reactors. Depending on the precise assumptions, coal was estimated to produce 100 to 10,000 times more adverse health effects than nuclear

These initial analyses did not give adequate attention to various problems in both fuel cycles. For coal, environmental effects were not considered, including the health consequences of acid rain and the climate changes associated with atmospheric accumulation of carbon dioxide. For nuclear, inadequate attention was given to nuclear accidents, sabotage, the risks of nuclear proliferation, and disposal of radioactive waste. Later analyses have made some progress in considering these additional issues, but have tended to estimate the risks of coal and nuclear to be more comparable (Morris et al. 1980; Hamilton, 1980), with results shown in the table.

Dose-response relationships and the potential of future technology have generated intense controversy among the advocates of various technologies. The effect of low level ionizing radiation on health is generally assumed to be a liner, no threshold dose-response relationship, but there is no general agreement whether this relationship is correct of conservative (BEIR, 1971, 1980). The effects of sulfur oxides and suspended particulate matter on health have generated even greater controversy recently, with contradictory epidemiological studies, laboratory experiments that are difficult to interpret, and experts arriving at opposite conclusions about the health effects at current ambient levels (Lave and Seskin, 1977, 1979; National Academy of Sciences, 1978; Holland et al, 1979; Chappie and Lave, 1981). If the health effects of suspended particulate matter and sulfur oxides are dismissed or abatement technology is assumed to improve vastly, coal looks like a more acceptable alternative. I want to state my judgment that the health effects of sulfur oxides and particles are large and that stringent abate-

ment is necessary.

The pitfalls of regulation are illustrated by coal. The 1971 EPA regulations covered sulfur dioxide and particles. The cheapest way of meeting the standard was to build a high stack to disperse the pollution over a wider area. There is a general consensus that acid sulfates, not sulfur dioxide, are the primary culprit in causing adverse health effects. The effect of a tall stack is to increase the amount of sulfur dioxide converted into sulfates generally and acid sulfates in particular. Thus, failure to get the regulations exactly correct helped lead to abatement policies which worsened the situation. EPA now requires stack gas scrubbers for all new coal fired plants. While these devices remove about 95 percent of the sulfur from the stack gas, they convert the remaining 10 percent to sulfates, particularly sulfuric acid mist. There are suggestions that scrubbers may have the effect of worsening health effects, at least locally.

More recent investigations have examined the risks associated with various solar technologies as well as of burning wood for home heating (Morris, 1981; Rowe and Groncki, 1980). Contrary to popular belief that these energy sources are benign, they find that the health risks of photovoltaic technology and of wood burning are higher than those for coal. This is not an area where one's casual impressions can be relied upon.

CONCLUSION

I have sketched the difficulties in setting and implementing social goals and in performing quantitative risk analyses. In reviewing the health effects of various energy technologies, all investigators agree that nuclear appears to offer lower risks, generally significantly lower risks than coal. However, there is still vast uncertainty about various aspects of the fuel cycles and about technological changes in mining, abatement tech-nology, and in waste disposal. Seemingly benign technologies such as photovoltaic and wood burning appear to offer a higher risk than coal, showing that alternatives have to be examined carefully.

EXTENSIONS OF REMARKS A CONSTITUENT SPEAKS OUT ON CRIME

HON. BENJAMIN S. ROSENTHAL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. ROSENTHAL. Mr. Speaker, crime is a societal disease that sparks outrage, horror, and indignation in the hearts and minds of all citizens. It is a problem that transcends regional boundaries, age barriers, and economic classes. It afflicts all of us through the real costs it imposes on our pocketbooks. But, more importantly, it constricts our personal freedom.

Today, I want to share with my colleagues a poignant letter that I received from a constituent about crime. This letter is just one of many I receive that relates the personal anguish crime causes in the lives of people who have been victimized by robbery, muggings, or violent assault. These people, in addition to millions of other citizens, are afraid to walk the streets of our cities, shop in our shopping plazas, or ride on public conveyances. This

take resolute action to stem the alarming trend of national crime statistics.

The text of the letter follows:

letter closes with a call for Congress to

Dear Congressman Rosenthal: I'm sick of it! Sick of the muggings, the robberies (we are one of the statistics) the inability to wear hard-earned jewelry or carry a handbag, or go out at night alone, Sick, sick, sick of the liberal judges. Sick of not being able to shop in the Bay Terrace Shopping Center without fear of any or all of the above.

It's got to stop.

We put a horrible, confining gate on our fire escape windows. We drilled holes in our windows near our terrace (That's where our burglar made his 1:30 am entrance while we were sleeping.) We put ourselves behind bars.

Enough

While crime is a problem that does not lend itself to glib responses or easy solutions, Congress can take effective action to protect our citizens from the muggings, robberies, and violent assaults that are addressed in the letter. One critical step in our battle against crime must be the immediate passage of strict gun control legislation. In the average day, 60 Americans die of handgun violence, whether by homicide, suicide, or accident. In the last decade, 217,000 Americans died by handgun violence-nearly four times the number that died in Vietnam. Recently, the assassination attempts on President Reagan and Pope John Paul II have reinforced the need for resolute action.

In my 1981 districtwide questionnaire, I asked constituents which measures they supported to combat crime. Over 80 percent of the respondents said they favored gun control. The Congress currently has two pieces of gun control legislation before it. H.R. 3200, the "Handgun Crime Control Act of 1981," would prohibit the manufacture, sale, and transfer of handguns to private persons. H.R. 40 is an even more stringent measure which would prohibit the possession of handguns. The time is long overdue for Congress to meet its responsibility to the public and enact an effective gun control law.

I am a cosponsor of both gun control bills pending before the House. I believe that these measures can make a significant difference in reversing the alarming trend of national crime statistics. I call on my colleagues to give them urgent consideration when the House reconvenes in September.

DR. KING AND THE POOR PEOPLE'S CAMPAIGN

HON. JOHN CONYERS, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. CONYERS. Mr. Speaker, David Levering Lewis' biography of Martin Luther King, Jr., "King: A Biography" (University of Illinois Press, 1978), provides an excellent account of Dr. King's plans for the poor people's campaign in Washington, which was the major project of nonviolent political action that he worked during the last months of his life.

At that time King was besieged by intense and conflicting pressures from all quarters of the civil rights movement that he led. His outspoken position against the Vietnam war earned him the hostility of many of his original supporters. The Johnson administration, whom he worked closely with on civil rights legislation, shut the door on him. Younger, more militant leaders of the movement questioned his ability to lead further charges against racial and economic discrimination. The urban riots in 1967 raised doubts about the workability of King's philosophy and practice of nonviolence. King envisaged the poor people's campaign as the logical extension of the civil rights movement into the areas of social and economic inequality. In the midst of the war and the urban riots, he felt more strongly than ever that nonviolent direct action was the key to social change.

In October 1967 Dr. King submitted to the Kerner Commission, that was investigating the urban riots, a bill of rights for the disadvantaged. In December before the staff of the Southern Christian Leadership Conference he presented the final plans for the poor people's campaign. King never lived to implement the plans. He had accepted in March an invitation of a group of ministers to travel to Memphis, Tenn., to give support to the sanitation workers' strike in that city.

He was killed in Memphis by an assassin's bullet.

Excerpts from Lewis' biography on Dr. King's role in the poor people's campaign follow:

In July, three months after the publica-tion of "Where Do We Go from Here," racial disturbances flared in Newark, New Jersey, and Detroit, Michigan. The loss of life and the property damage in Detroit surpassed everything of its kind in American history. There no longer appeared to be any place for the sincere, "creative" moderation of a Martin Luther King, his nonviolent abstractions and gratuitous preoccupation with a remote war. Louis Lomax states that Martin even began to accept the "undeni-

able fact that violence paid off."
The truth is that Martin became even more opposed to violent social action after the July riots. But he also recognized the general public impression of nonviolent bankruptcy that had been fostered by the riots. Since Chicago, nonviolence had not demonstrated the capacity to play a "transforming role," he admitted later. Indeed, a review of the accomplishments of the SCLC in Chicago, after the Summit Agreement, were not impressive. Fewer than two thousand families had organized into tenants' unions and compelled landlords to recognize them officially and to make firm commitments. An SCLC-sponsored union-to-endslums rent strike, lasting six months, achieved concessions for six hundred tenants in the Lawndale section of the city. Two grocery corporations, Hi-Low and National Tea, agreed to carry products of black corporations and to deposit in black banks the income from their stores located in the These accomplishments, although symbolically impressive, left the surface of the problem barely scratched. Moreover, the labors of the SCLC staff in organizing a political machine in the ghetto aborted miserably. It was only in the wake of the July chaos that the readiness of the national business community to invest in the ghetto made it propitious for Martin's Chicago lieutenant, Reverend Jesse Jackson, to announce that Operation Breadbasket, focusing on jobs, would henceforth be a national undertaking.

The Supreme Court, the mainstay of civil had begun to reflect the satiety of the nation with black demands and civil disobedience. In November, 1966, Justice Byron White, who had consistently voted with the Warren court's majority, cast his vote to uphold the conviction of civil rights demonstrators in a lower court for trespassing in Tallahassee, Florida. It was the first judicial reverse of this nature suffered by the Movement since Montgomery. In June, 1967, the justices decreed that Martin's conviction by a Birmingham court for demonstrating without a permit was valid. He and eight others, including Fred Shuttlesworth, Ralph Abernathy, and Wyatt Tee Walker, were to spend four days in a Birmingham jail in October. A week before surrendering to the authorities, Martin submitted his Bill of Rights for the Disadvantaged to the recently established Kerner Commission, charged by the President with the task of uncovering the causes of urban racial explosions. In prison, he made profitable use of the time to hammer out, with Ralph and Wyatt, his cellmates, the main outlines of an interracial coalition of the poor that would pressure the government into enacting legislation benefiting those below the poverty line. At an SCLC meeting in Atlanta in December, Martin presented his plan

for a poor-peoples march on Washington, to take place in April, 1968. Three thousand poor whites, American Indians, Americans of Mexican descent, and blacks (who would comprise the majority) were to converge on capital and demonstrate nonviolently until Congress acted.

The following weeks were turbulently busy. No proposal could have been more unwelcome than Martin's poor-people's march to the capital. Having legalized the right of blacks to integrated hamburgers and polling booths, having designated more than \$1 billion for their uplift and accepted the desirability of open housing if not the legal apparatus to enforce it, the white community was consterned by the planned inundation of Washington by thousands of proletarians. Professor C. Vann Woodward's heuristic question "What more do they want?" the Harper's article "What Happened to the Civil Rights Movement?") caught the dominant national mood. Speaking of black ambitions, Christianity Today lamented much later that "Their tragic misconception that the only barrier to a Negro heaven on earth—conceived in terms of national plenty—is lack of legislation and appropriation shows where modern welfare and government propaganda have brought us." Martin's position was that only a return to nonviolent demonstrations, on grander than in the past, could prevent worse disasters during the summer of 1968: 'I think we have come to the point where there is no longer a choice between nonviolence and riots. It must be militant, massive nonviolence, or riots." In 1964, he had stated that:

"White Americans must be made to understand the basic motives underlying Negro demonstrations. Many pent-up sentments and latent frustrations are boiling inside the Negro, and he must release them. It is not a threat but a fact of history that if an oppressed people's pent-up emotions are not nonviolently released, they will be violently released. So let the Negro march. Let him make pilgrimages to city hall. Let him go on freedom rides. And above all, make an effort to understand why he must do this. For if his frustrations and despair are allowed to continue piling up, millions of Negroes will seek solace and security in black-nationalist ideologies.

Repeatedly, he had warned the nation (and militants had scathingly reproached him for it) that a rhythm of political and, later, socio-economic concessions had to be maintained in order to avoid black violence and permanent alienation. But the whites not ready to understand, and pleas such as this merely confirmed his accommodationism in the eyes of the militants.

The SCLC leadership was not sure that the second march on Washington would not be counterproductive. Before the final plan was completed in mid-February, Martin summoned a January meeting of ministers in Miami, Florida, to obtain official sanction. The ministers voted to follow their leader, but it was obvious that they would have preferred to have been excused from this commitment. Bayard Rustin's frank statement to them that Martin now lacked the economic resources and federal forbearance characteristic of his past demonstrations and that he, Rustin, would not support the Poor People's Campaign further shook their confidence. For the moment, the Urban League and the NAACP refrained from public comment, but no special powers of divination were required to know that they disapproved. Martin threw himself into the campaign all the more determinedly, as his intimates and the public doubted or opposed it. He spoke of the 'crisis we face in America" with more intensity and foreboding than before. "The stability of civilization, the potential of free government, and the simple honor of men is at stake," he proclaimed. He praised those who dissented from the easy consensus of uninquisitive patriotism and limited social meliorism. His Massey lectures, recorded for delivery over the Canadian Broadcasting Corporation, reflected this redoubled sense of urgency when he declared that "Nonviolent protest must now mature to a new level to correspond to heightened black impa-"higher level is mass civil disobedience." This
Regularly, he appropriate the second of the second o tience and stiffened white resistance.'

Regularly, he announced from the pulpit of Ebenezer and from a forest of rostrums the latest figures on civilian and military casualties, obliteration of villages, and compounding of economic costs of the Vietnam Whitney Young, at the request of Lyndon Johnson, and Senator Brooke, on his own initiative, went to Vietnam and returned, to plead that the conduct of the war be left to the White House and its experts. Patriotism, both suggested, commanded that the government be given the benefit of the doubt. "Our loyalties must transcend our race, our tribe, our class, and our nation," Martin countered, "and this means we must develop a world perspective." It was absurd to expect peace to emerge from a conflict in which American "integrity" was no longer credible. His government had supported the "murderous reign of Diem." poured gallons of napalm over the Vietnamcountryside, cynically distorted the goals and composition of the National Liberation Front, and then spoken of "aggression from the North" as if there were nothing more essential to the war. Although aggrieved by the asocial extremism of "hippie" youth, he interpreted its conduct as the result of the tragic debasement of American life and approved the diagnosis of Paul Goodman's "Growing Up Absurd." The slaughter in Southeast Asia understandably reinforced the alienation of Americans younger than twenty-five. Martin saw that in many respects their extreme conduct illuminates the negative effect of society's evils on sensitive young people.'

For him, as for the youth, Lyndon Johnson was becoming the embodiment of inflexible, outmoded cant and political deviousness. In his final months, he believed that Johnson was devoid of statesmanship. in part because he had been trapped by the "military-industrial complex." But, mainly, it was a failing of character of the kind that had not afflicted John F. Kennedy. Kennedy could admit error, as he did after the Bay of Pigs-"But Lyndon Johnson seems to be unable to make this kind of statesmanlike gesture in connection with Vietnam The President's domestic record was impressive and rested upon a realistic response to the racial crisis and superlative skill in guiding legislation through Congress. The ultimate credit for civil rights legislation, however, belonged a fortiori to the American black man, said Martin. More significant, unimplemented legislation was an embittering hoax. President Johnson had shown little diligence about implementing the very legislation that he had authored. Congress was now determined to play "Russian roulette with riots" rather than fund compre-

hensive poverty programs.

Martin rejected the depth and the durability of the much-discussed racial "backlash" A poll of black Americans in Fortune revealed an encouraging 80 per cent preference for his methods, and a slightly lower percentile of admiration for him personally. The Lou Harris poll indicated that most white Americans were ahead of the White House and Congress in believing that some measure of economic redress was owed the blacks. The march of the poor to Washington. Martin was certain, would very likely be the final positive prophylactic endeavor to avert a racial holocaust. "The flash point of Negro rage is close at hand," Look quoted him as saying. Obviously the White House was not listening, for it refused to accept the findings of its own National Advisory Commission on Civil Disorders, released in February, 1968. The Commission's report directly charged white America with racism and predicted the rapid development of two separate, hostile, and unequal American racial societies, if drastic reforms were not undertaken. Vice-President Humphrey dutifully regretted the Kerner Report's harsh judgments.

Civil rights as a political issue now had limited and diminishing national appeal, but criticism of American entanglement in Southeast Asia suddenly became immensely appealing and viable at the close of 1967. In mid-October, the Conference of Concerned Democrats had met in Chicago under the chairmanship of Allard K. Lownestein, to seek an alternative candidate to Lyndon Johnson. On November 30, Senator Eugene McCarthy announced his candidacy. Although his campaign was distressingly white and affluent-liberal, and although it made not the slightest curtsy in the direction of Martin King, whose months of painful unpopularity had been such an important force in shaping the anti-Vietnam position, McCarthy's New Hampshire Primary victory was an implicit and deeply rewarding vindication. On March 15, Robert Kennedy became an official candidate. junior senator from New York also vigorously opposed the Administration's conduct of the war. Martin's position became much more respectable nationally and within the black community. He declined to endorse either candidate, although he congratulated the California Democratic Council on March 16 for backing McCarthy, adding that "Both men have the ability of grap-pling meaningfully and creatively with the problems in the cities and with racism." The important thing was to prevent the renomination of Lyndon Johnson.

If Martin had been right about Vietnam, it was possible that the people would come to see that he was also right in his appraisal of domestic poverty and racism. The candidacies of Senators Kennedy and McCarthy were certainly an encouragement, but his plans would not have altered if neither of them had entered the presidential contest. Despite the continued opposition of his top advisors-Bayard Rustin, Michael Harrington, and others-at the January planning session in New York he virtually forced the acquiescence of the SCLC in the Poor People's Campaign. On February 12, 1968, his staff finished the master plan for the Poor People's March. The initial cadres would be drawn from ten cities and five rural districts located in the East, Midwest, South, and Appalachia. From Roxbury (Boston's Appalachia. From Roxbury (Boston's ghetto), Chicago's Lawndale community. Mississippi, and West Virginia, three thousand volunteers would travel in caravan to a shanty town erected in the capital. From there they would make daily sorties over a three-month period (from April 20) to the

Senate, the House of Representatives, and the headquarters of cabinet agencies such as Agriculture, Health, Education, and Welfare, and Housing and Urban Development. "We will place the problems of the poor at the seat of government of the wealthiest nation in the history of mankind," Martin wrote, "If that power refuses to acknowledge its debt to the poor, it will have failed to live up to its promise to insure life, 'liberty, and the pursuit of happiness' to its citizens."

The core of their demands was to be a \$12-billion "economic bill of rights," guaranteeing employment to all the able-bodied, viable incomes to those unable to work, an end to housing discrimination, and the vigorous enforcement of integrated education. The demands were intentionally vague, not restricted to specific legislation, in order to guard against the seduction of empty promises and legislative feints. The intensity and size of the campaign would be determined by congressional response. An unfavorable response would result in thousands more converging on Washington, with the original contingent acting as nonviolent marshals. The plan also envisaged simultaneous demonstrations of the poor on the West coast.

The stratagem was bold and imaginative. It provided, at least theoretically, a solution to fundamental problems in nonviolence, if, for the first time since leaving the South. Martin was looking to the Poor People's Campaign and beyond toward a national political base, as the evidence supports, he might have achieved the leverage with white activist groups that had consistently eluded his grasp. "Our challenge," he wrote now, "is to organize the power we already have in our midst." The black poor-domes-tics, sanitation workers, victimized tenants, seasonal laborers-organized into unions across the nation would be thought have a powerful appeal. Until now, the involvement of the white liberal and the white labor unions in civil rights had been voluntary, patronizing, and governed in enthusiasm and duration by pre-emptive sets of cultural, organizational, and politico-economic values. A true community of interests existed at only the most superficial level. If the cries of "burn, baby, burn!" exhilarated black youths and gave a measure of vicarious satisfaction to a majority of their elders, they appalled bien pensants whites. Similarly, Vietnam at first was never a spontaneous and passionate issue among the majority of blacks. Conversely, the issues by which white students justified their anti-establishment insurgency really made sense only to those whose middle-class existences drove them to become déclassés. If jobs and housing did mean the same thing to the unions and the black workers, it was only more necessary that the unions appear at civil rights rallies while ubiquitously refusing to open their ranks to blacks or encouraging their members to open their neighborhoods to

The movement that Martin envisaged must be "powerful enough, dramatic enough, morally appealing enough, so that people of goodwill, the churches, labor, liberals, intellectuals, students, poor people themselves begin to put pressure on congressmen." He had refused to consider running for the presidency on a third-party peace ticket, but the offer proved his value to the political dissidents. He might shortly have a poor-people's front prepared to march with the antiwar legions, which would give him a different caliber of sup-

port—one based no longer on the vagaries of pure humanitarianism but on specific mutual benefit. Such a coalition would be proof against the Gresham's law of Black Power and violent or separatist ideologies. To those who accused him of removing himself from the eye of the civil rights hurricane, Martin could answer that a knowledge of meteorology was much more relevant. He began to speak more of the class struggle, in addition to the racial, as 1968 opened.

This new vision of domestic problems held considerable danger. There were deadly charges and political slogans that Martin's opponents would draw from a radical, working-class political movement. When questioned about the SCLC's nonviolent populism, Andy Young's habit was to appear dumbstruck. "I don't know about that. I am doing what I joined the ministry to do!" and he would cite a relevant parable from the teachings of Jesus. Martin knew that middle-class blacks and many of the simple church people would recoil at the prospect of an occupation of the capital. He was nevertheless prepared to lose their support. He was equally realistic about the response from Congress. "It is a harsh indictment," Martin believed, "but an inescapable conclusion, that Congress is horrified not at the conditions of Negro life but at the product of these conditions-the Negro himself." Martin added, with obvious relish at the turn of phrase, "For two years we have been discussing philosophy. We have been bogged down in the paralysis of analysis." Henceforth, he intended to be action personified.

After preaching one of his most unusual sermons to the Ebenezer congregation on February 4, he and Ralph were in Washington on Monday and Tuesday to attend a memorial service for the fallen of the Vietnam war and a peace rally where he spoke of the contemporary conditions of the black worker, which were worse than the plight of his white counterpart during the Great Depression. After Washington, they South, combining a people-to-people tour and talks with SCLC staffers about the poor-people's undertaking. February 15 was spent in Birmingham, the next day divided between speeches in Selma and Montgomery. Before the final drive began, Martin, Coretta, and Andy flew to Jamaica for a quick rest. A week later, February 23, he was in New York to participate in a Carnegie Hall tribute to W. E. B. DuBois, along with James Baldwin and Ossie Davis. An old ally, James O'Dell, now with "Freedomways," had handled much of the planning for the occasion. Martin's speech was eloquently moving. In his reference to DuBois the man-"He confronted the establishment as a model of militant manhood and integrity. He defied them and though they heaped venom and scorn on him, his powerful voice was never still"-there was a vibration of his own severely tested manhood. O'Dell must have been gratified to hear the speaker declare that "So many would like to ignore the fact that DuBois was a Communist in his last years. . . . Our irrational, obsessive anti-Communism has led us into too many quagmires." The ovation drowned out the words that followed. On March 17, he interrupted a Southern recruitment drive for the campaign to speak in the barony of Detroit's wealthy, Grosse Pointe. He was outrageously heckled for his Vietnam views. The next day, he answered James Lawson's appeal to come to Memphis.

TRIBUTE TO FRED J. KROLL

HON. WYCHE FOWLER, JR.

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday. August 4, 1981

• Mr. FOWLER. Mr. Speaker, I want to express to you my deep sadness over the recent passing of a great leader and a person for whom I have long had the greatest admiration.

Fred J. Kroll, president of the Brotherhood of Railway & Airline Clerks (BRAC), lost a 5-year struggle with leukemia on July 30, 1981. Fred's work and dedication will be sorely missed by his associates and his friends.

Fred was highly effective in his leadership role. It was in large part due to his efforts that the recent compromises on Conrail, AMTRAK, and railroad retirement were reached in the budget reconciliation bill. As a result, vital freight and passenger rail service will be saved and a large number of jobs will be preserved. Equally critical is the compromise package on railroad retirement that will insure timely and adequate retirement benefits to retired railroad employees.

Originally from Philadelphia, Pa., of a family involved in trade union activity, Fred launched his rail career in 1953 as an IBM machine operator on the former Pennsylvania Railroad. There he served in leadership positions in Quaker City Lodge 587. This eventually culminated in his being elected to the presidency of the international in 1976. He was regarded so highly that he was reelected to his position by acclamation in 1979.

Just recently, he spearheaded the April 29 rail labor rally in Washington in which over 20,000 railroad workers participated to protest President Reagan's budget-cutting initiatives. Fred Kroll's forceful leadership and his ability to forge an effective compromise on the issues will not soon be forgotten.

COAL GASIFICATION—AN ENTRE-PRENEURIAL OPPORTUNITY

HON. MARILYN LLOYD BOUQUARD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mrs. BOUQUARD. Mr. Speaker, building coal gasification plants could very well be one of the most profitable long-term business investments available for today's risk capital. A recent report issued by the Gas Research Institute, a nonprofit organization, states that the cost competitiveness of the gas from a coal gasification plant built now will improve over the life of the plant. The implication to be drawn is that large profits could result in

later years when the production costs are low compared with the prevailing production costs of either extracted energy sources like natural gas and oil. So what is the problem? The report

So what is the problem? The report states that during the 1980's the initial price of this gas will probably be higher than extracted gas prices. The implication to be drawn from this is that little or no profits and possibly losses could be expected for as long as 8 or 9 years of operation.

As an example, the report refers to a hypothetical oil shale plant that could have been built economically in 1972 if the oil sold for \$5 per barrel—now the break-even price is \$40 to \$60 per barrel because of inflation and other factors. Had that facility been built in 1972, it would be more than competitive and overwhelmingly profitable today.

When one considers the estimates of the additional world oil premium that the United States must pay, estimated at \$5 to \$35 a barrel, the national economics are even more compelling.

The dilemma facing the industry is that if short-term considerations dominate, then extracted energy sources are the least cost alternatives. However, if long-term considerations dominate, then manufactured fuels are the least cost alternatives even though in the short term they are not the least cost.

The executive summary of GRI's report follows for you to draw your own conclusions:

COAL GASIFICATION COMPETITIVENESS BY THOMAS J. WOODS

[Charts not printed in the RECORD]

The purpose of this paper is to assess the extent to which coal gasification could be considered a viable commercial source of pipeline quality gas in the light of recent changes in expectations for the prices of extracted gas. Assessing the economic competitiveness of high-Btu gas from coal is not a straightforward process. As illustrated in Figure 1, the relative annual production profiles of extracted fuels (Devonian shale, tight sands, conventional natural gas) are totally different from each other as well as from the production profiles of "manufactured" fuels (synfuels, base load power plants). As a result, any comparison of the production costs for extracted fuels must reflect their declining rates of output in order to put than on the same output basis as manufactured fuels which have constant rates of output.

When the declining output is taken into account, the capital investment for extracted gas, even assuming no increase in real drilling costs, is comparable to that required for a coal gasification facility. If the declining quality of the remaining undiscovered resource base is also taken into account, along with the fact that real drilling costs have grown more than 7 percent a year since 1973, coal gasification would appear much more attractive than extracted gas.

Although coal gasification might be more attractive than extracted natural gas in the

long term, its high front end costs will tend to make it more expensive than most extracted natural gas sources in the short term. However, because about two-thirds of the cost of coal gasification is fixed, its real cost over time will decline. This is illustrated in Figure 2 for the proposed ANR coal gasification facility. With a 6.5 percent assumed average annual inflation rate, the cost of gas in constant dollars from the ANR facility is estimated to fall almost 5 percent a year. After 25 years of operation the estimated cost of gas (constant dollars) would be less than one-third the cost in the first year of the facilities' operation.

On the other hand, because additional natural gas reserves must be discovered and developed to compensate for the declining original production of natural gas, it is unlikely that the real cost of natural gas would remain constant. The large increases in drilling costs over the past few years make it very likely that costs will grow, perhaps quite rapidly. As a result, even though gas from coal may start out more expensive than natural gas, after a few years of operation, the gas produced in the facility should be cheaper than natural gas.

High-Btu gas from coal becomes competitive with natural gas when the average price for both sources are equal over the lifetime of the gasification facility. The higher the expected rate of inflation in the economy or in the real price of natural gas, the higher the initial price of high-Btu gas from coal can be relative to natural gas prices. Figure compares the relative initial costs at which gas from coal would become competitive with natural gas under cases of no real growth and 3 percent average annual growth in extracted gas costs for a coal gasification facility lifetime of 20 years. Figure 3 shows that, at a 6 percent average annual inflation rate, high-Btu gas from coal would be competitive with natural gas if its initial costs were no more than double that of extracted gas when natural gas prices grow 3 percent a year faster than inflation. At a 7 percent average annual growth in natural gas prices, comparable to the real growth rate in drilling costs in the past few years, gas from coal could start out at twice the cost of extracted gas and be competitive with natural gas even if there were no inflation in the economy. Of course, if the gasification facility could operate more than 20 years, then its initial cost relative to natural gas could be even higher.

While the above discussion indicates that, in an inflationary environment escalating natural gas prices improve the competitive ness of coal gasification, the absence of real growth in world oil and natural gas prices may not have as negative an effect on the competitiveness of coal gasification as might first appear. Stable energy prices would probably slow the rate of inflation and thus lower the cost of capital. Because at least half of the increased costs for high. Btu gas from coal from 1976 to 1980 were from increased costs of capital, lowering the cost of capital would improve the competitiveness of gas from coal. For example, were it possible to finance coal gasification at 1976 rates, gas from coal would cost somewhat more than \$5.00 per MMbtu. This would be more than competitive with crude oil prices today which are almost \$6.00 per MMbtu. It would, in fact, be close to the price allowed

¹Thomas J. Woods, Cost Competitiveness of Supplemental Gas Supplies: A Hint of an Explanation, (May 5, 1981).

² Data taken from FERC Opinion No. 69 (Docket No. CP 78-391), p. A-7.

under NGPA for tight formation gas (\$4.89 per Mcf in May 1981).

CONCLUSIONS

The introduction of high-Btu coal gasification facilities into the U.S. gas grid provides an energy source whose real price declines over time. The price that is paid for such a source is the initial high cost of the gas. In the 1980s this initial price will probably be higher than extracted gas prices. However, by the 1990s, if the current escalation rates of drilling costs continue, it is possible that the initial price from a new coal gasification facility could even be lower than the prices of some extracted gas sources. At such a point it would be very likely that the interest in building synthetic gas facilities would grow substantially.

If drilling prices do not grow very rapidly, it will be very likely an indication that extracted production is falling rapidly. Under such circumstances coal gasification would be needed to counteract that decline. As in the case of unconventional natural gas, the role of gasification cannot be adequately assessed outside the overall gas supply picture.

The analysis has also demonstrated the major role financing plays in determining the commercial attractiveness of coal gasification. Because financing is subject to institutional and market factors, proper selection among alternative financing techniques can significantly reduce the costs of gas from coal. Under such circumstances, coupled with its declining real price, coal gasification should not be seen as a contribution to price surges, at least in the long term.

Lastly, the cost competitiveness of coal gasification facilities improves over time, even if a new plant is built each year. If a new coal gasification facility were brought into operation every year for 25 years, the estimated life of the ANR facility, coal gasification would be providing 2.2 Tcf of gas to the U.S. energy system. At the end of this 25 years, however, the average real cost of high-Btu gas from coal gasification facilities might be little more than half the cost of this gas when the first facility opened 25 years before. Under such circumstances, while coal gasification is very expensive in the short term, in the long term it very well may be the only declining real cost source of gas available.

Delaying the development of manufac-tured fuel facilities until the price of natural fuels rise would accomplish little in the way of improving the short-term economics of manufactured fuel facilities. Manufactured fuel prices that would be lower than extracted fuel prices in 10 years are from facilities which are built today, when they are higher-priced than extracted fuels. In 10 years, although the prices of natural fuels will have escalated, so will have the firstyear price of the manufactured fuels. This has been observed, for example, in oil shale when, before 1973, it was claimed that the crude price need only go to \$5.00 per barrel to make an oil shale facility economical. Today the price is about \$35.00 a barrel and the competitive price for oil shale is \$40.00 to \$60.00 per barrel. However, had an oil shale facility been built in 1972, it would be more than competitive and overwhelmingly profitable today.

The selection of manufactured or extracted fuels will be largely determined by the time horizon of the decision-maker. If short-term considerations dominate, then extracted energy sources (e.g., natural gas, crude oil) are the least-cost alternatives, even

though in the long-term they will not be the least-cost paths to follow. On the other hand, selection of the long-term least-cost path would result in selecting fuels which, in the short-term, are not the least-cost. The dilemma facing the energy industry, and ultimately the consumer, is something which will be resolved in the manner in which previous societies chose to abandon slash and burn agriculture and enter stable agricultural patterns or chose to go from pre-industrial to industrial economies. It is a situation in which the classical decision-making modes of one world cannot be directly extended to the other.

THERE IS NO TOBACCO SUBSI-DY-LET US SET THE RECORD STRAIGHT...

HON. CHARLES WHITLEY

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. WHITLEY. Mr. Speaker, one of the most misunderstood facets of tobacco is the Federal price support program. Critics denounce a bureaucracy which—they say—gives taxpayers' money to farmers to grow the leaf while discouraging tobacco smoking.

To set the record straight, one needs answers to these questions:

First, how does the program really work?

Second, how do the books balance, as far as taxpayers are concerned?

Third, do the Government's farm and antismoking programs really conflict?

In fact, there is no tobacco subsidy. There is a Government price support and production control program. It guarantees farmers a minimum price for their tobacco, as other programs do their corn, rice, peanuts, and cotton—13 different commodities altogether.

Permanent Government programs aimed at stabilizing the national economy including agriculture, date back to the 1930's, when the Great Depression was threatening to destroy America's economy. The 1932 tobacco crop sold for 9 cents a pound, and farmers were using leaf as fuel rather than sell at a loss.

WHAT IS A SUBSIDY?

Webster defines "subsidy" as a "grant of money." Yes, the Government loans money to tobacco farmers. But the Government does not grant money to tobacco farmers; the farmers borrow it, using their crops as collateral—some \$5.5 billion since 1933. The repayment rate—Government books show but a \$57 million net loss—is about 99 percent.

The money is not a gift. It is a loan, repaid with interest. In the 47 years since the tobacco price support program began, it has been the most successful farm program the Government has ever had.

HOW PRICE SUPPORT WORKS

All types of tobacco are eligible for price support. The program is voluntary, with growers of each type of tobacco given the option, via referendums every 3 years, to participate. Currently, 20 of the 24 types of tobacco grown in the United States and Puerto Rico fall under price support guidelines.

To be eligible to participate in the program, tobacco growers accept strict acreage and poundage allotments set annually by the U.S. Department of Agriculture (USDA). Total allotments, the national marketing quota, equal the amounts USDA estimates will meet domestic tobacco industry and foreign buyer needs.

The price support program does more than control quantity. It also establishes a minimum price for tobacco sold at auction. This minimum price is especially important to the tens of thousands of farm families who grow tobacco on acreage so small that no other crop there could support a family.

Most tobacco today is sold at a warehouse auction after grading for type and quality. The grade determines the per-pound support price.

If a grower's tobacco fails to bring an auction bid of at least 1 cent per pound above the support price, and if the grower has not exceeded his production quota, he is eligible for a Government loan equal to the support price. The tobacco is taken as loan collateral by a grower owned and operated cooperative, which processes and stores it for future sale.

WHAT IT COSTS

Among the most imperishable of farm crops, tobacco can be stored for several years before being sold in a more favorable market.

Loans are made on a crop-year basis, and it may take a number of years to dispose of loan receipts from a particular crop. However, when the cooperative sells the tobacco, each Government loan is repaid with interest. If sale proceeds do not cover the loan, the unpaid balance is written off as a program cost. If proceeds exceed the cost of the loan, interest and storage charges, the net is distributed to the growers.

The price stabilization and production control legislation was designed to insure that the farmer would earn a reasonable return for his considerable investment, yet provided for an adequate supply of tobacco to meet domestic export needs.

The Commodity Credit Corporation (CCC) administers the price support loans for USDA and does incur certain other expenses. For example, fluctuations in the interest market have occasionally caused gaps between the interest rate determined by CCC at the start of the crop year and the rate

paid by CCC on later loans. Variable rate loans, initiated with the 1981 crop year, are intended to minimize this expense.

Operating on the same principle as that behind the variable rate mortgage, CCC will reevaluate interest rates now twice a year. This means the interest rate the farmers' co-op pays on price support loans could change as often as every 6 months until all of that year's tobacco is sold.

USDA also has administrative costs and market news service, plant research and extension program expenses—totaling about \$22 million in 1980. Until recently, farmers also received inspection and grading services free of charge. That cost USDA about \$8 million in 1980. In the future, the growers will pay for inspection and grading themselves.

The current \$57 million net loss on CCC tobacco loans is the result of but 2 or 3 bad years. This amounts to just one-tenth of 1 percent of all losses for all commodity price support programs (see table). Loan payments—plus interest—have exceeded losses in almost all 47 years.

During the half century that the tobacco program has incurred this relatively modest Government expense, tobacco product purchasers have paid Federal, State, and local treasuries more than \$130 billion in excise taxes.

THERE IS NO TOBACCO SUBSIDY

So there is no tobacco subsidy. Some misinformed critics argue that, even if there is no subsidy, the program makes tobacco products more readily available. But they ignore two basic facts:

First, the program is intended to, and does, keep tobacco leaf prices higher than they would be without it.

Second, the program is intended to, and does, keep domestic tobacco supplies lower than they would be without it.

Ending the program could bring these disastrous results: overplanting by big farmers and by newcomers, a drop in price, a decrease in income for many small farmers who depend upon income from an acre or two of leaf for their existence, and the squeezing of small farmers off the land because banks and other financial institutions will not provide operating loans without guarantee of repayment, which is presently assured by the price support program.

There would be widely decreased tax collections in the 20 States that grow tobacco, widespread disruptions in banking and commercial systems and—to continue the scenario to its logical conclusion—regional recessions.

If Congress were to heed critics, considerably increased acreage could be devoted to tobacco. With restrictive quotas gone, a large tobacco supply would enter the market—at reduced

ENCOURAGES SMOKING?

Does the price support program encourage starting or continuing to smoke? Yes, say critics. No, say Government health officials.

John Pinney, director of the Government's Office on Smoking and Health, declared in 1980:

We've reached the conclusion that the price support program in no way affects any aspect of cigarette smoking. It doesn't have anything to do with whether or not people start. It does not in any way affect whether or not they quit smoking.

And Joseph Califano, then-Secretary of the Department of Health, Education, and Welfare, testified before Congress in 1978:

I do not believe that anyone smokes or doesn't smoke or decides to begin or continue or stops smoking because of the tobacco subsidy. I don't think it is in any way related to that.

He gave the program the wrong name in calling it a subsidy. But he gave it an accurate assessment.

Government price support programs—Direct loss on commodity operations [October 1933—September 1980]

	Million

THE PROBLEMS OF THE NUCLEAR POWER INDUSTRY—III

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. HAMILTION. Mr. Speaker, in the April 12 edition of the New York Times Magazine Mr. Anthony Parisi describes the difficult situation of the nuclear power industry in the United States. Entitled "Hard Times for Nuclear Power," Mr. Parisi's piece is quite detailed and comprehensive. It raises questions of clear relevance for those of us who wish to understand the nuclear power industry's condition and prospects. I hope that my colleagues will give the article the close attention it deserves.

Drawing heavily on the information and opinion contained in "Hard Times for Nuclear Power," I addressed a series of questions to Mr. Joseph Hendrie, then chairman of the Nuclear Regulatory Commission. The response was signed by Mr. Nunzio Palladino, present chairman. My letter to Mr. Hendrie, an interim response, and the final response of Chairman Palladino are reprinted here for the benefit and use of my colleagues.

Members who are interested in further correspondence on this issue should see my extensions of remarks on July 8, July 14, July 15, July 16, and July 17 of this year.

The material referred to follows:

Congress of the United States, House of Representatives, Washington, D.C., May 28, 1981.

Hon. Joseph Hendrie, Chairman, Nuclear Regulatory Commission, Washington, D.C.

DEAR MR. CHAIRMAN: I recently read an article entitled "Hard Times For Nuclear Power" in The New York Times Magazine of April 12, 1981. The author of the article, Mr. Anthony Parisi, is not known to me, but if his observations are accurate then he is raising several important points which must be addressed.

After studying the article quite closely and giving it a good deal of thought, it occurred to me that I ought to get your ideas on a number of matters. Your answers to the following questions would be greatly appreciated:

1. Mr. Parisi states that "nuclear power is shrinking in this country... under its own economic weight." He attributes the industry's financial plight to a slackening in demand for electricity in the face of higher prices for fuel. In your opinion, what does the slack demand (high price) referred to by Mr. Parisi mean for the industry in the short run? In the long run?

2. Mr. Parisi claims that existing nuclear facilities save consumers money that they would otherwise have spent to buy coal or oil. He adds, however, that nuclear facilities ordered today would not achieve such savings. Do you agree or disagree? What are your reasons for your view?

3. Because of "slipping economic growth" and "the consumer's decision to shun high-priced energy . . most utilities today have far more generating capacity on hand than they need," according to Mr. Parisi. Is this an accurate assessment of the situation nationwide? What is the situation in the Midwest? In Indiana?

4. According to Mr. Parisi, analysts on Wall Street are beginning to take a dim view of nuclear facilities, calling them "an unattractive financial proposition" and "too expensive to build... to compensate investors adequately." How widespread are such views among analysts and investors? Does your experience lead you to believe that analysts and investors should be skeptical about nuclear power? What does such skepticism mean for the future of the industry?

5. On another question of finance, Mr. Parisi notes that "more than one power company now finds itself in a critical financial squeeze because of nuclear projects that have proved much more expensive than anyone had expected." Is this so? If it is, what are the prospects for these companies?

6. Mr. Parisi acknowledges that federal regulations have hit the industry hard. He then cites a study which concludes that there will be more, not less, regulation in the years ahead. To your way of thinking, how much of the industry's problem is due to unwarranted regulation? Is it your feeling that the conclusion of the above-mentioned study is correct?

7. According to Mr. Parisi, the "number of new safety problems being detected each year isn't falling, it's climbing—steeply." Is it your impression that he is correct? If so, how would you account for the trend? How would it be perceived by the public?

 According to Mr. Parisi, groups of citizens who oppose nuclear power have caused utilities to incur only minimal additional ex-

pense. Do you agree or disagree?

9. In commenting on the relationship between regulation and economic health in the industry, Mr. Parisi suggests that "even the ministrations of a sympathetic White House are unlikely to cure nuclear's malaise." He then makes the striking claim that "nothing short of a wholesale dismissal of the nuclear community's own safety policies would make a fundamental difference in the economics of nuclear power." What do you think of this point of view?

10. Mr. Parisi reports that among utilities there may now be more interest in coal-fired plants than in nuclear facilities. As concerns cost, he says that "virtually all the analyses show an unmistakable trend toward coal." Do you sense a growing interest in coal among utilities? Is coal in fact overtaking, or has it already overtaken, uranium as a

less costly source of electricity?

I understand that I have put a very large number of complex questions to you, but I do want to get a better grasp on the issue of nuclear power and I am certain that you are a person whom I should consult. Please feel free to make whatever additional comments on Mr. Parisi's article you deem to be appropriate. I look forward to hearing from you at the earliest possible date.

With best wishes, I am Sincerely yours,

LEE H. HAMILTON.

U.S. NUCLEAR
REGULATORY COMMISSION,
Washington, D.C., June 22, 1981.
MR. HUGH KENDRICK.

Acting Director, Plans and Analysis Division, Office of Nuclear Energy, Department of Energy, Washington, D.C.

DEAR MR. KENDRICK: The enclosed May 28, 1981 letter from Representative Lee H. Hamilton has requested the NRC to respond to questions concerning nuclear power. Most of the questions raised by Representative Hamilton address economic or broad energy issues which should be answered by the Department of Energy. Accordingly, we propose to respond to questions 6 and 7 relating to the regulation and safety of nuclear power plants, but request that the Department of Energy address the remaining questions.

Sincerely,

T. A. Rehm, (For William J. Dircks, Executive Director for Operations.)

U.S. NUCLEAR
REGULATORY COMMISSION,
Washington, D.C., August 5, 1981.
HON. LEE H. HAMILTON,
U.S. House of Representatives,
Washington, D.C.
DEAR CONGRESMAN HAMILTON: Thank yo

DEAR CONGRESSMAN HAMILTON: Thank you for your letter of May 28, 1981 and for bringing to my attention the concerns you raise regarding Anthony Parisi's article on

"Hard Times for Nuclear Power." Most of the questions you ask address national energy policy issues. We have referred these for reply to Mr. Hugh Kendrick, Acting Director, Plans and Analysis Divison, Office of Nuclear Energy, U.S. Department of Energy.

I shall respond to those questions that directly relate to NRC's area of responsibility in regulating commercial nuclear power.

These questions are as follows:

6. Mr. Parisi acknowledges that Federal regulations have hit the industry hard. He then cites a study which concludes that there will be more, not less, regulation in the years ahead. To your way of thinking, how much of the industry's problem is due to unwarranted regulation? Is it your feeling that the conclusion of the above-mentioned study is correct?

7. According to Mr. Parisi, the "number of new safety problems being detected each year isn't falling, it's climbing—steeply." Is it your impression that he is correct? If so, how would you account for the trend? How would it be perceived by the public?

would it be perceived by the public?
As a result of the TMI-2 accident, both external and internal investigative studies yielded recommendations for improvements totaling over a thousand. The Action Plan developed by NRC to deal with these recommendations resulted in both short and long range actions, many of which have already been resolved and are in the implementation stages; still others await resolution. While the TMI-2 accident did result in an increase in regulatory activity, I do not believe it can be characterized as unwarranted.

What constitutes warranted vs. unwarranted regulation is a matter not only of how regulators assess the risks, costs, and benefits of technological options, but also of how the public perceives these and arrives at personal decisions to accept or oppose nuclear power plants. The best test of whether new regulations are warranted or not would appear to be found in the establishment of risk/cost trade-off criteria, as recommended by the Kemeny Commission. Establishment of such criteria is one important aspect of NRC's current efforts to formulate safety goals.

It should be understood, however, that the major responsibility for dealing with the safety of nuclear power plants lies with the industry, including utilities, equipment vendors, architect-engineers, construction workers and supervisors. The accident at TMI had its jarring effects not only on the NRC, but also on the industry itself. This has led utilities and other parties in the nuclear industry to independently increase attention to safety problems and develop new safety-oriented organizations such as the Nuclear Safety Analysis Center and the Institute of Nuclear Power Operations, the latter being oriented to improving the man/machine interface in nuclear safety.

Industry efforts such as these, as well as the development of safety goals, should bear fruit in the long run in reducing regulatory burdens on the industry while provid-

ing adequate public protection.

Thus, the basis for the conclusions cited by Parisi, that the number of new safety problems will climb steeply in the years ahead, is debatable. Once the large number of safety improvements resulting from TMI have been implemented, we hope to see a decline in the growth of the number of significant new safety problems. However, all of the large plants now on line were designed and built without the benefit of operating experience in units of comparable size.

As operating experience accumulates, the number of "surprises" with backfit implications should decrease. However, there is no way to be confident that we are yet at that point.

I hope that I have been responsive to your questions regarding the Parisi article.

Sincerely,

NUNZIO J. PALLADINO.

LOUISIANA'S COASTAL MARSH

HON. LINDY (MRS. HALE) BOGGS

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mrs. BOGGS. Mr. Speaker, a recent survey conducted by the U.S. Fish and Wildlife Service has documented that Louisiana's coastal wetlands are being destroyed or altered at an accelerating rate, currently estimated at more than 40 square miles per year, with a resulting total loss of approximately 950 square miles of the State's coastal wetlands between the mid-1950's and the late 1970's.

This problem should be of national concern because Louisiana's estuarine system and associated coastal wetlands produce and nourish fish and wildlife resources of unusual value to the economies of Louisiana, the Gulf region, and the Nation, and these include fisheries, waterfowl, and furbearer resources.

I would like to share with my colleagues an article which appeared in the May-June 1981 issue of the Louisiana Conservationist on this very serious problem:

CRISIS IN THE COASTAL MARSH

(By David Fruge)

WETLANDS LOSS IN LOUISIANA IS CRITICAL TO WATERFOWL, ALLIGATORS, FURBEARERS, OTHER WILDLIFE, AND COMMERCIAL AND SPORT FISHERIES

Louisiana's vast coastal marshes are disappearing. The wetlands that support coastal Louisiana's rich fish and wildlife resources are literally vanishing. If the present rate of loss continues, major areas of the Louisiana coastal region will be claimed by water within fifty years.

These are the disturbing findings of recent studies conducted for the U.S. Fish and Wildlife Service and the U.S. Bureau of Land Management by Coastal Environments, Inc., a Baton Rouge consulting firm headed by noted geologist Dr. Sherwood Gagliano.

THE PROBLEM

Studies show that the rate of change of Louisiana's coastal wetlands is two to three times greater than previously believed. Prior studies placed coastal land loss at 16½ square miles each year. Marsh losses alone now exceed thirty-nine square miles per year.

Figures further indicate that over 500,000 acres or 800 square miles of southeastern Louisana coastal wetlands have been lost or drastically altered since the mid 1950's. Over 800,000 acres of land have been lost along the coast from Vermilion Bay to the Mississippi state line. Fresh water marsh

has experienced greatest reduction (about 90 percent of the total) with forested wetlands constituting a majority of the remaining wetlands changes. For the entire Louisiana coast, marsh losses alone now exceed 25,000 acres each year.

These figures are staggering.
Louisiana's wetlands provide habitat for more than two-thirds of the Mississippi Flyway's wintering waterfowl plus many other migratory birds such as rails, snipe, and gallinules. The largest fur and alligator harvests in the United States and over 25% of the country's commercial fisheries production come from our wetlands. The marshes and estuaries are nursery grounds for shrimp, oysters, and crabs, and stand as the basis for Louisiana's international reputation as a seafood state.

Important commercial species include shrimp, bluecrab, oysters, menhaden, croaker, speckled trout, sand trout, and redfish. The game fish list is even longer and Louisiana's coastal marshes are truly a paradise

for recreational anglers. No other state in the union enjoys such

lush, productive wetlands.

vast Louisiana coastal marshes stretch from the Sabine River on the west to the Pearl River on the east, and extend more than sixty miles inland from the Gulf of Mexico. According to a survey conducted in 1968 by Dr. Robert Chabreck of Louisiana State University, coastal Louisiana contains about 2.5 million acres of fresh to saline marsh, 1.8 million acres of ponds and lakes, and 2.2 million acres of bays and sounds. There are two distinct regions along the Louisiana coast: the Mississippi Deltaic Plain of central and eastern portion and the Chenier Plain of the western portion. Both of these regions have been developed over the past 5,000 years by a series of deltas built by the Lower Mississippi River.

THE CAUSES

Wetlands loss in coastal Louisiana results from a combination of natural and manmade impacts.

Natural loss occurs when wetlands sink and erode after active delta building ceases. The erosion of barrier islands and widening of tidal passes also lead to increased wetland

Man has increased the rate of wetlands loss through many of his activities. The construction of the massive Mississippi River and tributaries project, involving the con-struction of federally financed mainline Mississippi River levees and upstream diversions and flood control reservoirs, has prevented overbank spring flooding along the lower Mississippi River. Natural overflow is nature's tool in building the delta, the depository of bits and pieces of North America carried from the river's source, its tributaries, on down to its mouth.

As a result of levees (essential to the protection of river cities), most of the marsh building sediments are now being carried into the deeper waters of the Gulf of Mexico. This waste of sediment has, except in Atchafalaya Bay, prevented large scale building of new delta marsh that would help offset the rapid rate of wetland loss. It has also hastened the breakdown of existing

Another major cause of wetland loss is canal dredging and disposal of the dredged material or spoil. A report published in 1973 by Dr. Sherwood Gagliano indicated that dredging associated with oil and gas exploration and production accounted for nearly 25 percent of the total land loss in coastal

Drainage of marshes and swamps for agricultural or urban development is also a

Salt water intrusion, another major cause of wetlands deterioration, has been accelerated by the digging of large federally funded navigation canals. An example is the Mississippi River Gulf Outlet, a channel 36 feet deep by 500 feet wide extending for 78 miles from New Orleans to the Gulf beyond the Chandeleur Islands.

Following the initial digging of this waterway in the late 1950's and early 1960's, water salinity tripled in the St. Bernard Parish wetlands. Large expanses of cypress trees killed by the influx of salt water in the Chalmette-Violet area serve as a memorial to the once thriving cypress swamps

Salt water intrusion is also largely responsible for the loss in 1978 of the 20,000 acres of fresh marsh that were present in St. Bernard Parish in the mid-1950's, and the loss of 215,000 acres of fresh marsh in the Barataria Basin during the same period. Other major navigation channels which have contributed greatly to salt water intrusion include the Barataria Bay Waterway, the Houma Navigation Canal, and the Calcasieu Ship-Channel.

THE LOSS IS MORE THAN LAND

Louisiana's rich coastal fisheries are largely dependent on the coastal marshes. Extensive research, much of it conducted by biologists with the Department of Wildlife and Fisheries and Louisiana State University, has shown that our wetlands provide vital nursery habitat for shrimp, crabs, and fish which spend all or part of their life cycle in Louisiana's estuaries.

In recent years, shrimp and menhaden have accounted for more than 95 percent of the total poundage of commercial fish and shellfish landed in Louisiana. Scientists have presented evidence that both shrimp and menhaden are being harvested at or near full capacity or "maximum sustainable

yield"

For instance, despite a fairly stable commercial shrimp harvest in Louisiana since 1940, the yearly catch of shrimp per licensed trawl has declined by nearly 90 percent since that time. Dr. Eugene Turner of Louisiana State University has recently reported that Louisiana's inshore shrimp catch is directly proportional to acreage of intertidal vegetation (primarily marsh), and that wetlands loss has a direct negative impact on fisheries.

In other words, shrimp production is dependent on the marsh, and the loss of marsh reduces that production. Therefore, the future of Louisiana's rich coastal fisheries appears to be in grave danger with continued rapid loss of its coastal marshes

Wildlife also faces serious habitat-decline as a result of continued marsh loss and salt water intrusion. For the millions of migratory waterfowl that winter in Louisiana, the rapid conversion of fresh water marshes to open water, non-wetlands, or more saline marsh types will be especially severe.

Department of Wildlife and Fisherie bi-

ologists have found that the fresh and low (intermediate) marshes almost twice as many puddle ducks (mallards, teal, pintail, etc.) as do brackish and salt marshes, U.S. Fish and Wildlife Service biologists have estimated that the deficit in the supply of waterfowl hunting will exceed 336,000 recreation days by the year 2000. In other words, the marsh remaining then will not nearly support the number of hunters who will want to hunt at that time. Habitat for other marsh birds such as rails, gallinules coots and wading birds will also be reduced by continued wetland deterioration.

Louisiana's fur production is also threatened by rapid wetlands loss especially in the fresh water marshes. Nutria comprise over two-thirds of Louisiana's fur harvest nutria harvest is highest in fresh marsh, lowest in salt marsh. Alligators also reach their greatest numbers in the fresh and intermediate marshes. Therefore, continued marsh acreage declines are expected to result in reduced populations of fur animals and alligators, especially as land loss and salt water intrusion reduce fresh water marsh acreage.

There is a crisis in our coastal marsh.

SOME POSSIBLE SOLUTIONS

The primary means of reducing the loss of Louisiana's coastal marshes involves diversion of Mississippi and Atchafalaya River water into adjacent wetlands to reduce salt water intrusion and create new marsh. In diverting fresh water to reduce salt water intrusion, gates must be placed in the levees of the Mississippi or Atchafalaya Rivers so that controlled amounts of fresh water can be diverted to adjacent marshes and bays during periods of high river levels.

Although such projects are not designed to build new marsh, biologists believe that the nutrients and limited amounts of sediments carried into the marshes by the diverted water would reduce the present rate of loss. With projects designed to create new marsh, large volumes of Mississippi River water would be diverted into shallow protected waters, probably near the mouth of the Mississippi River. Marsh building sites could be located so that effects on oyster producing areas are minimized.

Several federal water resource studies being carried out under the leadership of the U.S. Army Corps of Engineers offer promise for large-scale fresh water diversion into the marshes. It is quite possible that these studies will conclude with recommendations for construction of fresh water diversion projects. Such projects would help to offset adverse effects on Louisiana's wetlands brought about by the construction of levees along the lower Mississippi River and the excavation of federally funded navigation channels.

The Louisiana legislature has already recognized the need to restore and enhance the wetlands of Louisiana's coastal zone. In 1979, it enacted legislation directing the preparation of a fresh water diversion plan the state. Work is underway on that plan, under the supervision of the coastal management section of the Department of Natural Resources.

Most important of all, the Department of Wildlife and Fisheries, the Department of Natural Resources, and the U.S. Fish and Wildlife Service must and will continue to work hand in hand to develop a restoration program for Louisiana's coastal wetlands.

It is clear that the important fish and wildlife resources of coastal Louisiana are threatened by continued rapid degradation of its marshes and swamps. This problem is widely recognized by natural resource managers, scientists, trappers, hunters, sportsmen, and other members of the public.

Sound measures are available to at least reduce this loss. However, firm action must be taken to implement these measures at the earliest possible date.

Without such action, an important part of this nation's fish and wildlife heritage will be lost forever.

NCPAC: DISHONEST BLIGHT ON AMERICAN ELECTORAL THE PROCESS

HON. BILL ALEXANDER

OF ARKANSAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

· Mr. ALEXANDER. Mr. Speaker, an ominous black cloud hangs over America's free political system, threatening to destroy the principles of truth and fairness that insure the continued stability of our Nation.

The threat comes from the vicious and irresponsible activities of a man named John T. Dolan and his organization, the National Conservative Political Action Committee, more com-

monly referred to as NCPAC.

Mr. Dolan is a brash young man with a careless disregard for truth. He uses the cloak of political conservatism as a cover for selfish and dangerous opportunism. He makes no secret of the fact that he is intent upon wrecking the safeguards in the Federal election reform law-no matter what it takes to do so

"They're gonna take me kicking and screaming to jail before I stop my activities," he bragged in an interview last year with the Washington Post.

Mr. Dolan carries on his guerrilla warfare campaign against our electoral system by using the "independent expenditure" loophole in the election law. Basically, this allows so-called independent groups to spend as much money as they like to support or oppose candidates-so long as there is no cooperation or collaboration between these independent groups and the legitimate, authorized campaign organizations.

Using this gimmick, Mr. Dolan and his group prepare "hit lists" of intended victims among elected officials. How long or how well an official has served his constituency seems to make little difference to Mr. Dolan and his

wrecking crew.

Nor do Mr. Dolan and his cohorts seem to be fazed in the least by the utter arrogance of outsiders like themselves marching into a congressional district and presuming to dictate to the citizens of the area whom they should elect.

If Mr. Dolan's goal were truly the advancement of the conservative political philosophy, his actions might be understandable. But it appears that, in preparing his "hit lists," Mr. Dolan is less concerned about the political coloration of an elected official than he is about how much money Mr. Dolan is likely to be able to squeeze out of reactionary millionaires to defeat that particular official.

His current hit list, for example, in-Budget Committee cludes House cludes House Budget Committee Chairman Jim Jones of Oklahoma, Ways and Means Chairman Dan Ros-

TENKOWSKI, of Illinois, and House Majority Leader JIM WRIGHT, of Texas.

By no stretch of the imagination could any of these three be considered the "dangerous liberals" that Mr. Dolan claims to believe are destroying the country.

JIM JONES is regarded by 95 percent of his colleagues as a conservative. His Budget Committee, on its own, approved fully 85 percent of the cutbacks requested by President Reagan.

Or Dan Rostenkowski. A moderate by any measure, Mr. Rostenkowski led his committee to approve a Democratic tax bill with enormous benefit for business as well as for individuals. Is that something a so-called liberal would do?

Or JIM WRIGHT. If Mr. Dolan's activities were truly designed to foster conservatism, he would admit that Mr. WRIGHT was considered easily the most moderate, the most nearly conservative, of the four candidates seeking the office of majority leader when he was elected to that post in 1976.

As to tactics, Mr. Dolan makes it clear that he and his group have absolutely no qualms about dragging the American political process through the mud to achieve their goal of having all elected Members of Congress think, act, and vote their way. Innuendos, half-truths, and outright lies are used.

Mr. Dolan himself accurately prophesied the grave harm that his group could do by stating:

Groups like ours are potentially very dangerous to the political process. We could be a menace, yes-a group like ours could lie through its teeth and the candidate it helps stays clean.

Herein lies the menace. Because NCPAC is not bound by Federal laws and refuses to follow any moral or ethical code whatsoever, Mr. Dolan and his group can say and do whatever they please about an elected official and spend as much money as they can raise to defeat that official.

And make no mistake about it-Mr. Dolan and his gang are expert practitioners of the art of media politics. They are long on know-how, but short on ethics. They are nothing more than political hit men. Their calling card should read: Travel." "Have Smears,

These east coast political pillagers go into a Congressman's district thousands of miles away, where they have no knowledge of how that district is being served, and set up shop. Then they manipulate and distort his voting record to try to make it appear that the official is not truly representing his constituents. If the facts give Mr. Dolan any trouble, he twists and distorts them to try to make his point.

Most Texans know, for example, that Senator LLOYD BENTSEN, of Texas, consistently opposes busing and votes that way. But based upon one 1979 vote against an antibusing amendment to a vital appropriations bill, BENTSEN is listed by NCPAC as probusing.

Senator DENNIS DECONCINI, of Arizona, has been antiabortion on 28 of 29 votes recorded in the Senate, but is listed by NCPAC as proabortion. Mr. Dolan explains these and other distortions of the truth by saying:

If a Senator votes once for busing or abortion, we think it's justified to list him as pro-busing or pro-abortion.

NCPAC's hand has been called several times on its outright lies. When his group stated that Senator JOHN MELCHER, of Montana, voted "yes" to give away the Panama Canal, it was not the truth. In fact, Senator Mel-CHER voted against the treaties. In the campaigns of 1980, NCPAC falsely charged that former Senator Frank Church, of Idaho, voted for a congressional pay raise and that Senator THOMAS EAGLETON, of Missouri, supported \$75 million in aid to Nicaragua. Mr. Dolan blames some of these and many other distortions on "typesetting errors" or states that the false information was corrected by later retractions.

Even now, during a nonelection year, NCPAC is busily seeking to spread its contagion of lies to other parts of the country. One target area is Tarrant County, Tex.-home district of House Majority Leader WRIGHT.

With great fanfare, Mr. Dolan has announced that NCPAC will spend \$450,000, more than a year in advance of the 1982 congressional elections, to smear Jim Wright's good name among

the people in the district.

Mr. Dolan seems not to be concerned in the least by the facts that: First, only 9 months ago, the citizens of Mr. WRIGHT'S district reelected him with an overwhelming 61 percent of the votes over an exceptionally well-fi-nanced Republican opponent; second, in a survey taken by the magazine U.S. News & World Report in 1980, Jim WRIGHT'S colleagues voted him the most respected Member of the House of Representatives, and, third, Mr. WRIGHT has no likely opponent for 1982.

Ordinarily, one would think these three facts alone would be enough to deter smear-for-pay attacks like the one Mr. Dolan is seeking to launch against Mr. WRIGHT.

But any such rational political judgment on the part of Mr. Dolan seems to have been subjugated by his overpowering desire to entwine his NCPAC tenacles around the booming, prosperous Dallas-Fort Worth metroplex, of which Mr. WRIGHT's district is a part.

After all, one could hardly expect a man as opportunistic as Mr. Dolan to be able to resist going down to scare the political daylights out of certain gullible millionaires who, when prop-

erly frightened, enthusiastically throw open their thick pocketbooks to combat what has been billed as the liberal threat of the United States of America-conceived, orchestrated, and produced, of course, by Mr. John T. Dolan.

Not coincidentally, Mr. Dolan appears to be the only one who profits financially from the whole sordid series of sneak attacks.

FOR FUSION ENGI-CENTER NEERING: FUSION ADVISORY PANEL REPORTS

HON. MARILYN LLOYD BOUQUARD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mrs. BOUQUARD. Mr Speaker, I wish to enclose for the Record today, a recent report from the Energy Research and Production Subcommittee's Advisory Panel on Fusion Energy. This panel, which was originally established in the past 96th Congress, is composed of many of this Nation's most prestigious and knowledgeable leaders both in fusion science and in industry. The panel stood us in good stead during the 96th Congress and I believe serves a continuing useful role in this Congress.

The panel met on June 29, 1981, and received presentations from 10 different organizations on the very timely topic of how to best establish a Center for Fusion Engineering. This Center was specifically called for in Public Law 96-386, the Magnetic Fusion

Energy Engineering Act.

The Reagan administration has sent to Congress a report indicating that they are not intending to establish such a center even though money is available within the fiscal year 1982 budget to do so. While I will have much more to say to the Department of Energy on this issue, I will save it for a later date. The subcommittee's Fusion Advisory Panel assessment of the need for such a fusion center fol-

FUSION ADVISORY PANEL REPORT TO THE SUB-COMMITTEE ON ENERGY RESEARCH AND PRO-DUCTION, HOUSE SCIENCE AND TECHNOLOGY COMMITTEE

JULY 27, 1981.

Mrs. Marilyn L. Bouquard,

Chairman, Subcommittee on Energy Re-search and Production, Committee on Science and Technology, U.S. House of Representatives, Washington, D.C.

DEAR MRS. BOUQUARD: Your Advisory Panel on Fusion Energy held hearings in Room 2325 of the Rayburn Building during the afternoon of June 29, 1981. Witnesses identified on Attachment A presented their views and responded to questions of Panel members who participated in the hearings (see Attachment B).

In general, it was the consensus of wit-

nesses presenting testimony that:
1. Fusion energy is needed as a future electric energy option.

2. The fusion program is ready now to move into the engineering phase of development. The Advisory Panel's views confirm the conclusions of the 1980 Fusion Advisory Panel, the Buchsbaum Report, and the action of the 96th Congress in enacting the Magnetic Fusion Energy Engineering Act of 1980 (Public Law 96-386).

3. The fusion program should be goal-oriented. The goals set forth in Public Law 96-386; i.e., construction of a device for the demonstration of the engineering feasibility by 1990 and of a magnetic fusion demonstration plant by the turn of the 21st Century are reasonable and should be pursued ag-

gressively.

4. A national commitment to the development of magnetic confinement fusion is es sential to the accomplishment of the goals

of Public Law 96-386.

5. The best way to implement the next phase of the national fusion energy program is to establish and fund a center for Fusion Engineering (CFE) with responsibility for getting a Fusion Engineering Device (FED) built, for having supporting R. & D. performed, and for planning and programming a Fusion Demonstration Plant (FDP) around the turn of the century.

6. Management and technical direction by industry, with meaningful involvement by the major laboratories, will give the CFE the highest probability of successfully car-

rying out its mission.

7. The Department of Energy (DOE) promptly should issue a Request for Proposal (RFP) for management and technical direction of the CFE, and select the best competitively on the basis of qualifications and relevant experience.

Discussion among Advisory Panel members attending our evening dinner meeting arrived at the following conclusions, partly by listening to testimony presented during the afternoon and partly on the basis of Panel members' knowledge and interaction:

1. The Advisory Panel reaffirms the validity of the goals, objectives and timeliness of the Magnetic Fusion Energy Engineering

Act of 1980.

2. A way should be found to get the new Administration, hopefully the President himself, to declare a national commitment to the development of fusion energy for ci-

vilian electric power.

3. The CFE and the FED should be "tied together". The CFE should assume immediate responsibility for the FED conceptual The primary missions of the CFE should be to get the FED designed and built, to program and to get accomplished an appropriate technology R. & D. effort to meet the immediate and longer term needs of the FED and FDP. The CFE should not become "another national laboratory". The CFE should expand our technical data base. It should take over the work of the Technical Management Board, which is directed toward a FED.

4. The state-of-the-art is now such that vigorous programs of technology R. & D. and plasma optimization will lead to a successful FED. The scope of the FED must be determined by the technical R. & D. requirements of an overall plan leading to the FDP—rather than by some arbitrary design restriction, such as a \$1 billion dollar ceil-

5. The Panel members agreed that there exists several valid models for the management and technical direction of the CFE. A majority of the Panel favored industrial management with strong involvement of the present fusion community.

The recommendations of the Advisory Panel are:

1. The Secretary of Energy should be requested to prepare a mission statement for the Center for Fusion Engineering (CFE) and a plan for its implementation, consistent with the aims of the Magnetic Fusion Energy Engineering Act of 1980. The mission statement should include construction of a Fusion Engineering Device (FED) and should emphasize the goal of achieving a Fusion Demonstration Plant around the turn of the century.

2. The Subcommittee on Energy Research and Production should hold hearings: (a) inviting the DOE to state its near-term plans for implementing the Magnetic Fusion Engineering Act, and (b) inviting industry, laboratories and universities involved in fusion, and others to comment on these plans.

As an Advisory Panel, we shall be happy to meet again whenever it might be helpful

to you.

I look forward to discussing the matter with you at your convenience.

Best wishes!

Sincerely,

LEONARD F. C. REICHLE. Chairman, Fusion Advisory Panel.

ATTACHMENT A-LIST OF PRESENTORS

Dr. Harold Agnew, president, General Atomic Co., LaJolla, Calif.

Dr. Don Anthony, manager, Fusion Energy Systems, General Electric Co., Schenectady, N.Y.

Dr. Stephen O. Dean, president, Fusion Power Associates, Gaithersburg, Md.

Dr. Donald Kummer, manager, Fusion Energy, McDonnell-Douglas Co., St. Louis,

Mr. Sidney Law, director of research, Northeast Utilities, Hartford, Conn. (representing the Atomic Industrial Forum Committee on Fusion).

Mr. Frederick Maxwell, president, Boeing Engineering & Construction Co., Seattle, Wash.

Mr. Lawrence Mead, senior vice president, engineering, Grumman Aerospace Corp., Bethpage, N.Y.

Mr. Martin Scholl, associate technical director, Energy and Resources Division, MITRE Corp./Metrek Division, McLean, Va.

Mr. R. J. Sherman, chairman of the board, Ebasco Services, Inc., New York, N.Y. Dr. Peter Staudhammer, laboratory manager, nuclear energy, TRW Co., Redondo Beach, Calif.

ATTACHMENT B-MEMBERS OF THE ADVISORY PANEL ON FUSION ENERGY ATTENDING JUNE 29. 1981 MEETING

Mr. Leonard F. C. Reichle (panel chairman), executive vice president, Ebasco Serv-

Mr. Calvin J. Blattner, vice president engineering, McDonnell-Douglas Astronautics

Dr. Brian Cairns, manager, advanced technology, Boeing Aerospace.

Dr. Ronald C. Davidson, director, Plasma

Fusion Center, Massachusetts Institute of Technology.

Dr. Ersel Evans, vice president, Westinghouse Hanford Co.

Dr. T. Kenneth Fowler, associate director for CTR, University of California, Lawrence Livermore Laboratory.

Dr. Harold Furth, director, Princeton Plasma Physics Laboratory, Princeton University.

EXTENSIONS OF REMARKS

Dr. John W. Landis, senior vice president, Stone & Webster Engineering Corp.

Mr. Mike McCormack, energy consultant. Dr. Tihiro Ohkawa, vice president and director, Fusion Division, General Atomic Co. Dr. Murray Rosenthal, associate director

for advanced energy systems, Oak Ridge Na-

tional Laboratory.
Mr. Dwain F. Spencer, director, Advanced
Power Systems Division, Electric Power Research Institute.

OIL ISSUE SHOULD HAVE BEEN SEPARATE VOTE

HON. MARGARET M. HECKLER

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES Tuesday, August 4, 1981

• Mrs. HECKLER. Mr. Speaker, today we found ourselves confronted with voting on the issue of final passage of the tax legislation under a suspension of the rule.

This suspension of the rule was a technique clearly designed to embarrass those Members of Congress, par-ticularly from the Northeast and Midwest who, like myself, approved of the tax bill designed to provide permanent tax relief to the American people but opposed the reduction in the windfall-

profit tax for the oil industry.

Last Tuesday, I appeared before the Rules Committee and urged them to allow the House to vote separately on the oil provision. I voted against their gag rule and I voted against the previous question which cut off further debate on separating the oil question from the tax bill. I took the floor of Congress to urge my colleagues to vote for the tax bill but I spoke out strongly against the reduction in the windfall tax for big oil. I went even further. I spoke to President Reagan in person to express my displeasure over this sellout to the oil industry and I signed a letter with 46 of my colleagues urging the conference committee to remove the measure from the final tax bill.

The Rules Committee could have granted us the opportunity to decide the oil issue as a separate vote and, given that opportunity I would have

immediately voted no.

But despite the efforts of a great many of us from the Northeast and Midwest, there were not sufficient votes to change this preferred treat-

ment of the oil industry.

The suspension of the rules procedure was clearly designed to embarrass those Members of Congress, particularly those from the Northeast and Midwest, who opposed the reduction in the windfall-profit tax for the oil industry.

But the fact remains that the overwhelming vote of 282 to 95 today demonstrates clearly that most of the Members of the House agreed with my resistance to this last minute theatrical ruse, a vain attempt to roadblock the tax bill, the largest tax reduction package in our Nation's history and a measure that had already been approved-overwhelmingly-by both the House and Senate.

HANDGUN BODY COUNT

HON. WILLIAM LEHMAN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES Tuesday, August 4, 1981

Mr. LEHMAN. Mr. Speaker, the handgun body count for the month of June was 569. Since January 1, 3,911 persons have been victims of hand-

One of these victims was a 2-year-old boy in Dade County, Fla. He found a gun in his home and accidentally shot himself. I hope all will heed the words of Dade County Detective Michael Robertson, who following the death of this little boy warned:

Thousands and thousands of guns are being sold and going into Dade County homes with small children every month. For God's sake, we have got to let these people who are buying them know what can happen when you leave a gun in the presence of little kids. It could be you.

The list of handgun victims for the month of June follows:

H.R. 4242, ECONOMIC RECOVERY ACT OF 1981

HON. JOSEPH D. EARLY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

 MR. EARLY. Mr. Speaker, I have heard it said that the President is a super salesman. I most earnestly wish I was convinced that he was selling a super product. I am afraid he is not.

I have studied the various tax reduction proposals and the comments of many economic experts. I certainly want the Nation's economy to prosper, but I have serious reservations about the assumptions used by the administration in projecting long-term economic success. I fear the assumptions used by the White House are too optimistic, too wide of the mark to actually bring about lower inflation, a smaller deficit, reduce the unemployment rate, and lessen the income tax burden.

After thoroughly examining the administration's bill and the Ways and Means Committee's bill, I reached the conclusion that neither bill would adequately address the economic problems confronting the Nation. Both bills gave the greatest tax relief to those who needed it the least. Both bills developed from an undesirable auctioneering strategy by the White House and the House majority and minority leadership. This type of bidding war inevitably produced tax proposals with serious deficiencies.

The bill finally adopted by Congress. however, is the President's program. No one can dispute this fact. The administration's economic scenario is based on the hope that large tax cuts will increase consumer savings and business investment. But even Wall Street is wary of the administration's proposal. Henry Kaufman of the Salomon Bros. investment firm reportedly favors more spending cuts over any size or type of tax cut this year. The very people Mr. Reagan relies on most under his plan do not return his trust. They are too pragmatic to rely on unproven economic theories.

The administration is taking a great risk with the well-being of every American, especially those taxpayers with few alternatives to cope with inflation and high interest rates—those earning \$35,000 or less a year. Both the committee bill and the Conable-Hance substitute included too many

provisions designed only to attract regional voting blocs. Both versions extended too many additional benefits to those who are already heavily favored by the tax code and neither bill received any significant endorsement from nonpartisan economic authorities. Both bills, in addition, lacked the persuasive appeal of fairness and equal treatment for the greatest number of taxpayers. The administration's plan which was adopted last week by the House would reserve the largest tax cuts for upper-income individuals. Presumably, the upper-income brackets would also receive all of the benefits from the more favorable capital gains treatment, the all-savers certificates, incentive stock options for executives, and estate and gift tax cuts

I have grave doubts that the majority of Americans have any real understanding yet of the unfair impact the administration's tax relief bill will have on them. The White House plan relies on the "trickle down" theory of economics. This theory has not worked before in this Nation and there is every reason to doubt that it will work now. The upper-income brackets will continue to flourish as they invest more of their new found dollars under the Republican substitute, while the greater number of middle-income Americans will shoulder still larger burden of the total Federal income tax burden. History pretty clearly shows that public understanding of and belief in principle of "equal treatment" is crucial to the success of any major legislative pro-

The tax bill as adopted in this report will give 33 percent of its tax relief to taxpayers earning above \$50,000. Yet, such taxpayers constitute only 5.8 percent of all taxpayers. To make matters worse, the administration's bill ignores the impact of inflation and higher social security payroll taxes. Under the administration's tax package, those earning \$15,000 or less will actually pay 13 percent more in taxes by 1984—the year Mr. Reagan predicts a balanced budget or better—while those in the \$50,000 to \$100,000 income range will receive a 9 percent tax reduction.

Mr. Speaker, I am also concerned by the President's implication that anything less than total acceptance of his entire economic scenario will produce economic failure. No President has ever had his way on every item. It is contrary to our Government's system of cheeks and balances. The executive and legislative branches of Government are co-equal branches. The deliberative process of the legislative branch helps draw out the pitfalls of any type of legislation whether supported by the President or sponsored by a Member of Congress.

The administration's tax proposals were scrutinized in the open at public hearings. And, they were found wanting in a number of ways. It is also important to bear in mind that the President has not been consistent in his approach to this tax bill. He originally called for a 10-percent across-theboard cut for 3 years. He later added provisions to satisfy certain groups. Soon the administration's tax package looked like the proverbial "Christmas tree." In all fairness, it has to be recognized that the President took the first steps away from a simply crafted tax reduction bill to a catchall for every regional interest group in the

country.

Mr. Speaker, I would like to hope that the administration's tax package will create a new economic prosperity for all taxpayers. The faulty economic assumptions underlying the President's tax package, along with a trillion dollar buildup in defense spending over the next 5 years, however, contain the ingredients to wreak greater havoc with the Nation's economy than ever thought possible. The misallocation of labor and precious investment capital toward the military sector, in tandem with this ill-conceived tax package, might produce deficits never thought possible just a few years ago. And, there will be little left of the President's "safety net" to aid those Americans hurt by higher interest rates, unemployment, inflation, and continued deficit spending. The administration's entire economic projection including its tax bill, rests on the validity of untested economic theories plus another unspecified \$20 billion worth of social spending cuts. The President's tax bill will increase deficit spending if all other economic assumptions do not work as predicted by administration officials.

Congress had the opportunity to reduce taxes fairly and bring the budget into balance next year when it debated the Udall-Obey substitute bill. I supported that amendment because I believed it to be the best choice among the several tax packages. It would have produced a \$2 billion surplus next year and a \$20 billion surplus in 1983. It would have encouraged business expansion, especially among small businesses; it would have eliminated unnecessary additional bounties to oil companies; it would have offered the greatest degree of tax relief to low- and middle-income taxpayers; it would have been the least complicated and, therefore, the least costly proposal to administer; and, it would have permitted the Nation to adequately remedy any military weaknesses without resorting to deficit financing. Unfortunately, that amendment was defeated and the Conable-Hance substitute was adopted by the House.

I think I have a pretty fair amount of experience in Government finance from my 12 years of service on the Massachusetts House of Representatives ways and means committee and my nearly 7 years of experience on the Appropriation Committee here in the U.S. House of Representatives. Whatever other pressures may be involved, I feel that my greatest obligation is to vote in the best interest of my district and the Nation based on my personal knowledge, experience, and judgment. The President's proposal, and to a large measure the committee's proposal, fall short of the needed tax relief sorely needed by this Nation.

Mr. Speaker, I would much prefer to work with the President in a bipartisan effort to construct a tax package that would really aid the Nation's economy. At every turn, unfortunately, the President insisted on his whole package without any modifications except those of his own fashioning. The legislative and executive branches Government are coequals. The President in his television speech suggested that Members of Congress were either "For em or agin em" and there was no middle ground. We are all for economic stability and recovery based on sound economic assumptions; we are all against deficit spending; and we are all against inflation and unemployment and high interest rates. However, I cannot truly believe that this tax package will produce the economic prosperity promised by the President for all Americans and, therefore, I cannot support it.

H.R. 4242, THE TAX INCENTIVE ACT

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. RODINO. Mr. Speaker, America's working men and women will be the losers when President Reagan signs his so-called Tax Incentive Act. I opposed this bill because, in fact, it offers very little incentive for the majority of Americans to earn more for their families or produce more for their country. It does, however, offer sizable tax breaks for the rich and the special interests-at a cost of \$754 billion over the next 5 years. This high price tag will be paid for by the most needy Americans who must suffer the effects of cuts in social programs.

I am concerned that this tax bill will deepen the divisions which have been growing between America's economic groups. For example, 35.1 percent of the individual tax cuts next year will go to 5.6 percent of our populationthose making over \$50,000. At the same time, 40 percent of the taxpaying public-31 million Americans who make \$15,000 a year or less-will share

8.5 percent of the tax benefits of this

The average American will reap proportionately little of the benefits of this tax cut. The new savings certificates and the reduction in capital gains taxes have small benefit to the elderly couple on a fixed income, or the minority family living just barely above the poverty line, or the family of four struggling to make ends meet on \$15,000 a year. But these average Americans will bear the higher inflation that many economists say will be an inevitable byproduct of this tax bill.

The assumption behind this tax policy-that as more money is concentrated in the hands of the rich, the more benefits will trickle down to the majority of Americans-is misguided.

President Reagan explained his rationale in February when he said:

The taxing power of the government must be used to provide revenues for legitimate government purposes. It must not be used to regulate the economy or bring about social change.

But this tax bill is obviously designed to regulate the economy. It asks the American people to accept on faith the untested theories of supplyside economics. It steers us on a course economic uncertainty with the promise that inflation will decrease and interest rates will drop as a result of more money in the pockets of the well-heeled. This faith is incredible considering that most economists are fearful of the tax cut's effects on prices and interest rates.

As for not using the taxing power of Government to bring about social change, President Reagan seemed to change his mind in April, when, in presenting his budget proposal to Congress, he said:

The tax portion of our package * should be looked at as an integral part of the entire package, not something separate and apart from the budget reductions.

In fact, the tax-cut-budget-cut package will result in the most serious social changes in the last half century. It will be the cuts in subsidized housing, food stamps, health and nutrition programs for the elderly and children. jobs programs, and education assistance that will pay for this tax-cut bill. The inequities of this policy are devastating in human terms.

For example, while this tax-cutbudget-cut package saves \$1.66 billion next year by denying food stamps to about 1 million Americans, it will forfeit \$15.6 billion in tax revenues to those who inherit estates valued up to \$650,000. And while this tax-cutbudget-cut package will force 100,000 American families to wait indefinitely for better housing in order to save \$12 billion in housing subsidies, it will spend \$11.8 billion in tax breaks to the oil industry over the next 5 years.

The President told the American people that these are tough times—that we will all have to make sacrifices in the interests of a brighter economic future. But the President's tax policies and program cuts do not make all Americans sacrifice. They seem to ignore the needy and reward the greedy.

Such policies can only produce resentment and disrespect for Government in the long run, and I will continue to oppose them.

U.S. PUBLIC DIPLOMACY: THE UNTOLD STORY—PART II

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. DERWINSKI. Mr. Speaker, I have inserted into the Record the remarks of our distinguished colleague, Toby Roth. Today, I wish to include the conclusion of his statement before the German-American Interparliamentary Exchange given by the Heritage Foundation of Washington, D.C. Congressman Roth concentrates on the need for efforts to be made to upgrade our public diplomacy abroad. His remarks follow:

In my attempt to sum up our national message, I suggested it was the following: That our commitment to individual liberty, free economic development, and the rule of sets an example for the rest of the world-and especially the developing world. But we must also add to this message our belief that the freedom of other nations to choose our model-or, indeed, to choose any model—is in danger because the Soviet Union's expansionist desire to forcibly export its brand of Marxism throughout the world. Each year we spend over a hundred billion dollars on defense because we believe this. But the half-billion dollars we spend on public diplomacy is not being clearly coordinated with our effort to contain the Soviet threat.

To prove my point, I'd first of all like to consider the CIA's sobering estimate that each year the Soviet Union spends between \$2 to \$3 billion on a well-coordinated propaganda campaign designed to convince the rest of the world that the United States is aggressive, colonialist, and imperialist. Because these Soviet expenditures are at least four times as great as ours, and because of the centrality of our struggle with the Soviet Union in our foreign policy, you would think that the agencies that execute U.S. public diplomacy would openly state that the necessity of countering this massive Soviet propaganda thrust is one of their main goals—if not their top objective.

But they do not. I have examined the 1981 annual report of the Board for International Broadcasting, the basic background materials which ICA prepares to acquaint people with its goals and programs, and the 1980 report of the U.S. Advisory Commission on Public Diplomacy, a seven-member presidentially appointed body which independently oversees ICA's programs.

ently oversees ICA's programs.

None of these important documents mentioned the \$2-\$3-billion-per-year Soviet

propaganda budget. Nor did any of them mention how this Soviet effort is carried out by the Communist Party's information department, by clandestine radios, by subsidies to foreign Communist Parties, by the KGB, and by an international network of Communist front organizations.

Besides this general failure to acknowledge and confront the magnitude of the Soviet propaganda drive, the effectiveness of U.S. public diplomacy has also been diminished because people who carry it out do not enjoy very high status in the foreign policy making establishment. Not since the Kennedy administration have the political appointees who occupy the top positions in our public diplomacy apparatus been included in the major foreign policy planning sessions of the Cabinet and National Security Council. And the career foreign service officers who occupy the other important positions at ICA have generally enjoyed less prestige than their colleagues who have chosen political or economic assignments. These are shortcomings which a Secretary of State deeply committed to upgrading our public diplomacy effort could probably do much to correct.

With such a low priority accorded to public diplomacy in the formulation of U.S. foreign policy, it should come as no surprise that our efforts come off so poorly in any direct comparison with those of the Soviet Union. Each year the Soviets distribute 180 million books and pamphlets around the world. We distribute about 200,000—not even 1 percent of the Soviet commitment. In 1981, the Soviets offered some 4,500 college scholarships to Latin Americans. We offered just a little over 4 percent as many-a pattern which is repeated worldwide. A senior adviser to the President of Yemen said last year: "If you give us scholarships, that is far better than giving us 100 tanks. . . . While the Soviet Union offers hundreds of scholarships to Yemeni students and military officers, getting scholarships to the United States has been like pulling teeth without anesthesia."

The facts and figures concerning those allimportant international radio broadcasts are equally dismaying. The Soviets broadcast over 2,000 hours a week in 82 different languages; our Voice of America broadcasts 891 hours a week in only 39 languages. Not only are many of the radio transmitters used for our international broadcasts rusting and out-of-date, but many of the signals they transmit are frequently so weak they are almost inaudible. And in many cases the signals never arrive at all. It has been estimated that the Soviets spend four times as much money jamming our radio broadcasts to Eastern Europe and the Soviet Union as we do producing them.

These, then, are the data which have led me to conclude that a failure to convey our national purpose and beliefs has made our U.S. public diplomacy programs much less effective than they might be. But what can Americans—and friends from abroad like those of you participating today in the German-American inter-parliamentary exchange—do to see that U.S. public diplomacy improves its performance in the future?

I think that as many of us as possible are simply going to have to keep on repeating and repeating the theme that America does have a specific message to transmit to the rest of the world. We are also going to have to emphasize more strongly how much money and energy our adversaries are devoting to spreading a message directly counter to ours.

The public, the press, and the Congress all eventually have to be educated, but right now we have to apply special pressure on the Reagan administration. Although President Reagan pledged during his election campaign that he would strengthen U.S. public diplomacy programs, the administration is only now starting to decide just how energetically it will translate this commitment into policy. Therefore, if you basically agree with the analysis I have presented to you today, It would be very helpful to me if you would write me a letter telling me so. This would give me some proof to show the appropriate State Department officials that there is a constituency of people who share my views on this matter.

Victor Hugo observed many years ago that, "There is one thing stronger than all the armies in the world and that is an idea whose time has come." Recent events in Poland and Afghanistan have made many people in the Communist and developing worlds more receptive to the notion that the Western idea of freedom, not the Soviet variant of Marxism, is the idea whose time has truly come. I think this presents a great opportunity for U.S. public diplomacy to take advantage of. But first of all we are going to have to admit that we do have a definite story to tell. Then we are going to have to summon the will to tell it as vigorously as possible. If we do this, I think we can increase the chances that the psychological war of ideas will be the only war we will ever have to fight. •

TRIBUTE TO MRS. EVE NORTON

HON. BILL CHAPPELL, JR.

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

. Mr. CHAPPELL, Mr. Speaker, today I wish to recognize a truly outstanding lady from the Fourth District of Florida. Mrs. Eve Norton of Jacksonville, Fla., has been active in community life for the past 20 years. Her achievements have been numerous. She has raised \$34,000 for the Special Olympics during her term as president of the Florida Federation of Women's Clubs (1976-1978). Eve Norton has received the Award of Merit in Fundraising for outstanding service for the prevention of blindness. During her chairpersonship for this charity in 1980, \$58,000 was raised. She is also currently serving as chairperson of the mayor of Jacksonville's Commission Aging.

In her spare time, Eve Norton has found time to promote the new breast care clinic established at Jacksonville's Baptist Hospital. This clinic is a first in the country.

In spite of all this whirlwind activity, Eve's real love remains the Korn Kob Klan. She organized and leads this fun musical group of young gals ranging in age from 50 to 87. These ladies wear outrageous garb and perform deadpan, tongue-in-cheek and are often known to mutilate the old standards they sing. Most of their performances are free; however, dona-

tions of as much as \$250 for a show have been made when the Korn Kob Klan performs for conventions. The Klan has performed free throughout the State of Florida before audiences in nursing homes, retirement homes, food sites, and other places. The Klan also performs at high schools, hospitals and for family and church groups.

During the 20 years the Klan has been in business, they have earned and given away thousands to charitable causes. Their gifts have been to the young, the elderly, the needy, the police, the opera, as well as scholar-

ships and grants.

Eve Norton is most proud of her Korn Kob Klan entertainment group and the happiness the Klan has been able to bring into the community, not only in the form of turning cash back into the community where needed, but for bringing joy into the lives of so

many people.

It should give us all great comfort to know that the city of Jacksonville has person like Eve Norton, who has dedicated so much of her life to helping others. At a time when so many have looked to the Federal Government for the solution of community problems, Eve Norton has proven that hard work, dedication, and a love for her community will go a long way toward improving the quality of life for many neighbors who are less fortunate than most of us. As we wish a happy 20th anniversary to the Korn Kob Klan, I am sure I speak for a great majority of my colleagues as well as her friends and neighbors in Jacksonville, Fla., in wishing good luck and Godspeed to Eve Norton and her Korn Kob Klan for many years of continued community involvement.

RUDOLF HESS-POLITICAL PRISONER NO. 1-PART III

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. McDONALD. Mr. Speaker, on two previous occasions I have presented some little-known and less-understood facts of the case of Rudolf Hess. because as an American, I cannot understand the continued participation of the U.S. Government in an episode which will go down in history as an atrocity.

That a man 87 years of age should be guarded by American troops assigned the duty of assuring that 40 years of imprisonment becomes 41, that 15 years of solitary confinement becomes 16 years—that fact demeans all of us. And to be told that we "must" continue this practice because the hostile, totalitarian, Soviet regime wants it that way simply makes it more demeaning. No truly great nation is forced by its enemies to collaborate with them in the perpetration of atrocities

Dr. Albert Seidl has been the legal representative of the Hess family since the days of the Nuremberg trials. Dr. Seidl is a member of a distinguished German-Jewish family; he has served as West German Minister of Justice and is a long-standing member of the Bavarian state legislature. As a jurist with experience at the highest levels of government, Dr. Seidl is aware of the anomolous position of the West German Government itself. It is a government of only part of a nation, and in many awkward respects, it remains a creature of the post-World War II

One aspect of this is the fact that the people of West Germany, through taxes imposed by the West German Government, are required to pay for the maintenance of a prison they do not want and do not control. Spandau Prison, in Berlin, a 19th century institution built to house 600 inmates, has, for the past 15 years, contained just one old man, plus an array of staff members and guards. Our own Government is a full and continuing participant in this tragic farce.

We are told that the unilateral release of Hess would violate the fourpower agreement under which Berlin is still governed. Need we be reminded that only a week ago the 20th anniversary of the Berlin wall was observedthe wall being a very gross violation of that same four-power agreement.

Two years ago, Dr. Seidl addressed a message on the Hess case to the Commission United Nations Human Rights. He made the following array of points:

As the defense counsel of the former Reichsminister Rudolf Hess in the trial before the International Military Tribunal (IMT) in Nuremberg I had occasion to speak with my client in the Spandau Allied Prison in Berlin and take notice of his steadily deteriorating state of health. Let me take this opportunity on behalf of my client to invite your attention to the following facts and circumstances and ask you at the same time to submit this case to the U.N. Commission on Human Rights:

It must be re-emphasized time and again that the IMT in Nuremberg cleared Rudolf Hess of the charge of having committed war crimes and crimes against humanity. Of course, it is also of importance in this context that his flight to Great Britain took place as early as May 10, 1941, i.e. prior to the outbreak of the war with the USSR.

Rudolf Hess was sentenced to life imprisonment on the grounds of having participated in the planning for and preparation of a war of aggression. The evidence presented at the IMT did not show any facts justifying the conclusion that Hess exercised any decisive influence on Hitler's political and military decisions. He had not attended any of the conferences the minutes of which were submitted by the prosecution in Nuremberg in evidence of Hitler's aggressive intentions, and the IMT verdict quoted these

in detail. These were the conferences of November 5, 1937, May 23, 1939, August 22, 1939, and November 23, 1939, during which Hitler expressed his ideas in front of the Foreign Affairs Minister, the Minister of War and/or the Chief of the Supreme Command of the Armed Forces, and the Commanders-in-Chief of the Army, Air Force and Navy. In the decision of the Interna-tional Military Tribunal Rudolf Hess had primarily been charged with the following main points:

The signing of the Law Concerning the Introduction of the Universal Compulsory Military Service, dated March 16, 1935;

"The call upon the German people to make sacrifices for military armament ('guns instead of butter');
"The alleged knowledge of Hitler's plans

of aggressions:

The presence in Austria and the co-signature of the Law Concerning the Reunification of Austria with the German Reich on March 13, 1938;

'The signing of the Regulation for the Installation of a Government of the Sudetenland on April 14, 1939;

The support of a proposal of the German government to Poland in a public speech on August 27, 1939;

'The signing of a Regulation Concerning the Incorporation of Danzig into Germany and the Establishment of the Polish 'Generalgouvernement'.'

None of these acts is punishable under the provisions of crimes against the peace.

In fact there was no valid provision which made a head of state, minister, general or other leader personally responsible under criminal law at the outbreak of World War II on September 1, 1939. The community of States bound by International Law as well as the League of Nations have always condemned violence as an act of the State against International Law, but never thought of accusing persons in an official capacity of an aggressor State, let alone of charging such persons before an international criminal court.

Such a provision still does not exist in International Law. All efforts to codify the principles applied by the victorious powers at Nuremberg within the framework of the United Nations failed because of the resist-

ance by the big powers.

The Human Rights Commission of the UN should, in evaluating the competencies adopted by the victorious four powers of World War II also consider the principle of equality and reciprocity of International Law and duly apply this in the negotiations with the custodial powers. The punishment of crimes against peace, of crimes against humanity and of war crimes in 1945 has been turned into a one-sided punishment of the vanguished and a one-sided reservation of amnesty for the relatives and supporters of the victors. This is a violation of the principle of equality and reciprocity of International Law (so-called tu quoque principle); this finally also poses the threat of only a lost war being a crime, and not in every case at that.

According to the Preamble of the General Declaration of Human Rights of December 10, 1948, it is an important commitment of the United Nations to protect human rights by the rule of law and to enforce general support for and implementation of human rights and basic liberties. According to Art. 9 of this Declaration, as quoted above, nobody may be kept in arbitrary confinement. Also in the Preamble to the UN Convention on Human Rights of December 16,

1966, (B. International part on Civil and Political Rights) the United Nations undertake to promote human rights and basic liberties and to uphold the rights recognized in this Pact. This applies in particular, as aforesaid, to the right of personal freedom (Art. 9). This right has been denied to the former Minister of the Reich, Rudolf Hess, since October 1, 1946. Since that date he has been kept imprisoned without legal cause, i.e. has been deprived of his freedom. Presumably there has rarely been a case with such a clearcut legal status as in the case of Rudolf

Just a few days after the announcement of the verdict of the International Military Tribunal, i.e. on October 5, 1946, the London weekly, The Economist, summa-rized the legal conclusions to be drawn therefrom as follows

"During the trial the defence lawyer Seidl produced witnesses, including Baron von Weizsacker, permanent Secretary of State in the German Foreign Office from 1938 to 1943, who testified about a secret treaty attached to the Nonaggression Pact and providing for territorial partition of six European states between Germany and the Soviet Union. The prosecution made no attempt to disprove this evidence; nevertheless, judgment completely ignores it. Such silence unfortunately shows that the Nuremberg Tribunal is only within limits an independent judiciary. In ordinary criminal law it would certainly be a remarkable case if a judge, summing up on a charge of murder, were to avoid mentioning evidence of the part played by an accomplice in the murder the evidence revealed that the judge himself had been that accomplice. That nobody thinks such reticence extraordinary in the case of Nuremberg merely demonstrates how far we still really are from anything that can be called a "reign of in international affairs. Both Britain and France are on record as having concurred in the expulsion of the Soviet Union from the League of Nations for its unprovoked attack on Finland in 1939; this verdict still stands and is not modified by anything which has happened since. In 1939 Moscow openly gloried in military co-operation with Germany for the destruction of Poland, "that ugly offspring of the Versailles treaty," and Ribbentrop in his last pleas quoted a cable of congratulation from Stalin as proof that the Soviet Union had not then regarded the war against Poland as an aggression. The contrast between 1939 and 1946 is indeed fantastic, and it is too much to expect that either historians in the future or Germans in the present will share in the current United Nations convention of not seeing it.

The foregoing shows that the IMT was no "competent court" in accordance with Article 5 of the European Convention for the Protection of Human Rights and Basic Liberties dated November 4, 1950. But above all, it was no "independent, impartial court founded on law" in the terms of Art. 14 of the International Pact on Civil and Political Rights (Human Rights Convention of the United Nations dated December 16, 1966).

All of this also shows that the IMT trial was no trial in strict terms of law and that the verdict of that tribunal too was no verdict within the legal definition.

"It follows from this that the conviction of Rudolf Hess for 'crimes against the peace' is a violation of human rights. Article 11. Section 2 of the Human Rights Declaration of December 10, 1948, Article 7, Section 1 of the International Covenant on Civil and Political Rights of December 6, 1966, are based on the principle that no person may be convicted for an act or omission which took place at a time when that act or omission was not punishable under national or international law."

The burden of response apparently fell upon Mr. Gamal Badr, "Deputy Director for Research and Studies" at the Commission on Human Rights at United Nations headquarters. The interest which Mr. Badr developed in the case of the world's oldest political prisoner, and the care with which he read the materials presented by Dr. Seidl, is revealed in his response. Mr. Badr presumes that Hess was found guilty of the precise offenses of which he was acquitted, and goes on to describe the vast benefits which flow to mankind as a whole, in consequence of the atrocious treatment accorded to the person who was found not guilty!

Let Mr. Badr speak for himself here. His

reply to Dr. Seidl is as follows:

As to the human rights aspect of his case on which you have placed an emphasis in the letters, your kind attention is drawn to General Assembly resolution 2583 (XXIV) in which the Assembly, inter alia, expressed its conviction that punishment of persons responsible for war crimes and crimes against humanity 'constitute an important element in the prevention of such crimes, the protection of human rights and fundamental freedoms, the encouragement of confidence, the furtherance of cooperation among peoples and the promotion of international peace and security."

Having successfully missed the point of Hess' innocence of "war crimes" and "crimes against humanity," Mr. Badr further hides behind another bulwark of hypocrisy, Article 107 of the United Nations Charter. In essence, Article 107, which is usually referred to as the "enemy states clause," says that the winners of World War II shall be free to do as they please to the losers, all the fine principles of the Charter notwithstanding.

Mr. Badr manages here to miss the point that it is "states" which are referred to, and that not even Article 107 deprived every individual member of a defeated state of his or her human rights forever after. The numberless additional legal flaws involved in the Nuremberg Trials are discreetly ig-

nored in Mr. Badr's response: "You are no doubt aware that according to Article 107 of the United Nations Charter, nothing in the latter 'shall invalidate or preclude action, in relation to any State which during the Second World War has been an enemy of any signatory of the present Charter, taken or authorized as a result of that war by the Governments having responsibility for such action'. You may also wish to recall that by resolution 95 'Affirmation of the Principles of International Law recognized by the Charter of the Nuremberg Tribunal' the General Assembly of the United Nations took note of the Agreement for the establishment of an International Military Tribunal for the prosecution and punishment of the major war criminals of the European Axis signed in London on 8 August 1948, and affirmed the principles of international law recognized by the Charter of the Nuremberg Tribunal and the judgment of the Tribunal.'

A rebuttal of the careless and ignorant position expressed by Mr. Badr, as the official spokesman for the United Nations Commission on Human Rights, has been made by Dr. Dieter Blumenwitz, who holds the Chair for International Law, General Government, German and Bavarian Law, and Political Sciences at Wurzburg University. This rebuttal is twenty pages long; suffice it to say that it shreds the validity of Mr. Badr's presumptions.

Dr. Blumenwitz concludes:

(1) The U.N.O. is not prevented either by Article 107 or by any other provisions of international law from taking up the case of Rudolf Hess or from investigating it from the point of view of its human rights aspects.

"(2) In the past, the U.N.O. paid particular attention to *** prisoners of war. In this connection, it deserves to be mentioned that Rudolf Hess-as the European Commission on Human Rights expressly stated-was initially treated as a prisoner of war after his landing in Great Britain on May 10, 1941."

From that day to this, Hess has been a prisoner. He sought to prevent Germany and Britain from destroying another generation of their youth. He was a British prisoner of war when the "war crimes" of which Mr. Badr presumes him guilty were committed, which is why even the "hanging court," as the International Military Tribunal surely was, could not quite find him guilty of them.

The indifference of the "human rights" claque to the genuine plight of the world's oldest and longest-held political prisoner will stand as yet another monument to this Age of Hypocrisy. But the American people should not permit their government to involve them further in this singular atroci-

CHICAGO'S OBSERVANCE OF CAPTIVE NATIONS WEEK

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. DERWINSKI. Mr. Speaker, Mr. Tedis Zierins, a Chicagoan who fled Communist rule in Latvia, recently sent me several articles reporting on the dramatic observance of Captive Nations Week in the Chicago area. I wish to insert them along with a proclamation issued by Mayor Martin J. Butler of the Chicago suburb of Park Ridge, Ill., and a resolution issued by the Captive Nations Committee of Chicago by its chairman, Ilmars Bergmanis.

[From the Park Ridge Advocate, July 16, 19811

PROCLAMATION

Whereas, twenty-two years ago Captive Nations Week was inaugurated by a Joint Resolution of the Eighty-sixth Congress: and

Whereas, throughout our history Americans have held the deep belief that liberty and independence are among the most basic and inalienable rights of people everywhere; and

Whereas, it is vital to the national security of the United States and other free nations of the world that the desire for liberty be kept alive, especially remembering the citizens of more than thirty countries now under Communist rule; and

Whereas, each year Captive Nations Week has provided a fitting opportunity for the American people to show their concern for

those whose governments do not permit the

same freedoms we enjoy; and Whereas, the present United States Congress has this year designated July 18 as "National POW-MIA Recognition Day" to remember those Americans who may still be held prisoners of war or missing in action:

Now, therefore, I, Martin J. Butler, Mayor of the City of Park Ridge, do hereby proclaim the week of July 12 to 18, 1981, as "CAPTIVE NATIONS WEEK" and urge all citizens to support this annual observance, and special recognition to be given on July 18 to those Americans now classified as POW or MIA.

In witness, Whereof, I have hereunto set my hand and caused the seal of the City of Park Ridge to be affixed this 8th day of

July, 1981.

CAPTIVE NATIONS DAY IN CHICAGO-RESOLUTION

Whereas, in Eastern Europe, Southeast Asia, Cuba, and most recently in Afganistan, men, women and children, once free, are denied the free exercise of their fundamental constitutional and human rights; and

Whereas, nations, once free, are deprived of their right to self-determination; and

Whereas, the expansion of the Soviet colonial empire and its aggressive policies are now the greatest threat to world freedom: Now, therefore, be it

Resolved by the participants of the Cap-

tive Nations Day rally,
That the people of Captive Nations have not lost their dedication to the ideals of freedom or their desire to see their own nations free,

That on this day we should reaffirm our beliefs in the principles of freedom and renew our dedication in the struggle to free the people subjugated by the Soviet empire;

Be it further Resolved, That we call upon the United States government to commit itself to the cause of the Captive Nations and exert pressure on the Soviet government to obtain the release of all national, political and religious prisoners, to end further persecutions and to demand, as provided in the United Nations Declaration, freedom and self-determination for all peoples under constitutional government and a life of liberty and self-fulfillment for all the peoples of the Captive

RED "CANCER" WARNED BY LINDSTROM

In a rousing speech at the Captive Nations Day rally at the Daley Plaza, Saturday, the Rev. Paul Lindstrom urged Americans to become more informed about the "Cancer of Communism," and to support captive people throughout the world.

"As Americans, we need to be activists for freedom," said Lindstrom, the arch-conservative pastor of the Christian Liberty Academy in Prospect Heights. "We must get involved; we must let our political leaders know we expect them to do everything possible to help people of captive nations win

their freedom.

Lindstrom, widely known for his forma-tion of the "Remember the People Commitin 1968, drew enthusiastic applause several times from the crowd of about 400 clustered around the podium in the shadow of the Picasso statue.

The crowd, consisting of representatives of the 30 captive nations identified by the National Captive Nations Committee, carried signs bearing slogans such as, "Freedom for Lithuania," "Withdraw all troops from Laos," and "God Bless America and Guard

our Freedom." During the rally members of the Polish group, Pokolenie, passed out helium-filled balloons emblazoned with the name of the Polish union, Solidarity, and

burned a Soviet flag.

Other speakers, including Chicago Congressmen Frank Annunzio, Henry Hyde and Edward Derwinski, and A. Mazewski, president of both the Polish American Congress and the Polish National Alliance, denounced Soviet Union's violation of human rights throughout the world.

Your credentials to address the Captive Nations Day audience are greater than my own because you have been the ones to who have been subjected to Marxist brutality, Lindstrom told the crowd. "Your credentials include the scars on your backs, the tears you have shed and the sacrifices you have made so that you and others might be free. On this side of hell, there is nothing more terrible than the degradation of communist tyranny.

The committee sponsoring the rally was formed to promote the Captive Nations Week Resolution signed by President Dwight D. Eisenhower on July 17, 1959, when only 22 nations were listed under the

control of the Soviet Union.

UNIT 84 WINS MAE HOLMS AWARD

HON. BILL CHAPPELL, JR.

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES Tuesday, August 4, 1981

• Mr. CHAPPELL. Mr. Speaker, today wish to congratulate unit 84, of the Disabled American Veterans Auxiliary of Holly Hill, Fla., for winning the coveted Mae Holms Award at the recent national convention of the DAV and DAVA held in Miami Beach, Fla.

The Mae Holms Award is the highest honor that can be bestowed on an auxiliary unit. The award is for excellence of achievement in all five of the auxiliary's major programs: Americanism, community service, hospital, legislation, and volunteer services in Veterans' Administration medical centers.

From the 1,730 auxiliary units that competed for the Mae Holms Award, only 1 unit of 100 or less and 1 unit of 101 or more are eligible to receive this accolade. The 240 members of unit 84 worked many hours at fundraising and various programs, with special efforts given by Commander Margarette Kwalik, Adjutant Marge Duffy, Chaplain Evelyn Belt, and Chairpersons Betty Ertel, Sally Gavin, Merle Gee, and Catherine Dobbs, who coordinated most of these projects in 1980-81.

We in Florida's Fourth Congressional District take great pleasure in knowing that unit 84 of the Disabled American Veterans Auxiliary has won this coveted award over stiff nationwide competition. On a personal basis, it gives me a deep sense of pride knowing that the members of unit 84 have given so much of themselves in improving the Holly Hill community in which they live. It is ordinary folks like those in unit 84, who have volun-

teered so much of their time and their energy, to make this country the great Nation it is today. Their selfless devo-tion to their neighbors and community is what America is all about and speaks well for all Disabled American Veterans.

THE TWO SIDES OF SUPPLY-SIDE

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. McDONALD. Mr. Speaker, Dr. Hans Sennholz, who in my opinion has the best economic mind in America today, has written an excellent article entitled, "The Two Sides of Supply-Side," which appeared in the August 1981 issue of Private Practice. He points out that the supply-side arguments seem to be mere arguments for temporary restraint and delay. While this is a step in the right direction it will not stimulate economic activity on a long-term basis. To provide longterm stability we need to return and engage in genuine discussion of the morality and desirability of economic transfer by political force. This is the only way the Reagan program will succeed and prevail. I commend the article by Dr. Sennholz, who not only addresses the economics involved but also discusses the immorality of the welfare state, to the attention of my colleagues:

THE TWO SIDES OF SUPPLY SIDE (By Hans Sennholz, Ph. D.)

In politics, the days we pass with new hope and happy prospects are more numerous by far than those coming to fruition. With every new election, hope offers an easy and universal cure for all our social economic ailments. Yet, our hopes always prove to be delusions that in the end leave us nothing but hope.

With Ronald Reagan in the White House, many investors and businessmen are clinging to the hope that they will see inflation subside, their taxes lowered, economic expansion resumed and our levels of living permitted to improve again. The U.S. business community, almost without exception, is envisioning a new trend called "supply-side economics" that should restore economic vitality and growth.

THE RIGHT HAND GIVETH * *

The new trend promised to provide a pow erful incentive to boost the rate of economic expansion and create an investment boom. To that effect, the administration is proposing a 25 percent cut in personal income tax rates over the next three years. The maximum tax on investment income is to be reduced from 70 percent to 50 percent and the top capital gains rate from 28 percent to 20

An accelerated depreciation plan would allow businesses to write off buildings in 15 years, utility property in 10 years, machin-ery in five and vehicles in three years. Business taxes will be lowered. But the 22 percent increase in Social Security taxes imposed on individuals by the previous Congress will remain in effect. Moreover, the 25 percent cut in personal income tax rates will barely compensate for the higher brackets in which individuals will find themselves as wages and salaries increase to keep up with inflation. It is hoped, though, that the tax reform will produce a jump in personal savings and investments that will enable financial institutions to finance not only the federal deficits but also investments in housing and business.

STORMY SEAS MAY BE BECALMED

It is clear the Reagan program has garnered some popularity in the U.S. Congress just as it has with the business community. Ironically, the majority of the present Congress passed the very tax legislation that is responsible for the economic stagnation. These same congressmen imposed the punitive rates on investments income and the confiscatory rates on higher incomes. To expect them after many decades of taxing and spending to think of economic production and growth is to believe in political miracles—but miracles may yet happen.

No matter what the outcome of the House-Senate conference committee, the Reagan program deserves our objective analysis of probable effectiveness and poential effects regardless of political considerations. We must raise, and hopefully answer, the question of how it may work.

This writer, always skeptical of political answers and fearful of the harm inflicted by political actions, is rejoicing about the mere fact there is a tax-cut debate. After all, before there can be reason and sanity in political life, there must be reasonable and sane public discussion. In political life, as in all other aspects of human life, thought always precedes action, and changes in public thought and ideas precede changes and policy.

The current debate pits the old ideological forces against new supply-side forces. The old forces, represented by numerous liberal legislators, are repeating the popular arguments for using political force to redistribute income and wealth. They argue for economic equality and equal opportunity through political action. Because government has no income or wealth of its own, they favor the seizing of income from the more productive members of society and its transfer to poorer members. Waxing eloquently about social peace and harmony through forced redistribution, they appeal to the most numerous class of voters and promise them ever more benefits by taxing the only source of economic wealth: economic activity.

WHETTING THE APPETITE

In the heated political debates, the advocates of supply-side economics are tempted to fall back on a set of arguments that is convincing politically but counterproductive ideologically. When pressed for more benefits to the poor and needy, they merely resort to "lack of funds." They talk about huge budgetary deficits and the resulting soaring inflation. They argue in favor of reducing the rate of transfer growth on grounds of fiscal responsibility, but do not attack the rationale of transfer. By merely pleading "lack of funds" they are, in the ensuing silence, yielding to the case for forced redistribution. They have thereby strengthened the expectations of transfer in the future, when economic production speeds up again and new transfer funds become available. In short, most supply-side arguments seem to be mere arguments for temporary restraint and delay that do not ring true with impatient Americans.

Observers of supply-side economics may remember President John F. Kennedy's tax reform program, which actually lowered business taxes and generated a remarkable economic boom. In the long run, however, the business expansion of the early 1960s was dissipated entirely by the enormous transfer expansion during the late 1960s and throughout the 1970s. It greatly sharpened the appetites of the transfer forces.

THE GREAT DISASTER

A few advocates of supply-side economics actually question the moral and economic foundation of the transfer system. They point out, correctly, that during the last two decades federal policies have progressively weakened economic production until it has fallen into stagnation and recession. Throughout the 1970s, unemployment has risen to deplorable levels as most Americans' standards of living have fallen. Most have fallen back to 1970 levels and may soon be back at 1965 or even 1960 levels, according to some estimates.

The economic conditions of most of the beneficiaries, the blacks and Hispanics in teeming city slums, are immeasurably worse today than they were 20 or 30 years ago. The transfer program, massive in scope and magnitude, has been an unmitigated economic disaster even from the point of view of those it was supposed to benefit. Equally important, it has weakened or even destroyed the moral fiber of millions of beneficiaries lingering at the public trough. Rampant crime and public immorality have become constant threats to the lives and property of countless Americans. Such are the fruits of a welfare state that appeals to envy and covetousness and practices economic redistribution by political force.

The voices of moral condemnation are barely audible in the noise of political debate. Therefore, even if the Reagan program does prevail, we must cast doubt on the effectiveness and durability of the reforms. Surely, we must not overlook the possibility that the reform forces leaning heavily now on arguments of fiscal expediency, may in the future return to moral and philosophical arguments that go to the roots of our economic and social dilemma. When they return and engage in genuine discussion of the morality and desirability of economic transfer by political force, we shall welcome them and join them in a new hope for a new beginning.

In the meantime, the tax-cut debate rages on, generating more heat than light. The federal deficit for the present year may exceed the \$60 billion deficit of the last year, casting new doubt on the reform proposals. After all, the deleterious effects of deficit spending are the same under a Republican administration as they are under a Democratic administration. Deficits consume capital, which is the brick and mortar of economic expansion and improvement. They exhaust the capital markets, deprive businesses of their foundations and depress wage rates and levels of living. Indeed, they are counterproductive.

DEFICITS CLOUD THE PICTURE

Will supply-side economics, when fully adopted by the U.S. Congress, stimulate economic activity? I doubt it, as long as staggering federal deficits continue to consume our capital substance. Massive government borrowing causes interest rates to soar; government is insensitive to rising costs, whether they be 10 percent, 15 percent or even 20 percent.

Business though is highly sensitive to costs. In fact, all business activity—in particular, capital investment—is completely determined by costs. It explains why business can easily be crowded out of the loan markets when government appears on the scene seeking to meet its deficit obligations.

WHETHER A LENDER OR INVESTOR BE

A simple calculation may illustrate the point. When the U.S. Treasury pays 15 percent or more on its short-term obligations at the same time business is struggling to earn 5 to 10 percent, liquid capital tends to flow to government. Who would want to make a risky investment in business and perhaps earn 5 to 10 percent, if the U.S. Treasury is offering 15 percent without any risk to the investor? In fact, it would be rational and economical for business to reduce its reserves to a minimum in order to lend more funds to the Treasury. Obviously, no business boom can develop under such conditions. Supply-side policies are bound to fail because the business tax reductions merely facilitate the financing of federal debt. Guided by lofty interest rates, tax rebates flow right back to the Treasury as loan funds

The supply-side economists crowding around Reagan have a ready answer to this objection. The income tax reductions will encourage most Americans to save and invest more so that interest rates will come down substantially. Both government and business will obtain their fair share of new loan funds coming into the market, permitting government to cover its deficits and business to invest in new facilities and equipment.

Surely, we must agree with these optimists provided the American people will actually save and invest more in the future. If mortgage rates were to fall to 12 percent, or even 10 percent, because new savings flow into thrift institutions, the housing industry would spring to life. But if, for any reason whatever, the savings are not forthcoming or government makes ever new demands for deficit financing and interest rates remain at lofty levels, there can be no economic expansion. Government deficits are always depressive no matter who suffers from them.

AT WHAT COST WILL THE BRIT-ISH CONTROL NORTHERN IRE-LAND?

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. BIAGGI. Mr. Speaker, as chairman of the bipartisan Ad Hoc Congressional Committee for Irish Affairs, I wish to bring to the attention of my colleagues a most informative article from a recent edition of New Statesman magazine. The article written by Political Editor Peter Kellner focuses on a most important, but little known aspect of the Northern Ireland issuehow much it costs Great Britain to maintain its direct rule over Ulster.

The answer is startling. According to Kellner, "All told then, Ulster receives subsidies totaling 1.5 billion pounds a year from Britain—or almost half of the province's annual public expendi-

ture of 3.3 billion pounds." Upon closer examination, we discover that included among this 1.5 billion pound expenditures is an estimated 320 million pounds for the Royal Ulster Constabulary—the main police force in Northern Ireland. Great Britain spends six times as much on law and order in Northern Ireland than in any other area of government expenditures.

These expenditures are incredible when one considers the precarious state of the British economy today. One would assume that this massive and constant infusion of money into Northern Ireland over the past 12 years would have brought stability and prosperity to the region. Nothing could be farther from the truth. More than 2,000 people have died from violence since the British introduced their security forces into the North. In the past decade, there has been a 27percent reduction in the number of manufacturing jobs in Northern Ireland. Unemployment in the North has consistently exceeded the national rate for Great Britain. In certain minority neighborhoods, unemployment among Catholics is running as high as 40 percent.

When one looks to the day when peace, justice, and freedom might again reign in Northern Ireland—one realizes that the declaration of intent by the British Government to remove their presence is a vitally important prerequisite. The Kellner article suggests that for economic reasons—in short time that may in fact have to be the British policy. If this happens, I recommend that the United States be in a position to provide economic aid to Northern Ireland.

The Kellner article follows:

THE MOST SUBSIDISED PEOPLE ON EARTH
(By Peter Kellner, Political Editor)

There are many ways in which the British government could spend £1.5 billion. It could restore the housing, school and hospital-building programmes to the levels of the mid-70s, and so generate extra jobs and a better welfare state. Or it could almost double overseas aid, and keep the navy in the style to which it has become accustomed—and so win a standing ovation from the western alliance and the third world. Or it could cut income tax by two pence in the pound, and give us each a little more to spend. Or it can carry on financing its policy in Northern Ireland, risking death to British soldiers, attracting the opprobrium of the rest of the world, and securing no moral, social or financial dividend whatsoever from its investment.

ever from its investment.

To discuss Ulster in terms of money rather than principle may seem irrelevant, even sordid. If it is right to stand by the Protestants, should we not do so whatever the price? Alternatively, if it is right to work for British withdrawal and a united Ireland, should we not regard this as the culmination of an historic mission rather than a temporary respite for the public sector borrowing requirement?

Perhaps. There are, though, three reasons why an examination of the economic facts is

worthwhile. First, it is one way—admittedly very partial—of discovering something of the true relationship between Britain and the province. Second, Ulster is not the sole moral issue British politics: the Provision of decent welfare services is another, and when money is tight the financial cost of servicing one principle is liable to be paid by sacrificing another.

Third, to probe the financial link between Britain and Ulster is to ask some awkward questions about what British policy has done to everyday life in even the more peaceful parts of the province. The answers are frightening.

The main subsidy to the Ulster economy voted by MP's at Westminster is the annual Grant-in-Ald. This totalled £654 million in 1980-81; the provision for 1981-82 is up 20 per cent, to £785 million. This essentially covers the gap between what is collected in Ulster in taxes, rates etc and what is spent there on public services such as roads, housing, schools and hospitals.

But that figure tells only half the story. "Law, order and protective services"— mainly, the cost of the Royal Ulster Constabulary-are financed separately. are expected to cost £326 million this year. To this must be added the extra cost of keeping troops in Ulster, over and above what it would cost to keep them on Salisbury Plain or the banks of the Rhine, According to the latest Public Expenditure White Paper, this was £103 million last year, at autumn 1979 prices—which implies a 1981-82 figure at current prices of around £130 million. So the overall figure for-how shall we put it-exerting Her Majesty's authority in Northern Ireland is about £450 million this year. That works out at almost £6 a week for everyone living in Ulster; the cost of law'n'order in the rest of the UK is less than £1 a week per person.

There is, in addition, a further sum not voted by Parliament at all in advance. Each year "parity payments" are made to the Northern Ireland insurance fund. This is roughly the gap between what companies and workers pay in national insurance contributions, and what (principally) the unemployed and pensioners receive in benefit. With the recession deepening and more than one in five not jobless in Ulster, the parity payments are inevitably on the increase. In 1981-82 they may well approach £200 million.

All told, then, Ulster receives subsidies totalling £1.5 billion a year from Britain—or almost half the province's annual public expenditure total of £3.3 billion (see table.) That is equivalent to a subsidy of £20 per person per week.

Ulster: the true bill [In millions of pounds]

Income 1981-82: Locally-generated taxes, rates, national insurance etc	1,800
Payments from Britain: Grant-in-aid	800 450 200 50
Subtotal	1,500
Total income	3,300
Health, education	1.000
Social Security	900
Industry, agriculture, transport	500
Police, army, prisons	450

Housing	250
Miscellaneous	200

(It is possible to argue that the subvention is even higher: if, for example, Ulster is deemed to receive its share of the "benefit" of Britain's general defence expenditure, then another £300 million should be added. The £1.5 billion calculation assumes, in effect, that Ulster receives national benefits such as NATO membership for free. Lucky Ulster.)

If any other part of the UK received a £1,000-a-head subsidy (and no other region comes remotely near that), you might expect an unparalleled surge in prosperity. And, to some extent, Ulster has benefited: between 1966 and 1978, living standards rose twice as fast in Ulster as in mainland Britain.

But in other ways, the Ulster economy has grown steadily weaker. Unemployment is worse by far than elsewhere in the UK; and within the province there is a sharp difference between Protestant areas where the rate is 10-20 per cent, and Catholic areas, where it is generally 25-35 per cent. An analysis by Bob Rowthorn to be published in a coming issue of the Cambridge Journal of Economics paints a fearsome picture of what has happened since the early 1970's.

A decade ago Ulster had a balanced, if none too prosperous, economic structure. Since then industrial jobs have disappeared at a much faster rate than in mainland Britain, 27 per cent of jobs in manufacturing have gone. At the same time, public money has been poured at an unprecedented rate into jobs in health, education and administration. Public sector employment has risen by half in the past ten years.

One way of looking at the huge and growing subsidy of Ulster is that it has maintained living standards-largely via the creation of public sector jobs-in the face of general economic disintegration. Inward investment from Britain and abroad, which created more than 11,000 new jobs in manufacturing between 1966 and 1971, has largely dried up since then. All told, Rowthorn calculates, the conflict has destroyed or prevented the creation of about 40,000 jobs in industry, construction and private services while Westminster's response to the conflict has been to create 15,000 more public sector jobs. (Both figures are relative, not absolute: they compare the present employment tructure with what it would be if Ulster had developed in line with other depressed regions of the UK.)

The net effect of the conflict, therefore, has been to reduce employment by about 25,000—or about four per cent of the working population. At the same time the conflict has created grotesque distortions, turning Ulster into a workhouse economy where more and more jobs owe their existence to administrative flat and institutionalised charity rather than to rational economic organisation.

In the long run—indeed, in the not-so-long run—the economics of Ulster are likely to become an unacceptable burden on Britain. At the same time, the Dublin government could not begin to meet the cost of supporting Ulster's living standards within a united Ireland. It may dent British pride for Tony Benn to suggest involving the United Nations or for David Owen to discuss the role of the Common Market; but the time is not far removed when an international solution to the problems of Ulster will be the only

EXTENSIONS OF REMARKS

one that either Dublin or London will be able to afford.

AUTOWORKERS UNION, DEAL-ERS AND MANUFACTURERS SUPPORT H.R. 4400

HON. BOB TRAXLER

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

 Mr. TRAXLER. Mr. Speaker, on August 4, Mr. Hillis of Indiana and I introduced H.R. 4400, the Mobile Source Clean Air Act Amendments of 1981

Since that time, I have received statements of support for the bill from various foreign and domestic motor vehicle manufacturers, and from dealers and retail automotive manufacturer associations. In addition, as the result of our discussions with the United Auto Workers, the union has informed us of its support for the bill. These groups also call for prompt congres-

sional action on this bill.

This legislation seeks to amend title II of the Clean Air Act in order to provide a more balanced approach to regulating mobile source emissions. Both Mr. Hillis and I want to be certain that the quality of our air is maintained at levels which would not jeopardize the health of Americans. We also want to hold down excessive Government regulation and provide opportunities for reemploying the thousands of autoworkers who have been laid off as a result of the downturn in our domestic auto industry, which has been caused in part by the cost of Government regulation.

We are particularly pleased to have the support of the United Auto Workers, an organization that is committed to providing for a healthy environment and to preserving jobs. The UAW, which was consulted in the development of the provisions of our bill, has advised us of its support for the carbon monoxide, oxides of nitrogen, and hydrocarbon emission levels presented in this legislation, based on the weight of current scientific data which indicates that the levels we are proposing will not adversely affect air qual-

ity.

Likewise, the Motor Vehicle Manufacturers Association, the National Automobile Dealers Association, and the retail auto industry participated in the development of this bill, and support the emission standards that we

are proposing.

Mr. Speaker, we would like to include in the Record at this point a summary of the provisions of H.R. 4400, and copies of letters of support for this bill that I have received. We have also been advised that other letters of support are being sent to us, and we will include them in the Record at a later date.

The supplemental materials follow: SUMMARY OF PRINCIPAL PROVISIONS OF H.R. 4400

Short title—Mobile Source Clean Air Act Amendments of 1981.

Standards.-The bill would-

Establish the automotive carbon monoxide standard at 7 grams per vehicle mile (gpm), rather than the current 3.4 gpm level.

Establish by statute automotive NO_x standard of 2.0 gpm for diesel and gasoline fuel cars, rather than the current 1.0 gpm standard and eliminate waiver provisions now in the law that allow a higher diesel standard.

Require, without changing the current mandate that EPA set standards applicable to emissions from vehicles which cause or contribute to air pollution which may reasonably be anticipated to endanger public health or welfare, that such standards relate to achievement of the applicable National Ambient Air Quality Standard just as is required for stationary sources.

Require that EPA consider the cost of emission standards and their effect on competition and energy use in setting new

standards.

Provide, in setting more stringent standards, minimum lead times of 48 months for new heavy duty vehicles and engines, and 36 months for all other new motor vehicles and engines.

Eliminate provisions that require that standards be set to achieve the greatest degree of emission reduction achievable through use of technology which EPA believes will be available, even though such technology is not available at a reasonable cost to the manufacturer and the consumer.

Provide that EPA may waive standards, after notice and public hearings, for up to four model years where the manufacturer demonstrates the waiver is necessary for use of an innovative power train technology, innovative emission control device or system, or alternative fuel (other than diesel fuel), or power source, and provide that the waiver will include a standard and apply to not more that 500,000 vehicles or engines of each model of a manufacturer.

Continue existing emission strategy in current EPA high-altitude regulations for model years 1982 and 1983 and provide for a study of the availability of models to high altitude dealers where there is a request therefor from dealers.

Provide greater flexibility for the EPA to

set heavy-duty standards and regulations.

Provide for exclusion of methane in establishing hydrocarbon standards and allow for an allowance, determined by EPA, for vehicles and engines that emit low levels of evaporative hydrocarbon emissions.

Certification and testing.—The bill would provide alternatives to current testing methods which must be approved by the EPA.

Enforcement.—The amendment would provide that if EPA determines that, based on a statistically valid and representative sample of vehicles, any class or category of vehicles or engines, although properly maintained, used, and adjusted, do not on an average conform to the standards, the EPA must notify the manufacturer. The manufacturer then must promptly submit a corrective action plan to be approved by EPA that could include recall or some other acceptable enforcement mechanism.

Study of alternative emissions control program and the efficacy of existing program.—
The bill would require EPA to examine the existing air pollution control program to de-

termine its efficacy and, if appropriate, to develop alternative and practicable approaches to the control of emissions from mobile sources. Any new approaches must not diminish the air quality protection afforded by the Act. The new approach must have several objectives of stimulating economic growth, reducing costs, simplification, improving control of emissions consistent with the needs of safety, energy conservation, and consumer demand, and developing a financially healthy domestic industry. The study must identify and consider any competitive advantages to manufacturers of any new approach.

A report of the study must be submitted to Congress within a year after public com-

ment thereon.

If EPA makes certain findings listed in the bill concerning such matters as feasibility of the new approach, air quality, and competition, EPA can, in its discretion, develop proposed regulations that meet certain criteria. But the regulations cannot be finalized except with the approval of Congress through the normal legislative process.

The study is not intended to prevent EPA from changing the program and its regulations within the bounds of the existing law.

AMERICAN MOTORS, Southfield, Mich.

Hon. ELWOOD HILLIS, Hon. Bob Traxler, House of Representatives, Washington, D.C.

Dear Representatives Hillis and Trax-Ler: I appreciate your introduction of H.R. 4400, the Mobile Source Clean Air Amendments of 1981. While the issues addressed in H.R. 4400 are important to all automotive manufacturers, timely enactment of certain provisions is particularly critical to American Motors.

Our statutory and administrative waivers for NO_x and CO expire with the 1982 models creating uncertainty regarding emission standards for 1983 model vehicles. This issue is of immediate concern as we currently are making decisions regarding our engineering programs for 1983 model year.

American Motors supports H.R. 4400 and we will assist in obtaining favorable action on the bill in a timely matter.

Sincerely,

GERALD C. MEYERS, Chairman, and Chief Executive Officer.

CHECKER MOTORS CORP.,
Kalamazoo, Mich.

Congressman Bob Traxler, Rayburn House Office Building, Washington, D.C.

DEAR CONGRESSMAN TRAXLER: Checker Motors Corporation (CMC) of Kalamazoo, Michigan is pleased with the introduction of H.R. 4400, the Mobile Source Clean Air Act Amendments of 1981 and wish to express our support for the bill.

We, as a member of the Motor Vehicle Manufacturers Association (MVMA), are aware of the implication of the bill and feel that the passage of the bill will go a long way in removing some of the extravagant costs and extreme burdens that have been imposed on the motor vehicle industry without undue jeopardy to our air quality.

CMC is a small volume motor vehicle manufacturer of primarily taxicabs and limousines and the regulations such as the Clean Air Act and the National Traffic and Motor Vehicle Safety Act are extremely burdensome and costly to us based on our current annual vehicle production volume of between 3,000 and 4,000 total vehicles

Our total reliance on the large volume engine manufacturers for technology relative to the Mobile Source Clean Air Act will allow us to benefit from the regulatory relief that this bill will provide to the automotive industry.

We hope that Congress will act promptly to approve this bill and wish to extend our

support for it.

Very truly yours,

DAVID R. MARKIN, President.

CHRYSLER CORP., Detroit, Mich.

Hon. BOB TRAXLER, U.S. House of Representatives, Washington, D.C.

DEAR CONGRESSMAN TRAXLER: Thank you

for sending me a copy of H.R. 4400.

As I am sure you know, our people in Washington have been closely involved with the outstanding leadership effort you have provided on this bill. Needless to say, you have our commitment to support it, and we will do everything we can to urge action on the bill by the House Energy and Commerce Committee.

We appreciate your efforts in this very important matter and look forward to working with you in the weeks ahead.

Sincerely yours,

LEE A. IACOCCA, Chairman of the Board, Chief Executive Officer.

> FORD MOTOR CO. Dearborn, Mich.

Hon. Bob TRAXLER, House of Representatives,

Washington, D.C.

DEAR MR. TRAXLER: Thank you for your letter and the copy of H.R. 4400. We at Ford certainly agree that this proposed legislation represents a sound and responsible approach to amending Title II of the Act

We believe the provisions of your bill, if adopted, could yield major benefits to the industry and the consumer without jeopardizing attainment of national ambient air quality standards. These modifications will remove needless regulatory burdens and costs and contribute to the competitiveness

of the U.S. auto industry.

It is in this spirit that we wholeheartedly endorse H.R. 4400. We stand ready to assist you in any way you believe appropriate in obtaining favorable action on your bill.

Sincerely.

PHILIP CALDWELL, Chairman of the Board.

FREIGHTLINER CORP., Portland, Oreg.

Hon. BOB TRAXLER, House of Representatives, Washington, D.C. Hon. ELWOOD HILLIS. House of Representatives, Washington, D.C.

DEAR CONGRESSMEN TRAXLER and HILLIS: Thank you for your letter informing me of your introduction of H.R. 4400, the Mobile Source Clean Air Act Amendments of 1981. We have reviewed the bill and find that it indeed encompasses modifications of the Clean Air Act which Freightliner Corporation can heartily support. Passage of H.R. 4400 would make an important contribution to removing of the unnecessary costs and

burden of exhaust emission regulations relating to heavy duty trucks without jeopardy to air quality.

We are hopeful that the Congress will act promptly this session to approve these and other necessary changes (such as appropriate changes to stationary source provisions) to the Clean Air Act. In addition to our strong support of H.R. 4400, we are ready to assist you in obtaining favorable action on the bill by the House Energy and Commerce Committee in September through our work with the Motor Vehicle Manufacturers Association and in talking to our Congressmen from Oregon.

Yours sincerely.

RONALD E. BURBANK, President and Chief Executive Officer.

GENERAL MOTORS CORP. Detroit, Mich.

Hon. ELWOOD HILLIS. Hon. Bob TRAXLER. U.S. House of Representatives, Washington, D.C.

DEAR MESSRS. HILLIS and TRAXLER: Thank you for your letter announcing introduction of H.R. 4400, the "Mobile Source Clean Air Act Amendments of 1981". We welcome this bill which will correct major problem areas of Title II of the Clean Air Act and we strongly urge that Congress act on it during this session. If enacted this fall, for example, rather than early in 1982, consumer cost savings for GM customers alone will be in the area of \$1 billion.

We also welcome the eleven principles announced by the EPA Administrator on August 5. These two actions should help provide the framework within which comprehensive legislation can be developed and passed this year amending both stationary and mobile source provisions of the Act to improve its effectiveness without reducing its benefits.

Your leadership in introducing H.R. 4400 is greatly appreciated. General Motors is ready to offer any further assistance in support of your efforts that may be required.

Sincerely,

ROGER B. SMITH. Chairman.

JAPAN AUTOMOBILE MANUFACTURERS ASSOCIATION, INC., Washington, D.C.

Hon, Bob TRAXLER. House of Representatives, Washington, D.C.

DEAR CONGRESSMAN TRAXLER: We have received your letter requesting JAMA's comments regarding H.R. 4400, the Mobile Source Clean Air Act Amendments of 1981.

JAMA considers that the changes proposed in the bill will accomplish the twin goals of relieving unnecessary regulatory burdens that have been placed on the automobile industry, and preserving the gains that have been made over the past several years in protecting air quality. We believe H.R. 4400 addresses the immediate concerns of the automobile industry and hope that action will occur quickly.

JAMA member companies may have specific comments which they will either forward directly to you or transmit through the association. We would appreciate your attention to any individual comments within JAMA's general endorsement.

We are most pleased that you have asked us for our views on this legislation and look forward to working with you in any way

that we can to achieve its successful passage through Congress.

Sincerely yours

AKIHIKO MIYOSHI. General Director.

MACK TRUCKS, INC.

Hon. BOB TRAXLER, Rayburn House Office Building, Washington, D.C.

DEAR CONGRESSMAN TRAXLER: Mack Truck is most appreciative of the action taken by Congressman Hillis and yourself in introducing the Mobile Source Clean Air Act Amendments of 1981 (H.R. 4400). This legislation represents a careful and thoughtful modification of the current law. It continues efforts to secure proper environmental conditions while at the same time reducing the cost of any changes to both the manufacturers and users of motor vehicles. There are further refinements to the basic Act which are important to the heavy duty truck in-dustry, however, we support H.R. 4400 and stand ready to be of any assistance you might desire

We at Mack are most grateful for the leadership that you and Congressman Hillis have taken in sponsoring this legislation.

Most sincerely

A. W. PELLETIER. Chairman and Chief Executive Officer.

MOTOR VEHICLE MANUFACTURERS ASSOCIATION OF THE UNITED STATES, INC.

Washington, D.C.

Hon. Bob TRAXLER, House of Representatives, Washington, D.C. Hon. ELWOOD HILLIS, House of Representatives, Washington, D.C.

DEAR CONGRESSMEN TRAXLER and HILLIS: Thank you for your letter, wherein you asked the Motor Vehicle Manufacturers Association (MVMA) to review, and hopefully pledge support for, H.R. 4400, the Mobile Source Clean Air Act Amendments of 1981.

MVMA is pleased by the introduction of H.R. 4400. The bill encompasses modifications of the Clean Air Act supported by MVMA and its member companies. These modifications deal with timing and the level of some standards to reflect the most recent air quality data plus other changes that can be properly characterized as "fine tuning" to this important statute.

We feel that passage of H.R. 4400 would make an important contribution to removing some of the unnecessary costs and burdens of motor vehicle regulations without jeopardy to our air quality.

It is urgent that Congress act promptly this session to approve these and other necessary changes, such as appropriate changes to stationary source provisions, to the Clean Air Act. The announcement on August 5 of the eleven principles the Administration wishes to see contained in legislation should help in accomplishing passage of a comprehensive bill this year.

We stand ready to assist you in obtaining favorable action on the Bill H.R. 4400 by the House Energy and Commerce Committee in September.

If there is any other assistance we can provide, please feel free to let us know.

Very truly yours,

V. J. Adduct,
President
and Chief Executive Officer.

NATIONAL AUTOMOBILE DEALERS ASSOCIATION, McLean, Va.

Hon. Bob Traxler, House of Representatives, Washington, D.C.

DEAR CONGRESSMAN TRAXLER: At the outset, NADA applauds your introduction with Mr. Hillis of H.R. 4400. Expeditious passage of this legislation is imperative if the cost savings necessary to help spur the industry's recovery are to be realized.

NADA has traditionally worked closely with the automobile manufacturers in trying to establish emissions standards that are cost-effective while at the same time provide the desired air quality improvements. We believe the concepts embodied in H.R. 4400 satisfy these goals and we will be actively seeking the passage of your bill.

As you are probably aware, NADA was directly involved in formulating the provisions allowing for a study by EPA of model availability for high altitude dealers, if requested. Inasmuch as little real world experience relative to the effects of the 1982 high altitude standards is available, hopefully this provision will suffice in preventing the model availability and related problems which occurred in 1977. If, however, it becomes apparent during model year 1982 that the problems of the past are resurfacing, we may be compelled to pursue another course of action in regard to this provision.

Again, NADA sincerely appreciates your efforts in helping to pass legislation so critical to our industry's needs. We look forward to working with you in this endeavor and if there is any further information we can provide at this time, please feel free to contact

Sincerely.

H. Thomas Greene, Executive Director of Legislative Affairs.

> Paccar, Inc., Bellevue, Wash.

Hon. Bob Traxler, House of Representatives,

Washington, D.C.
DEAR MR. TRAXLER: On behalf of Paccar
Inc. we thank you for proposing H.R. 4400,
The Mobile Source Clean Air Act Amendments.

We intend to urge passage of this legislation by the House Energy and Commerce Committee and by the Congress and will be contacting our legislators in that regards. Sincerely yours,

ROBERT W. DICKEY, Vice President and General Counsel.

Volkswagen of America, Inc., Warren, Mich.

Hon. Bob Traxler, House of Representatives, Washington, D.C.

DEAR CONGRESSMAN TRAXLER: Thank you for your letter regarding H.R. 4400. We commend you for your leadership in sponsoring this important legislation.

Volkswagen of America (VWoA) is totally committed to supporting this vital measure. We urge you to encourage your colleagues to take action on the bill this year. We must know as soon as possible if the more reasonable and justified standards of 7.0 grams per mile CO and 2.0 grams per mile NOx will be in effect for 1983 model year inasmuch as our certification process for that model year will begin very early in 1982.

Prompt passage of the "Study and Development of Alternative Emissions Control" provisions of H.R. 4400 (new Section 218 of the Clean Air Act) is of utmost importance to VWoA since the language you have proposed will necessitate a second round of Congressional action once EPA completes its one-year study and reports to the Congress. We want to see a revised, more realistic emissions compliance program implemented as soon as possible, not several years from now

from now.

Our Washington office, headed by Mr. Philip A. Hutchinson, Jr., Vice President of Industry-Government Relations, has been directed by me to make every effort in campaigning for urgent action on this bill. Our Vice President for Engineering, Mr. Duane F. Miller, is fully prepared to testify in House Committee and Subcommittee hearings in support of the technical aspects of HR. 4400

H.R. 4400 is the cornerstone of important and much needed revisions to the Clean Air Act. Enactment of the bill will assure more efficient use of the auto industry's scarce resources while continuing our progress toward improved air quality. We hope the Congress will consider the bill without delay.

Sincerely,

JAMES W. McLERNON, Office of the President.

AZIRIAN FAMILY REUNION

HON. GEORGE E. DANIELSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

. Mr. DANIELSON. Mr. Speaker, it was 65 years ago, in 1915-16, that the Armenian people in their ancestral homeland suffered a series of massacres and deportations at the hands of the Ottoman Turkish Empire which nearly annihilated them as a national entity. Those who managed to survive, fled in terror seeking shelter in any country which would provide them with asylum and some degree of stability. Parents were often wrenched apart from their children; brothers and sisters frequently settled in different lands unaware of the fate of their relatives. Many times circumstances made it impossible for those families to reunite.

One of these families, the Azirian family of Sis, Western Armenia, at present occupied by Turkey, is planning a reunion in southern California during the month of August. They have planned a series of events to bring together the descendants of the original family, who were scattered due to the massacres and deportations of 1915-16. This will enable relatives who have never seen each other to become acquainted and those who parted as small children can once again share a portion of each other's lives.

The Azirian family, in its quest for survival, was scattered to every continent in the world. Seven years ago, Hagop and Marilyn Arshagouni of southern California began to research the family history and to compile information to prepare a family tree. After extensive and dedicated hard work, their family tree has developed into a 12-foot document that stretches back 10 generations, to the year 1700, an astonishing accomplishment considering that most Armenian records were destroyed in the genocide of 1915.

Two years ago, encouraged by the enthusiasm that was engendered by the process of preparing the family tree, the Arshagounis and a number of cousins formed the Azirian Family Reunion Committee to organize the reunion, which will be highlighted by a gala banquet in the month of August.

It is with great pride that I bring this historic event to the attention of my colleagues. This outstanding effort on behalf of the Arshagouni and Azirian family members to reunite typifies the will of the Armenian people to survive as a nation.

THE AGING WORLD WAR II VETERAN

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. BIAGGI. Mr. Speaker, as an original member of the House Select Committee on Aging and chairman of its Subcommittee on Human Services, I have a profound interest in the aging World War II veteran. The average age of the World War II veteran today is 60 years old. The Veterans' Administration, as the agency which serves all veterans, will soon be faced with a substantially large senior citizen population and will have to deal with such pressing matters as how institutions can afford to accommodate such a large group.

There are over 2.000 World War II veterans who are 65 years of age or older and over 10,000 World War II veterans will be 65 years of age. In 10 years, about 7,000 World War II veterans will be 65 years of age or older and in about 20 years, practically all World War II veterans will be 65 years of age or older. Seen by these statistics, the Veterans' Administration will be forced to look at the question of how to physically and financially provide benefits guaranteed to veterans by title 38 of the United States Code. Those benefits crucial to the livelihood of the elderly are pensions for income maintenance of veterans and survivors; hospital, medical, dental, and outpatient care; nursing home

Institutional strains, specifically on hospitals and nursing homes, will be prominent as more and more World War II veterans reach 65 years old. All veterans over age 65 are eligible for free hospital and nursing home care from the Veterans' Administration, regardless of their ability to pay. Certain general admission priorities do exist, but eligibility is based on discharge or release from the active military service under conditions other than dishonorable. The Veterans' Administration current hospital capacity is about 85,000 beds. Statistics show that by the year 2000 there will be a need for 120,000 hospital beds as a result of aging World War II veterans. As for nursing home care, 20 years from now the demand for VA-supported nursing home beds will triple from 20,000 to nearly 60,000.

Not only will there be a physical strain on hospitals and nursing homes due to the lack of space available, but more importantly there will be a tremendous financial strain. The Veteran's Administration contributes much less in its participatory programs for the use of other medical care facilities than it does for its own facilities. A comparison between VA medical care operating costs and other medical care operating costs, as of fiscal year 1979, leads us to the conclusion that VA medical care costs are a great deal more expensive than other medical care costs. The VA hospitals operating costs are \$3,410,449,000; while, the contract hospitals are \$64,812,000 and State home hospitals are \$5.098,000. Therefore, operating costs for VA hospitals are \$3,345,637,000 more expensive than operating costs contract hospitals \$3,405,351,000 more expensive than operating costs for State home hospi-

This same conclusion also holds true for VA nursing homes. The VA nurshomes operating costs are \$185,965,000; while, the community nursing homes are \$98,692,000 and the State nursing homes are \$19,787,000. Therefore, operating costs for VA nursing homes are \$87,273,000 more expensive than operating costs for community nursing homes \$166,178,000 more expensive than operating costs for State nursing homes. Finally, the Veterans' Administration, as of fiscal year 1980, pays only about \$11.10 per day for each veteran in a State-operated nursing home and \$36.97 to community homes. Its own nursing home care cost is \$72.33 per day. It must be understood that this high cost of VA facilities reflects the total cost of care, not just a payment into a participatory program with a community or State facility. This total cost includes VA nursing homes high

care; domiciliary care; and burial bene-salaries and sophisticated medical

One possible solution to how the Veterans' Administration will be able to provide for veterans based on such phenomenal costs is to increase eligibility requirements of veterans. This would have the adverse effect of limiting the number of veterans who would be able to receive benefits. Another possible solution is to merge veterans services with other benefit programs, which would force veterans to give up some of their independence and compromise on some of their benefits. A possible compromise would be the use of community and State facilities instead of VA facilities, since the Veterans' Administration pays less for the use of these other facilities.

The future welfare of veterans has always been of great concern to those in the House and in the Senate, H.R. 1100-which I supported-has been passed by both the House and the Senate as of July 30, 1981. H.R. 1100 expands the eligibility of former prisoners of war for certain benefits and health-care services provided by the Veterans' Administration. This legislation is important in that it assures former POW's of compensation and health-care benefits for certain disabilities which were attributed to their internment. In a study by the Veterans' Administration, it was shown that mental disorders are one of the most common disabilities affecting former prisoners of war. It is often many years after incarceration that these disorders become visible. H.R. 1100 recognizes the need for certain disabilities to be considered service-connected so that help can be administered to those veterans who were prisoners of war. H.R. 1100 will have a direct influence upon aging World War II veterans, who will be able to obtain the proper care for the residual effects of their period of captivity.

The Veterans' Administration in October 1977 provided the Congress with a report on the short- and long-range plans of the Administrator. This report was in response to Public Law 94-581, section 117(a), and directed the Chief Medical Director, through the Administrator of Veterans' Affairs, to submit a report on VA programs and plans for meeting the problems generated by the increasing numbers of aging veterans. It is this report which must be analyzed when making decisions on the future of the future of the World War II veteran. I hope I have brought to the attention of my colleagues an awareness of the crucial questions we must deal with in the very near future.

REMEMBERING JOHN BARRY

HON. THOMAS P. O'NEILL, JR.

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. O'NEILL. Mr. Speaker, I rise to give support to Senate Joint Resolution 87 commemorating the birthday of Commodore John Barry, designating September 13 as "Commodore John Barry Day." In an age where we are seeking out new heroes, Commodore Barry stands out as an example of heroic achievement. The first man commissioned by the United States Navy, he showed great valor in the Revolutionary War, and later in the war with France. George Washington, when issuing Commodore Barry's commission, commented on his "patriotism, valor, fidelity, and abilities. . . .

But to Irish-Americans, John Barry holds a special significance, because he was born in County Wexford, Ireland. Fighting the poverty of his youth in Ireland, he beat the odds to become one of the founding fathers of the American Navy. It is important that we continue to remember Commodore Barry's achievements both as an American and as an Irishman. While Ireland is struggling to find a just solution to its present troubles, the memory of John Barry can serve as an inspiration of what men can do in the most difficult of times. The commodore also reminds all Americans of the positive contribution the Irish have made throughout American history. Finally, John Barry is a symbol of the patriotism and strength on which this country was founded.

SMALL BUSINESS TAX RELIEF-THE MESSAGE IS STARTING TO GET THROUGH

HON. DAN MARRIOTT

OF UTAH

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

Mr. MARRIOTT. Mr. Speaker, I believe it would be appropriate to inform this House, as well as many interested small enterprises in Utah, about the development of the 1981 tax bill and. particularly, its small business provi-

PRESIDENT'S PACKAGE IS HISTORIC

President Reagan has given us historic tax legislation. The size and scope of the individual tax reductions and depreciation reforms in the Economic Recovery Tax Act of 1981 are unprecedented. The business portion of the program gives America a real hope and solid opportunity for revitalizing our heavy industry.

I fully supported both the business and personal aspects of the President's plan.

EXCELLENT PROVISIONS ADDED BY THE CONGRESS

There were also some highly desirable provisions of the final legislation that originated in the Congress. In my opinion, the indexing of personal taxes proposed by Mr. Dole and Mr. Armstrong in the Senate, and Mr. Archer and Mr. Gradison in the House, will be a key part of our tax policy by assuring that the effects of the 25-percent across-the-board tax cuts over the next 3 years are not wiped out by inflation.

The Senators from Wyoming and Virginia, Mr. Wallop and Mr. Byrd, also were instrumental in developing the fine estate tax reforms that were accepted into the final bill. The gradual increase of the Federal estate tax exclusion from \$175,600 to \$600,000, the corresponding reduction of maximum rates from 70 percent to 50 percent, and the free transfer of all property to a surviving spouse under Federal law will be highly valuable in preserving the continuity of family farms,

ranches, and small businesses.

HOUSE SEEKS HELP FOR SMALL BUSINESS
A number of us in the House raised our voices in behalf of giving specific recognition and support to the crucial small business element of our producing economy.

Small business accounts for the vast majority of all net new jobs in the pri-Treasury Secretary sector. Donald Regan puts the figure at 85 percent. The National Small Business Association's estimate is closer to 95 percent. From 1969 to 1976, 9 million new jobs were created, but NSB points out that employment among the Nation's 1,000 largest corporations accounted for only about 45,000 (5 percent) of the net new jobs. Three million of those jobs were in State government; the remainder, or nearly 6 million, were in small businesses, according to the Small Business Administration.

From SBA statistics, we know that small business provides 55 percent of all nonfarm employment—59 percent if farming is included—50 percent of all new technical innovations, 48 percent of domestic output and 43 percent of the gross national product.

In addition, small business owners and their families play an active role in the stability of their towns and cities through the continuity of their businesses and by working in their churches, charities, and other volunteer activities.

UTAH IS A SMALL BUSINESS STATE

I grew up in such a small business community in my own State of Utah and have witnessed these things, as I am sure many of my colleagues have.

It is no accident that Utah is the "Beehive State." Our commerce was

built by hardworking small and family enterprises; there are few large corporations to this day. The industry of these firms reflects the State's pioneer heritage. Our citizenry is proud of this tradition and supports local, State, and regional business.

A recent development in our business community is the increasing interest and activity in government matters through a variety of small business organizations, such as the Salt Lake Area Chamber of Commerce, on a metropolitan level; the Utah Council of Small Business, statewide; the Mountain States Association; a regional group made up of small and independent business organizations in eight Rocky Mountain States stretching from Canada to Mexico; and the National Small Business Association, National Federation of Independent Business, and Small Business Unity Council, which are national in scope.

It has been my pleasure to work closely with all of these organizations in constructing the small business elements of the 1981 tax bill.

Utah is particularly fortunate to have within its borders such resources as Blair Walkington, director of economic development of the Salt Lake Area Chamber and David Tomlinson, who is not only a strong president of the Utah Small Business Council, but also national president of the Small Business Unity Council.

The Utah State Council, with a membership approaching 7,000, must be one of the fastest growing small business groups in the country. It has been very active in supporting the free enterprise thrust of President Reagan's program and advocating specific amendments to assist specified elements of the small business community, such as modest corporate rate reductions to help the less capital-intensive companies, expensing, estate tax reductions, and other capital formation measures.

There is also a natural tie-in of this program with the recommendations of the Small Business Unity Council, which is composed of representatives from every State delegation to the White House Conference on Small Business of January 1980.

Mr. Tomlinson tells me that 25,000 small business owners and operators across the country participated in 57 preliminary regional and State conferences. They balloted to select 2,000 delegates who hammered out the final recommendations at the 4-day meeting in Washington, D.C.

These recommendations extended across the spectrum of small business problems, including taxes, capital formation, regulatory reform, access to justice and international trade. However, 5 out of the top 10 had to do with taxes and capital formation. The No. 1 recommendation by a wide margin was corporate and individual

rate reductions and No. 2 was depreciation reform, including direct first year expensing. No. 4 was estate tax reform. These groups also brought to attention that small firms in Utah, and nationally, are seriously threatened by the combination of long-term inflation, high interest rates, and a bias against small business of current tax laws.

The broad based support and advocacy of these issues by Utah groups has been a definite factor in my own interest in these matters, and my resolve to do something about them if the occasion arose.

The 1981 tax proposal—the largest tax reduction bill in U.S. history—provided such an opportunity.

SMALL BUSINESS COMMITTEE HEARINGS GATHER INFORMATION

In order to assemble the facts and figures necessary for legislative recommendations the Subcommittee on Tax, Access to Equity Capital and Business Opportunities of the House Small Business Committee, of which I am ranking minority member, began to hold a series of hearings on the impact of President's tax proposals on small business.

During this hearing, I was particularly impressed with the testimony of the National Small Business Association; a general membership organization with about 50,000 members nationwide.

The NSB presented a carefully worked-out series of recommendations aimed at balanced assistance to all business, but especially to the various elements of the small business community.

Their 16 suggestions included: corporate rate reductions up to \$200,000, direct expensing of the first \$25,000 of equipment purchases, increase in the investment credit for used machinery to at least \$250,000, increasing the estate tax exclusion of \$600,000, expanding the rehabilitation credit for existing buildings, savings incentives targeted to help construction and other local businesses, restoration of stock options, reform of inventory accounting rules, and broadening of the jobs tax credit.

A feature of the NSB program that I especially liked was fiscal responsibility—it proposed revenue savings that matched its tax reduction proposals. These savings provisions were accepted by the House, the Senate, and the administration, saving the Treasury about \$57 billion over 5 years, and making room for many other tax reductions to be enacted.

The NSB also brought into the process the Small Business Legislative Council—a consortium of some 75 trade associations representing over 4 million small businesses that combine to act on legislative matters. While the bill was being drawn up, the SBLC

presented two informational briefings to House Members and staff on a bipartisan basis. At their breakfast meetings tax experts used charts and statistical materials to explain the impact of various proposals on the small business community. My office found these sessions to be very useful.

Equally impressive has been the contribution of the National Federation of Independent Business, an organization made up of over half a million small and independent business owners. Testifying at these same House Small Business Committee hearings, the NFIB outlined a program of tax relief for the small business sector of our economy.

Their program included five major

priorities and seven proposals which they suggested be adopted as soon as possible after the accomplishment of the five. The priorities were: Reducing payroll taxes, depreciation reform, inventory accounting reform, further graduation of corporate income taxes, and estate tax reform.

The seven additional proposals included raising the ceiling on the accumulated earnings penalty, eliminating the ceiling on the investment tax credit for used property, reform of subchapter S corporation rules, savings incentives, captial gains rollover, reducing the maximum individual tax rate from 70 percent to 50 percent, and clarification of the status of independent contractors.

I have been impressed, by testimony before our subcommittee, that the NSB, the NFIB, and other small business advocacy groups agree, to a large extent, on the steps necessary to provide meaningful tax relief for America's small businesses. Experience has clearly demonstrated that, when these groups work together, a great deal can be accomplished on behalf of this most important sector of our economy.

M'DADE-MARRIOTT BILL INTRODUCED

Armed with the best expertise we could obtain from witnesses, associations, and others, the ranking Republican member of the Small Business Committee, Mr. McDade, of Pennsylvania, and I put together a small business tax bill containing the initiatives that we considered to be most important and most achievable in behalf of small business, commercial, and agricultural firms.

On April 9, 1981, I introduced H.R. 3202 with 16 cosponsors-it now has 37 cosponsors. It was an 11-section proposal with the following provisions: A definition of small business limited to \$20 million in revenues and 500 employees; a further graduation of the corporate tax rates below \$200,000; direct expensing of \$25,000 of equipment purchases annually; an increase in the number of permissible subchapter S shareholders to 25; a \$20,000 credit for investment in small businesses; an increase in the capital gain exclusion from 60 percent to 80 percent; reduction of the capital gain rate for corporations from 28 percent to 20 percent; an estate tax exclusion of \$2 million on business property; a tenfold increase in the interest and dividend exclusion in order to stimulate savings and investment; reform of inventory accounting procedures; increase in the ceiling on the investment tax credit for used machinery from \$100,000 to \$300,000.

URGING OTHERS TO ACCEPT THE BILL

I then appeared as a witness before the Ways and Means Committee to explain the provisions and argue that they should be a vital element of any tax bill.

It was my contention that a bill that focused upon the supply side of our economy must include equitable assistance to the small business community, which constitutes such a significant

part of that supply side.

In addition, on July 24, I and 12 more of my Republican colleagues (McDade, Snowe, Lyle Williams, Dan CRANE, JIM HANSEN, CRAIG, ERDAHL, ROTH, DAUB, CHRIS SMITH, VIN WEBER, and ALBERT LEE SMITH), wrote to the President to point out the advantages of such a package as part of the tax bill and as a benefit to our economy. In addition to a number of the proposals in H.R. 3202, we added a suggestion that we raise the ceiling on the accumulated earnings penalty.

The five suggestions we made in that letter were included, in some form, in the final version of Conable-Hance.

Then, on the eve of the key July 29 vote in the House of Representatives, I circulated a letter to all House Members urging them to vote for the Conable-Hance bill, which by then had been expanded to include these small business concepts and indexing.

MANY IDEAS FROM H.R. 3202 ACCEPTED IN FINAL LEGISLATION

Now that the bill has been signed, I can report that, of the 11 proposals in our April bill, 8 were accepted to some extent in the public law signed by the President on August 13.

These included increased corporate rate graduation to \$50,000; inauguration of direct expensing at a level of \$5,000 in 1982 rising to \$10,000 in 1986; subchapter S shareholder limit raised to 25; reduction of capital gains rates; increase in estate tax exclusionsphased up to \$600,000; savings incentives; inventory reforms.

Although we advocated higher levels for many of these benefits, I believe we are entitled to record these results as an excellent beginning. As the economy turns strongly upward, I believe we should further broaden these small business provisions.

HELPING SMALL BUSINESS WILL BOOST ENTIRE ECONOMY

It is my opinion that the eight provisions we enacted will provide support for the important small enterprise segment of our economy. It should encourage investment and retention of funds in small business to offset some of the tax biases now affecting small business. By addressing these problems it will be possible to harness the true potential of the small business community for creating jobs, innovations, and enterprises that will ultimately provide a significant share of the real foundation for economic growth and opportunity in Utah and throughout the Nation.

LESSON OF THE HOLOCAUST

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. KEMP. Mr. Speaker, April ushered in the first annual Days of Remembrance Commemoration sored by the U.S. Holocaust Memorial Council under the chairmanship of Elie Weisel. Mr. Weisel is also active in trying to secure the release of dissidents from the Soviet Union, but at this April reflection, attended by President Reagan, he addressed his remarks to the importance of keeping alive the lesson learned in the holo-

REMEMBERING THE HOLOCAUST

Mr. President, about sadness later. First some words of gratitude. We thank you, Mr. President, for joining us and for participating in this solemn assembly of remembrance. Your presence here today-so soon after the senseless attack upon your person-is a tribute to your understanding and concern for human values-and is especially meaningful to us. We all know that your being here is not a ceremonial gesture, but an expression of your sense of history and your dream of a future with hope and dignity for the American Nation and for all mankind. So we thank you, Mr. President, an we thank our father in heaven for having spared you.

And now I would like to share with you some lines written by a young Jewish boy named Mottele.

Mottele wrote this poem in Therestenstadt and it reflects more than his own mood-more than his own fate:

From tomorrow on I shall be sad. From tomorrow on.

Not today. What is the use of sadness-tell me? Because these evil winds begin to blow? Why should I grieve for tomorrow-today?

Tomorrow may be good, Tomorrow the Sun may shine for us again; We shall no longer need to be sad.

From tomorrow on I shall be sad-From tomorrow on.

Not today, no! Today I will be glad. And every day, no matter how bitter it may

I will say: From tomorrow on I shall be sad-

Not today. How does one commemorate a million Motteles and Shloimeles and Leahles and Soreles?

How does one commemorate six million victims, all descendants of Abraham and Isaac and Jacob?

What words does one use, what metaphors does one invoke to describe the brutal and unprecedented extinction of a world?

Thousands and thousands of flourishing communities survived the fury of the crusades, the hatred of pogroms, the afflictions of wars, and the misery, the shame, the depair of religious and social oppressions, only to be swept away by the holocaust.

In all their chronicles and testaments, memoirs and prayers, litanies and poems, the victims stressed one single theme over and over again:

Remember, remember and bear witness... and that is their legacy to us, the living. There may be some who will ask: Why remember at all? Why not allow the dead to bury the dead? Is it not in man's nature to push aside memories that hurt and disturb? The more cruel the wound, the greater the effort to cover it; the more horrifying the nightmare, the more powerful the desire to exorcise it. Why then would anyone choose to cling to unbearable recollections of emaciated corpses, of violations of every human law?

Clearly, we have not yet learned to cope with the event—intellectually, socially, philosophically, theologically. Perhaps we never will. The more we know, the less we understand. All we can do is remember. But—how does one remember? How does one remember and communicate an event filled with so much darkness and mystery that it negates language and imagination? Auschwitz transcends history, marks it with a burning seal: Our century, Mr. President, may well be remembered not only for the monuments it erected or for the astonishing technological advances it made, but most of all for Treblinka and Majdanek, Belsen and Ponar, Auschwitz and Buchenwald.

How is one to explain what happened? it could have been stopped—or, at least slowed down—at various stages. It was not. Why not? I am a teacher, Mr. President, and my students—young, fervent, compassionate Americans—often express their puzzlement in my classroom: Why the complacency? Why the tacit acquiescence? Why weren't the Hungarian Jews, for example, warned about their fate? When they arrived in Auschwitz—at midnight—they mistook it for a peaceful village . . Why weren't the railways to Birkenau bombed by either the allies or the Russians?

The calculated viciousness of the executioner, the helplessness of the doomed, the passivity of the bystanders: All these lie beyond our comprehension. The killers' fascination with death, the victims' with hope, the survivors' with memory: A new vocabulary needs to be invented to describe the event.

Can you imagine the silence preceding a selection? The fear of a man who suddenly understands that he is the last of his family, the last of a line?

Imagine—no, no one can imagine that kingdom. Only those who were there know what it meant to be there . . . Theirs was a kingdom that will forever remain forbidden and forbidding. And yet, and yet: We must tell the tale—we must bear witness. Not to do so would mean to render meaningless the years—the lives—that we, those of us who survived, received as a gift, as an offering—to be shared and redeemed.

We are determined to tell the tale. Not to divide people but, on the contrary, to bring them together; not to inflict more suffering

but, on the contrary, to diminish it; not to humiliate anyone but, on the contrary, to teach others to humiliate no one. This is why we bear witness, Mr. President. Not for the sake of the dead: It is too late for the dead. Not even for our own sake: It may be too late for us as well. We speak for the sake of mankind: The universality of the Jewish tragedy lies in its uniqueness. Only the memory of what was done to the Jewish people—and through it to others—can save the world from indifference to the ultimate dangers that threaten its very existence.

That the survivors have not lost their sanity, their faith in God or in man, that they decided to build on ruins and chose generosity instead of anger, hope instead of despair, is a mystery even to us they had every reason to give up on life and its prom-They did not. Still-at times, Mr. President, they are overcome by doubt. And fear. The world has not learned its lesson. Antisemitic groups spring up and some shamelessly deny that the holocaust ever occurred. Fascist groups increase their membership. Intolerance. Bigotry. Fanaticism. Mass executions in some places, mass starvation in others. Religious wars, medieval upheavals. And then of course, the ultimate nightmare: The nuclear menace.

Though Jewish—profoundly Jewish in nature—the holocaust has universal implications: the memory of what was done to one people may shield other peoples.

Naturally, other nations were persecuted and even decimated by the nazis and their allies, and their collaborators—and we honor their memory—but the Jewish people represented a different target: for the first time in history, being became a crime: Jews were destined for annihilation not because of what they said or proclaimed, or did, or possessed, or created, but because of who they were . . .

Is that why we, Jews, are so concerned with memory?

Is that why we are so attached to a land where many survivors have found pride and refuge? Please understand us, Mr. President, we believe that the holocaust must remain above politics. If we plead for Israel's right not only to be secure but also to feel secure, it is because of Israel's nightmares—which are also our nightmares—Israel is today threatened by a holy war—which means: "Total war and annihilation." Words? Yes. Words, but we are a generation traumatized by experience, Mr. President: We take wars seriously. The very idea of another Jewish catastrophe—anywhere—in our lifetime, is quite simply unbearable to us.

Before planning the final solution, Hitler asked: "Who remembers the Armenians?" He was right: No one remembered them as no one remembered the Jews.

In those times, European Jewry felt abandoned. And, indeed, it was abandoned. Other oppressed nations received help; not the Jews. On April 16, 1943, Mordechai Anielevits—the young Commander of the Warsaw ghetto uprising, wrote to a friend: "We are fighting... we shall not surrender... but, as our last days are approaching,

remember that we have been betrayed . . ."
That is what he felt—that is what we all felt. They were betrayed then. To forget them now, would mean to betray them

again. We must not allow this to happen. In the Jewish tradition when a person dies we appoint him or her as our emissary in heaven to intercede in our behalf. Is it possible that they were our messengers?

But then whose messengers are we?

It is with a rare sense of personal honor and pride that I present to you the President of the United States.

PRESIDENT REAGAN IS WRONG ON COURT NOMINEE O'CONNOR

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. McDONALD. Mr. Speaker, an exchange of letters between President Reagan and Mrs. Marie Craven of Illinois was made public recently. The President is supposed to have personally composed his reply to Mrs. Marie Craven. It is sad to record that the President did not have his facts straight and that the tone of the letter was not very Presidential. In the interest of setting the record straight I am today inserting both letters in the Congressional Record, together with some comments and the facts as I understand them.

First of all, the person referred to in the second paragraph of the President's letter is Dr. Carolyn Gertser, a widely respected and admired member of the right-to-life movement, who is considered a moderate in her views. So, one can only wonder who characterizes her in the manner described by the President.

Second, the President's letter leaves a great deal unsaid. He discusses only one vote. On this one vote he is in error. The bill in question passed both bodies of the Arizona Legislature, was signed into law by the Governor and survived a challenge in the Arizona Supreme Court.

Third, the record shows that Mrs. O'Connor voted in 1970 for legislation that would legalize abortion on demand 3 years before the Supreme Court decided the issue. In 1973, she supported and cosponsored a family-planning bill that would allow abortions for minors without parental consent. In 1974 she voted against a bill that would memorialize the Congress to constitutionally protect the unborn.

So, as the noted Washington columnist John Lofton has said:

The President's letter has left the air even more polluted and raises more questions than it answers.

The exchange of letters follows:

JULY 7, 1981.

Dear President Reagan, a number of prolife people are planning on picketing you at your departure point tonight to protest your confirmed appointment of Judge O'Connor from Arizona for the office of Supreme Court Justice.

Instead of participating in this protest, I have decided to write this letter.

I have been an active pro-lifer since April of 1973. I have served and am serving on Boards of Directors of local pro-life groups, have served as Chairman of Ill. Citizens Concerned for Life and have contributed too many valuable hours away from family and small children to let what you have

done today go unnoticed.

I have both anger, resentment and frustration pent up in me at this moment because I sincerely feel you have betrayed me and millions of Americans including over 8 million pre-born babies that will continue to be aborted every 30 seconds simply because they are a simple inconvenience to so many of our country's women.

I am a Chicago resident of Irish Catholic heritage and up until my involvement in pro-life a committed democrat. I worked for your election, along with countless others, distributing your campaign literature, making phone calls organizing blitzes, etc. etc. I don't want credit for any of this, I just want you to know that at this precise moment, I know that the power of the office has taken precedence over your party platform and campaign promises. I feel I am a grassroots citizen—and I am sickened by witnessing once again the broken promises of the politician.

When you were shot, I prayed for your swift recovery. I continue to pray for you daily that your judgements will be wise ones. Today I am having difficulty believing that you meant the words of a letter you sent to the National Right to Life Convention on June 18, 1981 . . "I share your hope that someday soon our laws will reaffirm this principle. (that abortion is the taking of human life). We've worked together for a long time now, and like you, I am hopeful that we will soon see a solution to

this difficult problem."

By this appointment, you have betrayed the pro-life position. Judge Sandra O'Connor has supported pro-abortion legislation when she was an Arizona legislator. How then can this appointment bring us closer to our goal of protecting the pro-born children of America?

I only hope that the U.S. Senate rejects your appointment. Maybe this is your ultimate goal—your appointment of a woman to satisfy the pro-choice feminists—followed by rejection of her appointment by the Senate and an alternate candidate appointed to satisfy all factions.

I hope for the sake of our nations most vital resource, our children, I am right. Sincerely,

MRS. MARIE CRAVEN.

THE WHITE HOUSE, Washington, August 3, 1981.

Mrs. Marie Craven,

DEAR MRS. CRAVEN: I'm sorry to be so long in responding to your letter, but I've found in all the channels of government, it often takes a while for letters such as yours to get through the mail department and over to my desk. So forgive me for that. I thank you for writing and appreciate the opportunity to comment with regard to my Supreme Court appointment and my position on abortion.

I believe that most of the talk about my appointment was stirred up principally by one person in Arizona. I have done a great deal of checking on this and have found this person has something of a record of being vindictive. I have not changed my position; I do not think I have broken my pledge. Mrs. O'Connor has assured me of her personal abhorrence for abortion. She has explained, as her attacker did not explain, the so-called vote against preventing university hospitals in Arizona from performing abortions.

What actually happened occurred back when she was a senator in the state government. A bill had been passed by the Senate and sent over to the House calling for some rebuilding of the football stadium at the university. The House added an amendment which would have prevented the university hospitals from performing abortions. But the constitution of Arizona makes it plain that any amendment must deal with the subject in the original bill or it is illegal. For this reason the Senate, including Mrs. O'Connor, turned that down.

Much is being made now of her not coming out with flat declarations regarding what she might do in the future. But let me point out it is impossible for her to do this because such statements could then be used to disqualify her in future cases coming before the Supreme Court. She is simply observing a legal protocol that is imposed on anyone who is in the process of a judicial appointment. I have every confidence in her and now want you to know my own position.

I still believe that an unborn child is a human being and that the only way that unborn child's life can be taken is in the context of our long tradition of self-defense, meaning that, yes, an expectant mother can protect her own life against even her own unborn child, but we cannot have abortion on demand or whim or because we think the child is going to be less than perfect.

I thank you for your prayers in my behalf and for your support. I hope that I have cleared the air on this subject now because I would like to feel that I did have your continued approval.

Thanks again. Sincerely,

RONALD REAGAN.

SUPPORT FOR THE ARTS MUST CONTINUE

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. BIAGGI. Mr. Speaker, despite the current national sentiment for reduced Government spending, there remains one area of Federal expenditures that continues to receive strong, bipartisan support from all sectors of our society—the arts.

As an original cosponsor last year of legislation to extend the National Endowments for the Arts and Humanities and the Institute of Museum Service, I remain actively involved in efforts to preserve these vital agencies. Last month, with my strong support, the House passed the 1982 appropriations bill for these agencies which included \$157.5 million for the Arts Endowment, \$144 for the Humanities Endowment and \$14.4 million for the Museum Institute. Clearly, there remains a need for continued funding for these agencies which have provided museums, arts agencies, and institutions the ability to bring culture and enlightened learning to millions of Americans.

For the benefit of my colleagues, I would like to include in the RECORD a copy of an article written by Martin E. Segal, chairman of Lincoln Center for the Performing Arts in my own city of

New York, for a recent edition of Newsweek. His comments on the importance of continued support for creativity and scholarship are compelling. Particularly important are his observations on the impact of reduced taxes upon charitable contributions to the arts. I am confident that Congress will continue to provide support for American art and scholarship, echoing Mr. Segal's view that this support is vital to the well-being of our Nation.

[From Newsweek magazine, August 1981]

Don't Cut the Arts (By Martin E. Segal)

Most Americans favor the stated purposes of the President's domestic program—lower taxes, a balanced Federal budget, reduced inflation, a stronger economy with fuller employment and more savings—all of which will, it is hoped, result in a generally better life for all.

The Administration is entitled to the fullest opportunity to demonstrate that its recommended legislation and appropriations will indeed achieve these goals. However, the proposal for cutting appropriations for the arts and humanities via the National Endowments (NEW and NEH) may not meet the Administration's intentions:

Lower taxes for individuals and estates indirectly hurt the arts and humanities, as well as other nonprofit organizations, and will be a disincentive to individuals to increase contributions. Ticket income from concerts, ballet, opera and other nonprofit arts covers, on the average, 65 percent of the cost. Admission contributions at museums cover close to 40 percent of the cost. To enable ticket prices to remain at reasonable levels, the difference is made up by voluntary contributions from individuals, corporations and foundations; from government appropriations—Federal, state and city—and from endowment income and bequests.

Most of the money contributed to arts and humanities organizations comes from individuals; the cost of a \$1,000 contribution to a person in a 50 percent tax bracket is only \$500 net, and the cost of that same contribution to a person in a 70 percent tax bracket is \$300 net. When tax rates are reduced, there will be little incentive to pass on some of the savings to nonprofit arts and other organizations.

At present, an estate may be taxable if it amounts to more than \$175,000. Charitable contributions are deductible from the taxable estate. If the first \$600,000 of an estate is exempt from taxes, any charitable/arts contribution from estates less than \$600,000—and 99 percent of estates are in this category—would give the individuals no estate-tax advantage.

Business cannot make up what the Federal government cuts. It is true that many businesses do not now contribute anything to the arts and should be encouraged to do so. What isn't generally known is that contributions from business have grown most impressively during the past decade. This is due not only to the recognition of the useful role of the arts in our society, but also because inflation has hit the arts particularly hard and government support has not been nearly enough. Business has often taken the lead from government, matching government grants in the arts and humanities either on a one-to-one basis or, in the case of the successful Challenge Grant program, on a three-to-one basis. But business

support is and should be voluntary. After all, business already pays taxes to help support government activities.

The healthy state of the arts in this country is due largely to a partnership of business, individuals and government. It isn't wise for one partner—government—to declare unilaterally to the others, "You should do more, so as to relieve me—even though I know that will not really help me achieve the other things I want to do."

The proposed cuts will have a meaningless effect on the balancing of the budget. The gross Federal budget in 1981 is \$661 billion. The appropriation for the NEA is \$157.6 million, or 24/1,000 of 1 per cent of the total budget. The appropriation for the NEH is \$154 million, or 23/1,000 of 1 per cent. Thus, the combined budgets for NEA and NEH are 47/1,000 of 1 per cent. So, cuts here are not significant. Say some, if everybody is being cut, so should the arts and humanities. But everybody isn't being cut. The Administration is even proposing increases in appropriations where it believes these necessary or desirable.

Cuts for the arts and humanities will increase unemployment and will adversely affect the economy of many important sections of the nation. Reductions in Federal support will be of grave concern to millions of Americans for whom music, theater, dance and museums are vital ingredients of a better and happier life. The arts and humanities are labor-intensive. Cuts in government support will result in unemployment. Active and interesting cultural activities are prime attractions for tourists to many cities, and tourism is directly related to hotels, restaurants, department stores and other businesses vital to a thriving economy.

Many cities mention cultural activities in their promotional literature to encourage tourists to visit or businesses to come and settle there. Impairing or eliminating cultural activities will have an adverse effect on the entire economy.

If cuts in the appropriations for the National Endowments for the Arts and Humanities can have no real effect on the balancing of the Federal budget; if the proposed tax cuts are disincentives for contributions by individuals; if it's unreasonable to expect business to make up for government cuts; if the arts are economically beneficial, both in and of themselves and in promoting tourism and other industries—returning as they do an estimated \$7 for each dollar spent; if the American people want the arts, as demonstrated by ever-increasing attendance at theaters, museums, concerts, opera and ballet; if business and individuals have in fact been increasing their direct contributions to meet inflationary costs that have not been met by government-if all of these, what should be done? I have two direct and, I believe, constructive recommendations. First, the Federal Government should increase its appropriations for the arts and humanities. Second, when the proposed tax cuts are enacted, amendments to the tax laws should be introduced and passed that would treat charitable contributions in such a way so as not to diminish the present net results for the deductibility of such contributions.

Our Nation will be all the more healthy and vigorous, economically and otherwise, if support for the arts and humanities is increased rather than diminished. VALEDICTORIAN SPEECH OF HUONG THI-THANH LE

HON. BILL CHAPPELL, JR.

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

• Mr. CHAPPELL. Mr. Speaker, today I wish to share with my colleagues the valedictory speech delivered before the graduating class of Forrest High School on June 3, 1981, by a remarkable young lady. Huong Thi-Thanh Le came to this country as a refugee from war-torn Vietnam in 1975. She was born in Saigon, South Vietnam, and attended public and private schools there through the sixth grade. Her father was secretary to the Prime Minister of South Vietnam until becoming a senator in the Vietnamese Legislature. About a week before the fall of Saigon, her father sent Huong and her sister to France to stay with relatives. The remainder of the family escaped Vietnam by boat to the Philippines. They arrived in the United States as refugees in June 1975. Huong and her sister joined the rest of the family in

During a time when refugees have been receiving large amounts of unfavorable publicity due to the recent influx into this country, I feel it is imperative that we recognize those who have outstanding contributions to make to our society. Huong possesses those qualities which have made America the proud melting pot it is today. Her speech exemplifies the greatness of this Nation. Unfortunately, we who are born and raised in this country, often take for granted its most precious gift of freedom. Because there are times when it takes someone who was not born in the United States to show us how fortunate we are, I ask that my colleagues read Huong's speech in hopes it will serve as a reminder of exactly how precious and priceless our freedom really is, and rededicate ourselves to insure that it remains the beacon of hope for oppressed people throughout the world. Huong's valedictorian speech follows:

Almost four hundred years ago the Pilgrims left Holland to escape religious persecution. Forty years later they found their condition unbearable. They hired the Mayflower and emigrated to North America beginning what has become a way of life for the United States.

Later emigrations to this country have come from Ireland, Germany, Poland, and many other countries. Most recently you have received refugees from Cuba and from my country Vietnam. Whenever people have been oppressed, this country has stood ready to help. Americans have died all around the world to defend the freedom of others. I owe my very presence on this stage tonight to you and this wonderful nation. This United States has sacrificed so much to help keep my country free. And when we could no longer prevail against our enemies, you have accepted over one hundred thou-

sand of us to your shores, gave us freedom, gave us a new start, and gave us a new nation. For me, it was here that I found my Lord and Savior. I shall be eternally grateful to you, both for the generosity and for the new future you have given me.

What you have done is no small thing. Had we remained in Vietnam, my family and I would have almost certainly been executed for our position and for our cooperation with the United States during the War. I shall do my very best to be worthy of the love and many kindnesses you have shown to us.

The personal freedom I, and other refugees, have would in no way be possible under communism. Communism throughout the world has a history of bloodshed, terror, oppression, fear, and dictatorship. They have vowed to continue on their chosen path until they dominate the world.

My country was never at peace during any of my childhood there. As a child growing up during a war I longed for peace—peace at any price. Since then, I have learned that you cannot afford to have peace at the expense of freedom. Many of my people thought that way. Now they cannot even eat their meals without fear and it is too late to throw off their oppressors. They, and I, have learned that peace at any price is too high a price. There are some things worth dying for. The freedom you have here is one of those things.

My friends, hold fast to what you have. I have come to appreciate the United States as the greatest nation on earth. She is worthy of your fullest loyalty and greatest sacrifice, treasure her, love her, and defend her.

The price of freedom is never easy. Without vigilance and care, freedom can be easily lost. That must never happen. Patrick Henry put it better than anyone I know, "Is life so dear and peace so sweet as to be purchased at the price of chains and slavery? Forbid it Almighty God. I know not what course others may take, but as for me, give

me liberty, or give me death."

I will always treasure the things you have done to give us freedom, the 300 dollars your government gave us to get started and all the things the First United Methodist Church here in Ocala has done. You helped us find a home, provided food, found us jobs, helped us learn the language, and provided an education for my brother, my sister, and me. While there are many things you worry about in your education system, the training that this country gives is still the best in the world.

Students, we always have the tendency to grow restless under the burden of continued study. We tend to take this country, the resources that we have: the libraries, the books, the teachers, and the schools themselves for granted. We ought not to do that. Our education is the key to our future. It is the foundation on which we will build our lives. We have opportunities now we never could have had before, nor could we have them in any other country in the world. I think that I speak for all of us who are graduating when I express our gratitude to our parents, the teachers, and all of you who have made the school system possible.

Friends, thank you for loving me, and for accepting me. Mom and Dad, thank you for all your sacrifices and all the things you have given so that I can have the bright future that lies before me. Thank you America for standing as a nation of freedom in a world of oppression. Thank you God for giving me the opportunity to live in a free

country which you have so richly blessed. I love you all and may God richly bless you for being the warm, kind, and generous people you are.

CHANGES IN THE SOCIAL SECURITY SYSTEM

HON. SAM GEJDENSON

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 4, 1981

GEJDENSON. Mr. Speaker, soon after Congress reconvenes for its regular session, we in the House of Representatives will begin considering proposals for changes in the social security system.

It is both right and inevitable that Congress take steps to insure the program's solvency. We know that by the end of this decade revenues will be insufficient to cover the commitment of resources. The changes must be made, however, without sacrificing the integrity of the system or the quality of coverage provided to individuals who have paid into the system in good faith.

Last May, President Reagan presented us with a number of proposals which would constitute a major overhaul of social security. I am opposed to President Reagan's plan for two reasons. First, it would impose immediate, severe reductions in the fixed incomes of the retired and the disabled. Although I recognize social security's financial troubles, I do not feel that such drastic hardships are warranted. Second, the President fails to recommend changes of any signficance which would keep the social security system viable for the long term. Instead, he merely attempts to deal with short-range deficits by curtailing critical benefits.

For example, the two groups which would be hit hardest by his plan are those who are planning early retirement in the next several years and those who have disabilities which preclude gainful employment. Workers aged 61 or younger this year who retire early—beginning in 1982—would receive only 55 percent of their regular benefits, and their dependent children would be denied any benefits whatsoever. Statistics show that very few individuals willingly opt for early retirement. Most workers who retire before the age of 65 do so out of medical necessity. I represent a New England district in which many workers spend their lives in physically demanding jobs. For these people, early retirement is hardly a luxury. In the disability insurance program, the President would so severely restrict the eligibility requirements that many elderly, ill workers—especially older would be forced off the rolls. women-

The President's plan would also mean a significant reduction in benefits for everyone who retires after January 1982. Under current law, retirees receive social security checks averaging 41 percent of their last year's earnings. The administration would phasein a 10-percent reduction in the initial benefit level, with corresponding cuts made in the benefits of survivors and

dependents.

In addition, those persons already receiving benefits would see their costof-living adjustment scheduled for July 1982, delayed for 3 months. While this loss may seem minor, it could impose an undue hardship on the retiree who depends on social security for primary retirement income in

the face of high inflation.

Social security is plagued by two inherent flaws. The first is demographic changes which were anticipated at the time of the system's creation, yet which Congress failed to accommodate over the years. In 1950 there were 14 people who worked and paid payroll taxes to support one person drawing a social security check. By 1970, there were four taxpayers to every recipient. The ratio will be less than three-toone by 1985.

The second is that wages determine how much gets paid into the trust funds, because the system is financed through a payroll tax, yet prices determine the funds paid out, because benefits are indexed to the Consumer Price Index. With prices rising at a much higher rate than wages, the formula becomes increasingly distorted.

President Reagan is correct in attempting to confront the system's financial problem forcefully. I feel, however, that his approach is wrong in that he does nothing to address these inherent, chronic ills which threaten

social security's viability.

A national program of workers' insurance tied to payroll deductions is a basic Government service provided by nearly every industrial society. There is no reason, however, to tie revenues completely to the payroll tax. Programs such as medicare and disability insurance could be transferred to general taxes. Medicare payments, for example, are unrelated to prior contributions, and 70 percent of the costs already are financed by general reve-

During the coming debate Congress must also carefully review the benefits provided by social security and determine which ones truly belong in our Nation's system of workers' insurance. There can be no question that we have to review the size of commitment as we plan for the years ahead.

We cannot follow the administration's lead and simply cut payments. Workers have been contributing to social security for over 45 years, doing so in good faith and with the belief that they could depend on a certain level of benefits. The trust funds reflect investment of earned income, and the Federal Government entered into a contract with insureds.

We also cannot look to those currently in the work force and paying into the trust funds for increased revenues. Half the families in the United States pay more social security taxes than income taxes. Clearly, we cannot move the system toward solvency by further straining this regressive, inflexible, and inflationary source of

What Congress must do is make substantial changes which will prepare the system to meet the needs of recipients in the years ahead. Our goal should be to insure the solvency of the trust funds and to lessen the regressive tax burden. These goals can be realized only if we address the shortcomings of the system and update the program to reflect economic and demographic conditions.

Given the central role which social security holds in our Nation's social policy, the issue must be approached with the greatest possible care. I will do all I can to see that the coming changes are effective yet as fair as pos-

SENATE-Wednesday, September 9, 1981

The Senate met at 12 noon, and was called to order by the Honorable Warren Rudman, a Senator from the State of New Hampshire.

PRAYER

The Chaplain, the Reverend Richard C. Halverson, LL.D, D.D., offered the following prayer:

Let us pray.

Gracious Heavenly Father, it is good to be together again. We have missed each other and the separation from friends and peers has generated good memories. We have found ourselves being thankful, even for those who opposed us in the pressure-packed 2 weeks before recess. We realize we need each other and as long as we serve together in the Senate we must be models of the unity the country longs for.

We accept our differences as fundamental to that unit. We are unspeakably grateful for the unique mixture that distinguishes America—for the diversity which binds us together in the rich tapestry of our national life.

We thank Thee for the opportunities we have had during recess for family fun and fellowship, for relaxation and rest, for fruitful contacts with the people we serve. Now as we begin the hard work of implementing past decisions, grant patience, endurance, energy, and wisdom. Help us to grow in our respect and love for one another and for all who compose this large Senate family. In the name of Him who is Brother to all who love God. Amen.

APPOINTMENT OF ACTING PRESI-DENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. Thurmond).

The assistant legislative clerk read the following letter:

U.S. SENATE,

PRESIDENT PRO TEMPORE, Washington, D.C., September 9, 1981. To the Senate:

Under the provisions of rule I, section 3, of the Standing Rules of the Senate, I hereby appoint the Honorable Warren Rudman, a Senator from the State of New Hampshire, to perform the duties of the Chair.

STROM THURMOND, President pro tempore.

Mr. RUDMAN thereupon assumed the chair as Acting President pro tempore.

RECOGNITION OF THE MAJORITY LEADER

The ACTING PRESIDENT pro tempore. Under the previous order, the majority leader is recognized.

Mr. BAKER, Mr. President, I thank the Chair.

PROCEDURAL AGREEMENT

Mr. BAKER. Mr. President, the request I am about to make has been submitted to the distinguished minority leader and

I will put it at this time.

I ask unanimous consent that the reading of the Journal be dispensed with, that no resolutions come over under the rule, that the call of the calendar be dispensed with, that following the time allocated to the two leaders under the standing order and the special orders entered for today that there be a period for the transaction of routine morning business not to exceed 30 minutes in length with Senators permitted to speak for not more than 5 minutes each and during which H.R. 4331 be deemed to have been read a second time and placed on the calendar and that, thereafter, morning business be deemed concluded. RESTORATION OF MINIMUM BENEFITS UNDER THE SOCIAL SECURITY ACT

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object, and I do not intend to object, I ask that the Chair identify H.R. 4331.

The ACTING PRESIDENT pro tempore. The clerk will report.

The legislative clerk read as follows:
A bill (H.R. 4331) to amend the Omnibus
Reconciliation Act of 1981 to restore minimum benefits under the Social Security Act.

Mr. ROBERT C. BYRD. Mr. President, I have no objection.

Mr. BAKER. Mr. President, before the Chair rules, could I inquire of the Chair if the request included that thereafter the morning hour be deemed concluded? Was that the request?

The ACTING PRESIDENT pro tempore. That is the understanding of the

Chair.

Is there objection? Without objection, it is so ordered.

ORDER OF BUSINESS

Mr. BAKER. Mr. President, what is the next order of business?

The ACTING PRESIDENT pro tempore. Under the previous order, the minority leader will be recognized.

Mr. BAKER. Under a special order?

The ACTING PRESIDENT pro tempore. Under the time of the two leaders.

Mr. BAKER. I thank the Chair. Is there not a special order for the recognition of the two leaders?

The ACTING PRESIDENT pro tempore. There is an order following that for the Senator from West Virginia (Mr. ROBERT C. BYRD) to be recognized for not to exceed 15 minutes.

Mr. BAKER. Mr. President, if it is agreeable to the minority leader, I ask unanimous consent that the time under the standing order and the special order be combined in both cases so that the full time allocated to the two leaders may be aggregated.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

LEGISLATIVE WORKLOAD

Mr. BAKER. Mr. President, I had hoped at the time we returned to this session or to this part of this session that we could report that most of the tough work of the Senate had been accomplished, because, indeed, the first part of this session has been a very difficult one. But, Mr. President, I cannot do that.

I return now to report that we have perhaps 3 months ahead of us—September, October, and at least part of November—and in that time we must deal not only with 13 appropriation bills—we have only passed 1 in the Senate—13 through the Senate, through conference, and on the President's desk, and perhaps a continuing resolution, as well, but in addition to that we have a number of other matters that simply must be dealt with in the time remaining to us before the end of this session and before Congress can adjourn sine die.

MILITARY PAY

In examining the list of things that must yet be done, Mr. President, I find that we must deal, for instance, with the military pay issue. And a little later this afternoon I intend to inquire of Members if they are agreeable to a unanimousconsent request that would schedule the military pay bill for this week. I hoped that we might reach it today, but I understand we cannot, for reasons stated by a number of Members. But later this afternoon I intend to propound a unanimous-consent request that we may proceed to the military pay bill at 10:30 a.m. tomorrow, with the assumption that the Senate might convene at 10 a.m. tomorrow.

I would hope, as well, that we might get a time limitation on that bill and a time limitation, as well, on any amendments to the military pay bill.

DEPARTMENT OF INTERIOR APPROPRIATION BILL

In addition to that, Mr. President, there is one appropriation bill, I understand, that might be dealt with this week, the Interior appropriation bill. Also, the Interior appropriation bill afternoon I intend to discuss with the minority leader the possibility of scheduling the Interior appropriation bill for Friday of this week and perhaps a time limitation on that bill, as well.

In addition. Mr. President, after we conclude the formalities this afternoon, as I understand it, the Department of Justice authorization bill will recur as the pending business. There is an order for a cloture vote on tomorrow. I have discussed this matter with the distinguished Senator from Louisiana and I inquire of the distinguished minority leader at this point if he might be in a position to agree to a time certain for that cloture vote. I suggested to the

[•] This "bullet" symbol identifies statements or inserti ons which are not spoken by the Member on the floor.

Senator from Louisiana the hour of 2 p.m. on tomorrow.

Mr. ROBERT C. BYRD. Mr. President, I am not in a position to accede to a request at this point. We will run some calls on our side and I will report back to the majority leader very soon.

Mr. BAKER. I thank the minority

Mr. President, if 2 o'clock is not convenient, then some other hour, I am sure, would serve equally well, but I think it might accommodate the greatest number of Senators if we could set a time rather than leaving it in abeyance.

Mr. ROBERT C. BYRD. I agree with the distinguished majority leader that it would be advantageous to Senators if we could establish a definite time. Every effort will be made to do that on this side. It is probable that the hour of 2 p.m. will be agreeable, but I will have to get back to the majority leader in the course of the afternoon with the answer.

Mr. BAKER. I thank the minority leader.

FARM BILL

Mr. President, in addition to these matters, the farm bill must be dealt with. I understand there is some possibility that the adversaries in that debate may be close to an agreement. I hope so. There is a meeting to be conducted this afternoon, I understand, between the principals. I hope to have an announcement to make either later today or in the morning on the scheduling of the farm bill. But it would be my hope that the farm bill could be scheduled for debate and disposition in the early part of this coming week.

In addition to the farm bill, Mr. President, there are a number of other matters, including the debt limit extension.

IMPOUNDMENT, RESCISSION, OR DEFERRAL

The press has carried accounts over last evening and this morning of the possibility that an amendment may be be offered to the debt limit extension in order to reauthorize the system of impoundment, rescission, or deferral authority for the President subject to certain limitations.

That plan is certainly not fixed. It is subject to all sorts of variations. But Members should be aware that there is such an idea that it will be reached at this time and at some point I hope to be able to discuss that matter with the minority leader and other Senators who may express an interest in it.

COMMUNICATIONS ACT LEGISLATION

The Communications Act legislation, Mr. President, is a matter which has been reported by the Commerce Committee, and it is also my understanding that certain amendments to that act as reported are being considered by the sponsors, Member sponsors, and particularly by members of the Senate Judiciary Committee, who have an understandable and appropriate interest in the antitrust im-

plications of such legislation. It is a matter which should be dealt with, Mr. President, in my judgment, and I would hope that the communications bill could be handled as early this month as possible and disposed of on some basis.

The foreign assistance bill is also a difficult one, but it is on the calendar and must be dealt with.

BLOCK GRANTS

Mr. President, at the time we debated and acted on the reconciliation measure below the enate, I made a public representation that in my view and judgment the Congress had not acted in a definitive way on the block grant versus definitive grant issue. At some point I would hope that we would have further debate on block grants and the methods and techniques for implementing them as well.

I would say to my colleagues, Mr. President, that I intend to try to find some vehicle which would serve the purpose of providing an opportunity for debate of the block grant issue.

SOCIAL SECURITY REFORM

Mr. President, once the Finance Committee has reported its recommendations on any amendments to the social security system, we will schedule that for debate as well. It is, as I indicated before we adjourned for the statutory August break, a matter which requires our attention. It is urgently important. As soon as we have the benefits of the recommendations of the Senate Finance Committee and others who are involved, I will make an effort, in conjunction with the minority leader, to schedule debate on social security reform, if such is the recommendation of the committees.

Mr. President, there are a number of other matters that I could discuss. This list is by no means a comprehensive list of items that must be dealt with. It is rather to support the statement I made in the early part of these remarks that there is a great deal of work yet to be done and a relatively brief period in which to do it. One of the items that I fear we must deal with is the continuing resolution on appropriations.

CONTINUING RESOLUTION

In the early part of this year I made a puble statement that I intended, to the maximum extent possible, to avoid the necessity of a continuing resolution. Mr. President, I have to confess now that that public pledge is being washed away in the tears of my regrets. I am almost certain that we are not going to be able to finish 13 appropriations bills and have them on the President's desk for his signature by midnight on September 30. If that is the case, then we must resort to the consideration of a continuing resolution.

I hope that our friends in the House of Representatives will take note of the fact that while they may finish all 13 appropriations bills by the end of the month, that leaves no room for the Senate to proceed nor for Congress to permit the President to consider the measures before he affixes his signature on the bills, and that they will initiate the continuing resolution at an appropriate time. I am certainly not in the business of trying to advise the House on its time schedule, but let me venture the hope that the House will take account of the need for the Senate to act in a deliberate way on any continuing resolution that may be necessary and the hope that they will consider such a measure and send it to us sometime by the middle of September or shortly thereafter, if that is possible to do.

Mr. President, in addition to these measures, there is one other category of matters that I should bring to the atten-

tion of the Senate.

Earlier this year I expressed the hope that the so-called emotional issues, that is, abortion, busing, and the like, might not become the sub ect of intense debate and require a great deal of the time of the Senate as we proceeded with other legislation, that in exchange for that I would make every effort on this side, in cooperation with the minority, to schedule a free standing debate or at least an appropriate vehicle for debate on those issues later in the year.

I have to confess, Mr. President, that I was not altogether successful in that strategy, but we have had limited success. We have had less controversy and less debate on so-called emotional issues this year than has been the case in some years. Perhaps some of that is based on the assumption by Members that we would have another opportunity in another timeframe to discuss those issues.

So, Mr. President, I wish to repeat today that at some point before we adjourn the Congress sine die, it is my intention, in coordination with the minority leader, to try to schedule a time when these very sensitive and very important issues can be debated.

It is my expectation that it will be late in the session, perhaps just before we adjourn. But there will be adequate time. I will make every effort to accommodate the wishes of every Senator in terms of the scheduling of these debates, the vehicle that will carry the debates, and the procedures that are necessary to see that everyone has an opportunity to speak his piece.

Mr. President, this has been a fairly long dissertation, but I felt that this was the appropriate moment to give the distinguished minority leader and other Senators some insight into the situation as I see it for the balance of this session of the Senate this year.

Mr. President, before I inquire about the possibility of a time agreement formally on the military pay. I would like first to yield to the distinguished assistant majority leader.

The ACTING PRESIDENT pro tempore. The Senator from Alaska.

DEATH OF LOWELL THOMAS, SR.

Mr. STEVENS. Mr. President, on August 30, the world lost a truly great man, and Alaskans lost a great friend, when Lowell Thomas, Sr., died in his sleep at age 89.

He was a personal friend of mine, and I am really sad to report this matter to the Senate.

His contributions as a broadcaster, author and world explorer are legendary. He shared with all of us the insight and knowledge he obtained during a life-long quest of travel and factfinding.

Alaskans, in particular, hold a special place in our hearts for Lowell Thomas, Sr. Beginning in 1914 when he first came to our State to cover the gold rush, Lowell Thomas, Sr., was a frequent visitor to Alaska.

His enthusiasm and interest in Alaska were reflected in his writings and broadcasts, and he helped introduce to Americans the remote territory they knew so little about. His lectures and reports about Alaska were based on reality, not romanticism. He told of the promise of our land and of the people he met in the mining camps, in villages along the Yukon River, and in communities from Nome to Valdez. In his words, "Alaska is as close to heaven as one can get."

He was a strong advocate for Alaska statehood, and he understood our State's potential and our problems. In recognition of his many contributions, the Alaska State Legislature in 1976 made Lowell Thomas, Sr., an honorary Alaskan.

His enthusiasm for our State was shared by his son, Lowell Thomas, Jr., who not only moved to Alaska but became one of our leading citizens, serving as Lieutenant Governor from 1974 to 1978.

People throughout the Nation last week mourned the passing of the truly remarkable man who told us so much about the world around us. We in Alaska said, "so long" to a great friend.

I ask unanimous consent that editorials on the passing of Lowell Thomas, Sr., be printed in the RECORD.

There being no objection, the editorials were ordered to be printed in the RECORD, as follows:

LOWELL THOMAS: A FRIEND OF ALASKA

Alaskans lost an old and dear friend Saturday.

Lowell Thomas, Sr. died quietly in his sleep—to the sorrow of millions around the world—but no one ever lived more adventurously.

turously.

He was equally at home in the plains of Palestine and the mountains of Tibet, the corporate studios of CBS and the ski slopes of Colorado. He interviewed potentates and presidents, wrote 52 published books, reported from battle in two World Wars, broadcast radio's longest-running newscast, and prowled the globe as a chronicler of life in the 20th Century.

Alaska was a cornerstone to a career that took him to every corner of the earth—as reporter, professor, author, broadcaster, lecturer, traveler, sportsman.

Lowell Thomas, Sr. first came to Alas'a in 1914, stayed to film its untamed wonders, and became a regular visitor over a career lasting nearly seven decades. He helped Alaskans win their fight for statehood. He wrote of a territory and state which needed under-

standing—and not romanticism. He broadcast the story of a land of great potential, and he convinced Alaskans of their special standing in the world community. He shared with all the wealth of the Great Land.

Lowell Thomas, Jr. followed his father's footsteps to Alaska and became one of the state's leading citizens—an author, politician, pilot and adventurer in his own right. He gave America's favorite adventurer further reason to visit America's largest state, and father and son worked together to tell Alaska's story.

Lowell Thomas, Sr. became an honorary Alaska citizen in 1976, courtesy of the state legislature, but in truth he'd been an Alaskan for decades. It is his example we value—his demonstration that life is adventure, opportunity, challenge, struggle, achievement. This man packed a dozen lifetimes into 89 years on earth.

Alaskans who shared his spirit now mourn his passing.

[From the Juneau Empire, Sept. 4, 1981] So Long, Lowell Thomas

Lowell Thomas traveled the world many times over, and Alaska was one of his favorite destinations. He came here frequently, to explore, to meet the people and to see his son, Lowell Thomas Jr., who was Alaska's lieutenant governor four years under Gov. Jay Hammond.

Lowell Thomas was truly an explorer. He combed the far reaches of the earth—from the Arctic to Katmandu—to find what few men before him had seen and to tell the world about it through his documentaries.

Mr. Thomas was also a journalist of the highest order. For 46 years until his retirement in 1976, he brought the world to his radio listeners with his nightly nationwide CES broadcast, each of which he ended with his trademark, "So long until tomorrow."

He not only reported history; he made it. One of his accomplishments was the first television broadcast of a news program on NBC during that medium's infancy.

For many, his fatherly assurance and sharp, cleancut manner was a certainty in an uncertain world.

The passing of Lowell Thomas, 89, won't go unnoticed by any of us who were enightened by his fantastic endeavors. His funeral was Thursday at Christ Church in New York City and was attended by former heads of state, sports celebrities and a spectrum of world figures who further illustrate the breadth of his influence on humanity.

We all will miss him, but we shall not forget him and his great work. Our sympathy and best wishes go to his family and his loved ones.

So long, Lowell Thomas.

Broadcaster Lowell Thomas Sr. Dies (By Patti Epher)

"The most fortunate Americans are in Alaska," Lowell Thomas, Sr. once told a Florida newspaper.

And from the time the world-renowned adventurer and broadcaster first set foot on the Alaska tundra nearly 70 years ago, Thomas held firm his conviction that Alaska is as close to heaven as one can get on earth.

It's a prestigious legacy from a man who had visited nearly every corner of the globe and set his sights on someday traveling to far-distant planets.

Thomas died in his sleep Saturday at the age of 89. His death, which left an entire nation mourning his passing, has a special impact on Alaskans.

He gave Alaska a place in history when

he wrote of his travels here. He gave it status with a far-away Congress when in Territorial days, he told uncaring federal legislators of the region's potential.

And he gave it a son, Lowell Thomas, Jr., when he sent the teen-age boy on a mountaineering expedition with Brad Washburn. The boy, who fell in love with the wilderness of Alaska, remained to become one of the state s foremost political leaders and citizens.

"Throughout his career," wrote one longtime Alaska newspaperman, "one of the foremost problems of Alaska was the need for understanding. Thomas helped meet that need."

The elder Thomas made his first trip to Alaska in 1914, before Anchorage was even a tent city on the banks of Ship Creek. His journey was prompted to talks with men who had been in the original Klondike gold rush and with whom he had worked in the gold fields and mining camps of the West.

gold fields and mining camps of the West.
For many years following his first trip
to Alaska, Thomas continued to return to
the north country. He traveled all over the
state, from Fairbanks to Valdez, from the
mining camps to the villages and up and
down the Yukon River.

He found good company here, spending endless days traveling and talking with such colorful pioneer personalities as Gen. Wilds P. Richardson, for whom the Richardson Fighway was named; Jack McCord, a man whose talents ranged from prospecting and mining to exploring and developing; and Bishop Peter Trimble Rowe, the first Alaska bishop of the Episcopal Church who established missions along the Yukon, Tanana and Koyukuk Rivers.

After Thomas became a lecturer and nationally known radio broadcaster, he recounted his travels with these men in his lectures and programs, bringing Alaska a little closer to the rest of the country.

In 1978, as a gesture of appreciation for the support Thomas had given the state over the years, the Alaska House of Representatives bestowed upon him an honorary citizenship in the State of Alaska even though he had never resided here.

Thomas, who disliked being called a prophet, nonetheless predicted that Alaska would be the site of major development.

"They say the Arctic will become the Mediterranean of the future," he once said. "The con" nents are so close together in the Arctic that it's bound to be the center of things for a lot of people."

As Thomas himself said in his autobiography, published in 1978; "Has anyone ever had to respond to the question how was your trip?" More often than I? Starting with a journey to Alaska in 1914 and down to last week, I have been endlessly prowling the earth's surface, seas and airways, seeking the magic that, for me, lies beyond every horizon."

OLD YARNS, PLANS FOR FUTURE MARKED FINAL VISIT WITH "LT"

(By Bill Tobin)

Just four weeks ago, surrounded by old friends at the Bohemian Grove near San Francisco. Lowell Thomas, Jr., and his world famous father relaxed together and spun yarns of adventure of the past and anticlpated more still to come.

Heading the list of all things yet to do, the younger Thomas said here at his Tanains Drive home Saturday, was the planning for a 90th birthday party for his father—"something really special."

It was to be, this event pegged for April 6, 1982, an expedition to the Vale of Kashmir—the levendary "Happy Valley" in which is located the city of Srinagar, close by the border of Tibet. At an elevation of 5,230 feet,

the Vale of Kashmir is dominated by the towering peaks of the great Himalaya and Karakorum mountain ranges.

There weren't many places in this world that the senior Thomas had not been, in a life that was marked by love of people and love of exotic places. But the high country of Tibet and India was one place that lured him throughout his career as a broadcaster, adventurer, explorer and author.

And it was to Kashmir that Lowell Thomas, Jr., and a long-time family friend, Thomas Watson, Jr., turned when they looked ahead to a 90th birthday party that would indeed

be special.

Tom Watson was down there at the "Tom Watson was down there at the Bohemian Grove and we just wanted something to be very special," Lowell Jr. said as he and his wife, Tay, made plans to leave Saturday afternoon for the long trip to Pawling, N.Y., where Lowell Sr., who died suddenly of a heart attack Friday night, will be buried.

Watson, former U.S. ambassador to Russia and an old friend of both father and son, is the son of the founder of International Business Machines Corp., and is himself a former head of IBM. "He and my dad have always been close friends, and I used to ski a lot with him when I was a kid, way back in the

Added Thomas: "Tom put on a special deal for my dad on his 85th birthday at Vail,

Colo., a real skiing birthday.'

Lowell Jr., former Alaska lieutenant governor and a film maker of considerable accomplishment, now operates a bush flying service out of Talkeetna, among other things serving mountain climbing parties on Mount McKinley. He's an expert skier, as was his father.

"He was still actively skiing on his 85th birthday," Lowell Jr. said, recalling the birthday party four years ago at Vail. Because of that, "Tom Watson wanted to be of help on the 90th."

Watson also had entertained the elder Thomas on his 88th birthday, inviting him to Moscow for a party at the American

Embassy.

His death was a stunning shock to those who had known and enjoyed Lowell Sr., and who always were amazed at his vigor and spirit.

"He was in great shape," his son recalled of their last days together during the visit just a month ago. "But being 89, you could see that he was starting to show a little of his age. But he was going strong right up to the end. He was an achiever right to the

"Just last week he was in Colorado, and was master of ceremonies at an annual Golden Plate Awards dinner held at Colorado Springs," he added.

Most recently he had been doing a series of radio announcements on the aging, focusing on the number of older people who have been active and accomplishing things down through the ages.

"He was a living example of that, right into his 90th year.

"Just thinking about it this morning, I don't know anybody who has achieved more in his lifetime—or had more careers, all successful.

"And I don't know anybody who has had more fun.

"He just loved people. A lot of his writings, you know, were biographies—Lawrence of Arabia, Jimmy Doolittle, Felix von Luckner, the German submarine raider of World War I who was a very benevolent type of fellow who was noted for taking crews on board before he sank their ships.'

Lowell Jr. refers to his father most often

as "LT," and his memories are peppered with the marvelous experiences that occupied the life of his father.

"LT got into radio back in the very beginning-back about 1929, I guess," the son recalled. "For a long time he had the air all to himself. He used to joke that Walter Cronkite was in knee-britches when he was starting in radio—and people like Dan Rather probably hadn't even been born."

Lowell Jr. and Tay Thomas left Saturday for the trip east, and their son, David, was to take a later flight today or Monday.

They will be joined by their daughter Anne, her husband John Donaghy and their one-year-old daughter Taylor. John and Anne teach at Kimball Union Academy in New Hampshire.

Lowell Sr., his son said, had been a member of the Bohemian Club in San Francisco for many years. The famous organization was formed in the 1880s by a group of San Francisco newspapermen and artists, and its membership roster is a blue-ribbon collection of some of the most famous names of American industry, science and the arts.

"Dad got me into it about 15 years ago," the younger Thomas said yesterday, "and I try to get down for the annual encampment the last two weeks of July at Bohemian Grove about every other year. I was there for the last week this year, but LT was there throughout."

It was a gathering of warm friends and a replenishing of remarkable memories—the kind of memories and recollections that flooded the mind and heart of his son Saturday as he prepared to travel for the funeral one of America's best-known and bestloved figures.

"He was a fantastic person," Lowell Jr. said. "I don't think there'll ever be another like him.'

THOMAS' REAL LIFE ADVENTURE LIVENED BROADCASTS

Newscaster Lowell Thomas inspired his broadcasts with background material from his own colorful personal experiences.

He had been a newspaper reporter, college professor, world traveler. During college days he worked as a janitor, salesman and night cook in a short-order restaurant. He served as chief of a semi-official civilian mission that went to Europe, with President Wood-row Wilson's approval to prepare an histori-cal record of World War I. He was a confidant of Lawrence of Arabia and interviewed potentates in far-away places.

Thomas traveled in the Far North and in the tropics. He visited pygmy tribes in Africa and went on tiger hunts with the Prince of Wales (later the Duke of Windsor) in 'ndia. He penetrated the Interior of Alaska. Many of his travels were "on the fringe of explora tion," as he expressed it, "though everything was on my own."

In World War II the commentator toured both the European and Pacific theaters operation and broadcast on-the-spot close to the scene of action. During the closing days of that conflict he flew over Berlin in a P-51 Mustang reconnaissance plane, with another fighter as an escort, at 6,000 feet. Below him much of the Nazi capital was in flames.

Thomas suffered a broken right thigh bone when thrown by a horse in the wild mountains of Tibet in the autumn of 1948. He had to be carried by litter for 20 days before reaching a place from which he could be flown to Calcutta. He said he "wouldn't have come through it" but for the help of his own son, Lowell, Jr.

The accident occurred in a 17,000-foot high Himalaya pass shortly after the Thomases had left the Tibetan capital and "forbidden city" of Lbate.

During Thomas' visit he received messages written on parchment from the Dalai Lama, the then-15-year-old ruler, and from the regent of Tibet for delivery to President Harry S Truman. Thomas said he found Tibet the "anti-Communist country in the world."

But on Oct. 23, 1960, China began invading Tibet. In 1958, with China in full control Tibet, the Dalai Lama flew to India. Thomas became head of a committee in the United States which raised money and supplies for thousands of Tibetans who fled to

Besides his lecturing and radio—he was still broadcasting at 75—Thomas had a part in producing Cineorama, three-dimensional movies. He also authored a biographical.

travel and adventure books.

His books included "With Lawrence in Arabia," an account of the exploits of the almost legendary Englishman in leading the tribesmen against the Turks and "Count Luckner, the Sea Devil," a biography of the

celebrated German raider of World War I. Reports to the Securities and Exchange Commission showed that in 1948 Thomas received the second highest salary paid by the Columbia Broadcasting System to performers on its network. This was reported as \$420,300, before taxes, and was exceeded only by the \$410,514.16 paid Arthur Godfrey.

Lowell Jackson Thomas-he did not use the middle name-was born April 6, 1892, at Woodington, Ohio, next door to the birthplace of Annie Oakley, the famous rifle shot—but was reared in a gold camp at Cripple Creek, Colo.

He worked for newspapers in two mining towns and later for The Rocky Mountain News and The Times in Denver, and The Chicago Journal. He also represented a newspaper syndicate abroad. That syndicate, headed by The New York Globe, served a number of newspapers.

His father, a doctor, had a strong dislike for incorrect speech and insisted on his son practicing correct diction. Lowell Thomas never forgot that early teaching. His style as a news commentator was clear and brisk.

Thomas was educated at the University of Northern Indiana, the University of Denver, Kent College of Law in Chicago and Prince-ton University. He taught oratory at Kent College of Law, and English literature at Princeton.

In his World War I historical work, he was attached at one time or another to all the Allied armies. He arrived in Europe just a week after Gen. John J. Pershing. It was while in Italy that he learned the British were about to launch a campaign under Gen. Edmund Allenby to drive the Turks out of the Holy Land.

Thomas' imagination was fired by thoughts battles at Bethlehem and Jericho, Australian horsemen on the Jordan, a division cockneys from London camped on the Mount of Oilves . . . and, above all, the conquest of Jerusalem." He decided to transfer his activities to Palestine.

It was in Jerusalem that he met Lawrence of Arabia, world famous for his exploits but so shy that he was almost unknown personally. Thomas said of him.

"The young Oxford archeologist who, when the war broke out, had been working at the study and excavation of the ancient cities of the Near East, now had become a mighty sheik of the desert."

Thomas persuaded General Allenby to let him join Lawrence and his army of desert nomads. It was between battles and skirmishes that he obtained the leader's story and made motion pictures.

Until he started newscasting in 1930, Thomas was best known for his book and lectures about Lawrence. After giving his lec-ture first in New York, he went to London and drew overflow crowds. His program included motion pictures and a symphony orchestra.

Upon completing his London engagement, Thomas went on a tour of the provinces and then of the entire British Empire that

lasted for two years. From the Near East he went into Germany at the close of World War I and was an eyewitness there to incidents of the German revolution. He made a report to the Peace Conference about what he had seen.

In 1939 Thomas broadcast the first television news program for the National Broadcasting Company. For a number of years, starting in 1925, his was the voice of Twentieth Century-Fox Movietone.

His favorite sport was skiinghigher the mountains the better he liked it. Thomas made his home at Pauling, N.Y.,

and did most of his broadcast from there. The 15-minute period between 6:45 and 7 p.m., Eastern time, was reserved for him for many years.

In the Spring of 1968 Thomas was honored by the National Association of Broadcasters, who presented him with their Distinguished Service Award. In May of 1938 he was given the Personality of the Year Award by the International Television Society. And later that same year, he and his son, Lowell, Jr., brought out a new book entitled "Famous First Flights That Changed History."

In the spring of 1969, Thomas and his son were in the Arctic together working on a film production that told the story of the discovery of oil in the North Slope and what this meant to Alaska.

Early in the 1970s he was on his way around the world for the second time in six months. This time his journey included the royal wedding of Kathmabdu in Nepal, then shikar in Nepal, where he and his group filmed the rare one-horned rhino. They also captured one to bring back to an American z00.

In an interview on his 80th birthday, Thomas said, "Looking back from 80 years, I'd say it was rather silly to do so many things-except it's been so much fun.

"Maybe the reason I've enjoyed it is it hasn't given me time to think. You're only unhappy when you have time to think. Mine has been a world of adventure, a world of work. It's been a night and day thing-I often envy my friends who can close their office at 5 o'clock."

Asked to what does he owe his success, Thomas replied: "I've been rabbit hunting game all my life. I learned it's just as easy to shoot a lion as a rabbit."

And as for his philosophy: "I've never been out to save the world. The world has gone to hell many times. I couldn't save anyone's soul-not that I have anything against missionaries."

Although at 89 the globetrotter and newscaster hadn't regularly worked on a newspaper since the early 1900's, he still considered himself a newspaperman. "That's the way I started." said Thomas who was still doing his Monday-through-Friday newscast for CBS radio. When Sept. 29, 1975 rolled around, he logged his 44th year on the network.

On May 29, 1975, Lowell Thomas was selected by Sigma Delta Chi to be among ten honored by their first New York Living Journalists Hall of Fame.

Thomas's wife, the former Frances Ryan, whom he married in 1917, died on Feb. 17, 1975 at age 81. They had traveled around the world together, filming scenes from remote regions and presenting documentaries to audiences in many lands.

The Thomases' only child was Lowell, Jr., former state senator and lieutenant governor of Alaska.

On May 14, 1976, Thomas quit his night news show to devote more time to other news show to devote more time to other projects. He said he expected his new television series "Lowell Thomas Remembers" would keep him busy until his 90th birthday. He had turned 84, April 6, 1978.

If that fails he said, "I always have my business interests."

And he had plenty of those: He was

And he had plenty of those: He was founder and principal stockholder in a communications company which controlled six television stations, 7 AM radio stations, a magazine publishing company and a number of newspapers.

Thomas was also at work on his memoirs while a biography of Gen. Jimmy Doolittle was scheduled to be released shortly to add to his 52 other published works.

Thomas' news show was the longest running network newscast, 46 years.

When asked if he were really retiring, he replied: "Not on your life."

In January, 1977, the famed newscaster was married in a small private ceremony in an old whaling port of Hawaii.

Thomas, 84, married Marianna Munn, 49, a former executive director of the American Colony Charity Association in the Middle East. The couple planned to visit Washington, D.C., before leaving for Asia and the Near East to work on a television project.

800 HEAR PEALE PRAISE LOWELL THOMAS (By David Bird)

A funeral service for Lowell Thomas at St. Bartholomew's Episcopal Church yesterday drew 800 people, including former President Gerald R. Ford, Vice President Bush and Sec-retary of State Alexander R. Haig Jr.

"In my book there was never anyone like him." said the Rev. Dr. Norman Vincent Peale, a longtime friend who delivered the eulogy at the church, at 51st Street and Park Avenue

Looking down from the pulpit at the goldflecked coffin draped with the church's embroidered pall, Dr. Peale described the vet-eran newscaster as "one of the most remarkable men of our time, or, indeed, of any time."

Dr. Peale said that Mr. Thomas, who died at his estate in Pawling, N.Y., last Saturday at the age of 89, rose from humble beginnings in a "personification of the Horatio Alger tradition." He said the broadcaster always had a desire to excel and to explore, and always cared for people.

"He loved people from the greatest to the least, and the least were also great." Dr. Peale sald. "He had many friends and no enemies at all, ever."

DESCRIBED AS A "CHARACTER"

Dr. Peale, the chief pastor of the Marble Collegiate Church in Manhattan, was also a Dutchess County neighbor of Mr. Tromas. a Dutchess County neighbor of Mr. 1 office.
He described Mr. Thomas as a "character" in a world that "needs more different and exciting characters." He had a "strong, resoendeared him to the millions who tuned him in."
